Keshe Foundation -- KNOWLEDGE SEEKERS WORKSHOPS

Note: Transcripts has not been checked by KF. Please listen to original recording. (Transcripts by KF Brazil)

(*Note: The KSW 1, 2, 3 and 4 are Auto Transcriptions, and they were not proofed.)

(** Note: Around the 94th Workshop they start to become more like transcripts of the workshop, before that they are mostly summaries of the important points made in the workshop.)

Important Information:

The KSW contain massive amounts of mind-blowing information, so in order to help facilitate our study and to better digest what Mr. Keshe is teaching, a KS has been organizing the KSW in Transcripts/Summaries.

Keep in mind that these transcript/summaries are a work in progress, and not at all complete. But having said that, they contain huge amounts of information, that becomes available to everybody immediately.

The transcript/summaries contain:

Number of the workshop; Date
Original transcript (word for word, time marks every 2 minutes on even number).

The KF Brazilian community has create a Channel on Archive.org called “Keshe Brasil Tecnologia do Plasma” (https://archive.org/details/@keshe_brasil_-_tecnologia_do_plasma). On this channel you can find all these Transcripts and other easy to read English Summaries. If you have any questions or comments please contact us so we can better serve you.
You can also find these transcripts in our Telegram Group Keshe Brasil Knowledge Team: https://t.me/keshe_brasil

We really hope you enjoy this amazing gift of Knowledge of the Universe that Mr. Keshe is lovingly and freely sharing with humanity.

1st Knowledge Seekers Workshop March 6 2014

Auto transcription by Elias. This document needs to be proof read.
April 18, 2023

(Silence)

(RC). So, we can begin now perhaps, with just the official opening of this workshop,
which is the first Knowledge Seekers Workshop,
coming from the Spaceship Institute, part of the Keshe Foundation.
And we have some of the Knowledge Seekers from the Spaceship Institute
with us on the Skype line, as well as some people
over quite some period of time into, in the Keshe Technology.
So, in the first half of the... first part of the show, the first hour or so,
we'll have mainly comments from the people from the Spaceship Institute,
delivering the information that they would like to put forward at this time.
And then we'll have more of a question and answer session after that.
So, I will turn over the conversation to the people from the Spaceship Institute,
And if you'd like to introduce yourselves a bit first,
and then we can carry on.
(KD) So, do you want us to each give a small introduction of who we are?
(RC) I think it'd be great if you'd each just say who you are,
and a short thing about maybe why you're there,
and then we can carry on after that, sure.
OK, ladies first.
Hello, everyone.
I'm the Knowledge Speaker from Japan.
My name is Yukako.
I was in the ninth workshop.
So some of you probably already picked it up.
And then I'm currently work mainly about the Fukushima
issue.
So we already started the nanomaterial
to send it to the Fukushima NPO, or Seville NPO,
gave us the contact since last workshop.
So at this moment, we are in preparing stage.
But I hope we can send it by the end of month
to start the examination in Japan.
Thank you.
I pass to John.
OK, my name is John, John Skelton.
I'm coming from Belgium.
I was born in Africa.
I have links in different areas.

I'm interested in the opening of this knowledge
because it goes in this straight way to follow what's my understanding of matter,
of knowledge of, about the Universe and ... this is ... new opening in new areas
and ... I'm very happy to start this ... Knowledge Seeker and ...
Well, I'll be there for helping each of you to understand what my knowledge is.
I have to give it to you. So, that's my position, yeah.
Hello, I'm George. I'm a Spanish speaker from Knowledge Seeker.
I was born in Spain and I propose this to share knowledge and to serve humanity.
So anyway, I'm Marko, I'm coming from Slovenia and I'm also a knowledge seeker.
I really like to participate in this group, which is a group of scientists from all over the world.
and this is the way that people should cooperate in the future
without any borders, no matter which language people are speaking.
The intention is more important than language and country which we are coming from.
and I'm glad that I can cooperate with knowledge seekers
from different parts of the world.
And I can say that we are living together
without knowing each other before.
We are living more or less in one house.
I hope that also other people around the world will follow this way of cooperation.
Okay
Harmony's not there, so he'll be you have to introduce himself
Maybe but I'll give a few words. He's from the United States, LA
and
He's very happy to be with us also as a knowledge seeker
So we wait for him we are waiting for him, but we can start
You'll be coming probably soon
Excuse me, sir. What was his name?
Armen.
We have a secret. He is not here with us.
From Belgium, he went to Meshel.
And he spent some time in Belgium and some time here.
We share our home, we have a dentist in Belgium.
We have a common person, we know each other through a common person.
Still we have one more secret, he's my...he's my...our creation.
We have a knowledge seeker from Africa, we have a knowledge seeker from Africa, he'll
[inaudible]
And hopefully
the table will be complete as a main group.
[inaudible]
From what we have seen here in the past three weeks,
we will launch a new
cycle of noise security.
or bring in the second group of non-secrets on.
So I leave it to the rest and we are talking.
Carry on.

So, at this level are there already a few questions happening, coming up?
My question would be, now at this moment, if you have any questions about one of us.
Sir, no questions?
Well, I can ask a question if nobody has a question.
I feel that what you are doing is groundbreaking.
It's a great forwardness on the part of Mr. Keshe to educate people.
This is new school teaching.
Mr. Keshe, I was privileged to listen to Mr. Keshe from the beginning of his workshop.
workshop and he has given very instrumental information and has people thinking with their
head on a different way on about the universe and about the body and I hope that people that are going to listen to you and your groups seeing all these new way of thinking.
Am I right?
That's what he's doing all of this thing?
Well it's a progression because things have to be understood
and the way of doing things slowly at the beginning
happens to become faster and faster.
We are understanding, we have started understanding before coming here,
we are progressing fast in the way we are doing things now.
Soon we should be even able to fly the reactors.
So that's something that is going to be happening quite fast now.
So we are there because we like to learn, we like to give of our understanding.
So we'll progress, we'll go forward.
So you see it's not a new aspect, it's the following what has been done before.
Yes I agree with you sir, it's not new, but it's new to people that have not listened to Mr Keshe.
And Marco, I know Marco quite well.
Hey Marco, hi, it's the dragon there.
Marco from Slovenia knows me very well.
And I'm so glad that Marco is part of your group
because that's the point of the more people can learn
about the new technology,
the more people can educate people
of the new way of thinking,
of this way, of this way from different thing,
different, they think different way of different background.
It's very important also that I've seen everybody has different type of language,
which is something of importance as well.
Wouldn't you say, sir?
Absolutely, I agree with you.
as possible language speakers here, as possible different language speakers with different language speaking roots.
And the aim of this spaceship institute is to learn new understanding of gravity,
our environment, new understanding of physics, and to pass this knowledge to all the people around the world.
This should not be just for a small group of people.

Everybody should be learning this new understanding, this new knowledge.
and
We will try to
pass all our
experiments
all our
how can we say
everything that we learn
we try to pass
to
to
internet
to people who are interested
to learn
But we can pass this knowledge but also we need support from outside
so it should be put some effort from people from outside to learn this
We can supply support but then it is the choice of other people to participate in this problem.
Hello everybody, my name is Armen.
I think you all know me.
Morning Armen.
Hey Armen, how is your tooth?
Oh, it's gone.
Pain is gone.
How are you, Luzner?
Good, good, good.
Hello, Armen.
I'm sorry, dear, but the voice was very muffled from the answer.
I could not hear the answer.
Not on my, but everybody.
And I think that you had something of importance to say.
So I think maybe you should have the people repeat it because it was on audible air.
Oh, you know, doesn't matter.
Everybody over here, they think the same, you know.
And whatever we say, it's from all of us.
And, you know, it's a tremendous feeling when you understand the technology
and the point that you want to pass it through,
because this technology, it's not only for us, guys.
We are over here to learn,
and details pass it every single time when we meet.
And please, what I'm going to ask you to do the same,
because if we hold this technology,
we're not going to come to the point to true understanding.
and the whole humanity should be thankful to one soul
that it passed it through.
And we all know who is that soul.

- Thank you, that's a good point, Herman.
- So it's, I don't know what's happening there,
with that noise.
So let's go through to the next part, the most important.
What is most important?
I have a last question before I will stop my questioning.
I know there's a big interest in in Europe and in Asia that you have spoke about.
What about the United States?
Besides all of us guys like me and Rick and Vince, where do you see an interest in the United States?
And do you see seeing that the way to go is peaceful and stuff like that?
Do you see that?
For me, it's no difference, United States or whole world.
You know, and every government, scientists,
you know, people who understand, they should come together.
Because this technology is not to solve for a small group.
The group, it should be so big, so huge,
that it can happen instantly.
And we are asking, guys, to write your government
representatives, scientists, to spread the word
that they can come together.
This is the only way.
If you can understand, you know, totally this technology, it's so simple.
Well, I would be adding one aspect which is for me very important.
Technology is one aspect of our life.
What is the most important is what each person on the earth will choose.
And the key factor for me is love.
We have to understand what is love, what is loving the other, what is in fact the main aspect we have is the gift of ourselves.
And that's what has to become the main axis in the understanding of the whole humanity which is one and we all belong to that humanity.
We have to get out of the middle ages and start looking at the real energy of love which has to become something that each will understand and if you feel love you cannot resist.
Of course, that's the way to go.
Mr. Cash, you're there and you hear me and you know me, I always feel that love is the way to go.
I mean, you can have the best advice that you want, but if you don't have love behind this, it's not going to work the way you think it's going to work.
Right?
Am I correct?
Yes, in a way.
I'm too far.
Yes, in a way.
I am too far.
Yes, in a way. I am too far.
I am sorry, I am ahead of my time. I am sorry, but I believe love is the way to go.

You know what I am saying?
I am a listener today.
What?
So, I am just a listener today, because I do enough talking.
So, what the whole thing goes, I was in a meeting yesterday, and it was an amazing meeting with officials,
and when I told them, "My technology belongs to your nation, free",
literally one of them, the doctor, fell off his chair,
because everything to him had to have a value and something to pay for it.
And, when I said, "This is how the Foundation will work",
he said, "This cannot be understood, because we have to pay for everything."
And, when I said to him, "We donated, we've given the generator development freely to the Italian nation,
Italian company, and the condition is that no parts can be made out of Italy,
has to be made for Italian, by Italian.
They said, "You are changing the course of humanity", and I said,
"That's the whole purpose of the Foundation."
So, I think the group here exemplified the whole thing.
We are here to serve, and each one of us in our own way.
And I am going to shut up because I won't stop.
(laughter)
As I always said, you are a very gracious gentleman,
because you always and always answer my questions to the fullest.
Is that right?
I don't know.
I have a special question and you answer a special thing.
And on that note, like I said, it was my last question.
I must say I have to let you guys go because it's 2.30 in the morning my time.
But Mr. Keshe, I will be there in your next thing and I will be working very closely with Diva to put everything that we have said into motion.
So on that note, I wish everybody a good night.
Good night, everyone.
Good night for you.
Thank you very much Lady Dragon for your comments.
Good night.
And your support.
[inaudible]
[inaudible]
[inaudible]
Sure.
That's why we are here.
... I'm here from the Netherlands and ... I've been busy this week ...
for the Copper plating of the inside of the cores.
And ... it's, it's looking very good.
But ... Mr Keshe ... said ...
... make a ... how do you say ...

between the two half cores make a contact for the nano layering
otherwise the two halves won't communicate.
What kind of connection does he mean?
Is it with a wire or the nano layers connected or something?
If you use copper and you directly make the layering on the copper, the layering of the nanomaterial, the same way you make it with the wire, then the spheres would be not connected.
So it depends on the way the system is made.
For example, if a gear would like to use copper foil, nano coated, then the contact would still be there between the two spheres.
The contact disappears when you make the coating on the copper, because they are put in the
caustic.
If you make, first of all, the copper foils, nano-coated, and you glue them inside your reactor, the contact of the two spheres, two half spheres, will be maintained.
So in this case this would not be a big problem, the contact is already there.
Have a look at the last picture that has been sent.
Yes.
Yes.
So you see that as you are working together with Geert this will be a help for you.
The last thing you said I didn't understand.
(RC) Let him.
(JW) It's a help to Geert and as you are working together,
will you can help him to understand.
Just see at the last pictures that have just been put,
are posted on the link.
Would that be number 4463 that we see up right now, for example?
Yes, that's what you see now.
In fact, in this case, it's a
gravity sphere, with the forks,
the copper forks, all on the roof.
So basically the two nano materials need to be connected.
Let me explain one thing.
Nano materials only cover the matter.
So the curtains are over there to cover the matter.
So plasma cannot see the matter at all.
If the plasma touches the matter, it will disappear.
So, the curtains are over there to cover it.
So, you have to cover all the matter away, that the plasma is not going to touch.
Okay, so in this case...
And when you're gluing it, you know, a little bit like in the middle of the sheets that, you know, the glue will not leak to the sides because it's important.
So basically if you have two spheres with a flange and you cover the flange too, that's supposed to do the job.
If you see the pictures, there are two spheres, two half spheres, and you see the curtains that it's been glued from the side.

So when you're closing the globe, it's like you're covered with nanomaterial.
So there is no matter.
So when the gas is entered there, when the plasma opens, it's not going to touch the
So you are going to maintain the plasma.
Okay?
Yeah, that's what I am saying.
If you have two half spheres and there is a flange on them, and if you cover the flange too, the two nanometer flanges…
You don't need to.
If you do that you would have more leaves because you wouldn't have two halves that could be completely seen together.
So you have to be careful not to have leaves.
So have the flatness of the plant.
They have to come together so the sphere will be completely sealed.
And you're going to put the silicone?
You see that this is one half of the sphere.
This is a kind of a nano-coated copper foil coming out of the half sphere.
And you're going to see that on the other half.
Right.
You see that?
Well, how we do the nanocomposite cover for this?
Can the halves have to go into the other half sphere when we close it?
It's like a curtain!
It's just to cover the...
When you close your two halves with the silicon,
If you get any silicon going inwards,
to the center of the core, those curtains which we made,
will cover it, so the plasma does not see matter.
That's the purpose of it.
But are the upper and lower parts actually
physically connected by the copper substrate
material, like do you have to scrape, or otherwise connect directly?
The vacuum, this bit of copper which is sticking out, on one half, behaves or is used for two purposes.
One is to keep a nano-layer in facing the plasma, which makes it easier to break it up and contain it.
And the second purpose of these skirts is when the core rotates, it creates a dynamic plasma,
Because these are loose, so on the free-use allows and creates turbulence in the outer layer of plasma, which gives the plasma the rotation.
Because I have seen, like with the reactor from Marco, he is using smooth stainless steel for two cores, inner and outer.
If you have a very smooth surface, how are you going to create rotation in your plasma?
The reactors need flanges, or they need indentation on the surface of the core, inside and outside,

or you adjust or add wings to your central part, or you make shears, or kind of wings internally,
to create that turbulence which allows the rotation.
A smooth, smooth reactor, like stainless steel, with no wings on it, or whatever,
it will be very hard to rotate the plasma.
It's a smooth surface rotating.
So, what's the purpose of these copper skirts is to stop the silicon, when you close the two halves,
to come into the reactor to be seen by the plasma, and secondly creating a turbulence.
I would like to explain two things with these reactors, what you see.
This reactor in front of you is a gift from Iranian government to the world.
These were made in Iran by the Iranian scientists, and this is part of the original reactors which flew
anti-gravitational system in Tehran.
So, what you see there, it's a combination of what's been developed,
and what you see on the other hand, the copper layers which has been glued on,
this is the mystery which I've been telling you for some months,
that if you have two mobile phones anywhere in the world,
you can create as much energy and food and whatever you like, even lift,
with the two mobile phones.
And everybody thought it was about to do the microwaves and the rest.
No, the secret is here on the table.
You open the two batteries in your mobile phone,
and use the copper foil to cover anything you have, and create a rotation.
And that becomes the source of your water, energy, and everything else you need.
Everybody was looking how the water is going to drip off the mobile phone that they can have water from it.
But, this is the secret. This is what's sitting in front of you.
You open your battery, you wash the copper foil of your battery, you put it in a caustic,
It comes down to the way we showed in the Fukushima situation.
You cover two boiling, two copper bowls, or two any bowls, even a plastic or clay, or ceramic, the way John is doing.
That's it. You can start absorbing energy, creating things, use a Coca-Cola bottle to create the hydrogen
for the feeding of it.
So, in a very simple way, what you see in front of you
is a total knowledge of humanity.
Everything you need.
And, as I said again,
it's manufactured by the Iranian scientists,
engineers, and the scares put by
Czech Republic scientists.
The other half is done by the
American, Armenian, and very soon it will be tested by a bunch of scientists from all over the world.
This is the beauty and simplicity of this technology.

Mr Keshe, are you talking about the current picture that I have up,
the 4413, would that be an example of what you are talking about?
Yes, the two halves of the skid tunnel.
Okay, there's another one I've got up now...
This is the same picture in two different halves.
So, it's covered on the inside and the outside of the reactor, in this case?
Yes, yes, because this is the inner part, this is the inner core.
Got it, right. Yeah, so it sits in another core.
So, if you look at it very closely,
this is the inner core,
separation between the Carbide core and the Atom core.
So, you coat it both sides with Copper Oxide from your mobile phone,
and as you see it, you can, if you look into the picture,
you see black material and blue or green.
This is a different layer of oxidization of nanomaterial, different type of it.
And you need this mixture.
The only thing is, when you touch these materials, you have to wear protection gloves,
or protect yourself, because these nanomaterials can go in your body,
absorbed by the blood.
So, this is one of the things you have to watch, but this is the beginning of,
of what you call it, the anti-gravitational system, or what we call the MaGrav system,
energy system, if you operate it the right way, you can produce any material from this simple reactor.
This reactor in conjunction with its outer core, I don't know if Marco can put a picture up,
this is one of the first series of flying reactors in Tehran.
So, we know it works, we have seen it working, I have tested it myself, and so many times I had to catch it when it flies in the air.
So, it's a lot of hard work, what the skirt you see on the half, I think it's taken Marco about a day to do it.
It takes time, you have to glue it properly, and then that's it.
This is a copy of the Earth, and it can give you whatever Earth can give you.
Energy, water, material, you just got to start teaching how to operate it, to produce what you need.
So, maybe as a joke, but as a reality, if you were waiting for your mobile phone to drip gold out of it,
now you've got it, you've got what to do with it.
You can use the keyboard as an operational control,
but you need the copper foils inside your mobile battery,
to be able to condition the environmental and the environment of nano-material or GANS,
that the plasma is comfortable with, because it's made of the same thing.
The reason this coating is on is because nano layers are more or less GANS layers.
They are in a spherical energetic level.
So, they are the same as what the plasma is opening into.
So, it's comfortable and you can do all sorts of games with the plasma.
I leave it to the rest. Sorry to interrupt.

These things need to be explained in the steps that people understand.
and as we have opened the technology, we are not leaving anything out, there is a key missing.
There will be nothing missing and we explain everything and the knowledge seekers, according to their understanding, explain what is going on.
But, this is what we say, this is an international collaboration,
and I have asked if it is possible by end of March that we have the first flying system or the energy system here in the Institute, built by the Knowledge Seekers shown to you.
As you see, everything is open. This is the lab where they are working.
Everything is very plain. Everything, whatever is available to us, is on the table.
Thank you very much.
So next quick question guys, do the layers are created by different chemicals or?
You have to repeat the operation of coating.
It's by multiplying the layering just as it has been told for Fukushima.
You make the first layer, you put it in caustic, you get it out 24 hours after, you leave it in the damp atmosphere.
After that you'll have the first coating.
You put it back into caustic and you repeat the operation.
the operation will put up multiple layers and those multiple layers will vary in the size of the holes you have in the layers and you will have a whole spectrum of fields that can be used to be captured that will be in fact happening to create, to help the creation of the plasma condition in the reactor?
I'm asking this because I play only with wires so far,
and I never got the green covering, I always get the black one.
That's why I'm asking.
After you have made the coating, you have to slowly open the box so the material can dry. The drying has to go very slow. So don't bother with the sun in black. The green color
(inaudible)
Are we connected?
Are we still connected? Do you hear us?
Good morning, John.
Hello, Dave.
Dave here.
What material is the plastic housing on the spheres?
Is it PET?
Doesn't matter what material you're going to use.
Really?
Yes, still you're going to cover it, correct?
Yeah, with the copper on the interior?
Huh?
With the copper on the interior?
Yes.
You take small pieces of, as you know, the batteries of the cell phone, that have to be cutted, and you just take scissors to cut it into pieces that you need, and all those pieces have to be glued.

So, I see a question here, how to open without hurting ourselves?
without hurting ourselves.
So, you take glass and be careful,
I told you to do, you have to first open on the side
and when you open on the side, there is a battery,
you have a piece coming off and afterwards you can completely,
just as you would open the sardine box,
a sardine can, just open it.
And once it's open, you'll see that the copper foil is rolled
in a flat shape and with one foil of aluminum,
one foil of copper, and in between you
have a black chemical that is of no use for what we have to do.
The coating can be in some ways helped by using the aluminium foil,
putting a little bit of it, it will activate the coating as well.
So if you add some potassium to the caustic,
so you have potassium that will help for the coating and adding aluminium will help also.
I have another question if I can, I sent a picture from my copper layering from my course,
So, maybe if I nano coat the inside like it is now,
and I glue a skirt to cover the seal between the two,
I believe this will work too.
Yes, this could be very well.
Well, what I see from your picture, it is quite interesting to see that the copper that is coated
on your stainless steel is covering correctly and uniformly the stainless steel, so nano coating
would be a good way to go, but you should have,
you should be careful in the way you do it,
not to have bubbles being trapped.
If you put your reactor, your half-says upside down,
you would have some bubbles appearing inside.
So I tried to have it put sideways, so no bubble should be trapped.
Okay.
Okay.
This week I make a video with the manual how I coat the Copper.
Did you use an electrolysis?
So if you could explain, because it's for the recording,
just explain how, I suppose you made an electrolysis for the coating,
so just give an explanation.
I take some acid, how do you say it in English, it's sulfur acid,
I make a solution with copper.
It becomes bluish,
calling it copper sulfide.
Then I take a power source,
and on the positive side,
I connect a copper pipe.
and wrap around a cotton ball, dip it in the Copper Sulfide

and the negative is connected on the sphere, on the half core
and that way I can just paint the Copper on the inside.
It's very easy.
Nice.
Just to give the explanation, Copper Sulfate for chemists would be CuSO4.
So you have to mix the Copper Sulfate in a solution with some Acid.
Yes, this could be very, well, what I see from your picture,
it is quite interesting to see that the copper that is coated on your stainless steel
is covering correctly and uniformly the stainless steel,
So nano coating would be a good way to go,
but you should be careful in the way you do it,
not to have bubbles being trapped.
If you put your reactor, your half-says upside down,
you would have some bubbles appearing inside.
So I tried to have it put sideways, so no bubble should be trapped.
Ok, ok.
This week I make a video with the manual how I coat the copper.
Did you use electrolysis?
If you could explain, because it's for the recording,
just explain how, I suppose you made an electrolysis for the coating,
so just give an explanation.
I take some acid, how do you say it in English, it's sulfur, sulfur acid,
I make a solution with copper.
It becomes bluish,
calling it copper sulfide.
Then I take a power source,
and on the positive side,
I connect a copper pipe.
and wrap around a cotton ball, dip it in the Copper Sulfide
and the negative is connected on the sphere, on the half core
and that way I can just paint the Copper on the inside.
It's very easy.
Nice.
Just to give the explanation, Copper Sulfate for chemists would be CuSO4.
So you have to mix the Copper Sulfate in a solution with some Acid.
I make it myself.
Yes, yes, and that's the solution you have been using.
Yes.
The voltage you use.
Sorry?
The voltage used should be a few volts, I suppose.
Yes, three volts, I think, yes.
This week I make a video of it.
How thick of a layer are you making?
Sorry?
How thick of a layer do you think you are making?

Oh, I think a micron.
Thin.
Yes, yes, it's very thin.
I think it's just enough to attach the nano layer.
And it holds up to the plasma?
To the plasma.
To the stainless steel.
Yes, it won't break off.
No, you may scratch it, it won't go off.
So Dave, you have to understand that if you leave it a long time,
the thickness will go up.
So it all depends on the time you leave it in the electrolysis.
Nice work.
Anyway, Gerd, you need to think about some kind of blades inside the sphere so that you create a turbulence.
That will appear if you glue some skirts, as you have seen in the previous picture,
skirts will create the turbulence needed.
The blade doesn't have to spin separate from the spinning board?
Don't put the blades, if you put a skirt it's enough.
Okay.
You just need small turbulence.
Small turbulence, yeah.
You don't need some big blades or something.
You don't need to make a mixture of all the gases and plasma that will appear.
Otherwise your plasma would be disturbed.
Okay.
You need a small turbulence at the surface, so the skirt you will be gluing,
be careful not to have glue appearing, glue must not be seen from the inside.
Okay.
Because glue is matter.
and you have to have the nanomaterial, you need the nanomaterial
be the only part seen by the plasma inside the reactor.
Yeah, now what kind of glue do you use?
Normally I use epoxy or something.
Well, it's perfect.
It's epoxy also that has been used, yeah.
There are different epoxy, epoxy for plastic, there is epoxy for metals.
In this case you would use an epoxy for metal.
But if you have to glue as was done previously on the plastic sphere,
you make a mix of the two epoxy, so it will glue on the one side on plastic
and on the other side was to the metal.
So that's for those who want to make plastic reactors,
gluing that with a mixture of two epoxy,
same quantity of each, will allow to have a very good glue,
to glue on the one side to plastic and the other side to metal.
Okay, thank you.

Sir,
I have a question.
So if that's the case then, you should be able to use, excuse me,
aluminum spheres to have them coated directly,
and as long as you have something in there to create the turbulence,
then aluminum should be able to be used as well then?
I would say yes and no. I explain.
Making some electrolysis of your sphere would allow you to have some copper on the inside.
Don't forget that aluminium has always a thin layer of oxides,
which would be something that will not allow a nice coating with Copper.
So, it should be first taken away.
But the problem is elsewhere.
When you want to coat the Aluminium with that thin layer of Copper,
if you reach to do it, would have another problem,
which is that the Aluminium in caustic will be completely dissolved.
What about the idea of using the Aluminium as a substrate
and creating Aluminium Oxide rather than Copper Oxide
as the catalytic layer, as the nano-layer.
That kind of technology was
we know this, and is as effective
as copper oxide.
If you look at the Fukushima video,
you see like a radiator on the table.
That radiator
is aluminium oxide nanocrystalline.
But the problem with aluminium is that it evaporates very fast.
So you have to use a thick,
what do you call it, a fairly thick aluminium layer.
As I said, if you want to understand how
aluminium degrades, when you open your battery
to use the copper, it has an aluminium
layer as well, the same like a sheet.
If you put that in the caustic, you find that
it literally boils away and disappears.
You can use aluminium cores, they are much easier and lighter to use for high speed,
but you have to use
a good thickness for the layering
you can use. Aluminium oxide nanomers are
Much better in some cases for the core.
This is something I said before,
do not change everything to copper.
Try different materials and find a way how you can
create nano-materials out of them. Because this way,
all the reactors will be behaving in the same way. We will not learn anymore.
If you have a stainless steel,

Like the way Margot is doing, we are looking at every aspect to see how we can create nano layers from stainless steel 304.
This move or this consideration to change everything to copper will not teach us much, more than what we know.
The way John is doing his reactor with ceramic,
will find a new dimension. So,
it's very nice what Gerd has done with his reactor, but
try to find a solution with the material you have.
It's not just copper which can be used. You can use aluminium, you can use
chrome, titanium can be used. We have nano-coated
gold. If we have a millionaire between us who wants to make a reactor
You can have a quote in by itself.
It's in the pictures of the foundation we showed years ago.
So, don't try just to use
copper and copper, then you don't have any quantum knowledge, and we don't see the beauty of the creation in the dimensions.
If you go and study wires and oxides,
and how you can separate them,
We just realized with Marco, that we were looking to put a copper on a steel, stainless steel,
and copper actually makes the steel rustproof.
So that is something we didn't know, we just now we know what we are going to keep away from.
But don't try to make everything all from copper, then we actually become like monkeys, monkeys see monkeys do.
... and this is not...
(MK) Right, Mr Keshe...
(MK) And in that case I... my first attempt at Nano-coating was
with two different materials, with stainless steel and with Aluminum.
And I did get some interesting results off my Aluminum.
I'm gonna take a picture of it and I'll just put it on the Skype
and you can see the kind of what my first layer, first attempt was.
Yeah, but what we did with Marco this week in the lab was that we added, we put a stainless steel hemisphere,
we added the top of the, yeah, aluminum foil, like a cooking foil, aluminum to use in the cooking,
and we added pieces of the neck of the Coca-Cola bottle,
so to see if we can create a condition for it,
that we can have stainless steel to be,
to allow itself to create its own panel layers.
We were just reading, that's why there was a noise in the background in the beginning, Mark and I were looking at the condition where you can use sulfuric acid to use the chrome in the steel,
the stainless steel, because it has a high percentage of chrome, and we can use the chrome to grow as a nano layer.
So, look at different options. Look at the weakness of the material you are using,

and use that weakness to create your nano layers.
So, in the case of the Stencil 304,
it's a smart 18 to 20 percent of the problem.
So, we are using that weakness to see if it can make a
carbon oxide on the top layer of the, what do you call it,
of the Stencil. And I can
do the sulfuric acid, but really just one. So, we have
Once we find a solution to stainless steel, we will put it out.
But what we got, we know the results most probably today.
But what Gern has done is beautiful, it's very nice,
but what is the thickness of your layer?
It was just my first attempt at coating,
What I actually used was the Drano kitchen crystals, which has the sodium hydroxide in it,
but it also has pieces of aluminum.
And what I find is that these pieces of aluminum, they of course put off heat and they turn dark right away.
but on the aluminum sphere, which is I think two millimeters thick, it has a
different kind of coating off of it and of course I've been able to get voltage
off that as well, different parts of the sphere. But you'll notice that it's a
it's not a uniform coating. It has stripes on it and stuff and it
It was just my first attempt to try it, and I think I got pretty good results off of that one attempt.
Yeah, there is something which I explained before, it's part of the thing you've got to learn,
is when you put your material in any chemical combination,
When you take it out of the liquid,
and you place it on a metal mesh to keep the conductivity within the plasma,
you close the cap, and you leave it for 24 hours, and you repeat the same process.
When, after two or three times you've done the process,
you just don't take your system out of the box and try to work with it.
You create a different oxidization.
The drying process is too fast.
What you have to do, you just move the...
when you decide that the layering is exactly what you want, you move
the cap of where your reactor core is,
just a little bit open, you just create a minute
circulation, and you let your system dry
over one or two days, because if you just take the core out,
especially with like copper, you create different kind of oxides.
In a way, it is good, but in a way, it is not good.
So, if you want to keep your copper layering
a very nice homogeneous nano-layer, so you don't take your reactor straight away out.
You should not allow at any point the layer to go dry, because the minute it's dry,
then a lot of the moisture to go into the holes of the nano-layers,
and create rust on the naked surface, just between the cover and the nano-layer,

and then it starts bleeding, that's when you get blue or green colors.
So, when you finish it,
and you have enough thickness for your core, you open a very,
very minute gap in the skin. You put it in a dry environment,
or you empty the water from the bottom
of your tank, which you said you are going to put,
and you allow slow, slow, very slow
slow drying process, one day, two days, it's perfect.
Otherwise, you create oxidization you don't need.
This is a tip I give you, because then you see your coal is homogeneously black.
And it's a perfect amount of air-dust. You see this
with the reactor generator which we have.
It took two months to do it for me, but I have a perfect, black, homogeneous nano-layer.
In the course which we used copper sheets from the, what do you call it, from the mobile phones,
you see the mixture, because they were dry too fast.
That was set up in a very quick and fast process.
But if you do it very slowly, you will find a total black sheet, and I have that up on a two times.
And I've kept it in a sealed container with a little bit of water in it, so it never dries.
Don't use water, use the liquid from your caustic.
The caustic you use to heat it up. Put just a little bit at the bottom of your container when you are drying it.
You make the electric connection two or three times to make the wiring connect with all the layers.
Then you can repeat the process, but when you don't, it's enough.
You see it, with the eye, it becomes like a velvet.
You see the velvetness of the layer, and it's all black.
And then you move...
And actually, on that note, I have another picture that shows with the second,
This is I think my third coating, but with the second time on these materials, I'll send that as well.
Sorry to interrupt you.
Don't worry, but take your time. The processing of coating of your core, what you've got there,
it should take between a week to two weeks.
And then you see the reward of your patience when you run the reactor for energy or lift.
Your plasma is more homogeneous, you don't get wobbling in your plasma,
because different nano-layers, oxides,
create and attract different magnetic-gravitational fields.
If you are looking for a homogeneous plasma,
you need to produce that kind of thing.
These plastic cores you see where the reactor is getting tested,
The purpose was to create a big shell plasma.
And the process
is very, very, very easy.

But take your time, take your time as long as you can.
Never turn your, never in the process,
turn your core upside down. Keep your core
all the time facing down. Look up into it, then turning it
and look into it, because what you do, if there is any residue of caustic,
will block the holes. You don't see it, but in the process when you started it,
it's all gone to the edge, there is no problem.
But if you turn your core upside down to look at it,
and then you create impurities in your layer.
...
Must it be heat resistant?
The core?
Pardon?
The core and plastic, has it to be
heat resistant or not?
No, no, you don't generate any heat in your plasma.
Ok.
You do not generate, this is what is called, I was with a bunch of nuclear physicists yesterday,
and they said this is a cold fusion. I said cold fusion doesn't exist.
Plasma works in natural environment, so which is ambient temperature.
Yes, it's because you said in the last workshop that you used glue that is heat resistant.
That's why I asked.
Glue should be heat resistant when you are gluing the small sheets to your core.
Because when you put it into the caustic, you have very high temperature there.
And if the glue is not high temperature resistant, you will find out that sheets will fall out from the core.
So I would add this, once you have glued your sheets with the nano material coated, you once again go into the caustic to have the nano material build another layer on the material.
So when your spheres are made with those sheets, you grow one layer more of nano material.
That's why the glue has to be heat resistant.
Okay, the finishing layer, excellent.
There is something which we do here, I have done it, this is very effective,
you should get a very nice homogeneous layer,
when you finish, you want the last coating,
do not submerge your core in the caustic liquid.
create like a plate where your material stays in like a sauna bath of the caustic.
You understand?
You don't put steam bath.
Yeah, you make a steam bath of caustic, then actually the liquid of the caustic.
With this process, when you put the boiling water into your container,
after the boiling is finished, you put your container, you put your, what you call it,
your reactor on the plate and you close it.
Because that initial jumping of the water with the caustic and the high temperature

releases like caustic powder.
You avoid that to block your nano-coating.
So you put the water in, you boil it, when the boiling is finished,
immediately you put your container in, the heat is enough to start the process,
but you don't damage your, what do you call it, or you get a very nice clean surface.
So, just for the first nano-layer, just submerge, and the other ones...
Even the first two times, I sometimes do three, four, five times.
When you decide it is good enough, just to finish it off.
But, please make sure you don't touch with your fingers.
Yeah, and still you have to work in a very fat free environment.
Yes, ok, thank you.
So, Eric asked what should be used to wash the copper foil?
The best way is water.
(inaudible)
And, washing soap, detergent, we'll add for washing the Copper foil.
(RC) What, you wouldn't use, like vinegar or acetic acid,
which is known to make Copper very shiny,
and give it a clean surface to start with, or no?
Has that not been considered?
(MK) No, it's not necessary.
Just to take away the chemical products that are, that make the battery.
(RC) They would be water soluble you mean?
(MK) Soil is just water and soap and you will see that nothing like that.
I think there was another question regarding, is it safe or difficult
to open the batteries to start with?
And, is that an issue as far as, I haven't opened one before,
and if folks do try to do that, is there any issues involved there?
I'm assuming you should use a discharge battery probably,
before you start to... And gloves, Guy mentioned.
So, yes, absolutely.
What we have done,
one of the batteries
might have been charged
when we opened it,
but the
material that
was put
apart, which is
the aluminium and
the chemical
compound,
they have started to
smoke.
So, if the battery is loaded, it might happen, so be careful for eventually fire.
(RC) Thank you for that, thank you for that word.
(JW) Just, just, just, just, just, just, just, just, just, just, just, just, just,

so it will calm the reaction.
(RC) Use your common sense.
(RC) Well, I have a saying that, "Common sense isn't."
So, that's why I mentioned that for other people as well, so.
(laughter)
(RC) There's a question in the chat saying,
"After you get the water, after washing the Copper,
is it harmful for the environment?
Should we take special precautions in that?
And the smell is very intense, is it harmful?"
So the smell, it would be preferable to have the ventilation sufficient,
not to inhale too much of that smoke, or preferably not at all.
I didn't like the smell.
So the harmfulness, I couldn't say, I couldn't answer,
But any smell like that should be avoided.
The smoke, we didn't have any fire, but it was starting to smoke quite a lot.
It was evaporating.
No, no, there was a reaction happening.
So I cannot say we didn't have any fire, but we put immediately water with it,
so it has been stopped at that moment.
I don't know what would have happened if we did let it go.
If normal copper sheets are available,
can we just use that instead of getting it from a used battery?
Use whatever you find. If you have an easy way to have foils, copper foils, do so.
In Africa they don't.
That's what was said. In Africa they have a lot of old cell phones and batteries would be easy to find.
In a country where you have some distribution of foils of copper, use them.
But for the most of the people in the world, they might more easily have an old battery, battery, cell phone battery, than in the western countries where you can easily buy foils of copper.
Another question?
Sure, just to elaborate on that, is it a specific type of battery for the people that we're going to ask?
Is it a Nickel-Cadmium or a Lithium-Ion?
Because different types of batteries.
>> Well, not specifically.
Well, it's mostly the compound, the chemical compound that will vary.
Anyway, you have foils because it needs a big surface.
That's why the foils are rolled to make a very flat battery.
But in fact, it's rolled over and over to have a big surface.
Right, and I think that's why the AA battery couldn't be used,
because they don't use copper in that battery to roll it, right?
AA or AAA batteries, they are in fact not made of rolling of force.
Right, exactly. I'm just trying to elaborate for people that will ask.
You can use any carbon.

You can make it thin as a foil,
and you can nano-coat it, if you want.
I'm going to...
Let me ask something to people who live in the third world nations.
If you have access to toilet cisterns where you flush water, the very old ones,
just get into it and you find copper balls in there, which is used for buoyancy,
to stop the water coming into the tank.
We found those as one of the best reactors.
In the West, they don't make it anymore because it's too expensive,
everything has gone to plastic.
But, if you can get your hand on all the systems, water systems for toilets,
you have a perfect copper coil.
You can use it for a single core combination.
I have used it. It's fantastic for the work.
And you get a very nice, what do you call it, system.
But, you can still buy it in some shops, but it's a special order.
So, if you can't get hold of these things, go into the systems of the old toilets and look in there.
You react...
Are you talking about the float, Mr Keshe?
Yes, that's it, yeah, yeah.
Because, it's already has a hole.
You just drill a hole?
That's genius.
You drill a hole, you put caustic inside, you make your coating internally.
But, this is good for a single core, and they are very, very thick.
They have enough thickness to stand a vacuum.
But, the only problem is you have to centralize it.
You need to put a pin outside in your reactor, that you keep at a centrifuge high speed,
it doesn't fall out of the, what you call, your top.
and you can work with those as efficient.
This technology can be used in any shape or form.
That's genius.
It's not, it's just thinking simple.
The thing is,
the way I work
is to look what is available to majority of the world
The simplest way at no cost.
And there are different things available that you can use, but this is one of the easiest ways.
You have a core in your hand, you get a core cut, it costs you 2-3 thousand Euros, you can buy it for 1 or 2 dollars or an old system.
Just tell your wife the system doesn't work, I have to change it.
(laughter)
Yeah, good luck with that!
(laughter)

So that brings up the other question Mr. Keshe, is with the vacuum.
They were talking about having to bring down the vacuum inside the core.
And I believe we were talking before about the vacuum inside the nano layers
as what's the most important, is that right?
Well, the vacuum inside the nanolayers is a condition that is used to the opening of
the plasma from the hydrogen we put in the reactor.
So that's the understanding of what's happening in the nanolayers once we start to spin
the
reactor will be for one part the centrifuge, but in another way you have in fact the process
happening in the nanolayer itself where you have some hydrogen that will start releasing
their electron, allowing that the nanomaterials, because they are pressed, they are
stressed,
will happen to react as piezo system, piezoelectric.
Instead of having electricity build up, you have release of EUV.
And that UV will go into the center of the whole reactor, helping the ionization of the
hydrogen inside the reactor.
So you start a reaction process that will allow the full ionization of the hydrogen
inside the reactor, and that's what the first step is to go to the plasma.
Right, so could, do we have to vacuum all, as much as we can down inside the cores,
or could we just flush the reactor with hydrogen and just vacuum it where we can with a
cheap vacuum pump?
We have to go down in pressure because that allows that opening of the plasma.
If you don't vacuum, you are keeping the high pressure,
all the atoms of hydrogen will be pressured together,
not allowing that ionization.
So the lowering of the pressure is an important step in the process.
Explain, let me just explain. Let me explain what this is. This is a misunderstanding.
There is a misunderstanding in this process with us,
and that is, the reason we produce high vacuum,
or try to create a high vacuum at the best vacuum we can do,
is to accommodate the freedom for the rotation and movement of the plasma.
That's the only reason.
The higher vacuum you create in your chamber,
the more room your plasma has to expand.
It's like you are putting 200 people in a room,
and you say, "Now dance."
They cannot move much.
When you put 100 out, the other 100 can move a little bit more.
And if you just leave one or two, they have the whole dance floor.
This is exactly what you do.
So, the vacuum condition is not to have a high vacuum, it gives you this and that.
It's trying to create a condition that your plasma has as much room itself to open up,
that first of all, maybe you left with one or two atoms or molecules,
and then you can literally strip it up and open the plasma.
So, how you create this, how you empty the room from the dancer by kicking them out,
or you're pulling them out, is all the same.

At the end you try to give one or two dances on the floor.
This is how you got to look at it.
A lot of people say we need the high vacuum.
Even in the universe, the high vacuum condition, it means one plasma can cover a large span of the universe.
That's all it is.
It's not the number of the plasmas, because when you have one plasma, communication is easier because it's internal.
This is what we call Universal Communication System.
Zero point, zero delay time, because you break into one plasma or as few plasmas as possible.
And this is what is called vacuum.
You got to change your mentality and understanding of vacuum.
You try to leave as little dancers and as few dancers as possible on the floor to dance and play.
Then it's easier for you to play with all the plasmas and bring them together.
And this is the definition of vacuum to me.
Not trying to become as high as you can.
All the vacuum is, is when you put your hydrogen molecules in,
or hydrogen atoms from the Coca-Cola bottle,
it's not a crowd of them, it's a few of them.
You can even do two or three times hydrogen atoms evacuation and do it again,
because when you do a vacuum, if you do a vacuum and just pull it out after one minute,
you still got thousands of molecules and atoms still in the core.
What you do for a high performance, you leave your core maybe for half an hour,
now, that the suction will get hold of as whatever is available,
plus what is the deoxidization of the surface.
You empty a chamber and you think, "Ok, I've got vacuum."
But, what you forget is the top layer of your material in your chamber
now has a freedom to move, so it releases what's on top of it.
So, when you create vacuum for your reactors to start testing
even before you put hydrogen, you vacuum, you stay for half an hour, and now you leave your vacuum pump to your tank open, that it can grab as much as it can.
Unless you have a super tank, what I call ratio of your reserve tank to your core,
in the ratio of 100 to 1, then you can do it in 2 or 3 minutes.
But still with that, as we say, you try to grab whatever molecules are in the core out,
You lock your core, then half an hour, ten minutes later, you open the core and you vacuum it again,
because if there is any molecular or atomic release from the surface,
you extract out, because then your core will not be pure.
And then you put the hydrogen in, and you extract again.
You do it for a second time, you extract again, because if there is any gap or any weakness,
it's just like when you paint a wall.
You scrape the wall off any loose paints.
This is the same process.

You have to take all the loose molecules on the surface out,
anything which is not there out,
and then you soak it and you wait to see if there is any more which is coming out before you start painting.
It's the same process.
So, you have to allow, if you try to do, make a core and test it today,
and vacuum it today, good luck to you.
You become better than God.
God takes billions of years to make a solar system.
If you want to do it in half a day, you must be a genius.
So, do it, understand the process.
The vacuum, you can create vacuum in your reactor by heating it up externally,
use a microwave, whatever you do, try to open a space.
That's all it is.
Make a space that your plasma can play,
And when it can play, it literally, like the same dancer, it touches the walls.
You know, if it dances too fast, loses control, it touches the wall.
And that touching of the wall is the energy you need,
because when you hit a wall, you release energy.
And then that's the way you break into your plasma.
That's why the nano-coating is like a cushion,
but a cushion that can absorb and open up the plasma.
Now we start explaining the process, you have to understand exactly why you are doing things, not doing blindly.
You can create vacuum chemically, you can create vacuum with the magnets,
combination of rotating magnets is done, this is how the Universe does.
There is no vacuum pump in the Universe.
Vacuum is the, what we call, not availability of atoms in the environment, or as few as possible.
So, elements in the Universe...
Sorry Mr Keshe, you know, the last couple of sentences, we weren't able to hear the last couple of sentences.
Yeah, the vacuum condition is to make as little as possible elements available.
So, elements in the Universe are made of magnetic field, gravitational magnetic fields.
So, you can use a beautiful high vacuum by just using magnets, or magnetic environment.
You don't need high pressure pumps, you don't need high, as I said in the universe, there is no vacuum pump.
And if you can use a single atom, a single molecule, a single plasma, then you understand the next step of the development of technology,
which is a zero time communication.
And the Brazilian scientists have already achieved that, they understood that part.
They have a zero communication systems which are testing.
So, in your reactor, you try to create an environment with as little as possible atoms or molecules.
And what you do, molecules are heavier, atoms are much lighter.

So, when you use your Coca-Cola bottle to create atomic hydrogen, to release atomic hydrogen,
you, because of their activeness, you kick out the molecules of hydrogen in your system.
And this is how you look at it. You create the magnets around the system,
with magnetic fields you can create a huge, huge, powerful vacuum condition.
You don't need high pressure.
but you have to understand how to produce it.
In the future, I'll show you how to make high magnetic vacuums,
and it costs about, maybe about less than $50.
There is a specific magnets you have to use in a specific formation,
and all you do, you play football.
It's like if you play squash, you hit it so hard enough that it bounces off the center,
or you hit it hard enough that it gets absorbed by the construction, by the structure.
So, now you understand the definition of vacuum.
You don't need the high pressure pumps, or high vacuum pumps.
You understand?
Just for... Yeah, what vacuum should we be looking for?
Are we still at -14?
Oh, you are very lucky if you get to -14.
What do you recommend?
The best I have achieved is about 12-13.
12-13?
And that's using a... yeah.
Even by 9 or 10, you are above atmospheric, what do you call it,
what do you call it, space vacuum condition.
When you go to -12 or 13 or whatever, it means there are less molecules
in the, what do you call it, in the environment of the core.
But when you get to that level, if you don't have nano-materials
and you have like different normal metal,
They at high condition, they become like evaporating.
And their molecules and atoms become part of your reactor core material.
You have to understand the process and then follow the process.
Sure, it frees up the electrons and the centrifugal force forces them into the lattice.
Yes, so they become part of the material in your core.
That's why we produce nano-materials, trying to be homogeneous,
and we try to keep it at a given level.
There is a reason for all these processes, not just to create a condition,
it's to create an environment that the process of opening the plasma can be created.
(MK) Can you do this?
(RC) Mr Keshe, Mr Keshe, Mr Keshe.
(SC) Yes, I have a very punctual question for you,
because you are at this stage,
supposedly that you are vacuuming the core as it explained,
and you do not rotate at all, the core.
So, it's my understanding that because of the coating,
that we have on the inner side of the core,

the atomic hydrogen, the atoms of hydrogen, they are elongated by themselves.
So as in the first stage...
No, they don't elongate, they don't elongate, they don't elongate, they open up.
They open up.
If they elongate, you can create turbulence.
There is certain amount of turbulence even in a non-rotating reactor.
But centrifuge and magnetic plasma flow creates that turbulence.
This is how initially, like stars create their initial movement.
Their interaction of the molecules or plasma inside with the environment,
because the plasma is not the same strength,
so as they lock to the other fields outside,
They try to catch up, what you call elongated, they don't become, they catch up, touch, and they create speed.
It's literally, the rotation comes in respect to the environmental magnetic fields available.
And if the magnetic field environment is very high, compared to the plasma inside,
then you will see that the star will rotate in a clockwise.
The rotation speed of a star in the universe is dictated by its own gravitational magnetic field inside the strength,
and the environment and other stars' strength near to it.
If the other stars are high powerful magnetic field producers,
they, in specific conditions, will rotate the star clockwise.
So, if you can do the same thing with your plasma,
you can turn the plasma clockwise and anti-clockwise,
then you start your rotation, you sell dynamic.
But that knowledge in about a few weeks will release,
because at the moment you have to understand the concept and the technology.
You can create a very...
Yes, I understand. So, in the moment in which you put hydrogen in...
Hello?
Hello?
I think his microphone got too excited.
(laughter)
Now it's good?
So, if I understand correctly, in the moment in which you put the Hydrogen in,
the rotation movement starts because of the fact that the
magnetical condition is much stronger than the Hydrogen atom strength.
This, I go back to it, the minute you introduce the Hydrogen, your Hydrogen atom or molecules are not the only element in that core.
There are still other atoms. There is nowhere in the Universe which is void of Plasma.
Doesn't matter how much you suck it out.
So, all you do, you try to put a lighter energetic, for the heaviest or lazier to move, to kick them out, or put them to the side.
And, as John was explaining earlier, if you can reach that point, when you put the hydrogen in,
your Hydrogen doesn't go to the center of the core.
Your Hydrogen goes to the edges of the nano-material layers.

By centrifuge and by vacuum condition, the lighter goes in the center,
the heavier goes outside.
If you have created a plasma in your reactor, so now the center of your reactor is a plasma.
So, the next heavy one is a Hydrogen.
And that hydrogen between your plasma and your nano layers,
become the feeder of your plasma.
Because as the plasma rotates, you are ionized with the extreme ultraviolet,
your electrons, or you can capture some of the electrons in the,
in the, what do you call it, in the cavities of the layer.
So, the new plasma you created, automatically becomes the feed for your plasma.
This is how solar systems work.
This is how we see a long life generation in the Universe.
It's not that energy comes from somewhere else.
It's the conservation and reusing of the same material.
So, as your plasma weakens on the boundary near the hydrogen,
it gets absorbed by partially by the hydrogen itself and by the layers,
and in the long run, it gets fed back into the plasma as a new layer.
So, if you understand the process, your hydrogen doesn't go in the center to become the food,
or the supplier of new plasma.
It goes beyond the plasma, between the plasma and your nano-layer,
and that with dynamism, as it gets stripped, becomes from molecule to atom, atom to a plasma,
then that plasma matches with the plasma in the center, so it becomes a supplier.
That's how, with a very little material, you can run these reactors for years, centuries.
Millions of years, stars leave.
The solar system, the Sun, doesn't lose all its plasma to outside.
As the energy of its strength finishes on the boundary of it,
they become weaker, they get absorbed back by the stronger magnetic field,
which is the Sun itself, when they convert into a GANS.
As long as they are magnetic fields, they move away.
But when they reduce in strength, that they become matter or GANS, then they have a gravitational magnetic field,
then they have to react as a normal system in respect to another gravitational magnetic field, which is the Sun.
So, like a rain, the cloud goes up and it rains back down on Earth, because of the gravitational magnetic pull of the Earth.
The same process happens in the universe.
So, this is what we said, and it's in the new book coming out for,
when it finishes, I will say, that the planet Earth started life at the boundary of this solar system.
And as gravitational magnetic field of the Sun is stronger, we are getting pulled in,
and then in a few million years, we become part of the Sun again,
and we evaporate and we go out as a magnetic field.

That's why we are not here forever, but the conservation of energy, conservation of magnetic field,
gravitational field, enforces this position.
The same thing is with your reactors.
So, your hydrogen doesn't sit in the center, your hydrogen sits outside your plasma, between your plasma and the nano-layer, or nitrogen gas, or argon gas.
And as they ionize, the plasma becomes equal, and it goes back to the center,
so you feed your plasma continuously with the gases you put in there.
Can you understand?
Yes, thank you so much.
Pardon?
Is the SP2 like the Earth clouds?
Very much so.
That is the point.
Because, because, it's not like...
It is.
No, it is.
Because, if you look at the only indication, the full indication we have,
that the Earth clouds are nano-layers,
is that these clouds get absorbed by the outer layers of Saturn and Jupiter.
And if you look at the poles of the Saturn, we see the hexagonal clouds.
I've said this before.
The hexagonal clouds in the North Pole of the Saturn is only due to the SP characteristics of the material which is there.
In electronics, in high definition, high power semiconductors, when you put three layers, of two different layers, but two different materials, but in three layers,
automatically we see hexagonal shape pattern.
And the North Pole of Saturn, the hexagonal clouds, in Jupiter, in partially,
we don't see it, but if you look further out you see it,
confirms the existence of nano-materials in the old clouds,
because they come back and get absorbed on the outer layers.
And these layers indicate the conformation of the nano-GANS material
in the boundaries of the, what you call, the solar system.
The same thing happens with your reactors.
If you build your reactor in a specific condition,
you will see the ring of Saturn on it,
because your reactor is gaseous,
It's not a solid reactor.
If you use a single core reactor, you will see the ring of Saturn's in much weaker point.
But if you use a multi-core, you will see 100% I've seen it, you will see it.
You will see the ring of Saturn, depends how many gas layers you use in your reactor.
The ring of Saturns are created because of the layers of gases in the outer boundary with a solid core in the center.
This is very much like Pluto coming in. Pluto becomes the center, is a solid material, and as it absorbs more layers of gases,
each gas creates different magnetic-gravitational field.

The thickness of the ring of Saturn we see a few kilometers,
this shows the size of the solid core in the center, the mother.
So, and then what you see as what they call it, the black rings,
this shows the separation layer between each layer of the gases which is built the material, the gaseous.
This is a characteristic of the gaseous planet.
When you use different gases in the layers of your reactor,
and you have a double core, or you have a solid core condition in the center,
you will see the ring of Saturn. It's a natural process.
Where the darkness is, what we call the dark rings, separation rings,
these rings are created because there is a balanced condition between the environments of the two layers,
in the gravitational magnetic field.
There is no reaction, there is no magnetic field interaction,
So you see that's black.
And then if you look at the layers, the size of the ice cubes, ice molecules,
in different layers, changes by the nearness to the center,
to the ring, to the actual outer boundaries of the Saturn itself.
That shows different gravitational magnetic fields hold on to different sizes of material.
We don't see so much of the little ones where the big ones are.
This is how it happens. It's very much like
you get a hailstone, a very small one or a very big one,
depending how many times it is rotated and the condition of the environment.
The same thing happens. We see a specific size
ice, what you call it, blocks in different rings.
It's just because that ring creates a gravitational magnetic field, which holds
holds that size magnetic-gravitational guns in that ring.
These all I have explained in the book which is coming out,
in book number 4. So, and the paper called
"The Ring of Saturn" is in the back of the book, if you read the books, we always said.
In this paper I have explained all these things, and Dirk has made
a beautiful drawing for it a few years ago. So,
in your system, if you use multi-core, you will see it.
If you use a single core, but multi-layers, then you see different things.
But if you use a multi-solid core, and multi-gas layering, then you will see the ring of Saturns in every reactor you use.
And then you can use this principle for defense technology of your space reactor.
You don't need to create, you create multi-layers, and that multi-layers,
multi-layers, you can even dictate one or two rotating in different directions,
by choice of the material or the plasma strength, then you create your magnetic shield around your reactor, and on your spaceship.
These are advanced technology in the future, as you learn more, I teach you how to do it.
Will the rings be formed outside the reactor or inside?
Outside. You see it, you don't see the ring of Saturn inside the Saturn, huh?
You see the ring of Saturn outside the Saturn.
This ring production is a highly advanced defense technology.

This is what we say, the time of war is finished.
Whatever you make, we can make a magnetic field of that layer in one of the layers.
So, whether a bullet into a continental missile, you can make a layer to match that,
so it makes it totally obsolete.
This is why we open, we start opening the technology this way.
All this making the latest weapons with phosphor, with sulfur, with whatever,
with what you call it, hydrogen bomb, this is all finished.
Because now you understand how...
So we just hold it in one direction?
You hold it in a certain direction.
Certain strength in a certain direction.
So, as we say, you run out of fuel.
In a way, what you do, you match, the system runs out of fuel.
If, let's say you have an intercontinental missile, hydrogen bomb,
you just make a hydrogen level in your reactor.
The bomb will go, but there is no hydrogen to release,
because it's already changed, you can change it to a very much like a carbon to a diamond.
A bullet is a bullet as long as there is a carbon inside the mixture of the powder.
When you change it to a diamond, in a very simple process, the way we do with MS,
It never explodes, huh?
So, the bullets become what I call beautiful rings on the finger of women,
because there is a pure diamond in it, you just need to open it.
This is the reality of this technology, and this is what now we opened it so openly.
You, the point of destination, you have shown it to the knowledge seekers.
We just need to put certain reactors in certain positions,
in that environment you can create whatever material you need.
Ring of Saturns you will see in your reactors, especially if you have a multi-core,
and you empty the center from plasma,
we've done it here, I show the Knowledge Seekers how to do it,
when you empty the center core totally,
and then you start multi-layering your other core,
you automatically see the ring of Saturns around your system.
And the size of the ring, the thickness of the ring is equal to the diameter of the inner core, because it's solid.
So, the mystery about the ring of Saturn and all the rubbish we hear about the scientific world is meaningless,
because you can make a reactor and you explain it yourself.
And how much you create vacuum in the layers, or what layers of pressure you put in,
Then you get different strength rings.
This is something which you can test it yourself.
When you create a vacuum, near enough vacuum,
and then you can put the hydrogen at 1 bar,
you put nitrogen at 2 bar,
or you put your argon at 3 bar pressure into the core,
you will find out that the only thing that will change

is the pressure on the layer next to it, according to its atomic weight.
the Argon will not go into the position of the Plasma, but because of its pressure,
will increase the pressure on, let's say, Nitrogen, and that allows the release of much faster of extreme ultraviolet.
You got to understand, put the picture together, you have all the pieces of jigsaw,
now you have to put it in to see the beautiful picture.
We explain most of this in all the teachings.
So, your core, your vacuum is trying to get as little as other things inside that you can have a homogeneous plasma, or material.
And, how you process, you build your reactor.
That's what I said, from the time you cut your core, you pray for it.
The way you, every time you make the layer, you pray for it, because this is what is going to give you life.
And you give life to a child, and you pray for his child, or your mother who gave life to you.
The same thing happens with this.
From the time you start the reactor, you give part of your soul to it, and then you find out, if you have a devilish soul, you get a devilish reactor.
If you have a beautiful soft soul, you get beautiful reactors to work with.
Because this is part of the structure, and this is what you got to realize.
Any other question?
Yeah, if you are doing a dual core for say if you are building for lift,
do you have to nano coat the interior of the outer sphere?
Of course, I think the one Armen is using, at the moment Armen and...
No, Armen core is the outside core in America.
Armen is using the outside core of the system which we brought from Iran,
and Marek is doing the inner core.
Armen is just coating the inside of the outer core,
and Marek is doing the inside of the small core, and the outside.
And does the outside of the inner core need to be nano-coated?
You have the third response.
I'll share the pictures.
The third picture of the UFC.
The first picture with small blue box.
The reactor is in a core. It's coated with fossil fuel from outside.
Your transmission is breaking up.
In the first picture with the blue ball, it's the inner core of the system, coated from outside and also from inside.
Okay, inside and out on the inner core and the interior of the outer core.
Thank you.
Eric is asking, when will we see a video of these reactors operating?
>> When we have them working.
>> [LAUGH]
>> Please be patient.
We are here two weeks, three weeks, and one expect to, in two or three weeks from us that

we will have working reactors.
So, the presentation takes some time.
[inaudible]
Let me explain something, if I can jump in.
Very soon, we will release
once the manufacturer gives us
the generator, we will
post the drawings of it, and then the
pre-production unit, and later on, the next two to three weeks, we should expect it.
Excellent!
So, what happened, we would have shown the system would have been produced, but because of the technical advancement in technology,
the manufacturers, we just came with a new design, so we reduced the shape of the reactor, the structure of the reactor,
So they went back to the, what do you call it, drawing board,
to make the system to be more efficient, and can last a longer lifetime.
So, the new, what do you call it, energy reactor,
should be, the pre-production should be with us within the next 2, 3, 4 weeks, I hope.
Because the designer has gone to China, he is back yesterday,
and they are bringing new materials.
The point I go back on is that we have given the power generator as a gift to the Italian nation.
So, the product...
You're breaking up, sir.
the design is out of order.
...
You're breaking up. Yep, we seem to be losing
part of the transmission at this point in time.
Like every single time he says something significant.
Can you hear us?
Yeah, it's a little... could you try it again?
Can you hear us? We lost one computer, we came another one.
Yup, it's clear now.
I'm going to open another laptop, and we all got kicked out of the original one.
Now we are on a harmless laptop.
You broke up right when you said you give the reactors to the Italian government.
Yeah, we haven't given it to them, we've given it to the Italian nation.
So, the Italian engineers and the company
and the company who are developing it and what you call it, going to the manufacturing phase.
Now they are doing their version of how they see to be more efficient.
For example, you have the feeding lines at the moment where we feed gases into the, through different pipes.
Now I think I explained this before, the engineers and the designers, they see this as an additional problem.

So what they are using, they are using the central bar of the generator, of the motor, of rotating the cores, as a feeding access to the core.
So we are eliminating, they are eliminating one of the problems of having different connections.
Nice.
This is, they are coming up with their own version.
I've seen this and it will be completed when we get it 3.2.
What kind of kilowatt output are you talking about here?
What would you like? You would like a 1 volt or would you like a megawatt?
Megawatt would be nice. Can I get that in a month or two?
It depends what they need. I told you, it's out of our hands.
(laughter) I'm just kidding.
All we do from now on is consulting them in material and loading.
Yeah, I was just kidding Mr Keshe.
Don't worry, I understood. But, the position is that we only, from this position on,
and what we ask them when they finish, they allow us to have the number of the reactors which we have, what do you call it, we have got reservation on.
Yeah, the guys who put the deposit on.
As you know, they received the Italian version.
And then, to discuss how we do it, but from past 2-3 weeks, or more,
I should say a month or so, the whole production and the design of the energy version
It's out of the hand of the foundations, in the hand of the Italian engineers and the company which is going to produce it.
It's not with us, it's with the manufacturers.
And the design we gave them, they see through the design and the knowledge and the materials they have,
they can make it in a better way.
So, they have redeveloped it, and now what we are doing, because there is a possibility of leakage,
because of the different atmospheric and the inner core pressure,
we come up with a new concept that we put on the vacuum.
So, the motor heating, the vacuum leakage, and all that is eliminated in Mong Kok, which is a new development.
Because now, if you look at the reactor, which we brought in from Dalton, it's developed here,
there's always possibility of the leakage because of the sealing, what you call, rings.
Now, the whole assembly will be suspended in a vacuum cylinder, like a gas cylinder.
The gas tanks, you know, you buy your 20-30 liter gas tanks at home, it will be such a thing that we eliminate any leakage problem from the cores.
So the cores work in a... These are the developments, this is what we call it, manufacturing development which is happening.
So when we show you the reactor, it will be like in a gas cylinder.
But we'll have two connections and one gas connection.
And this is what has changed.
So, it's not that we...now it's not in our hands, but I consult with the manufacturers in how the next step is going to be.

They are introducing new designs because they are on the edge of science.
They work with aeronautics and high performance engines, and they know new techniques which is for their purpose.
And now they are bringing that in conjunction with the reactor.
But we have a condition that, as I said, all the parts of the reactors for the Italian nation will be manufactured in Italy.
And then a decision has been made, most probably by the people around this table, as the people who run the foundation from now on,
how are we going to allow the technology, the reactors to be cycled into the other nations.
If we give the same, it will be a copy.
But if we say this is the parameters, they come up with new versions.
So, this is the news about the power generators, where we stand at the moment today.
I heard that the man you feared of, ALS, is helping with the power converters?
He is the sales managing director of one of the biggest, what do you call it, inverters in Italy and in Europe.
And he knows once he starts moving, he is doing the inverters if people want AC inverter.
"Does the reactor always produce DC?"
You've got out of the reactor always DC.
So if you want to use like normal house equipment, you need an inverter to convert DC to AC.
Approximately how big is the new design, the new generator design?
What? How good?
How big?
I think he said how big.
How heavy?
It should weigh less than about 10 kilos.
And the size?
I told you, a 25 liter gas cylinder, that's what they are looking at.
Oh, the gas cylinder, huh?
You know the gas cylinder you go camping or you cook in the house with?
Yes, yes, yes, yes, yes.
Propane tank.
Yeah, yeah, yeah, a small, you know, it's like, what is it, 40 centimeter diameter?
It is at the moment, they are deciding, it is out of my hand anymore, but the manufacturers,
with the people we gave the pre-development, and part of the Italian Keshe Foundation people who supported and did the work,
they become the manufacturers and the distributors.
So, they consider all aspects themselves, and with collaboration with the Italian government,
It will be done in a way that the production does not stay in one part of the nation, because Italy is divided to the north and south, and the industrial part is in the north.
So, there are a lot of...we try to bring...every aspect.
So, parts can be manufactured as much in the south of Italy as in the north of Italy,

and the wealth can be spread the same way, and the job employment will be spread the same way.
And this is once the prototype, what you call it, the pre-production unit is complete, then most probably the Italian government will have a sustained allocation,
because all the units will be subject to Italian taxation and production of what you call it, income for the nation.
And in our recent meeting, then it's the decision of the Italian Parliament, most probably an Italian government, how they are going to tax these new systems.
It's become a collective work at the moment, it's not just Keshe Foundation anymore in Italy.
This is what we tried to do in Belgium, and we got blocked because one man wanted the whole thing themselves.
Now we have spread it and the technology is in the hands of 2 or 3 design companies, partially space, partially motorbike, and partially automotive.
The company has expertise, so it's a collaboration of different companies in Italy.
And then when it's done, it's been agreed that it will be a gift, it's a gift to the nation, then they have to decide how they are going to do it.
Can we touch on a minute?
Yeah, hello, can we touch a minute on how your, what system you are using for energy extraction from the reactor?
It's the same as your, what do you call it, a plasma.
Like a magneto-hydro dynamic?
No, the plasma releases its energy according to the power factor.
If you go to one of the old, old Keshe Foundation, Keshe Technology website on the Internet,
and it's part of the...we still have it as part of our logo in the generator.
You see a sphere with a copper ring, four copper rings on it, with a gas on the top?
Four copper rings?
Yeah, those copper rings on the center column are the strength from the plasma.
Yeah, those are the pickups?
Yes, those are the pickups.
Nice.
You understand this explicitly?
Oh yeah, that's right.
I told you everything is very easy.
(laughter)
Well, easy for you.
Yeah, but it's years of research.
I keep on saying, nowhere ever in human life such a technology is so advanced, which covers everything, has been put in the hand of the public in one go.
Oh, never.
In the past three weeks, now the Knowledge Seekers here, they are working with the reactors which I built ten years ago.
I think they have told you, I put all my reactors on the table, and I said, "Now you choose which one you want to play with."
I hope you picked the one that was floating in mid-air.

Armen is working with it.
The only thing which we don't hide, because it's part of keeping to what we agreed with, even the reactor we showed in the peace conference, which is the original reactor for the energy production,
is on the table. I've never seen any of them having the courage to say, "I want to work with this one."
The only thing excluded is the Iranian space reactor.
That's not all. I mean, it's there in the lab, they can see it, but they can't play with it.
But, any other reactor is on the table?
John is working with his ceramic.
Marco is playing with his, setting it up with his stainless steel.
What else do we have?
Jorge is playing with a very nice bunch of magnets.
We don't know what it's trying to do to Brook's house, but we are waiting to learn.
Yukoko is still a refugee, she is looking for a place to attach herself to.
I actually did use the same system of the reactor, and I'm using different types of containers,
from the lab, and making the new reactor.
I wasn't here yesterday.
I adopted you.
Yes, I adopted you.
Okay, Armen has adopted the whole principle we work here is that everybody has to understand, nobody can hide.
They should be able in a space to save their lives.
They don't need to wait for somebody else.
So, and the way we have set it up is the open lab.
everybody sees what everybody else is doing.
And they sometimes give their piece of advice, how to do things.
So, at the same time, not only we work on the energy or on the lift, we are running the batteries,
the coating is running in one part, we are setting the CO2 conversion units in another part with a bunch of broken Coca-Cola bottles,
and in the next few weeks we start the seed project using the material from CO2.
Everything is done together, and then next couple of weeks we'll have a couple of medical people here and back on the team,
then we start the health section.
Excellent.
Have you used like a single, I heard you're using a single or a double core in the middle and then single core spaced 120 degrees apart within the magnetic field for materials?
Let us walk first.
Okay. All right. We'll save that for next workshop.
Well, anyway, the decision has been made to make that.
There are two double core because what's Carmen and Merrick as well as the UK co.
they'll be doing double core because the two pieces were apart and they'll be bringing them

together and as I am working on my ceramics I'll be using an inner core also so I'll still have
quite a lot of questions to be answered in the way I'll be coating the inside.
I don't know yet but lots of experiments to make. Marco is using a static external core with rotating inside? With rotating propeller inside. Rotating propeller inside. But I still have problems with leaking so I have to seal the sphere completely and two days ago I couldn't do
Today is a nice day.
So we have to do more testing and try to get different options for sealing of the spheres. And to seal completely, to have complete vacuum in the sphere is not such an easy job.
Is that with a ceramic fork?
No, this is for stainless steel.
Oh, with stainless steel?
Yes.
Mine is fine.
I use two double lip seals, back to back, from Garlock.
And between these seals I put some vacuum grease and it works fine.
I have an idea for John.
John, why you don't try to take your reactors to a company which is producing printed circuit boards?
Most likely, they are going to be able to create a copper covering of your ceramic.
Because they easily cover fiberglass.
And they have special liquids which are able to create copper beginning of pretty much any material.
and after that they can add copper to it. So that's another idea, try a PCB company which can do that for you.
Yes, it doesn't bother me at that level, I can say it like that. In fact, I can make some vaporization of copper.
We, doing so, it would still be in the copper nano-coating.
So, what's the most difficult for me would be to have coating inside the inner core.
That will be the most difficult.
the outer core or the outside of the inner core will be easy to make.
So still have to think out the way I'll make it in the inner core
because the holes to reach the inner core are quite small. So I suppose I'll have to put some
first of all make a vaporization inside and then afterwards make the coating.
If I stay with that idea I should be working with copper and as you just heard about it working with copper doesn't open to new understandings.
Well anyway, ceramic is already one difference
about a reactor. I still have some work to do.
The way I work on ceramic might not be the best way
for serial production, but it's a way to go forward in the understanding with what can be done with ceramic.
For example, what should be done by going to other kinds of materials,
you have quite a lot, a big series of transparent ceramics.

can be from aluminum oxide, aluminum nitride, aluminum oxynitride, you have magnesium oxide,
you have a whole bench of ceramics that can be transparent. But mainly what's
the most important is to have a way of working the powders so that the sintering can be done
and have a precise measurement after the firing is done. Also the firing can be
done at different temperatures and if you look at the aluminum oxide or nitride
they need a very very high temperature so that also will depend on the way to
forward, but there are many industries working with those materials,
maybe not as many as they are working with iron or copper,
but there are quite a few industries that do exist.
They have knowledge, I have not all the knowledge,
I don't know, directions.
So, I'll start with what I have now, and further we'll have to see how it has to be done.
Well, it sounds to me like we have way too much time.
In connection with Ludmil's question, I was wondering what will be the minimum thickness of the copper layer on which to build the nanomaterial?
material, because usually up to 0.5mm, maybe 1mm can be electro-deposited, electro-plated,
and this will enable to make the core from injected plastics.
So I'm just wondering, 0.5mm will be enough as copper thickness?
Already discussed that at the beginning of the workshop, Lucien.
So they've going on you had a question
What will be the minimum thickness of the copper
We don't need a big thickness. We need the few microphones
Enough to restructure it to nanolayers the few nanolayers so
few times nano
So we control my problem it will be enough
Anyway, each of us should try our own experiments.
So we are expecting also some feedback from you guys and we can learn from each other.
Hope we will get some results from Gert and also from, let's say, from Vince and other people in the group.
Just for my excuse I can say I load some videos on YouTube with my name so you can take a
look there I do some experiments at least with the material I made.
There are some micro shots, there are some scope shots of the voltages and so on.
If that can be interesting for you, you can try them.
You can post the link if possible.
Yeah, I will try.
It's on YouTube under my name channel.
Do you want to ask another question there, Letmel?
No, I just wanted to mention, because these videos are the same materials they are trying to make,
so that could be interesting experiments for them and everything else.
Let me send you some pictures of AutoCore.

I'm just going to download it one by one, please.
This is Deva. Yeah, I was just, Armin and John especially, Tony is in the workshop and he came earlier to introduce himself and so we have just now put, dropped in his bio into the chat. So if you guys want to know a little bit about him and the time and so on for the interview this Friday. So I just thought I'd get my little promotion two cents worth in here and if anybody has any questions just throw them over. Thank you.
Because I just I just wanted to let everyone know in this chat that your fellow knowledge seekers are going to be making a big appearance on Wolf Spirit Radio with Tony on Friday. So come on along and support them. I guess we've got Armin,
John and Vince that are going to make, share their experiences. And so this is really exciting.
Let's all promote the show and get it out to as many people as you can through all your forums and everything. And we'll see you there. Bye for now.
Diva, could you say the name again of the show, just so that people can look it up on the net if they need to have a connection and so on?
Yes, it's Wolf Spirit Radio and it's at Friday at 2pm.
So it's here in the chat.
Great, thank you very much Diva.
Thank you Rick.
I am so sorry, the names you said is Armand, John and who?
Yeah, Vince is going to come too.
I think maybe he's changing his mind.
Okay.
Oh, okay.
Well, Vince has asked me to tell everybody what their time zones are and sorry, I can't do that.
I'm asking you to just say 2 p.m. in which time zone?
Oh, I'm sorry. 2 p.m. Pacific Standard Time this Friday.
Friday 2 p.m. Pacific Standard Time. So I think it's going to be around 10 o'clock you guys time 10 p.m. in Italy. Am I right?
Yes.
10 o'clock is great. Okay, good you guys. We look forward to it.
Thank you, I won't promote any more.
We all be suited.
Do we need to wear suits?
Oh, do you need to wear suits?
No, it's actually, it's radio, so you can come naked if you want.
I'm okay.
Oh my God.
Alright, I'll come naked with the tie.
Okay.
(Laughter)
Get your microphone naked!
(Laughter)
I'll get off here.

Well, on that note,
I'm wondering if we should be phasing out of our
communications on this particular round.
We've got a lot of information here to already think about and to act upon.
And unless we have any
overwhelming questions that need to be asked. Maybe we should let the Knowledge Seekers go or what do people think here? We could go on longer if we really wish to.
Some of the information conveyed earlier broke up during the Skype call, so I was wondering, I'm wondering if it can be written down and post as a
manuscript or something on the forum. That would be great.
We'll be doing a full transcript of this audio as soon as possible.
There'll be people working on it to transcribe it. Yes.
Yes, specifically I'm asking for the instruction on how to nano-coat the...
build up the nano-layer on the copper and all that beautiful information.
Yes, right, it would be good to get that down, and black and white, as they say, transcribed, so we'll be working on that. If there's any sections that aren't clear, then we can always contact the Knowledge Seekers directly and get it clarified.
So, yeah, that should be probably within about 3 days or so.
And also the explanation on what happened inside the reactor when,
when, you know, the hydrogen was pumping and it goes to the edge near the nano layer and electrons are given out to produce the electricity and at the same time the plasma is being created.
I mean, all these are wonderful information. I think if we can have it transcribed, it will be great.
Sounds like you pretty much covered it right there!
So, that's the beauty of it!
It's all you've been waiting for years, guys!
For years! Right!
Maybe one thing that I can add, what is going on in the
reactor, we can look at like the
Earth, or like our solar system, which has
It's a twin star also.
And every 36,000 years,
this twin star came near to our solar system.
And in the interaction between this twin star
and our solar system, you get interaction.
And because of this interaction, you get different materials that are coming towards our sun.
And if some of this material hits the Earth, let's say, they can cause disaster.
Scientists, now archaeologists, can find this in the different parts of the Earth.
But every 36,000 years something happens.
Nebula.
Planet X.
We can see parallels inside of our reactor.
We have gone to stay on the other side.
Of the reactor and this gun state material interacts with, let's say, hydrogen gas, this

interaction creates.
Alpha, beta, gamma radiation, which caused the ionization of hydrogen.
So we've got plasma and this plasma goes to the center of the reactor.
So that's my understanding at the moment.
I don't know if it's completely correct, but that's my understanding.
Thank you very much.
Actually, regarding the nano coating,
We would like to prepare some more information.
We already uploaded some videos on our YouTube channel
and added some description to it
to make it more easy for all of us.
And maybe we should,
we can prepare some documentation
with step-by-step instructions,
but it takes some time.
We are quite busy in the lab.
So we can make it later maybe.
But we try to be as open as possible and as clear as possible.
So if you need some clarification, just ask us and we can later add it to some documentation and extend it.
And I'll send you some pictures, Rick, more pictures actually and videos too, if the connection
will allow.
Anyway, the process of the coding was very clearly explained in the Fukushima workshop.
And you just have to follow these instructions.
And we also posted some videos on YouTube channel on Spaceship Institute YouTube channel.
So it's pretty clear and easy procedure.
As I said, we can always make clarifications if necessary.
I just like to thank you guys for making yourselves available for all this and not to...
you know, it's easy to sequester the information and so on and so forth
being open and allowing it to happen and to provide that continuity for us
I'm really very thankful, especially this workshop, this is going to open everything right up
It's great. Thank you. This is the best workshop yet today
It's their channel to ask questions to the knowledge seekers
This is just beginning guys
Just to begin
workshop
Besides the forum is there another channel?
We have
Facebook
Spaceship Institute page. It's our main source for for now because
we have to
Somehow figure out how to run the forum

So that it will be easier
faster in response. So for now the Spaceship Institute Facebook site is the
official source of information from us and together with the YouTube channel
Spaceship Institute this will be the main source and we can then somehow
somehow bring for better usage, but it needs some time and clarification how to do it.
Guys, you create your own website, download the information from the Spaceship Institute
and just post it in there.
Yes.
For example, I have my MrFixitRick YouTube channel, and I'll have a video of this work,
as well as the 10th workshop of last week,
should be available within a couple of days or so.
So, and then that, those videos will also be posted to the
Keshe Foundation main YouTube channel as well.
So, my channel is MrFixitRick, that's M R F I X I T R I C K, all one word.
and folks can find the previous workshops on that channel as well,
there's a playlist of them, and tons of information.
(R) Yes Rick, thanks.
I've already added a link to your channel to our Spaceship Institute
Facebook page, so people can find it.
Yes, and also...
...you do your own videos, posted...
...your own experiences.
We need to learn from you too.
We are all Seekers.
We are all Seekers and all Movie Makers at the same time.
Yeah, for now.
Well, some are movie makers, and some are movie stars,
so it takes two to tango. Right now we have the stars of the Spaceship Institute,
and that's pretty good saying, the stars of the Spaceship Institute, get it?
(RC) Must be something commercial you can make off of that.
Okay, so, is there any other questions, or shall we continue, or not here?
(JM) I have one thing to add, maybe if some of you
have the possibility to prepare some good working site for knowledge sharing,
it would be also good help for us.
Let's say use teaching software,
we can more easily share the information because the Facebook is not so clear
clear and all the posts just get lost easier.
Actually, if anyone can do the job of preparing good site for sharing knowledge, it would be a big help for us.
Actually, I'm already working on that with some other people. I'm just getting different opinions on different software. There is some free or very little cost software out there that does
a very good job. I'm just trying to look into how we could use that as a teaching classroom

and then also available afterwards, just like the workshop here.
One of them is the big blue button, and we're doing a little bit of research on that one.
I have seen them for...
And there's also the new live stream, they call it new.livestream,
and it's a little different format than the old live stream,
and it's more active, you can upload files more interactively,
and so on. It could be another option possibly.
Do you have to pay 50 bucks a month for the proper use of it,
or else you get ads and all kinds of other annoying things?
I will check into it too. One of the team members in China,
he operates a server, so maybe he can set something up so that all the
all the Knowledge Seekers can post your material on it, and can be accessed by
anyone else around the world. I'll ask him if that is feasible or not. It would
be good to have backup systems like that all over the world, and if one goes
down for some reason or another, we have others that are automatically available
for people to still download the documents and the pictures and videos.
So, it seems like a good idea to be able to repeat the sites,
but at the same time, you want to tie back as much as possible
into the actual Keshe Foundation or Spaceship Institute,
sort of official sites, as much as possible, too,
to keep the exposure up for them, and help promote those particular sites,
rather than links to all the other ones, let's say.
So, it's sort of two conflicting, but still mutually reconcilable objectives,
or you might say.
Should we let the Knowledge Seekers seek a break here now?
(RC) Or do you mean get to work?
(RC) Right?
Some of us go to sleep, depending on the world we're at.
Have fun guys, don't party too much.
Like they got time to party.
I know they will at least at the finishing days.
Bye guys.
Thanks guys.
Thank you very much.
Thanks everybody.

2nd Knowledge Seekers Workshop March 13 2014

Auto transcription by Elias. This document needs to be proof read.
April 18, 2023

[Music]
Here we are at the beginning of the second Knowledge Seekers Workshop.
And we have the Knowledge Seekers from the Spaceship Institute online with us here,
and Mr Keshe as well, he's another Knowledge Seeker,
and tonight's main topic is going to be on the Spacecraft and Spacecraft Construction.
Okay, so we'll get into it right away here, in terms of, I think,
we'll see what the Knowledge Seekers would like to say initially,
and then I know there's questions from various people on technical things,
and what not, as we go along here.
I'll hand it over now to the Knowledge Seekers of the Spaceship Institute.
Hello and good morning to all.
We have a nice day today in Italy.
And we will try to talk about the spaceship in this workshop.
We've got some drawings, some plans of spaceship craft.
These drawings were made in 2012.
and talking talks have been started
to start building this craft.
Few days ago, there were talks with some Italian companies
which are able to help with construction of the craft.
of the craft.
So Actually It was already last week then that what was announced on the radio show that
Foundation is has started to
to raise funds for the construction of the spaceship.
We also, we are also
announced that
in May or June we accept the second
second generation of knowledge seekers,
who can help us with building of the Spaceship.
We need people with design capabilities,
with knowledge of gas control,
computer programmers and other profiles.
So this is for start from me.
I will give microphone to other Knowledge Seekers.
So buckle up.
- So quick question, do these guys
for me to pay 20,000?
(RC) Yes.
(JM) The fee is still, stays the same.
(MK) Ah, okay.
Thank you.
(JM) You're welcome.
You guys have any questions that I can answer?
(JM) In your schedule, for the Spaceship,

Are you planning to have the functional one for 500 people at the end of this year or just a prototype at the end of this year?
Yes, functional one.
By the end of this year?
Definitely.
That is the target.
The construction is very simple.
We are going to load it up today.
In the next few minutes, when I put it up, you can see, this is the design which is on the USB key of the governance.
This is another release from what people have been asking us to release, what's been given to the government.
So, what you see, the documents are signed and issued, which means that the certified which has been given in the US speaking in the last times to the governments.
We will make very important and radical news about the USP next Thursday.
If there is anybody who is listening, who has ever been a member of the Keshe Foundation,
for the past how many years, it's important for you to listen to the next Thursday, the 20th of March, Knowledge Seekers.
We cannot disclose anything at the moment, there are some things that need to be moved up to the right way,
But we will announce it next Thursday, and as I said before,
as part of this session, to Rick, we are next week.
Next Thursday will be the most important session we have ever held by the Keshe Foundation.
I think when we release the information it will be apparent to people why, but hopefully the table of 8 will be full next week, that as a Knowledge Seekers panel we can announce it together.
Those who understand how the structure of the Keshe Foundation space should run,
is that we have brought in 8 members of the world public, who become knowledge seekers,
and the decisions for the Foundation from now on sits with the 8 members of the panel around this table.
So, we should have 8 next week.
This week, one is in Belgium, two are in Belgium,
one is still in Africa, he hasn't arrived yet,
and one, our Japanese colleague will arrive later on this morning.
And, the whole of the spaceship technology will be released in the next few minutes.
You can download the pictures, you can look at the pictures.
We have brought in the people who produce aircrafts,
are involved in the spacecraft industry,
to assist us with their knowledge for building of the system.
As Marco told you earlier, they were here, part of the organization this week,
and the meetings with them will follow the same.
The same usual way, the design and the full development will be gifted to the Italian nation as their companies are producing it.

So, in moving to Italy, whatever we develop here as a system of destination at the moment, all our work is given to the nation directly.
So, the spacecraft will not be built by the Foundation, by the Space Institute,
will be done by the Space Institute panel and other scientists who join us,
but will be manufactured and produced by the Italian Space Program,
or what we call, aircraft industry.
This is where we are at the moment, unless the position changes.
and the way we gave the power generator to the Italian manufacturers,
they are working on it to produce their way.
I heard this week that they even modified again this week,
their systems are brought in new parts for their system.
So, once we receive the, what do you call it, the pre-manufacturing unit from them,
From them we will announce it, they know that the technology is free to the world, so they
are developing it for the rest of us.
The same way the spaceship craft will be manufactured by the Italians for the rest of the world,
but there is a big problem, or another problem, these kind of needs need to be financed.
And up to now, Keshe Foundation and through all my efforts for the past 10-20 years,
I have financed all the things to go with the Foundation.
From how this spacecraft is going to be in the world population,
the people who want to fly, the people who want to see the technology to be developed,
you need to put effort into it and, what you call it, contribute towards the development.
Millions have been spent up to now to develop the aspects.
And, if we want to keep the production of this craft out of the hand of the governments to control,
and maybe the world population, maybe the Italians, it needs all the people to contribute towards it.
You want the benefit of it, you have to put something in it.
The foundation has estimated about 50 to 55 million initial cost,
and the Italian company will cover their part, but we see our part about that amount.
And we need to raise about 1 to 2 million a week to meet this demand.
It's no use saying you build a craft, when it will be built, it's from now on what we put in it.
You have to find a way to finance this, because this budget at this rate is beyond the capability of the Foundation.
A millionaire gives us 100 million, says, "Ok, you can build it."
So, then they dictate what we have to do.
They say what we can do.
We've done it in small bits, we've financed it over the years, but now to produce such a craft,
at a minimum cost of about 50 million, it needs world population support.
Those who've been waiting to fly and hoping they'll do it for us, the way everybody's had to wait for the energy and stuff for the materials,
We are giving everything we are developing freely out, but the spaceship is a cosmic matter.

Not only scientific, it is producing materials.
You are talking about a craft, around about 40 to 55 meter diameter.
You are talking about the construction of about 3 to 4 floors high.
You are talking about auxiliary tanks, about 500 seats.
Everything else is part of the program, I guess.
We don't have a black box, what do you call it, financing, the way it is available to governments.
As we said, this is the technology for the people, for the people.
And now there is a panel here who control and look into all the developments.
The next 25 will be actually a hand-on team,
will be involved on a daily basis, what they taught, with the construction and the rest of it.
That's why we are bringing them in.
So, we are talking about a huge construction business.
The site we have, we have.
Hopefully by next week, the agreements will be finalized in some ways,
aspects of it, because this is not, if you are waiting to be on a spaceship,
or be seeing a spaceship flying at this size, it will not happen, unless you receive enough financial support to be able to buy the parts.
This is bolts and nuts and panels and screws and chairs.
So from now on, this is what I said, this has become a collective job,
and we will explain more in the next week session.
The reactor has a base, or I should say the spacecraft has a base.
We have uploaded Spaceship Institute design to Spaceship Institute Facebook site.
I will put the link to the chat.
So you can see the design now is available.
The craft has five levels.
You have a level -2, below level, where the three control operational reactor seat.
You have -1 level, which is above.
This is where the mother reactor sits.
Mother reactor, if you look at the design number 2 level,
You see that what we call the universal configuration for flight is followed.
Center reactor in the middle on the minus one floor,
three control reactors on minus two level.
Then this allows us directional and vertical and submergence with a full shield capabilities.
At the same time, you have the auxiliary tanks, all the materials which is needed.
These tanks will initially be loaded if we need to, but these are for extraction of the material in space.
So you forever have a continuous supply of materials which are needed by like water, oxygen,
and the rest of the materials in a daily need.
These tanks are not, as you see, that they are limited,
it's unlimited resources now that we start the conversion technology.
And so, once initially they are filled in space, they'll be renewed directly.

These make us totally independent of need to return to Earth to add up, or top up, or load up.
So, as you see, they are connected in the design -1.
They are connected to the central reactor connection,
because you make your materials like water, and hydrogen, and oxygen,
and all other materials directly in conjunction with the magnetic fields of the reactors.
Interaction of the both magnetic gravitational field between the four reactors.
Yesterday, in our normal teaching lessons,
we started understanding the operation of how producing material
how materials can be produced, with a show of, what you call it, solid magnets,
because you get the same effect in the plasma magnets.
I think somebody will tell you what they learned yesterday,
how to make something which has no more value anymore.
Who wants to be the spokesman?
The speaker, there we are.
We got Marek, he will explain to you what you all love to have,
and you thought it was impossible.
We have been taught how to make something with all of you,
and it has been the cause of the problem for mankind for centuries.
There we are, Marek is here.
Ok, so, if you want to make some gold, there is a way.
You can use reactor technology to produce whatever you need.
It is to be used in the spaceship and let's say to make some gold.
We can use initially mercury and dope it with neutrons inside the reactor so that it creates instability and transforms the mercury into the gold and meanwhile it releases helium
And this can continue to continuously change the mercury to gold while keeping required conditions in the reactor so that the fields allow the mercury to be diluted in a way it can be transformed.
We still need to experience it ourselves, but we are close in this understanding to
to the process.
Any questions?
Where do you place the mercury inside the reactor?
You don't need to place the mercury inside the reactor, you can keep the mercury outside.
By introduction of additional neutron, you un-stable the mercury.
It's very hard to extract a proton, an electron and a neutron from mercury.
But it's very easy to introduce it, un-stable it.
and you can produce at the same time.
Yesterday we saw how a reactor can be used to produce on one side
in interaction between two of the reactors water,
while the other reactor is producing gold, and the other reactor is producing like protein.
We are running an experiment in conversion of gases into matter.
which is one stage is already running for 48 hours now.
And in that process, I think we will leave it to Armen to tell you what we saw on top of the water,
in one of the systems.
Actually, we made a video and we're going to release it and you can see that we created

galaxies.
And each galaxy, you know, each galaxy there is a matter being produced and we saw fat,
which one of the actually containers we saw fat.
And it clearly shows that.
But not every each container,
it's changing the color differently.
So actually we're gonna wait another two, three days,
and we're gonna have another video
that we can show you the change.
We created actually new life.
We started a new life.
It's amazing.
It's so simple and it's amazing.
Change of magnetic fields, you know, it's a totally different understanding.
When we break out from the matter level, we can understand that the fields control everything.
change the fields and it's going to be changed. Environment is very important.
It affects.
And you can see if the small reactor we call reactor because it is
the reactor but for you you're going to look at it it's a can.
But so whole life is starting over there just simply
you know, putting animal material, which has its own magnetic field,
in gravitational energy.
When I say magnetic, gravitational comes with it.
[Laughter]
So, guys, it's a very, very deep changing everybody's knowledge
about what we learned at schools.
It's totally different.
And it's gonna be different.
And it's fun to create.
[laughs]
So loosen up. Everything is good.
We have a funny moment when...
When we try to switch on this experiment.
We are recording to share with all of you.
And in the moment we try to switch on.
Well, we are recording the experiment.
Don't make nothing.
Doesn't work at all.
So we have a lot of laughs in this moment.
And we try to replant the experiment
and think about what was the problem.
Here is, we are learning now.
So this is part of the process of learning.
you don't get your goals instantly.

So you have to learn about your failures also.
If we go a little bit into details of this experiment,
I will try to describe a little bit of this experiment.
What actually is going on, with my understanding at the moment,
we are trying to replicate the environment or conditions which
are happening in our body.
Actually, we created different containers.
And we put in these containers two different electrodes,
one coated with nanomaterial, and one electrode
is a single, just a metal.
We used copper.
But we can use also other metals.
And we put in this container also salt solution.
Salt solution is used also in salt.
Different salts are used also in our body.
If we go to the health section and people who are familiar with homeopathy,
they can tell us more about salts are conversion system from energy to matter.
And this procedure happens all the time in our body.
We have lymph, which is supply of energy,
and in different parts of our body, where different salt sits.
This energy from lymph converts to matter.
but not in matter as we know.
It is GaNS state of matter.
We know that our cells in body are in GaNS state.
Yeah, all the components, if you look,
the amino acids, we have oxygen,
We have nitrogen, we have carbon, we have hydrogen.
So all together, if you look, if we put them together,
we get 43 number, which is common denominator
in our planet.
This is the strength of the field in our planet.
That's why amino acid holds together.
And that's the universal goal of protein.
Using these amino acids,
you can build all the proteins in the human body.
and besides all this, there are examples.
- Maybe we can give microphone to other people
in our call that they can correct us.
Elia, please, you're a medical person, so I would like to hear your opinion.
About what you say for amino acid, it's some kind of, how to say,
people will not understand what you want to explain to them
about the matter and the state in the way how you said.
because ... you have to say that ... our body is made it from different kind of gas state,
of GaN state of gases, like Carbon, Oxygen, Nitrogen
and this different kind of GaN state of gases, when they mix it to each other,
Finally, they made different kind of matters, how the Mr. Keshe say.

Depends of level of existence of different gang state of these gases,
we have it finally different kind of tissue,
like a muscles, like a liver, like a gallbladder, heart, whatever.
And when the different gas states of gases mix it depends of their of them
Density they represent in metal world in different density
this is the different value you have to say because
Live
Blood and different organs all of them. They are matters, but they have different density
You understand in different explanation of matter because the lymph and blood they are liquid
but they're also a matter and
Liver and heart and different internal or
Organs, they are more solid, but they are also a matter
So depends how the gun state of gases will be mixed what you call this salt
That is the clue for representing the God state in Meta world.
I understand in that way. If I'm wrong, you are able to correct me.
Everybody is right their own way, Elea.
Yeah, I'm listening.
We love to make this Knowledge Seekers Workshop in a different way of Mr. Keshe.
We like to make more dynamic because we are now learning and we want to learn from you.
So we are at the point that I have to format all my biology and physiology knowledge to good replace for the new one.
So that's very adonish for the people to, we have to build a new science in biology, physics, chemics.
So we need to build together.
That's the reason why we prefer to discuss with all of you
all these topics, because now we are
starting to understand in very different way.
So the most important part for me
is to be able to delete all your previous knowledge in order
to be able to understand the new ones.
It's painful for a moment, but it's so different feeling you're gonna feel.
Okay, so what is the right explanation then?
Right explanation about guns?
Yeah, because about what we're speaking about the matter
and the gas state in the human body
and how the gas state of the gases makes the matter.
If I'm wrong, what--
It's all about the fields.
It's all about the fields.
Salt, they are settlers.
Yeah, that I'm saying.
So this is the mix--
Every salt is, you know, settle certain matter.
Yes.

So, if you create that magnetic and gravitational field...
Yes.
...that's the matter you're going to get.
Yeah, I'm correct.
But this depends which kind of gases you mix it in and in what quality.
Okay.
In that case you receive different kinds of matter.
No, no, no.
We have to understand one thing, all the matters are the same.
If we, what is matter?
Actually matter is when magnetic gravitational fields lose some of their strength and when
they come to the strength of the matter, then we observe them as matter.
In experiment that we are running right now, we have put salt, so salty water in our containers.
So we have this salt condition and the salt create the condition that make possible to
to change the fields into another state of matter that we call GANS.
GANS is a very special state of matter unknown for the science in this moment.
And it's like circles.
It's like circles.
It's like millions of spheres, you know, sliding each other.
very, very, very, very small scale.
So the fields of the matter are covering the internal structure of other energies, so they become totally protected from the other energies.
That's the reason, and you will see in a video, that you can burn a gas and you can touch in seconds and you don't burn.
So the pressure or the heat or other energies
don't affect the GANS because only are dependent
of the inner gravitational fields of the matter
that is covering the whole structure.
So they behave like superconductors.
And as I can see now, all the chemical reactions of metabolism
occurs in this state.
For me, it's so overwhelming in this moment that I can't explain better.
Okay, but the question is how this gas state of gases,
they are mixed and made different kind of tubes in the human body.
and you tried to explain on the beginning that how amino acids, how in them GANS state,
they stick to each other and finally made a metal.
So, the question is...
My interpretation of magnetic field...
Yeah, all depends on the magnetic force of each other.
It's like a bending in a chemical way doesn't exist.
Like we understand
That's okay, but we have different kind of solid matter
We have a liquid state like a blood and live and we have a solid state also

How the nature?
Understand which one and how to combine the gun state of gases to make different solid matters
Liquid or more solid that is the question
because
It depends of the environment
Responsible
Okay, what you mean about the embryology then
Have to stay you have to say how they made it back to them and to them and what is the difference?
between the combination of gas state
so because when they made a different leaves of the embryo have some rules to do it and to
Combine the gun state of the gases
to have a difference
You understand this is the tricky question what we have to answer
One minute we can answer that question
But at the moment here we don't have
Capabilities to know everything which which salt
Which salt will create bones with salt with will create
Skin tissue which sort will create muscle tissue
At the moment we don't have this knowledge.
That's why we need medical person, biologists who can do testings with this.
With our simple test it's impossible to do all the research or the explanation.
That's why we need also other people who can help us.
(MK) Elia could you repeat the question in a simple way to Mr Keshe?
(EL) Yeah, which one?
(MK) The last one. (EL) The last one.
(MK) Good morning. (EL) The tricky one.
(MK) Good morning Elia.
(EL) Good morning Mr Keshe, nice to hear you.
(MK) Oh nice for you, you are back again.
(EL) [laughs]
So the question last was, because the guys told to me,
I have some wrong point in my explanation.
So the question is, what is the difference between different levels of embryology,
like ectoderm, endoderm, exoderm?
How does nature understand how to mix the GaNS state of GaNSes to create different levels in the embryology, different layers?
Yes, this is over millions and billions of years, millions of years where the life started on this planet.
These are all embedded in DNA in conjunction with the RNA.
DNA carries the structural information and RNA carries the, what do you call it, the knowledge,
or what we call, like a soul, or you call it, or you call it the information.

Yes, that's why you have an RNA, you have a physicality and you have a memory bank in the back of it.
DNA only carries, so in conjunction between the two, you, what do you call it, you produce the right salt or the body through parathyroid glands
produces the right salt in the right place for production of the skin or the tissue or the skin of the tissue or the,
what do you call it, any other material which the body needs. Usually, in some cases, you don't need one salt, but it's a
It is a combination of two salts.
Yeah.
Like the heart muscle is a combination of two or three salts, which creates the right tissue, not hard enough,
but not soft enough to be like a muscle, or to be like liquid, but flexible enough, not to be like a bone.
So, according to what strength the body needs in a certain tissue, through one of the parathyroid glands,
and in conjunction with thymus, and with the lymph node which is responsible for that organ,
the right combination of mixtures of salt or individual salt is used to create that tissue.
But this part of the information of the combination comes from RNA.
The physical change in formation comes through DNA.
That's why you have RNA and DNA parallel in the same kind of helix.
So, this is the way, according to the environment, where the energy is, the material is converted to what it needs to be.
Ok, but the question was, did you know at the moment, each one of the South, we have to combine to produce different kind of metals?
Yes, yes, yes, in due time I'll teach, but it's too early. These guys are just trying to stand on their legs, don't ask them to run.
But, in time, yes, I'll teach you how to do it, because in space, as I always say, you can't go to a passenger and say,
Can I have your heart please for the captain?
You should be able to produce, if you understand the combination the right way.
You can even carry emotions to the heart, through the RNA.
So, this can be done.
This is part of the process of the development.
I have to announce this is the next step in part of the process of teaching.
If they allow us to stay online and if they allow us to be able to teach, we teach everything.
As you know, as I explained in other workshops, there is a huge apparatus has run around trying to bring the foundation down.
So, we have to be alert and aware of it, because we are putting too much technology out.
As you saw this week, for three seconds they managed to load free energy, no thank you, with my face with a cross on it,
on the website of the Foundation.
This is not one man, it is a huge organization, it is running around, they are trying to bring a criminal case that they can shut the technology down.

And, so we go as far as we can, the way we can teach, it is time to literally mobilize all the knowledge and the people who want to receive the knowledge.
I have to announce, maybe we bring it forward, the technology is from the government handed over to nation.
So, we hand over the technology and the space technology to the knowledge seekers.
There is a move to put me in prison with false allegations, they are trying to build up cases, we are aware of it.
They already interviewed a lot of people around Belgium, Holland, Germany, all sorts of places,
trying to build a case up, to shut the Foundation Forum and the Foundation as a whole.
But that's the responsibility of the people who read the books and understand it,
to follow it up if they imprison me or whatever happens.
So, we are aware of assassination squads which are moving around Europe to create an accident.
I tell you that very directly, we have reports directly from the security of nations.
So, you have to understand how important it is to pass as much knowledge as possible, for you lot to understand the principle.
And, in so many ways, the government of Taiwan has released the USP stick to its national scientists.
So, if anything happens to me, scientists in Taiwan have got the USB stick in their hands.
So, you as a public, you can go to the Taiwanese, we will release their name and everything,
that you can have access to the full knowledge, the medical patent.
They have seen the patent number 5, they have opened it, and they are working on it.
So, if anything happens to me, or any government tries,
Hello?
Can you hear me?
Yeah.
Yes.
Yes.
If anything happens, if anything happens to me with these cases,
which they are trying to build up,
the Taiwanese government has released a USP stick to its nationals.
So, the whole package of Keshe Foundation is open to world population.
And in those patents, there is enough information to handle the medical side,
to handle the nano-material energy production, and the other two patents.
So, we are not sitting back, we are monitoring, the knowledge seekers have seen how easy it is to use to produce protein,
in a simple, actually like a Coca-Cola bottle again, using the nano-materials you produce.
The Spaceship Program will carry on the way it is, they will try to block us, but the time of the old is finished.
The time of what they have been trying to block us is finished.
There is enough knowledge, there is enough books sold, there is enough patent, go.
We released the Taiwanese, we asked the Taiwanese to release the full package of USB stick worldwide.
It will be done, but in a secure way.

So, in a way, if what they tell us they received from the government is correct,
this is what I said we have to check,
then on a Keshe Foundation or on your Facebook channels, you post this.
This will stay for millions of years, for thousands of years, for people how to do things.
I repeat again, the move is done in Belgium, and it's done by the same people.
They are going to do a lot of things to stop me teaching, most probably by setting up a kangaroo court,
the same as in Canada they did, to accuse of whatever to stop the technology.
The only way it cannot be stopped is for people to make it clear openly,
this is the knowledge which belongs to you, and this time it cannot be blocked.
We know there are six man assassination squads sitting about two hours away,
from where I live.
And this has been given to us by national securities.
So, the people who think they are planning to do things,
they are people within the structure of governments who are protecting the Keshe Foundation.
The Keshe Foundation website most probably will be filtered, that you cannot reach it.
You set up alternative websites or whatever to carry on with the work.
This is very, very clear. This is not something to create a hype.
When you hear it, then say, "Oh, he said it two weeks ago, three weeks ago."
So, as they think these people are doing things to stop you learning and teaching
and getting yourself sorted for, not a free energy, but a free life,
but in collaboration with the cooperation with the governments and the,
what you call, multinationals.
This is the stupidity of what they don't see.
You cannot kill a prophet of God.
That's the bottom line.
Our teaching is for good and forever.
The time is finished.
The time of old is finished.
The time of the new is in the hand of people to understand the correct procedure.
I released this in short terms, in short ways, in coded messages for years.
In the peace message we said the scientists are messengers of God.
But, if you look, we don't only teach science, we teach the ethics,
which is the job of the prophets of God.
You cannot silence prophets.
They put a thorn on the head of Christ, and they said, "If you are a king, where is your throne?"
And we have seen, now every law in every nation on this planet,
being communist, non-communist, Christian, Muslim,
is based on the teaching of Christ, because it's correct.
The same is with this technology and what we are releasing.
Doesn't matter, those who take action against us will not survive, will not last.
By the nature of what they do themselves to themselves.
In so many emails, in so many communications,
in so many writings people to us over years,

they keep on asking me, even in press interviews,
"Are you a Messiah?"
What is a Messiah?
Changing everything they knew, how many times, how many prophets,
It's how many world religious leaders have to say,
"You cannot do wrong, you cannot do this, you cannot steal."
The change comes when you change the whole totality,
and the change has come.
We teach everything totally the way it is, the new way,
and in conjunction, how to use it in the space,
not on the matter level of the man.
So, I go to the governments who are trying to filter us,
trying to ban us, trying to imprison us.
You banished, you imprisoned, you killed a lot of prophets of the past.
Time is over. You will not succeed.
Physically, you might think you've done,
but I want to know how many of you will last to see it.
So, the message is very clear.
We go back to what we've done, what we are doing.
My message to World leaders is very clear.
Collectively, between Canada, America, European Nations,
You have put together a package to silence the Keshe Foundation.
You saw what happened to what you call, to the Jews, for what they did to Christ.
They went for banishment for 2000 years.
You touch and you will see what happens to you as a whole.
I have no doubt about what I'm talking about.
Before you think to harm me, or to harm the Foundation, to harm the panel,
you have picked up something which you do not even understand.
My message to you is very clear.
Do not touch what you don't understand, and do not touch the Prophet of God,
Because, we know everything and we do not need to be there to understand.
This assassination program you put in position, this blocking of the foundation,
this all warrants of arrest you're putting together, what happened to Christ?
You crucified him, but now he rules the world.
Our time has no dimension.
That's my clear message.
And if those people who don't understand or pretend not to understand, they say you call yourself a prophet or messiah,
I don't call myself nothing. But the message what we brought, it will last beyond the kings who are temporarily on this small piece of the dust of the universe.
I am very clear to his Excellency President Obama, stop the procedure of planning or your
government or Canadian government or European government to block us or for my assassination.
The body will go, but the soul will be here and you have to live with it.
Thank you very much.

We go back to the Spaceship Program.
If you look at the second floor of the, or what we call the zero floor of the space program, of the spacecraft, this accommodation is a 40 meter diameter with seating facilities and a control room.
And, this control room, this seating facilities, you can accommodate in a circle.
These crafts do not have a front and a back.
So, if you are moving in one direction, and you think you are facing the direction of motion,
immediately, if you want to go in another direction, you don't turn the plane around.
You just change the direction of the field force in one of the three reactors,
or four reactors in combination.
So, the seating capacity in these systems is not,
or is not foreseen to be like an aircraft facing one direction.
You can make them that way,
but it is very much circle, like a football pitch.
And you, that's why you can carry a very large number of people.
The feeding in these processes is very, very simple.
You absorb most of the energy from the environment of the craft.
So, you'll find out you don't need to produce that much food to sustain the body.
You create through your reactors energy which is in the dilution position that the body can absorb to live.
So, as I always said in my talks, what we eat is 20% of the total energy we need for sustaining the physical side of the operation.
80% of the energy is absorbed by the brain and the skin directly.
So, in so many ways, your brain, your skull, the skull on the head of the man,
is a filtering system for the energy which, through the liquid of the brain,
balances that the body can absorb.
In these crafts you feed your passengers through the same way.
What this means, if this is... Do you understand Elia?
Yes sir, I am listening.
Ok, ok. In this process, I have said this before,
if you understand, if you remember in some of my talks in the past,
We know that astronauts, the very first astronauts went to space,
or cosmonauts, explained to us that they see flashes in their eyes,
which was the radiation which goes through the skull and through the brain,
and when it reaches the water of the eye,
it releases the energy of a photon, that it used to be like a flash in the eye.
Nowadays, all the astronauts, anyone who's in the Space Lab,
report this effect all the time.
Some shielding has been put to reduce the radiation,
but some radiations are so strong,
that when they pass the wall of the, what you call it, the Space Lab,
they still go through and they reduce in the eye,
in the salt of the eye, in the water of the eye,
and they become a photon.
So, by the same principle, you understand the energies of the brain,

most of the energy of the brain, what the brain needs to work for its function,
is absorbed through the same kind of radiation which go through the skull
and they reduce through the salt, and they get absorbed by the body, or by the brain.
So, in reality, you can do the same thing in your aircraft.
In your spacecraft in the future, you do not need to sustain a large mass food consumption.
Because the food is to create that energy.
You can feed your passengers on all the floors, literally through the environment,
majority of it through the environment.
You don't need to carry all these, what you call it,
pre-packed frozen foods and dehydrated foods.
You don't need to change anything to be able to produce different materials.
You produce one material, which is the easiest one,
is the breathing of the CO2,
Then you convert the GANS of CO2 in the flavor and the food you like to have.
Because the human being breathe out CO2, they continuously supply you,
so you need to have a good supply of Nitrogen,
and a little bit of Oxygen,
and the rest, the breathing out of the man is exhaling,
will give you, through the conversion which the Knowledge Seekers are doing now in the lab,
through a small salt or magnetic field of salt, into a matter,
and then you flavor the matter or you change the matter the way you like.
You shape it the color you like.
Because, as you know, at this moment of time in the food industry,
all the colors of the foods are homogeneous.
You can buy a bottle of ketchup today,
and you can buy a bottle of the same brand ketchup in 5 years time,
they look and taste exactly the same.
The color is always the same.
As we are all men of life, we go to shops, we buy tomatoes this week,
and it's not the same tomato next week, it's different color and shape.
So, how they achieve this homogeneous color,
this is done through the coal.
All the colors which are used now for most of the colors,
95% of the colors used for coloring food,
is produced through coal, through the carbon.
And, you can repeat the same process to the man when he breathes CO2.
You can use part of that carbon for coloring the food.
You wanted the banana color, or you would like it the steak color,
color, or like it to be the color of a vegetable.
So, it does not need to be, because in a way,
the material which you absorb, or which you produce as a GANS of CO2,
is already in the state of the GANS.
So, when you eat it, it releases its energy directly to the body in a GANS state,
which the body is built of, and made of.

If you remember in my previous talks, I say the minute you touch the CO2, you taste it.
The minute you touch the GANS, you taste it.
Why?
Because it's gravitational magnetic field, it's in the GANS state, it's in the state of your own body.
So, this explains more in the bits which we've been teaching past months and years.
Why? Now everything comes together.
So, you will find out in most of these control systems,
you need to only produce two or three materials as a reserve.
Fusion does not happen in the universe.
At the moment, man has the biggest problem fusing two atoms of hydrogen.
How can the fuels to make food of let's say nitrogen or whatever or calcium?
The way you do it, you achieve GANS state and the mixture of different GANSes,
you achieve the release of the energy in the level which the body needs,
it will do it internally itself.
So, you convert the conversion of energy to GANS, and then when you reheat it,
it becomes GANS back to energy which your body needs.
It's a much simpler process, it's not in a matter state.
Matter state is conditioned to the environmental magnetic fields,
like temperature and pressure.
GANS is independent and is independent of the environmental.
In the videos which the Knowledge Seekers are making, then we show how we do everything to try to destroy this GANS once they come out of the Coca-Cola bottles.
You can put acid on it, you can put caustic on it, you can do all sorts of things with it, you cannot destroy it.
Because when you convert energy to, or gases to GANS, you release energy.
And if you can put back the same energy in the GANS, the GANS will convert back to the gas.
This is why when we cremate the body of the man, we are left with the salt.
Because part of the process of burning the fire,
gives the same gravitational magnetic field back to the GANS for it to be converted into a gas.
So, in fact, if you can control a crematorium where you cremate a body,
and you can absorb all the gases and hold them,
and put them through the salt position, you can have the body of the man back.
But you've got to know which part goes where.
This is the reality about the creation.
As much as we call about the conservation of energy,
this is the conservation of magnetic-gravitational field.
So, if you cremate or you burn something, because you give the same gravitational-magnetic field energy
back to the GANS, it converts back to the gas.
And if you get the same gas and put it through the same salt processing, make it a GANS, where through the salt you absorb or you release part of the gravitational-magnetic field of the gas,
the gas, which we use it to run a motor, or we show it as a light, then you have a GANS.

This is the secret about the creation.
Up to now, you are used to pressure and temperature, to go from solid to gas to liquid, or solid to liquid to gas, depends on which one, combination of which two or one you use.
Now, the new conversion is taking or adding to the mass of the gravitational magnetic field of a matter.
If you bring it into a plasma condition, you put as much as you like a plasma of plutonium,
or you can put a plasma of a neutron, and you get a neutron, or you get a plutonium.
It's just the size of the entity, the quantity in it.
As I always say, it's a quantity in the entity.
Proton, neutron, electron.
You add more of the same in the plasma,
you get a bigger plasma with a bigger.
So, for a gold you have, you call it, what do you call it,
so many electrons and so many protons.
For hydrogen you have one or two electrons and protons.
So, if you understand the size of the package,
you just add that number into the package, you get what you need.
It's very much like making an ice cream.
The more milk you put in, the bigger ice cream you get.
With this process, the same thing is,
the more you put energy and magnetic field, gravitational field of an entity,
that's what you're getting to get.
So, making gold there is no problem, making plutonium there is no problem,
but if you need it, it's in the holy writings in the script,
that say the maturity of the man will come when he understands the transmutation of the matter.
And now man is matured to understand the transmutation of matter,
how you transmute from one to another.
So, the man at this stage is matured enough to rejoin the Universal Community.
Those who want to keep us illiterate and in the village of Earth,
they are doing their best to stop the Foundation.
If you want to stay in the village and be like animals killing each other every day,
for a piece of land or a piece of wood or how many grams of gold, carry on.
We have opened the knowledge of God and the Universe to you all,
and you have to understand how simple it is.
Man has reached the point of maturity, but like every family, when you have a child in the first class,
you can't teach him about chemistry, which is what you call secondary,
and you cannot teach philosophy to a one year old child.
The human race is in the different ages and different classes, and as they mature,
they understand more on that one level to another.
And there is enough men matured with the support of what we see now as the internet,
to be able to make the first excursion and join out of this village of Earth to Universal Community.

This has been my job, this is the responsibility I accept as a prophet of God to do,
And, I think I have accomplished it.
There is a little bit more time to do.
It does not matter what people try to do to me.
Till I do not finish, there is no time to live.
And, I decide the time and the place, and not the human race.
Very clear, very, very clear.
Our job is to make sure this process goes through smoothly.
All the kings, you lose your crowns, all the presidents, you beg for the space to have a hole to live in.
But, our rules and our knowledge will be forever, because this is the way the Universe works.
If you look at the structure of the matter of the spacecraft, the structure can be anything you like.
Aluminium, fiberglass, steel, wood, because it does not matter what you use.
The reactors create a gravitational magnetic field, which the matter will never come in touch with this environment.
So, you create a gravitational magnetic field, which holds the gravity as 1g in one section of the passengers, on one level.
And then, you change gravitational magnetic fields of the destination point in level -2, in the direction of the attraction.
What you do, you don't burn fuel.
As we always said, in the reactors number 3, or on the second,
the 3 reactor combination of universal system,
you create the gravitational magnetic field of the destination.
Be it next planet, be it in the center of the sun, be it another galaxy,
you get attracted to that point, because you tune into the magnetic fields of that position.
Are we still online? Can you hear me?
Yes.
Yes. So, in fact, if this is...
Yesterday I showed the knowledge seekers,
the difference between a solid magnet and a ring magnet,
what we call the O-ring magnets.
If you want to understand the working of a plasma,
buy different size dimensions O-ring magnets,
and stick them together that you can make a sphere inside,
or elliptical shaped plasma inside.
Then you understand how your reactor works.
Yesterday, luckily, John had a small spherical magnet with him in his pocket.
He's got a bunch of them. He makes different things with them every day.
We put one of these spherical magnets, behaving like a plasma, in a see-through sphere.
And I showed how we can, and how the difference is between using a solid magnet to change the structure of the, or movement of the plasma,
or use a ring magnet, and they've seen how easily the magnet, the spherical magnet moves inside.

The spherical magnets, inside the spherical magnet, is very much the behavior of a plasma.
In the center there is a rush, there is a stronger magnetic field, you call that the principle.
Between the center and to the wall of the inner part of the ring, this is your transition.
And the ring is a matter-state.
If you understand this, you can do the same thing with the plasma inside your reactors.
What this means, you can push your reactor plasma to one side,
In conjunction with, let's say, one of the reactors in the lower floor,
that you would like to create gold or diamonds or whatever,
from that space structure gap.
You push the plasma, you compress the plasma to another side of, to another reactor,
which, what we call it, let's say, reactor number 2 in the -2 floor,
to produce different things.
But this is very much materialistic.
In the long run, you will learn you can do the same thing in your reactors,
and outside your reactors.
So, to understand the same thing, go back, use the magnets,
use the ring magnets, use solid magnets,
to create and control the protein in the body of the man.
This is how we use magnets in our medical side.
understanding, the Belgian police has been going around telling,
"You know, it's only magnets, it's fooling everybody, it's just selling magnets."
But, if you sell magnets and you understand the process of a magnet,
how come people can walk?
How come people can do things which they couldn't do before?
It's understanding the structure of the Plasma and where you put the system.
If this is too far-fetched for you to do, to understand,
go back to the human level of why people go to certain springs,
and they say the water from the spring is good for the eye.
Or they go to another spring, they take the water,
say, "This is good if you have a cancer."
And they go to another spring, and they get water,
they say, "This is good for rheumatism."
Think, where has the water been?
The water goes through the inner sanctum of the Earth,
and gets interacted by the different gravitational magnetic field of the different matter,
which is going through.
So, as the body of the man is made of the essence of the Earth,
hydrogen, carbon, and nitrogen, and oxygen,
The oxygen of the water, H2O, in conjunction with other minerals which are attached to it,
carry the energy, plasmatic magnetic field energy, which matches, let's say, the situation,
or with the salt which is in the eye.
So, when you drink the eye, the water, that field matches exactly to what is the salt in your eye,
or the combination of the water salt in your eye, and then affects its position,

or affects its structure, and you can see better, or you get rheumatism changes.
That's all we do in all our systems.
We understand the concept and principle of creation.
Now they can say, "The guy uses magnets, it's all empty."
Look at how it's calculated to be where it is, what it does.
And again, it's the same as what I said, it's destination position.
You target to go to Moon, you make your reactors to get gravitational magnetic field of the Moon,
you don't burn any more energy.
Space rocket, the space technology is finished, as we said all the time.
Now there are 6-7 reactors running here in Italy,
and we have given the design to the Italian manufacturers to produce the energy reactors.
That's all it is. You produce gravitational magnetic field of the destination.
Destination is Mars, destination is Jupiter, destination is the cell in your cancer.
Destination is food in your stomach, what it can absorb.
As we showed with Fukushima, there is no magic once you understand how simple it is.
So, in your reactors, you can use your reactors, the combination of different fields of your reactors,
If your passenger gets cancer, to sort the cancer out.
You create the destination of the cancer, the cell, you can measure it, and what do you do?
You can saturate it, or you can give instruction to place which controls the solidity of the matter in your body,
to not to solidify, not to become cancer.
So, your reactors in your spaceships, what we are going to develop, can be used in a different way,
as your medicine system, as you produce what you need.
Now you understand, in this graph which we now set out to produce,
Everything a man needs to be independent of this planet is in the hand of the man.
Those who want to block us, to assassinate us, to stop the technology,
are the ones who want to tie us to this planet, that they can abuse us.
Where the man has the freedom to do what he likes in the freedom of the space.
And I warn those leaders, I warn his Excellency President Obama,
American government, Canadian government and the European government.
If we call for help, there will be no nation left.
Very, very clear.
We are not here alone on our own.
And if you have not understood this by now, you will understand this from now on.
Work with us, we support workforce, we support new technology, we support new energy system.
Your governments become richer because of us, not financially, but intellectually and morally.
All these reactors, all these technologies, creates millions and millions of new research opportunities.
It creates opportunities beyond the dream of how much gold you want to put in the reserve.

Block us, we wipe you out.
Not me, but the process is very easy, you do it to yourself.
You all get cancer, you all get all sorts of diseases.
When it comes to the point, the last thing says, "God help."
The last breath before you take, you ask for God's forgiveness, and for something to release you from the pain.
The God is here and is giving you the answer and the medicine.
It's you who refuses it.
So, in one reactor you have food, you have medicine, you have energy, you have motion, and it's exactly like a reactor called Earth.
Earth gives you all that.
Now we learn the laws of the Universe.
You go further out in the higher levels, in the level 2 and 3,
It's just literally for accommodation.
Because, if you need rest, or you want to go somewhere,
everything is available.
The size of these crafts are totally dependent on
the strength of the magnetic-gravitational field
your reactors can create and maintain a safe flight position.
And, what material you put and you load inside it.
You don't need to carry heavy materials as a fuel,
because you can continuously create your own Plasma or Hydrogen as a storage to feed.
I'm teaching everything possible to the Knowledge Seekers,
in a very, very clear way,
that they can see the connection between the Plasma of a reactor,
the Plasma of the body, the Plasma of a matter,
and every day in the lab, we do everything at the same time.
We work on the different parts, the each group,
the, the, we got group of one or twos, or individuals working on different reactors,
that they are developing their own version and their own taste of reactors.
But, once they finished as a group of four,
they have to put these four reactors together to be able to create lift,
to create food, to create everything which is needed for a spacecraft.
So, one has brought his reactor from Slovenia,
and it's all steel, we're trying to produce matter inside it.
We have one which is brought ceramic reactor,
is building different things with it.
The ceramic reactor, because it's an earth material,
will be good for producing food from the earth,
or allows us to produce matters which man likes to eat.
I'll explain that in the future, that's why I support the ceramic reactor,
because it will have the taste of home,
it will have the taste of the food we get from this planet.
Then we have a reactor which is made by the Iranian engineers in Tehran,
when I was there, which is made of plastic,
and we have an American citizen and a Czech Republic citizen,

together working to make it to work, to fly, to lift.
And then we have another reactor which is a combination reactor between plastic and copper.
It's very specific.
The copper one was built by the Iranian scientists in Tehran,
and the plastic one was made by the scientists in Antwerp,
and one half of it was built by a bunch of scientists from Belgium, in west of Belgium.
And that is a combination reactor.
We put the four reactors together on the universal table which we have in one of the labs,
and together working, they can fly, they can move.
This is to show that creation of Plasma, and creation of food,
and creation of motion and energy,
is independent of the material which contains the Plasma.
This is a simple way, as we said,
"The slavery to matter with this technology is finished."
They have shown, they have been taught yesterday, how to create Gold.
How simple is to create Gold, which has been the mystery of the man to do.
The process has been explained, and now with the reactors they can produce.
Yesterday, they have seen for the first time,
how easily you can convert the gases into protein.
And then they find out that today, maybe tomorrow,
that the protein will disappear, because the system condition changes,
the protein which is a Nitrogen gets dissolved back into the matter.
So, every point of the teaching in respect to these reactors,
the Space Technology and the craft, is done collectively,
is not done by one person,
because people who sit around this table have to understand everything,
and they are taught the ethics, and they are taught the consequence of their decision making,
psychologically, pressure wise, and the rest.
The same as with our medical reactors, they are all, if you decide,
can interact with RNA and affect their psychology.
If you look at your own brain, you have the inner brain.
The inner brain is your RNA.
The outer brain is your DNA.
So, you connect the two together,
you can create the body of the man,
with the essence of his life, which is his center,
anywhere in the Universe.
In time, man will learn, you do not need to carry the physicality.
if you can carry the part of the ethics, what we call the center brain.
This is far for man to understand, it's beyond your understanding,
but in the very near future, the ones who use this technology and take to space,
and come across the other people of the village of Universe,
they will understand how easily it's done.
I go back to one thing, because this is important, you'll understand very soon.

I go back to the governments of United States, to the Canadian government and European EU,
stop this process of assassination and trying to build up a court case against Keshe Foundation.
You can take me to court, there is no problem,
but you cannot stop the knowledge which is released, and is in the hand of the man.
If you don't understand it, it's your problem.
The table of knowledge in the Foundation is open for you and your scientists.
I have sent an invitation to Mr. Dallas Penhall in Boeing Corporation,
which is a connection between NASA and Boeing,
to bring scientists from Boeing for development of the aircraft.
I have sent a direct invitation to NASA, to Mr. Nelson,
who I invited us to NASA, to join us, to teach, to learn, to develop.
My invitation goes to the Iranian Space Agency and the Iranian Aircraft Industry.
Join us on the table the way you did in Tehran.
We can go further.
The same goes with the Chinese Space Agency.
The control cannot be in the hand of one cult.
Now, the Chinese are developing,
Taiwanese government has released the technology to its people.
You try to get the cat back in the bag.
Impossible.
I ask for Taiwanese scientists who received the key,
and they say they received it from their government,
the USP stick, with the five patents,
please release it today on the Internet.
Please release all the patents.
If you confirm you received it,
and what you sent to me confirms you know something about it,
Release it. Do not wait for our appointed time of meeting and discussion.
We'll discuss it further.
You know who you are, and we know who you are,
and the authorities know who you are because they monitor my emails.
Please release the full USB stick into public.
You have my right, you have my authorization.
Any questions?
[silence]
Hello?
[silence]
Yes, yes.
[inaudible]
[silence]
[silence]
(RC) ... I have a question.
...
(MK) Who's speaking?

I'm here from the Netherlands group, from Belgium.
(MK) Yes, yes.
(RC) And, I'm busy with the Nano-layering.
I made some reviews of it, and I wanted to know if I made some mistakes.
I don't know...
(MK) What have you done to it? Can you repeat please?
I've made videos of it, it's on my YouTube channel.
(MK) Yes.
(JG) And I wanted to know if I made some mistakes or something.
(MK) I have not seen it.
I'll look at it and I'll tell you later on through the Knowledge Seekers.
(JG) Okay.
I have another question,
about the amount of the gases or the hydrogen in the reactor.
You talked about start pressure 1 bar.
you told us one centimeter tube is the amount of gas is too big in it.
It's a little bit confusing.
I tried several things to reduce the amount,
but that's not really clear.
The way I usually do the process, you have to understand.
Once you coated your reactor, once you sealed your reactor,
you create a very high vacuum in it, and leave it for a day or two.
(sound of a jet engine)
This, there is a lot of noise in the background.
This will allow any surface matter which is going to open up
and to be released.
Then you fill your cylinder,
what do you call it, your reactor, with hydrogen.
Let's say if it depends
on the size of your reactor, you fill it with, let's say, if you use a 6mm tube,
put a valve on either end of the 10cm, pick 10cm, fill at one bar this cm with hydrogen,
And then vacuum your system fully, and then open the gas to go in your chamber.
So, you fill the chamber only with hydrogen.
Don't rotate, don't do anything.
Leave it for maybe a day or so, that the hydrogen goes in and fills up any gaps,
or if there is any combination to be done, any chemical interaction,
then you evacuate your chamber again to the full.
Then you repeat the process two or three times,
that majority of the molecules in your chamber will be of hydrogen.
Don't forget, do not, while you are making your cores,
never touch with a bare hand,
and make sure you don't touch the center or anywhere inside your reactor core.
Because, you leave a fingerprint,
and the fingerprint, as we all know, is fat-based, amino acid-based.
So, you don't leave any fat inside.
Then, when you've done this 2-3 times, then you choose, you vacuum your chamber,

then you choose, let's say, the minimum I've managed up to now to do,
because of the valves I use, is 5 cm,
because you have to push your tube on one end into the valve, one side and the other side,
So, about 5 cm is the minimum I've managed to achieve, that I can keep some,
I can see at least a bit of a pipe between the two, what do you call it, two valves.
You fill in this with one bar of hydrogen,
then you connect the feeding side to, let's say, about a meter of pipe, which is vacuumed.
And then, at the end of this meter, you put another 5 cm or 10 cm tube, which is already vacuumed,
and you connect the other end of it to your reactor.
So, before you start ever your procedure, you have your gas tank, you have a valve which controls the gas from the tank to the core, you put a 10 cm pipe, you put another valve,
This is the control that you know you have 5 cm or 10 cm, you decide.
I do it 5 cm because it is much easier later on.
So, first valve, the tank, first valve 5 cm, second valve,
a meter of 5, what you call, 6 mm tube,
then another valve,
then 5 cm,
then another valve, and then a pipe to your reactor.
You have to devise a way that somewhere you can from the first valve,
after the tank, you can vacuum the whole tube, all these parts plus your core together.
So, what you do, you open all the four valves in a way, but you usually have to have a valve at the point of your reactor core too.
So, your plasma does not come out, but does not backfeed, so plasma stays in the core.
So, you have a valve by the core, you have two valves for the pipe, you have a meter, you have two more valves.
You open all the valves and you vacuum your pump.
All the time you work this way.
Then, you close your, when you reach your vacuum, you close all the valves,
and you start, you open the first valve from your hydrogen tank.
You feed 5 cm, you feed the gas into the 5 cm tube, you close both together.
you allow the gas to settle, just for a couple of minutes.
Then you open the valve and you release the whole gas in the 1 meter tube.
So what you do, you expand the gas in 20 times more volume.
So the gases open up.
Then you open the third valve, which opens to your second 5 cm, and then you close it.
So, whatever gas is expanded in the meter, part of it goes into that 5 cm.
Then you open the valve to your reactor and you open the valve from the 5 cm to the reactor.
The vacuum condition in your core will suck this, whatever is in that 5 cm, into itself.
So, this becomes the first load for your reactor.
This Plasm, this gas, because you've done all your vacuum and gassing of the Hydrogen before,
it becomes your first loading, and most of the time, immediately gets absorbed,
or it goes into different, whatever you call it, in the body of the reactor, or in the space of the reactor.

There are two points, there are two points.
Before you start vacuuming or during the time you vacuum,
before you start the first load of the last 5 cm,
you run your reactor for about 5 or 10 minutes.
that if there are any heavy gases left, any heavy material left, due to centrifuge,
will go into the nano-material.
This is one of the reasons we use nano-materials, because it's like a sponge,
so these materials don't stay on the surface of the nano-material,
through the gaps and holes, they get pushed to the physical boundary of the core
in the back layers of the nano-layer.
So what you get in the outer layer, facing the hydrogen, is more or less pure surface.
Now that you fed your hydrogen in, the hydrogen opens up to the full volume of the nano-material.
And as it's opening up very slowly, due to gravitational magnetic fields,
and the porosity of the nano layers which are mostly in the GANS state,
electrons are absorbed in these gaps, because they are more or less of the same matching,
It's filtering.
So you're going to be left with some plasma.
If you have tools to monitor, you'll find that every time, or the first time you feed the gas in,
you will see a drop or change in the flow of magnetic field of your plasma.
which means the plasma is literally acting and pushing into the nano-materials,
very much like piezoelectric, puts pressure on it, they release some of their energy,
you can pick it up.
This shows you created the plasma or not.
One of the tests you can do is that you again repeat the process.
I explained this yesterday in the lab.
You make sure, this is very, very important to understand.
This is more important than anything else if you want a stable reactor.
For a smooth, very, very smooth operation, never feed the gas into the center of the reactor.
Because, by laws of centrifuge and gravity and magnetic fields and vacuum,
when you already create the plasma and you feed your second cycle of hydrogen in,
the hydrogen has to go to the outer boundary.
So, it has to pass through the plasma which you created, it collapses your plasma.
If I can explain, it's like when you put a pot on a water, on a cooker,
you see the bubbles of hydrogen, oxygen, coming all the way up to the top,
through the water.
You do the same thing with your plasma, so you disturb the plasma.
The feeding of the gas into your reactor has to be from outer surface,
that the gas comes in from the outer boundary,
and as it gets in, as through the, what you call it,
the vacuum rotation and the nano-materials,
gets ionized, it joins from outer to the center plasma.
So, in a way, you squeeze your original plasma further in.
When you add Hydrogen in this method, you literally, as your Ionize,

because you are doing very, very minute amounts,
as you increase your pressure, as you increase your gases,
you increase the pressure on the center Plasma,
and then you start getting nano-layering of Plasma, one on top of each other.
If you build enough pressure, by experience you will learn,
single core reactors are the best reactors for movement.
Because now you create the same condition
by different magnetic field strength of plasma over each other,
the same condition at the center of the Sun.
On Earth we have the partition, what we call the solid core.
In the Universe, in the magnetic field in your body, there is no partition.
The partition is created due to difference in gravitational-magnetic field strength,
between layers, and as they interact with the other layers,
they create the initial gravity.
In Space Technology, you do not run multi-core reactors by the solid partition.
For teaching, we use it.
But, in essence, even I was teaching yesterday to the Knowledge Seekers,
you do not need to increase pressure.
reducing your second or third reactors outside in what we call the minus two level,
you can pressurize your plasma to create sudden increase in going, for example,
from the matter or from the lower transition strength to higher transition.
Because you reduce the size of the plasma, it becomes strong, you increase your gravity,
magnetic field in a very rapid way in a nanosecond, and you do not need to, what do you call it,
do anything else.
You do not, in the space technology gravitational system, you do not control your plasma for
gravity by feeding materials.
You control your gravitational magnetic field by squeezing and increasing the layers pressures
on your center plasma, because it's always there.
And your magnetic field production for the energy is in the same way.
So, you have to understand the operation.
If you have a central column, which feeds into your reactor,
you need that central column for something else,
but you've got to make sure that your gases are not released through the center column tip.
It has to, the gas has to be released where the central column comes into the core,
at the right edge interface.
Otherwise, you create a plasma and then it says, "Oh, it doesn't work."
Because, you created that bubble at the bottom of the cooking pot,
and that bubble, due to gravitational magnetic field, and due to rotation of core,
and through the vacuum condition, has to go to the outer boundary.
So, it has to go through your Plasma.
It disturbs the Plasma.
So, you collapse the Plasma, now you made a thicker layer,

now your Plasma is not in touch with your Nano-layer to be kept as a Plasma,
so you lose your Plasma, so the system doesn't work.
The process, you have to understand what you are doing.
But, we keep a center point in the Plasma, Nano-coated,
because in fact we allow continuous, what we call like a principle point in the center of reactor.
By keeping the central column in the center, and when you put nano-materials on it,
you don't allow your plasma to bubble.
The reason for central column nano-coated the way we said, is not there to feed the gas in.
The purpose for it is to have a center point that in high transformation,
you keep a stable plasma.
Your plasma doesn't go out to wobble and touch the walls and all sorts.
The feeding has to come at the point of entry of the central column in your reactor.
You feed, it's like you put a blanket on.
Can you hear me?
Yes, yes. I don't have a central column.
Yep.
So, in fact, you create multi-layering through your hydrogen.
And then, you can create a multi-layering through nitrogen and argon or whatever,
in the same reactor or other reactors.
And this gives you the effect of the salt proposition.
What you nano-layer as a layering in the reactor, dictates how your reactor will be and what it can produce.
Because your nano-layering, your, what you call, blanketing of the gases,
is the limit of the matter you want to produce.
If you use argon, producing matters up to argon level becomes very easy.
Hydrogen sits below, nitrogen sits below, sodium which is part of the salt sits below.
So, your outer layer boundary dictates the material you can produce in your core in so many ways,
if you want to do it in an efficient, continuous production,
unless you convert the matter to that level in your plasma field.
That's a very advanced technology.
The loading table I used for the gases, I used at first 1cm, 1/2, then 50cm, then 1cm,
and then was the pipe to the collector,
where all the gases mix,
and after that was for loading in the reactor.
So I started also with one bar, or half bar,
and load that bar in 1 cm and a half pipe from diameter 6.
That was the starting point.
Do you mean you are mixing your gases before you feed them into the core?
Yes, that was what I did.
And what did you get?
It was only experimenting, you know.
Yeah, I've done that, I know, but what did you get?
I've done the same experiment as you, mixing and unloading in one go.

I had nothing, but I was experimenting for the ceilings,
with the gases, and that stuff.
Yeah, it's also because I had a coating on the inside. At first we thought it was
callium, but it's very difficult to get it and dangerous too. So now we know we can
with the nano layering and the core halves are now in the,
almost in the third stage of the layering.
So, it will be next week I think, they will be ready, I hope.
I teach you a trick, I teach you a trick.
The trick is when you build your reactor, when you finish coating it, the third coating,
or when you finish coating, if you have, I've done this and it works perfectly, if you have
good strong ring magnet, or you can get hold of a good strong, two good strong small
ring
magnets, or the magnets with a hole in it. Put this inside your reactor, put this inside
Put your reactor in the center, if you have a center column, and rotate it for a few
minutes.
If it's easy for you to open your cores and see it, if it's too difficult, you don't need to do
it.
You'll find out most of the impurities, metallic impurities, and just below iron,
be attracted to the center.
Or, they'll be pushed to the outer boundary below your interface of the nano-material and
the matter.
This will give you a very clean washing of your, what do you call it, matters in the core.
Okay, I don't have a central column.
If you don't have, the other thing you can do is, no, but you can do it if you cannot get in
there and open it and seal it again,
is get one solid magnet, round magnet, not, you always, when I speak with a magnet,
I'm talking about circular magnet, not the rectangular and other shapes.
It has to be circular.
You get a ring magnet and you get a, what do you call it, a solid magnet,
and you spend 10 or 15 minutes literally gluing the matters to the back of nano-material.
is you hold the, you have to know exactly which one you are doing.
You have to use the north pole of the ring magnet, which is the exit point,
and you have to use the south pole of the solid magnet.
You understand?
So, the flow of the field is from the ring to the solid.
And what you do, you rotate your hand very close to your reactor,
before even you mount it, when you don't know if you can dismount it or whatever,
even if it's mounted, it doesn't matter,
around your reactor, very, very slowly.
What this does, it creates a flow, a very strong flow,
that some of the impurities of material in your core,
get literally glued into the layers and into the gaps of the nano layer coating you
produced.
So in a way you create a magnetic wind.
You can do this if you want to produce a much stronger magnetic field.

If you have somebody who works with you, you produce two, you hold two ring magnets on one side together,
and one single solid magnet on the other side.
And then what you do, you can move the two ring magnets slightly away from each other,
and back together, and these two as they interact, and the field has to go through the solid magnet,
you find out you can do a lot of clean up of the matter in your cores.
Then you get a very smooth, beautiful plasma condition when you run your reactors.
This is the same proposition, change the core to the cancer cell in the body of the man.
This is what they tell us, uses empty magnets in your reactors, we know exactly what we are doing.
So, you put the cancer within the boundary and you allow it to push, to go and to come back.
and you can energize it, it receives a plasma.
You can use with the human body, because it is made of plasma, you don't use a solid in so many ways.
You can use solid for specific conditions, for boundary, but you can use two ring magnets.
So it's a plasma interacting with the plasma of the body of the man.
And then what it receives, the body decides what to do with it.
with it, but you cannot cause a new disease with it, because that magnetic field cannot take more than what it has, so it cannot convert to matter. You understand?
Yes.
So, the same thing you do in your reactors. We have opened the knowledge of the medical
application, so there is no limitation. And, this is in response to the people who are going around and telling us, "He just uses a magnet." You stupid people, you don't understand your life is made of it, your life operates through it,
you eat through it and you live through it.
So...
Yes?
(VV) Sorry, those advertisements that we've all seen on TV
with the magnet that goes around your wrists,
so that could really have a benefit?
Hmm.
There is a question on it, depends how it's done, and secondly what they do it,
and how they produce it.
You see people use, they say they create magnetic resonance.
Hello?
Hello?
Yes.
The people who use magnetic resonance, that is to me, is totally nonsense.
Plasma does not have a resonance.
So, you cannot, it does not, that's why you don't see much success with a lot of it,
because, when you do these things, then you limit to the matter level,

where you work in the plasma.
As I said, a ring magnet carries the full spectrum of the principle, transition, and the matter.
And whatever is weak of, whatever needs to be done, the Plasma absorbs.
So, you do the same thing in your reactors.
I was talking yesterday about how you can make vacuum without the high expensive vacuum pumps.
You can do the same creating high vacuum in your reactors using a combination of the magnets.
If you, as I was saying yesterday, we don't have a high vacuum pumps in the universe that creates such a vacuum, high vacuum.
The lack of matter, or what we call vacuum, as the matter is made of magnetic field, is done by other magnetic fields.
So, you can create a system that you can vacuum your system without any pump using magnets.
The same way as I explained, you glue your matter in the sphere of your plasma to the wall of the plasma,
or you push it to be trapped in the sponge of your nano layers.
Or you can do a certain way to extract the material through the pipes and use the filter, more difficult one. But, do what exactly is done in the universe, you don't need high vacuum pumps, you can create a most beautiful -8, 10 millibars using several magnets around your reactor, or you can use in a combination of other reactors to create vacuum in the other one. All you do, you extract or you divert the matter from the environment where it is. Its fields will be left behind, but there is no matter.
This is what we call a vacuum. This is how vacuum is created.
Lack of matter, or lack of magnetic field of the certain strength.
So, if you understood what I explained, we tried to make a video of it in the lab, put it on that you can understand.
You can produce magnetic winds,
and through the magnetic winds, extract all the material.
But there is something I have to explain.
When you create these cleaning up of your reactor,
do not go with your ring reactor all over the core.
Because what you are going to do, you glue it on one side and you go over it with the other magnet,
you push it back in the core again.
Do you understand?
So, what it is, you have to decide which side of the core is going to be the dumping ground,
and you do not go over it with the ring magnets.
If you choose that you are going to have most of your material in your core to be trapped in the nano layers of the southern half of your reactor core, you do that.
But, then you don't take your, what you call, ring magnets and go in the southern half.
Then you release what you have absorbed back into the core again, and you try to glue it somewhere else.

So, you have to plan your strategy, how you are going to do it, before you close the reactor.
Because, I'll teach you later on, part of the process, you can produce that one side of your...
What you do literally, you coat your upper half three times,
you coat your bottom half four times.
So, you use the lower, lower layers to dump in any impurities in the core.
That when you create a Plasma, the magnetic field between the three cores outside are more or less the same, you get a homogeneous, plasma sphere shape.
So, before you go to the phase of even finishing,
you have to create a place, you have to place a dumping area,
you have to storage, and in nano-material storage,
in a GaNS state, the storage is done through the gaps and holes.
You can use, for example, before you even start the first layer in your Southern Hemisphere,
you use in your caustic materials like Aluminium.
You put your core, but you put some Aluminium foil in it,
or some other material than your core, into the caustic,
that creates a different environment in the first layer.
It creates a combination layer.
That, then you can use that combination layer in your hemisphere,
Southern Hemisphere, as a dumping place.
And then you allow your nano coating to be done on the top.
I have a Aluminium foil and a PET plastic.
Who's speaking? Who's speaking?
Hirt.
Ah, Hirt. Can I ask you, I was laughing yesterday about your reactor.
Is that the one with the Aluminium core? You've got an Aluminium core?
No.
Vince, is that you?
No, that's mine.
Ah, ok, yeah, yeah. Just one second. I wanted to ask a question from Vince.
Vince, is your reactor still in the caustic?
No, they are in the second process.
Is there any of it left?
Because, I could see it all bubbling up in your video.
Yeah, exactly. I thought very soon...
I thought soon it will be imaginary core.
(laughter)
I've seen that, I've done the Aluminium, I know you get that process.
Okay, any other question?
Yeah, I have another question.
We have the benefit to have Joe van der Molenbroek in our group now.
And I heard his, Joe, Joe.
Oh, Dr. Joe.
Yes, yes.

He is with us now in our group.
For me it's more easy because he is living 10 kilometers from here.
And I heard several stories from before with the coma patient.
and I think I understand now more how you build these simple reactors.
I think it's also with the use of a central magnet and nano layering also, I think.
I think. Yes, yes, yes, yes.
... I heard you positioned, positioned the reactors
on several ... corners of the room and turned them around
and to position the plasma on the body of the patient.
That's what I could understand with all the lessons you gave on the workshops.
Am I correct?
In a way, yes, because as you know, Yoh was present, because Yoh has a different talent
and can bring different physical operation into the functioning of the body,
and he was present, actually his daughter came once or twice as well,
how we reverse the coma patient.
He was one of the four medical people who supported us,
and, what do you call it, he's seen the whole process, how you can reverse coma.
So, he can give you a good indication.
You have to understand the process.
Once you understand the process, the working of the Universe is the same,
It's the same, doesn't matter where you are.
So, he, I think if I remember,
he's seen how we can transfer the functioning of the brain to the nerves of the jaw,
and through it, allow the brain to do, what do you call it, repair,
while we could control the physical hand and foot,
movement of everything through the nerves of the Joe physically.
If he explains to you, he's been there, he's been videoed too,
we made a video with him when he was there.
But that is the total principle, this is the principle of understanding.
Part of the process is people say, "Oh, you use a magnet or whatever."
I keep on telling you in a very simple way,
nanomaterials is part of,
the nanomaterial is part of,
when you clean a magnet, before you put it in,
Your fingerprint on the magnet, where you put it, dictates what protein will be touched in the body.
Do you understand?
Yes.
So, if you understand the creation, so your fingerprint, the protein from your fingerprint, has an effect on the magnet.
This is why these people look for everything and say it's an empty magnet,
because they don't understand the essence of creation.
So, you can do the same thing in your reactors, you can do the same thing in your operation,
control of the reactors in the space technology.
You put as part of the fingerprint only of the protein of the, what do you call it,

of the captain.
So, in a way, that protein combination,
what it gives you, the indication of that life,
is this fingerprint in that the computer allows,
because if you have 500 people on board of a plane, on the craft,
and half of them think they want to go to the left,
and the other half want to go to the right,
you don't know where you're going.
And if you don't have a physical control, you control your reactors
by fingerprinting of the body of the, what do you call it, the amino acid of the man.
And you do the same thing in your medical application.
You have to understand the extent of the knowledge,
and then you open it up in different ways.
He told also that you used coffee pots and things from the hardware store.
Now we are all looking for spheres.
It's not always easy to get the right stuff.
But, for example, when someone wants to build a simple reactor for medical use or something,
is it also possible to make one in cylinder shape in PVC or something?
You can make it in any shape you like.
You can make it in any shape.
You see what you think it will happen to you.
You mentioned Yor.
And I hope you understand the reason I disclosed is not trying to go into the private side of the life.
Yor has a beautiful girl, she is a beautiful daughter.
She is in University in Loewen, and she has fascinated me.
Through her, because she has been to see the coma patient,
I took her up to study her structure.
She is a extremely beautiful young girl, but she has a talent.
She plays harp.
And in her, from childhood, wanting to play harp, and the love she has to play, she plays harp gorgeously.
Because with Yor, I have a private, what do you call it, connection as well, with a family, we meet each other.
And, over her life, there has never been a, what you call a, harp player in the family.
So, from childhood, in wanting to play harp, and the harp being a big body instrument,
in one generation, she has managed to change a lot of her features,
to be able to handle such a huge instrument.
Her fingers has changed, her arm length has changed,
her face and her body structure has changed,
that a young lady can support such a heavy big instrument,
because she gets to carry it as well,
as well as reaching the far last string on it.
So, with her own thought, with her own need to evolve,
she has evolved her body to be able to play harp.

Then I start looking, I thought this is very strange.
Then I start looking at other harp players,
and you see the ones who started from a young age playing harp,
they all have more or less very common features.
The will to survive, the will to achieve,
the field in your psychological section of your brain,
to achieve a satisfaction of doing something,
has coded the physical part of the body to make changes,
that the arm goes further out, the fingers are longer.
And it's done in one generation by one person.
So, in looking at her, I adore her, what you call it, playing harp.
She was playing harp, but I was looking at how evolution has happened.
And, this young lady taught me a lot,
in how the operation of the will, and strength of the will,
has power over the physicality of the man.
And that knowledge, in 2008, 2009, and the process of MS and the ILS,
brought us to understand how the will of a man forces a man to die,
or the wish of a man to die becomes a reality that you end up with the ILS.
Yo's daughter was, in a way, confirming the process.
She wished to be a harp player, to be able to such an instrument for such a young girl.
The body had to give information to the brain, the physical part of the brain,
to make adjustment, because this is what I desire.
And the body has followed it.
Now, the same principle applies to MS and ILS and other diseases.
The man wishes to die, because of whatever reason.
Physically, he doesn't put a gun to his head, but because he's created that information,
the physical body goes into process of shutting down, which is death.
Now you see how research is connected one to another.
Your daughter was a very much confirmation of part of the technology for me.
And I appreciate and I thank her for the friendship and the relationship we have with our families,
with each other, because we just live about 4 or 5 kilometers from each other.
So, you see, you understand how, if you are observant, a lot of people just look at the beautiful heart prayer.
I looked what caused that change and now the research has come to the MS and the ILS.
We understand now you add the ILS, what you call it, the wishes of the death,
with the conversion of the carbon in the amino acid for MS,
then you see the brain has created a certain gravitational magnetic field,
which comes through the same process of producing a gas into a GANS.
So, when your nerves are isolated, there is no disease we call MS,
your nano structure of your amino acid is in a diamond structure.
From diamond to become carbon, you have to orientate in a slightly different way,
crystal structure, and that means releasing some magnetic gravitational field.
So, to become carbon, to become a conductor, to lead to MS,
your wish in your psychological part of your brain,
must have created the condition of withdrawal, reduction in energy.

And when do you wish to reduce energy, when you want to die?
Then you understand how reduction in the psychological part of the brain,
or you are in pain, you can't handle it, the reasons are there,
then you see how you end up with MS.
We haven't been successful in all of our MS trials, in all our trials.
You are very open about it. I always say to even to people around here, even in my business life,
we are 95% we fail, but the 5% we succeed, we learn enough to add to it.
So, you understand? You wish?
Your lack of confidence, your lack of wanting to live, but still connection to life,
You create energy absorption or reduction in your brain.
So, the brain instead of producing diamond structure carbon, your amino acid,
it produces graphite, or changes the mime on to graphite.
And then you get MS.
All you need to do, two things, you go back to the physical part, you push the levels up,
or psychologically you find out where the problem is,
can do the change and produce, give instruction internally to the physical side,
that the carbons in this level have to be in the diamond structure level energy magnetic field,
and not graphite.
So when it's done that, then you talk, you walk, and everything else, because there is no leakage anymore
of the information, the information which is energy going from your brain to the organ,
then your MS is out.
We are learning more and more.
If they take me to court to say the condition of the medical is crook or a fraud,
I will put such a thing out that all the doctors will resign to be doctors and surgeons,
they are all crooks signed up to nothing.
Because the science of the medical side is so solid,
It's so solid by the true creation of the plasma, that it shows all the medical research up to now,
a lot of it is all grand, that's a fairytale story.
We support chemotherapy, because I explain scientifically what happens.
It's the same thing as in your reactor.
Chemotherapy for a cancer, I...
The material they give can destroy, can give enough energy that the cancer cell dies.
But, one of the problems, they are making it more targeted cancer.
But at the end, when we cannot do at the moment, these chemicals, which are absorbed into the digestion system,
they release a huge amount of energy into the body system.
It's like you eating like dates, if you understand, between the warm and cold food.
Yeah? You release a huge amount of energy into the digestion system.
These energies literally have to be given somewhere.
In your lymph, these energies are given to your cells.
So what happens when you give energy to a cell?
What happens when you blow air into the balloon?

balloon, it expands. So, when the cell gets too much energy, it expands, it's not a normal size, it absorbs more energy.
So, as your lymph pass, and part of your lymph goes through your bone structure to become part of your bone marrow to immune system,
now you have a balloon blocking the holes in your bone, which are supposed to become part of your lymph,
to become part of your immune system.
So, chemotherapy doesn't kill you.
Chemotherapy doesn't reduce your immune system.
Expansion of the cells in your limbs,
cause the blockage of the bone to absorb
very, very low energy, but very strong limbs
through the bone structure to your bone marrow.
Where do you think your bone marrow comes from?
More narrow is when your lymph passes through your bone structure.
And then the body causes it to be absorbed through the blood circulation into your body.
So, chemo increases the volume of the cell, the volume of the cell starts being 1 cm,
and the hole which is made by our ancestors through our DNA is 1.1 mm, let's say,
or let's say the lymph is 1 micron and this is 1.1 micron,
so the lymph used to go through this hole and become part of this,
and we have a perfect immune system.
Now, because of the energy which is delivered by chemotherapy,
the size of the cell in the lymph is 1.2 mm, it cannot go through the hole.
Not only it cannot go through the hole, it blocks the hole too.
So, you receive less lymph through your bone structure,
to go become bone marrow, to become part of your immune system,
and most of the people die because of cancer or chemotherapy,
because they don't produce immune system.
Now we developed a technology where we can take the energy from the lymph,
and it becomes again back to one, what you call, one microbe.
So now it goes through health.
We have a confirmed data by a doctor who's sick in Germany,
confirming the technology is correct,
and is monitored by two or three other doctors.
We receive a blood test every week.
The technology is 100% correct.
That's why we support chemo.
We are not paid by the chemo lobby or pharmaceutical.
We understand how beautiful this technology is,
but it creates a small problem.
And we have found how to solve it.
And the process is going in Germany.
The ones which use the system and it doesn't give the results we are looking for,
It doesn't mean the technology is wrong.
It means we haven't understood the process of the conversion and the size.
So, you see a guy using the ILS system and he makes so much improvement.

We make a system for ILS for another one, we don't see the same improvement.
Because it means his amino acid combination with the minerals in his body is slightly different than the system.
So, we have to change the system, all fine.
This is why we are asking for the second generation, 25 scientists to come and do things.
Because now we understand the full structure, we put it into data, that anybody around the world can produce it.
It was the same, we were talking with Mr. Cho with the Chinese Keshe Foundation in China yesterday on Skype.
He said, "How you look to, if you don't license, how do you expect to have an income?"
I said we leave it to the people, if they benefit by it, and they only want to take it, that's theirs, there's no problem, but in time people have to learn.
He said it's a new way of doing things.
This is how the technology freely is becoming a knowledge to public.
We didn't come and ask, can you pay us this, can you pay us that, if you want this,
We put Fukushima on, we meet with the authorities, we meet with the technologies getting to Japan for TEPCO to use.
I tell you something very direct.
These people who are trying to stop us, the Keshe Foundation, for their own clandestine situations or whatever,
you boys, you're going to need this technology for you and your family more than anybody else.
When you cry to save your own lives, you stop the technology, you have to surrender to your meager life.
Support us, we support the human race.
Instead of going through all these, we know what you are writing, we see what you are doing.
We knew the picture before you put it on the net, days before, weeks before, months before.
People inside you telling us what's happening, not people from outside.
People closest to you, which is your own soul, gives the information away before you physically open your mouth.
This is what I thought to people here.
In space, you come across things which to you, you are used to physicality.
The only way you know there is another being in your presence,
is when your magnetic-gravitational field of your body,
interacts with the field which they carry out their existence,
and then you know the presence.
"Thy shall not steal and thy shall not kill."
When you plan and you work this way, we are aware of it.
We are within you and amongst you,
And the spy to you is your own soul.
So, stop this stupid process, understand what it is, and collaborate to help the others.
As the Knowledge Seekers told you this morning, they've seen how easily, by principle, you can produce gold.
One, one neutron.

Any questions?
Thank you.
Mr. Keshe?
Yes?
Hello, this is James.
Professor Gao has joined us, so I just want to introduce you to him.
He is the professor at Beihang University in China,
one of the top aerospace, aeronautic universities in China.
So, please say hello to Mr. Professor Gao.
(MK) Good morning, or good afternoon to you Professor.
(JG) Yeah, I'm very glad to be here.
I've heard of Professor Keshe's name for a long time.
So, I'm very glad here.
Okay, do you hear me?
Yes, thank you very much for your presence.
I would like to extend our hand to you and your University and the Chinese Aerospace,
to join us to develop this Space Technology.
Maybe you can carry this hand of friendship from the Foundation to your government,
that through your connections we open our doors, you can bring your scientists into us
or we come to you to collaborate to do this technology together.
Yes, I think the collaboration between us would be beneficial,
and give us the virtue benefit and the benefit of all human beings.
I think if you speak to Mr. Cho, I've been to China, I met with your officials and leading group about 6 years ago,
I'm prepared to come back and collaborate with you, or if you like to join us here in Italy,
for us as two groups to be able to develop this space technology for all aspects,
with your government and with your university.
Yeah, I will do my best to make this possible, the cooperation. I will report to my leaders.
Mr. Cho knows that one of our members of the Knowledge Seekers panels is coming to Japan.
She will be there by the end of this month.
She will be carrying some of the materials which we have made for Fukushima,
for testing with, is it three different groups?
Two different groups in Tokyo by the end of this month.
So, it will be nice if you want to access, or we can send you through James Connection in Tokyo,
some of the material, otherwise I invite you to join us here with your students,
or we can do direct teaching together without moving, because to me I have a lot of respect
for Chinese and Chinese system and Chinese government.
The respect has come out of collaboration and understanding over years.
So, I see China and Russia as a easy way for development of the Spaceship Technology Program.
And, it will be nice if you could organize for us to collaborate.
Yeah, that would be fine.
Thank you very much. Is there any question you want to ask us?

No, right now I have no problem. Thank you.
Thank you very much indeed professor.
We speak later on James to sort things out.
Yes, I will do that. I will contact you again.
Yes, hello, can you hear me?
Yes, I can hear you James.
Ok, I will look. Thanks.
James, I send you the, can you hear me? I send you the Taiwanese group, that you can access to them and get their patents to be released worldwide immediately.
Ok, please do that. I'll contact them.
We'll talk later on. I'll call you back later on. No problem. Thanks. Thank you very much for yesterday. It was wonderful.
Yes, you are welcome. Okay, very good. Thanks.
Is there any other questions?
Yeah, I have a question for you Dr. Keshe. Can you hear me?
Listening, I'm listening, yes.
Okay, you've coated a lot of different materials with the nano-coating.
Have you tried coating crystals?
No, no, no.
I'm hoping that our team member in the panel, we call him, he is an alchemist,
he understands the materials, and he is working with, what do you call it?
with clay, with what do you call it, ceramics.
So, the next step with him, I think it will be crystals.
Ok, also, do you have any experience, do you have any experience with crystals?
a little bit. I'm a chemist, but I also create...
In what way? Just chemistry from college.
But, I have, I create these organ devices, they are pyramids,
and they emit an energy, and I can transition the energy
so you can photograph it, but I wanted to know, people also call it Chi
or Prana, and how it relates to the energy fields that you know about.
Pyramids,
If you make it with a crystal, or any pyramid,
has, if you put two pyramids together,
back to back, you get very much
near structure of
diamond structure, crystal.
If you do it the right way, if you understand the positioning of it,
so,
Pyramids have an energy release or absorption.
If you understood the structure of the material when it converts from the gas to a GANS.
I understand that.
It depends how you make your crystal.
Your pyramid can become a GANS or can become a matter.
Then it releases or absorbs energy from its environment, and that energy due to the structure,

the shape of the structure of the crystal lattice of your pyramid, this is what a lot of people
don't understand and they say, "Pyramid does this and that."
Pyramid has its other half in the ground, or as you put it on the table, the pyramid itself,
You see the physical half in one part, but the other magnetic gravitational field of the structure sits below it.
And at the same time, because of its structure, absorbs or releases, depending on how it's done and how it's been made,
or what is made of, certain energies according to structure.
So, you convert, you absorb, or they say a pyramid has a special effect.
Pyramid has a crystal lattice structure which you physically see half of it.
Ok, I made the devices and you can see the energy in some of them going in and coming out
and I made them, I structured them so you can photograph the energy and you can actually see all the different colors coming out of the energy.
It's beautiful.
Yes, because it is a pyramid, it is a crystal lattice structure, it is the same as, because it is a
usually, what you say, mono or maybe multi, depends what you do it, depends where the focal point of the
transfer is. Some people put apple or fruit on the pyramid and say it stays a long time very good.
or people put things on the pyramid.
You absorb or extract the energy according to the shape and what you put under it.
Because, I always say, pyramid is like an iceberg,
we only see part of it,
and the other half is hidden under the water, and this is what people don't understand.
Ok, also,
how do you calculate the gravitational field point for a destination
in space from far distance, like another galaxy, how would you...
It's a fingerprint, it's a fingerprint, I'll teach that later on.
It's what they call, it's a zero communication system we talked about before.
Every galaxy has its own zero communication line.
You have to, it's very easy to enter with.
It's like the light which comes from the star.
You see it, you can link into it, and then you measure its fields.
At a point, because it's filled with you, and at the point of the release,
it's more or less the same.
And each magnetic field of each star is like a man's fingerprint, not two are the same.
Okay, I understand.
So, the transportation is not by any other thing, but that literally is if you have a magnet and you put a magnet next to a wood, it won't touch the wood.
But if you have another magnet, it pulls it to itself.
So, with this technology you can create a magnetic field as always of a wood or of glass or whatever you like.
Because now we have the knowledge to vary gravity and the magnetic field together.

When you do, this has been one of the part of the problem of the communications, satellites and communication and transportation, is we always look at the magnetic field.
But if you look at the magnetic and gravitational field,
then it's a specific fingerprint and then you lock into it.
That's how matters attract each other.
because the gravitational and magnetic field matches, not just the magnetic field.
And when it matches, it's instantaneous.
You become part of your... you're in the ocean of the same field.
And then if you go closer, pardon?
And then if you go closer to the inner part of it, you go with the speed of the transition or the speed of the plasma of the seed of the, what do you call it, the principle matter.
And when, there is something very important to understand, when you travel within the, what I call, field of the magnetic field, gravitational field of a destination point,
you will find out you are totally protected in your speed of travel.
So, you're, I had a near death experience a few years ago and I got to cross over to the other side, like people say, and ever since then I have a certain ESP abilities and I can access that point in my head with the gravitational field from the emotional mind, and I can increase the energy field strength through my body, but I don't really know how to control it to do anything with it.
You got to teach yourself.
One of the ways to do, one of the ways to do if you got a crystal and you say you work with the crystals and the pyramid,
this is what I was teaching yesterday, your body creates gravitational magnetic field of strength.
I put a small magnet on the table, and I said to the knowledge seekers,
"Sit here and concentrate your fields till you can move the magnet."
And if you can manage to go low enough, you interact, it's the same way.
So you do the same thing.
If you've got a crystal which you can see the fields of, measure it, and see the color of it,
Then sit in front of it and measure what colors you change.
You won't feel change everything, but consider the environmental,
and then you see how much you can control the fields from your brain into the crystal.
And then you understand how the future reactors will be done, will be controlled.
That's cool.
Because, yeah, do it and send, put a post up,
I will say, put the pictures on the Keshe Foundation YouTube, or give it to Rick to do it, or we post it around.
Yeah, I shared some pictures already.
Yeah, but sit in front of it, and make sure there is nobody else to interfere with,
and see how the magnetic gravitational field of your brain, what you call thoughts,
because it's the same, in interacting with the crystal will change.
And think the same thing twice and see you get the same color, the same combination.
And we can learn from you. It's a beautiful way.
I would love to see how the experiment turns out,
because this will show us a way into the future how to assess controls.
Ok, also when I do this, there is a physical response in my body.

It creates what people call "goose bumps" or the chills, and depending on the strength of the field I create,
it depends on how it shows the thickness or what you can see the amount on,
You are not the first one I heard that can do this. I know one or two other people.
So, I know exactly what I am telling you. If you do that, you will see it.
My wife used to be busy with these things years and years ago.
And, their fluorescence, he has these permits and he does.
So I've seen close and how they do what they do.
And what can be done. But if you have a crystal structure,
you can see and observe the change of the color,
that will teach us a lot. I'd like to be your student.
Okay, I'll post the pictures and I'll make some videos,
because I can show people how to build it.
Ask Rick, please.
Please ask Rick, private, he will give you my private email,
and send these things to me through my private email.
Ok.
Because, then I will talk to you, maybe we put a learning session with you,
that you can teach us.
Sounds good.
Thank you very much.
Next question.
Any other question?
Ok, so, so, so, summing it up today we've seen the structure of the space reactor,
the space, what do you call it, craft.
We, we need support that the people who help us, they can have the financial support to build it.
My message again goes to the governments, do not plan to assassinate me.
We know what you are up to.
Do not plan to shut the Foundation Forum, block it in Europe, in Canada, or in America.
Stopping the knowledge will come more and more.
Every time in the past 10-20 years you stopped me, we came back stronger and stronger.
Now the knowledge is in the hand of the people.
I asked the Yen Chou, please I send you the link, I asked the Taiwanese listeners who are working,
please you have my authority and my authorization to release the patents,
if you tell us the government has released it to you.
If one nation knows it, the whole world has to know.
One of the reasons I explained we released the technology in the USP stick to all the governments,
the last two years, was because when we gave these patents to European patent,
it was only becoming the knowledge for Europeans to take advantage scientifically
over the others and sharing it with the Canadians and Americans.
The reason we went out and we gave all the patents to every nation,
was that everybody will be in the same shoe.
So, now the Brazilians have it, the African nations have it,

have it, the Chinese have it, the Russians have it, so there is no abuse of knowledge and technology. So, now that one government has decided if they tell us correct, it is in their hand, released to them by their government, and they say they've seen a patent number 5, release it. Then the whole world can work the same as you and we work together.
And if we don't receive the release, I authorize the people who in the background, holding our patents for security reasons, they release it, if anything happens to me, to release it within coming time.
So, we gave the governments a year and a half, head time, now everybody else has it.
So, it's better to come from them, than coming from the Foundation.
We are not here to fight the system, we are here to collaborate with the system.
And, what I ask the Foundation needs, if they close the account of the Foundation in Holland,
organize an account that it can support the building of the spaceship craft.
We gave the option to Boeing long time ago.
I gave you the name Mr. Ben Hoff, Dallas Ben Hoff.
He is a senior key man in connection between NASA and Boeing for production of the crafts.
I've asked him to join us to bring the Boeing in,
because the knowledge sitting with Boeing, with the European, what do you call it, aircraft industry, we can produce these crafts literally in a matter of months.
then we all share the same knowledge.
There is no competition between one to another.
The market is so big that collaboration will bring more fruits.
Now you are building aircrafts,
our people in Boeing, in Airbus, in Lockheed Martin, in China,
to take people, a few people, from Moscow to Washington,
from London to Tenerife.
Collaborate with us, when you make crafts with much more people, much more passengers,
more wealth for you, for excursion to the Moon, excursion to the Mars and the other planet.
This technology is not a threat to no pharmaceutical, to no aircraft, to no military.
This is an addition to the man's knowledge.
If you don't understand it, you are too short-sighted.
So, maybe we produce one craft for you lot to be the first passengers.
As I've said before, you're fighting for a corner of a land,
we give you a galaxy to rule, but your lifetime is very short.
Any other question?
There was a question
from Ed, Foth on Earth,
he says, Rick, can you ask, that in creating the first
carbon SP2 nano-layer, the process of the
the caustic liquid produces EUV, let's say like in the lungs?
It depends what you put in there.
In the system we are using, we sometimes add caustic plus potassium.

In the Coca-Cola bottle, it is slightly different because of the shape
and the carbon which is released by the CH bond in the plastic.
In that, you don't need the, what do you call it, the EUV as such.
The process is very simple.
Your electrodes in the Coca-Cola bottle behave like gravitational field attraction points.
So, in that process, the gravitational field attraction of the copper in the layers,
if you do it the right way, matches the carbon in the neck of the Coca-Cola bottle,
and it extracts it, because the two fields match.
That's why sometimes you use a Coca-Cola bottle and you see no loss of the head,
and in some cases you can, because in the layer which you produce,
because as you produce nano-layers, each layer on top of another layer is exactly like gas layers in your reactor.
As you put more hydrogen, you create another layer of plasma of hydrogen, but it's not the same as the first one.
So it stays as a different layer.
And these layers create different gravitational magnetic fields.
And if your gravitational magnetic field in one of or two of the layers, nano layers you produce,
matches the gravitational magnetic field of the carbon, which is in the neck of the Coca-Cola bottle, will pull it out.
That's how you do the disassociation.
Not with caustic, but with the gravitational magnetic field which is created on the layers of the electrode.
You look at the wrong way.
If the reason we use Coca-Cola bottle and it doesn't happen with others, it's very much like steel.
You can make steel, but if you roll it in a different way and mix it in different materials, you get stainless steel.
It's the same thing.
It's the way the compression is created on a Coca-Cola bottle on the thread end, allows to the crystal structure of the carbon is very much matching to one of the layers in the copper electrodes, nano layers.
So, you get the absorption.
That's why if you read the report of the IMAC, it says they see clusters.
Where do you see the clusters?
Somewhere in the layer of your nano-materials of the copper electrode,
the gravitational magnetic field of the carbon matching to the neck of the Coca-Cola bottle is created,
and they are all attracted to one position.
The same as we said, create the gravitational magnetic field of the destination planet, you get absorbed to it.
This is a good example of it, in a micro and a macro level.
There is no magic. You've got to understand the carbon just doesn't jump from one to another.
Your layers, because of the layering, when you can see a nano-layer, when you see a dark matter on your electrode,

it's thousands and thousands and thousands of layers that you can physically see it.
One nano-layer cannot be seen by the naked eye.
So, when you create thousands and thousands of layers, magnetic fields on top of each other,
you literally do one thing, get a stick, put 20, 30, 40 ring magnets in it, and then when you push one,
you see the whole move to create a position accommodation.
Or if you push it together in a very tight pack, you see they absorb different matters to themselves.
You can do this with the ring magnets. I've done it.
So, you create a cluster of carbon on your electrode, as is in the report of the IMAC,
not by nuclear material, not by radiation.
It's literally your layers create gravitational magnetic fields of the crystal structure of the carbon in the neck,
which is very much near to each other, so it pulls out the carbon out onto it,
releases atomic hydrogen, and you see your thread disappearing.
So, part of the...it's literally like you put a dust of iron on a table and bring a magnet.
When you get to a certain field near enough, the dust, a part of it, comes absorbed.
Now you create that magnetic gravitation for the carbon on your nano-layers as they compress between each other.
Because there are different layers and they produce it.
That's how you extract it.
If you create another layer, which you have to use aluminum,
you'll find that you'll have clusters of hydrogen, atomic hydrogen, on your electrodes.
Test it, understand the process, don't look at the physicality.
Any other question?
Hello, are we finished?
It's quiet out there.
Yeah.
She maybe should let you go at this point.
Yes.
Delivered a lot of information that time around as well.
Yeah, we will start releasing now.
There is 8 of them.
The thing is, if I don't tell you the correct way, and this,
the team of knowledge seekers put knowledge outside and it's half cooked, it can be dangerous.
As an old Indian says, they says, "Nim Hakim Khatar Ejad", which means,
it's an old Indian proverb, which means, "Half doctor is dangerous to life",
because he knows half of the knowledge.
That's why we teach the knowledge fully and try to explain to understand.
While you were having the workshop, we received certain information which we brought and what we are going to do, partially what we are going to do next week to this week.
First of all, we asked the Taiwanese to release the patents, they are in position,
because the rest of the world can have it.
It's come from people to people.

If I do it, they say it's done to oppose the governments.
But, if the government has released it to its nationals,
the nationals now are equal around the world.
They can release it to the other people.
Second thing was the confirmation of stop planning to kill me.
You might get me to a court, you might get me to get to prison,
but you cannot touch the Prophet of God.
No way, under no circumstances.
Curse be on your family and your blood, if you think that way.
And the curse of God goes for 2000 years on the tribe of Moses.
It will not be short.
The message is very, very clear.
So, we plan, we go for the, what do you call it,
for the development of the spacecraft.
In my emails, in my workshop, and on the forum,
we have asked from scientists from India, from Iran, from Israel,
from Palestinians, from Chinese.
We got to work together.
This technology, this knowledge, is the knowledge of God,
and belongs to the whole of humanity.
Not a few to have a double Rolls Royce parked outside their houses,
and call Mr. Boss, or a President.
The technology is released, is fully released.
Now, I sincerely and deeply thank the government of Taiwan,
for taking the step which we were going to take.
And, as you say, God's will will be done in different ways.
Now, it's not us, a bunch of scientists in Taiwan have the USB stick.
They say they have it, they send me some questions, they send me some pictures,
and this matches to the information which is the USB key we give to the government,
give them patents.
So, you are correct, I ask you, I ask Mr. Chou the same, please get in touch with the Taiwanese,
and ask them to release all the patents, you have my authorization.
So, next time when we talk, we talk about the GANS of the matter,
and medical applications, in the next 2-3 sessions.
Just to understand the position where we are and how we are trying to do it,
we need the financial support to be independent of any organization
to build this craft for the world population.
Because once we build the first, we give it freely to all the nations.
Boeing will have a copy, European Space Agency will have a copy, Airbus will have a copy,
then they make their own flavors.
There are 7 billion of us, not one organization can do it.
The same, I opened the door with the pharmaceuticals.
Come to us, we give you how you can do to make chemotherapy safe.
You have a beautiful product on your hand.

small fault, even if you do radiation target therapy, that you deliver nuclear material to the cell,
that cell, once it absorbs the nuclear radiation, has to do something and it creates other side effects.
We have the technology freely in your hand, and the doctors in Germany are already monitoring it.
We have seen the process.
So, I thank you for your time, and hopefully, if I'm not arrested or killed by next session, we'll be here, next Thursday.
Thank you very much Mr Keshe.
Thank you very much indeed. All the best.
Thank you Mr Keshe.
Thank you very much.
Good morning Mr Keshe.
Good morning to you, bye.

3rd Knowledge Seekers Workshop March 20 2014

Auto transcription by Elias. This document needs to be proof read.
April 18, 2023

We have taught you today how you can make protein.
So, what would you like?
Would you like lamb, or would you like beef, or would you like veal, or would you like sardine?
(Music)
This is the beginning of the 3rd Knowledge Seekers Workshop
from the Spaceship Institute and we have online Mr. Mehran Keshe
and several members, several Knowledge Seekers of the Spaceship Institute.
So let's connect with them now and see what's happening in Italy at the Spaceship Institute.
Yeah, Marco speaking. Hello to all. Good morning, good day, or wherever you are, all over the world.
We are a little bit late today because we are already in the lab.
We were observing our experiment that we were busy in the last week or in the last two weeks.
We were doing an experiment on how to capture CO2 in a gun state.

We did two or three experiments with this capturing.
Some of them we made with knowledge seekers and today in the morning also Mr. Keshe showed
us his experiment.
And there are some interesting results with capturing of CO2 and other materials.
These materials will be used also for Fukushima cleanup testings.
In the end of the week, our Japanese Knowledge Seeker, Yukako, will take these materials
to Japan to do the testings.
there are many, many scientific research, research all over the world that are confirming that nanomaterials absorb radioactive materials.
And we will try to show that nanomaterials can be produced in an easy way, also without any sophisticated equipment.
And during the workshop, we will try
to upload some videos of our experiments.
Links to these videos will be posted by Marek on the--
[COUGHS]
[INAUDIBLE]
Oh, they are already on YouTube.
You will see it in the chat.
And if it's possible, I would like
to ask if somehow you can also publish this in live stream
chat or also in GoToMeeting chat in all available communication
channels.
So this week was quite--
a lot of things were happening this week,
especially with publishing of all the data that
was on USB stick that was given to different world governments.
Actually, the Taiwanese scientists,
they have decided to publish all the content of the USB stick.
And this data are now available to all the people
around the world.
There are different servers that provide this data.
There are some problems because many people would like to download this and sometimes
servers are not capable to carry such amount of data.
Anyway, we are trying to follow the process that was started last year with the World Peace Treaty.
We are trying to pass this ethos of World Peace Treaty to world population, and we would
invite to do a commitment to this document, to sign this World Peace Treaty, and to act according to the ethos of these documents.
So maybe I can pass microphone to other knowledge seekers
who can add.
Can I introduce maybe Ivan,
who is with us today?

He's medical doctor.
Okay, he will introduce himself.
I give microphone to Ivan, please.
- Hello, I'm Ivan.
I just wanted to say I'm not a medical doctor,
but a dentist from the medical field anyway.
And since I have been absent in the past couple of weeks,
I have not been involved that much with the manufacturing
of the, creating the nanomaterials.
But this week we have also started to look
at the active plasma reactors.
And well, I was already thinking about this
for the past couple of weeks while back in Belgium.
And so what I understood about the new active plasma reactors
is that, where in the past, the activation of the plasma
was achieved first by the vacuum, which
gives room to the elements, to the gases, the atoms of the gases and the electrodes
and the protons first, and then the nuclear, the radiation which ionizes them, that now
With the new reactors, the conditions are created instead of forcing it.
The conditions are created to allow a plasma to form.
So the right environment is created.
And I compare this to what I know from the medical background.
Our body is always trying to heal any type of wound.
It's not the doctor that's healing us.
So if you take as an example somebody who breaks a bone, a leg for instance, it's actually our own body that will do the healing, that will reattach the bone.
But the only thing the doctor has to do is to create the right environment to allow the body to do the healing. And then the body will do all the rest of the work. And that is more or less with the new type of ignition, you could say, for the reactors, what we will be doing, just creating the right environment for the plasma to manifest, for the life to manifest you could say. So that's about what I was thinking of right now. Maybe I can pass
the microphone to someone else. So Yukaku is going to speak now. Thank you.
Good morning, Greek and all knowledge seekers all over the world.
This is Yukako from Japan.
Actually I just go back to institution this morning.
I have spent the beginning of this week with the delegates from Japanese University from Kyoto.
I'm happy to announce that they also show great interest to the Keshe technology and nanomaterials and they're going to give us an experiment opportunity, hopefully in the beginning of April in Kyoto.
This is the oyster bed, and the water showing thermal.
But it's not a heavy contamination like Fukushima,
but they need to have some solution
for this even this little contamination because it's--
(indistinct)

Radiation.
Radiation contamination.
Even in Kyoto area,
and it's actually spread all over the Japan.
I'm sure it's not only Japan, though.
So next week, next Monday, I'm going back to Japan,
and mainly for the Fukushima.
And apparently two associations are
going to collaborate to make using these nanomaterials
to see how, to see the results,
to see the, to making a proof
of this nanomaterials decontaminations, right?
And then I think if it were not updated,
I understand that I can take it,
five different nanomaterials with me.
One is CO2, as Marco mentions,
and the other one is a nano copper powder,
which is a powder type of the nanomaterials
extracted from the nano-coated copper pipe.
And also two different kind of filter.
One is we creating it using the stainless container
to making a mesh with the nano-coated wires.
And one is a single materials using the nano copper also.
The other one, we tried to see that,
you know, mixture material, mixed materials,
three different kind of wires inside of this containers,
zinc, and I think two different kind of coppers in it, yeah?
- Brass. - Brass, yes, brass.
So we can experiment that which kind of materials
can work efficiently to this, you know,
certain radioactive materials also.
And in the end, I'm going to take the PET bottle reactor.
Also, we assume that it's work for the contaminated water.
So those five materials are going to be experimented from 28th of March this month, and I'm going
to spend four days in Fukushima with two associations.
And now I'm trying to broadcast this experiment online, if possible, in real time.
And at least all the experiments are going to be recorded and uploaded to YouTube as soon as possible.
So all the Japanese supporters are really excited about this experiment.
And also I'm thinking about making a little workshop to show that nano-coating gray process
and also some pet reactor making process too.
So I hope next workshop,
I probably can bring some kind of positive result,
but even though if you are not positive,

we really have to develop this experiment process,
because some Japanese supporter gave me a big encouragement
But probably they think that this is kind of magic wand.
And I can say that Keshe technology
is one of the most influential solutions
to change this current Fukushima situation for sure.
But we have to experiment.
And we have to use our wisdom and knowledge and creation
to use these materials in the right way,
in most efficient way, to change this situation.
So I think it's not instant.
It's not really like instantly we
can get the best result from this beginning
of this experimental.
But this is a great starting point.
And I really appreciate all your support and encouragement.
So I know, so I uploaded several photo to Facebook
that, you know, what we've been created,
what we've been preparing for this Fukushima experiment.
So please check and then give us more idea
how to, you know, make experiment more efficiently.
Thank you very much.
So, okay, I'm going to pass the microphone
the microphone to the hostess from Spain.
Thank you.
- Hello, Rick.
Hello to all.
Well, I like to transmit that I'm very excited right now
because the things we make this week
is very interesting for me
because we are touching now the big mystery of biology,
the beginning of the life on Earth.
When science says that there are several theories about something,
it's like saying we don't have idea of this.
So I'm going to be enlightened today with Mr. Keshe that show us
right now the beginning of the life.
And also, we have experiment today
with very simple conditions, not only the producing of CO2.
Also, we started to see some things
about the beginning of life.
And this dismantled totally my ideas about biochemics
and how to produce the first molecules that
can replicate and carry life and information.
And on the other hand, I'm very proud of my group in Spain
for such work they're making,
because on my second workshop in one day,

I have more than 7,000 visits.
So it's very encouraging for me.
And I try to keep this level of teaching.
and communicating with the Spanish-speaking world.
So, at the moment, it's just like my feelings are like this.
So, we can talk later about all these topics.
Hello, everybody.
One thing I want to start with...
Do you want to introduce yourself?
Oh, they know me.
(Laughter)
Rick?
My name is Armen Guloian and I am one of the Knowledge Seekers in the Spaceship Industry.
Just early for you, that's all.
I know that.
(Laughter)
You recognize me.
How are you looking?
Anyway, what I want to start with, I know all of you starting to develop these reactors reactors and you're going to start to feel that what you create, you have to pray for it.
Because first thing, you know, every creation needs that energy to start.
And I want you, even when you're starting your small reactors or any experiment that you are developing, please pray for it.
You will understand why.
And have your intentions and all love to give that creation.
Because if you start something, you are responsible for it.
I want you to understand that point because this is going to be the beginning of everything
you start and you create and it's beautiful.
Thank you very much.
Thank you, Anthony.
Hello everyone.
I'm John, as you know, one of the Knowledge Seekers.
I suppose you are all waiting for lots and lots of stuff new for you.
So I'll try to explain what we have been doing and give a few details.
We've been making cells in which we have been using nano-coated material and the nano-coated
material is used in salt cells.
I'll try to give a detail.
In fact, we create kinds of batteries,
which are on the one side with nano-coated copper,
and the other side is plain copper.
And that's put into a liquid, which is water plus sea salt.
We have made different cells with different kind of sea salt.

And we have been connecting a series of dust cells.
And dust cells didn't give much of voltage,
we didn't have a very high voltage.
We had how many cells do we have there?
5, 30, 45, nearly 45.
I can't say exactly, we have in fact 15, plus 15, plus,
and then it's, yes, it should be over 50.
But we have a voltage which is about 1.2,
and if we could go up to 1.6 at one moment.
And we just left the hole with a short circuit.
So there was a small current flow going into the cells.
It was, in fact, connected to a fan, but the fan didn't turn.
So it was only a small current going through.
That small current was enough, in fact,
to activate some kind of reaction.
And it was told to us to have a pray, our Asgard, to intervene.
And the next day, when I arrived, Mr Keshe says, "Well, I've made a good job."
I didn't remember exactly what was my good job at that moment,
but in fact, next day we started to see a milky suspension in each cell.
That was the start of the production of CO2
and that was in fact appearing in each cell just about the...
very nearly the same, but it depended also on the cells
when we had different kind of salt solution,
so that could be, that was in fact,
different experiment, let's say,
we could see something else appearing in the cells with other solution,
either diluted to a salt water,
or salt from other areas in the world.
So that's the description I can say about this system.
And this morning we have seen the experiment Mr Keshe did,
not telling us he was doing the same experiment in his lab.
And this time...
(RC) John, I don't want to interrupt.
But Gerd is saying that the live stream
is not working right, can you just verify that real quick, so that we can continue?
(RC) Seems to be some trouble with the live stream here,
I'll try to sort it out.
Okay, what I'll do is I'll...
What I'll do is I'll...
Oh, it's back.
Oh, it's back.
It's magically back.
It's back.
We just prayed for it.
Ah.
You should have seen it yesterday.

You started to jump and you started to pray for it.
The Knowledge Seekers made a CO2 unit.
The first experiment the Knowledge Seekers did,
They, when they connected the bottles of the first experiment,
they were expecting the motor to run, and the motor didn't run,
but there was a small amount of energy created.
Then, we built the second one, later on, two days ago,
and it was very nice. I wish I had a video, and I could video it.
They were praying to the machine to start working.
John was over the whole system with his hand going over it, giving his own energy,
and it still wasn't working.
The motor wouldn't turn, so...
It was working internally, because it was producing a lot of CO2,
and so we do a lot of praying here too, like we just did for live stream.
It was very nice, everybody was doing all their meditation on top of the system,
and it still didn't light up.
So, I let John carry on. That was the power of meditation.
So, you have a small echo that in fact we made the first experiment that shows us different aspects
that we tried to correct, and what I have been describing is in fact the second part, essentially.
And that second part is already something more detailed
and we have been more systematic in the way of trying to do it.
So as Mr Keshe said, I asked for me, I asked God to intervene
and in fact by doing it, it's the first time I have been feeling the presence in myself,
doing so for let's say material, a material aspect.
I know how I feel when I do it for somebody, for a person, for a sensitivity around me.
And there I have been feeling nearly the same,
and even I was in a way receiving a lot.
And I knew that something was happening.
And that's why I will, in fact,
once I have done that,
I know that in fact, I just go to the next step,
which is, well, I have done what I could at that moment,
and then I don't especially think about it afterwards.
And next day, well, I arrived, and Mr. Keshe says,
"John, you have made a good work."
And I wondered what it was until he showed us
that in fact all the cells were becoming milky and with just the start of the CO2 appearing in the cells.
So that's my experiment, I've explained what I was feeling, I cannot describe that aspect
But I know, because I've been living something interesting, important for me.
And I know the others cannot really understand,
but it's something I live, and that's the way I see it.
So, this morning we started, we had to start the workshop.
And Mr Keshe just introduced us to his experiment.

And his experiment, he showed us the small ventilator that was turning with his experiment.
So it was different.
Apparently the nano coating of our material was not perfect.
His was better because of his experience.
The cells were not made the same.
Well, we have to go further to understand more precisely what happens
and what's the difference.
So we have to continue the experiments and the understanding of the work
the work we have before us, that we have to produce, about the understanding.
So, I made a tour of aspects of the experimentation.
I have, and we all have started also to work on the dynamic reactors.
And there is one of the reactors that is just about ready to start.
But it will be, it will wait until Monday.
When I came back from Belgium, I brought back another reactor I've been making quite fast.
So, apparently it's a new reactor that I'll be doing with that.
And Mr Keshe is very happy to see it.
I won't say more for the moment.
Okay, so I'll finish now. If ever you have a question, there's Marek maybe that will say something. I don't give him lots of space left. I don't know what he'll have to say.
So I'll leave him the place.
So hello, it's Marek.
And somebody asked a question on the chat.
What is the amount of salt we have used?
Well, any amount of salt will create different conditions
to capture different things.
And actually, we have used, let's say, for 15 liters of water,
one kilo of salt. But we have made also other solutions
with different amount of salt and different kinds of salts.
We have used purified salt and natural salt from Persia,
Persian salt.
And we just wanted to see what will
be the difference in creating different conditions.
So you can see in all these cells,
let's say with different--
each cell is individual.
It has its own environment and influences other cells.
And each cells has different geometry of electrodes
in different distance of electrodes,
different salt solution.
And also, its position in the whole set makes a difference.
So it's like when you have a crowd of people,
everybody is different and influences other people.
So we can see it in the process that there
is different production of captured material.

In some cells, we can see even production
of fat, amino acids.
Some cells like to attract blue material, some white material.
So each cell decides according to its buildup
what its internal magnetic fields will attract.
According to similarity, it radiates outward.
And the environment reacts on the radiated spectrum of fields.
And similar fields are interacting with these cells.
and material with similar properties
as the radiative field from the cell is attracted.
And then in the soul solution transformed
into another kind of state of matter, we call GANS.
For me, the GaNS state is a special state which is in balance.
Its fields, MaGrav fields, are in balance in the way that the magnetical field,
caused by attraction of magnetic fields in the... in the GANS particles.
And the gravitational fields...
Magnetical fields are caused by repulsion of the same magnetic poles
and gravitational fields are caused by attraction of different opposite poles
and both resulting fields, magnetical and gravitational,
are very well balanced in this GaN state of matter.
And this balance makes it more environment independent, if I can say it.
It can sustain more environment changes than, let's say, ordinary solid, liquid or gas state of matter.
So when we have done the first experiment, we connected the last cell, and we were all awaiting great result, that everything will flash and turn, fans will run.
Mr. K showed us this morning, running fan.
But it's not about this.
The cells, the whole set of cells,
produced and is still producing the energy
from the captured material,
but the energy in our case was not enough to run all the equipment,
connected, but anyway, the process still was ongoing.
So, we have learned that the nature shows us its own pace of doing things in subtle manner
And it needs time to let the magnetic fields to interact and create concrete results.
When you put seed into ground, you don't get the plant the second day.
You have to wait for the process to attract all the fields the seed needs to expand itself to become a plant.
And nature creates the right conditions for this process.
It's all controlled for me by intelligent beings.
You can ask whatever you want and we can continue.
Yes, this is Lucian, good morning.
Good morning. Here I would have a question based on what you guys said.
It's clear that based on configuration of the electro surface distance, the concentration of the sea water solution,
the magnetic and gravitational fields are changing.

So if you want to achieve a specific or to attract a specific material,
say a co2 or ch4 or ch3 or whatever you want you somehow should know the
substances how to say magrav as mr. cash says because in this way you can
dimension your cell and as you guys said put the number of cells behind each
other or on the top of each other however it should be so how the question
would be how you determine this for each substance.
In fact for the moment the cell will determine itself what it will attract if it is CO2 or CH4.
It is the condition created in the cell that will allow the attraction of the one or the other.
So measurements should maybe be done, we are experimenting so we are not trying to measure, we are trying to create conditions and understand what is the process.
So that the measurement can come afterwards, we have to understand what is
So that's one aspect and eventually we had to see also what some contacts would make because the way we have done it had some influence in the results so that's why we tried to make
a second series of cells with different way of connecting and try to have a better understanding
at certain levels, well we still have a lot to do.
What I would like to add now is what we have seen after, after 24 hours we had in different
cells, some solution, some milky solution, and we have taken from four of the cells that milky solution and put it into a plastic container.
There is a video of it.
And in fact, when the liquid started to rest, we started to see something very special.
We could see that in the milky solution, there were sorts of lines going from the sides to to a circle something which was more or less a circle in the middle and those lines are fields.
Sorry John I don't mean to interrupt but again the live stream is down Rick so if everybody
can just be a little bit patient and we'll wait for it to come back up before we continue if that's okay.
Yes, yes, no problem.
Good morning John, how are you doing?
Good morning John, how are you doing?
Is it necessary to pull the excess electrons off, like when you were running the fan to produce the CO2?
So you see the electricity to be drawn out is part of the condition we produce.
Yeah, that's amazing actually.
It sounds like the opposite of an electrolysis.
Really? Exactly right, man. That's nice.
Speak into the mic, speak into the mic, speak into the mic.
I never learned why. Impossible.
(laughter)
These amateurs!
Good morning Mr Keshe.

Is the live stream on yet, or do you want me to answer?
Because the answer to your question is very important, what you just said.
Thank you.
Yeah, I asked the question that this sounds like we are doing the reverse of electrolysis.
This is not the reverse of electrolysis, it is in the process which you are familiar to,
it is a chemical reaction, electron movement, or what we call, you plate or transfer atoms from one plate to another, or electrons.
This process is a magnetic gravitational field transfer.
So, nothing changes in the property or characteristics of the plates or the nano-material in the solution.
What happens, because the system is set to absorb like CO2 as a gas,
when the gas on the surface area of the liquid is absorbed through gravitational magnetic field attraction,
because the copper coating has the property to create within the nano layers in the holes and the multi-hole layer which is a multi, more or less, gravitational magnetic field cavities,
a gravitational magnetic field equal to CO2.
So what it is like, attracts like.
So, what happens, the CO2 above the water is not as a matter, but as a gas in a very specific gravitational magnetic field,
is attracted towards the cavity, where is supposed to be the nano layers.
By getting attracted in the process of going through the water, it releases part of its gravitational magnetic field,
because of the friction between the fields, and it finds balance within the liquid of the salt,
the gravitational magnetic field of the GaNS of the same.
So, if you look at it, we deliberately said that some people might think what the Institute is doing with the half-cut bottles,
water bottles and cola bottles, doing such experiments as you see in the first experiment.
The reason for it was to show that CO2 or other materials literally rain down into the bottom of the process,
So they enter at CO2 into the liquid, due to gravitational magnetic fields,
which is created between the nano layers, and gravitational magnetic field of the salt,
this allows the change or absorption of the energy of gravity and the magnetic field of the CO2 to a GANS.
So, it rains down as gas down, or as GANS down to the bottom of the container.
It is not a chemical reaction, it is gravitational magnetic field extraction.
And the energy you see which is running the motor, or initiates the next cycle of work,
is the energy which is the balance between the gravitational magnetic field of the gas and the GANS.
There is something which is not understood fully by a lot of people in respect to GANS.
In a GANS state, what happens is that the element's gravitational magnetic field
and magnetic field, which is the repulsion and at the same time attraction,
create a balanced border.
So, why the GaNS looks like a sphere shape,
is because of the magnetic field,

which is the magnetical field, which is the repulsion,
and the gravitational field, which is the attraction,
they create the interaction between themselves,
at that layer, which is the balance point.
It's exactly the same situation as you see with what I always explain,
when the magnetic field of the Earth faces the magnetic field of the Sun.
The interaction between the four forces of gravitational magnetism of the Earth
and the gravitational magnetic field of the Sun, the pull and tear and push,
creates the daylight. So, this is why the GANS materials look bright,
they look like a sphere themselves. Because the energy which you observe,
which you extract around the motors or the light,
is the energy which, for example,
the magnetic field, which is a repulsion,
has to give up to become in balance with the gravitational field of the same atom.
So, the interaction between the two creates the GANS state or the spherical state we see.
Instead of them interacting with the outside, like Earth, the gravitational field is about 60 kilometers up or whatever,
in the gas state, the two fields themselves interact because they just become too balanced.
So, when it reduces to the other one, to be able to hold on to, in respect to the gravitational field of the environment,
Then that reduction or giving up of the magnetical field which is a repulsion to the gravitational field is the energy you absorb.
And you see it around the systems.
The whole condition, the spherical shape of it, which seems like a ball bearing, we've shown it in other pictures in the book.
So, this is why it's totally different concept.
This is totally different concept than chemical reaction.
Because with the production of the GANS, you release part of one, which is the magnetic field or transitional field,
to bring the two in balance with respect to themselves.
Because then they become entities in a different condition balance, and that is why the environmental conditions cannot touch it.
This is why you can burn the meat of the man, whose face is a matter.
But the only thing is, when you burn the body of the man...
Yeah, ok. So, what happens is that the gravitational magnetic field is, if you want to explain it,
is the difference between the mass and weight. The mass is what the entity holds on his own.
Your mass is the same, doesn't matter where you go, because the interaction between the gravitational and magnetical field of your body, the cells of your body, dictates your mass.
It doesn't matter where you are, because this element, the number of atoms and molecules in your body is constant.
When you go to another condition in respect to, then you have the weight,
which is the mass, your mass, against the mass of the Earth,
and then it becomes the gravitational-magnetic field of the two entities,

interacting, it becomes your weight.
GANS is the same thing.
GANS is the mass, and is independent of the environment.
But, matter is like a weight.
Its environment, like the temperature and pressure, can affect it.
This is the difference between the two, and the behavior of the two.
And this has created a lot of confusion in understanding the process of the GANS.
So, when John speaks that, we see material in the containers,
and for the first time, in both processes,
we have seen, as I said before, the process of production of protein,
in an open environment, and we have seen it growing,
and it's controlled growth.
And in the second experiment, which is the color boxes,
we still have, I've seen yesterday and today again, production of the protein.
How come the protein is produced?
It's not a fact that we drank the water, or somebody put a finger in it.
The reality is, this is how life started on this planet.
It has never been explained.
Everybody says, "We are made of the dust of the Earth."
We are not made of the dust of the Earth.
The human body is made from the interaction of the gases,
which are in the atmosphere,
in giving up their energy to the salt,
which is the matters of the environment of the planet,
and in that conversion, protein is created,
and the essence of creation starts.
It's the first time we explain this.
We are not the dust of the Earth.
The Man is actually is made from the gases of the atmosphere of the Earth,
in conjunction with the salts or different elements,
which is the content of the Earth itself,
the matter part of the Earth, the solid part,
in giving up part of their gravitational magnetic field,
has led to GANS state of the molecules.
And that's why our tissues are soft,
because they are GANS and they are not matter.
And in fact, our skin is the division between...
Yes, of course.
Life is not exclusivity of this planet.
And soon, as I always say, we open the doors of Universe, very shortly.
We released the patents, we released the keys, thanks to the Taiwanese scientists.
And now, the man is equal, irrespect of race, color.
And, interesting enough, our servers and security people,
they are amazed how this thing is getting downloaded around the world.
Their estimate has passed tens of millions, and we don't know why.
The reason is, now with this, everybody has the same knowledge.

Knowledge of Universe, knowledge in this way,
has never been distributed so fast by everyone.
If you are in Africa, now your knowledge is equal to the man in the White House.
Irrespective of your color and race, and where you came from, and where you originated to.
So, if you understand the process,
This talk of that, "We come, we are back to dust, come from the dust,
and we go back to the dust."
The dust carries the elements, like Sodium, Potassium, or any other matter,
which the interaction with the presence of liquid of water,
the CO2, see the Carbon in the air, Oxygen in the air,
Nitrogen in the air, and Hydrogen in the air,
The mixture, in becoming GANS, they develop what we call amino acid,
the GANS of amino acid.
And now we understand for the first time,
our life does not come from the Earth,
our life comes from the air of the atmosphere of the Earth.
And this is the same anywhere in the Universe,
irrespect of magnetic-gravitational field.
Today, for the second time, I showed the Knowledge Seekers,
About three weeks ago when they came, they couldn't understand
because it was too much to absorb.
Today, now that they started understanding,
and they've been making the systems to convert the gas into GANS,
the purpose is not making energy.
The purpose was to show the conversion of gases into life.
And they've seen protein being produced.
As the Carbon, as the Nitrogen, as the Oxygen,
and as the Hydrogen gets absorbed due to gravitational magnetic field
of the amino, what do you call it, of the nano layers,
they become imbalanced to create protein.
And that's how life created on this planet, and it'll be done.
And for the first time, I opened my, what I call, the box of life.
In the box of life, which we shipped from Belgium to here,
it's been going on now for about two years, two or three years now,
I have created a condition that life can be created anywhere in the Universe.
And there is a bottle, there are four bottles,
which I have created the forced condition.
Matters are getting created on their own.
And in one, which is the sealed box, is written on top of it, I showed them today.
It says, "Moyez Endegy", which means the essence, the water of life.
Which means, you can create life anywhere in the Universe.
We have the knowledge.
The knowledge for energy, the knowledge for matter,
the knowledge for creation of life, the knowledge for motion,
the knowledge for process of changing matter into life,

and for medical application, is all released to you, in equal measures.
Nobody can hide anything.
According to your intelligence, you develop your own ways.
So, what has been promised,
when the time comes, everybody will receive everything on equal basis,
and will be fair, now the time has arrived.
The reality is, everyone has the same knowledge now.
The fact is, nobody can abuse another,
and because now you can't abuse each other,
the ground is set for the World Peace.
The whole setup, the whole process we've taken so long to get to today,
had a purpose.
The reason was, we knew one of the nations will be careless,
or will not have any respect for what they received, and let the USB stick go.
And I knew for a long time it would be done this week,
and it happened exactly the way I wished that it was supposed to be done.
And today is a very strange day.
In the morning, we are in the winter time.
At 8, 27 and 7 seconds in Tehran's time, we enter spring.
This is the time for new generation, new regeneration, and this is the time for the man to save.
The reason the patents and the USB stick was released, and we encourage it to be released,
and it was done by the will of God, that it was done in the past week, was for today.
From today, we close the book of the past.
Yeah.
From today, we close the book of the past, and from tomorrow, we start the beginning.
There is something very, very important you all know and you all ignore.
You always talk about DNA and some of you, because the knowledge is not mature yet, speak about RNA.
When you speak about DNA, you speak about your color of your eye is the same as your grandmother or your great-grandmother, or your nail is twisted because your great-grandfather
or whatever.
We go back into the religious side, as I was explaining to Knowledge Seekers last week, preparing them for today.
If you are a Jewish background, you know with respect, all respect to your faith and your belief,
most of the Jews speak with a "th", very tip of the tongue.
And it's in the Jewish religion, they say this is because Moses put a fire on his tongue,
and he burned his tongue when the king said this boy had, you know, he was,
He ordered all the boys to be killed.
And in front of the Queen, the little boy put a fire on his tongue,
and the Queen said, "How can you kill a stupid boy,
which picks a fire and puts it in his tongue?"
And that, now is the sign of being a Jewish, and they are proud of it.

So, it means, after 2000 years, the memory,
the physical memory, has been transferred.
The way I explained about the daughter of Yore last week.
So, one piece which you are missing, it will be put on the table,
and then you understand.
The color of your eye, the height of your, God knows,
your shoulder, your nails color, or fingerprint,
all is accumulation of, from generations, and generations, and generations,
and it goes back to what goes from the time of the first life.
And through it we are all connected, but as we branched off,
we carried different conditions and so we changed our fingerprint.
But in essence, as United Nations research has shown,
we all come from the same mother.
But, one thing you have never understood,
DNA has carried the physical knowledge of the development.
RNA has carried the information part,
and the part which is collected to the Soul of the Man.
So, through your RNA, you all understand,
doesn't matter who your ancestors were, where you came from,
You, at this moment, are a collection of not only the physical mutation,
but the knowledge mutation too, and their soul.
So, when it was promised on the promised day,
all men resurrect, and they'll be there to be judged.
You, as a person, are resurrected, and you carry all the RNA,
all the information of your ancestors, and you're responsible to it.
So, what it means?
I try to find a word to put it that you understand.
When we say,
"The time will come that there will be peace and honey and everything plenty",
everything plenty is given in the patents to you,
in the USP's taken past week.
You can have as much as whatever you wish, if you create the condition for it.
As they said, we create a condition, we have protein on our system.
You can have gold, you can have anything you want.
But now is the time of balance.
So, you as a person, doesn't matter what religion you carry,
in what you have believed, or you believe in a statue, or whatever,
you carry part of the DNA information and so does your ancestors.
And once, it does not matter what religion you have, Christian, Jewish, Muslim,
Zoroastrian, Buddhist, in whatever you believe,
if you just make a decision, and then make a decision to stand...
Sorry Mr Keshe, we need to interrupt.
Okay, so what happens is that when you stand as a physical part,
which you carry all the memories of your ancestors,
because of the color of your hair, or the color of your nose, your eyes,
the same way through your RNA, you stand judgment for the soul and the conduct

of the people who have made you, to become you.
So, the Judgment Day stands in front of you.
By you, you cannot waken all the dead over past millions of years.
But, through their soul, through their RNA, which you carry, which has become part of you,
you become answerable and you stand for the lot.
If you choose to stand for peace, all the religions are one.
If you stand for unity, all the human race is one, because you came through it.
And somehow down the line, you connect to another one.
Another cousin could be Chinese, another cousin could be from South Africa,
or another Chinese friend could be from South America.
So, the judgment day is today, and in fact, the only position is,
If you are the Pope, if you are a religious leader, you still stay the same.
It will not be the change of religion, because in either way you worship the same thing.
But, it will be to connect all the religions and all the races through World Peace Treaty.
And that's the completion which has been promised.
Now it's in the hand of the man.
You have the patents, you have all the information,
and the ones who don't understand it will teach you.
That's why there are the Knowledge Seekers here, and we add more and more.
We are even talking, we were talking yesterday,
that Knowledge Seekers have to be from all over the world.
The eight Knowledge Seekers on the panel sitting around this table,
have now understood the responsibility of fairness, equal and plentiful.
And this goes from this table out from now on.
If you are a Pope, if you are a religious leader in Islamic world,
if you are a Rabbi, if you are a priest in any faith, or even you worship a statue,
at the end of the day you stand responsible to your Soul,
and in Space of the Universe we opened up,
there are no mosques and there are no churches and there are no synagogue.
You carry the temple of God in your Soul and in yourself.
And as God said, "There shall be no war and there shall be Peace."
And today we finish with the old, and from tomorrow we start with the new.
We teach you everything you need to know.
We develop every aspect of the technology,
and you have marvelous people around the panels of the Keshe Foundation,
who will teach you this.
You don't need us, you will learn and you will teach us.
So, the promised day is today, and this is the end,
of the past and the beginning of the new.
The only way is, you don't need to become a new religion,
and you know and have to change your faith.
The only thing is, as all the faith, you accept,
what is the ultimate thing, because now you're not yourself anymore.
As I said, the color of your body is where it came through your generation.
Now you're answered, you're answerable to the Soul of all the ones through your RNA,

who made you to be here.
So, people call me and they write all sorts of things who I am.
I'm nobody, but the connector between the past and the future,
and unity of the past.
If the human race does not unite now, you will not survive in the Space.
Because, space is a peaceful place, and there is no room for animosity and greed.
Because, we have taught you today how you can make protein,
and as the Knowledge Seekers told you.
So, what would you like?
Would you like lamb, or would you like beef, or would you like veal,
or would you like sardine?
Would you like gold, or would you like copper,
or would you like to live in a house made of clay?
You decide according to your own intelligence and your own needs, as long as your needs does not change into greed.
Because soon in space you will learn, there is no greed.
So, the message is very clear.
Today is the end of the past and tomorrow beginning.
So, those who plan to do whatever, let them do.
In past 2-3 weeks, I opened the door to what injustice is.
If I wanted to punish them, the punishment would have been easy.
A father never punishes his children, but he teaches them and prays for them.
So, we pray for our enemies, as of today there will be no more enemies.
As their own Soul will punish them.
Or, as their own Soul will demand justice to go to the next step,
and they come forth and open their hands, who they are and what they've done.
Not to me, but to the Human race.
So, I call on his Excellency President Obama,
as much as call on my President, His Excellency President Rouhani,
as much as to the Chinese leaders and Japanese leaders,
and the rest of the world.
If you do not stop making the war machines,
we'll make so much peace machines,
that your war machines, with the knowledge we have carried,
will be like a toy in the hand of a child.
As you know, we are going into the development
of the Spaceship Technology, and now we have the ground and the facilities to do it,
independent of the governments, if the governments don't want to do it.
This time, it will be the people who dictate the peaceful condition,
not the monies in the bank and the ones who want to have more.
We are very, very simple.
There is no time for revolution, but it's the time for evolution.
We have to evolve from animosity and fight, into unity and Peace.
And we serve more and we achieve more.
And we give so much free knowledge and technology,
that people will find out there is no need for it.

Go and buy yourself a piece of Copper,
go and get hold of a caustic,
put it in a water, in a salt you cook your food in,
and you can have as much energy as you like.
You wanted free energy? We've seen it.
And while you are making your little free energy
to run your little batteries or your lights,
from the gases and from the environment,
you create your own protein and your own food.
Land of plenty.
Find yourself a piece of metal.
Break those, what's so called, "hand phones"
and the materials in the back of the battery in your hand cell,
in your telephones, in your mobile phones.
You have everything you wanted, no hunger and enough heat and energy.
Just very simple, dip it in sodium mixture,
leave it, let it make its own layer, and dip it back in the sodium mixture,
in a different name, you call salt.
And, you create the same kind of, as the Universe has done.
You convert the CO2 into matter in what you want to eat.
So, there is no hunger, and the solution for the energy is salt.
Those people who want to sell kilowatts and megawatts,
you have to make the Plasma in a different shape,
in a dynamic reactor, and in the weeks coming,
We will show live, the way you have seen the knowledge seekers
have put the video of a Coca-Cola bottle and half cup cut,
it wasn't there to, what you call it, to show energy.
It was shown, it was done to show the man in Africa,
now is as rich as the man anywhere in the world.
So, with the half Coca-Cola bottles hanging all over the countries,
now every man can produce his own energy and food.
John said something about, and he stopped about his reactor core,
which is brought with himself, and he made it in a hurry.
And I said to him, "This is going to be a beautiful core."
He didn't tell you half of the story.
He went back to Belgium for 3-4 days, last weekend,
and in a hurry he tried to make a core.
First of all, one half of the core is beautifully glazed.
The other half of the core, because of speed of what he wanted to do,
and the material he's used, has no glazing, has exploded.
It's literally like a bald man, half has got hair, half no hair, and it's very funny.
But the worst part about it is, the column which is supposed to rotate,
has sheared off, is broken. What is done is glued it back on again.
So, he'll be running a broken reactor.
And it will produce the same amount of energy
as the most beautiful Copper reactor foundation has spent

maybe 40, 50,000 Euro up to now, to produce the energy.
And, this will be for the man in Africa or in the jungles of Amazon.
You can make a clay pot, even if it's broken and you know,
you can put a battery, copper wire in it,
you got your generator, and you got your food, and you got your energy.
Now, the ones who want to sell megawatts and kilowatts,
and create a fission and fusion reactors,
and contaminate us the way it happened in Fukushima,
Your time is over, is done with.
It's finished.
The ones who went and took our server down,
and for three seconds they put my face and the cross in it,
and then said, "Free energy, no thanks."
Guys, you lost. Yes, please, it's on the table.
It's finished.
Energy game and power production game is finished.
Total cost of enough energy to run a laptop, to educate a child in Africa, zero.
You thought you got me, but I got you so cleverly.
Now the food is free,
the pure water, clean water will be shown in Fukushima will be free.
Food, you can charge your battery the same way,
if you put a right gravitational magnetic field in your copper wire,
You can create any kind of energy level you like, that you can drink it.
It'll be your Coca-Cola, it'll be your banana,
it'll be any vitamin, mineral you need for your body.
This we'll teach in the coming days and weeks.
How to position your copper wires, or your films,
that you can produce different minerals and metals,
that you can digest for your food.
This is all is coming.
As the, I think, Merak told you on this conversation,
each bottle, Coca-Cola bottle or water bottle which we cut,
is creating different environment.
So, you decide in one cup you want protein, in one cup you want Potassium,
you are short of Magnesium,
you create a condition in that cup that it create Magnesium,
and we teach all of it.
So, the financial control over man's need in the past 24 hours,
and in the past 7 days, thanks to the Taiwanese government,
in not understanding what they did with their scientists,
is in the hand of the man.
So, the promise of all the prophets of God is fulfilled.
Time of plenty, and no war.
The war is the condition of the man, as of today it finishes.
Very soon, does not matter what you jump out,
who, which leader of the world you are,

from today, every man has the potential,
and they have downloaded, according to our servers,
over 30 to 40 million times this document, in the past four days.
Only from the Keshe Foundation server,
We locked everything up that nobody can make any comments,
except people around the world can come and pick up and go and download.
Only of our servers in excess of 25,000 copies has been made.
In conjunction with other servers which we are monitoring,
we passed millions and people are very rapidly developing it and sharing it.
And if you want, take the patent, patent number 5, read it, we are showing that to you in the lab.
My call goes to the world leaders who make boycotts for the children to suffer,
for their factories to run.
Your factories from today are shut, not by me, by people.
People will start learning, they don't need to have megawatts.
A lamp in the corner of the house, to allow a child not to sleep in the cold and dark,
is now, is the beauty and thank again to our American friends,
Coca-Cola bottle and a mobile phone.
You have enriched us and we thank you for it.
Now, the process is where we go from today.
From next week, you will see all the Keshe Foundation reactors,
which is in our position, maybe 8, 9,
will be run simultaneously, as the Knowledge Seekers finish their reactors,
on one table.
And we're trying on a live stream, that you can, 24 hours a day, observe.
Maybe we are asleep, we don't see,
but you see the magnetic field of one reactor, it tracks through the other one,
and let's say water drops from the middle.
You can inform the rest, this is how you make the water.
The way we open the knowledge, nobody can patent,
nobody can enforce anything anymore.
The people who thought they can control the world through patent,
unfortunately, Internet has broken that rule.
And, as we've given our knowledge of Universe free to the man,
Nobody can patent anything about this technology any further.
Let me warn, and let me tell something to the Canadian Prime Minister.
Knowledge is a gift, and the one denies it through race, are not of the man.
My position is very, very clear.
You arrested me, you threatened to kill me.
I forgave you enough, I don't need to forgive you.
I prayed for your Soul, in time your Soul will stand in front of your Creator,
and you have to answer.
That time will be very soon.
We don't punish, we give you the gift of love of the Soul,
that your Soul will not accept the behavior of your body.
That's your punishment.

You punish yourself.
Those World leaders, who in the past week, since I announced,
what was planned for me, and how we get the information,
that what was to come for my execution, for my imprisonment, and everything else.
We watched them, they are even vetting their own security,
who has leaked this information,
how did the guy came to know what we are planning,
how we are going to show the emails which is written to a woman,
to a man, or whatever, he's never gone off this Internet.
Your biggest spy is your Soul to us.
Nothing is hidden from us.
You were looking for spies who was leaking the information
and bringing people from Belgium to Italy to collaborate.
The spy is within you because we have a pure heart and a pure Soul,
and the Soul passed the information.
The way I said from the past,
"What you carry is the color of your grandfather,
and the true DNA, their Soul and their knowledge."
The same connection is revealed when you have a pure heart and you serve.
We give you so much that your own physicality cannot stand the behavior and your soul will leave you.
That's your punishment.
You punish yourself.
In the world there is, if I punish you, then somebody has done something to you wrong.
But, when you punish yourself, you can act to no one.
no one, and the souls you carry are in the process of withdrawing from what you had.
You think you know everything, you know nothing what we know about you.
And I don't need to put a microphone in your bed, or between you and your wife, be it the King of Belgium or the Queen of Belgium who is half Italian.
Your soul is serving you both well.
And if we open what we know,
there'll be no kings and queens on this planet.
We leave it to them in time for them to correct their time.
But from today, the past is finished,
and from next week, we open the door of knowledge in a so rapid way
that you don't, cannot even imagine.
If a broken pot from Belgium, which has come across in a plane and is cracked,
can produce energy and water,
the man in Africa just needs five minutes,
because the energy is free from the Sun and the clay dries very quickly.
So, he's richer than the man who lives on the
10 million dollar apartment on top of New York,
because he doesn't even have access to the Soul to make his pot.
So, energy has become total free.
And I say, the ones who thought they can shut me down,
thank you very much, please do so, because we spread the knowledge,

and the knowledge is available to every man around the world.
And the way it's going,
I think by the end of this month or next month,
half of the world population who have access to computers,
they are testing and will create energy for themselves.
But I warn you, the ones who are making these films,
don't lose your copper films and don't lose your copper wires.
Make sure that none of the GaNS can sit on top of your wires,
because then it's clogged and you lost it.
You've got to go and find another mobile battery in the middle of Africa.
So, hang your systems in the middle of the liquid,
that the beauty of God showers from it like a rain to the bottom,
then you clean the bottom.
Create the condition, you're one of the bottom Potassium, you collect Potassium.
And even, if you collect something which you don't want, or you don't need,
there is a secret in the Universe, you wish you will receive.
This is exactly what your parathyroid glands does in your body.
Now we teach you how to do it.
Your parathyroid gland, if you have too much Phosphor, but you need Calcium,
through the same conversion of GaNS,
changes one element to another that the body needs.
Through the strength of your thoughts,
and what you desire,
you can change matters.
This is the advanced part of the knowledge,
which we will teach you in time to come.
This is what I explained, if you are in Space,
With the power of gravitational magnetic field of the mind,
you can control the craft.
You don't need physical steering.
Look at the structure we released last week of the craft.
There is no directional flight, there is no pilot sitting ahead of it.
Because the head becomes the tail and the tail becomes the head,
and one end you can produce Potassium,
and the other end you're producing Gold or water.
I was teaching knowledge seekers that in the near future,
even the tanks which you've seen in these designs are useless,
but we had to put it there that the man understands, where is the food.
So, what we gather from this workshop,
and I especially ask the workshop, and it happened to be today,
today is the last day of the winter, and tonight is the beginning of the spring.
And this shall be for the Man.
And our wish always has been achieved,
because our wish is pure, and for the benefit of the Man.
Is there any questions?
(RC) Thank you Mr Keshe. I have also thought of that aspect

and been under the understanding that that was possible.
And thank you for confirming that.
It's a real pleasure to hear that, especially from you.
(MK) You're welcome.
Is there any question on the phone?
Mr Keshe, I have one question.
The amino acid, are they also in GaNS state?
Yes, of course they are.
You have a molecular GaNS, as much as the atomic.
You see the way in the chemical bond, let me explain to you.
The way in the chemical bond, you get double connection,
and single connection and all that information.
In the GaNS state, gravitational magnetic field balance does the same thing.
If you look at the combination of the amino acid,
look at the figures.
You have gravitational magnetic field of a Carbon 12,
which is very near, in so many ways,
at the Carbon-14 to Gravitational-Magnetic Field of Nitrogen,
and in so many ways, in presence of a very simple radiation release
from the Nitrogen and interaction with the Oxygen,
you... is created.
Or, the Gravitational-Magnetic Field of the Oxygen,
is in a way, as part of the isotopes of the Nitrogen.
So, the life combination is in within the reach from one to another,
and that's how it's done.
It's Gravitational-Magnetic field balanced near to each other.
And the Hydrogen is the only Magnetic field element,
which has the freedom of not being twinned with another cell of itself.
That's why we can get energy out of Hydrogen in a Matter-State.
In the GaNS-State, the energy is not so much released by the electron,
but the energy is released by the balance of all the gravitational magnetic field
of all the four together, or how they allow another one to be added to.
I was explaining to the Knowledge Seekers, in a very simple way,
I don't think they understood fully the implication of it.
When you are in Space, and let's say you have two Spaceships,
and the mother is in one Spaceship, and the father in the other with the children,
You don't throw them in the space and say, "Oh, they'll meet in the space somewhere."
You don't make what is now a chamber, and you put them in there,
and bring it to vacuum, and you put the other one through.
What you do, you make what is known as a gating.
You make a differential, I showed the process to the knowledge seekers.
In the future, we show it how it's done.
You bring the gravitational-magnetic field of the two units,
near enough to each other, that the friction is minimal,
then you put a third reactor,
which is creating balance between the center of the two,

that it can work from one to another.
This is known as gating, this is in the patents,
I think in one of the patents is mentioned.
So, the gating is part of the essential life,
and in amino acid and in GaNS state,
Matters connect to each other by differentiation,
and what you call, a different state of magnetic field strength gating.
So, in fact, you don't mix matters,
but you bring enough gravitational-magnetic field balance near to each other,
that the elements can interact and adjust,
and be positioned in respect to each other.
This is why in the Amino Acid you have, look, 12, 14, 16.
Carbon, Nitrogen, and on the top, Oxygen.
The heavier entity, which is the greater mass, which is the Oxygen,
becomes the star of Gravitational holding, the glue,
because it carries some higher mass.
Earth has lower mass, the Sun dictates with the heavier mass,
what happens to the lower. This is the properties.
The reason being, why this heavy mass dictates,
because it has more of the gravitational magnetic field on the principal level.
And that's why it's positioned that way.
So it can go further in that position,
and strengthen more of the same of the higher order.
So, in this process, the hydrogen is and can bounce
between three different magnetic field environments.
And, by friction, the way as the sunlight and magnetic field of the Earth,
as I explained earlier, that releases the energy from hydrogen into the environment
that it can be absorbed by another ones which are in need of one.
These gatings and transfer in the atomic level, we will show very, very soon.
I've seen one of the guys here is building a reactor for it,
I'm watching to see how he does, and when he gets there,
I'll put it in the middle and show how the gating is done,
and you will be witness to it.
If I receive permission from my government and the government of Iran
to open the Iranian nuclear base reactor,
which was gifted to me by His Eminence Ayatollah Khamenei,
an Iranian President, we put that on the table.
It's sitting on the floor in the lab.
That's the property and intellectual right property of the Iranian government.
When I put that on the table, then the whole team understands what it means,
what is the entrance into those spaces.
I have used part of the reactors which was given to me as a gift
by the Iranian government when I left Iran,
and those pieces, literally the pieces,
is between among all the Knowledge Seekers,
without them knowing, I've given a piece of Iran to them.

So, very soon we will show how a system in interaction can be gated,
that you need it.
At the same time, part of the gating can be used that in,
between some elements or reactors,
you need it in your universal configuration to produce material.
And as you change the strength of your gating reactor,
you move from Hydrogen to manufacture of the Sodium,
to manufacture of the Plutonium, if you need it,
to manufacture of even the elements, which the man does not even understand yet.
So, in gating and interaction is exactly the same,
in a molecular level of the amino acid, as it will be in the Space technology.
All this we will teach.
Let me explain, there are people who don't understand what's going on.
I was trying to explain to the Knowledge Seekers, in the past few days.
Thank you.
And that is, we brought in 8 Knowledge Seekers, not because of their knowledge,
but through the strength of their Soul, because we know who they are.
As I said, the King does not need to have a spy in his bed, the spy is his own soul.
So, the 8 people sitting around this table as Knowledge Seekers,
we know who they are, we've known them for a long time.
Before even they knew they were supposed to be here.
The 8 will stay the same.
These 8 are the 8's which will make the 3rd member of the Keshe Foundation
Board of Directors when I'm gone.
One will be appointed by United Nation,
one will be appointed by the religious section of the man,
and the scientific section will be appointed by the board here,
by the panel which sits on 8 here.
As it says in my order,
that the religious side chooses 8 scientists from around the world,
and that 8 will come from this panel,
And that one person will sit as a board member for the Keshe Foundation.
So, these 8, they'll replace themselves in time,
when it comes, they know the time is not there to serve the way they are supposed to.
It will not come by death, but it comes by maturity of the man,
knowing he cannot serve correctly, or for whatever reason.
And there'll be no corruption around this table, as I've seen with all of them.
Because now they know they can have everything they need.
What do they need to fight for, what to serve?
So, the other 25 will join us 2025, they become the scientific backup to back this
research,
which sits on the top of what they decide to do.
And at the same time, as you have seen, and it's just been said by our members earlier on,
at the beginning,
Yukoko comes here, she goes away for 2-3 days, because she has children in another city,
She comes back, she starts where she left it, and she learns from whatever it is.

Dr. Ivan, he comes here for a week, because he has his surgery,
he goes away for two or three weeks, he comes back here.
They are not chosen for their position, they are chosen for their Soul they carry.
So, the next generation, 25, and the 8,
become the teachers for the 250, when it starts in September.
And those 250 will be allowed to stay, not more than a few weeks or a month, too.
Because once they learn, they go back to their country,
they teach and they come back.
So, we get a flow of millions learning very fast, in matter of next two years.
We make sure there is enough knowledge in every nation, every race and creed,
that the collaboration, the pride, will not be in killing and be powerful,
in how much you share and you can become more advanced.
It's very much like a woman who goes shopping and she comes back with a diamond ring of two carats
and she shows it to her neighbor and says, "Oh, I've got a three carat."
Now the pride of the man will be gained in knowledge and not in weapon technology,
because the weapons are useless.
The whole process is very, very simple.
We teach as much as we can and it was the greatest pleasure.
In past few days, when we were talking, they said,
"So, we have to have as many races, as many as we can on the table, in the Institute."
That's the way we will work. This is the way the Foundation will work.
Does not matter who sits around this table, serving unconditionally.
You haven't seen anything yet, but if you look,
there is a video which has just been uploaded with a little fan running,
to show you can have energy if you want.
This was taken only about 20 minutes before we start this workshop.
The knowledge transfer is so rapid, it's never been matched in the human race.
Now how you see in that little cups, the energy can run a motor,
and now you can run a light.
Then the African boy tonight has a light.
and the man in the Central Electricity Board of France,
looking, "How am I going to resign my position,
because there is no need for me here anymore?"
So, the situation has changed.
The ones who cannot build it, we build it for them,
but on the fair price and fair condition.
And, as I said to the Italians,
"You charge for the generators which you are developing, finishing,
still 5,000 Euro."
Even the cost of the reactor will be 250.
You are allowed 5 or 10% profit, which is justified that you can do things.
The balance goes giving units to the Italians who cannot afford 5,000, but they have to have the energy too.
At the same time, as we give it free, the government has to know who received it,
that people can contribute to the up-giving of the nation.

Everything will go just on peace because it's free.
So, it's not a matter of who's having a Rolls Royce,
it's not a matter of a communist time that they're all equal,
but it's the time that everybody is comfortable to the right measure.
And this is what's going to happen.
We move to a position of working with the governments and offices
and organizations who understand our language.
And, the situation is very, very, very nice.
We received Fukushima situation with Yukoko is flying out next week to see if we are correct or how we can adjust it.
We are not going to be correct 100%.
We have to adjust it, she has to report to us.
So now Keshe Foundation will be one leg in Japan and one leg here.
And in past 24 hours I received authorization from one of the major nuclear governments that they have even given me a list of what they want to test the material.
And it's free to them.
We are giving the same knowledge to Fushkima to add to this government, nuclear physicists.
They've told me what combination of cesium and contamination I'll receive,
because it's a major problem in the West,
and our knowledge is given to this government totally free, unconditional.
So, now we have the Keshe Foundation in the center, we have Yukoku in Japan next week,
and we have another major government here in the West, testing the same thing,
and our condition was, we don't keep anything away from you, you don't keep anything from us.
And what you learn will be shared with everyone.
So now the Fukushima situation, nuclear contamination, is spread with a fourth nation.
So we spread, we work together, and we share together.
And even I received a very strange email from a friend in the past 24 hours,
as is their right to have the copy of the generator,
because the Italians have been given the gift of.
You have a patent.
When we finished it, when it's done, when the generator out,
it'll be given to every Keshe Foundation around the world.
Be fast and create your own Foundation, Keshe Foundations.
That's a quick way to serve humanity, not a quick way to make a quick buck.
So, if you were shouting, "I'm fair and I want free energy",
My dearest friend, Sterling Allen, you have served us well.
Now, show the last video which was just uploaded in past half an hour, taken this morning.
You will not run a motor, but if you make enough of Coca-Cola bottles and put them together,
you will run a motor.
But, it's enough energy to support a man who cannot afford a 5,000 Euro generator in the back of Africa.

But he can have enough pots to absorb enough CO2,
to create enough energy to create a free light for him and his children,
and warm himself in the winter.
And in the near future,
we show how these little Coca-Cola bottles can produce kilowatts,
that everybody will be equal.
So, you create a condition in different Coca-Cola bottles,
amino acid, gravitational-magnetic field, you have fat, all you need to do,
because you are taking pure, pure amino acid,
more or less, a touch full of the top of the bottle,
which you're running the system, will give you enough energy,
that you can last you a day, even more.
So, you don't need to kill the animal to eat it.
The animal sits there and keeps on producing it for you.
And, as you have the energy, you don't feel hunger.
So, the hunger is solved.
Because, you release energy in a GANS-state,
and your body is made of GANS, the absorption is immediate.
The digestion system is totally for creating matter to GANS,
that it can cross the wall of your stomach or whatever.
This is the beauty of this technology.
Those who made seeds and licensing them that everybody can be controlled,
"Oh boys, you are finished."
"Oh boys, who were controlling the food chain, it's over."
Now, tonight, if the man in Africa who listens, or has managed to listen,
and he can cross the knowledge to his people,
we have Knowledge Seekers from Africa, and I respect you,
teach it to your nation and your people.
You just need to touch the surface of these amino acid layers.
Energy transfer is so rapid.
Yesterday I was in the lab and I showed them, I just touched by accident the GANS,
and my lips were burning, because the energy transfer is so rapid,
and I just by mistake touched my lips.
So, what I tell you, I know exactly what it is.
But, you have to understand what you are doing.
I'm teaching here, and we teach to the next generation,
we teach on meetings like this, that you understand the process.
In one way, we are feeding, we are teaching how people to have everything they need,
that we can bring the humanity to the same level with each other,
that there is no hunger and there is no greed,
but at the same time we have to open for the ones who understand slightly more
and are more supportive, to open the space to you.
So, it's a spectrum, like a father with different children, in different ages.
You don't take your love because of the youngest one cannot walk
and go marathon running with the oldest one.
You carry the one who can't run on your back, and you run together the marathon.

And, this is what we're going to do.
Till the young one grows up, that he can do the marathon with you.
The knowledge will be taught in different levels,
according to different people's understanding and knowledge and capability.
We won't leave the old behind, as much as we look after them,
with our health system, and we won't leave the poor behind.
This is not technology for elite.
We charge a lot of money at the beginning,
from the health side, to support the development.
And we always said to people, "You are paying us to learn."
Those who want to make a criminal cases that they're doing health unofficially,
"Oh boys, you got a long way coming."
Because now everybody is an unofficial doctor.
I don't know how you're going to license these boys.
FDA will have a huge problem on their hand,
because their masters in pharmaceuticals lost control today.
Because now you can create material which can reverse cancer.
Not by me, it's in the patent, you downloaded it,
you understand it, you make it at home.
And nobody can charge so much more, because the patent belongs to everybody.
So, we'll close the book of the past,
when we start with new from tomorrow, which is the beginning of the spring.
And I invite all the religious leaders,
We do not touch you or your religion or what you believe in what path.
We invite you to encourage your followers to sign in the World Peace Treaty,
or by us allowing them to find peace, your system becomes obsolete.
And what happens? It goes back to the essence of the prophets of God.
Bless their Soul.
So, the structure of these buildings will have no meaning,
if it's not a place for real refuge of the needy and supported, not of the criminals.
The rope should not be under any religion, a house to hide criminals and greed.
A rope has to be a house where the man finds peace, the true peace.
And all this has been abused up to now, and not from now on.
We don't fight you, we don't go opposite to you.
All we do, we give love, care and totality of the knowledge,
and the use of the knowledge, and the man will dictate the position.
It's the time to adopt, to follow the teaching of what you received,
in the correct way, not the way it suited some.
We are not here to fight, the time of fighting is finished, it's over.
Now we share equally, and we give equally.
I enjoy seeing the Knowledge Seekers.
They learn something, they, within half an hour, within half a day,
or the next day, they disappear into the upstairs room.
And I just wonder where they are.
Oh, they have a, they have a, what do you call it,
their teaching lesson, they have their workshop.

They are so eager to share the knowledge,
where now, if such a thing was in the University,
they hide, "Let's make a patent first, let's do the, what do you call it,
spin off and see how much money we can make out of it.
Nobody here has ever seen, or haven't seen anybody even making a spin off,
let alone a patent.
They have understood the ethos of the Foundation.
Knowledge is there, and somehow the food turns up on our table.
And if we don't have a food, we have a machine which makes protein,
we just touch it and put it in our lips, that's finished.
We don't need to go to the supermarket.
We have enough energy, we have the system to warm and heat ourselves
with the, what you call it, Coca-Cola bottles and water bottles
around the town, which is dispersed everywhere.
And you've seen the running motor by the followers,
what you call it, knowledge seekers.
And you have seen how easy it is.
Open a copper, aluminium, anything,
coated in a caustic, or anything which allows the upper surface to open up,
to surface, to create its own layers of holes,
or what you call nano-layers, PN junctions, or whatever your terminology.
And then, allow a number of layers to be created.
And then, put it back in the salt, because man came from salt,
from different salts, for different reasons,
as is the energy converter of the GANS from matter.
You have your protein, you have your light for the energy you adopt,
so you have enough food to eat.
Next question.
Yes Mr Keshe, this is Lucian.
Your lecture today was very comprehensive,
and you will explain next workshop, the creation of the positioning.
But I have a very short question.
In the CO2 patent,
were stated that both electrodes are copper.
In the Fukushima video, you were showing your little box with compartments
and one electrode was iron.
So, based on what you said...
We use anything. We use anything.
There is no limitation.
My question would be, is my understanding that you tried there
to create an imbalance between the magnetic...
No, no. If you...
(inaudible)
Okay, so let me finish the question.
(inaudible)
Okay, go ahead.

(inaudible)
I think you need to come back to the microphone, because you are fading out.
I'm in the microphone.
You want me to sleep in it?
(laughter)
So, the first set, both electrodes are copper.
One is nano-coated and one is non-nano-coated.
We still get the same energy kind of things,
and we get the same production of the CO2's and other materials and protein.
And the second one is Copper and Copper.
Both says the Knowledge Seekers have made this Copper and Copper.
I use a different thing because all it is, is how much energy you drain.
If you just make these things and leave it open, nothing will happen.
You have to close the circuit that energy flows.
The lower energy flow, the lower, lower in micron, is where the life sits.
Our body doesn't work on 10 kilowatt neuro system.
So, the minimum, minimum, minimum energy circuit you produce to drain,
the more materials on the basis of human body will produce the system.
When you create high-caliber, when you put a big engine,
when you put a big motor, then you go into the heavy elements.
This is how mutation of the elements will come.
You haven't understood the principle yet,
because you are looking at the chemical reaction, not at the GANS reaction.
These systems, if you understand, can change a lot of things to the way you want.
One of the problems the scientists have, this is hypocrisy,
like that Stephen Hawking with the black hole,
that in the supernova, when the star explodes, heavy elements are created.
This is absolute, total nonsense.
Elements are created, heavy, big package of magnetic field plasmas are released,
and according to the environment they are released in,
and the speed they lose their magnetic field elements,
they become the matter.
Fusion, the way the people are looking for it, doesn't exist in the Universe.
So, if you set the environment in your cups,
in a way to drain very heavy, you will create heavy elements.
You want the lighter elements?
You want the combination molecules of lighter elements?
You set your reactors to absolute minimum, even the LEDs too much.
You go to the drainage as a minimum.
You go and measure the current flow through the neural system of the man.
So it's like an adjustment system.
Then you imitate it in your system, and then you get what you want in the protein.
Do you understand?
Yes I do. So it's the release of current is like an adjusting
of the positioning gravitational magnetic field.
(MK) Yeah, yeah, yeah, but, but please, please, please, redefine the current.

The current in these systems in body of a man, is not in electron matter level.
It is in electro, it's in gravitational magnetic field level.
That's why the minute you touch, you reach the brain.
You don't wait.
If you were supposed to work on your nerve system,
was supposed to work on electron,
by the time you touch the pan and it's, or the fire,
and the information go by electronic to your brain and respond, come back,
half of the arm is burnt.
(R) Right, so... (MK) Because,
the information, the knowledge, everything, the material,
are created in gravitational-magnetic field level, not in electron.
We have a... Once the man understand the difference between the matter and the GANS,
all these problems are solved.
And that will be very short term.
In the next few weeks and months, people will understand very clearly the difference.
And then we don't have these discussions.
Okay, so that's clear. We will wait for that. Thank you so much.
You're welcome. Any other questions?
Thank you for that Mr Keshe.
Because I recently seen a video in regards to the Electron
and I thought it was kind of funny but it makes a lot of sense
in terms of the way you explained it there.
Which is that a snail moves faster than an Electron when in the circuit.
Because the circuit themselves is matter, when matter moves
it creates the electric field and that's what we're measuring.
Yes, but the thing is you still have a current, but it's magnetic.
Pardon?
Exactly, because the fields themselves is what we actually want to be able to use,
and not the electron themselves.
That's it, but the field again, I repeat, is gravitational magnetic field.
What you get as energy, in like running the motors as you saw,
If you make a system, you can run a system parallel with your motor,
that it works on the gravitational field as much as the magnetic field, flow field.
You can separate them.
This I will teach in the reactors in the Space Technology very soon,
because it's needed to know.
It's very much what we call in the electric current and eddy current,
or the back flow.
Backflow, the forward flow, we call it electric current, which is the repulsion, that's why it moves away.
And, the other one, the opposite to it, is what you call, gravitational pull.
It's the same thing that a lot of people...
For the eddy current?
Yes, yes, eddy current is gravitational, and electric current is the magnetic pull.
The two balance each other.

And the thing is, the same thing goes, you see, us as a human race have used different terminology for the same principle.
A lot of people have said, they say, "If I'm Tesla, I work like Tesla."
No, Tesla only worked with magnetic fields.
Professor Mein has come up with a new wording, he calls it, what do you call it?
Scalar waves.
So, Tesla speaks about the field which goes, and he knows how to play and bring them or further them.
And, Professor Miles speaks about gravitational pull, but it is in fact, one is talking about the other half, but they never understood it.
And, they all, both things are clever. They are very clever.
But, now it's time to join everything and we understand the whole process.
A scalar wave, any current, gravity, is all the same.
Magnetic field, electric current, and what do you call it?
They are all what do you call it? Magnetic field, which is the opposite, is all the same.
It's the same principle with different things.
So, this is, I was talking to somebody some time ago,
It's like, you know, when you live in Belgium, Belgium has a very funny habit,
or it is part of the culture.
You can call your wife in the name of a man.
I can call my wife in a man's name and she will still respond,
because she is Catholic.
She comes from Catholic house.
She is given her first name, which is a woman.
She is given a second name, still a woman.
she is given the name of the Godmother, it's a woman, and in the same certificate she is given the name of the Godfather,
so she has a man's name, and you have a total confused man in one certificate.
This is like man's knowledge.
Yeah? So, I can call my wife with a man's name and they tell me I am gay, but I still live with a woman.
This is how we confuse ourselves with it.
It's just for me, it took about 20 years to understand how they don't use a man's name on a woman,
but that's something that comes with lack of intelligence.
But understanding the culture now, I understand why.
So, this is, we do things in a funny way, and we chose names over time in different sites.
With this technology, we brought everything in one.
We all speak about one thing, magnetic cup, which means repulsion of two similar poles,
Gravitational means attraction to the similar poles.
So, when we speak about magnetic, it's about fields of magnet.
But, when you speak about the Plasma, we speak about magnetical,
which means it's the repulsion field,
and gravitational, which means the attraction field between two fields.
So, this has sorted a lot of things.
Something which I have explained this before,

but maybe for those who are new to us.
My first book is, I could not write about what I talk now, because people would not understand,
it would have been too much to swallow.
So, the first book is explaining the basics, but still using the old terminology.
In the second book, which is the structure of the light, we speak about the interaction of the two,
we open the plasma with the new names.
So, the first book is a structure, the second book, the structure of the light,
shows the transmutation and the transmutation of this thing, of the plasma, in the first book.
The third book, which is the origin of the universe, shows the behavior of the plasma...
Sorry Mr Keshe, can you just pause there for a second please?
... you're starting to break up, we just want to make sure.
Yeah, can you just start with what the second book explained?
Yeah, the second book, the second book is about transportation of the Plasma,
which is explained in the first book, because we put a correct foundation down.
For me to come and speak about the principle matter
and transition matter in the first book, would have caused havoc.
But, I explained the structure of the Plasma in the first book,
using the old language.
Yeah?
You have to speak to every man in his own language,
otherwise he doesn't understand.
Everybody knew what was antimatter, and what they call it,
black matter, and dark matter, and the rest.
So, we spoke in that language.
In the second book, we explain about transportation of this Plasma.
You call it, "The speed of light", or "light".
Because, when it goes too fast,
what it does, the Plasma interacts with the magnetic-gravitational field
of its environment,
So it creates a friction residual, you call it plasma.
So the second book is about the transportation of the same plasma.
The third book, the structure of the Universe,
is the explanation of the interior of this plasma, how it behaves.
You call it the Universe, how the galaxies are,
you call it up quarks, down quarks, boson.
So, if you read the third book, you understand the internal structure.
the behavior of the internal structure.
And the fourth book, will explain, which is written,
I hope I can get hold of this guy called Dirk Rolessens,
and sit him next to me for two weeks,
that we can get this book painted and done, decorated and drawn as usual.
Then you understand in that book, how the Solar System are done.
Then the Solar System is very much like a atom structure,

molecule of the body of the man.
Then you understand why, as I explained, different elements in the body move different way.
Then you understand why you get diseases.
And you can do the same thing to undo the disease yourself.
And now with the medical pattern which has become public,
you all can help yourself with all the diseases in the world.
If you don't know, it's like, you know, you are a very good mechanic,
We are very good cook, in a way, but you don't have time to cook, so you go to a restaurant.
Now, doctors become restaurant, you want to pay a lot, you go to a very expensive French restaurant,
you pay too much for a little on the plate,
or you go to an expert to cook you a very nice food, and you pay a lot of money for it.
Now, if you want the Foundation to do your health section, you pay our rates,
which is helping the others, so you don't pay for yourself, you pay for the others.
If there is somebody who can do it cheaper, so go to them, because now it's free.
You all have my knowledge.
Those who want to do the medical, and I have a license from the Belgium,
I have a document from the Belgium, I have to teach my technology.
So I start teaching the medical.
From now on I fulfill my last part of my, what do you call it,
in accepting my technology as alternative, technology as medicine,
or health, or alternative health program, as they call it.
It was, I had to teach. Now I start teaching, not to one or two, but to thousands at the same time.
So, these are the things you got to understand.
We needed the time to bring the technology across so many people across the world,
that we had the foundation for the change for world peace, and now we have it.
Clear indication of this. If you look at the forum of the Foundation,
when we put rubbish topics or something which is not important,
you get 200, 300 and it disappears.
When you put something like the way the World Patent List, what we released on USP,
you see millions of people. So, we have a huge followers.
They were just sitting on the wings to see if it's real or not.
And now it's real, because the governments got it and now it catches out of the bag.
So, the knowledge is known by everybody.
Now what we got to do, we got to open it up and teach you step by step.
And to open what I've written in these patterns,
will take man thousands of years.
Because, when you go somewhere else,
"Oh, this was in pattern, but we didn't see it this way."
As I said to the knowledge seekers,
if you go from a matter environment,
to a transition environment magnetic field strength, you won't die.
All that happens, your MaGravs of your plasma will be using that level,

in the strength of that environment.
So, if you go into a principle matter level,
because every atom starts from the principle matter,
that level will appear in respect to his environment.
So, the physical body of the man will never disappear,
as long as it's kept coherent as it is, due to his own reasons,
and his magnetic-gravitational field balance.
And, in so many ways, in a yesterday, as John was saying,
that when we emptied from four of the containers in a box,
we literally mixed four people together, and we saw one thing.
All rivers of magnetic field channels of it, we see this video, I think Marek has managed to do a good job if he's done it.
You don't see, you see a constant magnetic field channels.
These are the channels which you like to call wormholes, but nobody understood it.
I just looked at them and said, "I hope these boys understand what they are looking at."
Because once you get into these, what they call, channels, they've seen, as John said,
said, "These are magnetic wall channels, these are where there is a balance."
That's why different magnetic field strength have made their own corners,
and these channels in between is where they agree this is the balance of the fields.
You get into these balanced fields, channels, you can go.
It's very, very clear.
We tried to do a very good opening video of this one, that you can see it.
You, and then if you mix it, we empty it, we go back or we stir it,
they build their own channels again.
We brought the container from one side of the room to another,
it begins straight again to do it,
because the balancing at atomic, nuclear, GANS level is the same.
And these, when you look at it, you learn more.
These boys are too interested, still in the physical matter,
and in time when they learn about the MaGravs and Plasma,
then you start seeing things the way I try to explain.
But, at the end of the day, everything gets connected to the Soul of the Man.
And I try, in this table, we just come here and we teach you,
we talk about the reactors for months we did,
then we talk about the Plasma and these Coca-Cola bottles and energy,
But all this very soon has to go with the teaching of the Soul,
that fairness stays the same.
Because, if you are not fair in a space, you have no room to stay.
Then make sure, because there has been enough conflict in the past,
now is the end, because it takes a long time to establish peace,
but holding it on, it means you have to protect it.
It's like your home.
Once you have a peaceful home,
when the brother comes, or your mother comes, and starts staring up,
you keep the mother out, you say, "Mom, we come to your house to meet you,
not that I'm here."

Because, every time you come here, you say,
"Problem, but I have a happy house with my wife."
This is the situation with the space with man,
you've been kept out, because you're animals.
You behave like animals, you eat and kill each other.
Now we've given you everything, what's your excuse?
When you behave, you're allowed in, and now we open the door,
and this time, we interfere, not you deciding.
We don't need to reach you, we reach your Souls and the body will change.
As I said, with the same I did, nobody understood and I explained it so many times.
I reached the Soul of his Excellency President Obama.
A man who issued the decree the second day after the Peace Conference,
six months later, asked for a key on the day of his election.
The morning of his election, the man who's the most powerful man in the world,
I don't think Keshe Foundation what is in his brain.
It should not be existing, but his Soul put him in there.
I read the letter from Kerry Cassidy last week.
At 3.40 on the 6th of November,
American Ambassador instructs the Embassy to get contact,
"Can we have the USB stick?"
Now you're all American Ambassadors, you all receive the USB stick.
The knowledge in your computers, and as we said,
because Armen was saying yesterday, I don't know if he did it or not,
"Please, please, download these papers, these patent keys, into remote USB sticks,
that if your key gets attacked or anything goes,
because what is on the plan, they are using what is known as,
anything which carries cash, to be wiped out to the Internet.
This is what the plan is going on, our security people are watching,
that there'll be no sign of us.
Download these into sticks and frequently upload it somewhere.
They are trying to use the Marshal Code, as we all know.
Pick up the name and you can target it.
The minute somebody speaks about John, it'll be recorded.
The same Marshal law has been put on for Keshe Foundation.
The plan was to wipe us out totally.
So, if you have these things, keep it on 2 or 3 remote,
that you can share the knowledge with Humanity for years and years to come.
I warned people who were planning to bring our servers down to Keshe Foundation,
now we have tens of thousands of servers.
You bring us out, we pop like puppies everywhere.
It's been said, it's been done.
You buy servers to bring us down,
We buy servers to make sure our knowledge is shared.
So, you're wasting a lot of money.
And, the more you taught us what you're doing,
the more we didn't come back and attack you.

We just made sure we stay online.
And, one thing I tell those energy people says,
"Free energy, no thank you."
Yes, please. We've done our job.
As I wrote on my forum, "Mission accomplished."
and our American military people understand exactly what mission accomplished is.
And if you don't know it, I'll tell you in one minute.
When Eastern Block came down in 1990's,
we had Frankfurt Airport, one side military, one side civilian.
And when there was no more Eastern Block, no more enemy to fight,
which is the situation now,
The American military, on top of the aircraft hangars,
on Frankfurt airport, wrote big signs.
I know there is on the YouTube, you can find it.
"Mission accomplished, we got rid of communism."
Now our mission is accomplished, we got rid of world war and hunger.
So, message is very clear, we won.
No time, without a single bullet.
While you were busy planning our destruction,
We were busy to share and people got the message, now we shared.
I've put this message out in Kerry Cassidy's or with John Harrison's interview.
We call upon World leaders for a meeting for World Peace.
You do not attend, we announce it this time.
We have made a place and we have set the seats, everything is ready for it.
The way we did in Ninove in Belgium, now we have it in Italy.
You do not attend, you lose.
American Embassy, 4.30, before the 6th of September,
World Peace Conference of Ambassadors in Lino,
called us and they said, "This time they will not come."
"Maybe they come the next time."
Your card is up, Americans.
You turn up and you make sure Peace is on agenda, nothing else.
No bargaining chip, all equal.
Next question.
Are we offline?
No, you're online.
Any questions?
It was very comprehensive in your today's lecture.
This is the beginning. Let me tell you something.
There's been a lot of, I send the links to a lot of, to the Knowledge Seekers,
one or two of them in the past day or two.
For a number of years, I have met with a lot of religious and government leaders
and organizations, and we receive a lot of emails.
The question has been, "Are you the Messiah?"
We are all Messiahs, if we are just and correct and understand the process.
And this is what has been lacking.

The greed of matter has blinded us.
We received something from Kabbalah yesterday,
somebody coming with nine reasons who I am.
I received a very funny email from my dearest friend, Dirk Laureyssens.
In some Hindu books they say, "Blah, blah, the world has been waiting for."
The world today has been waiting for all of us, on equal measure.
It's just that we never accepted that we are equal.
This is the problem.
So, those who ask and write to us, and they say, "We are Messiah."
No, we are all Messiah.
I just know the way.
There are two ways, we follow the correct way,
or at the same time, the one who knows the way,
can block the ones who go the wrong way, and guide them to the right way.
Time of Messiah, there is no more Prophet,
because the Man cannot be taught the same and the same.
The only difference is how to wash your face and which way to pray.
Now we take you to a space.
There is no which way to pray, but to your own Soul and to your own Creator,
which is you within you.
So, the ones who want to go to church to pray,
let them go to church to pray,
because they still pray to themselves and to us.
It's a very, very simple message.
Messiah, yes I am, but at the same time, equal measure with all of us.
Abundance and the promise is fulfilled.
Now is your turn to see how open you are to your own Souls,
to accept it and follow it.
I want to know how many American or Japanese or Chinese,
once you understand what it means and what's on the table,
will stop making the bullets and the guns.
And you know, if you're Americans and you want a Peace process,
go and buy a house next to a gun manufacturing company.
There's a lot of Carbon in the air, and that's a lot of food.
And if you don't know it, the boys will show you.
Because a gun has a gun powder and is a Carbon based, so it's free food.
Leach on.
Oh yeah, my wife says you can survive on the bullet.
And actually, if you are very clever, you can make a lot of diamond rings too,
because you can change the Carbon now to diamond, we showed it how.
I do apologize, but I keep, I kept my promise,
as I promised to the boys in the diamond wars years ago.
I will not release the diamond technology,
but with this process, it's been released,
and in so many ways, diamond has no value,
because everybody's will start making diamonds.

and you can see it on our videos.
We used to have it on our website, we took it off,
with all the diamond testers, and everybody says,
"Oh, this is blah, blah, blah", because it's never understood.
But now, the reality is very simple.
You can have as much diamond as you like,
and the reactors here will produce kilos of it very soon, because I know why.
It's too many of us in the room, and we all breathe,
and one of the first things that comes out of our mouth is Carbon, CO2.
And if we breathe too much in the room, you will see diamond structures falling all over the place.
And I've seen it happening.
I've seen it happening. They laugh, these boys laugh, because they know how many times I've surprised them up to now in the past 4 weeks.
That's another surprise.
You make a reactor that it rains water around it, because you create gravitational magnetic field of water,
And whatever is in the moisture in the air will convert to it,
or get attracted to it, you extract moisture from the air,
and put that in Ethiopia, boy there will be no one moving, immigrating, refugees, nowhere.
You can water all the planets, as much as you like,
because the more you take out, the more space you make for the surface of the oceans to evaporate up.
So, all you do, you create a cycle.
We show this and we teach this in very, very detail in the workshops.
Please, look at the pictures, not just as pictures,
what has been loaded today by the Knowledge Seekers.
Understand it, replicate it, and just don't look at the matter.
Look at everything as a GANS, and then measure it.
If you don't have a measuring tool, observe it.
And please, my advice to all of you is, don't do the stupid things I do.
After touching these waters, don't put your finger in it and in your mouth.
Because you'll find out you absorb so much energy of different matters,
which you are not ready, unless you understand what you are doing.
Everything is not honey and, what do you call it, protein.
Some of them are carbon, some of them is potassium,
It is different material which is near enough and is absorbed by the layers.
Let us do the job.
Let us bring the 25 knowledge seekers and other world scientists
who will start collaborating with us, to explore and understand.
Those who are worried for the new jobs, with this new technology,
if you understand even two minutes of what is in one of the tapes released today,
there is, I think, about 30-40,000 PhDs to be made.
Just each cup you see in that half broken bottles,
that's about 40-50,000 PhDs, just to understand one of them.

And I think we have about 65 of them in the container, or 56 of them.
So that's about 10-20 million PhDs,
more than what's going to go to the new fusion reactor in South of France.
I repeat again,
Mr. Nelson at the Jet Propulsion NASA,
be the link as you've been before,
to the American government and to the NASA administrator.
We put the hand of collaboration to you,
or very soon NASA will be a name on a board, used to be,
the way was American Airline.
Lockerbie brought it down because of the stupidity of ignoring the fact
there was a danger.
NASA will become a name, if internationally we do not collaborate.
You have a lot of knowledge and we have a lot of respect for you.
The same goes to Mr. Ben Hoff, Dallas Ben Hoff in Boeing,
the link between Boeing and NASA and American government.
We've been long term friends.
Open the doors and let's work together.
We invite you to our center.
They don't let us come to America to teach you.
You come to our home, we teach you with open mind.
The same goes to my Russian colleagues in Moscow.
I have learned a lot from you in past 20 years.
When the Europeans won't teach us about the Space Technology,
you open your doors to me.
Now the door is open to you.
I learned a lot in Kazakhstan from Russian Space Technology,
the way the information was given to me to understand.
And I thank you for it.
I thank the officers KGB who provided me with the information.
As a friend, not as somebody who was a rogue.
The same goes to my dearest friends in Iran.
You're welcome.
I invite the Iranian head of a Space Agency and University to our place,
the way you invited me to Iran.
Doesn't matter if you're American or Russian, black or white,
you are welcome.
We teach you very clearly and openly, and if it's too much, we send you the links,
learn from us, and make it American or Chinese, it all ends up the same way.
My hand of friendship goes to our scientists in Tel Aviv, and the same goes to Ayatollah Khamenei of Tehran.
Your eminence, open the door please.
Any question?
(SC) Yes, we have a question from Elia, she is asking,
if you have a list of the countries in which Keshe Foundation
does, has a local organization?

(MK) These are rogue organization, you mean Keshe Foundation?
These people, we didn't even know there is a Taiwanese.
We did not know till this last week that the Taiwanese,
we knew that in Taiwan there was an organization going,
but it's two men who started it.
It's the same with Mr. Chu in China.
I think that Elias is trying to say legitimate Keshe Foundations.
You're all legitimate, unless you lot are legitimate.
Legitimation comes in application of the technology and working with it and understanding it.
The Keshe Foundation does not need office, name and organization.
(inaudible)
(inaudible)
We have local presence in every nation on this planet.
Because there is somebody who understand and using the technology.
You want to put name and registration number on it,
then they become crucified and sacrificed?
There is no more need for that.
There is enough.
I know, I was very surprised,
that one of our Knowledge Seekers we are still waiting for,
is from Cameroon.
Who thought there would be guys in Cameroon who understand this technology?
Because it's so simple.
We have people from all over the world.
There are scientists in...
Yesterday I had a call, we have a beautiful guy in Sweden who is working very hard for putting Keshe Foundation and everything too.
And yesterday he managed to make time that I spoke with a very well known professor in Sweden
who is coming to us next week, if his wife's permit, or when they find time,
because he's a medical man, and he says through what he's seen here,
because he works in the field, and they have, God knows, whatever things,
that the work in medical section in ILS and MS is very correct,
or he has opportunity to, now he wants to be able to do like a huge trials around,
because ILS is very big in Northern Europe, and there is no solution for it.
And, they've seen how we treated our volunteers.
It's not treated, it's processed in a way.
And, they can see it is impossible to be done with other things.
In the next few days, I told the Knowledge Seekers yesterday,
he'll be here with his wife, because scientists understand what's going on.
We, now we explain we are out of the shackles of our bondage which was for years,
and in a way it was good because he allowed us to mature.
The time we spent on exiles or prison in Belgium was fantastic for us.
As I always say with my wife, I would have never written the books.

In that prison, that confinement, we had nothing else to do but write and develop and teach.
And now we are out, it's open.
So, we don't need a Keshe Foundation anywhere.
Keshe Foundation is in your heart.
If you understood the patent,
actually I can say there are about 40 million plus Keshe Foundation since last week,
because they downloaded the patent, the key, USB stick.
So, even if you call nobody,
we have a 30,000 download on Keshe Foundation forum.
They are not all American or Chinese or whatever.
Divided by 100 or 200 nations and territories and islands around the world,
and go by whatever ratio you go,
at least 1, 2 or 10 people have, in each nation, have read it.
So Keshe Foundation is everywhere.
You don't need to put legitimation to it.
I understand what Elia is asking you.
And I was discussing this yesterday here in the Institute.
Elia was the founder of the Keshe Foundation in Bulgaria.
And she was the initiator, she should have been the founder.
I'm prepared to give the Keshe Foundation seat as a founder to you.
(sighs)
You do not need to have a seat to confirm in what you believe.
As I said to the Knowledge Seekers,
Elia will be around this Institute next time around in the 25th,
and I'm negotiating for the finances for her, because I know her.
She is a key, she is a jewel in the crown of the Keshe Foundations around the world.
So, don't try to establish a Keshe Foundation.
Make a Keshe Foundation the way of living, in the way you live at home.
With your wife you have peace, with your child you have peace,
and then the whole thing goes.
I get very angry when my wife says, "Oh, you get angry all the time."
because I get angry of the stupidity of the man, how much they can harm each other.
Otherwise, people like Elia, people understand what this woman carries.
Then, you don't need to look to have a foundation to be the founder.
You found the truth in your heart and you achieved it,
and I respect you for it Elia.
Next question.
Dr Keshe, this is Fred.
About the energy pyramids we discussed last time,
I can confirm that the emotional mind does manipulate the energy
and I also wanted to talk to you in the future about
using GANS materials, different GANS and different layering
to build a skin of the craft for the reactors to give it a body.
You can make a body of a craft out of the straw.
Because it's not a body of the craft, it's the field which carries.

(JB) But if you make it out of the GANS in different layering,
you can give it the ability to change.
(MK) Out of what?
(JB) Ultra-Filt GANS.
GANS layering.
Different GANS in different layering.
(MK) It doesn't matter.
(inaudible)
If you may, it depends what, I will teach you how to run reactors with liquid.
With total gas liquid.
When you have the gas liquid, you can do anything with it.
Can you repeat that?
I'll talk to you about it, I'll talk to you about it on Skype another time.
I don't think you'll understand what I'm trying to say.
Maybe it's too far advanced for people to understand right now.
(inaudible)
You're getting broken up, can you? If you don't shout, go back a little bit from your microphone
and talk slower, maybe we understand. We are missing some words in here.
Repeat yourself.
Through the emotional mind, you can communicate with the reactors and the GaNS material.
If you build the craft out of the GaNS material in different layers,
or different GaNS strengths, you can give it a physical body,
and it can physically change itself when you want it to,
and you communicate with it through the emotional mind.
We have a problem understanding this question Rick.
Can you write it down please?
I think what he is saying is about building the craft out of GANS material,
having it more of an organic sort of quality to it than solid,
and that it would be able to communicate...
Say what?
You can control the reactors as a plasma, you don't need to build it from the GANS.
I think it sounds to me, it sounds to me you haven't understood the whole concept properly.
It's good the way you are going, but expand it a little more, you'll find out.
In, we tried to put it, it's actually in one of the patterns, I'm sure it is.
Dirk and I, we've written it down as part of Oasis patent.
You can, the Oasis system, which you have, why it's called Oasis?
Oasis, suppose, if you look at it, it used to be, I don't know if it's still there,
it's a tent with people underneath of it.
Nobody understood what this means.
This means if you are, let's say we are in an earthquake position in North Pakistan,
which happened a few years ago, in the winter time.
It's no use me coming and giving you an Oasis system which gives you energy,
and it gives you water, and it gives you heat, or light, without giving you a shelter.

People never understood this.
You can adjust this Oyster system to create you a magnetic field shelter.
So you do not need to have food and be warm, but you have a ring and a skull on top of you because there is no roofing.
The Oyster system is a complete system and Dr. Iman is working on the original.
We have this system that was given to him yesterday.
I will show it.
It's the gravitational magnetic field, which can create a soft magnetic field,
which will be very, very soft,
and it can stop the wind and the cold and the rain,
because it becomes like a pot on top of you.
This is what you've got to do in space.
In space you don't take a tent and put it on the moon,
and you don't go in a box hiding like a sardine the way they do it.
(laughter)
Yeah, they laugh.
Now you have the capability to extend your gravitational magnetic field
with the strength within your reactor.
You want it 10 meter, you want it 20 meter, your craft is 100 meter,
or you land with a 10 meter diameter or 20 meter diameter,
but you want to explore the ground.
You don't put a snowman suit the way they do nowadays,
and jump like a rabbit on the moon.
You walk out, you expand, they are laughing, they soon will do it,
When they do it, they understand it.
I call it the "tickle factor".
When these magnetic fields pass your body, they all, you bend in,
because it's a field, you feel it, and you bend into it.
I call it the "tickle factor".
You understand soon what tickle factor is.
So, you extend your boundaries of the, your Oasis system,
enough that you can have a shelter,
till, till the physical shelter you are used to is built.
The only problem is, you make it a bit stronger, otherwise everybody sees what you are doing inside.
So, you cover yourself, with just a little bit of strength.
When I did it the first time, it was laughable, but it's gorgeous when you receive it.
The people don't understand, and I thank the Iranian government,
the freedom they gave me in research, and they never monitored me.
They watch what I'm doing, but I report what I'm doing.
But, in testing, we saw a lot of beauties of God.
And, you all see, in the next 2-3 weeks, when the broken reactor of John goes on the table,
and the half-cooked reactor of Marco, which is brought from Slovenia, is on the table,
we're trying to adjust it, and...
Actually, I try to do things the funny way.

Yesterday, I went and I bought the flat board, or in plastic now,
you use for flattening, or rubbing a plaster on the wall, on the bricks,
for Dr. Ivan to put his reactor on as a base.
You can buy anything, if you understand how technology works.
You don't need a multi-million organization.
I think you people, we're gonna have a laughing of a time,
when these reactors all dance and jump and do nothing.
To you, they do nothing.
It's just like the way it happened here two days ago.
Two days ago, when you see the video of the yellow, orange and pink color battery,
they were so all excited, now they are going to see a movement, energy, a light.
And because the way they nano-coated their material, it wouldn't work.
But I'm there, I watch, I know what's going on, but it's not my job to interfere,
because they have to make their own mistakes.
So, I knew it's not going to be much, and I could see things,
I tried to do things, and John did all his praying,
and the other one went there, and the whole team, like a broken army,
one by one, disappeared out of their lap.
As you know, it was a big failure.
By the next day, when they saw what they produced,
they start slowly, slowly, believing in themselves, that things happening.
You don't have to look for physical things immediately.
So, the Oasis system has a lot of more other applications,
which we can show people, what is going to be done.
I reckon the Oasis system should cost about $25,
to be given by people like Red Cross in time of disaster.
That immediate shelter, immediate water from the moisture of the environment,
and a small amount of heat, and enough energy for cooking is available.
And, even there is a shortage of food, you cannot get to these people.
We can write a program in the very simple, in the small microchip,
that exactly what we are doing now in past 10 years in the medical system,
now you got the patterns, that, what you call it,
the gravitational magnetic field of like proteins or vitamins are created
within the moisture of the water you absorb from the environment.
So the water you drink becomes your energy of food supply.
At least for the short term or the long term.
This is how we are going to feed people in space.
Energy absorption and conversion to food or energy absorption directly
through the drink, through the body or in the environment.
The game has changed. I feel sorry for those who planned for years
to be the masters of this planet.
You become servants to his people.
Next question.
(SC) Yes, we have another question, as we have a dentist gentleman into the team.
Could this technology be used to treat cavities, you know dental,
without drills and stuff like that?

(laughs)
I don't know, I don't know how much you know about the background with Dr. Iwan,
because his office is surgery, is where the Keshe Foundation Center was,
so we always chit-chat here and there, whenever we met.
Everything is possible.
Even yesterday we were talking about the Plasma, this week.
You can grow bones in the tooth, or you can do all sorts of things with it.
Why do you need a cavity if you can actually produce the right thing,
exactly the same as what your tooth is?
There's a lot of possibilities, but we leave it to the others to open it up.
The way, the way, if it's too far-fetched,
go back on the documents of the Keshe Foundation.
Nobody, nobody has ever understood this.
... what's his name? ... the magazine which is about 18 page article on Keshe Foundation.
The Frontier, go back on the Frontier magazine of 2-3 years ago,
on their 100th edition, there is about 14-16 page article about the Keshe Foundation.
And one of the pages they have is the amputated toe.
It's two small pictures, just people look at the cut and then look at the toe.
If we could allow the brain to develop and grow a toe,
which is a bone, muscle tissue, blood vessels and everything else,
so we have enough knowledge to do it, but at the same time it has to be separated,
you don't want a meat in front of you, you don't want to call it in the middle of your tooth.
This information has to be siphoned, and that's why we started,
say, the 25 Knowledge Seekers, and the 250 for September.
To put these in a data form, because we are a bunch of data illiterate,
except one of us, I think, is Marak.
Everything else, to me, a computer is a foreign object.
So, the new scientists will put in data, and things that can be replicated.
Yes, it's possible to do any kind of thing, grow bones, take bones out, replace.
At the moment we are running a trial, as I don't know if I've told you or not.
The gentleman is a dentist, doctor.
His son is a doctor, becoming a doctor,
and he's had a brain cancer tumor due to mobile phone.
He is, the tumor was taken out about 12 months ago, or plus,
and he was on a 12 month chemotherapy, and the son, being a medical guy,
he's met me in a conference somewhere in Germany, 2 or 3 years ago,
he said, "If you can help my dad."
So, we could see how the fingers were going the wrong way,
in the, with the chemotherapy, and he was told he's got 18 months maximum.
We started in November, I showed the data and the things to Dr. Iwan,
and all the figures in three months have come back to normal.
If I give his blood test to you, you do not even,
you can't even say the guy had a cancer or chemotherapy or anything else.
And this case is getting monitored by about four doctors in Germany
and other places, to monitor how chemotherapy

and the cancer can be averted,
or at least after chemotherapy, to be allowed bone marrow to grow,
or become to the strength that can protect the body.
So, everything is possible.
We accepted a new case that the cancer is done,
today, in Switzerland.
And the system, it's the first time we had a pre-notice,
so the system was handed over on Monday,
They came to pick it up.
So, it's an eye cancer, the eye has been taken out,
the tumor is 3 cm above the eye,
and the guy is, what do you call it,
Keshe Foundation supporter has been,
and he said, "I'm gonna lose the eye, but I want you to do the rest of it,
see if we can stop the cancer spreading."
So, we have the knowledge and system.
It's the first time we've been given the opportunity
to come in simultaneously after the operation.
So, the system gets used this week, we understand,
and we see it, we'll see what happens.
And, the knowledge I give you, is not secret anymore.
The health pattern is in the package, read it.
But, understand it, because if you use it the wrong way,
your sweetie becomes your poison.
We'll wind it up, we meet next Thursday.
If we can do the workshop with Yukoko while she is in Japan,
and they are doing the, or they have done the experiment,
and then the result will be repeated by the major,
you know, what do you call it, government nuclear center.
Exactly, we are running a parallel test as Fukushima,
in, with this nuclear center.
I received the specification,
is very much similar to contamination in Fukushima,
because these contaminations are all over the world at the moment,
but nobody speaks to them because there is no solution.
Once the solution is open, hopefully next week or next couple of months
with us in trial and error, then we understand how much we had problems.
Because it is the responsibility of the Keshe Foundation around the world
to be the solution and not a problem.
Then we run the program with Yukoko on Friday, live.
Rick, Yukoko will send you the time and we all stay live online with it.
Okay, thank you very much for all your time, all of you.
And please use the USB stick, use this USB stick knowledge for peace.
Because we had enough war, we lost enough.
So Mr. Keshe, final information for you, Vincent and I, we did a torrent thing and we monitored the spreading in a peer-to-peer network. We had countries from all over the

world, Russia, Brazil, Portugal, Germany, France, so additional to your servers. I
we had about 300 people seeding all these files, so they are propagating properly.
And earlier...
(MK) So in the 300 servers, the 300 servers you mean?
(AE) Yes, 300 exactly.
(MK) Yes.
(AE) And growing.
(RC) Yes, we had about 300 seeders at a time,
over the last couple of days, and it hasn't gone down.
So, that's, I've always seen people requesting it from all over the world.
So, it has gone out in addition to the links that you got, I do believe.
That's perfect. Thank you very much for all your support Dave, Diva, Rick, and the rest,
and the Knowledge Seekers, and the ones who are behind the scene, do a lot of work.
The position with the Foundation is that we are here to set up the process
and enforce the process of equality and world peace.
The reason is not for this, that we'll have peace on this planet,
is to teach that we cannot think of damaging or harming no one,
that in turn when we go into space in the next few months and weeks or whatever,
We don't do the wrong thing to be in the wrong environment to damage ourselves.
The people will start understanding the purpose of this program, this teaching.
It is not the same as our medical system.
We, you know, they say, "Oh, he's got a cure for cancer," or, "He's got a cure for ILS."
No, we are testing for in space, we don't need to come back to Earth every time
somebody is sick.
So, in the same way, we are trying to open the door into the Universal Community,
but you have to be taught the manners of it.
And, we are trying to teach them, and it's got a very simple manner,
and that is,
Peace.
When you don't, when you are at Peace, you don't make a wrong mistake,
thinking about damaging someone, or stealing something.
And, these Universal Communities are open,
the same as you write to run your reactors with your thoughts.
They have access to your thoughts before you even think about it,
through the same purity of their emotion.
So, we got to learn this very quickly, before we go to Space.
And, as long as I'm here, I make sure no craft is taken off,
unless the inhabitants or the people who are going, understand this principle.
Because, it's no use taking you out, when I know 100% you're going to kill yourself.
Learn the language of peace, think peaceful and think correct,
then you open the space of the Universe very easily.
Because, if you don't learn it, you can put the others in danger.
I was teaching the Knowledge Seekers,
we have a very stupid class system here,
we have no, no, what you call it, blackboards,
and this week we had our lessons by a very ugly place called,

by the Lake Lagada, which is one of the most beautiful parts of the world.
So, we were sitting in a cafe and learning, and I explained to them,
"The way you control mine, in the way the crafts will be built,
as you enter the way you get hygienic,
or you can kill the germs as you go through like a microwave tunnel,
we can take the part in the brain of the man which causes the wrong,
the aggression and war.
It's very, very easy,
because it's a special part of your brain which causes these things.
and we know how to reach it.
So, we solve the problem if you don't solve it yourself.
There is a lot to teach.
Let's get time to teach them actually arguing and fighting with all these arrogance,
of these world leaders who think they are the gods and they can control things.
They lost control.
The human race has won the game and, as I say,
"I don't feel sorry for what I've released,
I feel sorry for a man who suffered so long for nothing.
Thank you very much.
(MK) Mr Keshe I would like to say a big thank you from Amelia.
She's not able to speak but she is saying big things.
(MK) What's wrong with her? Has the cat eaten her tongue?
(RC) No she's having a repair in her house and the machines are working.
(inaudible)
Today is the beginning of the last end of the day of the old year and the new year.
Tonight we celebrate at 8.27 Tehran time, the Iranian New Year.
And we have a huge number of listeners in Tehran.
I know it because of through our servers.
I greet you, and I hope it will be a good New Year.
Good luck in the New Year.
Thank you very much.
Thank you.
See you next Thursday.
We will not open the forum till we see the downloads around the world.
We'll keep the servers running. We will not open the forum,
because there are too many comments we are watching in the background,
which are very nice, but will distract the whole thing from what it is.
So our webmasters in Tehran have locked the forum. I can access it.
If there is something important, we announce it,
but the server stays in that position on the forum,
till we are happy to move.
There is something I have to make an announcement,
a couple of announcements.
The Keshe Foundation will make, with all the members of the,
what do you call it, the Knowledge Seekers,
we will appear, or we will make a presentation on 21st, 22nd of June,

in Sardinia, in Italy.
It's the only presentation we'll give this year,
but it will be the first time the Knowledge Seekers as a whole will be present
and will talk in the lecture and subsequent programs.
Tuscany.
Tuscany, yeah.
We will announce that on the forum.
There is only about 700 seats or plus available,
and so that will be the situation at the moment.
because it's in June 21st, 22nd.
The program will be announced on the Foundation forum.
Thank you very much for your time.
Thank you. Thank you very much. Bye bye.
That completes the third Knowledge Seekers Workshop.
Many thanks to Mr Keshe and the Knowledge Seekers of the Spaceship Institute
and thanks to all of you for attending.

4th Knowledge Seekers Workshop March 27 2014

Auto transcription by Elias. This document needs to be proof read.
April 18, 2023

If from this workshop we can open another door into the world of science,
that schizophrenic is us, not them,
because we don't understand the process of the creation.
(Music)
This is the 4th Knowledge Seekers Workshop,
and we have Mehran Keshe and the Knowledge Seekers of the Spaceship Institute,
from Italy, and we have them on the line,
and let's get right into talking with them and finding out what's the latest
news and developments at the Spaceship Institute.
Hello, good morning to all. I'm Jorge, the Spanish Knowledge Seeker.
We are now in the table, all, except Yukako and Armen, that we hope will join us in a minute, like always.
We have advanced in the working of the reactor this week.

I can say now I'm building mine at least.
Hallelujah!
I have problems in the engineering lab because I don't have experience in this field, but I'm getting used to make the things for myself.
We have good teachers.
So now I'm on the run to get my own reactor.
This is double core with copper inside and plastic outside.
The good part of my reactor is that it has a window in it.
So I expect to see different things visually.
So my hope is that I can see the plasma and learn from my side.
This is the best part of my reactor.
So that's the news in my part.
I pass the other Knowledge Seekers to tell about the news in the process.
Thank you.
Hello, John speaking.
I have been working on my system.
I'm preparing in fact,
>> It seems that I have two cores possible and two different ways because of the broken system hub, I'll be able to make at least one of them work. So I still have to make the connections and for the tubing and so on. But normally I should be able to go on. I have pieces prepared to work and the pieces are in bronze I think. It's a copper alloy anyway for the end and I suppose you'll see soon pictures of what I have.
Thank you for that update, John.
Okay, we'll pass to the next.
Today, Marek speaking, together with Armen, we have prepared our reactor, double core reactor is almost ready to be run. So next week we supposed to fill it and begin the plasma opening process and learning opportunity as well for us.
And we will share everything with you, of course.
We plan to do online broadcasting from lab, so you can look forward to stay in touch with
us with our work. Yes, maybe it will be online all the time. We have to figure out the technical
steps now, so all you can watch our progress online.
And other reactors are also being in preparation phase, so we expect to have few reactors running
at the same time and experience the interaction between different plasmas of the reactors to get more insight into the action of plasma.
So you are welcome to have a look at our experiments.
We will publish all the details how to watch us on our Facebook Spaceship Institute channel.
And you can follow us.
I will pass the mic to the next Knowledge Seeker for the news from him.
So good morning and good evening or whatever to the audience.
First of all I would like to thank you to the group who is organizing these workshops, especially to Rick and Vincent and Ludmil and also other people in the background.
Thank you very much for organizing this, your big help and big support.

So as also other colleagues told, we are progressing with our work.
Last week we somehow we finished our nano material and GANS production and we supplied
this material to Yukako, who went to Japan and she's there.
And with all the material that she took with her.
So we are expecting the testings in different
organizations in Japan.
And we will try to publish these results also as soon as
possible to the public.
So this week, we were mostly working on our reactors.
And we were still extracting GANS material from our setup
with salt solution.
Today, the main topic will be--
we'll talk about health section of the technology.
If I remember correctly, there will
be talk about schizophrenic disease, which actually is not
disease.
It's normal condition.
of the person or normal condition of the brain.
And we will try to explain in a way how the brain works
that came into the condition of so-called schizophrenia.
Okay, that's all for starting from my side. I'll pass the mic to Ivan.
Thank you, Marco.
Hello, good morning, good evening. I'm Ivan de Nooytchieke from Belgium.
Nice to meet you.
Hello, hello everybody.
I was thinking that the main topic I would like
to mention today is safety.
Because as we are here, Mr. Keshe is almost constantly
warning us to take our precautions to like
with the nano materials, to wear gloves,
if the gloves are contaminated, to remove them and take new gloves that you don't take with, like, touch a door handle with contaminated gloves and then next touch a door handle without
gloves and then put your finger in your mouth, for instance, things like that. And also when
the reactors will be running, to keep at a safe distance. And I felt that, you know, you're experimenting at home and you have not Mr. Keshe standing next to you to tell you these things, that you still need to be aware of it because as Mr. Keshe put it, we are on the edge of science and when you think about 100 years ago Marie Curie and Pierre
Curie also discovering radioactivity, also being on the edge of science and dying because of it and just recently it was in the news that because of the 100th birthday that the diary of Marie Curie is still so radioactive that it cannot be touched and it will take another couple of thousand years I guess before it is safe.
And as Mr. Keshe was explaining, you know, the early scientists who were working with

radioactive material, had buckets of plutonium and other radioactive materials standing in the corridor, and they also died because of the radiation, simply because they were not aware of the dangers.
So that's just something I wanted to stress, because since you have not Mr Keshe standing next to you be aware of those dangers and keep yourself as safe as possible.
Thank you, I also agree that's a very important point so thank you for bringing that up.
You could ask to Ivan about his own reactor because it's very interesting and he's building
in a record time. We are very impressed. So maybe you can ask. And also medical things about today. All the things you can address your questions to Ivan, because he is the best in asking medical part.
Yeah, I think with all the medical questions it's a little early, maybe in a few months.
But concerning the reactor, I have not had the time to post a lot, but I took a lot of pictures and it's my intention in the next couple of days to write a word document with all the explanation what I did, how I did it and you know with all the pictures and then it can be put on the on the Facebook page. Now the what's different in my reactor when you compare it to the others is that Mr. Kishis gave me a pot container which surrounds
the motor, so I put the motor in that container, at Mr Keshe's suggestion, and so the reactor
itself which sits above the motor, or the double core which sits above the motor, is separated from the motor by a thick nylon plate, and so the container which is under the nylon plate which holds the motor, it also has a connection to vacuum it.
And once it's vacuumed it will be loaded with hydrogen and the research says that the reactor will be able to supply itself with hydrogen through the motor.
So there will only be, we isolate it as much as possible, but obviously the motor is not completely sealed from the reactor.
And so the reactor will be able to take the hydrogen
as it is needed, Mr. Keshe said.
So what I will do is, in the next couple of days,
write all that down, put all the photographs
that I took step by step as I assembled the reactor.
And then you will be able to see it.
I have to, I will be away next week just for five days actually.
So, but I guess I will be pretty much on par with the construction of the other reactors.
And so we can pretty much start it up together the week after that.
Any questions about that?
No, you can see the same content almost a year ago in my page.
Okay, well that is mostly what I had to tell you right now.
So I will pass the microphone to...
Before you pass the microphone...
Say yes again.
Yes, a very short question. Hydrogen is highly explosive, so if we encapsulate the motor into the container with the reactor, any spark or, you know,
electromagnetic discharge will probably cause an explosion, so we may want to think how we can avoid that.

Yeah, but it is vacuumed first, so there is no oxygen.
(RC) That's right.
Hydrogen is only explosive in the... when combined with Oxygen
from 4% up to 96% or something like that.
(MK) Okay, so we will wait for the pictures and the material.
(RC) You can make a Hydrogen light bulb for example,
by passing high voltage through it and actually ionizing the Hydrogen.
I was going to ask what kind of cores are you creating?
The core is also a plastic half sphere sitting on top and another metal we are planning to copper coated before nano coating it, a sphere sitting inside. The outer plastic half sphere is static, it's not moving, and the inner half sphere is rotating, magnetically coupled, so the motor is, on top of the motor are two magnets, and these two magnets pass the motion
through a plastic plate, there's no hole in that plastic plate, but there's another circular plastic plate on a ball bearing sitting on top of it, and so that which also contains two magnets, so that plastic plate would start to rotate together with the motor without a mechanical connection and that plastic plate is carrying the inner container, the metal container which should then be copper and nano coated.
Okay, sorry.
So, I'll just repeat.
I have a question.
Yeah.
Go ahead.
So you wrap the motor inside a container, a nylon container did you say?
Plastic anyway.
Plastic, I mean you put the motor inside a plastic container and then you vacuum it and then you put hydrogen in there, is that what you said earlier?
Yeah, that's right, the plastic container looks a little bit like a big yogurt pot but it's a lot sturdier. And then somehow the hydrogen can feed into the reactor when needed. Is that what you said? Yes, because in the middle is a thick nylon plate with a round hole in it. The pot with the motor is hanging underneath and then the half sphere reactor, which is also made out of plastic, is static. It's not moving, it's sitting on top. And so the motor is just sticking in that hole, sealed around it, but obviously through the shaft gases can pass and so since the upper part and the lower part containing the motor will be vacuumed there will be no loss of vacuum hopefully if there's no leak somewhere and so obviously I had to bring the electrical wires of the motor through the container and seal it properly.
There is a vacuum valve on the lower part
and obviously a vacuum valve on the upper part which
will be the difficult part to construct. Two concentric
feeding pipes, one for the inner core and one for the outer core.
Okay, thank you.
I'll pass the mic to Armen.
Hello, everybody.
OK.
We finished, actually, one reactor.

And today or tomorrow, we're going to close it down.
And actually, we are ready to load it up.
And next reactor that we are doing with Jorge,
It's a two-core reactor.
One core actually rotating, and the second core is stable.
We're going to send some pictures, actually,
to Rick that you can put in a workshop, that work we've done.
It's all glued inside nanomaterial,
nano-coated copper.
And actually, we are ready to load that one, too, next week.
So we're going to have eight reactors-- no, actually,
six reactors running.
We're going to have all the videos posted as soon
as possible.
Any questions?
Just a stupid one.
I just arrived.
I'm waking up.
I'm sorry, guys.
I went to bed at 2.30, so every day I'm going to bed at 2.30,
because it's impossible.
You guys sleep?
Really?
Partially, yeah.
With one eye.
One eye open, yeah.
One eye open.
OK, it's just a stupid question.
Did you ever try to solder the copper foil you create?
Solder?
Yeah, instead of using glue to solder it for the copper or whatever reactor is.
This is what we said from the beginning, nanomaterials cannot be soldered.
We have tried welding, we tried soldering, we have tried every possible way.
The only way nano-material coated like the wires can be joined is by literally twisting the material over each other.
So in the future it will be literally like a press job on top of each other without penetrating the layers.
So you cannot glue it, you cannot, we tried everything for the past 5 or 6 years,
impossible to do, to weld it, because it's a diamond structure and diamond
structures cannot be locked together or welded together. So, it's for the future
for us to find a way, except physical contact. The other thing which the
because we've done here is that we have, we are in the process of maybe next week
and the week after gradually building it up to run seven double core reactors
simultaneously on the floor of the lab. This has never been done before.
So in reality, we have 14 cores condition,
and then you can multiply that in what is happening,

plus multiply the gases, variation of 4 or 5 gases.
We will have a very good test platform
for how the Universe works with different materials.
We have 3 half moons, I have to tell you this,
that we will bring the reactor which was built for energy
as a center point, as a star,
or we will bring the Iranian space reactor as a star into the system.
Which means we will have systems which are both,
one of them is free floating in the air,
and any field can affect its movement and its position.
As I said to the Knowledge Seekers,
they will choose the position of the reactors in respect to each other.
So, we create, we have the capability and the ability
to replicate the full Solar System within the next two weeks in the lab.
We can create conditions, we know how Venus works,
how Venus works, rotates opposite direction,
We have the knowledge to create the same condition too.
So, most probably the Iranian reactor will become the star,
because we know its capabilities and it's worked before in that direction,
but the nuclear material now is non-nuclear, we test it.
We run one of the reactors hanging,
which is the Peace, what do you call it, World Peace Reactor, we call it.
The energy reactor, then we have two half-moon reactors,
which these are stable reactors for lift and motion.
They don't change polarity, so you get stability.
The Iranian space reactor is a half-moon combination,
so it works very similar because it's flown before, it's lifted before,
and it has reduced weight before, so we know the performance of the nuclear.
This time we're going to a non-nuclear condition.
Then we have the ceramic cores of John,
even though one of them is broken pot, it'll be very interesting if it flies.
And then we'll see how 14 combination, 4 or 5 gases will perform.
We will not show you only the good part, we'll show you the failure parts,
you will see the good and bad and the ugly together.
So, you will learn how you do your reactors,
but we will set up, most probably, exact condition as the Solar System.
Then we can understand fully how every planet in the Solar System works,
and how they condition themselves, and we go to the next step,
when we learn together.
(SK) Just to clarify myself,
my idea was the solder to be at the back of the plates,
so you are able to solder it for the core.
(MK) No, you cannot do, you cannot do, you cannot do.
There are two different materials.
If you solder to back of the core, you solder to that material,
not to the nano-material.

Nano-material is a separate layering.
If you touch the nano-material and your copper,
you will see what exactly I mean.
This doesn't work that way.
It does not, because you want the current and the voltage and the field
within the nano-layers, not in the material.
In the reactors, I think, okay, it's running.
we have an electrode placed in to understand the condition
and the current magnetic gravitational flow in the core.
These tests have been done years ago,
so we know how the potential of the system is.
There is no heat development, that's why we use plastic cores.
And the core which Ivan is using, we set it up deliberately.
This is a long hold feed system, which means the reserve tank is within the
structure itself.
As plasma or energy is released from the reactor through the cavity between the
motors which is very minute, the gas will seep through at the outer layer. And so
constant pressure is kept. This has been tested, we know the effectiveness of it,
we know exactly how it works.
I want to interrupt you just a second on what Ludmil said. There is some conductive
rubber, in other words rubber doped with silver or carbon, that could be put
within two nano layers and with a very gently mechanical force for not destroying...
(MK) We can't do that on a copper wire, we can't do that on a...
on a... what do you call it? (SK) Okay, thank you.
(MK) That kind of thing you cannot do.
This is a part of the development.
So, what is in... what we think it should be done,
or I think it should be in the long run to be done,
when we have the next group of the Knowledge Seekers
and we create a different environment,
is that we allow people around the world to come in and bring their reactors
to join the Universal System.
So, maybe in a year or two years we have 40, 50, 100 reactors,
anybody can come in and bring their reactors and see how it affects the positioning.
Because, through this system we understand the work of the galaxies and the Universe,
not by theoretical calculation.
So, people like Vince or the other people who build reactors around the world,
You can make like a month visit to the center, bring your reactors
and put it in the core and see what happens in the structure.
I'm looking at the site that such a thing can be done,
so it's a negotiation with the, what you call it,
officials and the people that we can do the process.
So, in next few months, all of you who build a reactor,
wants to perform with it or see how the Universe works,
you pay a visit to us and you bring your reactors
and you put it on the floor, we try to make arrangements that it can be done.

And you see how your reactor affects the condition
and we understand the work of the galaxies in the universe.
This is the next 6 to 12 months, this is very, actually is possible to be done.
On the aspects of the Copper Oxides, which is going to Tokyo,
with Yukoko and other things,
which we gave her four or five different options of testing.
We are not looking for success in every case.
We are looking mainly for the failures to find out where we failed
and where it doesn't work.
And if we doesn't...
If the whole test fails, there is no problem because
it means we haven't managed to produce a nanomaterial
the right way in the structure.
So, the whole thing is we look at the failures, not the successes.
because if we succeed, we already calculated it.
We got to look at where we failed, where the system did not work,
even in our lab with the reactors, and trying to find an answer for it.
But the whole position is, as I said to the Knowledge Seekers last week,
very interesting, very interesting position happened,
I explained it to you before,
these guys worked nearly two weeks, making all these copper wires,
and making all these orange cup containers and everything,
and I said to you, they connected everything
and the motor would not run, the light would not come up
and they walked out of the lab like a broken army,
one at a time in different ways.
As looking at it, it was a failure, it did not produce any energy.
But the next day, the result of that test, because things take time
and you work on a very, very small voltage current magnetic gravitational field,
The product of that failure to them was the material which is now in Fukushima
on Monday, on Saturday, Sunday getting tested.
So, what it looks to you as a failure or it doesn't work,
it seems that you haven't understood the condition.
So, do not expect you turn the motor and you see a result.
Find out what it does, bring something else so, as I said in our talks,
We will run two radios at the same time, within the structure of the solar system,
to see when the radios get cut off, and which direction they get cut off.
We will put, we have radiation detectors, we leave them all the time on,
that any radiation flow we can detect.
Even though we can't see it, but most probably,
we will see the results by cutting off the radio frequency.
The radio frequency cut off has been tested,
the way the drone was captured by the Iranians.
You cut the whole communication line with the expansion of the fields.
Then the object within it, with the radio, becomes part of your structure,
because all your field of your reactor is in control.

So we know these things and I think next few weeks will be very interesting time
for the knowledge seekers and the world to see a real working solar system,
which is double core, both gravitational and magnetic field in every system prevailing.
I think boys from NASA and boys from Iranian Space Agency
and boys from Russian Space Agency and the rest,
will be very interested in watching this,
because it's never been done.
And we have set out to lead the space technology
and we've done it with the materials,
now we show it with the space technology and reactors.
On the other hand, as I said, they were producing the material which went to,
what do you call it, to Fukushima with our colleague Yukoko.
I built the system last week from my experience,
which this system produces nothing but protein.
So, the system is a 48-set combination,
and all it does, it produces oxygen and protein.
So, more or less all the 48 cages, I don't know if you put the picture up.
There is one video from last week.
Yeah, with a lot more is getting done.
You can see layers of fat, protein continuously being produced on the water.
This is a specific way of setting up your wires.
It's a specific procedure to produce protein and in this system which I set up,
we get the light, LED lights still shining, very little, very little.
And this is how protein is produced in the body
with a very little amount of energy conversion from gas to GANS,
which is the heat temperature of the body.
We show that heat temperature as a light in the LED.
And the material which is a fat, and we have picked up some of it,
and on Monday is going to a lab which is going to test
to explain to us what this protein is made of.
It's a continuous production, we take it off, we see it coming back on.
We saw fat production in the first setup on one or two containers.
In the boxes of orange and yellow color, which is copper oxide and CO2 was created.
We have seen the, what you call it, some amount of fat too.
But in the first setup, we have start seeing a creation of blood.
This happens because one of the, two or three of the electrodes
have contained iron in the connection line,
where they use what they call the connectors, which has iron in it.
So iron has interacted with the fat in that container
with a low amount of energy, it's become exactly like blood.
It's red spots, we will take that to the lab for analysis.
So in a way we have shown how blood can be produced in a very normal way,
in a natural way, if it's correct, and if it's not, we go further,
because I talked to Marco about a week, two weeks ago,
to put an iron pin in where the fat is,
to see how iron converts the fat and connection with the iron into the blood.

And by coincidence, we've seen it because there was a same process
that we now got few splashes of red material,
which is like a blood, into containers.
These all be posted by Marco, we call it the "spy cameraman",
he's always everywhere, taking pictures and we're doing.
the... what you call... the seed process testing,
we will start next week or so.
We have enough facilities here to start using the GANS we have
as a fertilizers to start the seeding of the corn and wheat
here on the premises and we show it on a daily basis,
I presume they will post it for you.
We have a huge knowledge in the growth of these things,
which some of our colleagues at Keshe Foundation,
over the past 2-3 years, he's done an immaculate job,
measuring the time of the soaking and the rest.
So, the food production will be, what you call it,
the agriculture will come in now that we have the materials running.
And the rest we will see how it comes and how we will go ahead with the whole situation.
Any questions?
I have a question, yes, I have a question.
The reactors that you place in your lab, is it, you place them on the ground,
is it going to float up?
I think we're going to go on the floor because if there is anything wrong,
fall off the table and damage. So we will have one hanging and maybe we place
the others in different heights and positions. We try to keep T120 configuration
for flight in mind. Three reactors have to stay in that position. That we can,
we call it, we can achieve on the flight plate, which we have, a flight condition.
So, we just got to see how far we go. Don't forget at the moment we are working
with non-nuclear. This non-nuclear is an unknown territory. We have had a success
rate reduction and production of energy on the system which was brought in,
we showed in 21st of April. That system has inherent problems of holding vacuum.
We understand it because the manufacturers did a total disaster. As they couldn't
keep it sealed, they turned the reactor upside down. So where it was supposed to
be for feeding, now it's gone to the bottom of the system. So it has created
problems which was unforeseen in design, but it's the only way they could keep the
vacuum in the system, so it has become a problematic reactor, where we realized
later on what the guy has done, he's turned the whole system 180 degrees, and it
was not set up to function this way, but we have to live with it.
That's the Italian company, right, you're talking about?
(MK) This is Belgium, this was manufactured in Belgium.
(RC) Oh, oh, okay, not the Italian one. So, are you expecting the...
(MK) The Italian one will not... Carry on Mr. Chou.
(RC) Sorry?
(MK) Carry on.
(RC) Oh, are you expecting the reactors, once you activate them,

are you expecting them to levitate at all, or are they going to stay where they are?
We don't levitate, levitate is a magnetic field, we position.
Levitation has a limit, that's why they can't fly.
So what we do, you create magrav positioning,
so gravitational magnetic position decides.
We've done this test about 7-8 years ago in Tehran.
The reactor which Marak and Armen are using, this system has flown in combination with the Iranian flight system. I have caught it quite a few times when it flies off.
So, it's not an unknown condition. The system they are using now, we have boxed it.
but it means it will not be able to take off as before,
because we used to catch it like a rugby ball.
You throw it and you try to catch it.
We used to change configuration, small configuration in one core,
and we used to create a different gravitational magnetic field
in respect to the mother, which is the space reactor we have,
and it used to fly off.
Now, with the one which they are using, we have put it between two plates.
So, if it decides to move, it has to move as totality, the whole frame.
We have a unit which Marco has brought with himself,
that unit is a seating unit,
which means if we can get it moving, you can sit on it.
The unit which is a star system, the mother,
if we use it on the ladder, we can get two people on it when it lifts.
The rest are experimental, you cannot do much with it,
There is no framework around it to get on it.
The one which Jorge is using, this is what I call a naughty guy in the box.
This is the devil we don't know.
because, there is a background noise, you can turn it up, you can hear the question. This, the one which Hokey is using, it's uncontrollable, it's the in the pack, because it can fly off its center and come back to its center. So, one minute it can fly in the positive direction clockwise and the next minute it goes off center and it becomes anti-clockwise. Or it decides to stop, because we've seen it, we know the character. So, the one which will run One is the joker in the pack and as it changes it can affect the other fields and positioning of the reactors in this setting as well. But we have to know it, this was necessary to be done that we can understand what happens if conditions beyond control are created beyond our control. So this reactor is not expected to fly everybody expects to affect the operation of the others and we observe the operation of the others and how it will affect the operation of the flight system.
You go into a magnetic field zone, higher, lower, a small amount of fields as a package or as matter, this, the joker in the pack will show us a lot of things.
But we have to watch it because I worked with it, I know its character.
So we'll see how it will respond. The clay one is our main concern from John's because it can shatter to pieces so we are putting a lot of what I call protection around it but that will be totally isolated because we are putting it literally in a faraday cage with holes we can see it because we have no choice because if the

ceramics at high speed shatter, they can cause problems.
So that is another thing we learn, isolation in respect and what is above or
below the metallic cage, magnetic gravitational field strength.
But we'll see, that is what you call it, unknown.
Next question.
Yes, Mr Keshe, this is Lucian. I have a few questions regarding the videos posted by the Knowledge Seekers
in the last week, which were very good.
So, what I've observed is that you have two kind of cells.
In one of them, you have both electrodes of copper, that means regular copper and nano-coated copper,
and in the electricity production unit, one electrode is copper, the other one is iron.
So the question will be based on different concentrations.
It's not iron, it's zinc.
It's zinc plate.
I think it's zinc, isn't it?
Yeah, it's zinc.
OK, it's zinc.
So another material.
It was looking like iron.
So my question would be, based on what
the material for the electrodes you are choosing,
and based on the concentration of the salt into the water,
what parameters will be influenced?
I mean, fields, gravitation?
The parameters, there are a lot of things, it depends on the distance between the two.
In something which you will see and if you look very closely, in a normal battery,
if the two plates or north and south or positive and negative touch each other,
you create mayhem in your plate. You finish your battery.
But with this system you see if they show close up,
the two pieces touch each other, it doesn't matter if they touch,
the one plate touches the wires or not, it doesn't make any difference.
Because you have a nano-coated diamond structure.
So, it's not a electron transfer,
it's an energy transfer gravitational magnetic field.
Then, you will see, because these are the tests I've done
as part of the research. These guys are very, very, what do you call it, what I call hand in pocket, they are scared of touching things. Sooner or later they are going to change their behavior. I have pulled and pushed and brought the two together.
You separate them, you extend them, you do all sorts of things and you see
different conditions, different performance from each box.
and this is something which has got the lead.
You change the position of the electrode.
Pardon?
(SC) So go ahead, finish please.
(MK) Your positioning of the electrodes in respect to each other

gives a different environment, different production.
Your salt content, you can mix salt together,
you can be done a mixture of copper and aluminium wires
together in one container plus a third electrode, you get different performance
but it's too early to show it with the knowledge seekers.
You can put four different material electrodes in one container
and then you see the performance.
These are the things we, they have to understand and feel comfortable
that we go to the next steps.
That's part of this, that's a part of the knowledge seekers.
The next step is not two electrodes, it's four or six electrodes of different materials.
in three or four combination.
Then you will see how you produce totality,
you can produce literally the fat, the blood and everything else in one container,
that you start life structure.
This is what is the next teachings coming on.
Where you create a material like in mine, which only produces fat.
At the same time, because you're converting CO2 into Oxygen,
It shows what happened in our planet, where it was saturated with CO2,
and in CO2 conversion of the GANS to matter, the oxygen was released.
And that's how we became more oxygen based planet.
It's all through the conversion of the GANS system,
with the energy which is released to heat up,
that's what we have the heating of the planet, you're getting warmer.
and you understand the whole process of the creation.
So, if you put another piece which is metal coated, we have a nail,
and make it as a third electron, and we add another material,
which brings organpro copper or zinc,
then you will understand how
neuro system and the brain structure starts working.
This is what we are always explaining this week,
about the structure of the brain to the knowledge seekers.
In the brain we do not see tissues, we see different densities,
because in the lab, now that they start extracting the CO2
from the containers of Copper Oxide, you see them how they process,
how they sink, how they position themselves as GANS, not as matter.
And so, they can see, we can take the material continuously out,
you get different densities, and it's exactly how the brain works,
the density and orientation of the dense, of the GANS.
Then you get different layers, like the emotional part,
the physical part of the brain, so we are in that stage now,
on the theoretical teaching basis.
So, I have shown them the structure of the brain, and how it is,
and the fallacy that only we use 5 or 10% of the brain is totally rubbish.
The brain totally use 100% all the time by all its parts.
But those parts are not visible, but we don't understand it,

so we explain that more and more.
And this brings us to why we...
I've asked Rick to put this workshop today on the schizophrenic,
the work of the brain, because now they start seeing the work of the GANS materials.
They should be able to understand, slowly, the work of the brain,
without any blood vessels, and how the system gains its energy, and releases energy.
One of my targets is, that one of the reactors which is going to be run,
it'll be filled with total GANS liquid.
Which one I know, but I've got to make sure it's safe to do it.
So, we will run a liquid GANS core very soon, in one of the reactors.
And we will see what effect we'll have,
that'll be the operation of the center brain,
compared to the rest, to understand the working of the brain
within the structure of one of the reactors.
So, this is part of step by step, expanding the knowledge.
And that's why I said this workshop has to be,
or I would like it to be, about schizophrenic.
The point about the schizophrenic is that I have done,
schizophrenic is one of the researches I've done more than anything else.
It goes back with me to 1980, 81.
So, when I think and I talk about the schizophrenic,
I do not talk as a point of view of the present knowledge
and medical applications of the schizophrenic and what they do with it.
The way schizophrenic is handled is totally wrong.
A person with a schizophrenic, we have to understand what is a schizophrenic.
Man has not understood his own structure.
And because of that, what he doesn't understand, he blames others for.
And the schizophrenic is one of them.
We are very much as human being, a matter-based people.
We always, if we see it, we believe it.
And it's the same with the Keshe Foundation.
They say, "Oh, when you show it, we believe you, otherwise you are a fake."
This is the same situation with the schizophrenic.
In the process of the birth, we see different things.
One of the initial things in the process of birth,
is if you're going to be a single, or you're going to twin, or duplicate,
or four or five of us in the womb of the mother.
Then it comes the choice of the sexuality, man or female or male.
Then it comes the birth and at the point of birth,
if one is born, say okay, is born, is a boy or is a girl.
If it's two of them, we have two physical things in our hands,
so there are twins or there are triplicates.
One is boy, one is girl.
And in some cases, we have what's called "Siamese twins",
where it could be one boy, one girl, or two girls, or two boys,
having one body with two heads.

We know the twins which are now,
they are old girls now, they are in their 30s, 40s I think.
And, or we see them connected in half body,
with two heads, with one heart or whatever.
And, we are used to physicality seeing.
The point which the world of science have not understood,
is the next step in the world of creation.
One body, what? Two brains operating within the structure of the brain.
In fact, the schizophrenic is twinity, twin,
two individuals using one brain and one body.
This is why when the doctors measure electric currents in the brain
of the schizophrenic or they do MRI,
they say, "When he's in the schizophrenic,
different part of the brain works or different things,
they see the different locations moving,
and they try to give chemicals to subside it.
These doctors never understood that this is a working of another person,
another entity in the same structure of the body.
Because they can't see it physically, they consider it as an illness.
So, in fact, schizophrenia is not a disease of a person,
is the lack of understanding of the observer,
of the reality of the situation.
So, in fact, with the schizophrenic, you have a Siamese twin inside,
using one body and two parts of the brain.
The whole structure of the behavior of schizophrenic,
and their violence, and all their talking to themselves,
this is the exact understanding, the process of the structure of,
if you have twins, or you have two people.
At the beginning of birth, the one who has born first,
like when you're twins, you have one who comes out,
and it's called the oldest, and he always plays the oldest,
and the youngest one plays the young one, the little one,
even though there's a few minutes separation between them.
In twin, in schizophrenic, it's the same situation.
The one who we see first, at birth,
that becomes the character we know.
The second character lives within as a subordinate,
sometimes it shows itself but we don't see it.
So, when it comes to puberty and the growth
and up to age of puberty, there is no peer section.
So, even the psychologists have done studies,
children are not aware of color, they are not aware of sex,
they are not aware of sexual, you know, who's boy or a girl,
They know what it is.
They don't even understand who's black and white.
When you become into the puberty,

hierarchy comes into position.
Who's who and what is the position?
And this is the time that the second character
wants to be known as, "Well, now I exist."
So you start seeing a behavior like a schizophrenic,
you know, talking to themselves.
They're not talking to themselves.
They are talking to the other half who shares the same body.
If you've seen Siamese twin with two heads,
they talk to each other, they fight each other.
Go on the internet, look at their videos.
They have one body and they share the body.
There are two girls, they share, one likes a short and fat man
and one likes a blonde and blue eyes and very thin.
And they've come to share their body.
Watch the video, there's two or three of them on the internet.
I've been following this for years because they're all connected.
So, the guy who is schizophrenic, you say, is talking to himself.
He's not talking to himself, he's talking to the twin.
It's us which is not aware of the second person that calls him, "He's crazy."
Craziness belongs to us, not to them.
If you gain the trust of the schizophrenic,
and allow him to introduce the second character to you,
he will share the jokes, and you know, you allow the second person,
They have a different voice, they have different tastes, they have different understanding of life.
One likes twins, as you see, twins born together, one likes rugby and the other one hates rugby and only plays chess.
It's the same characteristics, they share a body, but their interest is totally different.
So, you'll be amazed in my studies, I've seen that even the sight division is is shared. One uses one eye and one uses another part of the eye or they share the vision distraction. Which means one is watching, let's say, somebody in the bus sitting down and picking their nose and the other one is rubbing the other one's pocket or tickling the other one and one is watching the one who is picking his nose and the other one is watching the one who is picking. So he says, "Come and have a look, the guy is picking his nose, look how he is doing it." So they look and they laugh and say the guy is crazy. In fact, it's a communication between two people.
Doctors haven't understood this and they use chemicals to subside to kill another character.
And we've seen the process of why schizophrenics end up doing, in mental hospitals, end up committing crime because people don't understand the existence of the second, third or the fourth character in the body. It's sort of twins, it's not a character, it's reality. So, they laugh, they share jokes with each other, they are each other's partners. That's why schizophrenics become secluded people. First of all, it's like

in the society we don't accept gays or lesbians and they become clusters to themselves and the same thing happens with the schizophrenic. People don't understand it, now they are two twins, they have near enough, they share the body, so they share their interests and they find common things to do.
They fall out with each other, they have arguments with each other, where one wants to eat something, the other one doesn't want to eat.
They become very selective in eating because they eat what the digestion which they share can accept both of them.
One doesn't like sweet, one doesn't like sour.
So they try to accommodate that they are both happy with it.
and you see more and more in the older age, selectiveness become part of their life.
And one of the characteristics of schizophrenic is you see them nowadays, they consume huge amount of sugar and cola, because brain needs a lot of energy to run two body.
It's like two people running a marathon.
You drink like two people.
So, the brain energy consumption goes high because now there are two people using energy to give orders, but in their process they have found out how, who is going to be the boss of the body, for when and what.
If they come to an arrangement and the people around understand, then you find you have beautiful, gorgeous characters with a lot of potentials.
We see schizophrenics committing crimes.
The reason being, it can be fully explained.
The one who is in charge or has been known to us, let's say John, we know John and John, this is what John has done from childhood.
We have never seen Susan, who is the twin again, but it's got a girl's behavior, part of the brain.
But they share a body of a boy.
So, Susan wants to do something, but John doesn't want to do.
Susan wants to be loved by the father and the mother, the way they love John.
And the parents are used to John, not Susan.
After puberty, that's why we see a lot of problem in teenage years and in after 18, 20, 25, problems with the schizophrenic.
Because each one wants to run his sexuality regarding what they like, friendship, the same.
And the one who charges body, who's always been in the front, we know as John, will not allow it, because he's taken more or less over the charge of the body, and he has control.
But, the second character like it, and the second child in the house, wants to be loved the same, looked after the same.
So, what does he do?
When John is not in control, Suzy takes over and he wants to sell to the mom, "I'm here, I exist too."
But, the parents don't see that because they see one body, that Susan has no meaning to it.

So, what does Susan do?
We see it historically, schizophrenic attack their parents,
the sisters, the brothers, they kill them, they maim them.
Because, they want, it's like getting anger that I want to be recognized too,
and this doesn't happen, so they attack the person.
"Why, why don't you accept me? I'm the same."
And that's why we see attacks, fierce attacks,
on the immediate family and carers by the schizophrenic.
Because nobody respected Susan.
Susan now shows her behavior with the tantrum,
which usually ends up with the death of the father, mother or brother, or critical damages.
And then, when John takes over, when John takes over the body, realizes what's happened,
and in his character, he's a gentle guy, he's always been loved and cared by the parents,
he sees the damage, what does he do?
He wants to end this mayhem, that this thing doesn't repeat itself.
we see schizophrenic, a large number of them, after doing such a crime,
they commit suicide, they kill themselves.
Because, us as sick people, never realized the perfection of God in humanity.
We have two people.
If you see a schizophrenic and become friend and tell them,
"Okay, introduce me to Susan."
And when you're talking to them, you ask, "Who's talking? Is it John or is it Susan?"
Then you find out you have the best friends amongst you.
There is no need for all these high chemicals to suppress the brain activities
and make them numb. All you do, you numb the physicality,
not the organization and operation of the brain.
So, schizophrenia is not a disease, it's the lack of the knowledge of the observer.
And, as they say, one of the most famous schizophrenics works within the White House of the United States with 8, 9 characters.
He's in his 90's.
Because people appreciate the knowledge they have.
They become specialized in the things they do.
I have done tests. You can give a newspaper to a schizophrenic with two characters
and in talking to them you know one likes sport and one likes finance.
And you give them the newspaper and you ask John who likes finance,
what do you think about it? He tells you everything which is about finance in that newspaper.
You ask Susan about the sports, she loves the sports, she tells you everything.
If you listen to them, even the voice is different.
Susan tries to speak more with the voice of a female, John speaks with a man.
They say, "Oh, some of the schizophrenics are gay."
But in fact, the ones who are not called gay,
is the ones usually with a twin, one male, one female.
the female wants to have the same sensation that John has.
I have studied the schizophrenic in detail.

The guys, those people who are thousands of them kept in hospitals
and kept under medical condition of sedation of body.
You doctors sit and ask, "Okay, we made a mistake.
We want to learn something new."
Who is who and explain yourself.
Maybe we have to make a placard.
not marking, but celebrating the life of two people.
The way we see two twins dressed up the same, and we say they are twins,
maybe we have to put a placard or something on these people,
or dress them in a way that it says they are twins,
maybe half boys, half girls clothing, but not as a clown,
but in a way that they are identified, we have a gorgeous character between us.
Then we find out that schizophrenic is not a disease.
Schizophrenic is a lack of understanding of the man who doesn't understand the creation.
So, let's see, in Keshe Foundation, in our medicals,
we accept all the schizophrenic you can offer us.
We open our doors, we appreciate and respect people who have brothers,
sisters, children who be diagnosed as schizophrenic.
Bring them to us and we give you back the most gorgeous characters,
without medication, just by understanding and respecting the creation.
Understanding that it's our lack of knowledge, not an illness.
This is exactly the same as always go,
they hung and they killed the guy who said the Earth was round
and it was in the center of the universe.
This is the same ignorance.
We have not understood because we wait to see the physicality.
Now that we have opened the space, these kind of characters,
these kind of mental and physical interaction will be very normal.
What are we going to say?
Half of the, what do you call it, the creation in the universe is schizophrenic?
Or we say we are stupid, we never understood the system?
This is part of the process of opening the space.
We should not look for physicality, we should understand the condition and the
situation and what is there. So, if you are listening to us, if you are a doctor,
if you are a family with a schizophrenic, we respect you and welcome you.
We teach you how to bring these brilliant people into the society, respected as
people, not as sick people. The violence, the talking they do, it can be explained.
It doesn't need medical. When we don't understand, we give things to control,
then we think we control, but we actually do a lot of damage. If the parents are
taught to understand, they have twins, but in the body, and they can respect it,
You can ask John, "Can you fix the electric cable in the house because he likes
electricity?"
And, "Suzanne, can you make your food because you like to cook?"
They do a perfect job.
You don't have a... you have a single body,
but with a lot of talents which you never appreciated it.

And, this is why I brought this subject.
This is one of the subjects I've researched very deeply over years and years,
and I don't even see any reason to write a paper.
With the ILS I wrote a paper for it.
With the Schizophrenic, how can you write a paper about the twins?
How can you write somebody, they are twins and you dress them up the same way?
Find out as a parent, as a doctor,
what is the name?
The first thing you do, you have to gain their trust,
that we don't laugh, there is no joke,
We understand it's two of you.
What's the name of the other one?
When they introduce the other one, you both, you gain the trust.
You have access into the knowledge of God.
Then they can tell you, because once it's the operation of the brain of the other one,
and what is going wrong, he tells you he's got temperature, he's got a headache.
Where he touched the body and there is no heat.
He says, "Oh, he's asleep."
He is tired.
Where the body is awake and is working.
Then you can understand while one is asleep, you can talk to them,
they explain the position, what they see.
Or both of them, you ask them, "Who's speaking?"
You have to introduce yourself, "Whoever speaks that I know,
I'm dealing with John or I'm dealing with Susan."
With Susan you speak about making skirts and knitting,
and with John you speak about football and rugby and the rest.
And Susan sits and listens because she knows she'll get her turn.
You won't get violence, you get respect, and this is how it's done.
Maybe from this workshop we can open another door into the world of science,
that a schizophrenic is us, not them.
Because we don't understand the process of the creation.
We become too materialistic, we become too physical to have,
And, as I said, we saw it here in our own lab.
They couldn't see energy, they couldn't see a motor running,
it was disappointment, they were like a bunch of schizophrenic running around.
One praying over it, the other one hoping for it,
the other one trying to fiddle things.
They never understood that the process is going on.
It's the same with the schizophrenic.
We have to understand who they are,
respect them, and bring the beauty of their work out.
Then we see there'll be hospital without any schizophrenic.
Because actually we should be in there and they should be outside.
As long as they can say who is doing what.
So, any questions?

(RC) I have a question Mr Keshe.
(MK) Yes.
(RC) In that regards, would you say that a schizophrenic person
has a better understanding of the connection to its own Soul?
(MK) Very much so.
Very much so.
And they carry two Souls, not one, like the twins, they are two individuals.
(RC) There was a question in the chat,
whether there might be multiple, rather than just the dual.
(MK) Yes, yes, there is. The one in White House is nine characters.
One is gay, one is, what do you call it, economist.
He's a... according to what is coming out from White House past years,
he's been advisor to six presidents up to now.
Because, it's like having a person who doesn't need to go outside,
it's always everybody's own with their own expertise.
Because they, as I said, they read... It's true, it's not laughing.
I've spent over 30 years of researching into this matter.
And the reality is that we don't understand it.
What we don't understand, we call it a disease.
And we put a name to it.
And schizophrenia is not an illness.
It's a twin system which we never wanted to acknowledge.
Because we had to make the effort to know who's who.
And if there are any families, anybody who listens or is within the family
with a schizophrenic or doctors who handle a schizophrenic,
get in touch with Keshe Foundation on a, what do you call it,
on our, even on the ILS for, what do you call it, for @KesheFoundation
ALSATKF@gmail.com
You don't need to spend a single penny.
We advise you, we talk to you, we talk to your son or your child,
and if they are willing, and it can be done, you got to gain the trust,
then you find out, you go out with a full family when you go out with them.
This is our lack of understanding and I can teach you in a very, very simple way.
You find out you don't need to lock the schizophrenic out,
you don't need to give them chemicals, we see the...
The stupid thing is they make a MRI, they make things, they make electrode connections
and they say, "You see this side is working when it's on the schizophrenia."
Yes, of course, it's another brain, it's another piece working because it's another entity.
And then they give them chemicals to suppress it.
and they give them medical to suppress violence.
You don't, you suppress the violence of the one you've ignored,
so he wants to show himself.
When you appreciate it, when you respect it, when you acknowledge it,
there is no violence.
It's like very much, you put a cat in a corner,
and then you say, "Why does the cat in the corner attacks?"

Because, you cornered it.
So, it has to show itself, find a way out of it.
And this is the problem.
You have triplicates, the maximum I've seen is more or less three.
But two is very common.
And they share jokes with you.
You sit with them, you talk to them, you say, "What's the joke?"
"No, no, no, nothing, nothing."
"No." And then you say, "Okay, John, what's the joke?"
"Oh, it's nothing, nothing."
And then you ask Susan, "Susan, what's the joke? Why? What's going on?"
"Oh." And then he tells you, "Have you seen him?"
He just picked his nose.
It says, you find out, it's very strange and then you see just little things
because they become so close to each other, nobody understands them.
That's why you see schizophrenics laugh and talk to themselves.
You say the guy is crazy, he's not talking to himself, he's talking to Susan.
Or Susan is telling a joke to John.
(RC) Oh, sorry. (MK) Hello?
Sorry, I had a... there was a question that came up in the chat here,
regarding the multiple personalities that can be created through
... mind control and through fracturing the psyche.
And the person is asking what your... what your thoughts are about this?
And whether more Souls enter the mind?
No, we talk about the schizophrenic, those are the things which is added to.
Those are totally, to me, irrelevant.
In respect to schizophrenic, we are talking about individuals with a full identity.
And people who have two characters is different than the schizophrenic.
The people who are split, split character is nothing to do with the schizophrenic.
Schizophrenic is a specific twin condition or triplicate condition.
And they are brilliant people.
(RC) There was another comment in the chat that,
"What about people that have a sports, you know,
they have an aspect of themselves that are into sports,
and another aspect that's into, you know, art and so on,
different aspects of someone's self is a totally different thing
than what you're talking about with the schizophrenia."
That is an interest, that is an interest, that's not a schizophrenic.
A schizophrenic has a specific behavior.
A specific behavior and they have a specific conduct.
You see them talking to themselves.
This is one of the first signs.
You see them the first time, you see them talking to each other, it's just like a wink,
they wink at each other, "Come on, let's go",
because they don't want to show there is somebody else.
Because, even in their physicality of trinity,

they don't realize that the other one doesn't see the body,
because they think the other one sees the body.
The first 3 or 4 or 5 years after puberty is the most confusing time for the body.
Because the body is used to control by the first born, we call it,
and the second born is trying to insert its presence.
I exist too.
And this is a huge problem for the person at that age, at that stage.
One of the first signs you see with the schizophrenic
is twinkling of the eye and they shake their head.
Or they just go shaking their head to the side,
or they just say, "Come on!"
You hear them laughing, out of nowhere you see like a grin.
They are aware that they are telling a joke or seen something funny,
or and nobody is supposed to see it, or they say a joke to each other,
they laugh between themselves.
But they are aware if they laugh, people will tell they are crazy.
So they try to control it.
Grinning, small features, gestures, is the first sign of schizophrenia.
Then you have to understand, if it goes into the step of,
you hear them talking to themselves, they lock themselves up in the room,
because now it's two of them, they don't need anybody else.
They are complete. So you find a lot of schizophrenics lock themselves in the house,
close the curtains. First of all when they are there, there is nobody else to laugh at them.
They are isolated and they close the curtain and they live a very secluded life.
The seclusion comes because the society cannot appreciate the existence of two people.
And in so many ways it's like two lovers, they have everything they want between each other.
They talk to each other, they read, they watch, they drink.
They come out, they do a small shopping and go back and close the curtains.
And their behavior is then what we do, we call the police,
"Oh, he's locked himself up in his room" and they take him to a mental hospital,
they put him on sectioning, they're on the 29 days or 60 days,
We're going to observe him.
These stupid people, you're going to observe yourselves.
Because you never understood, and then the whole process starts.
And, why should a healthy person be imprisoned?
These institutions are prisons for a healthy man.
So, you see violence behavior, you see the... and what they do?
They just give them huge, huge mind affecting tranquilizers.
They numb the body, but they don't stop the brain working in two ways.
I wish if they give the same injection to the doctors
who don't understand it, how they feel.
This is the process.
If this, what I was thinking this morning is that,
I give a lot of these talks, try to write it down,
make it into, what you call it, transcripts, and publish it.

because then it's there to be read, these videos will disappear or whatever.
Anybody who can transcribe, to write these,
instead of writing it at the bottom of the page,
just do it as a document and put it on the foundation, we let people read it.
Because I don't have time to write anymore, especially with the Knowledge Seekers.
These workshops has to become part of the publication
and they can be published as a package.
This is what we need to do.
If you have anybody, if you know anybody, I'm prepared to go and we can do...
find one or two families or people who've been marked as a schizophrenic.
We interview them beforehand and then we put them on one of the workshops,
like, live, like now.
And then you understand.
You free a man from the prison which you've made for the man.
But us, as what we call ourselves, 'normals', which we are the sick people,
we imprison two people in one body.
Because then we have to make an effort to know which one is which,
we prefer to call it, "Are them sick than us?"
And then we damage two people, we damage two souls.
And then we call them, "They're sick."
There should be no one in any institute in the world
with a disease called schizophrenic.
These are geniuses which we lock up,
because of our own stupidity, of lack of understanding.
And if we can correct this mistake, which we've done over centuries,
become our habit,
then in Space we see the same kind of things.
We recognize the beauty, not mark it as a kind of illness,
a disease or whatever.
We have to understand the process and the reason.
Not just be so materialistic and do what we like, we've done up to now.
Next question.
(JB) Is there a specific condition that creates the schizophrenia?
Like in the womb, or is it genetic? (MK) No, is it a specific...
Yes, yes, what happened, the physical part does not grow.
The physical part does not grow or the brain creates,
prefers to create one body for operation of the two.
It's the same condition why you have twins.
But the twinity happens in the emotional part of the brain,
not in the physical part of the brain.
This is part of the knowledge which the world of medicine
has never understood and is totally ignorant to it.
You have an emotional part of the brain and you have a physical part.
When the emotional and physical part are split together,
you will get the twins or a single person, if it stays one.
When the emotional part splits but the physical part doesn't follow,

Then you get this condition.
It's the same situation with the ILS.
When the emotional part wishes to end their life
because of failures of the past, knowing the horrible time of the past,
of the similar situation,
the physical part switches off, ends up with death.
This is the same process, this is what man has not understood.
Schizophrenic, what we call schizophrenic,
should be the beautiful twins, I call them.
Because the emotional part has split,
but the physical part in the process of birth has not,
the, what you call it, divided.
But, the arrangement has been made, or the connection has been made,
like Siamese twin, to share the physical part.
This is the difference.
We will come across these kind of condition in different form and shape,
in the space now that we have opened the space to the people.
You will see 20 bodies with one decision making,
because it's worth to have 20 extensions, because you have 40 arms more.
You don't need the physicality, this is the physicality,
it's a man's problem, it's this planet's problem.
So, there is no difference with the twin, with the Siamese twin,
or what we call these beautiful twins.
The beautiful tools are absolutely gorgeous if you get to know them.
You can say to one, "Okay, we go out to a disco, you dance with a girl."
The next day you say, "Okay, we go out for a rugby
and you can play a beautiful rugby game."
But they know, "Tonight is my turn, I go to a disco as a girl."
And the other one knows, "Tomorrow is my rugby time."
It's just having children and respecting it.
Then you understand, then you understand you have no violence,
you appreciate each one has a time.
Today you like, I... Susan likes, let's say, Chinese.
And John, to show that he's different, even he loves Chinese, says, "I like Indian."
So, you say, "Susan, today we go to Chinese because you like it."
And John, you have to compromise.
And then tomorrow you go to Indian, he says, "John, we go to Indian
Because you like hot food, because they want to be different, huh?
Twins don't like always to be dressed the same as,
even though the parents do it with them.
So, you go to India, and the Susan comes,
because she knows she had the Chinese time yesterday.
It's a lot of work initially, but afterwards it's so beautiful.
They come to you and say, "Oh, Susan, I want to go shopping, whatever."
I know a schizophrenic who make boys, but they wear make-ups
and they wear girls clothing because the other half is a girl in the house.

Because both are satisfied, but outside they keep the image.
I have studied this thoroughly and understand fully,
that's why with ILS and the mental diseases we understand.
Because we have gone into the process of research in the depth as it is,
not as what we want it to be.
So, please if you have people with schizophrenia, you have people with brothers,
sisters, children who have been diagnosed, just contact the Keshe Foundation,
through the same channel, ILS80 Keshe Foundation, I will talk to you,
there is no need for medication, and it's totally free to free these people
out of the prison they live in.
And then you have a fantastic life.
And the only thing is, the biggest problem is,
when you go out, when you take them to a party,
when you introduce them to your friend, you tell them, "They are twins."
You have to know, at the beginning it's funny to people, they don't accept it.
But, when they speak to John about rugby,
and then they speak to Susan about fashion,
then they realize what a beautiful things are them.
They become celebrities.
Because, I can't do it, but they can do it.
Because Susan can talk to the wife, and John can talk to the husband.
(RC) ... Mr Keshe? (MK) Yes.
(RC) We have a question here that is interesting,
that ... I believe is interesting at this time.
It's ... how...
(JB) Where is it showing it?
(RC) How did schizophrenia originate in human evolution?
Nothing is part of the division of cells.
It's a normal process.
It doesn't appear.
It's a natural process.
It's a natural process.
Right back to the first caveman or whatever, basically.
Whatever, it was there.
The way it became twins, we became what are called beautiful twins.
It's the same thing, it's us which could not recognize the reality, the existence.
This is our fault because as I said we are too materialistic, we are too physical.
We want to see, we want to see the light going, otherwise the reactor is doing nothing
and the next day and the next week the reactor which was totally disappointment
has become a source in Fukushima.
It's an expectation of what we want from something.
We would like our children to become medical doctors.
What would you do if all were medical doctors?
Who would do the farming?
Who would become the pharmacists?
It's the same position.

We like ours to be what we can handle, not what it is.
And this is the same situation.
I have been into enough mental institutes with schizophrenic, I have spent enough time in these mental institutes and I have observed enough of them.
There should be no one on this planet, in any institute, with, locked up with schizophrenic. The doctors should be inside and they have to be outside to teach the doctors are not sick and then bring the doctors out. The position of the doctor and the schizophrenic or beautiful twins has to be reversed. It's us who don't understand the process of the creation. You know, it is how we become denial.
You are Canadians, as you know in Canada, no publication, no papers can be published which is by any Iranian scientist. So in Iran there is no Iranian scientist, it exists according to the eyes of Canadians, government. What is the reality, the rest of the people know. You find out when you put two schizophrenic together, two what I call beautiful twins, four of them, they have a beautiful time with each other. Because they know, they appreciate, they understand each other, and it could be if you find a rare case of a boy and a girl in both, the girls talk girls and the boys talk boys, but they give each other time. So it's a natural process, it's just that we never understood it. It's for the first time, it's explained what it is and if the doctors understand this and start working, just go to your or it's going to your schizophrenic, what you call, mental institute, sections, anywhere.
And take two or three of them and say,
"Okay, we made a mistake, there is no medication.
I would love to know, I made a mistake, I apologize.
Can you tell me, I would like to know your other character,
I would... not the character, I would like to know your twins,
I would like to know your other person."
And let the other person show itself, and always make time.
This is your time.
You find that like children, they jump in.
As you say, "No, no, no, John, this is not your time."
Let Susan talk, then you have.
And when they gain your trust, they see you the way you,
the way you appreciate both,
you'll find out the one which has been the one prominent, we know,
always tries to force his way in, like the oldest child.
And you have to say, "You will not lose any love and care."
Everything will be the same.
You have to allow Susan to speak too, then we have a beautiful time.
And usually, the beauty with it is, you take them out.
You ask them what they like to buy, what they like to eat, what they like to talk about.
And you live, you have to make the effort to allow them to have their own time.
It's like when you have two children.
You have a boy and a girl, you go shopping for the boy,
and the girl is with you, but she knows she's got to wait
until they go to the girl's shop to do the shopping.

But you do that with one body.
This is our lack of knowledge.
And now we open the space, we have
to understand the dimensions of the creation,
not what we would like to have.
Mr. Keshe, there's a question.
Mr. Keshe, there's a question.
Can autism be treated with a similar method?
Autism is totally different.
Autism is a different thing than schizophrenia.
Autism is a selected path and it's a personal decision,
but in a way it's got to do with the brain structure.
We don't understand autism fully at the moment yet.
We got three or four trials going in different countries
and we've seen progress but it's not the way we expect it to be
but it is very good because we've seen changes.
We have, we have four cases, five cases now, all children below 18
with their mothers and the doctor supervising.
And we've seen progress, in some cases very good, some cases not really.
We've seen a child who was called autistic,
but he used to be in a handicapped school,
and now he's joined a mainstream school,
and sits for exams normal, like other children does.
We've seen the same thing in four or five cases.
And trials are still going on. I'll meet one of them very soon.
He's been with us nearly six months now.
So, we're changing the system to see how we can do the changes.
Autism is a totally different thing than the brain structure.
The schizophrenic is a birthright, not a disease.
Next question. (JB) So then it's also a lot more common
than we should be, that we think of at the moment.
(MK) As many as twins you see, they are schizophrenic, eh?
Or beautiful twins.
It's a natural process.
It's a total natural process.
It's just that we don't have the eye to see the reality.
There are as many, many beautiful twins as the physical twins.
(VG) So, also another question on that then,
can one die without the other one?
One dies because of the physicality, yes, it forces the other one, yes.
(RC) I'm talking about the, themselves separately,
can either one of them pass away, kind of?
(MK) Yes, there are some, some reports over time,
that the guy used to be schizophrenic, now he's okay,
is only, you know, he doesn't laugh.
This process we don't understand if the

emotional side of the brain has ceased working
or is it totality of a death.
This is something we don't understand.
But it's known that the schizophrenic,
even in a very, the old age or somewhere in between their ages,
like a natural death,
the brain section stops working.
if you call that a death, so, but you only see,
and they say, "Oh, they've been given so much chemical,
so much medicine, he's okay now, he's home."
But in fact, did the chemicals kill the person?
Is the doctor a murderer?
And, or they put so much that it's totally paralyzed,
dysfunction, connection to the physical part.
Because when you speak to the schizophrenic,
When you, for example, if it's a twin boy and a girl,
you, not only you see the change in the voice,
you see change in the physical behavior too.
That when the girl speaks, the fingers and the body moves like a woman.
And when the boys speak, it's all macho.
Because they've separated the two.
So, it means both have connection and control
over their emotion and physical behavior.
It's like, you know, you see a boy but he's more tendency to be a girl
and he walks like a girl and calls the hand like, you know, "I'm a girl".
The same thing you see with the schizophrenic which is twin.
Even with the ones which are two boys or two girls, you see the same thing.
One behaves different way.
Go on the internet, there is a...
Go on, Siamese twins, they are in their 30s, 40s now.
I don't know if they are still alive.
You see them, they even have boyfriends,
and they decide because it's one body,
how they're going to share the body,
and who's going to have which boyfriend and when.
It's the same thing with the beautiful twins.
You have to understand that.
Carry on.
Sorry.
So we could also--
I just want to have an example, and I
I think a lot of people know how Bradley Manning was sentenced and then became another person.
In that kind of a circumstance, just to put it this way, if he was a schizophrenic to begin with, then he could have gone through such a devastating situation to let the other person come out and take control.

Is that right?
I don't know about the case, I can't make a comment, but in so many times we see violence
with the schizophrenic because the second emotional part has been cornered,
is not allowed to show its potential and its existence.
And they always crave for the love and recognition of the parents and the brothers and sisters.
They crave because the one who has had all the attention now is mine, I want to be loved too.
And they speak about different things and the mother says,
"Oh you were talking about rugby, what is this, we never heard you talk about it."
They don't understand that it is now Susan speaking.
If the parents recognize this, they won't attack them.
Now you have to sit them down, educate the parents as much as educate the beautiful twins.
that this is a problem, people don't understand you, at the same time to the parents,
"Sorry you gave birth to two in one, you have a full package."
It is a huge understanding for both sides, it's not just one way.
And then on top of it, you have to teach the family, educate the family.
You'd never insult him, he's a schizo. No, he's a beautiful twin, you are a schizo
because you don't have an understanding of what it is.
It's the same situation now with us with the Belgian government.
They don't understand the work of the medical side, now they're building cases for fraud, taking money, people complaining, they haven't done this, and the rest.
Because he's practicing medicine without license.
They don't understand, you idiots, Mr. Delannoye, we know what you're up to.
You don't understand what is on the plate. You become the Judas. You have become the Judas.
Because you don't understand, you think you can force the world, the rest of the world to go your way?
Issue the warrants, we'll meet you in the court.
It's the same thing, how many schizophrenic people have appeared in front of the medical courts
and been sentenced to mental institutes.
The judges should be there, not them,
and the doctors who support with their false...
and their own misunderstanding to put these people behind walls.
These are innocent people who have been captured and caught
because of people's lack of understanding.
Put this out, put this...
(KD) Ah, Mr Keshe?
(inaudible)
(KD) What is the relationship between the schizophrenic phenomenon
and the gravitational magnetic field?
Or another way to put it is, how did you discover this?
(MK) Oh, it's a long, long story.

It's a long, long story.
But it's to do with the gravitational magnetic field.
These people share the brain, activities of the brain.
These people share the whole structure of the brain
with their own thoughts, create, as we say, gravitational magnetic field.
One creates a different one and the other one creates a different one.
It's very interesting if these people who are very clever,
whether make these helmets with all these electrodes.
I know our friends in Tel Aviv do, because I've been with them
regarding our coma patient, which Jo has told you.
Then we put a video out somewhere, when she was assessed between the doctors in...
in Liege Hospital, with a program from scientists from Tel Aviv
and a coma specialist from Cambridge University.
We spent a day in the hospital to assess the working of the brain,
with putting like, I don't know, 150, 200 electrodes on their...
hat, it's like a hat they wear, and they see the operation of the brain,
and even with the MRI, you speak to John, and recognize John under MRI,
you will see one part of the brain works all the time.
You speak to Susan, and you see only that part works.
This is not a disease, this is recognizing the existence of two people.
I think the minute somebody is diagnosed with a beautiful twin, put an MRI,
and see maybe it's three or four, we haven't recognized the other two or three,
that we don't make a mistake, again we think only two,
but we are suppressing two or three more in the background.
So, it is a form, it's a reality of the existence,
and they create their own gravitational magnetic field in their,
in their, what you call it, part of brain which they control,
and they do the others.
(silence)
(RC) So is that like a dual core reactor?
(MK) Pardon?
(RC) I said, would that be kind of like a dual core reactor?
(MK) Very much, maybe triple.
They have autonomy in their own lives, it's just that we don't recognize it.
But the whole brain is so, such a huge organization,
that you can even add 30, 40, 50 characters in the same part of the emotional part,
with one body.
Beautiful twin is our disease, not the people who are the twins.
If the schizophrenics, what you call, what I call beautiful twins,
are the sick people and it's got to be kept in the institutes,
So we have to send all the twins into the institute to lock them up.
And then we understand, boy the mayhem we have caused for years
because of our own lack of understanding.
(RC) Mr. Keshe, Mr. Keshe, another...
(MK) I hope the door opens.
(MK) Yeah, yeah, go ahead. (RC) Another question from the...

live stream chat, it's...
Is this the same as when two galaxies get one inside the other?
Not really.
It's like when two galaxies born together inside each other.
They are in the Universe,
like parts that you see two different structures,
like galaxies inside each other.
You'll soon understand.
We look at them as one entity,
but you'll understand they have different fields
and part of the galaxy moves in different direction than the other.
These are the twin galaxies too.
But they are inside each other and they find balance.
You say, "You got to find the principal star in them,"
and then you see their operation.
(RS) There is a question from Elia, she's having problems with the computer,
but what's the... (MK) She's still decorating.
(SK) Yeah, she is on a live stream or something.
So, she is interested, what happened from GANS point of view?
Which GANSes on the top and how they affect the neurotransmitters?
(MK) I was explaining this to the Knowledge Seekers this week.
The neuro system is not fully understood.
The structure of the neuro system is not fully understood by the world of medicine.
Your nerves have the same structure as your brain
because they are extension of your brain.
So, the same as you have emotional section of your brain
and the physical part and the outer boundary part,
Every nerve in your body has the same.
The center part of your nerve carries your emotion.
The same, the outer part does the physicality.
And this is why we can explain this fully, because we have a case
where the physical part has been touched of the nerve,
but not the emotional part and the memory part.
There's a case we are running now for about 4 or 5 months.
He's a doctor.
He... what's happened in his surgery, he's been hit on the head
by X-ray machine when he was pulling it down to take an X-ray.
He has all his senses of knowledge, he still have all the knowledges of a doctor.
But, his connection between his physical part of the nerve
with the eye has been touched because of the accident.
So what happens, if you tell him what is 2+2, he writes 4.
He can write a full prescription.
But, if you write 2+2, he cannot even think about it,
he cannot even add it, he writes something.
So, this is something which a world of neurologists should look into,
because they haven't understood it, now we explain it.

Nerve has layering, center of each nerve is for emotion.
And then the same structure as your brain,
as it goes further to the outer boundary is physicality.
Then you understand the composition of the GANS in the neuro system.
That's why when you have a ILS or when you have a MS,
the same emotion has carried through the nerve,
and at the point of the physicality,
there is a mis-functioning or change.
You get the arm disabled, leg disabled, not talking and the rest.
Where the emotion pass through more,
is the where you see for example with the ILS where they lose their speech first,
because they could not express the same pain as before when they were a child,
they couldn't express themselves talking about it,
now they see the same situation repeating itself,
and they know it's so bad they can't control it.
In the childhood they couldn't speak, they choose the silence.
So, now we see a lot of ILS with the people who lose their voice and their tongue first,
but physically they can run a marathon.
And then you have people who've been,
who've gone through the physical torture of whatever,
or failure of physicality of whatever,
that's what you see with the ILS which is physical,
you know, they lose their work, use of their hands.
But the actual information is carried through the center of the emotional part.
The structure of your nerve is exactly the structure of your brain.
It's got the emotional part, physical part,
a transition between the two,
and operation of between different information.
Then, then the world of medicine has totally different meanings,
how you handle a lot of diseases.
This is what has never been understood.
And that change in emotion to the, to the physical part,
as I showed it to, in the brain,
a structure to the Knowledge Seeker this week.
We don't see layers, we don't see muscles and tissues and bones in the brain.
But we see a structurally different structure of the same thing
in different composition, what you call it,
density and magnetic field strength.
Elia is a doctor, cut a brain, then you understand.
You don't see separation, but you see difference in texture.
Difference in texture is being the same, but different density,
gravitational-magnetic field pack.
And then you understand, we...
One of the things which we start doing in the Foundation very soon,
we start making a copy of the brain.
We have the materials, we are producing in our materials,

to create non-electron connection systems,
which behave like brain, it's a control system.
We have a sphere, we can fill it up and through it, affect its position and motion.
These are not the fairy tales that are here, as we already discussed it here,
it's going to be done and it'll be for the advanced reactors.
With the operation of the reactor in the space, as I said before,
you, if you press a button and wait for the reactor to change its composition,
You already done, God knows, 10,000, 100,000, a million kilometers.
The operation has to be instantaneous and the change is the same.
The minute you touch your toe, you feel it in your brain.
The minute you walk on the nail, you feel it in your brain.
It's not electronic because it takes too long for electrons to transfer there.
It's done as a superconductor, as a GANS.
And that is done through magnetic field transformation,
not through electron motion.
So, we have enough materials now, we even, I showed it to the knowledge seekers,
we even get different color Copper Oxide.
Now if you can dense it and put it in different layers,
you get the same structure, you see the same structure
as you have seen in the brain of the man.
Then the electric connection is not electronic, it's gravitational magnetic field,
It's a zero communication, exactly as we talked before.
The Knowledge Seekers will show this very soon in the next few weeks,
because to be able to build the spacecraft, we have to catch up very fast.
So, everything is done together at the same time.
And the operation of the Neuro-System, we will show,
I will build a nerve and I'll show you how the composition changes.
I've done it before, it's a very difficult job to do.
But, as different kind of cancers are getting produced in the lab,
we will show you how you can show the structure
and the working of a real true nerve system.
Not the way it's been there, it's been assumed.
A nerve structure is exact copy of your brain, it's extension of your brain.
How come you don't hear a word?
You look at the face of a child crying and you feel the emotion of it.
That goes through the emotional part of the eye neuro system.
You feel the emotion.
When it's the sound, when it's the movement,
when it's something else, it's different part is used.
So, for your, what you call it, ears,
you use more emphasis on different layer of the nerve,
not on the emotion, but at the same time emotion is there.
A cry makes you cry, because, not that,
because the emotion carries a different gravitational magnetic field,
which is absorbed by that layer,
because it's more receptive than the physical, physicality is slow.

But emotion, so in the center, higher density, faster transformation is used.
I teach this to you as we go along.
Next question.
Eli is still operating on my brain, so she is asking what do you mean under nerve, axon or part of axon, and axon is a brain cell, or glia.
I don't know what she is talking about.
Don't go too technical, Elia.
I don't know, I'm just translating.
But I'm married and I know what I'm doing.
You should be here.
Next question.
(silence)
Is there any other question?
Or shall we call it a day today?
(silence)
Can we go with other questions other than the schizophrenia?
Yes, no problem.
Most probably you want to go back to the energy and emotion and I'm getting fed up with it.
There is more than this.
I would like to, in my point of view, this will be like a quality assurance process, and I would like to refer to your CO2 patent.
If you want me to remember something about my patent, God help you, I can't remember a thing.
No, no, so basically you are saying that based on the combination of electrodes and electrolytes,
one can obtain CO2 or CH4.
So I'm assuming that in order to steer the phenomenon in one or the other direction, you have to know what changes will create one or the other absorption.
So my question will be, just for people to be able to experiment and see the difference. They have to test it. Don't forget now that we got the 7, 8 combination reactors, we should be able to produce CO2 in the liquid state somewhere between the reactors, dynamic reactors. We don't need the GANS layers. If you look at the layers, nanolayers on your electrode, each one creates in the hole different gravitational magnetic fields. And the interaction of different gravitational magnetic fields of each hole in each layer dictates what gravitational magnetic field the layer will show. This is how the solar stars work, how they create gravitational magnetic field. So now that we have the dynamic systems running, eight or seven 8 of them, maybe more as more people come. While the system will be running in one part of the setup you will see it falls out CO2 and in another part it drops gold out of the magnetic field of the environment as it changes to matter. We show that since the transition part of the learning with the new reactors coming into operation, we try to show the behavior of the nano layers in the physical, practical system. This is how in the universe, planets like Earth creates matters which is in its gravitational magnetic field spectrum. Earth has a composite center and that composite center creates a composite gravitational

magnetic fields which allows composites of matters to be collected on this planet. The rest of the materials which we know exist in the universe or whatever, and what we don't have it here, we call it rear earth, because the gravitational magnetic field in the center of the earth is not near to it. This will be very clear once the Fukushima test is done in the next few days. The reason that if we put nanomaterials that they will absorb from H3 to cesium or plutonium or whatever which is in the material in the solar or in the water, is because between the layers of these materials in the nanolayers, a spectrum of magnetic gravitational fields is created. If we cannot see a collection, a cluster of CH3 in the water, it means in those layers we have not managed to create a gravitational magnetic field of CH3. But, we can run one of our reactors here with the containing CH3 inside, that the reactor when run will attract all the H3 to itself in the water. It's not that we failed, it means that we haven't produced the thing. But if in the test in Fukushima we see a cluster of radioactive material coming together like gel, it means our material is creating a spectrum of the fields which matches to cesium, to from Plutonium to H3 and the rest.
And this is a major breakthrough.
Major breakthrough.
So, this shows in space,
we can use these materials to absorb gravitational,
create gravitational magnetic fields of Cesium.
We need Cesium, we just created in the nano-layer.
We know this nano-layer, we put it out, we collect, we come back.
So, the next 72 hours, I don't look at it as a failure if nothing happens,
but if the things happen the way we expect it,
because I stay alive when the tests are happening in Fukushima,
to advise Yukoko what should be in the next step,
so, and we try to record it.
If nothing happens, it's not a failure,
it means we have not managed to create the matching gravitational magnetic field.
But if in these tests we see collection of certain things,
then it shows our layers creating...
It's magnets, you create a magnet, metal magnets cannot absorb wood,
cannot attract wood.
So it means in this process we don't...
This has a huge, huge implication.
It is...
Pardon?
(SC) On this point, probably my question would be,
which will have the bigger gravitational magnetic field,
the CO2 or the CH4?
In other words...
Depends, depends on what the layer is creating.
It depends how the process was done,
which gravitational magnetic field was embedded in the layer.
Right, I mean, I'm trying to put myself into the position of the person

beginning to study the technology,
So, as per the videos you showed us how to do it, the person will do it,
and supposedly at a specific point he will not get nothing.
So, not having the knowledge...
It happened to us, it happened to us, it happened to us.
Do what the guy did who made the penicillin.
If you run something and there's nothing there,
you know how penicillin was discovered?
Because the guy had an argument with his wife and he left the home for a bit,
and he came back and he found penicillin.
I always say, "Do the same, just leave it."
Even for a month, leave it, just because you don't see something.
If you put your voltmeter and you see a minute, minute voltage,
it means it's working.
Now, let the nature show its process.
The problem is with us, we put the water and we put the flour in
and we put the egg in and we expect the, what you call it, the cake.
Universe doesn't work that way.
We've seen it in our lab, again and again.
You have... the first time we put the reactors on the floor,
we won't see things happening.
We might run it for a month before we see one of them nudges or kicks.
Or if you are lucky, what happened in Tehran,
the first time we loaded, we flew.
the thing lifted.
This is the process, don't use...
The minute you say nothing happens, to me it means
you haven't understood the process of the creation.
Always something happens, it's you who's blind to it,
it's like the schizophrenic.
You don't want to see it.
Give it time.
To for a person to show what you call it,
it takes 18 years.
So basically going to this process, one cannot know upfront as you explained what the gravitational magnetic field is embedded because of the quality of the process.
No, no, no, no, you're wrong, you're wrong. The two sets, the knowledge seekers
built over two weeks, they did not know because it's the first time they are doing it.
The system which I made with ten years of experience of making this kind of thing,
I went to produce energy and produce, what do you call it, fat. And it's doing it.
Can I explain how even you position your electrodes in the system affects what it does?
If you join the nano material to connection to the metal side, if you bend it to the water or to the liquid, you absorb the energy from the liquid which is back to it to go to itself.
All, if you look at the shape of the electrodes I have in my set, in the 48 set,
is facing up,
into the space,

which is collecting energy the way it's supposed to do.
You can, by expertise, to you at the moment is random, but to us,
because I've done it so long,
we can more or less make system to perform certain things.
But the knowledge is there to be gained, there is more knowledge.
You can make a system like now, as I said, we are just producing protein
and nothing else at the moment in the majority of the boxes,
two boxes have turned orange, I understand why I'm waiting to see if this goes red.
You have a fat which is on the surface, now because of the stagnation of the fat
blocking the oxygen into other conversion into it.
The water with what is coming, has coming from carbon, is creating CH3,
which is the orange color.
We know this because of the Raman spectroscopy,
which is done in Ghent University for us.
So now, in two or three division cups,
we see the orange color with the fat on the top.
Sugar becoming the source of energy for the fat,
to start the first cycle of life.
And at the same time we see bubbles.
You say you don't know.
We know the parameters, we know certain amount of parameters.
Now that's why we're bringing this, the next 25 and the next 250.
Now is to categorize, this is, I explained to the Knowledge Seekers yesterday.
I knew what I'm doing because I've done it so much,
and in mine you don't see any CO2, you don't see any Copper Oxide, you see nothing.
Even though I use copper wires.
You have to learn the process in what you need to do and how you make layers.
You lot, you just do the thing and just expect the thing, but you don't observe
how one side is black and one side doesn't have a copper.
How you had a full non-coated copper on a film, while everything around it is there.
the reason. You are too passive and you just want to expect the results.
Mr. Keshe, just a second, I want to interrupt you because our buddy Vincent had this situation, he had like a copper tube which was fully covered with material and the copper wires which were completely uncovered. So obviously we were asking ourselves why?
The condition you created in your processing of the material has led to this.
So, where you are, or what you achieve, or what you produce,
is a consequence of the process you started.
Test everything, different ways.
Heat your wire before you do it.
Cool the wire before you do it.
Cut your wires in different shape.
bunch them together. I explained to the knowledge seekers,
why if you look at the pictures in the orange cups,
you see partially wires, partially coated, partially not coated,
partially copper oxide is oozing out.

Because in twisting the wire, they created multi-condition environment.
So, not every single wire has been coated the same.
I showed them, when I make my wires, when I coat the wires,
when I put the wires through, I open it like the hair.
You know when you have a long hair and you open it?
With mine, I open, I spend time in opening it,
that coating is homogeneous.
Secondly, the process is different.
It's very much, if you made a sugar, or you made a, what do you call it,
solid sugar or you make crystal sugar. It's the same sugar. The process gives you different things. It's the same thing with nano-coating. You lot have just seen one thing, you want to repeat and get it. No, understand what you are doing. None of you will create the same thing or none of you can repeat the same test twice if you have not made a record of how you have done it. How hot was your water. When did you take the wire out and how long did you leave it out? Was it dry wire? Was it wet wire? You want space in your things. How do you make space on your wire? One section, I can make you wires which one section has no coating even though you put it through caustic. You have to learn and this is part, people want to have
It's like an email I received, I was talking to knowledge seekers.
Now that you've given the design of the energy reactor to the Italians,
we are coming to Italy, you have to take us to the factory
to see how the Italians are doing it.
Bullshit!
Nothing will happen that way.
I have an email, this cannot be done,
you have to test and you have to put things in order, you have to learn.
You were as fast as downloading the patterns millions of times in the past 10 days.
Be the same, test slowly, piece by piece.
Right, we had another discussion in the group regarding to the fact that if the number of nano layers will increase,
the strength of the magnetic gravitational field trapped between the layers will be higher.
So, you are correct.
Ok.
You are correct.
And, thank you.
Let me give you a tip.
Another issue.
Let me give you, let me, no, before you go further.
You use, for example, when you are nano-coating, when you are doing the process of coating,
use on one layer, on one process, just sodium, yeah?
Let it dry, let it go through the process of the growth, but not to dry, yeah?
Next time you put your wire in for the second coating, add aluminum into your caustic.
Bring it out, and then the next time, add zinc into it.
You'll find out the spectrum will change totally. Each layer will bring different gravitational magnetic field spectrum into play. This is how the gravitational

magnetic field of the stars are so powerful, because layers of different strengths are trapped between each other and they interact. As much as the two adjacent layer gravitational magnetic field interact to create gravity, so does the tenth layer with the first layer. So you get a spectrum. So you get a better, stronger, that's why stars have a huge span of what you call it, plasma. You're correct, you're doing the right things and your assumption is not an assumption, it's actually you understood the principle. And this is beautiful. Slowly you'll understand.
Thank you. We had another discussion with Ludmil who was informing us that when he was trying to do the coating in plastic containers that had very little air above the liquid, he didn't get any coating. So we were trying to figure out if the
The process is depending on the ratio between the gas material into the container versus the liquid volume.
No, no, not as far as I know. Repeat the process the same way.
Repeat the process. You see we have had it here with the Coca-Cola bottles.
When I make electrodes, the original ones you've seen, I get the separation of the head and I've shown it to the knowledge seekers.
And up to now, I haven't seen even the bottles are here for about 2-3 weeks, we have seen no dissolution of the screw head of the coca-cola bottle.
Because I know what I've done and I know what they've done.
The process I make mine repeats exactly the same thing all the time.
The process they used here to do the Coca-Cola bottle has taken a long time to create coating.
Duration, time, heat, it's all dependent.
The good example of this coating is the research, we're going to publish this in archives, I had to ask the guy to come in and take charge doing it.
When we done a seed test, past two years, we financed the research in seed growth.
So basically what they are doing wrong?
Nothing is doing wrong. It's just that you, to you is wrong because you have expectation before you learn. Learn what has happened. With the seeds, if we put seeds ten seconds to soak, in three months, in two months time when they grow, they grow totally different when we put the seed one hour. Even the soaking, coating of the seed and what energy is absorbed in the seed, in three months shows its result. We have seen it. I have a full time table, the way the guy,
He's a scientist, he's done this in conjunction with the scientists in Loven University.
The duration of soaking has been measured.
The position they've been soaked, how many, how they've been soaked, all has been measured.
It's the same thing with you.
Your caustic, your material you do, you haven't understood why.
Look at your coating.
How many of you have just coated without taking the plastic cover off the wire?
You will find out you get the most perfect coating if you do not remove the cover, the plastic cover of the wire.
Well, sorry to say that, but there is completely no covering under the plastic.
Yes, it is not, but it's because it's black. I can go down and open the camera and show you how

many wires we have. We have even done high tension wires. There is something wrong with what
you are doing and this is your problem, not the process. You haven't understood what you are doing.
Oh, I don't know, they were bare wires and with the plastic.
Yeah, but look at the coating, what the wire has been, look for what you are doing.
There is something you, or your nano-coating is not thick enough to show.
If you want a perfect, perfect coating without any oxide, there is a process to do it.
Without moving the coating.
And we've done it for one of the power generator companies with the high tension cables.
the sample is here, I've shown it to the volunteers. We can coat high tension cables
without even removing the cover. I posted pictures with Mark this week, I gave it to
him to put the pictures on.
I don't know, my videos are on YouTube and you can look at them.
You have done, if you cannot, it's like I think, Yo has posted a video, all his things
become white, because the content is too much and it's too close, so the caustic dust
sits on top of his wires.
Or the process is the wrong thing.
Yes, he was saying that after two days the black first stage was disappearing.
Yeah, because it can be done. But in a way it disappears, but in a way if he knows
how he's doing it, the layers are still there. Even if it disappears, you put your
electrode, you put your voltmeter, ohmmeter on and you test the skin, if there is
conductivity or not. You do not need physically to see the layers for them to be
For a layer to be seen as a nano material, it's got to be at least 5, 10, 20,000
layers on top of each other. You're talking about nano. That's 10 to the minus 19.
I think none of us got a laser eye yet. So, the easiest way is just put a voltmeter.
Don't press it because the layers are so thin, the minute you press it, you've
broken the coating. Don't rely on your eye. Test. To you, there might be nothing there,
but maybe you have created a very low coating and this has application. If you know how
to use it, the one, the wire I've used for my system is not black. It's brownish color,
yellowish copper. The thing is, I told you, you become too physical, it has to be
black and it has to be that to have an effect. If you touch your wires and you don't
get conductivity, it means insulated, set up the same system through a low voltage
and see what you get. You might be able to produce pure hydrogen and I think you
be able to do so. The lower layers, the weaker layers, the lighter materials. As
Vince just said, you make so many layers, you make a spectrum, so you can absorb
heavy, that's why we rely on Fukushima. So, when you have such thin layers and you
think you've done nothing and there's something wrong, have you ever tested the
conductivity of the wire. Test it. If it shows zero ohm, shows no connection, even
you don't touch it because if you press it too hard it's already broken. It's a
nano layer. It's nano thick. So the very, very thin layers are for very, very, very
light elements. If you never understood, now you understand. Connect it, put in the
water, in the right combination, don't put a high motor to run, you put a LED, the
weakest LED, the weakest, weakest, what do you call it, energy drainage from it,
and if you start seeing bubbles, it means you are producing pure hydrogen. So,
There is nothing wrong with the system, there is nothing wrong with what you created.

It's just you haven't understood what you've done.
And somebody like me who's done it knows exactly what he's doing.
So I can see your fault, I can see you crying foul game,
but in fact you don't know you've got a gold in your hand, so it's your problem.
Next question.
Mr Keshe, this is Vince. I have come across that understanding, I think, as well,
because I've experienced what you just said, some of my wires, they look like
they're not coated, but I go to do the second process and I do get some voltage,
so that to me just tells me that there has to be a coating there. Is that right?
Yes, but use the coating in the right way,
and then you will,
then you will see when you multiply it in boxes, what you can do,
and what you can produce out of it.
I keep on telling you a lot,
stop being so materialistic and physical.
You got to learn to look beyond the physicality.
Understand the process.
I would like to continue here with a very quick question because you said that nano
layers are so fragile.
There are companies that are selling what is called conductive gels or conductive
aerogels
so this could be fixed on the nano coating so the DMM should be connected to this, how
materials for not breaking the nano layers, but that will defeat the purpose.
I don't know, I never heard of it, I have no knowledge of this.
You got to test it and let us know.
For example, yes we can do that. The DMMs, in order to connect the LCD screen
on the PCB board, have some sort of chewing gum, to speak so, which is very soft,
which is doped with silver or carbon.
So when you press very gently the LCD,
it will make electric contact and you know, you can send signal current.
So I'm just wondering if instead of pressing the DMM against the wire as you said,
we can put a very soft conductive polymer rubber.
Maybe, try it.
Try it, I don't know. Try it. Let us know.
That's why we run these workshops, everything shouldn't come from here.
We are learning from each other.
So, let us know there is something can be done.
In the next few days,
we will set up what I call a brain structure reactor,
and it'll be very, very interesting.
If I, if we have enough material by the end of next week,
We will show it here, we will take some pictures of it,
and we will start showing the operation of the,
what I call, GANS system as a brain operation,
system control.
If it works, and if it does that, then for the first time,

maybe we can show the real operation of the GANS layers,
not only at layers, but as a collective, as a decision maker.
This... this needs a little bit of thinking, to build such a thing.
But if I... if I work it out next week, or the week after, whatever,
you will build system very much like the three-dimensional,
a spherical reactor,
and we'll see how we can transfer information
across the boundary of one thing to another, without electrical current.
So, if we think, we can see our emotions, our fields,
can affect the structure of the material inside.
We have the transparent balls,
It's just that I've been waiting for to produce enough materials.
And if we can do that, then we'll show you the operation of a brain.
And it'll be an emotional brain, not a physical brain.
Then, that'll be another eye opening.
Next question.
(RC) Thank you Mr Keshe, I think that would be very enlightening for a lot of people.
(MK) Yeah, we turn now with eight of us around the lab
and everyone is collectively working together and separately setting things up.
The possibilities and the illustrations has become more frequent and more interesting.
So, next stage is showing micro and macro together.
We show the nano layers in the pots and we show the reactors running
in the same kind of composition and positioning and on the floor of the...
on the floor of the lab.
And then you lot can learn what it is and how it is.
But the whole thing goes back into the process of the schizophrenic.
That's why we put this workshop on, we got to look and we are looking for,
If you know anybody with a schizophrenic, any doctors, neurologists who work in that field,
we would like, we don't prescribe any medicine, we won't make any systems.
But we can show how correct the explanation and the work is.
So, the governments who are spending millions keeping people as a schizophrenic
in the hospitals, which are really perfect people,
they, that money can be spent somewhere else where it's more needed.
Each schizophrenia costs tens of thousands of Euros a year to keep.
We are putting innocent people behind the bars,
and we call them mental institutes.
And that's, that was the purpose of this workshop,
to stop with another inhumane, or what you call it,
what the man never understood and carries on, keep on doing it.
It'll take years to this to go down the line.
The first people will object to us will be the doctors
who run these institutes, because now they're out of job.
Then I become a criminal doing mental health,
where I actually do explain the process of the creation.
Because if they don't object to it, they have no jobs,

there is no mental doctors or psychologists or psychiatric.
the proposition will come from the medical,
because 20 years of studying and going to university,
now this has gone down the chute.
Next question.
(SC) I would like to refer to one of the videos posted last week
by the knowledge seekers, showing that...
(MK) Which one?
I'll explain it right now.
With that production of electricity,
and they were showing a ventilator.
And apparently, the cell was able to give short impulses
of current, and after that was discharging.
So it was not able to produce current,
I would say constant output.
So could you--
Yeah, that is the system I built. You have a surface area.
area, and as now you see the fat on the surface, that fat limits the rate of the absorption of the CO2 through the water to conversion to GANS. So that's why you have a limitation.
Okay, so normal circumstances should be continuous.
If you don't generate fat, yes. I can make wires which don't make fat.
One of the easiest ways if you want to make a homogeneous, non-copper oxide wires for your test is Coca-Cola bottle.
What you do, nowadays you strip your wires and you, what do you call it,
You put them in a caustic. Instead of the electrode, go on the Keshe Foundation, Keshe Technology videos, we've shown this one but nobody ever seen it,
nobody took note of it. What you do, you make holes, you cut your wire to the length you want, you make two holes and you put the head and tail of the wire in the Coca-Cola bottle, instead of the electrodes. You do the same process,
you put the caustic in, you shake your bottle and you leave your bottle for 2-3 days. You come back, all you need to do, just to take the cover off, you have a perfect non-oxidized nano layers. The duration you put in, decide the thickness, but at the same time, the compactness of the wire, the plastic on the wire, will dictate the layers and the thickness of the layers on your wire. This process, I told you, you've got to learn different ways. This is something none of you ever noticed, it's been in public for five or six years. You only look at the electrodes because you wanted to see energy. Take the wires out, take those, the holes you made for the electrodes, cut your wire to the size you want, make sure one end you find a way that doesn't get coated, that you can keep it, you don't need to scrape it off or do whatever else with it.
And put it back into the Coca-Cola bottle hole.
Seal it, put your caustic,
you'll have a spider coming out of the bottle in a way.
Or, connect one end to the bottle and let the other loose end.
Then you have a progressive division.
Then you have different layers, you can use that for different materials

because the end near the bottle is highly coated,
creates different gravitational magnetic fields,
and the further end creates lower layers,
it gives you a different combination.
When you use it in the caustic,
it gives you totally a different spectrum of the gravitational field,
and you absorb different things.
So, this is one of the other processes
that nobody has ever noticed what has been on the website.
You're all running like a, what do you call it, dog chasing its tail.
But in fact, everything is there for you to see.
I don't interfere, I don't say, "You have to do it this way, that way."
But, the whole thing is there, even it's in patterns.
This is shown in the patterns.
This gives you a homogeneous, non-copper oxide system.
Then cutting it, opening your wires, putting it in there.
Cut your wires, put in a Coca-Cola bottle,
fill the bottle, empty the bottle and leave it.
You have a perfect non-oxidized system.
(S) So regarding, because you are this subject into the big patent,
what you are calling, it appears that different than the
Coca-Cola experiments you were showing,
Is something like a circular, very short cable that you call collector,
through which the wire that is going inside the bottle goes?
So I'm guessing that that should be like a ground electrode,
or something like this.
It is labeled like 1, 1, 5, 5, 6, 7, 8.
I don't know. These patterns are related nearly 10 years ago.
And I haven't seen them.
These patterns have been done, a lot of these drawings have been done the way
Dirk Laureyssens thought would make it visual.
And he's got a huge creative mind, that guy.
So he has put a lot of things...
(inaudible)
No, no, because when you put it, the reason for that is, again, understand the process.
If you put, let's say, different washers or different nuts, or if you put your wire
in partially through a, let's say, zinc ring or a pipe and the other part is not,
you'll find out your coating is totally different when the ring, when the nuts,
the pipe is. You haven't understood that. This again shows you haven't understood
the whole concept. The gravitational magnetic field of the nut affects the coating
and the layering and the thickness and the gravitational magnetic field in that layer.
The next one is made of steel. That layer under the steel has different
characteristics. The one which is a zinc pipe has a different characteristic.
So, these are for when you lot become more educated
and start looking at the totality, not focused on one thing.
The washer in there is not for ground,

it shows that the layer inside is different.
If in the future you can analyze the layers,
you don't need to...
This is the way your brain is made,
and you haven't... it's too early for you to understand.
Even with nano-materials, the GANS materials,
the layers decide, so your wire has different layers.
Now you call it a resistor, a capacitor, so much capacitance, another capacitor.
Now with the Plasma technology, in the coating outside,
the way you control it, you create different capacitors next to each other.
Because nano-layers are not created randomly.
It starts from the bottom, from the beginning of the pipe,
and it goes through along, till the one next to it is not made,
the next nano is not created.
So, you want a resistor, and then a capacitor,
and then you want another thing, you want a 10 ohm, 100 ohm,
such and such capacitor, from outside the coating,
outside the material, by placing the right material of what you need,
You dictate the coating composition.
This is a composite layering diagonal along the wire, not through the wire.
This is something you have to be educated, that's for the future.
You look too much into physicality, one is Earth, no.
This shown how you can change nano layers from externally to what you need.
So, in one piece of wire, you have everything you need for a radio.
because you change the capacitor, resistor, everything is done.
This is how your brain works.
This is too early for you to understand.
You look at pictures but you don't understand it.
(SC) Yes, you are right. Probably this is why we are asking some questions.
(MK) Yeah, that's why I'm here to explain,
but don't run before you learn how to walk.
(SC) Okay, it's much clearer, thank you.
(MK) Next question.
So is the hydroxide, that is the key.
No, no, no, you got to find out what gives the reaction to create nano layers.
We've been trying very hard for past everything we could think of to create nanolayer on the steel and we can't do it. Every trick in the book John could come up with, we could think of, heating it, boiling it, putting it in the caustic, putting it back in salt, everything be done to find a way to oxidize steel, to create a nanolayer on the steel and we can't do it. One of you has coated it with copper plates. I was just talking while the work was going on this morning with Marco that we zinc coat one of his
reactors and what do you call it, chrome another one because we cannot nano coat the steel. Somebody knows how to do it, it will be very interesting, it saves us a lot of time and energy. Because everything at the moment is going through copper, now we we're going to do a chrome and a nickel maybe, or something silver,

that we can start a process not all be the same.
Then it will be the same planet condition in all the reactors we run in the lab.
And we need the differences.
Something I've noticed over the last day, when I had a stainless steel pot on the stove,
and it ran out of water, and it burned the bottom of the pot,
and made it turn into a sort of a blue...it blued the pot,
they call it, you know, it blued the steel, the stainless steel,
and where it blued it, it'll actually corrode in that place,
it actually creates a rusty sort of coating on that burnt area,
so maybe the heat would be a way of treating the stainless,
to be able to have it accept a coating of some sort?
Have you guys tried?
I think we tried that, we tried it, no? John tried it.
We tried it, it doesn't work.
Not with the stainless steel we have, we have 304 stainless steel with the reactors.
Yes, and there's several kinds of stainless steel too, with different materials in them.
We are looking at it, something most probably, we got to, there must be a way to
nano, nano release the atomic structure of the surface of the steel.
But not found, if you scratch it, would it rust?
But that would be only other places where it rusted.
Okay, is there, we should probably start wrapping things up here, I was wondering if you had some final comments, Mr Keshe, or other people from the Institute, on the, on the Schizophrenia topic that was the main focus on this medical side workshop here.
(video playing)
I think we put a point out, it's just how we can get this. If somebody can, what do you call it, write down what we said, in a text form, send it to the Foundation, we put it on the website, the way people downloaded this, what do you call it, ILS, they download and they understand. Because there is no more time to write books. If I start writing books, there will be never time to teach it.
That's right, we'll keep the transcripts.
We'll work 20 hours a day.
The transcript, we have people working on transcripts for all the workshops,
so we should have those together soon.
If you can let us have the transcript of just this workshop on the,
what do you call it, schizophrenic,
then, and don't put it schizophrenic, we'll put it, what do you call it,
The reality of it, in bracket, is schizophrenic.
The beautiful twin, that's what I always call them,
then we put it on site that a lot of people can read.
Maybe we free a lot of people from the cage we have built for them ourselves unknowingly.
Our biggest problem will come from the FDA,
Because now there is no more medical medicine to test, they are out of job.
So they oppose us more than anybody else.
This is what you call, we know this, skeptics.
These people who are skeptics and they are working very hard

to bring the foundation down.
We have gone into the detail of their incomes.
They are all paid by pharmaceuticals in the background.
The main income comes by pharmaceuticals, hidden in their Swiss private accounts.
We open their accounts and you find "Skeptics" is another name for blocking by pharmaceutical.
All the members of the "Skeptics" group, which are working very hard,
in different countries, their wage package is paid by pharmaceuticals.
That's easier to get people to say, "I'm a public",
but in fact their Swiss bank account shows they are getting paid monthly 30,000,
in a year, 40,000 a year. We open their accounts, these are criminals acting as a group called skeptics, they are a bunch of people, we have access to all their accounts, we've seen their accounts, they are wage paid by pharmaceuticals or the groups which they support, whether they fund their normal people. You are criminals, you are criminals beyond. In the courts of Belgium, you open your names on your bank accounts. I want to know how long you're going to spend inside.
Next question.
(RC) I think maybe we should wrap things up here.
It's been three hours and it's probably time to let you guys go.
There's no more pressing questions.
(MK) What do you want the topic to be for next Thursday?
Well, gee.
(MK) Send it to us, give a bit of brainstorming and we'll do it.
(RC) Okay, let's brainstorm, yeah, brainstorm it and present you with something.
(MK) Okay, okay, thanks very much, have a nice day, thanks Rick.
(RC) Thank you very much. (RC) Thank you.
(RC) Thank you very much. (RC) Thank you.
(RC) Thanks Mr Keshe. (RC) Thank you.
(RC) Thank you Mr Keshe. (RC) Bye, bye.
(RC) All the knowledge, thank you. (RC) Thank you.
(RC) Thank you Mr Keshe.
(MK) Thank you to you. (RC) Bye.
(RC) Bye.
(RC) And so ends... (RC) Bye.
(RC) Thank you everybody.
So ends the 4th Knowledge Seekers Workshop,
direct from the Spaceship Institute, and all the Knowledge Seekers.
Thank you everybody for attending. Bye for now.
(MK) Thanks for having me. Bye bye.
(RC) Thank you. Bye bye.
(MK) Ready for breakfast.
(upbeat music)
[Music]

5th Knowledge Seekers Workshop – April 3 2014

(:04) Talk about the decontamination of Fukushima waters with Gans and Nano materials. (:08) Talk about the construction of reactors. **(:11)** Being careful about the reactors, because they did not put any reactor to work yet. **(:14)** Come back to talk about Fukushima decontamination. **(:16)** Marek make a Summary about the Fukushima decontamination. **(:37)** Armen talks about the control of reactors. They did not test yet, and when they do this they will share pictures. **(:44). Keshe comes in.** Mr. Keshe explains about the whole structures (of Gans and Nano Materiasl). Do to different layers wich is produced in the sphere you get layering of the same material, but do to Gans being independent MaGrav Fields Spheres you create different MaGrav Spheres in different layers within the sphere. Originally now the main field strength will sit on the bottom. When the material is fulled filled in then the control move to the center of the sphere. So the whole Plasma of all the Gans materials becomes Plasma of a bigger structure in one unit. For the time being the Gravitational field of the Earth wich is bellow is affecting the Spheres slightly, but as this core was built this morning, the water was separate from the material and at certain point when we manage to fill it up all with the same material the Plasma center moves to the center of the sphere and the materials becomes <audio break>. Each Gans material is a sphere of balance of MaGrav, so each Gans material is a sphere of its on (??). The connection with the next Gans is not trough electronic but trough MaGrav of the same strength. So what happens is, a person who makes the contact with this sphere because it is made of CuO2 and CuO2 is part of the structure our body, when you touch the material the material the sphere the protein of your fingerprint makes the contact and connection with the sphere, with the material in the sphere. You make a link with this sphere, whoever touch this sphere makes a connection. So this how in the future we can have different operators running systems. **(:47).** The reason I built this reactor, or computer system, this is exactly copy of the structure of the Brain. There is no wires in it, but in time different parts of the system will start to accept different responsibilities. If you cut the Brain in half you will se that there are not different materials, but different densities of the same material, this structure will go trough the same process. So as the structures changes in different densities, different responsibilities is accepted. In our Brain, as a Human Being … Because of the weight of our body, where the main Brain sits, our Emotional part sits in the main Brain section, very small part. Then the rest of the Brain is Phisical and connected with the Emotional and the Physical. With this system the Emotional Part will move to the center, and the P will move to the outer part. In the process of producing this material, I think you have seen some pictures in the past, there are channels created and the hollow Magnetic field center is created, when these materials were being processed in the past few weeks, so you have seen the M fields on, what you call the black hole or Principal Hole in the center of the material. Now this principal hole will move into the center of this sphere, so in a way what you look at in this picture is the first wireless computer control system, this has being in Microsoft and other companies, now this is a reality. It is a Zero time communication, because the body create M fields in the same length and strength, so from now on what you think will be automatically transferred to the motion within the structure of your reactors if you wish of direction of motion. **(:50)** This 3D non wireless computer, or control system now is a reality. Part of this operation was showed in

Fukushima, in the test of Yukako in Japan. People did not understand because people do not understand the whole totality. This test is a change in the whole concept of nuclear technology and contamination. You will see the graphics, Marek is working on it very professionally. This is the first time that KF is putting scientifically this out, thanks for the knowledge seekers. You will understand a lot of thins, understand the figures. In one of the test we see reduction, and when we put CO2 we see increasing some numbers. You can reduce the radioactive material to become of a lower order. Keshe talks about the reduction of Uranium and Plutonium. We asked the question for the government: Why such a high level of Plutonium in the water in the fire station? This bring a lot of political situation, but brings something good, means that any nation that is building nuclear power station they are all involved in the production of Plutonium. Not crucify one nation. **(:54)** This brings one thing. How can you produce CO2 in a gans state that makes all the radioactive materials non-radioactive? You can not have radioactive material even having Plutonium, now we see no Gamma radioactive in this container. We know that Cesium have a lifetime of 30 years, so how can in a matter of seconds change radioactive (high) into a non radioactive source. This goes to Gans materials. You have to realize the way you see the pictures in the lab. When you convert the Gas CO2 in Gans CO2 you release energy, that is why the light is running in the lab. Because the material becomes MaGrav balanced, an at the same time the energy in the water released, in conjunction with the H and O in the water, plus the N that is crossing, is producing fat (protein). This protein went to the lab. If we measure in the container of the water will be transferred into gases or energy that we can use, the same happens to Gans of CO2. In these waters we have Gans of Radioactive materials which are in balance. We have not change the material to radioactive to non-radioactive but the same as CO2 we changed the material to Gans, now Gans of Cesium in balance in his energy has become non-radioactive. Now we can carry materials with us that can be use in the space in a non-radioactive position, and then later on changed them if you wish to radioactive material. But this brings one thing to the world of science, No Materials can be dangerous to Human Beings. **(:57)** Radioactive is not a problem anymore! They do not want to work with us because they have different agenda. **(:59)** In Fukushima we want to know how much of the material became Gamma ray safe and Alpha-Beta ray safe. Keshe says that they are open the doors for the cancers patients from Fukushima. **(1:03)** With Cancer we do the same as we do in the radioactive material, the cancer can be there but not as a malign cancer. We can use the CO2 to eliminate most part of the cancer in respect to the radiation that generate it. **(1:07)** We made the decision to open the International Knowledge seekers to the world. Keshe explains how to be a student of Keshe Foundation. **(1:20)** We offer our technology for the prince of Belgium if the situation get critical (he is in coma). **(1:23)** The 3D system is a zero time communication line, what you transfer to it, you transfer to another system. With this system you communicate with zero time throughout the world. You can be in another planet and you can have zero time communication in space. These are the teachings that we are going to give very soon. This System, this sphere does not need anything, is a living entity. It absorbs from the environment what it needs and feeds the environment what it needs. So, is pure, is clean. **The people who interact with this system, if they are coming with a pure heart and they are in the same MaGrav which is pure THEY WILL SEE THE LIGHT!** Very much the way I had always explained, the MaGrav field of the Earth in interaction with the MaGrav of the Sun

creates the day light, when you reach the purity of the ball you will interact, and you will see the light. That is the reason that I put the light behind it as you can see in the picture, because your life will be much stronger then this light, when you reach the maturity. The condition of this ball is, because it doesn't need anything it doesn't fight for anything. Peace will become part of the people when they interact with these systems. This is what I call the ball of the Truth! You can not lie. When all the knowledge seekers sit around it with sincerity and one goal they will see the light, because each one knows what each other thinks, because they know the color each one in respect to each other. Is like the light of the Sun that we can see in this planet, the light is slightly different in another planet. **(1:30)** The fat in the surface of your cup (of Gans), if you just touch it you will have energy fro the whole day. There is no need for no man to go hungry. **(1:33)** Thousands of people building the reactors. Keshe talks about the plan to try to murder him and his wife. **(1:38)** Rick talk about Nano Coating other materials as sand. **(1:40)** Question: Are the Gans indestructible? Keshe answer: No, let me explain this. It is about to be able to change the Gans to the structure of the environment where you want it to be. You DON'T destroy anything. The question was about environment protection and about dumping the Gans of CO2 in the environment. Keshe says: Why are you dumping them, you do not need to dump them. There are so much applications for the Gans of CO2. If we extract too much Gans of CO2 there will be more disaster them global warming. These materials can be used as a fertilizer. You just produce CO2 when you need it! What happened to the planet when there was so much CO2 with the salt water of the seas, the gases converted into protein and into O, the O of this planet came from the conversion of CO2. Like the cows when they eat the grass and convert them into protein, and now we want to cut off the cows. We don't need to dump anything. When you convert CO2 put a cap on it, on the top of your system and measure the amount of O you are producing. This is the test we are going to do on the Fukushima material that are coming. **(1:46)** The question continues… The CO2 in the soil will decompose with the time? Keshe answer: No, it remains as CO2. The only way we have seen Gans changing to Gas, all it does is go back to CO2 again when you burn it. It will stay forever in the land. So the way to safely discharge the CO2 is burning? When you burn it you put the CO2 to it's original state, gas. We took the energy and we showed as a light, in our body we take the energy of matter to gans and it became the heat to our body. So when we put the energy in its specifically place by burning will go back to gas again. The guy talks about FDA put people in jail if a person get treatment of cancer without FDA approve. Keshe talks about FDA corruption system. **(1:57)** The question continues: The CO2 Gans will be absorbed by the plant as a nutrient? Keshe answer: No, it becomes the tool to attract the M field of the H and N, which the water needs for energy. The reason you water the plant is to allow the N to became active. To active to create energy to relase the H. CO2 is the medium to do the job, it does not become the food. This is why wheat and other things have such high levels of protein. CO2 is part of the combination of AA, C, N, H, O. This is the reason we have meat as protein, because that conversion has done. You have understand the totality. If you look how different soil create different roots and fruits, because the condition which is created allows the absorption. If use the CuO2 gans your plant absorbs something else. **(1:59)** Questioner: So the presence of Gans will facilitate for the plant the absortion of all the nutrients? Keshe answer: Yes. Bravo! Now we understand the intermediates in this planet. So the more Gans we have in the soil

better is for the plantation? Keshe answer: He talk about a report about the amount of Gans for seeds and plants, because what happens is that the plant receives a lot of N and the O and water from the moisture of the environment it goes "fat". You get bigger harvest. We will answer this in the coming times. We understand this because the MaGrav of the O and C, N sits in btw it is enough to attracts N, the N who becomes attached with the CO2 which becomes the food for the plant. Find a way to create a fertilizer. 59% of the air we breath is N and CO2 C is 12 and O 16, and in the MaGrav bonds of the Gans they attract 14 which is btw the two, because the N becomes close to it and get attracted to it, the way we've done in Fukushima, it gets pulled by the plant. You can not over feed the plant with N in the fertilizes, it will take what it needs. This is what I say in nature you take the much as you need when we need it. At the same time when you have the N as we seen in the bubbles, you create a special protein, that protein releases the H with his presence becomes the water, the moisture in the air for the plant. So the plant not only feed itself trough N process to release the H for the energy it absorbs it's own water from the moisture of the air. We don't do any magic, now we understand the process. **(2:04)** Question: Ask about the containers that did not capture Gans. And the second question is about if you want Ch4 Gans, how you change conditions to get this? Keshe: depends of the material you use and what is available to you. This goes back to our nuclear physicist trying to make a formula for you. But it is not a chemical reaction, you have to understand what creates the MaGrav field of the material which you want. Keshe talks about creating gold from fresh air. You understand the condition before you create it. The problem is that we want to find something to do something, but if we know what we want we create the condition for that. The difference btw CO2 and CH4, is simple, they have different numbers of electrons and different atomic structure. I don't see the atomic structure, but I see what MaGrav accommodate each other. Keshe talks about an experiment that he did with high pressure, that he expected to create protein, and he created a lot of fat. Keshe says he will show the reactor in public. **(2:13)** Keshe talks to Brad share his experiments to teach us. Question about sleep walking. Keshe says that sleep walking is very easy, you don't sleep walk, it is a different state of mind. You have to understand the structure of the Brain, btw the E and P. in this case the P is active and the E is disabled. One of Keshe sons did this, he went to the fridge to go to the toilet and he had to understand the process. **(2:18)** Rick asks about the Brain being the control mechanism on the craft, being more emotion and sense apparatus then thinking… Keshe says yes, and that he will explain this in the future. Keshe gives the example of sense somebody when enter in the room, it is a zero time communication. Rick asks if Nano Coating is super sensitive to human fields. Keshe says that it is not sensitive is beyond matter. In these workshop we speak very generally, the general talk is over we are going to be very specific, to detail teaching. **(2:27)** Keshe talks about people who wants to go there to the Foundation and learn there.

>>>>

6th Knowledge Seekers Workshop – April 10 2014

Main topics will be Fukushima and Nano Materials. **(:05)** Yukako explains about the situation in Fukushima. **(:07) Keshe comes in.** Keshe talks about the Fukushima

situation. **(:08)** There is a huge difference btw what we have offered as a Foundation and what is available in general in the world of radiation and contamination. One of the most important thing which came to light in the negotiation with the Japanese authorities was that there was no interesting in new technologies, there is zero interest. So we will see what will be the next steps. The reason of no interesting is that because they are already committed themselves with multibillionaires to manufacture things. The only thing that they are doing at the moment is the separation of the material. We will release a paper in the next few days that put our development in a total new class in respect to the nuclear industry. Keshe talks about the video of Yukako in Japan. **(:10)** In any case in every application we see reduction. The nuclear industry are separating the radioactive and contaminated materials and are putting in tanks, to wait for a lot of years until they get not radioactive anymore. **(:12)** We have not separated the radioactive material, but we have allowed the trough the development of new materials to converts materias which are radioactive to Non-radioactive state of the same matter! This is Fundamental! Soon this material will be published. In Physic language we managed to put Cesium non-radioactive in matter of seconds, which means when you bring the same material in it's Gans state it brings the MaGrav fields into balance which is radiated by it's neutrons and that gives a state of Neutral non radioactive condition. What this means is we do not need to remove the material from the scene but the material will stay in that condition for years to come. So in matter of few seconds we have turned radioactive environment in non radioactive environment without withdraw or extraction, but aligning and creating the environment that would allow the material to become like Gans of themselves, and this is exactly how the body of the man handles Co or Cesium, when they holds on to for application of the cells. The Fukushima work has opened a huge door in the world of Physics and Biology. We do not need to remove these neutrally balanced materials as Gans, because their energy and their condition can be used in the environment as a fertilizer for the plants for example. This test have huge implications! **(:15)** We allowed the environment to adapt itself, and not tried to take of the radioactive materials. **(:16)** Yukako show the papers of Fukushima Experiment Results. **(:47) Keshe comes in** and answer about putting different materials in the Nano Coating process. What you ative when you add different materials in your original coating, is that in the future when we have more details in the break (??) of the layers is that all your materials, let's say that you use Cu wire, what you get is the Gans of Cu, layer by layer. Through the Gaps in the layers you allow the CuO2. In introducing the plastic from Coke bottle from aluminum, you create the same Nano layer of H in btw the gaps, so when you put composite materials in your caustic somewhere in your layers, those materials become part of, becomes composite nano layer, and in some cases when you do this you find multi color mixture when you produce your Gans. In case of introducing plastic from the Coke bottle, is to produce not homogeneous but composite layers, these layers you only see them if you produce enough of them, when you convert your nano layers in Gans state. If you have put plastic in your caustic, you might have let's say 10.000 layers of Cu, 2 or 3 layers of H Nano and then if you put aluminum you get 10 layers of aluminum and then you get Cu. But because you don't have the facility to measure you see mainly the Cu in Gans state, but in fact this is part of the produce that we use for composite Gans materials, this is the next step to understand, but for the moment you just make CuO2. You can add any material that you like and make a sandwich. If you do enough layer of it

you allow the process of Nano layer to be held you find out that you can make composite Nano layer, they don't mix. This is something we are awe of. But if you put too much plastic in the bottle will produce Nano H in your layer the system stop much faster. Because the size of the Nano H gap is let's say 10 (or 9??) and the you get Cu above and underneath, so the filtration stops. At the moment you try to understand about the layer and in the future we try to explain about the composite layers. **(:52).** Talk continues about the Nano Coating process. In resume it's about the caustic condition that you create in the box closed, and not the heat. **(:59) Keshe comes in.** Whatever Nano material you make, will be black. It doesn't matter what you make, the end product will have good enough thick layers and you should get black color. On gold we did not see black, in silver we see spots of blac, but not full black. If you have a real perfect Nano material it should be black. Reason of this is that the nano layers that are made of solid cavity, it's solid container to hold the capacitor, the capacitor is in the middle. The gap the center of the gap and the reason you get a gap is that the matter in the Gans state or nano (first), is MaGrav layer of itself. The Gap btw the two matter is where the two atoms, let's say C find the distance btw two similar MaGrav fields of C, that create the gap. This is what we call when the MaGrav of a atom (??) finds balance, it's position with another atom of C. To find the position, it's like the Earth and the Sun. When you find they find the balance they find the gap, but because the both atoms are of the same MaGrav field you see homogeneous gaps and matter. You have to understand the structure, in Gans in Nano layers, why you find equal gaps, equal materials, it's because the MaGrav fields it's just about the same. When you put two Plasma next to each other they find a gap where they can accommodate each other, so you create that gap, that is why nano materials are (??) injunction look (??). Now the other thing is that the next layer up you have another atom of C, now you have another pin (?) injunction. You have another layer composition in respect to the layer up, so when you have gaps and MaGrav separation layer on layer, not only the tenth layer interacts with the eleventh layer, but the tenth layer interacts in it's fields with the twentieth layer on the Cu wire. The strength btw the tenth and twentieth is different then the strength btw the tenth and the eleventh. So what you in fact produce in the Nano layers are spectrums of MaGrav fields. The material is black because the materials is absorbing all the light, all the spectrums of the Mag fields. If you have created a perfect thick Nano layer and you understand the interaction of the MaGrav fields which you produced in each layer, you absorb trough G field layers interaction an spectrum of the light, so your Nano layers, doesn't matter what you produce if it's good enough must be black, black show the perfection of the nano layer. **(1:04)** It's hard to understand is that the layers of the rings of Saturn, these are MaGrav fields which absorbs. But you see the same thing in the Plasma in the Solar System in the stars. When you let your Nano material dry to stabilize it's condition, because if you keep it liquid there still can slip and you find out that the coated disappear, because you did not created a stabilize condition where all the fields are connected with each other. This is why we let you hang your wires for 24 hours, for the stabilization of the MaGrav fields layers. This is why we tell you the minute you use the Voltmeter on it, it stabilizes a fast connection btw the layers, stabilization btw each other. Now you take the Cu wire that you have coated and put it back in Salt solution, then you see that you get Green, blue… material in the bottom. And you can collect a lot of CuO2, but if you leave more time, 1 weak or more, yound still collect CuO2 but your dark black material has disappeared, what is the

reason? But you have no black material at the bottom of the box. What happened is that now layer by layer, because you created the condition in the salt and back in the same environment that you created, the top layer finds a MaGrav field within the H2O of the water, the condition to release it's field and become separate from the ceated nano layer, so what you get now is a flat condition to a spherical condition. Now in theway of trying to become the spherical shape, the material because it has found balance because of the gaps of the layers, now you have a balance sphere, and this balance sphere is still Cu, but what happened it rotates to become the sphere of the Cu, in atomic structure. Now you get the color of Cu + the O which was part of the bound or the H in the water, and you get the CuO2, so you start to create CuO2, you lose the top layer, and the next layer goes the same way, till you get to the point where the MaGrav field of the Cu itself can hold on in a very few nano layers above it, and this is the point you find out very fine CuO2, and the gap btw them allow the convertion into Nano and to Nano to CuO2 in conjunction with the water. So what you do in the whole process, you put your material in the caustic, you heat it up, when you heat it up you allow the loose of the top layers and these top layers because you keep the environment the same build up very fast. Now you changed the molecule structure to the atom structure. This is the reason you do the caustic. Then you let it hang and you allow it to stabilize, you can leave the wire for centuries or use in the next morning. When you put it back in the environment of what it came from that was the Na, that is why you put in the water with Salt, you allow the same environment that you have created for the separation back into the atomic structure, you go from flat liner (??) to atomic spherical balance, which is the Gans. You got to understand the process! This is how your body is made, you have red tissue, you have the skin, from where does your skin came from? Because of the MaGrav field of the fiber AA is, so the body at that point uses a different Salt combination to make the cover of the muscle, then he uses, because of it's combination and the gap does not allow the blood to go trough but the Lymph to get inside. UNDERSTAND WHAT YOU ARE DOING AND THE CONSEQUENCES OF IT! Keshe says to look and understand the difference in the Gans that you produce. **(1:12)** If you understood how one atomic layer in respect to another atomic layer stands, f you at the next layer the c should be somewhere in the middle btw the other two or three C underneath, not in the top. In the next few days you will see… You see the same repeat, because we understood the whole concept, you find the mother reactor, if you find the design of the reactor of the SS that we released, you see and say, Oh, this is what is going on, look at the position of the three reactors in the bottom and the reactor number 1, it stays at the same position combination as nano Layers, but in 2 layers. The mother sits up, same distance gaps, and the same distance down. Because we do this it allows us to create any MaGrav field in any direction as we desire. The Nano layers into a Gans state as a nano layer in the space we did it for the lift of the SS. Now look at the structure of the AA, O sits on top, then N, H and C play very similar position as the SF, this double bond is a bunch of rubbish, they never understood. Is MaGrav positioning! The system which are built specially to produce Protein, I showed it yesterday, you see two gaps (??) one gap clear, one gap going, and you find that the clear gap is the O in the center, 2-1-1. And then because I set up to create the Soul, you find the one you find the (??). This is exactly how the Brain is, you have the E you have the gap, you have the P you have the gap and then you have what you call the Soul, and nobody have understand the connection. The system was built to produce very

very little volts, or current. You don't see Megawatts in the body of the man, and it works, because it works in Nano micro voltage and amperage. **(1:17)** Question about soldering the wire. Keshe says that he did not understood nothing that he just said. The reason you can not solder or weld nano material when they are coated is because when materals is it's balance condition it does not accept anything, because it is in balance, as it is in the Nano Coated wire. The only way you can add something to it is by forcing. That is why Nano layers behave like diamonds, they have a MaGrav balance where they do not accept or reject. **(1:22)** Keshe talks about Nano coatings Silver and gold, and how they do not become totally black. **(1:25)** The gap in btw the layers as much as in separation is a center itself of energy of MaGrav field too, because to keep that separation the matter part, the atom of C, have to continuously release their fields to keep the balance presence, and where does these fields goes when you have a gap. **(1:27)** Question aout the content of salt in the water. Keshe: when you change the composition, when you change the dilution look at the structure of the gans, if you produce enough of it keep it in the box and look how much MaGrav fields balance comes in, and then try to measure the voltage and the current according to the dilution, and then while your are doing that keep an eye on the top, how the structure of the fat you are producing feels like. If you manage to make the CO2, do to the situation of very low flow of Plasma. You have to understand that you are releasing MaGrav and not electrons! The thing on the top of the water is fat, if you eat it you lose your appetite because you receive directly Plasmatic MaGrav field as your body is made of. This fat is the source of life. **(1:31)** These are the future feeding systems of the future, but we have to understand how much energy we receive. In the soils of Fukushima wheat can grow, because it is contaminated, the salt condition in the soil has changed, if you could wash the land and take the salt content out the land become in the condition that can produce wheat again. This is what the Gans materials allow the wheat to be grow. **(1:38)** The current in these systems (CO2 Boxes) are a Plasmatic flow, not electrons. You take from the environment what you need. If you run your system long enough you will see that after a time there is no more production, because the material in the bottom of the box comes from the Cu, and in time you become magicians and can make that material disappear. We have time enough, to allow the nano layer in the Gans state to be established then you come to the answers of the creation, the brain of the man and the zero communication time. Because they create now in the ball the same structure you had in Nano state, but now in Gans state, and they have to accommodate each other. We can create computers which are instantaneously, exactly like the Brain of the man, this is what we are trying to do. You have to understand why brain is not in a liquid environment, look at the edges where the liquid is, is slightly different texture of what is inside, because from that layer as a material it is produced syncs in, one is outside of the Brain near the Skull and in duo time when it syncs it becomes the Emotion. Your E part knows all the effects of the P pat, but at the same time it knows the way that it has come and it have a line communication with that part. That's how you feel pain in your arm you move your arm, because the cell which became the part of your E part reaction has come trough that part and syncs to the center. This is what the world of medicine never understood. It is not that the cell comes from your main Brain and connects with somewhere, the cell which comes in your main Brain, and that is why you have the wish to die and the amputation of your arm because you can not do it yourself, because that is where it come from and it syncs into the center. Look at the shape of your Brain is a

Nano Gans Layer. **(1:47)** Question about Nano Coating of the Cores. Keshe: There is a way you can dictate the thickness of coating in your cores, the way is, you use a dry container and you shape a mount of caustic on it, if you want a heavy coat in the center, you mount like a little hill in the center, and you put your core right on top of it, and then if you want more coated at the edges you do the reverse. **(1:51)** To make a perfect Nano Coating you need something about 2 months.

>>>>

7th Knowledge Seekers Workshop – April 17 2014

(:01) Marek says that the Knowledge Seekers accomplished to build the reactor, explain about the reactor and how they prayed for the reactor (The Plasma). **(:07)** Marek says that the reactor don't use any form of radioactive energy, just Nano layers. We must be patience with this Technology and create the right conditions for this new technology start to work. **(:35)** We need to go deep in this knowledge, it is not about build things but really understand what this new technology is about. **(:45)** Nano materials are more like open spaces, is more close to Plasma then in matter state. They balance immediately with the energy that is around. **(1:02)** Ivan talks about his perception about how the technology of this century was built based on fire, that is an entity and have it's awareness, and now this new technology is based on Plasma that is an entity as the fire but have a different tipe of awareness (higher awareness), and it will only allow it to be open for peaceful proposes. **(1:05)** Rick talks about the knowledge of ancient medicine, the fire of the body in the Stomach (Solar Plexus) and how the enzymes of the stomach are connected with this fire. **(1:14) Keshe comes in.** If you add Gans nothing happens into the solution (caustic), we tried, we put caustic in the Gans liquid and nothing happened. Gans can only be changed in one way, back to the Gas. There is only one process where you can convert Gans into a matter and you can convert Gans into Gases. Burn the Gans is exactly what happens to your body when your are cremated, that is why nothing is left when you are cremated, except the ashes of the bones and some of the salts. Trough a certain process you release the elements of the body back to the gas state. Now we understand more what cremation does, and this is one of the only ways you can do it. When you are producing Gans out of the nano layers out of the materials in the salt, you can run this for months and months till the last atom of Cu in your electrode you will find that you will be producing Gans, what happened is that this is the skin of the man. The immediate layers near the matter components of the Cu create a specific MaGrav field which is associated atomically the Cu from it's molecular structure. Then as they go trough the gap of the layers they are changing to a gans, you find that you continuously collect CuO2. Once you start the process, even though you don't see the black layers that was there originally, you see and can collect CuO2. This is a major understandings in the world of science, trough a very simple process, we repeat in these containers the work of nature, we are changing matters into its natural condition of element (entity) as single atoms, but in the spherical composition of MaGrav field. In the matter condition (molecular) you find the bindings which pushes and literally brings the elements into a matter strength MaGrav fields. By opening it up back to a Gans you transfer the same element (entity) back to its original condition, so you look to the gans in the box you will see little individual balls. Every single ball you see with your eye is one atom; man has

never being able to see a structure of a single atom. The gans are single atoms or molecules which themselves creates their own atmosphere, so in reality you're a looking to a single star formation. Yes that what it is! You see individual balls, so in reality in one ball you have millions and millions of atom or molecules. There is a major breaktrough in the world of Physics. We have seen it, it has being explained to the scientist and KS. The gravity of what is to be announced in respect in development of Nano layers will change the course of Physics in the next 24 hours. Keshe says that they are trying to put in a language that ordinary science understands, and with this breakthrough all the Physics books must be rewritten. **(1:23)** One of the things that was not understood is that, as Yukako was doing in Fukushima waters, in these contaminated waters we produced pure gold. We have showed what the process is in Fukushima. Production of the gold has becomes easier then drinking water. Back to reactors. You look the plastic reactors made by Iran, the structure of this big reactor and of the small reactor has a purpose. The smaller reactor is electron, the bigger is a proton. The bigger reactor Half Moon is dynamic inside, this is how a protons behaves, it releases its energy internally, the smaller reactor is electron which is dynamic outside, but inside receives fro the proton fields, neutralizes it to create a new MaGrav field for the electron to find its position in respect to the proton which is the bigger one, that is why lighter entities with a lower mass always there position is dictated by the parents by the Mother. This is fundamental understanding in Physics. Proton is in the center, releases its energy continuously because it's a bigger mass, the smaller one (the electron) absorbs the energy released by the proton, it absorbs internally, and it changed the internal core. What it absorbs internally dictate the speed of the internal rotation of the reactor, and that speed change the MaGrav of the electron, so the electron finds its position in respect to the proton which is the bigger one. This little reactor have its cruise and when it find its cruise is very dynamic. You understand why they are in that position. The Mother reactor in the center core has internally rotating and in the center there is a nano Coated material which has the spectrum of all the MaGrav fields embedded on it when it was made. That is why is black. It centralizes the whole Plasma internally. It behaves like the Central of the Universe. Because there fields emanate from them, dictates again the central core becomes The Mother the proton, and the outer became like the electron. **(1:29)** The other three reactors put outside behaves like the electron, at the same time they enforce the fields in the central core, that is why the central core dictates the positioning of the flight system. But there is something else, we go back to the spiritual side. The Iranian half reactor is the body of the man, his behavior what it decide it does, it is reflected and captured by the Soul of the man which is the smaller reactor, and then the Soul receive the misconduct of the body, it adjust and dictate its position in fact dictates the behavior of the proton itself, or the body of the man. This is the way the Universe works. This is when you make the cups on the system I made we see two or three time the structure of the body of the man. Two which is the N and the C, one that is the O in the middle which is clear, we see a H then we see another N, body of a man separation the E part of the man and the Soul of the man. Even in the U we see how its protected and how its done. **(1:31)** If you understand the combination, every single orange color in the box in respect to the totality of its environment is 2-1-1-1-2-1-1 which means the men are connected internally trough their Souls and trough their E, which comes trough the Soul, this shows the essence of the Creation. I am here to learn, to observe, if you can observe what is

happening you have the possibility to further the knowledge, if you are just to make Gans and tool you came back to the same position that the man was in years. We come to one thing which is, you see a lot of half spheres in our tests, the reasons is that when you have hal sphere you have stable reactor, you don't have polarity change, the polarity change trough the current flow of Plasma (as MaGrav field not as electron!), when it reaches a point the whole system in the top of each other they will have to find its position, it becomes like a traffic jam. **(1:35)** Question: The production of Gold has to do with the Plutonium? Keshe: Yes, I explained last time. We see traces and increases of Cesium, this process can only happens if there is a Plutonium in the process, what happens is that the Plutonium conversion of plutonium and the conversion of Cesium (in the presence of Gans of CuO2), the energy released from matter to gans, because of the huge numbers of neutrons within the cesium releases Plasma energy in the level of a neutron itself. If there is Hg in the soil the energy released is immediately absorbed by Hg changes into He and Gold. **(1:44)** Keshe talks about the attempt to execute him and his wife from King of Belgium. **(1:46)** Look at the structure we sat on the floor yesterday, we will start the Space Program with a Pure Heart and with Peaceful purposes. Our mission is complete. Keshe Foundation is officially in the Space Program not by words, but by action. **(1:50)** <audio break>. **(1:55) Keshe is back.** These systems enter now beyond burning fuel. These reactors will not do wrong, because it's a Plasma the Center core emits, and the outer core can only respond back to It in what is receiving accordingly with what is correct, so it moves, that's how the electron does, that is why the electron never hits the proton, because it can not hit its own creation. **(2:01)** Question: What I must do know that we have CO2, or CH3, etc? Keshe: Target what you want to produce. If you create a salt condition that can create and hold on to the C and release 4 H you get your CH4, see the size of the bubbles, you will see what is N or H. We will have the tool to measure this. Go back and look at the picture in the labs, I have used the left over of the Cu wires, if you look the same wires has not produced a single CuO2, but what is doing is producing fat, CO2 and CH3, and it's the same elements, how come some don't change with the same materials? The way they load the Cu wired they created the environment to create specific elements. **(2:09)** Rick asks: if you have a reactor that is rotating, the H will not be able to get into the Nano layers, perhaps, but if it was not rotating would be able to convert the Oxide to the base matter? Keshe: No, you are dealing with the Plasma, once they have their layers they have their own Plasma repulsion. **(2:12)** A man from Belgium show the layers of his Nano Coat, and says that he applied the orange oil as Keshe said in the last workshop, and he go further explaining what and how he did it. **(2:15)** Keshe goes out. **(2:23)** Keshe comes back and says that that reason he asked him to do it was because of the properties of the orange oil, this oil is very much near nano thickness, what you have done with the oil you have created these gaps, they feel like a sponge. This oil can penetrate the gaps of the Nano layers. **(2:28)** Go back and look at the structures of the fruits, like pineapple. In nuclear reactors we see (???). When we eat these fruits the the structure you see in your CuO2 (in the Box), in your plate happens to the cover of your Neural S. If it is not eat in conjunctions with something else it can't interact with it. Read about the fruits with bromelain and you will see the same decomposition in the reactor. **(2:30)** The position of the salt within the body orients the C from conductor to resistor, or resistor to a C, and this is one of the path of Keshe's research about fruits that we eat and how it reacts in the body. In some places they forgot

why they eat things. **(2:36)** Keshe explains why you can have more energy at night time. It is because at night time you absorb all the energy which is coming from the Earth, so with this technique that you have done (with the orange oil) if you can make 30 thousands strips like this you can produce 3 or 4 Kilowatts every night, more at night when you need it and at the day time when you don't need it you put in front of the Sun, does the same thing. This is the backbone of the Keshe day and night power cell. Know something, our body is made of Gans, when we lay on the ground we feel very good because we still got these space gaps and we still are in the Plasma condition as a Gans, we get what we need from the ground. When you slip btw the sheets you don't receive nothing, that is why you wake up tired. If you can make a bed of charcoals and different minerals, and you could sleep in a different every night you would see that you would have a totally different behavior. What we absorb is what we need. If you are depressed take of your shoes and go walk in the garden, just a few minutes in a day for a few weeks, then you will see what happens. You absorb walk at night time not day time, day time there is not much field because the MaGrav field of the Sun is very strong, it pushes the minerals and the fields on the ground. That is why some of us became root eaters, the root eating is duo to the fact that in North atmosphere there is light so most of the energy stays in the ground and get very much absorbed by the roots that we eat. **(2:40)** Question: About walk in different sands and try to absorb different fields. Keshe: when you walk in the sand you massage different organs in your body (Reflexology) that is a different process. When you walk in the grass or near the sea specially at night you absorb the fields. Don't mix the two together. Question about living the body. Keshe prefers to not comment on this. Keshe said that one scientist that he talked with said that he could jump like a frog he said that he was levitating, I said that he is not levitating what he was doing was a jump frog, I explained to him that when you sit in meditation you can hold charges in the P pat of the body and when it goes to a saturation point there is a spot on the back of your neck which controls the release of information or energy to your muscles, and you find out that these guys can jump only with folded legs, so much energy is released into the leg that it can not go anywhere and they get pushed and you create a jump. Leaving the body is the same state, you have to find out with which part of the body they are doing it. If you concentrate your energy in your E part you can get that feeling of leaving the body. Question about people who can disappear, Keshe asks him to show him one person who can do this. The guy says that he will try to talk with his friend. Keshe says that this can be understood if you understand the works of the Creation of the information within the P and E part. There are people who are in front of you who can disappear, but for real they do not disappear, they create a MaGrav field in two layers of the Brain which the fields within the cells of the body go neutral in respect to the environment that they are in. We do the same thing in the Space Reactors. If you can create a MaGrav field within the structure that is equal to the environment, you don't need to move, you become part of it, so there is no friction, the only way we appear they way we are is because of the Plasmatic Grav Gans state of our body. **(2:46)** Keshe talks about his notes on bacteria and virus. The difference btw micro organism and virus, one of the reasons that the medicals never found a solution for virus, just have to wait them to go, because virus are single atomic Gans of the Matter in a different state, that is why they need time to make their job. By introducing a different salt condition in the body they can convert the virus, they are like radioactive materials, release a lot of energy, and

that is why they are very dangerous. They can convert these Gans to a matter state, not Gans state to radiate, then the virus can be brought under control in a matter of seconds. Question about how Keshe tech can be used for Pharmaceuticals and to food transportation. Keshe: You have to go back, we use microwaves nowadays to keep away from microbes, if you understand the process you can make this in another way, you have to go back to the essence of Creation: Salt, Radiation and a Conversion. Life on this planet would not be possible if there was no Salt and N and O. Virus are totally Gans based, remember when we say molecular CuO2 in Gans state is not 1 Cu and 2 O, so what you have is one sphere which contains the MaGrav of the two, so that is why you see the green. When we speak of a molecule Gans we don't d as a matter state with bonds and the rest, is the totality of the field weight mass that decide the matter. So the Virus are the Gans of the Materials! **(2:51)** Question about how they can help Keshe in this trip to Belgium. Keshe says that he can be killed in this trip. And say that the King of Belgium is threatening everybody. **(2:55)** We are going to do our job in our way not in their ways. The way we are conducting the teachings in a correct way has a reason, those who are wise have understood. Technology like this does not go in the hand of a pedophile. **(3:00)** Question about molecular bonds and Gans. Molecular bond is a MaGrav package, when it comes to a specific position it comes to matter and comes to Cu and O. Go on the internet and see the structure of the upper atmosphere of Saturn you will see the shape. These layers which are absorbed of the Solar System come as Energy pack, because of the MaGrav fields of Saturn be so big they change to the Gans of that matter that is He and exactly the structure we have on the floor with the three reactor here, and if you go to the roof of the lab you will see an hexagonal formation. We made the lower base reactors we put one in the center, if we put three more around what we will see above is the hexagonal shapes. The interaction of the MaGrav field of the He in interaction with the MaGrav field of the Saturn in such a far distant allows the manifestation of the Gans of the He, and as He get attracted further to the center of Saturn they still are Gans, and the interaction of minimum 3 make the exact shape of the cloud (??). As they go further duo to process that are within the Saturn can be mainly Gravitational, partially on Earth atmosphere is duo to the N in upper layer the energy released, converts Gans into matter, that is why you get the rain and the N, N changes the Gans into a Gas. We have N Gans which is the essence of life in this planet. **(3:07)** Question about dump the Gans. Keshe: This virus entities can be produced in space as is on Earth, what this means, we are producing Gans and we have to be careful with this. CuO2 in Gans state is not toxic. These Gans are like Solar Systems, full of balanced energy. Do you throw the Sun in the garbage? **(3:10)** Keshe talks about the experiments in the lab, that they are producing a lot of fat and say that we don't need the animals anymore to have the proteins. **(3:13)** It's the salt content that decide the protein.

>>>>

8th Knowledge Seekers Workshop – May 1st 2014

(:01) Talk about the interaction btw the reactors in the lab and the reactors were not turning on, but later when they turn on again surprisingly the power was higher then before. They are trying to figure out why this happened. **(:09)** In the other reactors nothing apparently happened. **(:11)** Marko talk about his reactors and that they put Gans

inside the spheres, he says that the reactor would change the velocity by his own. **(:26)** Rick talk about the motors to be used on the reactors. **(:44) Keshe comes in.** Talk is about using nuclear materials. Keshe: The point is that when we use nuclear materials with a (??) we achieve Plasma in seconds, because we control everything. In the reactor like the Iraninan that is now on the floor we use about 400 radiations sources in the small reactor. But now we are using nano Layers. Keshe talk about Marko reactor. It took something like 28 hours to achieve Plasma condition. The reactor of Dr. Ivan stopped work one day and the next started to work again. They worked out to put the outer reactors in a specif velocity and then they could see the Plasma. But the interesting point has being that this is not coincidental, for example when Ivan reactor was in the saturation point the reactor B of Armen and Marek, we saw the changes in current from their power supplies to the motor of the reactor which reached the Plasma condition, this shows that it have a Plasma interaction btw all the cores, and this is instantaneous. When you say nuclear materials we see this instantaneously. There is an indication of the reactors that had created Plasma, we must find it's configuration. The melting of the motors are very common. Keshe talks about the interaction btw the reactors, the outer core and the inner core. **(:52)** The main reactor that is sitting in the center has the same volume as the Brain have, just a few millimeters aside. In the coming weeks we have being producing Nano CuO2 which is being put in this Brain to make the first wireless computer control system. For the first time we will have gans in the center core. This will take another month to achieve because we have to produce from the same material. The original plan was to fill it in with H Gans but now we will try CuO2. The original reactors which were used in the past they had a liquid Iron in them which used as a paint (??). The point with this development is: because with the Gans of CuO2 in the table are made from the same wires and the same Gans materials in the center core in the energy systems we have the opportunity to control the central reactors by thought Emotion, more then the Physical connection, because the dynamism and the system are all both the same! There is a possibility that we can rotate the "Brain" dynamically but not at a high speed, but in the next months we will test the nano communication system from the teachings room into the lab (40/60 meters of distance). **(:56)** We most focus on the production of the protein in the top of the production of Gans. We can explain how the man was created in this planet. All the oil we are digging in South America and other places is not produced totally from the remains of animals that died, this do not make sense. Now we show that the oil has being produced naturally by the process of conversion of CO2 and the production of O and the byproduct has been the oil. Where these oils could not link up to become plants or animals they have sunk into the inner core of the Earth and became the oil that we know. Even today these lakes and seas and oceans keep producing oils, and the oil production as we are used to is still carrying on, Nothing to do with the death of animals, this has been another hypocrisy. We informed to the oil companies that we do not need to dig holes to get the oil and then refine them, with this new technology we can produce oil specifically with the characteristics which you like. **(1:00)** Keshe talks about Fukushima and says that there the oil started to be produced by the interaction of the water with the CO2. It is like the plants this process; the oil that we get is very gentle, that is what we see the oil that we get from the plants. With the curly wires we get a different characteristic of oil in the top. It is like the human tissue … It show we can dictate what kind of oil we produce. Know you understand how

the human condition was created in this planet. **(1:05)** Keshe talk about the position of Keshe Foundation, his life and life of his family regarding the treats from authorities from Belgium. **(1:25)** Very important announcement to make. We had to delay a lot of things because of personal treats. I am proud to aanounce that the KF has an institute built with residential facilities. We have accommodations for 80 students. **(1:30)** Keshe explains how the train in the University of KF will work. **(1:37)** Questions: It is a non profit institute? Keshe: Yes, Keshe explains further about this and about the costs of the Foundation. **(1:41)** Somebody asked to Keshe that if he is the Messiah why he don't give everythin. Keshe answered that this person have not understood anything and have no idea of what is coming. The message is very clear, we are all Messiah for the level that we can understand and not beyond, it is my job to open your eyes to beyond and understand. The man on Earth is like the time when the man was in the village but knew that there were cities with cars and so on, but he never been there. When he goes to town he wants to go into the car, you can go, but you have to understand that the car have an ignition, a break, and so on, the guy of the village in the donkey did not had all that have in the car. In these systems there are rules as it have when you drive the car. I have to teach the conduct to behave in the city, other wise you get dead in the donkey. I have to teach you the conduct of the operation of these systems. You are not the only one in the space, and in the space there are rules, and now we teach you the rules. We are just teaching how to build systems mechanically in accord on your level of understanding, the purpose of this is to go to the city (the Universe). You don't know nothing and the wealth of this planet to not worth a cent in the Universe. **(1:48)** We saw the penetration of the Plasma in the reactors above the Institute, this penetration is beyond the build. The Institute became a test area. The government knows what we are doing but keeps us silent to give this knowledge in a correct way. Very soon we will teach about the rules of conduct. **(1:55)** Question about Plasma interacting in Kilometers, is that mean that we can not travel vertical, and need always to have an angle. Keshe: Partially yes. A man who goes with this system in vertical, is like the man who jumps from the Eiffel Tower without a parachute. There is a chance to survive, but very remote. Can be done vertical but there are risks. **(1:59)** Keshe talks about the interaction btw the reactors and how you can go in a very high speed in this interaction in different combinations, they are slowly understanding this process. They will test these things in the new Institute. **(2:03)** I try to prepare you for the next step, about your conduct, consciousness, etc. Why do we see so many lights in UFOs and also sub lights around the Earth. Physical appearance of the Messiah to appear so often, and when it happens it is like somebody comes and all the people in the village come to see. People in this part of this Universe are aware what is about to happen. They are here as a witness. Those who understood the message understand what is going on. This is an unique opportunity. We have to teach you to be ready for a reunion but ate the same time a lot of man will not understand, a lot of man who is attached to Physicality see this technology as a danger to there migger life. But we carry the good and the bad, till the bad become good, and one day they will understand, time of punishment is finished and that is what I try to speak, a language that you understand at the time you can understand. **(2:06)** Question about mixing Gans in the Balls in the Reactor, can we get Plasma from that? Keshe: Of course. Is different MaGrav fields together, this is what I plan to do in the core in the next few months. <bad audio> This can be done, but you have to understand the consequences of what you are doing. If

you play with Gans in the dynamic core understand that the structure of your body is made of the same, so be very careful. You have to understand the structure. Question about the light, the colors of the sky the ray is coming red and the sky blue is the field going out? Keshe: In so many ways yes, but you have to understand that what you call rays are MaGrav you see the balance btw the two frictions, now when you see the light you see different types, in time you will see different lights that your Brain will need to process, these are the Mag Plasma light which the men are not so used to. Our Brain will adjust to it. These things about light years to get into a star is non-sense, because we are made all of the same, is instantaneous, what we see is the residues of what is being left of the high speed and what our Brain can absorb as a matter level. **(2:12)** When we reach the Plasma conditions in the reactors we don't add anymore fuel (H), is like adding water in the fire. What you do is extract Plasma from your reactors; you give Plasma the space to open up. This is how you have rapid speed production, or rapid motion, you don't add more fields, this is the habit of the man to put more in to get more out, with the Plasma what you do is extract the Plasma out of your core in a very measure way, then you go to matter strength to transition strength, so what you get is higher speed, because the more close you go to the more stronger are the fields, this is how you control the direction of motion, you play with the Plasma dimension in MaGrav field. Keshe talks about an experiment that he did with the reactors, where he touched the reactor and he could exchange Plasma and the system lose weight. **(2:23)** Keshe explains how this research and work take years to develop. **(2:28)** Keshe talks about Fukushima and says that the Fukushima's papers are complete. **(2:34)** Question: Have you ever saw a spider web formation in your Gans? Keshe: Yes, is a MaGrav field hollowness. We have seen this. If you understood these spider webs and the fields, go and see a MRI of the Brain, if you have a medical background you will see a lot of similarities and will understand the controls of the systems within the body. If you have a box separation starts to see the different color and materials that you get in each box. If you observe you will see that you are producing not just protein in the furface but in the Gans as cells. You create fat on the top of your box and solid CO2 on the bottom. If you allow the water to evaporate, when the fat mix with the solid, you understand how creation was done in this planet in another form. **(2:43)** A man show up a picture of production of gans of CO2 and asks if the white thing (like a fungus) in the top is different type of fat, keshe says no, this is Ca but will convert in time in CO2, it happens to be like this because of the way he put and touch the wires. This is how Ca became part of the system of the body of the man. Because Ca does not becomes Gans, stays as matter, you will find blocks of this in your box. **(2:51)** You find out that more you work with these reactors you get less hungry, not because you get involved with the work, but because Plasma releases part of the energy and connects with yours and then you get fat. Your reactor become your food station. Question: Does music affect the technology and what is gather from the Ether in the little trays? Keshe: Everything. You pray for the reactors and it get your traces, Keshe says that the reactor is like Armen, is playful and just does the things of the way it likes, because Armen put a lot of his energy on that reactor. Music is a Mag field wave, of course that affects the reactors. **(2:58)** Keshe talk about producing atomic H in the reactors. Question: Is the central star of the Universe is a Gans of H? Keshe: Of course they are. Is the Gans of it. You see this formation in the edges of the Solar Systems.

9th Knowledge Seekers Workshop – May 8th 2014

- **Main topics of this Workshop**

    - **Production of Fat/Oil and in this workshop**
    - **Keshe talks why you get a pure Nano Coating in Plastic containers.**

(:01) Marek talk about the discoveries on the reactors that they are working. They changed the motors. **(:06)** The reactors are steadily. Marek says that Mr. Keshe said that at night the light above the reactors outside the Institute were visible. **(:13)** Marek speaks about the importance to keep the correctness within them, the people that are working with the reactors, to create the right conditions for the Plasma open up slowly. **(:33)** Marko talk about his reactor. **(:38)** Marko's reactor is changing the velocity, so something is happening there. **(:49)** Marko talk about the leakage in the reactor. **(:50) Keshe comes in.** Rick reads a question about what kind of pressure would be advisable. Keshe: You just blow with you mouth. Check the bubbles then you see if there is any leak. The minute you have a leakage don't come to a conclusion that there is something wrong with your reactor. 78% of your problems sits with your connections. Don't dismantle the whole reactor. Go section by section till you get to the core, if you do not find a problem you blow air into the core to check if you have the leakage, and fix it. 100% of the leakage can be resolved without the need to open the reactor. Keshe talk about how to deal with leakage in the reactors. **(:54)** When you do a vacuum test in your systems and it is ok, then put in the rotation and check it for vacuum. Then run the motors for an hour or two, then if your have a vacuum then your system is sealed. You can have a lift with one reactor, but you have to have a lot of knowledge of what to do. **(:55)** If you have a lift with one reactor you have to understand where you wanna go. Test more then one time the system to check if it is running fine. The problem is that most of you use transparent sealing to close your pipes, these materials decompose very fast, and that is the reason for the leakage. **(:58)** Keshe says that the expensive silicone are the best ones to close the pipes. **(1:03)** Today for the first time we have the opportunity to build a SF with 4 spherical rectors. We have the original Moon Iranian reactor, Armen and Marko reactors, so we are having this opportunity to build this Star Formation. Last night I went to check everything was ok with the reactor, and the speed was up and the radio was not playing, it seems that multi layer in the central core concentration with the electron that we put in the middle are very effective. It seemed that the Energy of the Plasma is more powerful then the motors that we were using, so it came to the same position. As we did with Armen reactor weeks ago, the motor has taken the power but it is not rotating, we to wait and analyze what is happening. The Creation of the extreme Ultra Violet is done purely in three reactors. Ivan's reactor we put nano material in every place in the reactor, we have multi layers in the reactor and we saw that we achieved Plasma saturation in some hours. Marko's reactor the core is not coated, but central is nano coated material, that is why we see high speed, because the reactor goes to a high speed with the release of the Plasma. **(1:07)** It cost a lot to make these reactors, this is not the kind of investment that individuals can do. What we are planning to do is to allow not just our reactors, but

your reactors to come in operation. The situation at the moment if something happens we asked Rick to show. The fields are going on outside the lab. Keshe saw the marks of these fields, that is why this area became a flight zone. Not because it is dangerous, but because we do not know how these fields can affect around. Keshe talks about the new Center. Now we pass the responsibility of the running of the Foundation to people like you. We need volunteers who can organize things. **(1:12)** Keshe explains about the reasons of why the Fukushima papers were not open yet. We will collaborate with you your materials and share with the world. **(1:13)** The fat (proteins that we are producing what are they made of? Are they eatable? We have to start collectively the materials that we are producing and share this immediately. You all been waiting for what the technology can do for you or for the world population. We know that the protein on the top of these containers are digestible proteins with high energy. Open the battery of your mobile, make the caustic layers, then put in the salt in the sea of the place that you live, in a small container and connect to anything that can pull energy (LED light) and another plate. Then the material will produce an amount of fat in the top, in hours. If you can specify what energy it does, all you need to do is touch the fat on the top and that will give food for you and your family for the day. This is what we are trying to establish. Mr. Keshe talks about the paper that he wrote and will be released, this paper he talks about the production of oil on Earth against all the assumption of the past that the oil came from animal residuals. I had explained that the oils are a natural process. These oils, when did not connect to the right material as K, Zn, etc. they have sunk into the center of the Earth and became the oil as we see it. One: In the process of conversion of the CO2 from the atmosphere to a Gans as the way it is done with the Nano Layers, not just is converted to CO2 in releasing H and O in the atmosphere, we have produced the oil that we run our cars today. The natural process of conversion of CO2 in its natural condition gives us the production of oil. The problem of the oil that we have today is that we have to refine it to have a specific condition that we need, soap, etc. Now with this technology instead of making the oil and then go to the refinery to put on the condition that you wanted, now we can take the oil that we need from the point of atmospherically condition, so you don't need to refine. **(1:19)** Some bubbles of gases that get out from the water with salt condition are released and some get trapped on the fat on the top of the water, this shows how life got support and got connected to the use of O converted to H, these boxes will show how life actually started, but at the same time when we use different compositions of the materials we see these bubbles converted to Methane (CH4), to CH3. That is will we see a lot of gases where we find oil, this is a natural process. So, the Earth in converting the high levels of CO2 of the atmosphere, into O, has been producing three types of proteins which we know. One protein linked with the right materials has lead to life, what we called animal life. Another protein lead to the vegetation protein, and the protein which is in the conversion has not manage to link too much on the time of its inception, these has lead to the oil, and partially in this process the H link has been lead to the production of Methane gas and other gases which we use. This is the next step to open the technology from a energy point of view. This CO2 thing about global warming is being the most wonderful thing that happened to man if man knows how to use it. You claim that there is so much CO2 and you plant tress, now make little boxes, you make food and convert the CO2 into O. **(1:22)** With one battery from your cell phone you can feed your family. **(1:29)** We are doing these reactors not just for lifting, we are observing

the productions that are happening in these reactors too. We have enough knowledge to locate the reactors in a way to produce different materials, we will start to show this in public. We never had multi composite systems, so it takes time to understand the changes. We have a ceramic reactor, a fully plastic reactor, etc. The motor is directly connected to the reactors, so we control the speed of the rotation, in the case of the reactor of Jorge and Yukako, there is no physical connection to control the speed of the reactor. This give facility if the increase of the Plasma is too much and we can not control. **(1:34)** They will start to do test with seeds, and Mr. Keshe asks the help of scientists to evaluate the seeds. It is not about how the plant behave, what we want to know if the product in the end is better and if the DNA is not changed. **(1:37)** Next weak hopefully the papers will be released (Fukushima, Oils and Bacteria/Virus). **(1:40)** Question: The man had some oil production in the top of the water without electrodes, why did I obtain that oil? Keshe: did you vacuum the system? No. Keshe: You still have gases in there, in any atmospheric condition you have 65% N. So you still have the N to convert. You just need C or O to produce the protein. In the process you do not create just Nano material, your layers create a MaGrav field which can lead to a conversion of O to N, or C to N. The process can lead to the production of fat, because the N is in the atmosphere. You don't create matter, you create spherical Mag fields bubbles which contains in the outer surface the MaGrav fields of N. If you have looked at the Gans underneath the water, look at the structure, it looks like a ball, each ball is literally a molecule and an atom individually. In your container there was enough N, specially in the plastic to extract and add to it. The Nano materials that you see in the top of your electrodes in the Coke bottle does not come from the top it's the Cu which is extracted and it layers itself up and it pushes its upper layers up, so in the layer (dark), it is a tunnel of the MaGrav fields of Nano Layers which are connected and interact, so the reason its black, is that the full spectrum of the MaGrav fields is absorbed by the material, that is why all the Nano materials are black. The layers their own MaGrav fields among themselves! Which goes beyond the upper layer of the Nano coated as you see, the field interaction of these nano layers it goes meters. Because you create a dynamic nano layer, when you use the Coke bottle with caustic and create the right condition the gaps in the nano layers absorbs the C from the neck of the Coke Bottle, and the coke bottle as a pet (plastic) which is a C-H bond releases a high quantity of atomic H. So atomic H partially will be found on the structures, but most part will be used to feed your reactors. And you can convert the atomic H into Gans of H and use as food in the center of the reactor core. So the production of the protein is because you already started the process in the Gans structure of the protein itself. **(1:51)** Second question is about why he is having the little spheres with very low quantity of Sodium Hydroxide and K Hydroxide. Keshe: We keep extracting and it never stops. In your little cub where you got the fat you have created the conditions of the environment of this planet, so it will carry on producing whatever you need. **(1:54)** Questioner continues asking why he got the protein on the top. Keshe: You are still on Schizophrenic condition, you have been brought to matter and know you are seeing the other part of you which are Gans and Nano Layers, and in btw somehow you get lost in some body or the other, this is why I call you that your are Schizophrenic at the moment. The MaGrav fields of Nano layers go meters beyond of top layers, it does not need to be in the environment of the water to do the same thing, being near to and the fields expanse beyond, still the fields interact in the water. The coated layers will absorb

and extract what is in the environment, your system being close of the moisture of the Earth makes this happens. Look at the material, look if you see red spot in the Iron material. If the moisture come btw your electrons and your steel you will see the red spots, this is how the first blood cells were produced in conjunction with Iron. The reason of why the liquid produced protein on the top is because the surface of the water is evaporating liquid (moisture) and that moisture still interacts with the steel, and with the N that is right above the water. Keshe says that he have to try things, the limitations is your thoughts. **(2:00)** Keshe talks about an interview that he made to Italian tv, and the interviewer talk about reading of auras and that they did this in a lot of politicians, and they were all black around their auras, he asked to Keshe if he could explain why. Keshe said that is because that they are exactly as the nano materials, they are black because the colors we see are the materials which we do not need, so reflects back. They are used to absorb everything, everything is mine, and the mentality of the Brain should reflects at the aura of the man. So the environment you create around your nano materials is exactly like the auras of the politicians, it goes beyond the body. **(2:02)** Question about entering air in the container and how long the system will operate. Keshe: There will be a saturation, is the same thing the thickness of your fat will not increase beyond the limits, because the field reach the point of balance, as long as you remove the fat will produce more, but not more thick. **(2:05)** Keshe talk about the researches that will work for investigations of the Foundation. **(2:08)** Question: What are the "rings" of energy that goes out from the Sun? Keshe: I did not have seen one. Maybe is your blood pulse. **(2:10)** Keshe talks about the lectures and that he will put available. **(2:15)** Keshe talk about different ways of doing Nano coating of the Cu. If you want a pure Coating always wrap with something made of plastic. Rick asks about coating under the vacuum conditions. Keshe: Yes it works but you need to be very careful, because if the liquid go into your system you lose your pump. Keshe talk about the test with the plates to absorb energy at day and more at night (he explained this in the last workshop). **(2:26)** Question: The MaGrav field lines that we saw in the containers are like the highways of the Universe? Keshe: This is like the motor ways in the space, these are the fastest ways to go, but you have to understand it. We will start to teach these things in the times to come. **(2:31)** There are more prophets for the buried people then to kill. A bullet is cheap, a ceremony for the death is more then a thousand dollars. They just say a prayer and collect the money; I wonder why the church people do not stop the wars. Who is earning more money are the churches. **(2:38)** Message for political leaders.

>>>

10th Knowledge Seekers Workshop – May 15th 2014

- **Main topics of this Workshop**

  - **All is connected / Plasma interaction**
  - **Mr. Keshe in the end of this workshop start to talk about Cancer and the Emotions.**

(:01) Keshe starts giving the microphone to Ivan. Ivan says that are interesting things happening, two days ago the motors of his reactors stopped. **(:06)** The motor ran again after Mr. Keshe put some magnets on it. Later the motor stopped again. They are not sure why. **(:14)** Marko talks about something like "Plasma Transfusion", having a reserve tank with Plasma to share. **(:20) Keshe comes in.** <skype get offline> **(:23)** UN has done DNA test around the world and they found out that we have a chain that connects us all, same origin, same mother. Is the same with all the parameters systems. This Universe was created from divisions of bigger Universes and the Universe before was the same, as a neutron seed for the others. All the systems even U are interconnected, independent of being a human body, atomic structure or the Universe structures. This is one of the advantages when you make systems and you try to travel and create things they all have a common denominator. All the Universe and all the planets in this Universe have this common denominator, and link, this is the link one uses in further motions in travel and communication. As Marko said about the reserve tanks in time we will open these doors. You can use the reserve tank as a source for all your reactors, this is used in a different dimension level. In these tanks we create a Plasma in the original reactors. We vacuum the cores of the reactors, and the plumb only can extract matter from your core, not the Plasma. When you put your core in a vacuum pump be warned that if you have created a Plasma you will not extract a Plasma. Matter vacuum system does not work with Plasma in these conditions. Your motors can turn off not because of a problem with the motors or the vacuum, but because you saturate the system with Plasma. The reason for reserve tanks is you create a higher field of MaGrav in your reserve tank, and then I teach you how to divide and you can feed it. Because these tanks come from the original Plasma they can communicate, they interact. Part which Ivan mentioned, after we reactivated his reactor, instantaneously we saw reduction in the speed in the reactors on the floor. This means that the Plasma strength is so much that put MaGrav fields pressure on the other cores, like grabbing them. This was the first indication that the reactors created Plasma and they are interacting. When they decided collective to reduce the speed they created the condition of the reverse and they put Plasma of Ivan reactor back to its cage, so they force the motors to stop. **(:31)** They are almost putting the reactors to fly, Keshe observed that the top reactor started to move. **(:34)** Keshe says that now he is just an observer, they must made the decisions collective. **(:36)** It doesn't matter how much N you put inside the core, but how much H can change into Plasma, this dictates the strength of your reactor, and from this you make a leader in your system, and a second leader. Man has not come very far from the times of when we walked in donkeys, you see the car is the same, four legs (wheels), now go a step further creating these engines. Motors are man made, they do not exist in the universe. You have to start learning how to rotate your cores without power supply, this is done in all the Universe, it uses the MaGrav gradient, so that you learned to created Plasma you learn how to control by the MaGrav gradient. **(1:04) Keshe comes in.** He explain about the setting of the reactors. When you touch the reactor you are using the system of electron, with the Plasma is totally different, is the Plasma which have to interact with the Plasma in the tube. In the lab we have no connections. The Plasma from our systems partially interacts with the connections of the lab, because they are connected with the motors. We have start to see the interaction btw the Plasma going beyond the building. We see changes in the structures of the clouds over the area you work. Because you think everything is matter connected, outside there

is a lot of mix of Plasmas. Start to look beyond the dimension of focus of your reactor. If you create Plasma don't start to look for interaction immediately around it. The interaction of the MaGrav fields of stars goes millions of kilometers, because it is plasmatic. When reduces enough to matter then you see it. **(1:07)** Position of your motor sometimes can affect. Our difference is that you have nothing to see or measure, till I teach you about this. If you put your reactors together you will learn much faster. **(1:11)** Whatever you lose as energy in the surrounding area, in the process, the nano layers in interfacing with Ar in releasing UV triggers the condition for the He and N to release N in the level of the field, that become part of the supply for your center core. That is why you see these cores being so powerful, because they start to feed themselves. This process happens in the upper layer of the atmosphere of Earth, where N is created in the upper layers, and that leads to the production of H and the other and come to an atomic level. It happens the same process in your Lungs. We replicated this in the reactors. **(1:15)** Marek assume. **(1:24) Keshe comes in again** and says that they still are in the Schizophrenic condition. You lost the connection. Your gases in the layers do not interact with matter, it interacts with the MaGrav fields which are in btw the Nano layers and the Nano layers itself, so its not that your gases interacts with the surface of your nano coating, that it releases as a ray, as a Plasma. Its interaction with the MaGrav fields which is trapped btw these layers. Is not rubbing matter against each other that releases the UV, it's the interaction of the matter Plasma which inside there are different layers. You still think that the gases will release UV, no. It's the MaGrav fields which are trapped that is why the nano layer is black, because it absorbs and there are dynamic fields going trough. It's a Magnetical friction not a matter friction. **(1:27)** Don't add air in your systems. **(1:30)** John assume. **(1:57) Keshe** explains how to use the gel in the system. **(1:59)** We will start 3D map of the field around the lab, learn in what direction they are going. The next step now is the production of materials trough the Plasma. There is a way that we can connect all your reactors to the Foundation center reactor. This will take time, in time we will be able to send packages of spheres which contains part of the Plasma form the Mother core. When you add this Plasma to your cores your reactors will connect to our in the Center. This is a zero time communication and we will teach you how to use it. **(2:03)** Trough this Fukushima accident the Japanese became the most powerful energy producers country in the world. **(2:07)** With wires you work trough electrons, trough Nano Layers you work trough fields, its instantaneously. In the coming times we will connect all the reactors trough pipes that will be Nano. I had the pleasure to see the form of the generator reactor. We will not release the draws and pictures of this generator reactor, because the Italians who are producing this do not allow yet. **(2:13)** Keshe talk about the registration system for the Foundation. **(2:21)** They will start the teachings on Agriculture. **(2:26)** Question about the food: how he made it, and if he made tests in the lab with the food. Keshe: We gave some of the fat to be tested, we are going to start the test in the coming weeks. At the moment we have to rely in other organizations to do the tests for us. **(2:29)** The fat you produce are very much dependent of the salt that you use and the materials. These experiments gave a lot of insights to Mr. Keshe, specifically how the CuO_2 is connected with the muscular tissue and how the conductive system goes trough Cu and not Neural System. **(2:34)** Question about arrangement of the box and how the fields influence in the production of Gans. Keshe: We don't see any difference. Marko says that he found different densities in the middle. **(2:45)** Keshe says that they are doing just one

type of Gans, use the same materials, one Cu, one material Nano Coated (production of CuO2 Gans). As it shows in the picture, they produced CO2 in the first boxes and the others produced other Gans (seems to be CH3) and did not changed. **(2:50)** If the fields of Zinc with Iron is maintained you start to produce Iron, if its not maintained you see stagnation. This is not a chemical reaction, is a Plasma reaction, a MaGrav reaction. **(2:54)** Keshe gives an example of the popcorn, that the popcorn need a certain temperature to become popcorn, but steel in the certain of the popcorn there is the corn. The same happens with the C. C is a diamond popcorn. The same process happens in your body, if the MaGrav fields that comes from your Brain is strong enough pops the C into Diamond, becomes an isolator. And if the energy is there to extract the same energy becomes Graphene, becomes conductor. **(2:57)** Question about a friend who has a tumor, the man asks advice. Keshe says that he can not give advices, we must understand what happened. When a cell comes to a matter state like a tumor, it means that you must look to your reactors. Energy levels had reduced enough that became a matter state, look in the structure of the body, where is the energy disposed of, for keep the parts of the body in different states, it all comes from Thymus, and the Thymus have direct effect in your Lymph nodes. That is why your blood is liquid and your bones are hard. This is all dictated totally by Thymus, and when there is a shortage in conversion you have your Parathyroid Glands which come to operation to support, to replace the energy specific behavior, so if you look at the structure of your body (your Physical side) you have your forehead to observe what you need, you have your Parathyroid Glands that tells what its needs, what comes in to be converted to and you have your Thymus slightly further down to control in what states you want to keep these materials. So the body is a control room. Now we understand the operation, we can interact with the body with his own working. With the tumor is like the box, you must understand how the fields interact in respect to each other. **(3:01)** A lot of Cancer has Emotional background. And the Emotions are MaGrav fields oriented and they are an Entity, they are not just feelings, they are fields and them you have to understands what fields has changed itself to matter and what reason, and how the body decided to put it there. We will teach this to Doctors and they will teach this. **(3:04)** Question about the release of UV by the cells trough the changes in the mind. Keshe: you can release energies from your mind that can turn your face white, not only UV. In future we will teach you how to do it, now its very dangerous, people do not understand what they are doing. If you know how to concentrate your fields you can create a torch right in front of you and enlighten your path.

>>>

11th Knowledge Seekers Workshop – May 22nd 2014

- **Main topics of this Workshop**

  - **Start to talk about the use of the Technology in Agriculture.**
  - **Keshe explains the conversion of Plasma to Matter, "Plasma Fusion".**
  - **Keshe explains about food and how they put people fat.**

(:02) Marek share their experiences in the Foundation with Gans materials, and they started to work with Agriculture now in the garden of the Foundation. About the reactors they are trying to understand the behavior of each reactor. **(:36)** Ivan talk that they could measure fields but they are not able to explain further about this. **(:56) Keshe comes in.** We soak in Gans the seeds 3 days before putting them in the soil, and 30 days later a second amount of Gans was added to the soil, and you will see the changes. Changes can be scientifically explained, as we go more into agriculture I will explain what scientifically happens. One of the reasons is, when you put your seed into the Gans, Gans is a MaGrav field condition, so this sticks as Nano layer in the seed, these layers, the way you see the blackness in your nano coated materials (that absorbs the spectrums, the MaGrav fields), the layers create like a sucking machine, sucking the MaGrav fields of the outer moisture in the air and the N, so some advanced increased in the growth is due to the fact that they are absorbing N from the environment by the Layers in the skin of the seed. In Africa with this technology there is no need for fertilizer because 60% of the air contains N and now with this layering the seed captures N as the seed needs to grow. **(1:00)** In regions of flood and in desert this is the solution for the growth of the seeds. You will see six or more stem growing from the same seed. This is the solution for the hunger in Africa. A man says that he put a seed in the SF and grew much faster. Keshe: don't get too excited because of this, my advice is please do not eat the fruits of the plant, the problem is that we do not know yet if there is a DNA change. **(1:03)** Ivan assume. He said that he prepared the soil and will plant the seeds today. Then Ivan talk about what he is observing in the reactors. **(1:14)** Question about the motors on the reactors and why they did not stopped. Ivan explains that this has nothing to do with the motor but with the Plasmatic pressure that forces the motor to stop. **(1:15) Keshe comes in.** This is a MaGrav pression. Yesterday we observed that the inner core restarted lowest speed and higher speed without connection. This has nothing to do with the motor, this is a Plasmatic MaGrav pressure which they balance each other out, and that is the reason for it. 3 reactors are in a very high level of Plasma because we measured it. I will explain this in the future, this is the interface btw Plasma and matter. Question: Both Plasmas get stick together? Keshe: Yes they interlock; I will explain something, this week made the first baby reactor, is rotating of his own. **(1:19)** Armen explains about his new reactor. **(1:27)** Question: Do we recycle the Nano materials after using them, do you know? **Keshe**: Yes we know, but first of all we must learn more exactly how they behave in different environments, in time we will teach this, for the time being use gloves when touching the Nano Materials. They are not harmful but they release a great amount of energy, its like you are not hungry and eat a Big Mac. Is a Plasmatic condition, and you deliver a great amount of energy and the body need time to absorb it. **(1:29) Keshe starts.** Keshe talks about the situation with Belgium politicians. Keshe asked for full investigation of the King of Belgium. **(1:32)** If you noticed some days ago we were talking about Coke bottles, and the we built some reactors, and now we have complete the cycle of Life in this planet, this is how life is created in the Universe. We started creating the Gans, now we are using the Gans in the reactors for lifting, and fertilizer for food in the future. Now is in the position of any man to create anything that he need. **(1:35)** We will show you that you do not need wires to absorb energies to run your systems. The delivery of the Energy from the Plasma not from wires anymore. We could see in the reactors here, but the KS here are still in the Schizophrenic state. The Russian

air force used the technology to pull the planes from US military in a base in Romania. **(1:39)** The same thing that happened with Ivan reactors where it could pull other reactor, happened with the planes from US army. Keshe explains about each reactor in the lab. **(1:42)** One of the reactors started to release a pulse, they could measure. **(1:44)** In the Universe there is no matter fusion, in the Universe as you increase and bring the Plasma together, they all content principal matter in different strength and variation, when you create a Plasma condition in the center of the reactor and allow the Plasmas to come together, then the total collective amount of the Plasma, when you reverse allow to create the condition to become matter, then that Plasma will manifest itself as the matter of that Energy level. This means that if you put 12 Plasmas of H what you get is something very similar to Carbon, and when the material changes from Plasma to matter, then the material get atomic structure of Carbon! This is how fusion in the Universe is done! The Plasma package convert into matter accordingly to what material they have and this spreading and the division of the Plasma package depends of the conditions of the MaGrav field of the environment. There is no need of fire, or high speed. **(1:48)** A Japanese company wants to develop this technology working with energy. **(1:53)** Keshe explains about flying with the reactors, the KS are learning the low level control. **(1:55)** The combination of the MaGrav of the food put together that makes people fat. The whole play in getting fat is in fact the C, if you look you have a protein, that have a C link, then you add sugar to the food (C related), then you add CO_2 (Coke, Sprite, etc), when you add CO_2, the C match together, and the job of the C in any structure is keeping connection, so when you have the C locked what do you have, you have the H (sugar), and the O of CO_2, so what you are left inside is the Plasmatic condition of water, now with the new structure of the food, everything is salt added, you have the Na and you add the water to it, what happens, it uses the protein and at the same time becomes a sack to hold the water. So in fact the obesity is created due to E disconnection, you have to feed to keep the connection, (with the C) so it continuously demand more of you to eat. If you take not just the sugar but the CO_2 out of the circulation you solve part of the problem. **(1:59)** Mr. Keshe asked to Marek and John to unconditionally give to their reactors, and we saw a different reaction, then I said try to get whatever you need from the reactor, then we saw another reaction. I explained to them that Marek was more stable, with John you see more hesitation. We do not need to be in touch Physically to interact! **(2:02)** Keshe started to teach John about the Brain and the interaction with E, this is how you must teach in the future the captains of the Space Ship. You have interaction trough E, and now we are converting that to the controls. **(2:05)** Start to collect Coke bottles, because the way they produce these bottles, the shape of the neck, can release atomic H. **(2:12)** Today the Fukushima report will be on the website. **(2:14)** Question: How to do the H Gans? Keshe: The KS have to understand what they are doing, they say that I am going to fast for them to understand, lets learn to walk first. **(2:20)** Question about the 2-2-1 pattern that Mr. Keshe told in a previous workshop (7^{th} workshop). Keshe: This has to do with the load of gases in the reactor, not to do with the liquid. Remember that you create the condition; if you change one material or even move closer the material the Gans will change colors. The conditions lead to what you see! **(2:26)** Bones in a nano structure with a C connection ($CaCO_2$) creates a balance of MaGrav in matter state. So in fact there is more matter then Gans, and the matter in the environment of the Earth stays. When we die the Muscles (Gans) disappear and the bones stay behind, because of its

MaGrav fields of Ca and CO2. **(2:34)** Question about why his material in container became black. John answer: Probably he produced Zinc Gans and there are probably Gans of Iron, since the man used chicken wire that is Iron coated with Zinc. Keshe do not agree. Keshe: If there is a mixture of colors there is a mix of materials. We are going to add vitamins and tablets in these containers to find out about the creation of life. **(2:49)** As a being you do not need to eat, as long as you receive the fields as a MaGrav. The fields that are being created in the containers are stronger then the Hiroshima bomb, if people do wrong it is because the humanity was not ready yet for these teachings. And there are still people who want to hold on to their kingship, so we need to be careful. **(1:52)** If you understand these systems you can eradicated 90% of cancers, a lot of people do not understand this. The only good thing is we can not cause problems and create more damages, we can only go in one way, because Plasmas by their natures will only take what they need, and they only give what is need to be given without them loosing their structure, so the balance is part of the Universe.

>>>

12th Knowledge Seekers Workshop – May 29th 2014

- **Main topics of this Workshop**

    - **Keshe talks about the use of distilled water.**
    - **The importance to NOT touch or taste Gans and Nano Materials.**
    - **Copying the work of the Stars and all the production of the material things in the Universe with the reactors.**
    - **Interaction with other beings in Space and different forms of life.**
    - **Rules of engagement in the space.**
    - **Burning Gans / Cremation process**
    - **Keshe explains a method to lose weight**

(:01) Keshe comes in. We try to see what are the questions first. Rick asks about using brass materials for the reactor. Keshe: The only place we are using brass is in the center pin in one of the reactors. We have seen that the core is totally still. Keshe talks about the observations on the reactors. We are trying to understand the shape of the Plasma in this core. **(:07)** Marko assume and try to explain about the use of brass in his reactor. **(:31)** They were discussing about the capture of Gans and about what kind of Gans they were capturing**. Keshe comes in.** The CO3 comes from the absorption of CO2 in conjunction with the water and releases some H and O. We can explain this in a test that we made. Mr. Keshe always use distilled water, because the other types of water have different materials that influence the process. If you want to have a homogeneous type of coating try to use distilled water, even the mineral water that you buy is not advisable to use. The best way to do is with the distilled water. Keshe goes on explaining about production of Gans and how he took years to make the discoveries that he did. **(:39)** DO NOT taste or touch Gans and Nano materials. This world of science have just opened their eyes and are just starting doing tests on these materials. We know for fact, if you digest or taste the fat

on the top still carry folating lets say CuO2, when you taste this CuO2 will stay btw your gum and your cheek, the MaGrav field is Plasmatic, the interaction in the front of your jaw is in direct interaction with your Parathyroid Glands. CuO2 shows in test that can in conjunction with enzymes leads to depletion of Phosphorus. When this information is edited and put in your DNA trough your Parathyroid Glands means the body will depletes and eject a lot of Ph. This can leads to the Parathyroid Glands look in the body to replace the Ph, and we know form medical science that the only conversion to Ph as the body changes Ph to Ca will take Ca to convert to Ph, and this can lead to bone weakness. This is just one example. The other thing is that these Gans still have some caustic so you can not taste this. **(:44)** The water comes from your Lungs and the interaction with the air you breathe in, so if you inhale or touch these CuO2, or any other chemical, you change the balance of the Lung process, this can lead to creation of Lung infection. **(:46)** We have manage to hold on the Plasma in the center of the core. **(:48)** In the process of creating fusion, Plasma we have manage to achieve cold fusion Plasma. What we have created in having a center core reactor hanging and placing six cores around it creating Plasma, we have created what is know as cold fusion Plasma state. Where this Plasma was held is in the inner core of the system. Keshe goes on explaining how the Plasma work and its interaction btw the reactors trough the Plasma. **(:52)** The starts don't just produce matter they create a Plasma of the matter, lets say N, or He, as this package move in the Galaxy when it comes in the right condition to convert it becomes the matter, this is how the fusion is done. In scale measure, let's say that if you have 1 liter of Plasma you have H, if you have 2 liters of Plasma you have He (So, they are trying to copy in the reactors what the starts do). What we are doing with the reactors is a fusion Plasma, what is happening the center core has become the reserve tank and the fields of the other six have concentrated its fields in the center. **(:55)** From Where the N comes? The MaGrav fields of the packages that are released from the Sun at a given position on the upper atmosphere become equal to N, that is why we see N in the upper level of this Planet. That N and the process which ionize the He or other matter leads for N to be a continuous supply for the environment of this Solar System. When Erath moves nearer to Su the MaGrav of this planet can not support production of N so life in this planet will be finished. What we are creating in these reactors is how life and materials are created is this Universe. **(:57)** If you change the N levels you have problems in the Lung, is the same if you change the N levels in the atmosphere by moving the Earth, you have the same problem. **(:58)** You have to understand how Gans and Nano materials work, on the upper layer the Gans state is not in an atomic state, this is another condition in the position. The materials in all the Universe happens in Plasma condition very much in the way you do your Nano Materials. The planet is solid and because of the condition Gans layers are developed, and the lighter Gans, which are like Gases, are structured in the outer layer due to the vacuum condition of the Plasma of the Solar System and due to the rotation of the center fusion of the condition of the Planet itself. **(1:01)** John assume. John makes a brief comparison btw Ormus and Gans. **(1:19) Keshe comes in** to talk about the ceramic reactor. **(1:26)** The moment you touch the core even Physically, because your body is made of the same Plasma condition you change the Plasma in your core. When you are running your reactors don't touch it. **(1:27)** The MaGrav fields of this planet create the conditions of life, you change MaGrav fields in your reactors you change the conditions. There is no difference btw the Plasma in your reactors, the Gans and your

body. **(1:31)** You never allow other beings with different MaGrav fields enter your craft, the fields they carry is different then the fields in the environment that your craft is built for. You can do 2 things, your system can absorb the energy if has a higher order operation or you can cause their death, or give to them diseases. This is one of the first rules in the Space colonization and interaction. If you meet in an environment outside your craft that is good for you and goof for them, then it is. At the same way do not get into the craft of other beings or accept food that you need to digest, unless you know if the MaGrav fields match. **(1:35)** Rules of engagement in the Space: the energy which are given or the pack you are given is given with good will. It's you who have to decide if it is matching with my condition or not. We learn this here giving lectures, people use to give us gifts (chocolate., etc), our security told us you can not touch anything given to you, do not accept, let security handle it, because they carry germs and your are not use to their germs, and so is the same. Gift is given with the pleasure of life, but we are not ready, this is how now we see these diseases going on that we did not saw before. Gifts, and given pleasure and given freely is the nature of the Space, is us as human to understand what suits us without damaging us. I think that the conduct in Space is not far from humanity, but understand the process. Interaction is love and caring, but sometime that that you receive as a gift is not good for you. **(1:37)** There is a limit we can accept. The same way that we can not fully receive the MaGrav field form higher orders which is above our systems, there are sub-matter fields which are dangerous for us too. There are much more life in the sub-matter place compared to human race then there is above. We are in the middle of the MaGrav field strength, the middle of the scale. Life exists below the matter field of human race too. The questioner says that he agree with what Mr. Keshe said, Mr. Keshe that he is just stating a fact, it's not about agreeing or not. **(1:39)** You can not direct anger towards someone in the Space because the only thing you are going to receive back is your own anger, is like you slap yourself in the face. Because the package of energy that you release is above what you can do, and they understand it is not accepted, then comes back to you. Man will learn to lose a lot of his animosity by going to Space. The whole process is very simple, the process is to be, to understand that the process of your life, your system and the Universe must be in balance, tranquil condition. **(1:46)** Keshe advises about be aware about the environment you are creating your Gans, what components the Caustic that you use have, the water you use and so on. **(2:10)** One golden rule is: there is no free energy, is coming from some source, understand the source and understand the process, then you can that energy the way you like. **(2:14)** Question about water in the Lung. Keshe: You have to understand the operation of the Lung. **(2:17)** The water in the lungs come from the air that you breathe. People should not die of pneumonia or water in the Lungs, you can create the conditions if you understand the process. **(2:20)** Armen assume and talk about his reactor. **(2:43)** Marek talks about the test with Gans in the garden of the lab with the plants, he shows some pictures. **(2:58) Keshe comes in** to answer a question about how to destroy the Gans. The word destruction is the wrong way, the easiest way you can understand the reverse of a Gans, what happen to it, look what happen to your body when is cremated, is exactly the same process, what is left is only the bones. By burning them you put this energy back, come back to the Gas state, if you create the right environment and condition in the crematory you can bring back the Gas to matter state, this is another part of the life process, where does all the mass goes? By burning you put a MaGrav field

from the matter which is burnt into the Plasma, that Plasma can come back to matter. By burning you don't change the matter, by burning you release MaGrav Plasma of an atom which is the structure of a wood or a gas. So when you burn is a matter condition, but what you do when you burn you do exactly what you do when you create your Nano Materials. In burning you release the structures, part of the MaGrav fields which when it touches the fields of the AA because is of the same structure it opens it up and the structure goes back to. The burn is a way to transfer the MaGrav fieds from the wood in the Plasmatic form which diluted allows the separation of the Gans of the AA, and that is why you don't find any left over. **(3:04)** Keshe explains why people are getting fatter around the world. He gave that explanation in the last workshop. **(3:10)** Keshe talk about a method to lose weight. You fool the body into a trap that there is a lot of salt coming, so the body has a habit when receives a lot of something it empties its tanks for fresh materials, so you can dictate the process. Wash your mouth with salt. You don't need to wash your mouth, but to give the sensation of getting the salt, felt in your tongue. If you rub a salt in your tongue the taste of salt is monitored, the brain receives the information that there is a large amount of salt entering the body, but what you do, you wash your mouth fully a few times that you don't absorb any of this salt, so in that instruction the body empty the salt content in the tanks to get the fresh materials, but in fact because it doesn't received, because you washed everything out the salt go diect to your blood or your urine to be ejected, or sometimes deposited in your liver if it is needed in the future. This has to be done by Physicians not ordinary people! Because remembers that all your muscles requires certain amounts of fat, even your Heart and your Brain. This process usually takes months.

13th Knowledge Seekers Workshop – June 5th 2014 (1st hour of WS Very Good)

- **Main topics of this Workshop**

    - **Changing the course of Humanity**
    - **Periodic Table / Going Beyond the Narrow Thinking**
    - **Epileptic Attacks**
    - **Becoming Refuges in the Space**
    - **Look to the Totality, not to the Reactor**
    - **Real Purpose of these Workshops**
    - **The More you Give the more you Receive to Give**

(:00) Mr. Keshe starts abruptly… But we start the process of Peace as a race not through names and this is the purpose of this letter (I think he is talking about the letter for peace in exchange for the technology). Deliver a copy of this to every priest, every holy man you know. Ask them as humanity that you want to unite the humanity, through their Souls but not in the name of any religion. This is on our road map. Even if you worship a statue put this letter in front of the statue. So we as one race will change the course of humanity, the man of Physicality who does this for the wrong benefit. This is

the time to change things accordingly to our wish, our will, according with what we know and where do we want to be. **(:02)** We have come to a moment of change, but the change must come in a very peaceful way, we are asking to close the churches, you still pray with the channels which you find peace with yourself with your Soul who you have the contract with, what you call Religions. This is the way we go for the change. We will meet at 11 o'clock in the Vatican and we give the message. We know that they receive the World Peace treaty, now we add the other two papers. If the pope as the major world leader in the name of God, in the name of The Creator, would put the hand out to rest of the others religions to call all in for peace, there is a problem with this, Muslims will not go to Vatican nor do the Buddhist or the Jews, because they accepted it as a submission, and this is against them. We offer the house here for the meeting, because here is a Neutral place. Here is set for the meeting of World leaders and not a center. **(:06)** The man who shut the bullet to kill, his Soul is responsible, plus the man who designed the bullet and the man who thought to set up the war to do that killing. So the punishment goes all way down the line. Majority of these wars are in created in the name of God in different shapes or forms. So now is time to stop all this mess! The one who shoots it doesn't matter what religion he carries is as guilty as the man who designed and the one who pushed the button for the bullet. No one to blame, but all to understand! This does not happen overnight, there are so many bullets made, they want to use it. We ask the World leaders for Peace they thought that this is just a talk, but if you are not listening to, then we shall the power, in a very simple and effective way, through the power of the technology, then the World leaders should follow the people, that is when the chaos happen, the revolution that goes to nowhere. Direction has to come through the World leaders. **(:09) Every single of you is a Messiah if you can change the direction of the course of the humanity! (:10)** I pray that this house here become the house of Peace. They can keep the wealth that they created, God has the wealth of the Universe this is nothing but the dust. Now you know why is the 13th, it is the end of the past and the beginning of the new time, and as humanity we planned it, not we follow it, and when one can bring this unity, then we can open the Space to the man. We share the knowledge freely, now we share the Peace freely. Give this to everybody in the day 16th, the day of unification of the God. Don't worry if they will burn your letter when you give to people, it is about the way you give from your Soul that matters. **(:14)** Keshe talk about the letter that they sent for the criminal court. **(:15)** There is a lot of questions about the table of Mandeleev, about how many elements do we know. I explain in a different way. If you look at H and He is the difference of the amount of MaGrav fields in one package of the Plasma of that one element, He has a little bit more then H, slightly different formation, so we call it He. Now humanity has access to create any amount of different MaGrav fields, in time you will be able to produce all the elements in the Mandeleev table. The question is, does that change the limitation of elements? Expand your horizon deeper beyond what you've been taught to look at. Every star is a center, is a neutron, a center of a system, and it has electrons which we call planets, we call it an atom in a smaller scale and Solar System in a bigger scale. Every star, every element is one Entity. The man with his limited knowledge has just found a feel. The Mandeleev table, the number of elements is equal to number of stars and Galaxies and the Universe which are in the horizon of man. There are no fantasy or exotic elements anymore. The Mandeleev table is not even the first step in the numbers of the elements in the Universe. This is what man

could understand and now we open to further knowledge. You have to look for openness, not a narrow way of thinking. **(:22)** Keshe talk about the intentions of give and receive with the reactors and how it changes the behavior of the reactor and the center core. When you give this letter to the Pope or the priests is not the Physicality, is the thought that you give and the thought will change their Souls and through their Souls they accept the deed. There is a collection and understanding btw all levels of Creation! Is the man who restricts itself because he can have, what he can manage. And if you go beyond that point you find out that you have to reject it, there is nothing wrong with the science with the technology, is that your Brain is not capable to do it. When your Brain creates so much information and the body can not accept there is a switch in your Brain, it stops, this is how much information I can send to the body, and if the information is too much and it switches off, the Brain switches off and it can not accept that, so what happen you get spasms, you get one chock, and in so many ways we call it Epileptic attacks, this is not a sickness, is due to the amount of information created in the Brain that can not be handle by the Physical part. We have to create the shake in the same process, in Peace. **(:26)** You have to understand the interaction and what you produce when it is given too much information. When you are given too much information to the Brain that the body can not handle the body stops, then you get the Epileptic Attack. Is the same thing with the human race, when you give so much, the Soul gives to the body but the body can not handle then you get the outrages and the Brain stops, because is too much for them to handle. Do not expect that everybody walks to you with open arms for what you have to deliver, because they have to put a lot of dogmas and a lot of false beliefs aside. We became blind, why the colors matters? Why race matters? Very soon our children will become refuges in the Space. In my life where I could not live, my home was threatened I had to take refuge in another country, now that we have open the Space, and in time this planet will be under some sort of self-destruction. When we lose our home what do we become? We become refuges in the Space. This happened before, and we have to find somewhere, to find home. If you find home, at least a place that you can be able to be, do we fight if there is a life their to fight, or we share and allow them to share with us? And the people in the Space have the knowledge of the thought. So we sooner or later will become refuges in the Space. What do we carry from this planet with us: the Love, the care or the fights with the Religions? Or we go as united and whatever we go we fight for nothing, because the homeland is gone. **We carry God in our Souls not in the heart of the human body! (:30)** So we are refuges, we find a place where we call home, then are going to carry on with the same problem that we created here? Or we will be subject to destruction because they will not accept this behavior. There are refuges here on this planets, they have being among us, but they have taken the shape or form that leaves the man to be what they are. These are not theories, very soon you can think. Man will have to shake hands with people of the Universe to allow man do what they have done. The police of the Ethos is not to interfere, otherwise we do not see evolution. When you don't have home any place that you can feel home is welcome. We will not teach you how to build the reactors, but show the consequences of the reactor and the effects of the reactor. In trying to develop the technology walk away from looking to the reactor, look at the totality of what this reactor will offer, what this gives you, what it takes from you. When you take from the systems, you see that the take from all the people is about the same, but when you look at the figures on giving is different, and those who pretend that are very

given and generous when I look at their data are the worst ones, because actually they are the ones who want to take but they talk differently. The systems don't lie! And the data that I have seen is exactly what I have seen in their Souls, nothing is hidden. This is the way they will try to dictate there own destination trough their Souls. The center reactor is receiveing all the knowledge of the KS, but this center is not to become a temple, but a place of Peace and knowledge. **(:34) The whole point of this workshop is not about how to make Gans or nano Materials, is to show how to use the knowledge to make a new Path to humanity to yourselves!** If you think you will be immortal by knowing how to make food and energy, nothing in the Universe has been immortal. So the whole process is how we can serve, to give to others. Try to make sensors for your dynamic systems, and then you start to understand the meaning of your own Soul and you can not lie to it. Philanthropists has become the word of nowadays, but if you watch them, they are the one who are taking more money then are given away. Mr. Keshe talks about the Bill Gates Foundation and the billion dollars that was spent on this. If the purpose is to serve why keep things for you in your own shelter? God does not need banks, when you open a bank account and putting your means to it means that you want to hold on and do not want to share. This has to stop! The whole purpose is give to others as a Soul <audio breaks>. Religions are finished! No we work as One! This unification is from the Soul. The more the other Soul takes more I receive to be able to give. You will find out that the more you give the more you will receive to give. Now you have found a way to test your Souls, the true meaning of your own intentions! Then you understand you can not lie. By going to Vatican in 16th we are not going to disturb anything, but we are given our Souls. In transferring the Soul we set the new scene. The knowledge has to go with science, and the science has to go with the knowledge of the behavior of the man in respect to himself and the others, not Physically. **(:43)** Keshe talks about Steve Jobs and the terrible life that he had, in consequence of "poisoning" other people that worked for him. The real peaceful man die in Peace. You do not need punishment, the demons you sleep at night is your punishment, you punish yourselves! This technology brings you the your own judgment day! The way that the Universe works: you take none, unless you are given, and you give everything that in one time somebody that who needs it can use it. Then we became into balance and why this technology has come. **(:49)** You are the collection of your past generations, because what you carry is what you have been given for what you are as a collection of the past. Judgment day is in front of you for yourself! **There is no Heaven and Hell, the Hell comes when you have to understand what you have to let go which is been wrong, and the Heaven comes when you know you are given freely and you are in the process to be equal and to be correct. (:53)** Keshe talk about how people were angry with him because it did not had a leader, and he said that he made a circle with chairs and how this changed the reunion; there was total disturbance in the behavior. Keshe served them and this shocked them. **(:58)** If I talk about reactors there is a lot of questions, but not now. But this is the way the things are. **(1:05)** Question about reactors, there are like diamonds in his production of Gans, and his question is about the amount of fat that he is producing. Keshe: The rate of production of fat in the top is correspondence to Gans materials which are produced in the liquid accordingly to the current flow. One electrode is the South pole and the other is the North flow, then you have a flow of current, not of electrons, but of Plasma. **(1:26)** Discussion goes on about production of Gans. **(1:49)** Everything that you Nano coat is black, it doesn't matter the

material, is not the matter which is black is MaGrav field which is underneath the top layer amongst the multi-thousands of layers. When you release that atom as Nano then it takes its own shape, become independent, when this thing changes it changes the color and it field strength in respect of the point of view. Example of the CuO2 that was green and is becoming white exactly like the color of the Brain (Keshe talks here about the center rector that is absorbing the knowledge of the KS in the lab and is getting the color of the Brain). When the fetus is made in the womb of the mother there is no Brain, when the confinement of the structure of the Brain creates the returns of the fields to its center, which are all the fields from the materials, converts the matter of the flesh and the blood to the level which becomes the nerve, it's the confinement condition which allows the matter to change from one state and change to Gans state, then when it changes in that position you get the cream color, the nano coating of the Brain cells. The communication in the muscle tissue is by Cu and not by nerves. **(1:55)** You have one reactor that you call the Brain and other that you call Intestines. The talk goes on about the reactors. **(2:10)** Mr. Keshe leave. Marko assume and talk about the reactors and that they put Magnetical sensor around the reactor. **(2:43)** Mr. Keshe comes back and talk about the relation btw a flower and the reactors. **(2:45)** Armen talk about his reactor. **(2:49)** Mr. Keshe advise to not inhale Gans in vapor and to not touch the Gans, we must learn about the side effects of it. **(3:04)** Keshe talk about systems that can levitate, that they can never fly, because in the material they produce they create MaGrav field which is the maximum that that field can create btw that material and the MaGrav field of the Earth. Now translate the same knowledge into Gans. **(3:07)** Outside the skin you accept atmospheric condition matter, inside your skin after three layers you accept a condition which is Gans, do the same thing with your reactors. **(3:12)** Keshe says that they may have found the roots for Diabetes 2. A lady that used these systems stopped the use of insulin. **(3:16)** Mr. Keshe thanks Rick to set up the humanity to walk with the Messiah, we are all Messiah. As a human race we set to change the way that we think of how life should be, and we carry other people with us. We have to be the example and not try to force our ideas, but we have to tell to people how we think and how this can be achieved.

14th Knowledge Seekers Workshop – June 12th 2014

- **Main topics of this Workshop**

    - **Production of Plasma through Nano Materials**
    - **Explanation about the Nano Layers and how they Hold the Plasma**
    - **Plasma does not need a Containment of Physicality**
    - **Concept of "Twinnity"**
    - **Do not look to Numbers, but for the Interactions of the Reactors**
    - **Understanding the Totality, taking the KS out from the Schizophrenic State (seeing just the matter state)**
    - **Creation of Black Hole with the Reactors with Gans.**
    - **Prayer to the Soul of the World Leaders**

- **Connecting with the reactors through your Soul**

(:01) Mr. Keshe says that they are now very busy with the bureaucratic process in the Center. **(:03)** Armen assume and tells about the updates on what is going on in the projects and reactors. Armen post some pictures showing the reactors with measurements. **(:22)** They turned John's reactor upside down to try different ways to influence the fields, when they did this they noticed that the fields increased. The conclusion was that the exit of John's reactor was at the other side in comparison with the other reactors. **(:26)** We are trying to understand the interaction of Plasma btw each other, not focusing on the matter state of the reactors. **(:30)** We are trying to build up the Plasma, we are trying to create a star. **(:36)** We need something Physical to observe, we are not aware of the forces that are ruling the Physicality. **(:38)** Sometimes we make the changes to quickly, we need a lot of patience, sometimes Mr. Keshe asks why they changed something and did not waited. **(:41)** They made tests last weak trying to give energy to the reactors and the field detectors measured increases on the field. **(:47)** John talks about the ways of measurements of the fields. **(1:25)** <audio is lost> **(1:28)** <audio is back> They talk about the measurements found, they show a picture of the graphics on the screen. **(1:35) Keshe comes in.** You speak casually if we managed to hold the Plasma or created a Plasma which we know we have. Creating Plasma from a Nano Coated material is a unknown phenomena. If you go to the Plasma Physicist and say that you produced Plasma from Nano Materials they will laugh at you. Plasma are not created as you see even with the little balls in the Physics labs, they use rotations and energy. We are producing Plasma in a way by the use of Gases interaction or at the same time holding it through Magnetic pressure which the Nano Layers created, this is huge development in the world of Plasma Physics. They try to create a Magnetic envelope to hold the Plasma, by introducing huge amount of energy to contain the Plasma in it, in the way we have shown, you create the same containments through Magnetic fields within the layers of the Nano Materials. This Science is unknown. We fully know what we are doing, we bring this technology so smoothly to the world public that they don't even think about the wrong ways, as they were doing, expanding billions to hold a Plasma. This is such a breakthrough that sooner or later they will come and say that this people do not know what they are doing. We are doing in a way to make reachable and do not thin of the wrong ways that we make in the past. **(1:38)** The new achievement now is: The Nano Layers are gaps and holes and they create different Magnetic field layers, so, what in reality you've done, you created a spectrum of Magnetic fields strength which covers from the principal strength to matter and sub-matter below the Magnetic field strength. So whatever you create in these reactors we can withdraw all the matter but the Plasma is held, even the KS here don't understand what is fully happening. The holding of the Plasma in the core is due principally and totally to the Nano Coating which is put around the reactor, internally or with a pin inside which holds all the field strength of the Magnets, in a way contain a ball by putting it in a cage, or you can contain the ball by putting in a string in the end of it and holding it. In the reactor we have placed a pin in the middle, so we have put a string in the Plasma, but the layer itself is created through the conversion of the Gases to Plasma. In the other cases like those who are fully coated outside we have made a containment of Plasma by caging it. This kind of creation of Plasma and hold of the Plasma is a radical breakthrough in the Plasma Technology. All of

our reactors have no electrical connection whatsoever they are rotated by motor externally even by belt, which means that is no conductive material connected in the reactors. Now that we have managed to create Plasma in this condition, out of fresh air, this is how Plasma is created in the Universe, now through the motion ad interaction of the different strength reactors we can create motion for these Plasmas. Once the Plasma is established in the reactor and can sustain in conjunction with the other 3 reactors that we make one Plasma out of the four reactors in the environment of the lab we can just hammering the reactor of John away, because is (??) and the others are still so we can go and physically dismantled it. And by literally hammering the ceramic reactor which John has made we should be able to contain the Plasma at the same position, at the same speed of rotation of it's own. **(1:42)** This is not a fairytale, look at the Sun, the Sun does not have a container and have no motor. The Plasma of its environment dictates it's position and rotation, and what happen, somewhere in that structure then there is an interface in the conversion of the Mag fields to matter, so the reactor will make itself an interface Physical show, be at the Gans or be it as a solid material as the surface of the planet or stars. The interface of the system is far enough from the central Mag field that allows for liquid surface to appear. In reality the surface liquid that we see as Plasma of a H or Mag fields of He, on the surface of the Sun is because of the furtherness of the position of the central core which leads to its materials manifestation. In a very soon time we will break one of this core (of the reactors in the lab), to see and show that Plasma does not need a containment of physicality and rotation. Because of the openness of the KS of the lab the things happened in a very fast way, and now they are totally lost. In time when they grasp the whole thing they will realize what a gift has been given to them. **(1:44)** You see these pictures, these reactors that are running by motors, you have one reactor, if you can achieve one reactor core condition, which is a single Solar System, which is a star without any planet, there is full of life structure within the structure of this star. There is a dictating position in respect to another point of reference, which is another "Twinnity", which is another twin star which dictated the position, though we can not see the Twin Star. It's an Electron and a Proton. As the world of Science opens up you will understand a next step in the world of Cosmo Physics which most of the Physicist never understood and never understand. Even the Solar Systems behave and work as atomic structures in number of electrons and protons, what this means: a star itself even having a Solar System is electron in respect to a proton so is not only being twin, but being part of a set. When the Cosmo Physicist understands this process they will understand the fingerprint of the Space Travel in the Future. Not go only to one planet to another, but you can go to one Star and find out which set of the Stars as an electron position central core is, then you can travel within that structure of the Plasma that Super Solar System, which means that there is another star which is bigger then the rest of the stars are like the electrons rotating, it doesn't matter what is the internal dictation of the environment of the Plasma is. The learning here is too fast but I understand sometimes that has to be done this way, because there is not enough time for what is about to develop and to happen, but at the same time you got to look at the totality of the structure, what does this means, you look at one point, one reading of one rotation, that one point that you see is not the center core. **(1:48)** Keshe explains about the tests of Marko is about how the Plasma behave with such amount of H and so on (it seems that Mr. Keshe is talking about the Graphics showed), and talk about how the detectors of fields works. **(1:52)** The KS have to move away from

the habit of see the physicality of the reactor. You have to look into how the fields in these reactors interact with each other. I don't look at numbers but for interactions. Data is irrelevant most part of the time, you look the data and you lose the whole picture. **(1:58)** Keshe explains how the reactors behave as the Elements like C and H. **(2:06)** You must understand the totality, not just following numbers. These picks on the graphics are irrelevant for the operation of the whole Plasma, but these picks shows dangerous positions in your structure and in your Plasma setting, because these picks are created when a massive amount of Plasma is released in the wrong direction. The direction of the pick and how it was achieved it means something is holding. You must avoid Plasma blockages (as it was seen in these picks in the graphics). **(2:11)** Always remember, the surface of the Sun is not the container of the Sun, but the surface of the Sun is where the matter of the MaGrav of the Sun can materialize, can reduce its strength enough to become liquid Plasma. This is what we are going with the production of new Gans state of materials. From next weak we will have twin reactors, all Gans filled only. With these reactors we are going to put a center pin Nano Material to be able to hold on to the Plasma. The next step for us is to create a balanced environment btw the four reactors. At the moment John reactors is absorbing all the fields, Mr. Keshe still do not know why. **(2:14)** Mr. Keshe says that he pushed the KS to an environment that they are not comfortable because they are still stuck in the Schizophrenic state, stuck in the material condition. This will take time, you see a lot of resistance because there is no understanding of the totality. In the moment here the only interesting here is when we gonna fly, they will not fly until they understand the control and balance of the fields. I can create a fly in one single reactor very easy, but when you have a Star Formation the totality counts. **(2:16)** What happen if you lose the Mother Reactor? It is not the end, is understanding how you have created the environment and how btw the 360 degrees you can create a new Plasma environment with other material condition that can hold on to till you replace the core or you can develop a new core, you can carry on thousand of years without the physicality of the central core. **(2:19)** We are not going to do a magic show just to do a lift, it has to be learned, it has to be tested**. (2:22)** Now we are entering the commercial phase. In close future we can show the reactors to public. **(2:24)** All the data and the knowledge and teachings we do and that you share are being look and analyzed by scientists, even by the top guys in NASA. **(2:28)** This total new Science is very simple, for the first time man has managed to change matter into a Plasma and at the same time managed to take the Plasma and hold it the way he wants. If you don't understand the process, is very simple. You put the Cu into caustic, you change to molecular attachments to atomic Nano Layering attachment, instead of being matter connected, boundering at the same level with the high temperature and pressure, by making into a Nano you made into Magnetic field connection instead of physical boundering connection, now trough Salt you made into a Gans, now what you do, you a material detachment which is a Nano Layering with the Magnetic spectrum field inside it holding the Gans which is a Magnetic field Plasma and then these Magnetic field Plasma which is in the Gans state in the new reactors, themselves create a Magnetic field to keep separate themselves, themselves create a black hole which you call the principal matter in the center of your reactor, and now you come back a full circle to the point of the Creation. So your center Residual, by Stephen Hawkins trough his stupidity said that black holes absorbs all the energies, now through this Nano Layering putting the Gans,

and then these Gans will create all their own structures and MaGrav fields you create a center point in your reactor which is very much like what you call Principal Plasma Area, and in that point you share the fields with all the environments in that core. Now you don't need the physicality of the matter to hold on to the Plasma and move into the Space and the Universe. This is what the KS has never understood. Now for the first time you understand, the same way you have created MaGrav gap btw the atoms in the Nano Layer, now you create the same Magnetic field gap btw the layers of the Gans, because now it is a Plasma and then the center part btw the sphere, is just a ring inside the ring in the center carries the same field strength of the Principal Matter Magnetic field. So you created a confinement, now you try to open this Plasma in the center of your reactor. Now you understand that the travel in the Space becomes irrelevant of time and space, but you got to understand the process. **(2:31)** We created in a System Amino Acids that can cover any need of the man for the AA reproduction for the Neuro System or for reproduction of cells. If the results are correct then we will release this system. **(2:34)** Mr. Keshe talk about the meeting with the Pope in Vatican, and about the unification of Religions. **(2:44)** When you run the reactor on the floor you don't look at the physicality of outside, inside there is a Plasma and the Plasma within the structure affects in one side, the other two detectors. So, if those who sit in the holy places and think they become untouchable because of their physicality we have already reach your Souls! We created a Soul so we can reach it. The same we can change the behavior as I have been discussing with Armen, in respect how you change a small gas and you see the change in the other reactor, the same thing has happened with your Souls, the choice is yours. Change in what is been set up to do! **(2:53)** The temple of God is in the Soul of the man, not in his Heart or in his Brain. Money, Religion and attachment to physicality is one of the bad habits of physicality and Earth is one of those physical points. **(2:55)** These people (Priests) have to learn that they are equal to the others when they come to share their Souls, because Souls don't wear a robe or a hat. Their Souls which makes the different, and that is why a lot of them go stray, its because they misjudge the way people come to pray in their places of worship as worshiping to Christ for example, they misplaced that name and placed to themselves to the God. They know in reality that there is no connection btw them and the Christ. And with this misplaced they see themselves as one Soul and they become important. The people don't look at the priest they look at the Soul of the man who they made the contract in their Souls with. This is where the whole World leaders misplaced their names with people, they lost it. You go to church to share the Soul to Christ, this is the one you made the contact with, this is the same with the reactor in the center of the system, this connection and share of the field is with the center core and the other two, not with the other reactor running in another Galaxy. **(3:07)** We have to speak the language that you can understand. The Gans if used in the right way, now you understand what you can make with it, you can change the Plasma into a field, and fields are packages and you can make whatever you like with it, this is the process of the Creation. **(3:09)** Today no questions about the reactors. Question: What is the Spirit and what is the difference btw the Spirit and the Soul. Keshe: None. One is the Path (Spirit) and one is the entity (Soul). The Soul is very much the same as I said as what I said about Johns reactor, you break the body but inside stays the same. When we put the reactor and put the motor we dictate its rotation and everything else, that is matter. But once the Soul, the Plasma is created inside it, as I said you can smash the reactor, then

when it runs itself it will only take what it needs to sustain itself in respect to its environment. The Plasma created will take and give what it need to be taken and given, but will not steal. Its only takes what is needed, this is how the Soul works, the physicality is irrelevant. That is why I say pray for your reactors, give part of your Soul to them. Question: How does man align its Soul with the physicality? Keshe: Few people have reached this position. Even some who did achieve they lost their track because they saw themselves as being the Creator. **(3:15)** Question: What you give to the reactors? Keshe: Just the fields. I find the balance. The physical appearance has no relationship to what is created as the Soul of the man or any creation. And it takes what it needs and it gives what it needs. **(3:18)** When you pray you give part of your Souls to the man you channel for the Creator, in a way you open the deposit bank for your Soul. When you are in time of trouble you go to the house of worshiping and you pray, it is like a little bank you open and put the fields there, and in time of trouble you go back to the same house in a way it is not God who answered you, is what you invested yourself in yourself that will come back to you. It is like the reactors, this is the beauty of it, and once the man understand this he will walk away from all these paths. There is no punishment, when you don't receive is punishment enough. You do not receive what is there for you to receive until you are there to receive in that level. The reactors in the lab still did not worked because the Soul of the people in the lab did not became one. When it becomes one the system will go! It is not just the Plasma in the reactor, your Soul is part of it! The change is not the physicality, the change is the Soul which you are holding back.

>>>>

15th Knowledge Seekers Workshop – June 19th 2014

- **Main topics of this Workshop**

    - **Keshe talk about Religion in the World today**
    - **Knowledge that the Technology Brings Unify the Religion by Knowing the Truth about the Creation (World Religion)**
    - **Build a Structure before the Change**
    - **Travel in Space (The Soul carries the Body and not the Body carries the Soul)**
    - **The Heart of the Mother and the Formation of the Fetus in the Womb**
    - **Connection Between the Heart Beat and Alzheimer**
    - **The Soul Plasma (in the Reactors)**

(:02) Keshe comes in. At the moment I stay in Rome and the rest of the KS will stay in the Foundation, they are still waiting a response from Vatican, hopefully they will receive the response in the next days. This is the second time that the package for Peace has been handed to Vatican. **(:05)** We have to see how the response will be and how they will handle the countries. The whole concept behind this invitation is not to force the religious to come together, but is to encourage the base structure of the indication of Religions in a way that they can change the course of humanity. A lot of people have a misconception

about religious ceremonies and religious belief of people, it has become more and more apparent how become influential the religious organization are in respect to all aspects of life, even politicians in parliament can not pass the law if its not accept by the religious people in that country. When the politicians passes the laws at the end goes to the Ethics part, they look at the law in respect to the religion. So, the religious beliefs in all the world have the final say in the Nations. 99% of the world, rules, regulations, laws are final say signing by the religious. We have gone to the root of the problem and the root of the solution. The root of the problem is: by dividing man in different faiths, a lot of people have made a lot of money, by unifying it they still make a lot of money but for the humanity. **(:08)** Without the religious leaders in this world in this moment there is no solution for humanity and they now it and use it for their own benefit. Now we have to bring light that their interests don't count but the interest of the whole humanity counts. We don't expect nobody in the 13th, that is obvious. This is the first round of the invitation, and with science technology we will bring the world leaders together, the explanation is very simple. The day before we went to Rome I said to the Ivan (KS) that the reactor E which is the with the metal core has achieved 12 Goss (??), and that was the first time that this reactor achieved this measurement in this dimension without interfering in other reactors, this means that for the first time we have achieved Plasmas without putting anything in, but creating condition. We created the condition on Friday before we leave. The Foundation I believe soon will achieve the full lift in the Star Formation. Now you have to realize why we made this step to go to Rome. **(:12)** We are achieving great advances in Science and as the KS understand how it work, more will be explains. Its not about release information, but when and how you release the information. We have become good at this, we have Diplomats advisers which support and advises us. By achieving lift and taking man to Space man will be forced to accept the one Religion, One Path of God. Because in the Space we will see the process of the creation and we will understand the Truth about The Creation. So very soon this division of worship by man will become dilapidated due to the knowledge which the technology brings about. In coming contact with Universals creations, we will find how much, how long we have wasted lives, time and energy in worries in the facade on the structures of the buildings not in the heart of the Soul of the man, our Souls knows what is correct, is just that the Physicality has kept us apart. In a very short time the religious leaders will follow the new Science not for them to be left out to keep their face. We have given a way out of it with this invitation, they can bring things together to bring a new cycle of life in a peaceful way. In the meeting the world leaders will not be there as leaders, but as subordinates because they will have to fit into the structure of what the new cycle has brought in. This is for them, we understand how its gonna happen, but when you put things out for the first time they say, this is nothing, but even parts of the things will force a lot of new ways in humanity. **(:16)** If we do not get any response from the world leaders, we tried to give these people a graceful way out, but now with the development of the technology there is no choice, but to follow the unification of the man in all structures. In bringing fairness handling the people behavior in respect to the Creator, and in the same way correct and equal for the whole humanity. We create the conditions for the change. We see Greenpeace all the activities that they have done for years, they were supported by the East and they are supported by the West now, we see how things have changed. The old structure is finished, we don't fight, we inform to them join in. **(:19)**

Before you had to go to the church to get the Holy Book, now the Book with the ethics of the man, because we gave the man any physicality that he needs through these patents, all his needs are fulfilled, and the only thing he lives with is servitude, how he can serve! He can do whatever he likes. We know what we is happening, but at the same time we cannot lose sight that we don't become like the past, hypocrisy cannot take over, it has to be logical, correct and fair for everyone, this is the change! This things takes time and understandings by the world leaders and mainly by public. Public has to understand what is to come and how to adjust. We cannot say everything is equal and fair so everybody can have a car or any food and drink tomorrow, we have to put a structure into it, to bring balance into it takes time, months or years. If we give the change now 99% of the people don't understand it and then they want they will get it and the mayhem will be more. It's needed time to educate them, and the education system for it is getting set up, its matter of time for people to understand this. The whole structure must be correct. I don't rush just to please people, I do things in the structure that we see and the man can understand. **(:23)** You must understand what this invitation in the Vatican means. The change is huge even for Vatican. This is the end or the Religious Leaders. When a man, or a Pope accept that all the Religions are one and have to work in one direction, it means that the time of their guidance has passed out. They are needed for the transition, to educate people about what this transition time means. We use the Path that is already is there to do the job smoothly, the Path is that we are all correct, but we have to find a way, the way is got to be done. The way its suits the humanity, not names! **(:26) The Spirituality comes from equals of the fairness, btw the Physicality and the Soul. There is no difference, when you understand the level that your Soul exist, and you live that life in the Physicality, then understand the process of the Creation.** Now is time to give to these World leaders to understand this process. The knowledge which is been given will force the change, not the swords or guns. The nuns and the priests lost their own ways, so how can they guide the others. When they go to the restaurant with expect to be treated differently, so the cause of the problem starts with their own behavior and this is what we see with all the religious leaders. **(:29)** When we are in the Space the space in the craft is limited, you can't have a palace, we are all equal in this ship. The world leaders are the body and the religious leaders are the Path to the Soul, and if we don't bring them together we don't succeed, because one influence the other. We will take man to Space in a correct way, and we will take man to Space as one, not different colors and shapes and beliefs. I was watching the World Cup, we start we so many teams, and we support those teams, as disappear in the second part of the league we choose a new ones, and the we go to the third round, now we have less and support others, the whole supporters watch everything, and then we watch the final to see who becomes, and we see they are the champions, this is the way that our world will come, more and more we see the development of the past the more the booze of the past will go away, and then they become one, this takes time. **(:33)** As we see in the word cup teams disappearing and becoming one, we disappear and become Totality. We are in the last section with the world leaders. This invitation with the religious leaders is to finalize, this is the last move, because after this move there is nothing but unification through science. **(:36)** Accepting this means underlying with work of 3 or 6 thousand years of injustice and they don't want to be responsible for. A lot of people asks why I don't release my book number 9, The Structure of the Soul, if I release this a lot of religious leaders today will commit suicide,

will disappear, because every man will understand where he stands in respect to its Creator and the rest of the Universe, and the beauty of this is that every man can teach himself, but in this transition point we need the support and the help of these religious people. The new guide line is not the Bible or any Holy Book, the new guide line is within the Soul of the man and is connected with the Physicality of the man. There is no punishment, this was made to bring control, and this bring inequality. **(:40)** The process is very simple, but it has to be understood, if not understood become hypocrisy. **(:42)** The funniest thing is, the Nobel Peace prize, this money comes from killing people, how can people accept the Nobel Prize?! Story of Nobel Prize: Nobel family that manufactures dynamites and by coincidence the gentleman did the obituary of his brother but the reporter made a mistake, he wrote that his brother was alive in the name of the one who is dead and it said how horrible man he was, caused so much deaths, and he said, Oh is this how people will gonna think about me? I must do something to people think I am a good guy, so he made the Nobel Prize. So people who receive the Nobel prize become blood money, we are praising murders. Nobel Prize is the most shameful prize to be given to a man and to be accepted. **(:45)** The Soul of this Science has been already been passed to millions of people. **(:47)** The question is how these religious leader will be correct enough in their Soul to cross against that door, and once one done the rest will follow. **(:48) In Space the point of worship is not in the Mecca or temples, it is in the connection with your own Physicality and your Soul and your correctness with it. The biggest battle is to constantly be aware about the weakness of the man!** The battle comes in when I look to a beautiful woman that belongs to another man, is it my right, my intention? If I see a child which is hungry in the table would I put my food in front of him? Is awareness of being correct! Being correctness in respect of who you are, and this take a lot of training and a lot of understanding. Then the rest will be done. **(:52)** Question about bring down the Religions. Keshe: A shock does not help. It will be done as a complete cycle. The humanity is not ready for huge change in such short time. **(:57)** We have to bring the change in a very slow pace that people will understand how they have been abused, but people will have the means to understand and the tools to not be abused. **(1:00)** The expectation of achievement of the KS in the lab were to high but with no fundamental knowledge at the foundation, the KS came in with the materialistic point of view not understanding the Plasma, but trying to enforce one knowledge that was wrong to another, as a guide I had to tolerate, I have to accept, but I have to push for the further knowledge for them to understand in the long run. Criticism has to be there, but with knowledge, not with the ignorance of the knowledge. You will see flow of KS coming and going. **(1:03)** Keshe talk about how people even in the Foundation try to get power in a subtle way. People misread your openness. The same problem would come to the Foundation if we are not fully aware of it. We should be amongst people for people to see how to be and that there is no difference btw man. **(1:05)** Question about go to the principal field without the physicality and people who stay in quarantine. Keshe: When you go through specific fields and you have a mixture of fields you have to re-align all the fields. Its like putting you to a process and your eyes and your legs has left behind because they have a different field structure. You have to bring everything to same same level so that you can cross, otherwise pieces will be left behind. Every single cell of your body is made of Plasma and each Plasma has a full principle transition and matter strength, and more. Needs time to adjust, quarantine is hold things till everything gets to

the same point. The ones who have more matter like the bones are more difficult to be transfer. **(1:07)** Keshe said that he saw a specific moisture in a place in the lab, and the KS did not noticed. Keshe talks that the knowledge Seekers are doing the Gans but did not fully understood what is going on. **(1:09)** The Gans of CuO2 for example: that Gans you can take it through the principle because it is a Plasma, but the solid Cu which is in that water which is produced in the Gans still in the matter state, you can not transfer it so easily through, because it have a physical bounding btw other electrons and protons. Even if you look in your Gans cups, you have a process at the bottom where you collect these bubbles of Gans of CuO2 for example, that bubble is a Plasma. You need a a time for all the Cu transfer to Gans, and then latter you can convert Gans into matter you need to. You don't need to carry the body of man across the Space, if you carry one structure of the atom of the man you can replicate the man physically anywhere in the Universe. Is the Soul which carries the Body, not the body which carries the Soul! And this is a misconception in the world of the Creation. I have explained and try to explain to the medical people on why we change in the womb of the mother as a fetus to bones and Brain. **(1:12)** A fetus is in the DNA. In the teaching room we started to show the structure of the formation of the fetus in the womb, how the vibration of the heart of the mother, how the motion of the fetus itself gives rise and position to the structure of the one core which is holds the Brain and one core which holds the Intestines. That beat of the heart of the mother if it wasn't there the fetus doesn't move in the right move that the Brain structure set. A lot of people look into the DNA form with the child which is born with defects you got to look at the physical structure and the heart beat of the mother. Because that heart beat, that motion of the beat of the heart is the way the Brain get its structure, the way that the first cells of the bone comes to become sitting in where they are to become a bone. If you leave the fetus and just give it food you find you have the Brain and the fetus, but you don't have the correct assembly (??), that rhythm, that motion is needed. And then when you have that first Brain that you start having the Soul, and when the connection comes with the beat of the Soul in the fetus affects the fetus itself. It's a lot to teach, and a lot to understand. **(1:14)** Question: That is why the fetus can be born out of the womb? Keshe: Yes, you are correct. If they can replicate the heart beat of the mother the motion of the heart beat, because that heart beat creates the vibration, and that vibration is needed for the structure of the Brain to be settled and come. In the lab structure has risen out of the Gans powder. **(1:16)** The Soul of the KS has changed and with this comes physical change, and now you see a mountain rise. The fetus needs the MagGrav fields which is the heart beat of the mother, but it needs the physical motion which that heart beat creates, that little motion is needed for the structure the Brain to be created. The doctors have to look for totality, not just what happens to the fetus. If you try to create fetus or life you have to create the total environment of life not just the physicality. When the heart of the child is developed, his heart beat complete it full cycle of the Brains structure. Why is Homeopathic so close to the cycle of the man's life? Because it carries the same vibrations cycle as the heart beat of the mother to start with, that little vibration which you do you reset the structure, and then the structure go itself to where it should be, that is why Homeopathic works. This is where the setting comes, not from the MaGrav field of the beating, the heart beat of the mother and the man, even when you are independent you become adults and older then you get the Alzheimer, you get the connection btw the Alzheimer and the heart beat of the man. When you get older

the heart beat slows down, the vibration does not create the same kind of bumping from the Brain movement and the motion, so the cells move in different ways and all sort of diseases come. If you can keep the heart beat in the right configuration you can live for millions of years with the correct Brain, because the body will recycle itself. These are the things we will teach in time. **(1:19)** Question: At what stage the Soul becomes into the fetus? Keshe: When the main Brain is created, when the fetus is in control of itself, not the physical part, the P part has nothing to do with the Soul, the E part is, when the E part which is the central part of the Brain is developed then the Soul is completed. This does not mean that if you are born with two legs not being there you will have different Soul; you still have the same Soul! The minute the E part of the Brain, which is a connection btw the Soul of the man is created, then the Soul is completed, then you are responsible, then you are responsible for the Soul you have created. The KS keep rotating these stupid cores in the reactors, but they don't understand that they have given life to a structure inside which have its own Brain and control the things he have seen it. The Soul is inside that P structure which is rotating, and when they understand they can interact with that Soul that is created, then they succeed. Till they don't unify nothing will happen in that lab, because this is not a P matter. Why the reactors works in so many ways? You have to look at the Soul of the man who controls it. Why other reactors are not performing, or draining? I don't look at which reactors works, I look at the behavior of the Plasma inside it, that will tell when it will be the time to fly and to move. Unconditional connection creates unconditional reaction, and when the KS learn this then they will go to the fly position, when they learn to be United and unify and wish of be part of the whole humanity then the systems will fly. **(1:23) The same that happens with the KS in the reactors happens with the World Leaders, we need to unify!** Keshe says that he need to leave in 10 minutes. **(1:25)** We have the full 100% solution to any cancer. But you have to realize, the questioner said that Mr. Keshe said to him that he did not understand, and this is one of Mr. Keshe's habits and he is trying to changing. Something which people have to realize that if you release such a knowledge of how to overcome all cancers we will be wiped out. In the Space we will get cancer and we have to find a solution for this, and we have the full solution for every cancer in this planet, but we can not disclosure it. The time will come soon, you will do it. **(1:31)** Mr. Keshe leaves. **(1:33)** KS answer questions about the production of Gans.

16th Knowledge Seekers Workshop – June 26th 2014

- **Main topics of this Workshop**
    - **Talks about Vatican Meeting, Unifying Religions**
    - **Half Spheres Formation (Change of Polarity)**
    - **Conversion from Plasma to Matter (Ex of The fields of the Sun Converted into N)**
    - **Stars are Plasma Without Containers**
    - **Use of the Technology for the Collateral Effects of Chemotherapy**
    - **Explanation of How the Decontamination of Fukushima is Done**

- **Food that we Use are in Gans State**
- **Plasma Give and Receive Just What it Needs, no Danger**
- **Cup of Life (No Need to Eat Food)**
- **Curing Cancer with the Cup of Life**
- **Fasting**
- **Gaps in the DNA and the Gaps in the Nano Layers of the Cu Wire are the Same**
- **RNA Structure and DNA Structure are the Same**

(:01) Dr. Eliya assume and talk about the meeting in Vatican. When Mr. Keshe entered the Q started a huge rain. **(:10)** Their intentions attracted people around them to ask about what they were doing. **(:16)** Marko assume and talk about a conference that happened in Italy. **(:21)** The KS arranged another Star Formation and are still working on it. **(:30)** Shows a video of Armen making the reactor. Armen says that this technology is secondary and the most important is about how to correct ourselves through this technology. **(:34)** Ivan assume and says that he felt the emotion of Armen. **(:36)** As Dr. Elya said a storm happened when Mr. Keshe entered the room and it is said that the storm stopped right when Mr. Keshe left the room. **(:40)** They are trying to work with reactors with half cores, Armen call them the female reactors because they look like women with dresses dancing when the reactor is on. **(:46) Mr. Keshe assume.** There is couple of points for us to explain, the reason to go to Vatican was nothing to do to put down the integrity of the position of the Pope, but to unite the Religions. The invitation is very simple, we meet in the cloth of man, not with higher hierarchy. We have invited 6 world leaders for this meeting. Its not about to create another Religion. **(:49)** Keshe says that Elyia became the mother of the Foundation, he thanks her for everything that she is doing. We have set up the structure for the Health Center in Malta. **(:54)** Keshe talk about the Foundation and that Jorge left. Sometimes the things become too expensive to stay in the Foundation, and they are working for people who can not afford to pay stay for free. **(:56)** In Italy the things changed, the authorities are recognizing the technology and understood that we are serious in our work. Even the Institute (Research part) is in the same location as the Foundation (Organization), they work separately from each other. We have been advised from our advisers to make this. Some people will be in both places or just in one. **(:58)** I came across with a genius of the Science, he said very simple that he has found the system to detect Earthquakes 6 to 24 hours before it happens. This man made the presentation, and his daughter was sit next to me and then I said to her that her father is a genius, because he explained as a nuclear researcher how he detected the connection btw radar and the EQ. According to what he did and what he announced he saved some 300 lives, people who was listening to him they moved in the night before the EQ that happened in Italy. Countries like Taiwan has adopted this systems, but he stills is getting all sort of problems, persecution and the rest. His name is in the program. He was in the podium afterwards discussing how his system can work, and what he explained to us made sense as a scientific engineer, he has touched one of the major problems of humanity. In understanding his explanation scientifically we see the connection with the systems in the Foundation, what we call the Star Formation but if you look at it is exactly like the Earth, we think we immediately after his talk 3 or four got together, and I believe that we can replicate and facilitate for him to physically show

the conditions of the radar and the EQ conditions, with adjustments in one of the reactors in the inner core we can adjust the tectonic plates on the Earth and show the correctness of his theory. As I said in the talks there in the podium that my Foundation is his. EQ has killed millions of people and this man has found the solution, most probably you will see a collaboration in respect with this work. **(1:04)** They are setting two systems and we will inject these with Gans, Armen made a sphere few weeks ago so you can see the formation of Gans, it explained to me a lot of about the movement of the material inside the sphere and after the meeting with this gentleman brought a lot of things home. We can replicate liquid conditions of Earth trough Gans materials, different Gans densities, so we have the spheres of Armen, and we see a lot of things in it in respect to the separation of matter into Gans, and we have tested the 2 reactors that John brought in, the whole structure will teach us a lot. You talk about these new systems, and now we have the whole structure, now we have the 2 formations, one is a full sphere and the other is a half sphere. The half sphere is to be more stable in respect to the polarity change. But we saw the polarity change in the half sphere when we move the system which has been put in the center, I heard somebody saying that this change of polarity is because now it is independent in respect with his twin star, and this is exactly correct. The change for the polarity in Ivan's reactor is more or less we might see the changes and this is what we always said, when the system change the polarity the other one will rotate, Einstein called this the funny thing because he couldn't understand it, but now we have a system to physically show this. The N pole of Ivan is interacting with the S pole and vice-versa. And the polarity change in the half sphere is for the first time. The first indication is that the sphere is totally Nano Layered in Ivan's sphere, so the Mag fields of the Nano Layers are creating the MaGrav fields of the environment that the Plasma inside this reactor is working independently own his own, this is why it has change is response to other reactors. The difference is that one is half and the other is full, so the position of the half sphere will dictate the position of polarity. It's a new understanding, it opens a new door of understanding. **(1:08)** John was explaining about the reactors, specially Ivan's reactor, that we see the release conversion of a Plasma to matter, this system is totally airtight we see gradual reduction in the vacuum of the system. As we already vacuum, when we lived it starts to get back to release gas again, I believe that these gas that we are extracting is of H which is a Plasma converted, I can explain how Plasma can change to a matter and this we see in the upper atmosphere of the Earth, somewhere in the structure of that reactor the position created which I can know these reactors as my own child, because I build every single one of them I can explain why I see the conversion of Plasma into matter, and if it carries on we can see the total change of the Plasma into Matter. This is the same process of a reverse of what you are doing in the process of your Gans materials and the CuO2 layers. You create a environment where you convert matter from molecular structure in atomic Nano layers and then you create a similar environment which is for Plasma and the into a Gans. And then if you go into the gas state directly to a Plasma now you are creating the same environment as you do with the salt water in the production of Gans and the Nano Layers which you have created. So you in fact doing the same process just with different medium. This process is going further, as we do more experiment and teach more open the technology we go into these knowledge. **(1:11)** Question to Mr. Keshe repeat what he said. Keshe: Yes, because of the Nano Layers in the inner core the environment where the Plasma behaves exactly like

your CuO2 behaves in the water with the salt. In the conversion you use the Nano Layer to convert into a Plasma to become a Gans state (CuO2 or CO2, whatever), and these cores like Ivan there is a position created where due to the MaGrav fields layer of the Nano Material which we have used to coated this reactor, creates the same condition, but in reverse, now we created a Plasma due to using the same material in putting the reactor in the double SF the Plasma inside this core is getting pulled to one side of the core, so in fact you are increasing and creating condition on the other side, if the normal gap btw Plasma and the wall was, let's say 2 centimeters other way around, now is 1 cm one side and two and a half in the other side of the sphere which is looking into other SF. So this expansion btw the gap and the wall allows the conversion of Plasma into matter. The Plasma leaves the Sun and when it gets into the right condition it converts into N and other materials, but if it doesn't get in touch with Earth it goes to another planets and if is not touched by any other planets it becomes part of the layers of the outer shell of the Solar System. Now we have created a position where we convert a Plasma due to its expansion and have give these few cm that converts Plasma back into Matter condition, that condition is created somewhere in our reactor due to a glue or stick thing. Has made that condition of Earth to convert Plasma into matter, we se this as a release of gas in the core. **(1:15)** Question: Is this just happens in the dynamic reactor? Keshe: At this moment is the first time we see in the Ivan's reactor, we have no leakage, these systems are totally sealed… Questioner: Do you spread Gans over the Nano Coated places? Keshe: No, these layers have been glued on we put gases in over weeks and converted it into a Plasma, the Magnetic holding of the Nano Layers kept the Plasma inside, and something which is been a puzzle for so much people, how much this core is holding up, this reactor is literally taking all the Mag fields which is in the layer of Gans which was before it was put in. We created a Plasma and this Plasma was contained inside the reactor, the Plasma doesn't sit there, it is dynamic. So even when we don't see the motors running, the Plasma itself on its own run. As we always say, we don't see any motor on Earth rotating or the Sun, but the Plasma rotate, we have manage to create this same condition in this reactor. We have created an environment since we put the new position that it has created a condition enough for the Plasma to convert into matter, and every time we put the vacuum system on we see dropping of the vacuum in small amounts. This has come about by changing the polarity to become stable, and secondly in moving the position of Plasma, not centralized, but moving to one side. There is a lot of things which I try to open up to understanding. **(1:19)** Keshe talks about been aware about the changes in the data of measurements of the fields, this can be very dangerous, even more dangerous then Fukushima. You ignore it and put in the direction of a plane that is flying and that plane crashes in a city you are responsible for that Soul. Anybody who works with these systems, measuring amperage and other things and see fluctuation on the measurements, stop, till you solve the problem. Fluctuation means problem, and that was what we saw in the core number 3 here. We start to see the next phase of development, you called two SF now you have two atoms which are interacting, now we can replicate as the number of reactors increase, the atomic structure. The KF is the only organization who has this facility. Now we can for the first time very soon put two reactors at the same time in the center, then you can replicate He. Science enters a new dimension, we don't need to guess what an electron does. We can now replicate and change the parameters within these cores and very soon we can even create reactors and control them and understand

the properties of Pu (Plutonium) and U (Uranium). Now we have page of data of behavior of one reactor, we have a reference point. Now we move the two detectors inside and outside the circle of the SF, each detector is looking in the environment of the SF not just at one reactor core. Now we see the fields across the two. Both detectors have been showing vertical push, that means that we don't get a fluctuation, but we get the strength variation on the down (??), which means that the original SF is sitting on the origin of lift, but its not going because the numbers are not reaching the same level. Something has happened before we go for Rome, I went to the lab and the core of Marko which is a still core was all four at 12, I tried to understand the reason, why I could see 12 in one reactor and some centimeters we saw no indication on the second detector. The only explanation at this moment is that that core reached a lift, and as the field moved out the sphere the field came directly in touch with the field detectors which are with current of energy, and the field collapsed. So for that reason we moved the detectors outside the system. **(1:27)** We went out for 10 days, no reactors were shut down, we came back they are still running, it shows the hard work has paid off. **(1:28)** We lose the vacuum but the center core did not lose the Plasma. This has proven again that by loosing the vacuum, once you have created the Plasma due to the property of the Nano Materials which holds the Plasma to the center is not a worry again. I would love to break John's reactor, when I saw this the intentions became stronger, because John's reactor is a center pin which we literally leach the Plasma to it. In his reactor there is no Nano Coating, there is only one dog leash in the middle, we put a pin of Nano Coated Material, which the Plasma is holding on to. We have glued to the Plasma to this electrode in the center and we have show by the lost of the vacuum on the Mother core, we do not need, once you established Plasma and you can hold it that it can establishes enough in its own strength, you don't need the container, so in reality this is exactly how the stars works, we don't see any solid container in the top of the Star. It will be very easy to repeat the structure of the Sun on the main reactor. **(1:32)** Keshe said that since they came back from Vatican there was an attack in Italy. **(1:33)** We can repeat a lot of theories in the world of Physics. Keshe invited a Bulgarian to work with the systems. The door of knowledge is open. **(1:35)** Keshe is helping to develop the Bulgarian reactors. **(1:37)** Question about the Diabetes paper. Keshe: I have to finish this paper, what happened, this lady I have to literally chase her for information. In 6 weeks or so, she had reduced the use of insulin in about 50%, and as I hear, the changes are very drastically, but one of the reason we went to this cas was not so much because of Diabetes, we know that Diabetes we can change from our fisrt case 7 years ago, Diabetes 2 have a full solution. The reason we took this diabetic condition is because the diabetes has damaged the Kidney, so the lady needed a Kidney transplant and what we are heading for is to stop the need for this transplant. We took it up to see if we have enough time, the brother, father and ancestors have the same problem, and all died of this process of Diabetes and Kidney failure. At the moment not much information. **(1:39)** We were asked about Cancer from a member of the audience in the conference, that if we can help her grandmother who went through a cancer, and she has been to Chemo, I can give this data. We have confirmed this from the Hospital in Germany. We are spreading the knowledge around the world that it can not be put in hand of one nation. We were approach from a gentleman who is a doctor and the father is a dentist, the father has a Brain tumor and they took it out, and they told that the life expectance was 12 moths, that is the normal with this kind of Cancer. The guy asked me

help, they were going with Chemo and even with Chemo there was a life expectance. I accepted the case due to the new understanding and my strong belief that Chemo is the best solution for Cancer, but the side effect of Chemo which are causing the problem, so I set out to understand how we can use the Chemo and change the condition for the benefit of the Mankind. So this has been in our table for 2 or 3 years and the conclusion for me was, I can understand more and more development of the Lymph, and how the Chemo has been more the cause of the Death, more then helping, so we built a system to reduce or eliminate the side effect, or at least give the support for the body to produce his own Immune System and the side effect of the Chemo. Since the day we started the doctors in Germany monitored the gentleman on a weekly base, then the Center of the Chemo who did the procedure, they put condition if there is any progress or backward of this cancer, this test was done last week in Germany and they have done the MRI and blood test, there is no sign of cancer in the MRI, and there is no sign of cancer in the blood test, the blood test is as good as mine. So is been clear and now we know, I shoed the data to Ivan. This shows that Chemo can be changed for the benefit of man by reducing its side effects. So we gonna monitored this case for the next months. Not we just found the solution of cancer, but we found a solution for the side effects of Chemo. **(1:44)** One has to understand that there is no much difference btw radiance Therapy and chemo therapy. You look at one material that you have given to your body, at the end of the day is delivered a large dose of Plasma MaGrav field of certain strength, and the problem with the Chemo is this MaGrav runs through the whole body, so it delivers energy to everywhere, not only to the cancer, so if you can reduce the energy in 2 points in the body, then the material stays the same and the IS of the body works normally, we have found how this can be done. We will release the data because we need to open more cases, in large scale development. The other point due to the decontamination the data with the cleaning of the atmosphere and the liquids its still in the carrying on. They did tests in Japan. The Japan asked for the help of the Foundation for another decontamination that is more dangerous. There is enough knowledge in the Foundation to correct Fukushima situation. **(1:48)** In respect to Fukushima decontamination: The Cs is Gamma radiation, you create Gans or systems which are MaGrav based, so Gamma been a radiation gets absorbed, so Gans materials as Mitsue has shown is the best field for Gamma rays, which are the most dangerous. Now that you have the Alpha and Beta these are more matter energetic system, then you have to find an intermediate for this process, and this process of producing Gans we have this intermediate. You convert from one to another or you confine all the radioactive strength into a radiation level that the Gans material can neutralize, or absorb and bring it to itself. So this material are developed, soon will be tested again. Any Gamma ray which is in the material, converts it back to lower state of Alpha and Beta, so you see rays of Alpha and Beta when you have no level before, or sometimes you see a increase of Alpha and Beta because you bring a step down, this is for those who are working in this industry, because I know the nuclear scientist in China and Japan are closely following the next developments and listening to these programs. You have to find a warm, which is food is Alpha and Beta. So have found that warm, so we let it eat and it convert to a Gamma and to Gamma to neutral state, is not doing, is pressurizing it. Keshe talks about again who speaks the same thing in these matters but in reverse, he gets the Alpha radiation material through a specific process to Gamma and to Gamma he can detect the strength. We have found this in the

warm condition the radiation of change to Gamma allows us to neutralize the radiation. This is the whole process of the change of the reduction in radiation. **(1:52)** Question about radiation in human body, can Gans materials can be used to neutralize radiation on people? Keshe: Your skin has that, part of the skin structure has that property, that is why is there for. Dr. Elyia will explain. Dr. Elyia explain. The skin is a Nano Coated layer and it have three parts, the last part is the Nano coated part, so you have protected from the Nano layer skin. Question is about if people get contaminated by radiation as in Fukushima. Keshe: You ask a question that we got to open another chapter on the medical side. In a way yes, if you swallow radioactive materials or breathing in, you can use the health side even as a Gans to reduce or even cancel the damage, or allow the material to be absorbed, this is done frequently as a protection system. Part of this is part of the research we are doing with ILS. We have had good results in slowing or blocking the development of ILS, we have very good development of people with ILS to move, but we could not stop the process of development and the final death, now we go the other way, we stop the process in the Brain structure itself, but this new process was opposite to what we needed for the physical improvement, so we got to a point that the new system, if we use one stop the other and vice-versa. A person was with ILS in final state, in death bed and in 10 days we could see the positive results with the technology. Which means that we have manage to kick in the physical movements and the structure of the body internally, by using very much the process of understanding the Plasma and using the process of food chain. A gentleman lost the control of saliva, the muscles in the neck stopped to function properly. His wife said that this week and past few days she did not needed to use the suck machine to take out the saliva because the body has start to work, even he having a pipe in his stomach. This gave the indication that we can reach the process of Gans Materials for Physical movement, and use the new system for other ILS volunteer that we can see. **(1:59)** The food which human race use it is in Gans state, but you got to understand that how and where to use and the way it has been done, you can use it as Gans state material for specific conditions as far as we can tell now. There is a possibility that we can use the Gans more or less like tablets, where they give you radiation dosage in a tablet and you digest and get washed out in your body, in your blood, you can use it now as a safe system, like a Gans, there is no radiance damage, this is a discussion to be done in the future. So yes we can use the Gans if you can stop the capsule to be opened up in your body and going through your digestive system that go through your body and change the environment in your body and reduce the Gans. This process started in the Stomach and Intestines with a lady from Russia with cancer. She had a cancer in the top of the Intestine and at the bottom, now she is going to give 6 weeks collaboration with the doctors to see if she can reduce the condition of the cancer. People who go to Belgium saying that we are doing illegal things in medicine, we have legal certificate that we can do so. We will have the opportunity to start the Health work in Malta. **(2:02)** We can not teach the medical side to everyone, as the Indians say, half doctors is dangerous. Dr. Elyia will organize a way to teach the Health side. The same we brought the Religions together and try t brought the politicians together, we have to bring all sectors of the Health together, and take the best for Human Race. This is the next step, as I asked Elyia to bring all the side of medicine. **(2:05)** Question about the production of layer of Gans in the bottle of water close to the reactor. Keshe: We are looking for this already in about few weeks, we understand that part of the process of the cleaning is not

using the material direct to the water we are in design composition of this system. It is like when you put material through micro wave and don't get damage, we are looking for this same thing in a very commercial way. This is part of the work of other scientists out of the Foundation. This is like a table top, where the fluids flow over and the water get decontaminated, we need this process for places like rivers, and to air pollution. The questioner interrupts and ask about the safety of these materials, if it is dangerous to keep close of the MaGrav fields. Keshe: Not really, as long you don't get in touch with it, keep these things away, that we can analyze then we can tell you. Go to the video on the first talk I gave Saturday. It changed Ph content by 66%, it dropped N content, and this is just by contact. As far as we can see and Chemical analyses, nothing reaches to change the human structure, nothing at this moment, but at the same time the data is very thin, let us to our work. You got to realize, that part of one test cost to the Company 2500 thousand Euros. These people are investing a lot of money to understand this. We understand more and more. **(2:14)** There is no danger, the rules of Plasma, it just take what it needs, and will just give what is need to be taken. In so many ways if you use in a correct way, whatever body needs to adjust to short of it will receive from it, this is the beauty of this technology. But what does it means, does the body needs because it takes it? As far as we see and from the data from years we have seen any negative thing with the use of Gans. It releases a lot of energy, because it is a Plasma, the same as your body, but now we see physically in change of the materials, look at the report of the data from the lab, you can see the changes. **(2:16)** When you produce mozzarella cheese, there is a waste water, and it cost the company thousands of Euros just to clean the water to be throw in the land, with this process that cost come to zero. In a very simple way you get rid of thousands of cost to small factories. What we see now in the lab is that you can wash the material and continue the new production. **(2:18)** Now you can produce these systems that can neutralize the bacteria of your tomatoes. Not necessarily damage the fruit or kill the fruit,, it brings balance. The thing is that people started to understand the process. **(2:20)** Question about the decontamination of the sea near Italy. Keshe: We are working on this for nearly a year. Italians authorities are proud that we are here. There is a lot of work going on, the governments are seeing the benefits of this technology. **(2:22)** Keshe says that the Italians hide them from the hand of the Belgians. Keshe talk about everlasting pans with Nano Coated pans. You can seal Nano materials layers that you can cook, that you can drink with it, but this is the process that when you do it you do not need food to digest, but you have to know how to do it to not receive too much energy. The reason that we eat different food is to receive spectrums of different Plasmas, if you understood why Nano Layers are dark and black, and you can do something with it in a correct way you do not need to eat, Nano Coated Cups will give you everything you need because they bring the balance of energy which is in there within the water. This is the water of life. You have to seal when the governments agree in a peaceful way that the foods are not used as a ransom and the seeds are not kept, need to be delivered away. When you Nano coat cups just go back and understand the technology in a correct way. The Nano layers absorbs the spectrums of energies that is why is black. You can create the condition in the leaves and it releases what you need from it accordingly with what you put in it. We open the doors as much as you can understand it, otherwise it looks like magic. You do not need to slaughter a cow to get protein, you see in the cups in the labs with the fat in the top. Now if you can make a cup and seal it in a correct way, then the spectrum of the

MaGrav Plasma in the cup will transfer its energy accordingly to the molecules of the water, don't forget that even the water, the air comes from different spectrums of fields. We are seven billion in this planet not one of us is exactly the same, it is the same with the air we breath, just because it is O… so we can use this affectively in feeding the man. You put a cup everybody put the water in it and the body take what it needs. You don't need these elaborated systems of feeding and the rest, but at the same time we did this about 8 years ago in Belgium because habitually we need to chew, then we go back to eating. Now we end up with the control of foods! If you know how to use different cups, even different coating you absorb different energetic levels your body need, you don't need to eat, we have done these tests. **(2:28)** Question: The Nano Coated Material will not get in touch with the center material in the cup itself? Keshe: It can get in touch with it but you have to understand what are you really seeing in the cup. The knowledge is deeper then just make a Nano Coated cup and start drinking from it. You got to realize that, like Ivan reactor, we get a Plasma from it and now we are releasing as a matter, go back to the same principle in the cup, you do not need to o in the lab conditions, we test the reactors for the medicine because we need to. I developed the proteins aspect in Plasma, what we call Neuro Amino Acids, you can do the same thing in the cup, you put your soup in and you get what you need in your body, you can put a water in and that water becomes the food, but let the scientists do the full day analysis in the next year or 2. No one in the world needs to die of hunger. **(2:30)** You have two mobile phones, I give you everything yu need t survive (Mr. Kshe refers here with the material in the mobile phone to produce Gans, I think). When you drink a balanced cup, water, nothing in the body goes unbalanced, even if its unbalanced becomes balanced, so the cancer becomes a history. The world of Science has changed because we understand the process of the Creation. One of the reasons we got a lot of misunderstandings is because people go and put their fingers into the Gans material and say I didn't get energy so you are wrong, this is stupid. They don't understand that the energy that has been delivered is so vast that it can cause danger. Now we open the cup of life. If you can make a composite like Nano material, like a Zinc, Cu, whatever, and you can get it all coated and drink from it, you receive the Plasma of all your minerals, metals that your body needs and if there is too much of it, when you digest it you say goodbye to cancer, because your body does the process of balancing. Life expectation through this process will reach thousand years, even the youth regeneration. You don't become younger, but the body comes in balance with what it needs so it doesn't destroy itself. Now you receive the right amount of food and medicine directly from your own drink. No child will go hungry, but if you do it in one goal you create mayhem. We can do the same through the inhalation in the cup, pass the air pipe through the system, so the Lung receive the right Plasma for the Brain to work. Then the question goes where does the Physicality of the man goes to? Keshe goes out abruptly. **(2:34)** Keshe reads the message that he received talking about the results of the water. We got to change and understand the process of change. I asked for the KS have you prayed for your system? Even the cup you drink you pray for it because is that that is giving you life, because it gives part of its energy to you. This is the whole process of the Creation. And more and more companies knows that we are doing in the correct way. If anybody dares to make the cup and use it, we saw woman get the menstruation back at the old age, it is truth because the body balanced to its original position. **(2:37)** Rick ask about fasting for better health and says about science researches that fast can

cure cancer and other diseases. Keshe: First of all I can not fast, I tried in the past, after three days I started bleeding, I was not born to be a religious guy. Go to understand the process of fasting, you know in the fasting is about learning the process of adjustment of the body not to eat. In different religious people fast, they eat like a pig before or afterwards, this is not fasting, the fasting is done in a normal way and is kept in a normal condition, there is a fasting called (??) that became fashionable, you eat whatever you can do whatever you like in specific times of the day. These are radical changes. You have to understand what does the fasting do. In not eating in introducing new materials to your stomach, you create a new condition to your stomach. Fasting is creating of condition. The acidity and the enzymes in the stomach don't change in a way or stay the same because you haven't eaten. You smell stake your body starts to produce the enzymes because it thinks it gonna eat it. Even if you are fasting your body doesn't stop working. I started to understand the process of the fasting of the Italians. Italians fast everyday, they wake up in the morning, they get a expresso and a piece of cake, and you put the most delicious thing in front of them at lunch time they don't touch anything, and the they don't touch anything until the night time. Italians fast everyday, there is a reason for it, you have to go back to the culture of the Nation. These people did not have food so much available as we have, these are the war nations. They taught themselves that can eat one meal a day for their survivors, it became a habit. 80% got perfect bodies without regimes or diet, it is about the way they live. **(2:44)** Rick talk about research about fasting increasing the longevity and health. Keshe: The point is when you eat normal, you use whatever you need, is the chain process. The chain process of getting fat is that they have realize that common link to make money. You look at the sugar, you look at the C, the CO2 with gases and the salt, you continually make sacks of water, and that water need to be maintain, otherwise you get cancer or dehydrated. If you can irradiate you hunger with water then you are obese, because that water doesn't just fill up the stomach, the Brain takes it unless it have had enough to keep the salt floating and the protein, as we call the fat layer in the same condition. So, if you are hunger and you can take a glass of water and the hunger goes, you are obese. The Italians don't even accept the glass of water. You don't need a diet for it, if you diet, diet correctly. This change of habits, these youngsters suddenly become vegetarians, they cause themselves huge damages, they are happy and call themselves vegetarians and don't kill animal, it doesn't mean that it doesn't walk it doesn't mean that it is not alive. I have a talk with a vegetarian and he said that never ate a single animal, and I went to a data to show that man eat at least six spiders a year, they are in your food, they go in your mouth when you are sleep, so nobody is 100% vegetarian. **(2:47)** Question about the DNA and junk DNA. Keshe: I can tell you very direct about junk DNA, they don't understand it, every piece in our DNA has a meaning, but since they don't understand they call it junk. Even a DNA part is used a gap is needed for the information be kept in the next chain of DNA. There is no junk. One of the things they call junk DNA is the connection btw the DNA and the RNA, the information link, the DNA doesn't stay in one place, I wrote a paper about the conditions of the spiral of the DNA, why it is like this. It is because of the MaGrav field f the protein and the Ph backup, the spine of it, they create a condition exactly like the Nano layers you built on your Cu wires, there are gaps btw and those gaps in your Cu wire, they sits on each other flat, but in the DNA the force of the MaGrav fields of the DNA forces that shape, for its stability and at the same time in interaction and connection with the RNA

forces, the RNA are at the same structure of the DNA but in the Plasma form, it holds enough information from the day the first man opened his eyes on this planet. What they search for gene defect, in RNA in time the man understand the Plasma condition you will find in each Plasma like CuO2 or CO2 there is a structure in the RNA and the information stays at its structure, but at the moment they don't understand. These links where they think that there is no activities, RNA and DNA they can not exist of its own, is like the Soul of the man and the body of the man, they exist in connection, these links are needed, if they are not there is separation they can not exist and the information will not be transferred. **(2:52)** Question about the number of cords in the DNA. Keshe: Everything is on accordingly with what is needed, and what is off to you is open to another channel. Nothing is off. Is the same with the information channel btw your Brain and your toe, just because the toe is not used for 10 years, doesn't mean that the body is gonna reject it.

>>>>

17th Knowledge Seekers Workshop – July 3rd 2014 (1st hour VERY GOOD)

- **Main topics of this Workshop**

    - **Keshe talk about the Meeting with the Indian Guru in KF**
    - **New Settings in the Systems in the Lab (Feeding the Reactors at the Same Time)**
    - **Breakthrough in the World of Plasma Technology (Creating Plasma Without Energy)**
    - **MaGrav Fields of the Motors have No Effect on the Fields of the Plasma**
    - **It's about Create Conditions and Not Achieve or Produce Something**
    - **Trying to Replicate the Work of the Universe in the Reactors**
    - **Example of the Egg to Explain Interaction btw the Plasma and the Matter**
    - **Interaction of the Earth with It's Twin Sister (Earth Evacuation)**
    - **Teaching this Technology to Man become No Housebound**
    - **Correcting the Ways of Humanity to Go to Universe Community**
    - **Process of Creation on this Planet**
    - **Understanding Why We Need Man and Woman to Create Life**
    - **Virgin Birth is a Reality**
    - **Another Forms of Life in This Planet that We can Not See**
    - **The Natural Process of ITER Atomic Fusion**
    - **There is No Anti-Matter but Principal Matter**
    - **Water in this Planet Holds the Protein and the Gans**
    - **Getting "Free Energy" from the Reactors**
    - **Proton dictates the position and Vibration of the Electron**
    - **How the North and South Poles are Created.**

(:01) Rick says that the topics of this workshop will be systems and new settings. Rick hope to hear about the Guru that visited the Foundation last week. **(:03) Keshe comes in.** I was saying that Guru Mahan joined us last Thursday in the afternoon, we had discussion and a private meeting in respect to Keshe Foundation and his group that it is a large organization. We understand the position of Guru and at the same time, in the same way in the process of wold peace he was invited to the meeting with the world leaders. He accepted and we received an email that a representative of him will be there in the 14th, he has requested a second meeting in August, a second meeting has been agreed for the development of the technology in India in conjunction with his Association, so we most probably see KF… So the Guru will be back to the Foundation to open the Institute as a University in India. So we are moving in the next steps of teachings in India. Meetings like this are becoming more frequently, with officials of different governments and different groups. By large we are moving in a different direction, that was always my hope, that we don't end up in one place to be the Center. We expect that this process carries on much faster. **(:06)** The point with this world peace treat is that we have not yet received a new response from any of the world leaders. We had no response from Vatican, so we need to send a second invitation for Vatican. We will see how the things progress, as I said we don't expect many to attend, the reason is very clear in the Peace message and the letter in my name. So as usually I pray for their Souls and hopefully elevate them to a position to be very (??). In respect to the setting, what we have done Armen and Marko will explain in more details, we have gone into central position, and centralize feeding. What this means is that in the past we went round feeding each reactor one by one, now we have set the systems that we will explain in the position of feeding simultaneously all the cores, which this means that from now one the central control all reactors by one feed, which means all the reactors are fed at the same time by one feed line. This never been done, it's interesting to see the development, but the whole purpose was to take the control out of going around all the reactors and interfering with them. So we feed the gas at the same time in all the cores, in a way the reactors choose what they want to take, which one needs the feeding and which one that doesn't. The process was very interesting. This allows us in the near future to literally connect all the motors of the reactors to one power supply to. We go on by up and down in the power and in the gas feed simultaneously. **(:10)** This brings a lot of new facilities available for us to do so, the new seeting are of 2 SF interconnected with 2 of the reactors. We have seen strange phenomena and feeding and we will see how id develop in the coming days. Now that we have 8 reactors available in the floor and 2 that is getting ready by John at the moment for use of Gans only, all the systems up to now were set up to use gases, we have broken a new dimension in the world of science where we are producing Plasma without any energy input, by purely interaction by H with the Nano Materials. This has never been done. At the same time as the Nano material produces gases into Plasma, then itself contains the Plasma, which means the Plasma in the reactors contains by what it produces, this is an unknown science in the world of Plasma Technology. We usually use different techniques called hot Plasma or whatever. Now the containment produces its own Plasma and is fascinate to see how this developed. When you come into the lab be deaf and blind, don't look for physical rotation of motors to get confirmation of the Plasma and that the things are in move, and at the same time do not listen to the sounds and the interference with your understanding. To this effect yesterday we shut down two

power supplies to the two reactors which are not physically rotating and we saw no difference in the outcome of the Plasma in the monitored systems. We carry on feeding gases into the core and we still see rise in the Plasma, so the physical rotation of the motors does not have any interaction with the Plasma rotation. **(:13)** We go slowly as each reactor come stay still we will draw the motors to see the effects. So the Magnetic fields of the motors have no effect on the field of the Plasma, because they are in the matter level, so we hopefully should reach a position where we see no physical rotation of the cores or the motors but we the rotation of the Plasma and the holding of the Plasma in respect to each other in both systems. Rick asks if the job of the motors have already been done in terms of producing Gravitational fields inside the reactors. Keshe: What happen is… When we started the Institute and when we went into the lab there was a sequence of events that was set, and one without the other one would not happen. And now we have the same pattern of sequence of actions. Initially we open the whole structure creating Nano Layers, using caustic, then we used the Nano Layers to reduce Gans Materials and some energy, then we use the nano layers in the inner and outer surface of the cores. In fact, the process which started in the third or fourth week of the Foundation in the lab was to go into different directions, one was to create a Gans of the material and one was to use the same Nano materials for lining and production of Plasma in the core. The direction of the Plasma in the core is not to be used as containment, is in the same process as to produce Gans, it is the step to produce Plasma, and in the coming weeks once we achieved this point we do a way in the Gans layers, because the Plasma will hold itself inside the position. We are going to smash John's core to see the Plasma inside it. So the process has been to produce Nano Layers in one direction in the matter environment like a sea salt to release the Plasma, or in the gas environment to release the Plasma through gases, in fact there is no difference, it's about creating the condition, not to achieve and produce something. We created a condition of the Earth, we reached production of Proteins and Gans in a material state, now in the reactors we are creating the condition of the Universe in the Cores. **(:18)** We produce Plasma in the same way, but through the gas material. John is busy with 2 new cores, and the next step is to use the Plasma that we produced to be used into to 2 small reactors. The difference is with the Plasma in the gas state is that now the Gans are themselves in a Plasma state in the spherical Plasma state, so in this state we don't need to coat the inner cores with more Nano materials, we already produced the Plasma in the Gans state. John is building new settings, and at the same time Armen is producing the same system but in a plastic (??). We can not see what happens inside the core of John but we can predict. The reactor of Armen shows us the same characteristic, we see a transparent one and we see one inside the core. There is a high possibility we use the three reactors together, because the size is irrelevant but the containment is relevant. In the coming days we are going to the next step of development, which is using the Gans… Production of Plasmas are going in different directions, one is use of Plasma through the gases, using the nano layes as containment and when we use the Plasma we don't need a containment, or to produce the Plasma when we use the Gans state to create the same MaGrav field. I hope we are right that the production of the Plasma through Gans materials is very much like the structure of the center f the Solar System Stars. In the Stars you don't get so much Plasmas like nothing, like a Magnetic field center, or you get <unclear> it as a matter Plasma which is very much the way of system that John would predict. **(:21)** We mixed the Gans of Co2

and the Gans of CuO2 to see are they mixed, we know that we need to mix some water. <audio unclear>. If you can go the next step, we need the Gans in the vacuum state with the nucleus inside it. So the reactors and what we have done is been step by step understanding and developing, there is a next step, we have seen production of material in the Iranian reactors in the window we see Gans of matters. Now with the 2 reactors of John, we try to build a Plasma curtain, at the moment 2 sets of SF are next to each other, we are studying there effects and there interaction. In the coming time maybe after the holydays we will put John reactor in btw the two, so we create a curtain btw the two, a plasmatic curtain, and this curtain, dependent of what we put inside the cores we would be able to achieve matter condition, which means that the friction btw the mag fields of 1 SF on one side of the curtain, with the plasmatic mag curtain will create friction, and that friction we can control the strength of the field in both sides, and can lead to production of matter. This is the next step. This is exactly in what happens in the Planetary and the Solar Systems, the MaGrav of the Sun in interaction with the MaGrav field of the Earth in the point where the Earth is leads to production of N in a huge amount. Further out the same process happens in Saturn with He, therefore by creating a curtain we give a imaginary Mag field curtain to create a condition of the Solar System, being the curtain the Mag field of the Earth. Maybe in a year, we put number of these small Gans reactors in the formation of the box, where within the box, depending of the field strength we create in the box we can produce new materials in the box formation. Not as a curtain, so in the Space craft you produce areas with given fields, and in that position you produce water or whatever you need in Plasma state and you convert it into Gans or matter. You got to realize when you carry large number of people, you have to create environments where continuously (??), and this is the only way we done. Boxes or rooms or environments are with continuous flow of Mag field from the central core or the cores leads to productions of materials that are needed. This is how in the Universe matter is created. **(:25)** There is a misunderstanding that in the Super Nova materials comes and become a Solar System or Galaxy, this happens in a Plasma condition, so Plasma which carries the total Mag field strength mass of Plutonium in the right condition will become Plutonium. You create the environment for it. Part of the misunderstanding in the world of science like what they call as Cosmic dust, this Cosmic dust are Solar dust, which are the main parts of the dust materials we see in this SS, that is created by the packages of energies of the MaGrav fields that left the Sun, and as they reach different environments of the SS they convert a Plasma to matter. So production of cosmic dust is exactly what are we going to do in our Magnetic curtains. The structure is very simple and all you need to know is if you use more Cu, you end up with the production of Cu near the curtain, and so on. You create the MaGrav field of that environment, and you literally sit in what you created. In some Space Tech you see like great systems, what it means you don't need to have boxes all over the place, you place environmental boxes with the different cores that they can change environment and you move it along btw the center core and the SF or the boundaries cores. So in fact as you move the core along the system you produce different materials, this is done in emergency cases. It means you move the Earth closer to the Sun to produce something else, and you move further out to Saturn to produce He. This is part of the tech that we start to develop in the next months. **(:28)** There is a very interesting subject going on in the forum about the slavery that is going on in the Foundation. In fact if we do not put time in the time of the KS in the lab these

guys will sleep on the floor. This is the true KS. Keshe goes on talking about real KS and those who are not. We do not respond to these allegation of slavery. **(:34)** Another process with all this knowledge is about what to expect and not to expect. We push the limit of science at this moment. I try to explain the Plasma interaction in a very simple way for the KS. Left two eggs on the table in the lab last week, because I knew that the discussion about the interaction of Plasma comes up. If you want to understand the difference btw a Matter and a Plasma just get an egg, the egg in your hand is a matter, break the two eggs in the table, next to each other, now you are going to see the interaction of Plasmas, there is no physical boundering, but there is a interaction of the matter btw the different parts of the Plasma. The Plasma of the yolk, and the Plasma of the white that has a Plasma of the water, it is the same. And if you break different eggs next to each other you see that they all open up and create nearly the same shape structure, they are not all oval. The boundaries shapes are different in one direction, depending where the line of the connection. The white part of the yolk is actually where the fetus starts, that creates like a pull, and you find the pull of that material does not allow the total strength of shape of the Plasma of the egg, as it is inside the matter. This is the easiest way to explain and understand the interaction btw the matter and the Plasma. This egg is a matter, once you break it you have freed it for Plasmas to interact, if you put two eggs next to each other which is broken then you the two Plasmas interacting. This is one of the reasons I did this experiment with the KS. I explained to Elyia last time, what the purpose of the KF is and why we are releasing the knowledge. **(:37)** Keshe talk about a guy who wants to use the tech to predict EQ on Earth. Mr. Keshe talked about him in the last WS. If you put a numbers of Magnets around yourselves in your home you will understand every plasmatic Magnetic field has a Gravitational field and a Mag field which is a repulsion. And if you are in a dynamic condition, if you move the Magnets on the table you find out you interact the magnets btw each other. The reality is that the Earth and the Solar System have a twin sister, the twin sister every time has come closer to Earth has created a (??) in this planet. Every time you bring the two fields together like with the egg on the table they will come to the point where they will interact and they mix, so the point has come as we see outside the Solar System that the Twin Sister is about to approach in the coming time, but the whole structure of the SS is in one of the arms of the Galaxy, and the Stars are created in the outer boundaries of the Galaxy and they get pull to the central Mag field of the Galaxy. Galaxy pull them in as Earth is getting pull towards the center of the Sun and this interaction btw the Earth and its twin Star is invertible. **(:40)** People who have access of this knowledge outside this planet will see this coming up. The process of teaching in so many ways is offering man no house bond. If they ask why we teach this, what they call the day of judgment on this Earth and this SS with the interaction of the natural processes of the mag fields will bring this into action in the time coming, so what is gonna be the evidence of these 2 SS and mixture, what is gonna happen with the humanity? You have no option. The tech is there to give at hand, by in a correct way. As you go empty your village because of a tsunami we are here to empty the village of Earth. As two Magnetis come together the twinity system and this Earth and its twin Star will come together. On Earth there's been a habit of man to fight and create wars and if this comes to Space creates havoc, even jealousy, superiority in the Universe condition, we are going to run in a lot of problems in a large scale. **It is time to teach the man before we take out. You choose on your terms and we put the**

conditions! You have to decide, and the decision is not physical, it goes to the understanding of the Universal level. What you talk does not count, what your Soul acts is what count! And this is the same for people that do not know what we have been set, and they will be judged in their own level. **Your Soul decide on how as a physical body will behave. We know the time of interaction of the two SS, we have enough time to organize what we usually do, this is not the first time, this is very much like a SOS team. When these things happen we take position to do the correct things. If you want to know more and how, you have to teach yourselves how to behave.** This is part of the whole teaching, Physically and Spiritually. So the next step is to set a system that can accommodate man to survive in the Universe, you have to learn how to do it in a way that man understand. The problem is to teach a number of people who understand and leave the Ethos of the Foundation for the Universal Ethos. Now on we go in more depths to understand the Ethics and the Physical conditions. Because without one you can not do the other. **(:47)** Process of Creation on this Planet: you created the Proteins, and then the Proteins have its own MaGrav fields and the change in their strength of position of the strength leads to the creation of life. If you look in the whole structure of life in this planet is exactly the same. The origin of the Creation comes from the same quant???. There has always been the story of chicken and egg, which one came first. The first came the two or three Plasmas, when 3 Plasmas come together from dif strengths the one which is in the middle create the quant??? Of difference, and how his MaGrav fields position and adapt themselves leads to creation of entity. This goes back to the beginning f this talk today, the MaGrav field from the Sun in interaction with the MaGrav of the Earth and the curtain of the field leads to creation of N. Now you have a Plasma which sits btw the 2 Plasmas of different strengths and create like a tornado, so the vortex (a spherical vortex)… so the interaction btw these 2 curtains, one on the lower side and the other on the higher side leads to creation of matter. And these matters as they position themselves, they can organize themselves it leads to organized materials. And in the case of Earth because we have H, N, O and C these four form a Plasma individually. Once the protein is created in being in different conditions has lead to production of material, and these materials has lead to creation of what you call life. And this life have a control system that it goes in the Emotional and the Physical system, what I call the leech. Leech needs to store food, needs to disposal of food, need to keep circulation of food what you call the Kidney, the heart and the rest. So the process is a natural process, and life has never been introduced from outside to this planet. It is a little bit hard to understand. Come back to the egg example: in one egg, how does the egg becomes a chicken? At the pleasure of see new life here in the Foundation we put ten eggs and in some weeks they had a chicken. I was explaining how life of the chicken starts, you have a cock and you have the female that has the egg, when the MaGrav field of the sperm of the cock sits btw the two MaGrav fields of the yolk and the white it create that vortex, and that condition. Then that vortex creates new condition of matters which is embedded in the fields, like in Johns reactor, if you put CO2 on it you get CO2 in the environment of the curtain. Embedded in these sperms and the yolk is MaGrav field of the DNA of the chicken, its actually a Plasmatic Gravitational field strength of this cock in different formation. So what it does, the Plasma of the yolk and the Plasma of the white, with the creation of the new environment of the change, there is a difference in the gap, because now there is a gap btw the white and the yolk with the sperm of the cock leads to rotation

and new environmental condition of the vortex, or what you call Mag field motion, then this material changes the Plasma of the white and the yolk into Plasmatic MaGrav field of the DNA of the chicken and then you get the beginning of the life as the Plasma change into matter, then becomes an egg and then becomes a chicken. Now in a simple process you understand how life starts, why you have a man and a woman to create life. I was explaining this to Armen that if you understand this you are a woman in the name of Armen and you have the capability of changing slightly one Grav field of one egg in a specific condition which is possible for a woman to fertilize another egg of herself and lead to creation of man. So in so many ways Virgin birth is a reality, if you understand the real process of creation. This touches a lot of people and (??) in position of (??) bless his Soul Christ. This is the reality of Physicality in life. Was there a woman, was there a man, was a chicken or an egg? Now you understand the Physical structure, now you understand the principal process. In how we split a male or a female this comes out of splitting responsibility and sharing the burden of life. When you are two you can do more, you can support life more. So, in so many ways we understand why the human race has split in two sexes on the race of this planet. And this allows the process of selection much easier. This is what has been decided over years in this planet. **(:54)** So, in a simple way, by understand the structure of creation of the reactors you can lead in so many ways to creation of life. Now make sense to a lot of you why I keep saying when you turn your reactor on, pray for it, because the interaction of the Plasma in different condition, it can lead and does lead to creation of life. Is understanding the structure of the Soul. This been in so many ways a better look, an overall look on what we do, how life is, and the purpose of why we are here and what we are doing. Now you walk away from matter, walk away to direction of Plasma then you will see and understand. Man in time will become refuges in Space, as I became refuge in Belgium, but in large scale. You find a new home. There is a lot of questions in the background that have been for years. Soon we will be aliens to others as we lose home. The same thing has happened in the past, and those who have found home here who are not necessarily visible to our eyes, because we have chosen matter direction instead of field direction. So, are there people among us who are not originated through the MaGrav field differences as I explained with the egg? Yes there are! Are they part of physicality as we see, and some beyond us? Yes, because they do not have the field strength for us to observe. Are they here to damage? No, because they would have been done millions of years, man is too weak. Are they here to support? Yes, in so many ways yes, but in another hand they are aware of in a way they have to move home. That is why we see more and more activity in Space over Earth. People are moving, because is imminent. It is not something we can change, we can't change something in the Galaxy that it will come. Earth has been created in the outer boundaries, the same as Saturn and in time it will take the position of Earth. So Earth is moving to the inner cores of the central environment of the Galaxy and the fields forces in this area forces and pushes the two stars to come together to become one, to guarantee their existence. So this is part of the process of the natural process of life, natural process of life in the Universe. If you look and understand it better most of you have the idea that when the neutron splits it becomes an electron and a proton, now look what happens: electrons and protons both are MaGrav fields, protons are steadier and the electron the mass of Plasma is much stronger. Time will come that these 2 will come to the position of push or as a Plasma condition that the electron due to loss of his MaGrav field will

become weaker enough that will join back to Plasma, so you get a new neutron created again out of the same split but in a weaker state. This state will carry on till the point of this neutron radiates enough energy out that it will split again in a electron and a proton in different mass scale. This is in a way one of the reasons that you see different radiations effect from different neutrons in different positions. Some of these neutrons are created from the neutron attraction, or by electron being going back into. As I say ITER atomic fusion is a natural process. In the papers that explain about the black hole we explain the same interaction about the two SS. **(1:00)** What I have been talking about this morning is more or less what I have been teaching in the last week in the lab. So we are sharing the knowledge, there is no paper about it, the knowledge is passed and understood in that way. If I was going to write this it would take 10 years to write this simple way, in ten minutes you understand the whole process of creation and the reasons for changes to come. **(1:01)** The whole process of teaching from the Gans is becoming more and more apparent. The whole purpose of this teaching is to enlighten, not to divide. But unfortunately some people who come to the Foundation get the wrong intentions, they find out soon that they keep themselves out of the Foundation, this is been happening for years. This happened with the authorities in Belgium, we have no problem with this, in so many ways if for example the religious accept the (??) it becomes the end of their (??). Which holy book has written the condition of the coming of the Messiah? And who has to decide? The people who have to decide, if they decide it is they are finished with their jobs. Is too much power. We are in the physical term and conditions which are here, but in another hand we have the strength to carry (??) we know the atom and to be<unclear>. So if you think that the religious leaders will run (??)? No because by accepting this they will have to finish their own job. In school when the teacher comes back to work, the support teacher has no job, because the original teacher is there. We are in the same position. **(1:04)** In so many aspects we do our job as our job to inform and deliver, but in another hand we know the proposition. And we know exactly what the outcome will be. So in reality we go to Vatican and deliver our papers, but we do not expect that the Pope will jump and say yes, the Messiah is here. Because by jumping like this he has no job, his job was to prepare for when the messiah would come. There is something happening that is very interesting, we went to Vatican and before we went in it was Sun and when we came out it started again. The same process happened here again last week when Guru Mahan was here when we started after lunch, the whole system started, and it rained and storm. Then we agreed in what condition humanity is and we go from together as a religious leader the rain stopped. Then we went down and we see, during the time of discussion there was a lot of washing and now stopped, when we agreed. So this is the physicality putting some conditions, but it happened accidentally, we do not know. Accordingly to Italians this is very unusual. So the process is understood, but it has to be understood in its totality, none of the religious leaders will run to Keshe Foundation, because by running here they put an end to their own structure. But in other hand we don't ask them to end, because they have all the facilities and access to humanity to convey a message in message. For us is very hard but the temples and church already have the followers, is to unite to advance the humanity to the next step, and be ready to depart from this planet. But as I said when we go to another planet there is no mosques and no churches. We are here to support not to destroy, and in time people will understand. This goes to the religious leader to take heed then they have

to follow. Once they lose their respect it will be very hard to gain this respect back. It's a decision making to serve humanity, not to serve oneself. I think I said enough for today. There is a lot to understand. Life start even when you mix Gans together, because there is life and they have to interact. We sit here in the lab, the CuO2 is changing to white becoming like the structure of the Brain, because fields on the top have different interactions with the fields from the bottom of this spherical shape and then the difference in Plasmatic MaGrav field btw layers, in interaction with the water which is here and the atmosphere of this room leads to the creation of the protein, because that Cu change to nerves protein. I will explain this in the future. They move the things where they should not move, but this move is important, is like the heart beat of the mother, if it was not the heart beat of the mother, as I explained earlier, the heart beat of the mother is the essence of the creation, a fetus when they come together with the sperm of the man and the womb where egg can fertilize<unclear> this egg creates a tornado, but at the same time, if you gave it a motion direction very much like the heart beat of the mother, which is needed, then you see the (??) of the Brain and the position of every thing accordingly inner MaGrav field. One of the Plasmas of creation sits in the core of the Brain, and then you have a second Plasma condition which is the physical body, and the you have a third one which is the rip, the place where animals hold their eggs, they all have the environment where they can fertilize, it's the structure of the bone. Very much like the reactors that we produce, in so many ways the position of the Brain and the position of the Womb have a lot to do with each other, this is part of the reality, this is in the reactors we set up in the lab, every position, every MaGrav field strength has a reason, so the heart beat of the mother creates the turning(??) and way for example a chicken grows the eggs around every few days underneath her, in the incubators where they do chicken they move them continuously, that movement partially dictates because the Brain and other works has to be set. If you leave one egg in the position continuously you will find mal functioning in the product at the end, so the MaGrav field of the heart of the mother has direct effect on the Brain and body structure of the child, then you understand the importance of this.
(1:13) Question: Since the matter is the weaker Plasma and the anti-matter is the strongest Plasma… <question confused> Keshe: We don't call anti-matter, we call principal transition. There is no anti, there is a reduction in the strength. I said anti-matter on the Book 1 because we had to open the knowledge to start with, but if you go further in the book number 2 or 3 we explain that there is no anti-matter, no black holes or dark matters is one Plasma which opens up and its from a different strength form its origin and manifestation, is the principal matter, the manifestation is the matter state and btw the two there is the transition matter. So, Plasma starts in a certain point in a certain strengths in package as it releases its fields 3 dimensionally till it appears in the eye of the beholder. What is matter to you is not matter to somebody else. So from the point of origin to the point of manifestation its called transitional. We don't call anything Anti-matter. The principal Plasma in fact is one Plasma, as it radiates out. This up and down quarks is no sense, if this was reality so Earth should be up quark and Saturn should be down quark, and we have a lot of quarks in the Plasma of the SS. The Principal or the Center, or what you call black hole is the Sun, and as it radiates its fields, according to where these fields come to become, it become matter or Gans state of the matter, then they manifest themselves and they appear. So there is no difference btw the Plasma of the SS and the Plasma of the electron or a proton. You have the Principal which is a Star, you

have the gap btw the Star and the Earth which is the transition fields, and the when it become matter becomes Earth and it is a matter strength, so there is no anti-matter or dark matter, is Plasma. But in a way in the first book we come with the whole idea from the beginning this way, because that would create a lot of problem with the world of Physics. As we open the knowledge we have to get a foot in, now we open the knowledge because now you understand this differently. I saw something popping up in the Skype and it said something to do with Plasma, what in atom Plasma and a molecule Plasma, and I wrote a few lines, and there were some comments in this morning because it came back to me. **(1:19)** A Plasma of a molecule is no different then a Plasma of an atom, but with more mass, and the Grav field of the matter of the Plasma on it's surface is equal to what you call the matter strength. But is not converted to matter, stays in a Gans state. What this means, Gans is a Plasma carries a MaGrav field strength on its surface, at the point of interaction of let's say CuO2, you don't have MaGrav Plasma of Cu and O separately inside each other, if you get a Cu on its own, in a Gans state, you find out that its MaGrav field strength on its point of manifestation is different of the CuO2. Because is the field strength which appears, that was what I explained earlier, we make a condition, curtains or boxes where MaGrav field in that box is equal to Cu or Gold or whatever you like. Because when the fields come and you can blocked and only can connect it with another strength then you create the Gans and then you can easily put back into matter, so its transportation of a total mass, is easier then the transportation little by little. If you can make a container for the Plasmas in your lab, you have one Plasma, there is not pieces of Plasmas in the reactor, in the container, you take the amount you need accordingly with what you need. In the lab originally we had a 4 cm gap as measurement with a 6 mm tube, now that we have 13 cores on the floor we have 8 cores plus 5 inner cores, so we feed 52 cm of H in one (??), into the system. We don't choose who takes and how they react. The systems will what they need to convert to reach a condition, yesterday we saw the same, once we set up the Star System, do not hardly created any visible data, but we see the other one continuously changing, and after now we can see a pattern, suddenly the second system pinches all the fluxes from the first one and the total amount goes up, without any access on (??) its being changed. So the Plasma works in its totality not in parts of it, so quarks and anti-matter is a non sense in the Plasma world of science. Is what you need to produce, as I said earlier, the quark in the Plasma of the Sun is Earth and the down quark must be cosmic dust or so. This has been imaginary jobs which people who do not understand, but in a way is good because explains the Physics at the time in that level of understanding. We don't have the anti-matter, what is the anti-matter, is an opposite matter, nothing goes opposite, the fluxes flow in the SS is what goes up, when becomes matter or Gans the it has a MaGrav field as a package that can interact with the package of the Sun and be attracted back into it. So how did the quarks been made, or up and down quarks? Its by the fields which get to a point that then you get attracted back to the center, this is what came up with theories of the black hole that eats everything up. The things they think they see in the Plasma, they call it up and down quarks these are literally in bigger scale the fields which have converted to matter state or near matter state as a Gans state of the Plasma of the proton and it manifest itself slightly different entity. There is no anti-matter. **(1:24)** We had to speak the language of the Science when we wrote the first book that we could explain this further on, and this was the purpose. Keshe says that Kyrk is working hours to make this

knowledge understandable. We have to put a Physical structure to it, that it could explain all the understanding, and if you look at the Book #3 we show the real the Plasma, the real shape of a proton. Then you opens up in 3D spherically, then if you understand the way the fields come out, then the interaction of the fields is not continuously the same, is very much like tectonic plates, their fields find friction point, when they can cross that friction point then they move on and they create another friction point. This is the noise of the heart beat of the Earth created, this how the heart beat of the Sun is created, it is interaction friction and they go, but this is because it is homogenous at the level of the Sun, it is a rhythm, is a continuous rhythm, the same. In fact the noise is the interaction of the fields which they rub against each other and they get to a point where their friction passes a point that moves on and like the light that is one of its products, the noise is another product. So this is what you call the heart beat of the Sun, or the heart beat of the Earth, is due to interaction of the fields and when they move against each other which one is a matter and which one is an anti-matter? They are both fields which their interaction leads to the noise and to the light, and the manifestation of the matter in the outer boundaries of their fields. **(1:28)** Lucian asks why the fat created in his container that disappears when he put in another container. Keshe: It does not disappear, you move from the environment which created it. If you have a number of cups next to each other all the cups in the structure doesn't stay constant, as the field in each container changes, change the other next to it. In changing the environment, if you look the textureof it, sometimes you have a fat sometimes low fat, so what you do, you move a Gans which is MaGrav field based entity into the environment which is not to keep his balance. So returns back to its gas state, by absorbing the energies and the fields from the environment of what you put it. If take the fat from the top, and don't put in a dry plate, if you can keep in another salt moisture which comes from the original one you should be able to maintain it. You have to go back to what we always say, its changing the condition, when you change the environment you change the condition, so you have a new material. **(1:30)** Lucian asks further, that if he spending time and effort to create the protein you don't need to keep in a water salt environment, I want to extract it and put in a closed container or do something with it, because if we are forced to keep it like water state, that means that the practicality of it is almost zero. Keshe interrupts: No, no, no… stop. I think you missed a big point, maybe I can explain it in a different way. Can you explain to me why the protein of the man is in 8% of the water within the body of the human body? You have to keep the same condition you have to keep liquid in it, we have the same discussion with John yesterday, we can not put the Gans of the CO2 on its own without water, so it will sticks to the wall, you like to do things which is beyond the limitation of physics. The Gans if you want to hold it you have to know how to hold it. <audio break>… if you carry the protein you have to create its condition. You can not just move it because you want to move it. The protein in the bdy of the man it is not just protein of its own, its 80% water which is the connection of it, protein can not exists on its own if you move it you give a different environment. You are in the Schizophrenic condition, the water is the essence to connect together the Gans with the protein. On this planet, water because of the MaGrav field of the O has this property of holding the Gans together. Now you moved you changed and it disappeared, because you did not put in the right container. **(1:33)** In Physics you say that the gas takes the shape of its container, now you put one molecule of H in a bottle you brake the bottle, that will take the space in

the room, where you are. You brake the house, it take the size of the whole Earth atmosphere if there was not other MaGrav field condition to hold in that condition. Everything has a container, the reason to stay in that container, you cant take the protein which is developed in the liquid of the water which you add the salt to it and you say why does not exist, because you changed the condition, for it to exist, for human body to exist in this condition of Earth MaGrav field you need the medium of the water, and the reason for it is the O MaGrav field properties, when you put the water in that and the salt it can hold it. If you have different sets like we have in the lab and you take proteins from different containers, put that together, this is what I call the truth about the creation of life. You will start see if you can hold in the container the condition of the salt and the water in the container the beginning of a new life. You become the Creator. Because now you have put the egg and the sperm together, put you need this essential part to keep the protein in the matter condition in Gans, to have water, to have H2 on it. Because the O bound is needed. When you put in a plastic jar you have CH bonds and you can not hold, if you can make a container of O you find that you can hold. This is the essential part of life in this planet, and the way it has been structured. You can not just move the protein, it is not a stone, it is a living thing which receives energy and that energy needs to be dynamic, and that dynamic condition is created by the water, that is how life exist on this planet. Try to understand the totality and not go half way, this is a schizophrenic, your container is a matter and the protein is the Gans state, and the matter because is in this condition it can not give, so the Plasma of the AA that the fat absorbs. What it need to come back to gas? You see some stains has left behind, but this is because of the process of the structure. **(1:37)** Go back to the picture that John posted, with the rings, then you should be able to understand why. The top layer of the nano material can not be once becomes the top layer to be positioned at the bottom (??), because accepts certain conditions of MaGrav fields to be in that (??). This is the process of the change. The inner skin can stand the transition of MaGrav fields of the Gans, the inner skin can satnd the matter, and your outer skin is your matter level MaGrav field. That is why you have layers, if you had your Gans in your outer skin you would not exist, this is why in the life of a man, when that state appears, the water disappears then the flesh body of the man disappears, and if you mummify and be able to hold that top layer most your 3 layers, you find that you can keep them. This is how the preservation is done, when you find one of these big mammals in the North pole and it was the same shape, because the water and ice have the same characteristic, is made of H with O which balances it, so the body stays that way. That is why we put thing in freezing condition to conserve it state. Frozen condition became very near the Gans state of the matter holding, but it is not there yet. **(1:39)** You can’t change the environment and say why not. You must understand how the material exists in its original environment. If I take a lion from the Saara desert and say why doesn’t live, it is in his environment. Any protein needs you put the environment space in the water, it doesn’t matter how it is shaped or formed because the O bounds somewhere, then O bound allows liquidity and flow. Have I answered your question or you still are lost? He understood what Mr. Keshe said, but triggered another question about how the oil and other things can exist without the environment. Keshe: You don’t see a dynamic sugar, is C-H bound, still exists, if you look at the chain that is operating in in the environment of MaGrav field strength. That is why when you burn something you need O, there is no burn if you don’t have O, the burning process the disposal of energy

comes through O, it is no other way you can do it. You can have as much C-H bound as you like, even in the body of man, the conversion of sugar needs needs that water which is O carrier in the body. You can't run away from it. It just because you do not have a C-H you can not do anything, and in the combustion you go, look at the total composition of the fields, without even you pressurizing it. When you burn you have no O you have no fire. So the bondage is O to disperse the energy. In your system when you put a plastic or whatever that dynamism doesn't exist. Put it in the vacuum condition of the ceramic then you will understand more. **(1:43)** Question about how the MaGrav field release the energy to produce a power in the reactors. Keshe: In the generators you only create Plasma that only creates DC current, you don't produce an AC current. To produce energy you have to interfere with the fields which are around in the environment of the Plasma, and in two different points of it. So whatever you get in the dynamic spherical field it is totally on DC bases, you want to change to AC use different things. If you want to create a dynamic Plasma in your reactor and you can take the potential difference from the two and the current flow from the center then you create a DC power. The power generators which are in the process of being done by the Italians for the Foundation now, they have decided to put the reactor in a transparent tube. So in fact you will see your reactor how it operates, and see all the mechanism inside the transparent tube. This design they called Star 1, with a Star in the center. So a lot of people can see through actually the operation of the reactor and the set up of it. And you see (??) in two different points, which means that inner core and outer core connects the system when you tap energy out of it. This week we had a condition in the Iranian reactor. **(1:47)** If the Plasma moves in a different direction or rotation we get a potential difference in the Plasma MaGrav field strength, and a current flow btw 2 positions which because we have 2 cores, that allows the Iranian reactor to run. So you are not looking in the cutting of the field, you are looking the position difference in the Plasma, as it goes through the transition time, you take one transition point, you take near enough the principal and you take matter position then this is your voltage. But this is in Plasma condition. You have to look for position, not to field (??) as it is normal with the AC. There is a misunderstanding about the position of the electron and a proton, the assumption is that the energy absorbed by the electron will change its position, if you look at the size of an electron and a proton, proton is a huge thing and all the energy which comes to even from the electric current, you see the motion the vibration of the electron, this is dictated by the proton, not by the electron itself. Because most of the energy which comes, is absorbed by the proton, and in changing its fields strength it pushes or absorbs or attracts the electron back to itself and creates its position, even though electron has his own MaGrav field, but is minute, it absorbs all the energy which is coming is partially correct but most of the energy goes to proton. It's the proton which dictates the position and the vibration of the electron. So by another hand most of the electrons are of the same MaGrav field strength so you create a loop btw them. And the vibration is automatic across the one when it fields are released and absorbed. So this is another misconception in the world of electronics. Electron vibration which you call electrical current comes from the expansion of the change in the Plasma of the proton mainly, then from the electron itself. You look for a gap btw the two (electron and the proton). What energy you want to absorb or you look to the Plasma of your reactor itself. And you choose the position where you want to have, what power and energy you need. You don't have this huge differences, because of

the reactors (??), is the negative or order of magnitude in respect to the center of the Plasma which use the strength of the field in the point, as you go further to the center the MaGrav field is stronger so the magnitude goes higher. The power order by magnitude is not multiplied. So for example if you take the surface of the proton and you go down by one cm you get tenth to the power of the same one. If you go another further 1 cm the order of magnitude now is ten with the power of thousand, and if you go 1 more cm you go to the power of nine. It is not done by multiplication, so if you choose position in the reactor, that you understand the properties in that point and the field flow from that point to another point, you get the Plasmatic current and the Plasmatic voltage. We still measure in matter state because our systems are still in matter state. **(1:53)** Keshe goes out and give the microphone for the KS. Marko assume. It is very difficult to say something after this two hour of explanation of Mr. Keshe. He thanks Mr. Keshe, and start to talk about the reactors and the attempt to try to understand the new terminology, as the change from anti-matter to principal matter. Marko talk about what Mr. Keshe said about become refugees in Space. **(1:59)** Marko talk about the reactors and the formation btw them. **(2:04)** Armen assume. Armen explains that matter is the container of MaGrav fields. We blanked ourselves so much that we don't feel how these MaGrav field become matter. The Gans is in another state of matter, but they are in MaGrav fields. You have to release yourself from the matter state, matter when it is open up, you open up the fields. They say that people are searching for industrial solution for Gans, and this does not work like this. Armen say that it is all about fields. **(2:17)** John assume. John talk about the next step that is measure the MaGrav fields of the elements of the periodic table. **(2:23) Keshe comes in.** As the MaGrav field goes by what we call mass, what does thi means? When you put four more H into atom of C which will make CH4, now each Plasma of a H add its principal matter strength mass into the center mass of the C, so the center mass becomes bigger, now you have a bigger ceneter mass, now the expansion, the size of the Plasma expands to a new level. So if for example the center mass, the manifestation of H is 40 mm, now that you add 4 H and each have let's say the diameter mass of one, now the manifestation of the mass is at 44 mm not at 40, by adding the mass you extend the boundary at that level, then the Plasma interacts with another Plasma. You don't put a Plasma f a H inside the Plasma of a C, you add into the center mass, in the center volume. Now in that level when you come to another CH4 that what manifest itself as a CH4, when you add an O or another element, then as a Gans all that move in to the fraction increasing in the size of the envelope. It is not in the matter state that they link up and the electron bound. You increase the center mass but the center mass in a given environment has a given size. So you always take the volume from a CH4 to a CH3, because in the environment has to allow it and if it allows it happen. In the whole matter state the temperature and the pressure which themselves are MaGrav fields dependent but in a matter level you interacts btw matter fields strength when you do with a Plasma you interact as a Plasma level strength, it is a big big difference. Temperature and pressure are all MaGrav field based, it is not something extra, but it's the pressure of the MaGrav field in a given MaGrav field strength. So you can have a temperature at the principal matter and the pressure at the principal matter and any position in the transition, but what it happens in a given strength then it becomes a pressure or a temperature, so you add volumes or mass of. If you read the book in respect to the definition of mass, is in one of the books that I explained, you have Gravity which is a pulling, and you have Magnet

which is the repulsion. Gravity always sits in the center, Magnetic goes out, the difference btw the two strength is due to the mass. **(2:28)** When you have Gravity is internal interaction, absorption, going from one field to another from the same strength. When you put 2 Magnetic fields together you have 2 forces not one force, this is the 2, repulsion on a back end when the field comes in. And then at the same time in a Plasma condition you have 2 exit points which face each other too, some of the fields interact to create the Gravity, some of the fields still stay back to back opposite and then to your exit. The exit or what you call the North pole goes up to the North pole of the Plasma. The entries which are weaker creates the South pole and that difference creates the flow of the MaGrav field through the center of the Plasma. This is something that the Physicians don't understand. The Gravitational field in the center the similar (??) of the Plasma in the field do not create the field flow of the Plasma. The field flow is created by the similar poles being enters and exits. If they are entries they go to the South pole and if they are exit they go to the North pole. And this is why even when you look at the Plasma of the Earth you have a different rotation of the fields in the Southern hemisphere and the Northern hemisphere. Is primarily due to the exit poles, if it is an entry or exit pole and it always go to the same direction, that is why you got the Equator line, but you still keep the same atmosphere, because in the point of separation the Plasmatical MaGrav fields go in the direction, because they are weaker. If you 2 exit poles facing each other the (??) are stronger, and if you have two entry points they are always weaker, so that gives the dynamism and the motion and rotation of the Plasma. Now you put this together, you add another Plasma into it the dynamism btw the North and the South section attracts the Principal mass of that element to the center to become part of the gravitational, but at the same time you created a new layer in respect to its environment. In the future when the scientists can measure the Plasmas they will report you, the measurement according to the same atmosphere, you say such and such Tesla atmosphere condition the diameter of the Plasma of CO2 is this, is a mass ratio, and that mass ratio create a different size of the envelope. In the matter state then you change into the fields of the friction. What you call the pressures of it all the interactions will call the heat of it. **(2:32)** When you are traveling from one point of the principal matter to the point to be manifested the field forces still exert. But it is a field, only in the matter strength, if the environmental field is equal to the Plasma then you manifest yourself, this is how you become cosmic dust and the rest. Because don't forget that this turbulence creates a lot of different fields all over the place, is very much like a hurricane, every thing goes in, and what comes out is the balance of the fields. **(2:33)** John assume once again. **(2:35) Keshe comes in** again. In most of the reactors you run you have only one reactor, you don't see interactions, you observe what is different from the second before. In the Foundation we observe interactions. The new set up where we put the SF, up to now we had 2 sensors that were attached one to the central core and the other to the bounder core. They are measuring the environmental Plasmatic Magnetic field. What this means is that they are not attached to any core they are standing free, one is facing one core setting which is the half core and the other is facing the full spheres. And in running of the reactors we see that one set is building Plasma and then the other set just grabs it, adding to its strength. But we don't see reduction in the field of the one which has lost this pick. One system is creating Plasma MaGrav fields available and the other one takes it without disturbance the balance. We observed this only in the environmental section, is not that we are observing

one core, we are observing the total environment around the 2 cores. And the way the detectors are set we observe what is coming into the environment of the Plasma too from the lab environment, and we follow that if is addition or loss or if it is increase. You see that the Plasmas share fields without loosing any of theirs to the next atom or the next Plasma entity, by allowing it to take without damaging their own. This is very fundamental. Not just because you give you gonna lose, when don't see drop in the field we see a gain increase further on. At the same time what we have noticed yesterday, when we put the motors on we don't see an increase, we don't see a change in the detectors. When the KS walked among the fields and the cores we don't see any reduction. So these fields at these levels do not interfere with the body of the man or body of the man MaGrav field does not interact with the field that much that is not noticeable. This explains why we move in the environment without the exchange and this will be the same in the SS. **(2:39)** The increase activities around the Earth atmosphere is to fold, partially to move out and partially to move those whom is not visible to man and they don't have that ability to move. The atmosphere of the Earth will be bright, and this is not just because of the MaGrav field of the Star system, but for those who will be prepared to give hand in the time of need. But there is a selection point, and that selection point is decided by the Soul of the man not by the Physicality. You find out that most of the presidents will be left behind. This is a normal affair, maybe drastic for man, but normal affair. **(2:40)** Question about if this Plasma of the twin sister will not interact and create light. Keshe: Will be too fast when it is done. Don't forget that the Plasma of the SS is very thin, is more or less a shell of an egg of thickness. The process is very rapid. Its very simple, if you put 2 magnets together when they come to a point of full interaction you don't see when the other magnet moves. They are just together, the only time you receive this you hear the noise of the click. This is a normal process and this has been repeated, like you have the emergency services when you have an accident there is a pattern to this on the Universe. Then those who understand the day of judgment, they know what the judgment is. Those who brought the Noah's boat story to the man were the passengers of the Noah Boat, if you understand what it means. This is the process. **(2:42)** Question about how regular is this phenomena in the Universe. Keshe: This is regular. It is just changing positions. Question of how often the sentient beings are helped by other Universal beings. Keshe: It is often, very often, like when you have fire in the house. This is a normal process, at the same time when there is a need to save then the job is done. There is no difference btw the humanity and the rest of the creation in the Universe. Nations are left alone to their one. When there is a tsunami man goes to a boat and plane and get there to help. Now the position is the same. It is not just because its us it is any different its just that the man did not have the intelligence to understand what is going on. We see a pattern and we know that this is about to happen. By the same time man has enough time to develop by accident life came to be intelligent on this planet and now there is an intelligence that needs to act. By the same time, just because we take you from the village we don't want to produce another village condition in the Space with all the problems with it. We have seen what happen, we've seen this on Earth two or three times in the past. The state of Israel, the Jewish community got very interested and anxious that they found a new thrive in Africa. They went and they brought all of them back to Israel. As we know the black Israel Jews just because to save the tribe, so we are doing the same thing. But for people who came from villages in Africa living a village life, now they are

in Israel, they have to learn the life of the society. It is no difference. They have to learn rules. In the desert you don't have a car; you don't have the conditions which were there. Now they have to learn about this. The human have the same intellect, so this is the same situation, it doesn't change, is just that humanity is too far behind in the village. But if you bring it in you have to teach them how to use the microwave before break the microwave. This is the process we try to get into. You are not concerned about what or how man worship, in what name and how he dress himself. To us every man is naked, we just look at the Soul of the man, not the physicality. When a Siamese boys is born with beautiful eyes, two legs and two arms carries the same Soul, this is what matters. We start teaching and we start to show you the process, but in time. The book one was in a language that the president could understand it ad we could expand on it, we do the same thing speaking originally the language of the man, and then in time we will develop and progress to what it is, and it is not unusual. The scientists who are looking for a replica of a planet like Earth, as I always said, look at the fringes of a Galaxy, if you look for a physical life as man is used to. In this position the Plasmas of the stars have enough room to create planets, and the planets have enough room to find a position where creation and absorption and reduction of the gases to Gans and to life can sustain. And as the MaGrav field pull off the galaxy, pull the planets or star in then it comes the point of interaction. Not necessarily sometimes with the twin star but with other stars which are in the same gap space moving in. Its like you can from a motorway and anther comes from another motorway. But it is not family, but it is another C?? that is moved to get into the same tunnel. This can be observed in Space, soon will see himself, so we are there to try to educate. We don't want to have African tribe with camels and goats to come to the city and not knowing the microwave, we teach the microwave first before take you out of the village into the city. There is no panic, it is just the process that man unknowingly will be taught. We are opening the book fully, those who can not handle to cook get out of the kitchen. **(2:49)** Question: Are we talking of tenth of years or thousands of years? Keshe: We are talking much less, if you see so much people with high intelligence above you flying around you don't move house to it necessary. You don't wait till the house gets (??). If you want to understand the process just go back to the cycles of disasters of the cosmic level in the Earth. You get a good indication of the date. What happened to the dinosaurs, count there. One of the interactions in that time the two stars were too far and they were in different position in the Galaxy, now the boat have moved closer to the center and at the same time there is less gaps because others are pushing is like an atoms. In last few second there are is orbits they became on star, because the pressure pushes, will pushes the electrons into the center. When I wrote ITER atomic fusion and people could not understand it is what we see in the SS when the planets just move into the center. A lot of papers are written in language of man but they are in essence in Universal conditions. Question about if there is no difference btw the SS ant the atom. Keshe: Yes, there is no difference. It is 9 electrons. Rick asks if we see Mercury jumping in to the Sun that would be a pretty good indicator that something… Keshe: No, no. If Mercury does that is because his MaGrav field has become weak compared to the MaGrav of the Sun, and in that state it moves in. All the planets moves in. Go back to the understanding of the structure of the Plasma, 90% more or less of the field sits in the center, we are just a speck of dust in the total lot, even though we think Earth is very big, but if you look at the total mass of the Solar System we are literally nothing. Even if we like to think we are

very big but what is 5% compared to 95%. And in that 5% we are 0000,5% of the totality of the mass of the matter state. So Earth is irrelevant. **(2:53)** Every thing moves in into the center, because then the 2 stars will become one, and then the condition will create a new cycle of existence in the more center core. This problem exists in 3 different dimensions, you got to interact and understands the 3 dimensions. You have an electron which can merge with his proton, then in the larger scale the MaGrav of the Earth dictates when that electron moves into the proton, because is in charge of its environment. Now the next step is the Sun MaGrav field dictates where the Earth and the other planetary systems are in respect to itself, independent of anything happening in the outside. But at the same time the MaGrav field of the Sun has a saying in the position of the electron, in respect to its proton, because it's a master, and then the center MaGrav field of the Galaxy has a say on the position of the Sun the Galaxy, position of the Earth with the Sun, and the position of the electron in a proton. But in totality all these electrons on Earth decides the speed of rotation, the position that makes them an electron are totality are dependent on the MaGrav field of the Black Hole that align in this Universe. So is not that we get pull, or we get absorbed by our Sun, but at the same time the whole thing in the Galaxy is moving to the center, and that pull is partially dictated by the Galaxy itself, but mainly totally dictated by the central line MaGrav field of the Center of the this Universe. It is a natural process. I tried to explain this with magnets on the table, if you take spherical magnets and you make clusters and you see how they move and follow each other. With magnets you teach the position and how this is going to happen, different Plasmas they can make and different conditions they can make, this is not that normal so everything is getting pull, partially pull because the star is coming the system is getting pulled to the center of the Galaxy, that brings some pressure in, but at the same time the galaxy itself is moving to find its position, it still moving itself to the center of the Galaxy and to the center of the Universe. Because what the Universe center line is, is radiating out is becoming matter f the boundaries of this Universe, this is why we can't see beyond it, it is the same we cant see the outer layers f this Universe, we call them a lot of names. They are trying t make this fusion with an atom and make this collusion, is the same process but it happens through the MaGrav field of the environment of the Galaxy now. The 2 Stars or the position in the way the Earth is getting moved and the SS is getting moved to the center of its Galaxy creates the condition, we have 2 choices, stop to going in or put you somewhere else. **Sometimes when I see the behavior of the man I think sometimes is better to let them go, but there are Souls here that they need to be moved.** We don't move just animal Souls like man which is an animal we move the Souls which is been developed, being a fish being whatever. Human thinks they deserve to be saved. But in the same process we try to teach how to produce food and everything that we can survive in another direction. We are trying to show you how to fish. **(2:59)** Keshe says that they will post the letters for the religious and world leaders.

18th Knowledge Seekers Workshop – July 10th 2014

- **Main topics of this Workshop**

    - **Running the Reactors Without the Motors, Creating the Condition of Universal Systems**
    - **Motion and Direction in the Universe is done by the Wish or the Need**
    - **World Leaders See the KS Lectures**
    - **Report from Japanese Government about Fukushima Decontamination**
    - **How the Atom Works**
    - **Nano Materials hold the Plasma**
    - **Reactors Working as the Human Body (Physiologically)**
    - **Planet Earth and Body as Incubator for the Soul**
    - **How much we Have to accept Brought up by Imagination/ Comparison with Crack Addicted with Physical Hallucination**
    - **The Future of the Planet**
    - **Starting to See Conversion of Plasma into Matter**
    - **The Power of Mr. Keshe**

(:02) Keshe comes in. Numbers of interesting news, some scientifically shocking if people understand what is going on behind that. We always run the KS upstairs in the lecture room, today is from the lab, usually we have the motors in the background of the motors of the reactors. In the Foundation we are setting up the SF with 8 reactors and testing the environment and the reactors. Some of these reactors have been running on SF for past 2 months more or less. We fix some failures in these reactors, nothing major. In this process we learned a lot, even with a reactor not rotating we did not saw any disturbance in the Plasma structure, we had another failure this week, we had to change a valve. We got to the point to inform the KS that you can run the reactors without the motors, which means that now that we are in the state that the Plasma is complete and is strong enough to hold itself in the 8 reactors. Yesterday we made the decision to switch off all the motors to create the condition of Universal systems. In the Universe we don't see motors to rotate the planet Earth or the Sun. Being in this position we could test and we don't need to monitor the motors, so the electric current connection which were giving us the pressure and the rotation and the speed and that kind of thing, the matter level was not needed anymore. So it took us a few minutes, we step by step shut down every motor and the motors are shut down and the Plasma is created, then we have a Plasma which is working on his own, exactly like the Stars. We have seen in the shutting down one by one, there has being no changes in the Plasma and we watched the Plasma with no motors, it was a very weird situation, we were watching and dreaming what is gonna happen, because there is no noise we are used to see motors running and now as you hear us there is no noises. We are running the Workshop in the lab live and strange enough we started seeing increasing Plasma figures in the environment, in X and Y directions of the total Plasma. We started we were at 2.75 and at the maximum heat with all gases in rotation yesterday prior to introduction of the Argon Layer for protection was 3.2 before introduction of the Argon in the setting. But when we started our systems without the motors we were at 2.76 and we started seeing the development of the Plasma.

So the Plasmas are running actively since last night. And this morning we have reached 3.442 which is more then we achieved with the Plasma on its own with all the layers without the Argon. But now we still see development, the Plasma is active, and even as we spoke this morning one of the parameters have increased again. **(:09)** Now we have reached the condition of the Universe. Which means we do not need motors or electric current to run the reactors; we monitor how far we can go. Now we gonna add some small amount of gases first to see if the introduction of the gases will change, maybe a low pressure H just for testing, and then we break into a new way of control and system setting. The condition we achieved now is where the reactors are in comfortable zone with each other. This is how nature is, this is how the Soul of the man works is you take only what you need, so what this means we might see a little bit of increases in different directions now that only Plasmas decide. So in the morning, after the WS the KS will introduce a small amount of gases to check and then we go to a dimension which is not know, but I told you some time ago, we did a test for KS where they sat in front of the core and they gave and we monitored all their feelings, and we monitored how much they could take. Now today after they reached what they wanted to reach, the reactors are happy to achieve their own balance we go into training the operators, what does this means? **(:11)** This means as I explained before, motors and engines are matter entity man made things. In the Universe motion and direction are done by the wish or by the need. Today Armen will sit in front of the control reactors, and we know which one is because is a master reactor and through his thoughts he has to control in giving the reactor to increase the numbers and that is unconditional. This has become the control system teaching in a way that if we can maintain and we do not lose any Plasma he can decide what he gives to the reactor to increase. In the reactors we monitor in all 3 directions what he receives and what he gives. So we enter into a very unknown territory and strange enough is that we should see very interesting results. So not only he can increase the level of the Plasma if he is correct in thought in one direction, he can dictate which reactor he likes to take energy from to give it to the center or to direct energy to, which means the direction of flow. So I recommend to him where to sit, so we can see the operation of the reactors and if it's gonna go in the direction. So if you see a specific line increase it means that he start to move the reactor in one direction, then for now on instead of running and adding energy levels we will try to increase the Plasma to the lift according to the thoughts of the total knowledge seekers are. All the KS has to do the same, if it is in my hand I know where this gonna go, but it is in there hand and they have to test it. So in fact we are testing for the first time in this planet the condition of the Universe in reaction btw 8 Plasmas, they are helping each other, we saw in the data. The Plasmas are active because we can see it graphically; it has his own heart beat. Which is a correct way to see the monitoring moving and then we go to the next step of how we can lift the material, how it can be done. If you look at the data we had never passed 3.9, this means that the systems has reached the condition and they are happy to be in. It doesn't matter how we feed them, they do not need it, now the need has to come from the man, I need to go there, so specially Armen has a connection with those reactors. So everyone of us that participated of this process are connected with these systems, now we see if through our work we can increase to 3.6 and 3.9 if such a thing is achievable. Then if we achieve this point we gather a KS group and try to control the reactors from the boardroom, this will be a major breakthrough and this can be done, I explained to the KS

this week. **(:16)** So before things be done I try to inform the KS, these things are available, will be done increasements that Armen doesn't get excited and go do it, so we keep some control on what we are doing. This is what we set up to do, we produced the Nano materials, the Gans materials, we put in the cores, we tested different things, and now we are going on the work of the Universe. John has take the video of it and is going to post soon, now we have reached the position of absorbing energy from the environment according to the need. This is containing Plasma, creating Plasma and now being able to transfer Plasma from one entity to another or giving to one source to another, you don't need to give it from your Soul. I will teach how to transfer Plasma from the reserve tank to the main tank. You can not control these things electronic computerized, present computer systems are electronics and is a physical vibration electrons and transfer of whatever electrical currents you want to put in to it. In this level we work on the Plasma level which is direct connection, and then we see we don't need a control system. The strangest thing is yesterday I went for a walk to more or less analyze what need to be done, but if you go back into the talks before, we achieved the first lift on the 28 of Shaban in the Arabic calendar in Iran at 5:30. This is recorded because I called that day Rick and his family. Strange enough about 5:30 last night on the 28 of Shaban again we achieved the same. Is not coincidental, just about the same time and day. We achieved the lift in Tehran and we achieved the holding of the Plasma, this is very significant. Same day about the same time, soon I will explain the significance of this day. **(:20)** We have started the development of much smaller cores with the Gans materials. Two of these are already on the floor of the lab. Up to now every reactor we have made have been fixed and set on the place. We up to now consider one direction, now that we expanded the knowledge, the new reactors, the small ones, are put on the wheels, which means that now we force the reactors to sit and interact, with this set up that probably will be ready next week is that we will tie 3 reactors at 120 degrees to each other, and we tie them up to the center core. And we start seen not just the MaGrav field through the monitors but if we can see the Magnetic push traction to push and attract away from each other. This will be fascinating, once we achieve this we came make a frame here where we can hang all the reactors from the frame that they can move freely, then we can see the operation of H. We can increase and change the amount of Plasma in each one and this gives the man the freedom for the first time to see the operation of the SS. If you make one reactor the Sun then you make the other ones the Earth and other planets. You create the MaGrav field inside each to that strength and then you see how they position themselves. Now form next week we move from one dimensional system into a 2 dimensional system. Now we have a new dimension in the world of science where we go to a level of understanding of interaction of Plasmas. This is the major change in the work of the Foundation **(:23)** What we are going to do is if we can, run all the workshops here live. We will put live stream and people around the world can monitor when we are asleep and vice-versa. The reactor became an International Collaboration, this is needed. All the KS lectures are listened by the world leaders, we see this by the reactions and we get the confirmation. Number of World leaders listen to this KS, they are learning from it, but the way the KS gave the knowledge so correctly in the past months has changed the behavior of government and nations in respect to a lot of things. In weeks ago we turned off the monitors because it is not good to people see what we are doing in a international level. **(:25)** The technology from what we developed and

tested with Yukako in Fukushima has been evaluated by Japanese government and by other 2 nuclear nations, and I received the a preliminary report this week, we have broken the rules of Physics. We are 100% correct, what we have seen in Fukushima, the reduction of Gamma ray and the process that Yukako tested is correct. Report is not classified, unless I get authorization. Keshe talk about the Fukushima decontamination and the conversations with Japanese Government. **(:30)** The cleaning and the decontamination of water that has been started in Europe is entering the commercial phase, which means now the people who did the evaluation in their lab are entering the production phase of these systems for their target. The first commercial units of cleaning up has already started the negotiations. The other important point is in regard about the 14th meeting of the Religious leaders as we did the same with the world ambassadors meeting in Nino. We do not disclose who attends and what has been done, the meeting will go ahead. At the end of the meeting some pre-negotiations started on how and what we are going to do. We have to teach the people the meaning of World Peace and the beneficial for them physically. Keshe talk about the meeting. **(:34)** The Foundation stays neutral and stays correct. Very soon some of the world leaders will not be in such comfortable position, their criminality has been recorded. **(:36)** I step by step try to explain the flaws in the Physics which brought to this position. We were discussing as a matter section about the formula of the constant pressure and the rest; about the number of atoms in a given space is equal, because nothing else has changed. I explained to him that this is the guys who have been theoretically. Hopefully we will make a video of this. Now we look at Plasmas. In the world of Physics they say that neutron is a neutral and that is it, they say proton is positive and electron is negative. Now that we have open the reality to the Physics, and we have magnets and we have reactors which can imitate the structure of the reality which is a MaGrav field each Plasma has, you come to see that, oh a H has a single proton and a single electron, the distance to the electron to the proton is dictated by the energy, when I speak energy I mean MaGrav field together, which create that distance. As I always say, the Plasma of the Earth creates a MaGrav field, the Plasma of the Sun creates a MaGrav field and when they are comfortable they create the distance to the Sun. The proton and a single electron has that effect. The neutron is the initial fundamental Plasma, now you put and take N. N has 7 electrons, 7 protons and 7 neutrons. This theoretical physics which says that the temperature and pressure is the same… This is very good if you got pinpoints and no effects, now we understand the physics in much more clear way, a neutron creates MaGrav fields. A proton creates MaGrav fields, and now you put 4 planetary system next to each other, they don't piled up in one corner, they create their own gaps, and then on top of it you have 2 electrons which sit in its boundaries in the S1 and then you have the S2 that you have the 5 electrons, they create their own. Now you see this formula goes to the window, who made this was very good theoretically, but now that you put a Plasma in the place of a number, you see you have a huge nucleus; this nucleus is not proton sitting next to a neutron, is the gap btw them, and how they are. So now you have one proton in a H and you have 14 elements near the same because neutrons is about the same as a proton with a little bit more energy which is the energy of electron in it. Now you have a sphere in your hand, and with a number of electrons of it you find out that the size is colossal by measurement. And then at the same time this atom is not own his own, there is other atoms in his environment, need that gap btw them, even though they are connected as

molecules, still have that gap distance btw them, so this formula of constant pressure goes to the window. Then when you do this you understand further. **(:41)** The reason this subject came up was because we are now feeding N into the cores and the explanation was that if you have a thousand atoms of H in that 4mm, now that you understand the reality of physics, that is a bigger ball, you can not have a thousand N in there. You should have 70 atoms average; you divide 1000 by 7 then you have the gaps which is btw the electrons and the atoms, each atoms and molecule structure, just about 80 or 70 atoms is just about right to be equal in the same tube. You need to increase your tube size 10 times to put 1000 N in the tube. This is not theoretical, I work like this. I will give the photos to John to post. Each line has its for setting gas, because I increase the length of the tube accordingly to the high heavier element I use. This is something that sowed to be correct. When you put gases in your systems you have to consider this factor. **(:44)** They always considered a neutron as neutral and that he has no effect, but actually neutron because it carries a proton create a bigger atmosphere dimension around itself and the proton. You can not squeeze them together. If you pressurize the proton and electron in the nucleus you create what we said ITER atomic fusion, so you have a bigger case and a bigger volume. Those of you who understand physics you must find a way to change this old formula. Neutron has his own characteristics his own environment which is much stronger then the proton, so you by factor create a bigger distance. If you squeeze it, this is when you get the nuclear radiation, all the nuclear radiation come from the additional neutrons which are in the center. Electron and protons are Plasmas, Plasmas keep distance, so one atomic H is not the same size of one atomic N. So when you load up your reactor you have 2 choices, increase the size of your pipe, or increase the pressure that you get more of the same in a smaller container. **(:47)** Do not switch off your motors in one goal, you disturb and destroy your Plasma. You must be careful with this. If you reach the dynamic Plasma you have to watch how to feed your core. You bring your bar pressure for at least half a bar, or quarter bar, not to one bar. You take the pressure of your gas. Open the valve very very gently. Be as gentle as possible if you have the dynamic Plasma. **(:50)** If you use the Nano coated, the MaGrav field will hold your Plasma. If you use steel cores with central pins nano coated, even if you have a steel core, this pin in the center will allow the Plasma to stick with it. In this case is like putting a dog in the leash which is the MaGrav field of the nano layer which is connected to the core, so your Plasma can not run out of your core. **(:53)** Gans Nano materials in the center pin, because of its MaGrav field structure has a MaGrav field connection with the Plasma and holds the Plasma like a dog on a leash. Magnetic holding is the only way you can hold a Plasma. **(:55)** You don't need papers to write and know about this, once you understand it stays in your DNA. Rick asks about the walls and the pin being Nano Coated, and if this would hold the Plasma btw them. Keshe: Yes, because there is a Magnetic field separation, hold as well. The Gravity holds and Mag separate. This is one of the problems which you face of holding the Plasmas into your core, because these layers are not stuck to the wall they are separated, but at the same time you can not add anymore energy into it. So creating Plasma further with addition of materials like H becomes very difficult. Get your Nano Materials and try to solder them together, is impossible. Because the MaGrav field btw the layers create a separation, you can not put anything in there, there is no difference btw that and the Plasma. The MaGrav field separation that gives separation or levitation that Rick talked is due to the MaGrav field

btw the matter. These fields btw the layers of your Nano Coated material are in a transition matter, which is superior to matter, that is why you can't weld them. But at the same you can use this for a lot of applications of new materials. We will announce soon the research that we are doing here, a new system for hospitals; this is a backup system for Fukushima. We are submitting another type of clothes to radiation not penetrate. **(1:00)** You can let people work in a radiate environment with these new clothes. You can create a safe environment that people do not even need to where the suits and clothes and be safe of radioactive materials. Keshe talk about the Fukushima situation. **(1:03)** This gap and holding have huge applications. If you take a step further you can use this gap for production of certain gases. We did this test in Tehran and we can even produce Gold if we understand what is going on btw these 2 gaps. You take the 2 wires which are twisting, and in how much you twist you close the gap and dictates how much strength, what can go through that gap. You dictate the flow of gases btw these 2 layers, because you dictate what is absorbed and what is given. Governments are searching for different applications of this technology. **(1:06)** Keshe talk about an agreement that Americans are interesting to get with Iran about Spaceship. **(1:08)** Rick says that in Canada that they are not allowed to see the papers. Keshe talk about the number of scientists that migrate from Iran to Canada. Keshe talk about when he was arrested in Canada, and about the world leaders, and the renunciation of positions that is happening around the world, due to what is happening in the background. **(1:15)** Keshe is receiving a lot of emails to explain about the situation with the Spanish Group of Keshe Foundation; the reason Jorge left Foundation was because he could not pay his fee. We need the fee to buy the equipments. **(1:20)** Keshe goes out and Marko assume and say that Mr. Keshe was trying to explain to the KS the MaGrav field links connection in the human body. Marko says that we should see the Plasma not in 2D but 3D. **(1:36)** John assume and talk about the reactors. **(1:53)** Keshe comes back, and give the microphone to John again, John continue to speak about the reactor. **(2:05) Keshe comes in.** Keshe says that the turning off of the motors has no effect in the readings, and that human movement does not affect the measurements. About dried Gans, this works the same, but is more in the matter state. 2 of the new reactors have a center pin and 2 of them have the coating outside. The reactors which have Nano coated layers we have to see how they respond. **(2:08)** Even though we see CuO2 or CO2 due to the water and the salt we used to produce these Nano materials, they are normal water; some Ca has found itself into the process, some of the CuO2 has residue of Ca in it, as Gans. So this Ca Gans mixed with all the Gans materials tend to be the link connecting the CuO2 or CO2 into the physical body of the reactor. Rick asks abut the building of physiological reactors, since Ca is the connector in the Human body. Keshe: Yes. The exactly replica of our system is your Brain and your scalp, btw the scalp and the Brain, part f this liquid carries Ca, which comes from the layers of the Scalp inside. **(2:12)** Your parathyroid glands decides the thickness of what material is going to be Gans in what state and where, so we have Ca and every other matter in our Lymph, when it gets to the point of delivery or need it changes to the matter is needed. When you take the Lymph you don't see the Ca or K separated on it, is a spectrum, is Plasma, when it needs the Ca through the Thymus and the MaGrav field of the environment it becomes the matter of that entity, but becomes as a reservation and how much it can be. That is why you see shortages of Ca or K in your blood, because is accordingly to what is needed and what Thymus decides and convert through the Parathyroid Glands. The same

situation sits with us with these new reactors, we have CO2, CuO2, Ca, some residue of other minerals in the structure. You can not eliminate minerals but you can reduce Ca in the buildings of your reactors. Ca is the point of attachment in this condition of MaGrav field. To do this use distilled water. In the future we should be able to replace the water with gases or with Plasmas, if we can introduce Plasmas into the layers or in Gans materials, the separation will come due to the presence of Plasma, then you don't need the water and you move out of the matter environment in a total Plasma environment. **(2:15)** Question about the letter that Mr. Keshe wrote where he wrote that man will accept this technology not because of the beauty of this but to save their own lives, and if this has to do with the coming of the Twin sister in the SS. Keshe: We keep the UN informed because we other operations around. The letter is just to inform. The interaction with the World leaders and world religious is to inform. No science has been put in the man of man so rapidly and in a open way. Keshe talk that the guy who work with Tesla cars work with in the same way as Keshe Foundation and that he is welcomed. Now we go in the depths of the teachings, if you just have a glance of what has been said in this workshop a lot of scientist will understand the applications of this maybe in a hundred years. This is the first time we have managed to create sustained Plasma on its own without expanding billions of money, we control the rotation, we hold 8 Plasmas, these are all huge steps. The problem is that release such much information fro the Foundation that 99% is not even understood. In time when the transcribers that write this and they read they will say: Oh he said or they did that time so many years ago and we have never understood it. **(2:21)** The mite that you have on your hair is like the Earth and the whole structure of the Universe size of your head, even smaller. So what happens with human race in the coming time is really not much important, this is a natural process. The total structure of the Soul which this Planet has created that is the essence that should stay. This is where your Soul go after whatever happens. As you have a spot in your Brain which its function is just transfer information and be part of the Brain for your arm to move, the Soul of the Creator will be the same, the physicality is irrelevant but the Soul is the Universal Soul, that is where the main factor comes. In fact in planets like Earth are incubators for production of the Souls which when you put the fourth, the sixth and the eight steps together then you understand the bigger structure. The body of the man is just the incubator, as the womb of the mother is the incubator for the child to birth, the body of man is the incubator for production of the creation of the Soul and the Souls in their term join a bigger structure, and then you have what you call the spiritual connection btw the Soul and the body, to are in another level. So there is no fear of what is gonna happen. The plant that is watered stays in the ground a year to get a flower for the humming bird to pick that to keep the essence of the plant and transfer it to somewhere else, and that is the purpose of creation of planets and the creation of the Soul. Those who have fears that will happen the end, the end happens everyday, since we started talking, seven hundreds planets or stars have gone through the same process. When you die in a car crash your Soul doesn't disappear, what is going to happen with Earth is the same process, but in a larger magnitude, and all Souls collectively are becoming the Soul of what is the add of the SS and then adds up to the Universe Souls which is got a different addition. The prophet of the past has speak about different levels, now we open for those what these levels as man gets ready. Just because the mother died after the birth of a child it doesn't mean that the Soul of the mother doesn't exist anymore. **(2:24)** Question: Does Mr.

Keshe knows the name of the central Star in our SS? Keshe: Sorry, we don't give birth certificates for stars and names. Mr. Keshe read something that Pope said that nearness to Christ is dangerous, Keshe did not quoted correctly and Marko correct the quote. Marko assume and say the quote: the connection to the Christ could be possible only through the Catholic religion, that direct connection to the Christ is dangerous or something. Keshe comes back. Now you understand who can get close to God. The essence is that the man is to physical, and he has chosen his own ways to control through physicality. When you are taught certain ways of thinking then is very hard for people to change their mind. Because they accepted and now they have to accept a new thing, this is how they abuse or we try to prove ourselves to be correct. We are looking to how psychological acceptance comes into man, and how this can be changed, and man can be free from fear of sin. We see this in people who smoke crack, they change to hallucination to physical presence, this is one of the major problems with this drug. What happen when you take drug is internal imagination, but for people who take crack who bridges emotion to physicality, these people physically see things, this is the bridge btw 2 part of the Brain, which other drugs don't do. So we have the same problem of how much we made to believe to see and be correct and how much has been imagination which has been brought to us and we have to accept it. When people come too close to start understanding, they are put on a separate path, they put fear into them. We don't claim to be the Christ, our problem is not guide, our problem is survivor, to extracting what we can, that there is some reminence. Each being in every part of the Universe is a leaf in a three in a beautiful painting, so we keep everything. If we don't save man from this planet there shall be no Christ. No religions to carry the name of God. **(2:32)** World religious will support the Foundation if they are really truthful with their own work, this is the difference btw one who we call the Messiah and what we call the return of Christ. Those are messenger for the human beings and we don't have nothing to do with this. There is a reason we are in Italy, this is predestined, it is not by accident. **(2:36)** Question about UFOs that introduced himself to this guy and he felt in different part of his body. Keshe: I never make comments about these things. The reason for it if we go this way we become UFO groups. **(2:38)** In the Universal level your home is never your home. You don't see interaction with what we call aliens because they know that the nation of man is horrendously wrong. If you play this self centered game in Space you are finished. **(2:42)** You need one to teach all to be correct. About 2 days ago the spherical core was broken, very short time later there was still the leakage, so we changed the whole valve. In changing the pipe there is nothing but gases in this cores. Marko noticed that there was a white dust in the tube. Part of the Plasma was literally pulled to the pipe because of the processes of vacuum that were done, and because of the process it was converted into matter. Now here we start to have seen the conversion of Plasma into matter. Would this Plasma lead to Gold or plutonium, or to a Life? If the right conditions were there it would be happen. We changed the valve and yesterday Marko picked the valve and we saw a huge amount of matter inside the valve. Now you have created the conditions of creating a being, you are in Space, what Religion would you like to this new being to have? This is the biggest problem! This is why we ask to unification and to religion speak to each other. We are waiting to teach you the reality of what it is. In trying to unifying the religions and the science is to avoid the problems in your aircraft in Space. I wonder if you can convert into a Muslim or Christian a being who knows everything about the Universe. **(2:47)** Keshe talk about the

Belgian Government that is going after him, and he knows the punishment that they will receive that is beyond man can imagine, but the time to punishment is over, it is time to explain and understand. We could put man inside these spheres in the reactor, and it would be worst then solitary prison. It is not to put fear, but to explain the power of the knowledge. A man is nothing but a speck of dust, but if have to be done we will show the power. **(2:50)** When the Iranian revolution started a lot of Iranians were Persians did not wanted to be attached to the wrong doing of others. The same happened with the nations and religions. A priest should advise to be close to God, not close to him, unless there is a mean of control. Whatever religion you have go closer to your Prophet, to understand the way, then you find the truth path and become one. We are not here to create disturbance but to create balance for the Space. Because you've got to carry the believe in your heart and your Soul then you don't need no temple, then you can pray to Mohamed or Christ, that was the path you have accepted. **(2:54)** Question about other beings in other Systems that lost their homes and are living here with us in Earth and life in the sea of people who have the DNA like ours. Keshe: The best explanation about this, when you look to the upper atmosphere as we see in the videos of NASA, you see part of the structures of other lives, but because you don't understand it you ignore it. The existence in the water and in btw the Galaxies, planets and SS is very normal, you have a tail, you don't have a tail, whatever, this is what you have arranged to guarantee the survivor of the DNA. People say, there is life on Mars or Moon, yes there is, because the structure in that environment allows, specific type of life to exist, and is adapted accordingly. We all come from Africa, how come we have changed, some black, some blue, some tall, some blond hair, is just the environment of Northern Europe forces this kind of whiter skin to absorb and be able to live in the environment. And the food is the same in the digestion system. There are lives in this planet that we don't see and sit in the table with us, we don't see because we don't have the tools of detection in our package in the body, even though part of the Brain has this package. Your Brain is aware of the presence f everything which is around it. People say that ordinary man uses 5% of the Brain, Einstein used a little more. Every cell of the Brain is used for this purpose is to be and interact with what is needed and what is needed to detect to guarantee your survivor. You are aware of its physicality of what you can see or smell, but there are more beyond that your Brain operates without you knowing. Physicality is a pitfall of the man. (**3:00)** Question about the papers. Keshe talks about attacks that have been done in the website, but all the papers will be released. Very soon we will release all the books, medical files and papers for free. You have the patent but you don't understand how this works, so we will explain how it is. Medical teachings will be happening soon. One thing is for sure, ILS, Alzheimer, all the cancers, Schizophrenia, etc., the system works in all of them. Don't worry about a few papers, you will get the whole package. **(3:07)** Keshe says that they will hold the meeting with the Religious leaders. **(3:09)** We don't do "magic" job. We will do it from the knowledge of the Science then they understand the way it works. The power and the knowledge that I have I can Brainwash any world leader to be here on their knees, but that is not the purpose, they have to walk into their own will and the followers follow them through the same will. We will video this time when the KS sit in front of the reactors and interacts the field of the man with the machine, now with the Plasma. I have the power within me to change the 7 billion t be obedient, but that is not the job, doesn't serve the purpose. As I said, my wish is my command, if I wish 7 billion will be done instantaneously. I sit

within the body which goes back through the same DNA to the First Mother, you are all within our reach. That is why we come into the body of the Creation. We work within the structure.

19th Knowledge Seekers Workshop – July 17th 2014

- **Main topics of this Workshop**

    - **Meeting with Religious Leaders, Unifying Religions.**
    - **Critical Point With the Reactors. KS Achieved Pre-Flight Condition**
    - **Cup of Life**
    - **Commercialization of the New Power Energy Supply and How it Works**
    - **MaGrav field of the Sun Suppresses the MaGrav Field of the Earth**
    - **Explanation of Travel in the Cosmos**
    - **You Can Not Reach the Principal Matter**
    - **Once Plasma is Created there is No Need for the Containment**
    - **How to Check in Homemade Reactors if there is Plasma in Them**
    - **Understanding What Leads to a Condition of "Disease"**
    - **People Can Feed Themselves from "Light"**
    - **Oxygen Do Not Pass the Walls of the Lungs**
    - **Digestive System and Why the Lymph is White**
    - **The Work of the Parathyroid Glands**
    - **Functions of the Thymus**
    - **Living Without Food**
    - **No Difference Btw the Upper Layer Condition of this Planet and the Lung of the Man**
    - **Creation of Protein and Life in this Planet**
    - **Life in Other Planets**
    - **Cancer as Solid Material is Controlled by the Thymus and Lymph Glands**
    - **Sleep is Just for the Physical Part, Not for the Emotional Part**
    - **Claustrophobia**
    - **Flying Car**

(:01) Keshe comes in. Today we have a little bit to tell you. We started to teach the technology and the Science behind different aspects on Keshe Foundation, especially on the Health side. One of the things we did not put much attention was about the human body and biological effect, this is one of the things that looks to us strange, but in fact it is the most natural way to do it. Before we get into it we have some information. After the next Thursday we will break for summer holydays. **(:03)** The other news is about the World leaders meeting, we had wonderful section. It was 3 day of deep learning and understanding, a lot of things became clear in what needs to be understood in respect to different kind of beliefs and what they understand and what they expect from the

Foundation, in respect to the Ethos of our work. One of the points was about educate people first with Science that they can understand it. The outcome of the meetings is that, whatever you are (Christian, Jew…), **you can go to any temple and pray to One God, the difference is not the house, the difference is what sits in the heart.** In bringing all the beliefs in one, in so many ways, we came to understand that the houses of worships in any name or shape from now on are the same. The name of Religions from now on becomes irrelevant. **(:07)** We see a great step forward with this move. It is not easy to move in such a way for politicians and religious leaders, it brings a lot of problems for them and the position they are and we don't talk to no prophet or priest or religious leader to get to God, in this way we see the God through our own existence and the behavior of ourselves. You are quite welcome to come with me and pray in church or in a synagogue anywhere in the world. **(:08)** In respect to the development of the reactors we reached a critical point in the last week. I had asked total silence for the KS, no pictures or information allowed until we decided accordingly with the condition we achieve and at the same we have to respect the Italian Government. Any announcement in regards Space will be done by Italian Government. I have to inform you that the KS have achieved the pre-flight condition. Next Thursday we should be able to show the cup of life. The samples has cost ridiculous amount of money because he had to produce it, now it is something like 12 Euro for one cup. **(:10)** Rick asks about the cup of life. Keshe: This is the cup that we produce that we can drink from to receive all the energy which you need. As we explained, we produced a initial one, and we will receive 50 of them this week, by next week we should be able to show you. A single can not product the spectrum that the body needs, so we have to produce 3 different cups, so the combination of the 3 should achieve what we are looking for, at least part of the daily energy that we need. Rick asks if that is something that will be available for public. Keshe: It will be available to public, but we have to run the test in a secure way, otherwise people think they can do it and they can harm themselves. It is very simple but it has to be done in a correct way. Rick asks if this will be available for people purchase the cup. Keshe: You can purchase this from the Foundation website or you can produce yourself, depends what you want to do. There is going to be a lot of changes and they are coming in a very smooth way. **(:12)** As you know when you buy a book you go to Keshe power cells, Keshe power technology was set up by Dirk and me. Dirk set it up for about 4/5 years ago, for the production of day and night solar cells. Because of Government of Belgium it took us 3 years to get the (??). So we were distracted from the path to deliver what Dirk and I had to do. I can announce today that the production of the cells, day and night torch and the panel has started this week, the manufactures have started the pre-production, so hopefully in matter of weeks or so we should be able to offer materials like the torch. In the coming week the Keshe Foundation team will produce the Sun panels. **(:15)** The Foundation will commercialize this through Italian companies. The difference btw the day and night light and this system is with the presence of solar cells you produce energy during the day time, these solar cells produce 3 times average of the day light during the night, but you have to be on the ground floor. In the present solar cells with LED light you buy you charge a battery, a re-chargeable battery, and that is what gives you power. With the new technology you only add a capacitor and the discharge of the capacitor dictate how much you have light, so night time you have the same as the day time, and night time you have more energy because you absorb more energy upcoming from the ground. This changes a

lot of thing in energy consumption, because now with the solar cells you create energy and send it down the grid, or uses it or store in the battery for night time, now with this process during the night while you are using you are absorbing more energy. **(:17)** The development of the clean of the air and the system is in progress. The commercialization for cleaning water and soil started few weeks ago. Keshe talks about the decontamination of soil and water in Fukushima. **(:20)** They said to Mr. Keshe that the KF for Health in Malta will be open in the end of August. **(:22)** There is not much more I can tell you, is there are any question? Question if the day and night panels can be put on soil or need to be put on the ground. Keshe: We have done a test in Belgium on the table, it was in the show in Toscana. We have observed that the energy up from the ground increased after seven o clock pm and five o clock am, and reduces from 5 o clock am to 7 pm. Then we understood that you don't need to have it on the roof. If you seen the torch which I showed you only for this purpose when I want to charge it up, all I do, I put on my black bags and the I leave on the floor overnight, by morning is totally charged, so this is the beauty of it. It is not charged in Watts or Kilowatts, these are all Nano Watts which go and deliver whatever it absorbs into the capacitor, and use the capacitor as a source. So how much energy you collect depend of the size of the capacitor you have put into your circuit. You got to understand the principal, how the system work and not try to copy it. Then you can make flat at night and you can put in the wall like a picture during the day, and that picture on the wall can supply all the energy in the house because it absorbs the energy. We did a test with bearing the wires into the buildings with the Nano coating, so in reality if you can Nano Coat your wires and change your light to LED light, the wires embedded in the wall, will became the energy supply to the capacitor for the light when you need it. There is no need for the main supply. We are going back to Edison and then to Tesla. All the power supplies are DC, and your power supply is with coated wires which you have in your cable, these coating of the wires can be done with the plastic jackets. Your wires can absorb the energy from the structure of the wall and deliver to the capacitor and when you need a light you can switch it on. The process that your Nano Layers work is that they absorb the minutes flow of Plasma, not Magnetic fields, so the bricks in the wall decay, the plastic of the wall decay and in this continuously decay the energy absorbed by the wire is delivered for the capacitor for the time of need. The process in the open when you put outside, and why the systems changing during the time? It is that the surface of the Earth is the boundering. When you have a day light, the MaGrav field of the Sun suppresses the field of the Earth back just on the below the surface, the P surface, and when it is night time the MaGrav fields of the Sun is away, so the MaGrav field of the Earth passes something like 20 cm above the P surface. The reason you absorb more energy at night is because the lights, the MaGrav fields of the Sun is retracted, so the fields of the Earth are allowed to push up themselves to a certain level. You can make reactors which are under and above the ground. You can have the benefit of both, day and night. **(:28)** Questioner says that the question was about if they are in concrete or something if it makes difference. Keshe: The field of the Earth doesn't stop just because you put steel on it, is irrelevant. But at the same time you absorb the residuals environmental energies too. This explains if you understand in this tech that we try to teach why in North atmosphere most of the food is a root eating, because most part of the energy in the winter time and short time in the summer, most of the energy sits in the high potential just 20 cm above and below. So herbs and roots absorbs most part of

this energy, it is in the right balance for them to absorb. This explains why we don't need to dig deep holes to grow a seed, it can be done just a few cm below the ground, and why the plants grow so rapidly. It is the combination of the energy in both sides, the Earth and the Sun, and this has to do with the MaGrav field of the 2 entities in respect to each other. **(:30)** Question if with radiation they would work better. Keshe: This is to be tested, Some areas will produce more energy, others don't. We know for fact, for example when I leave my battery on the first floor how its get charged, but when it is on the ground floor the battery gets charged very very rapidly. I showed this presentation in Toscana. The main cost of this system is the capacitor and the LED light; and at the same time the capacitor can last for years, it is not a rechargeable battery. **(:32)** Question: The bigger the capacity the bigger is the output? Keshe: Yes, you can choose more LED lights. As you add numbers of LED lights, or you add other pieces to the systems for load, you don't need any other (??) because the system decide how much energy is gonna pull through the wires and through the environment. The system tells the limit of what you can take, because I can not pull more from the environment. We did a test about 4 years ago, and if you look at that 3D sphere, have a cap on the top, so we have tested different liquids in this container to see if with the liquids make any difference, if they increase the power of production or not. In one case you see the increase in production. And that is with natural water. When we add natural water we see slight increase in power production. You can make a system to be in the vacuum or liquid water and you will see slight changes, but you can not use chemicals or anything else that can interfere or start to produce Gans in the system. So you are tied up to a dry condition for efficiency. **(:35)** Do understand that these wires can not be weld or do anything with them, they are a dynamic MagGrav field flow even though they look as matter they have a dynamic MaGrav field separation, because Nano layers create matter in gap, that gap is not empty, it is a strong MaGrav field flow btw the two atoms, so as you try to bring the 2 together the fields separate each other. The only way you can increase your power or get energy from them is through twisting the wires to each other. It's the number of the pieces you add together in series or in parallel if you want to increase your voltage or amperage. If you look for high amperage you look the system and set up in different way, and in high voltage in a different way. For the first time you don't need these re-chargeable batteries. This is the course of change, in future we will teach how to get the energy from the environment and add to the water to become food as well. Instead of eating the apple to get its energy you put the flow of the material into a water, and you get the same energy from the water, so you don't need food for consumption. **(:38)** Question about the device to have power energy. Keshe: You need your wires as much as possible to be outside the system that can absorb as much as possible from the casing. Your casing is your absorber of the power. You just change the wires from Nano painted to Nano coated, naturally with the Cu. Then you find out that the Solar systems will become very favorable. You can have as I said a few black and white pictures around the house and each one supplies the energy for that room for what that room needs. **(:41)** Question about Magnetic channels observed in the Gans materials, comparing with the same environment around the Sun, these materials can be used to travel around cosmos? Keshe: You want to go through the Sun channels? Good luck to you, you have the systems you have the Nano coating. You see the same channels in the structure of the Brain of the man. Look at the MRI. When the man goes outside the SS and look at the Plasma of the System you see the same kind

of channels in the structure of the Plasma of this SS. This is a natural process when the field finds a MaGrav field balance. These channels are a normal process in Plasmatic condition. Look at the Brain of the man, you see the channels and you see the separations and turns in the Brain, and when there is a separation which is a huge information separation btw the E and the P part of the body, when you cut the Brain you see the Gap. That is another channel which is dictated by the body in our structure. If and when the medical science open the Brain and look at the size of the gap you can tell a lot about the character of the person. These separations even in the total structure of the Brain all have a reason, these create certain field in the environment and they have a purpose. These channels are normal things when you are dealing with Plasma. **(:44)** Question about travel to the Cosmos, if the Plasma environment put him in specific channels when he find the place he want to go. Keshe: No, you just get pulled in. Is like when you a magnet close to another magnet, it does not go around, it goes directly. There is a process of fly system, we explain this. Flight system is not that you go direct to a position, you go indirectly in different ways before you take the course of action you have to understand what is on your path, how deep and how strong the Plasmatic MaGrav oceans are. You look the water on Earth, which is a liquid material, btw the Gaxies and btw the stars there is same kind of high power Plasmatic Oceans, you have to determine your path, you don't go to high density and the field of your craft is below, so you become like sugar in the hot water. You have to find the balance or avoid certain sections. MaGrav vortex, this is what you got to avoid. The same way you have whirlpools you have in Magnetic fields conditions. You have to understand what you do. The scientist will do these programs in time and the system will be done by thinking and not trough electrical systems. We have gone trough the phase where the KS sit in front the reactors and they try to control the operation of the reactors or what they give and take from the reactor. Armen sat in one side and John in another, opposite to each other, each one was sitting in front of a SF, looking directly into the center core, we observed the process of who gives and who takes, I was analyzing what figures would come and how they were, it was interesting to see that when one try to be better then the other this damage the whole balance of tries to predominate. One of the representative sat in front of the system, and he literally neutralizes the whole room, it is interesting to see how these people who are in touch with their inner feelings can create such condition, I had to reset everything to overcome the balance that he created trough his own natural process of giving, and there was no more to give, the room was total in balance. It was very interesting how one man with his own inner peace could give and could share it so easily. You have to learn how much you want to give and at the same time you have to teach, ok this is the path I want to go, so what is in there, you pre-train yourself in how to evaluate with the work of the reactor, to create a shield in but the balance existing forces. **(:49)** Question about if you use the principal matter field which are much more stronger to you become less and not get in touch with the material around it. Keshe: that is something you've got to understand, that is possible, but the knowledge and the fields you carry allows you to do this. Go to the principal strength is impossible, because further you go in there is still further down the line, so is position respective. You might be in the principal Magnetic field of the Plasma but in fact there is further in, you are in the matter level in respect to that area. So this is Magnitude field dependent area. This is what we showed here in the last few weeks to the KS. When the reactors were put together the reactors got the lift condition, then they

broke up the system, in that point I realized that my assumption that these people understand were far away from the total understanding, created a lot of disappointment in the lab. I took everything back to zero point going back step by step. **(:53)** Yesterday we started to get the gases out of the core, in afternoon Armen and Marko extracted all the gases from the core, then we loaded with 4 units of the H, to just give a cushioning to the Plasma. You don't need any matter; we compressed the environment of the core we try to go further down to bring the further transition and the strength out. With the Nano coated materials that we use in our reactors the MaGrav field of the Nano Layers dictates the condition. In most of the cases the reactors received the Nano coated glued on them, so in fact you have a Cu in btw both sides of the Nano Layers, which dictates the field, you can absorb or hold within the container, you can not go into the transition or the principal section of the Plasma, even though now you opened the Plasma to take the full environment of the core. Wherever you go in transition there is still another transition btw the principal, and in respect to the Magnitude. So if you thin you will go to the principal you will never reach that point, because there is more condensed fields inside. If you reach the center of the principal matter you come to nothingness and you can never reach that point. **(:56)** Question if the KS are working with the Gans reactors. Keshe: John has built 2 units, he is just doing the balancing. We have facility for four to make a new star formation, but at the moment the power has changed for the lift condition of the system, we will concentrate on this. **(:58)** Question about the work of Gans in plants. Keshe: Very scattered, because there was a lot of break up and disturbance in the Foundation because of a lot of people's behavior; and that came just about the time when the plants were planted, and it caused a lot of break up in that process, people who were in that position has left the Foundation. Maybe in autumn the Foundation will come back with the tests with plants. But we know what to expect from these tests. **(1:00)** Question, if it is possible to use cast steel, because of the same property as normal steel. Keshe: The reason you can not create a Nano structure on stain steel is because of the deformation, they do the crystal formation with it, any other material can be used to create a Nano Layer. The stain steel does not allow the atomic structure to become loose. You can make Nano layers with Gold or Silver. You can use clay or anything for your core, the only thins you need is to be able to create a Nano surface small enough that you can change the Plasma to it. Containment is irrelevant; this is the major breakthrough in the world of science. The breakthrough has come in be able to produce Nano Layers so rapidly and cheaply, and then due to the structure of the Nano Layers which are Mag layers on top of each other because of the gap btw the atoms creating Mag field container. If you put Nano layer in your core you have created the best Tokomak. This is the breakthrough and this is why so many nations fight for what we release, it is so simple. **(1:05)** When you have a rust pin and you Nano coat it, that layer of Nano coat is MaGrav and is in a Plasma condition. Now that you created a Plasma which is MaGrav, they glue to each other, you can even break up the pot, as long you can keep that nail you can walk around the house with the nail in your hand and the Plasma attach to it and you walk with a portable torch. All the processes we did was to create the Plasma, once you create the Plasma, because of the nano materials you have used, you have created the chain to hold the Plasma to, the nail in the center of the core of John's reactor or Marko's reactor, this is just the pin which you put on the ground to keep the dog, it is the leash for the dog do not run away. That is the pin, that is all you are doing. Going trough the processes of the

reactors, putting the Nano Layers with the pin inside, and going to the process of ionization of the gases were to create the Plasma and nail the Plasma into the core. That is what I always said, put a pin or a nail in the center of your reactor. Those who have Nano coated the whole center of the reactor by putting Cu layers or whatever you have made a tachometer in the cheapest way, you are containing Plasma, and because you are running in the higher speed you don't have the facilities you don't have the systems. Bring your systems to the Foundation and we measure how much Plasma you are holding. This week we ran the reactors for 8 weeks and John and Marko went to each reactor measuring the field up and down. Keshe talk about the measurements that they did of the MaGrav fields of the reactors. **(1:09)** Now you achieved the major breakthrough in science; not just with your Nano Layers by creating the Plasma, you have changed the Plasma in the containers in the same core. You don't need the gases, if you managed to create the Plasma you can hold your vacuum condition. If you have created the Nano Coating you put the gases in, and you rotated your reactors that your Nano coated allowed the Plasma to be created, you can empty your cores from the gases, the Plasma will still be on the center, but because you don't have the facilities that we have here at the Foundation, to you nothing is happening. But with us because we have 9 reactors, we see the interaction btw them. **(1:11)** We will send the materials that anybody in the world can see the work of their reactors. Once you connect your reactor with our reactor is instantaneous, we can operate your reactor from here and them you can see the changes. **(1:12)** With a coconut reactor, which you could have put Nano layers inside it you achieved more Plasma that the Scientists done with the 30 billion dollar Tokomak reactor built in the south of France. We are in silence because there is a step missing, as I said to the KS, now al of you have a beautiful Rolls-Royce parked in front of your house, but you don't get the ignition to get it to run, and we have started to open the ignition key here ate the center, that is why we are in the pre-flight condition. When we make this we release the key. All of you , if you have made the Plasma reactor, you have an active reactor in your hand which are holding Plasma. Don't open your reactors, just because you think nothing is happening. When you vacuum all the gases from your reactor, just inject one or two units of H just to cushion the Plasma, for the Plasma not get in touch with the wall and convert into matter. So that cushion stop the conversion and keep the Plasma; and then in the coming time we will release the key. This key deliberately was not put in any patent, we want to bring people around the world to this point, now you understand, and in the coming days the key will be open here in the center for the KS. **(1:15)** The Plasma in your reactor is highly active, it moves beyond the speed of light, but you are not used to it. It is the same if you hold a magnet in your hand, you hold the magnet, but you cant see the flow of the fields coming out and going inside, your Plasma is in the same condition. One of the way to check in your reactors the Plasma, when you extract the gases from your core, you should reach a position of you are holding your vacuum. If you been the whole process of building your reactor, you 99% have Plasma in your core. If you put the center pin inside then you don't need the walls. If you do not put the center pin inside then you need the walls to contain the Plasma. If you want to see how effective your Plasma is and if you have a Plasma or not, put your power supply on a fix rotation position, you put lets say it up 5 volts and 1.4 Amps. Then increase the pressure by adding very minute amount of gas into your cylinder, if by adding gases you find variation in your current or your voltage it means you have created pressure Mag fields that affected the pressure of the

motor and your current drops or increases; that is the indication for you if you have achieved Plasma. **(1:18)** I will teach you how to make multi layers Plasma in the coming months. Then if you can do multi layer Plasma in your core you become like the Sun. If you can not reach, most of you have mono Plasma the only way you can confirm you have a Plasma condition in your reactor is by, first of all when you are degassing your chamber you don't open your cores in one goal to get your gases out. To extract the gases from your cores should take at least 2 minutes, very slowly that you don't disturb the Plasma and you don't duck out the pre-Plasma condition which is a coating layer on the Plasma. One of the main things you've got to realize is that you created a vacuum pump, to be able to suck the gases out of the cylinder. You don't go to 1 bar, you go .4; .6, very low. You extract very gently, and when you have reached that level you from .6 to .8, and then you repeat the same process, you extract all the gases, then you find out you have a perfect Plasma. When you add again some gases and you compress again your Plasma you see changes in your current flow in your motor, because increases or decreases the MaGrav weight on the motor, then you know you got a Plasma. Don't touch your reactor, unless I teach you the multi layer you think you achieve nothing. For the reactors to fly you've got to create a SF or a multi layer Plasma. If you have multi-core you still can achieve lift, but you have complications of the separations of the cores. The Iranian reactor is a multi-layer, and it flies on its own. All the things you have done in the past few months were to put you in the point of maturity. We are testing two "ignition keys". **(1:27)** Question about the 4 6 8 numbers relation. Keshe: No. Question about what is a ball light, it is a Plasma? Keshe: Plasma, it is a condition. These are the same conditions as the Magnetic vortex in Space, but in Earth MaGrav field. It is literally what you create in your reactor, but it is done naturally due to the conditions created in the environment. You are used to the wind because it is matter, don't forget this Planet creates MaGrav field as a Plasma too, and these flows are dynamic. You get little bubbles when you are turning the water. It is the same thing, these Plasmas are created due to the P condition of the flow of the fields within the Mag field of the Earth. **(1:29)** Question if the liquid that you put in the core will poison the Nano Material. Keshe: We saw this when we broke the porcelain core of John, and we saw the materials stuck in the center part, and the pin was clean at the bottom where actually the liquid was sitting. The reason for that is, where the water sits there is no interaction with the P, where the Gans throw due to the balance f the MaGrav field they got stuck to the wall of the center pin. Liquids do not stick. Lucien says that he experimented with oil and ask if the oil should be repelled by the nano material. Keshe: Yes, it should be repel, but you have to realize that some materials have the ability or carry both, the Gans and the matter. So this is very much very how the fields and the connections btw the fields and the matter gets established. Lucien says that he mixed vegetable oils with the Cu wires Nano coated and that he produced something, and bubbles. **(1:36)** Keshe: These are H bubbles, not O; most probably they come from the conversion of the CH bond of plastic; especially if you put nano materials around it. **(1:38)** If you understand the process of Nano layering, how you create pans and materials that you can never scratch; non destructible Teflon layers. Nothing should stick to Nano Materials, unless you create the bridge material. That is why for example you have bone in the structure of the body, it is a matter, but it allows the Gans material of the flesh and the muscles and the connections to be stuck to it; because that matter has both conditions. This process we understand very well, but the purpose is you share the knowledge the

way you are doing. If we cook in these nano layers, does the meet ever burn? Now we are looking for production of Nano pans to cook, with this you can control the speed of cooking, because the meet will never touch the pain, and the vegetables are the same, they just receive the heat and they cook like steam microwave. We are testing. **(1:42)** Rick asks about the cup, if it is going to be similar with the patent that has been released. Keshe: Partially yes. We have reached major breakthrough in health aspects. We have managed to create condition to replicate protein, encourage the production of protein in the body of man, that mean that the water you drink have the characteristic of the protein. You can make cups which can replicate the energy of beef or lam or bread. We are highly advanced, but if we release the technology people will be scared. We are testing things and we will release the knowledge accordingly. You've got to realize that officials behind the government know what we are doing. **(1:45)** We work btw 3 levels: Fist teaching; Secondly making; and Third the Ethos or the conduct. Keshe talk about the production of pans by Italians companies. In a way you can never get contaminated, if you produce Gans materials and you eat it, it is part of the energy system you receive, maybe you need less energy, then you eat food to feel to receive the energy you need. But this is the process which we are going to test now. Keshe says that you can scratch the pain and because of the Nano layers, that layer scratched come back to normal state. Rick read that CuO2 can be a good coated on the inside of a normal radioactive reactors, it is because when it gets damage by the radiation it actually repairs itself. Keshe: Yes, but that is a nuclear and the proliferation side of the use of the Cu. But the Cu you hear in the industry is not the same CuO2. **(1:47)** <Audio of Mr. Keshe goes off> **(1:50) Mr. Keshe is back.** Question about the cup of life, if that heals injuries. Keshe: You will find out, depend of the injury. We don't work that way. This is why you need to be very careful when you go to the medical application. **(1:52)** <audio breaks>… Keshe: No, we have to see the case. If it is a P or Neural damage. I will go back to the principal of the technology. Is the conditions and the environments that you create that leads to what you need. In the case of the amputated toe, we created a condition, that could recreate the condition of the body of the man that follow the process and then the toe was grow. We understood the process of cancer tumor, we build the system which goes on the upper arms and pieces of cancer literally falls, after 2 hours we take it off and it stops, so it shows that we have a full control. These are the things that the scientists have to develop, that is why I started the teachings with Dr. Eliya. With this technology you can not harm, because the body takes what it needs. **(1:56)** Lucien talk about the bad lubrication on his knees. Keshe: You need to understand what leads to that condition. Depends what you call lubrication, it is cartilage lost or liquid lost? There is a process that you can build cartilage, it can be done. You can create a condition in your joints, you have to limit the use of the joints for a time because the layers are created in nano layers, very slow. If there is no liquid inside it you have to find out what has caused it. These things are not just happening because it is there, you have to find out why the Brain has given such instruction to stop producing or reducing the amount of cartilage or liquid in that point. People think if I have a problem with my heart muscle, if it is not accidental, then order has come in for the body to change its function, you have to understand the order. This is the change of the present pharmaceutical. You have to understand the information that has come from the Brain for your joints not to produce or extract more then it receives. It is very much like Asthma. 99.9% of the Asthma unless is created due the damage to the Lung is psychological.

Caroline has done research on this and gave to Manchester Hospital as a gift, on how they can help children with Asthma problems. You have to fin out what instruction has come from the Brain. Go to the source and when you change the condition in the source you find out, and they say that there is a miracle, there is no miracle. **(2:01)** John explain about people who do not eat and feed themselves from the prana, from light. Rick says that NASA did the test with a person without food for 90 days. Keshe: Yesterday I explained in detail how these people do it. This case I explained initially 2 weeks ago when Guru Mahan was here. He does 21 day of fast every year. I explained to him how he does it scientifically and he said you are correct. Anyone can achieve the same point. Maybe this is a good point to bring this knowledge and make a breakthrough in the world of science. I explained partially this to Eliya when she was here and partially to Ivan. Now I put as a package and if you want to learn more listen to the recording of the interview that John will post; we have a copy of this interview. The process goes back very simply, back to your Nano Layers which you produce in the Cups. One of the first things you produce when you put a nano Layer in the salt water you saw that layer of fat. People who can live without any food or drink, these are the people who have managed to understand how to condition their body. The whole process goes to create the conditions and the environment. As you know in my previews talk I said how O never cross the walls of the Lung and enters the blood. The whole transfer of energy is through N ionization. From those who don't know I will explain very quickly. When you breath the air 65% of the air contains N, O has more or less 8 protons, 8 neutrons and 8 electrons. If you put as a ball, it is a huge football. N has 14 which is a smaller ball, and then C that we breath have 12 balls; and these are not balls, these are spheres of Plasma which they got MaGrav fields and they have to position themselves in respect to each other, so they have a gap btw them. The size of the ball is not just the number of the electrons or protons but is the gap that they create to be comfort to be dynamic. Then you have a H which is a single proton and electron. Now the world of science made systems to prove they are correct, they made exactly as the Earth in the center of the Universe but in the world of medicine. It is a fallacy that the Earth is in the center of the Universe, passing of the O through the wall of the Lung is a fallacy too. If that big ball can go through the wall of the Lung which is the size of O, how come the little ones can not go through? So you had to see more N, H and C in the blood then O. What happens in reality the process is in a simple way, the N through the compression and the size of the cavities and the channels in the Lungs convert into the Plasma of N, does not stay in atomic structure of matter. In that process due to the condition which is created, N releases a He, energy of Plasma you call the Plasma of He because is a constriction in the Lung. This He creates 2 new conditions and this new atom of N which has lost the He has 2 options. Because has lost a He steps down to C Plasma, and then at the same time this C has the option to link with the O which is in the air and creates the CO2 which you breathe out. At the same time this He due to its properties breaks up into H atoms; and the centralization and vibration of the energy releases exactly that electron, which is like the electron current you have which releases the energy which cross the wall of the Lungs and the blood receives new energy. The change of the color of the blood when it passes trough the Lungs is due to receiving the energy from this ionization, or centralization which is created in the H atom. No O ever crosses the wall, all it happens, why your blood becomes brighter and is Oxygenated, it is because receives the energy and it is

exactly the same process as I always say, adjust the light in the house. When you increase the current and the energy you get a brighter light in the room and when you reduce you get darker. The energizing of the blood is just by the transfer of the energy in H level exactly across the wall, not by matter level. Body is a total vacuum, the Lung is a different bag of it's own, and if you look you have a mouth and anus and there is no hole in their in these materials for air or the food to get into your muscles tissues or the fibers. Even the same process happens in your digestive system, with the acid in the stomach and enzymes, you convert and loose the same process. When the materials goes through your intestine the energy of the matter is released across the wall from the open air which is your stomach, to the Lymph, and that is why the Lymph is a bright transparent liquid, because it receives spectrums of all the energies of the food you eat. Now you understand a very simple process. In the body the man, no food or no material ever cross, the energy of them crosses the wall and they add the energy to the Lymph and the food cycle or add energy to the blood, and deliver energy to the Brain directly. **(2:12)** Understanding this process brings you back to one thing. If you can energize the blood without eating or breathing air, then you achieve a new dimension. When you look at this people who goes to the cycle of no food have mastered one thing, they have mastered to produce water, control the production of water in their body, in their Lung. A lot of people become ill when they become old and frail, and your postures changes, when you are sick, your Lung, the way you put pressures on your Lung changes and what happen to these conditions? You find people with liters of water in their Lungs, but you don't find any of these people dehydrated. The rest of the body operates normally but the Lung is full of water. If you can manage to extract even 1 liter of water from the P body into the Lung you should have a Kidney failure immediately. So where does this water comes from the body? This water which comes through the Lung is due to natural process of breathing air and through the same process of N converting to C and the C adjusting itself to CO2 creating what is breathe as a CO2, in condition changed in the structure of the Lung the H that releases it energy across the wall to go to the blood links up to the O too, so that creates the water, and this moisture is what it keeps the lining of the Lungs in a Natural way. The breathing and the conversion of the Plasma of N from matter to Plasma and then creating C and He and H, H in conjunction with the O creates the moisture. So when you get frail or the condition changes the rate of the production of this water increases. So your Lung gets flooded. **(2:15)** The people who go and eat from the light or don't need to eat and don't drink anything; if you get recorded the behavior before they go to this position you find out they breath totally different then when they go to eating habit. You and I have an habit of sit in the table and eat, these people who teach themselves how to change the condition of the Lung, they sit at the same table but in that table they change the rhythm of the breathing, so now the body creates exactly the flood of the Lung, but they control how much water is needed, they control, the body decided how much water they need and that water in the lung if you produce in a low speed the body will take it out, and to the system to go back to where you needed. Then it goes back to how they live without food. The food is the energy which came from the Sun as a Plasma, then became a N then you digest and the enzymes break it back, your stomach is a reverse reactor for converting matter to Plasma as it came from the Sun, so now if you understood the process, then as you condition your Lung, this time instead of energy being given across to the blood through this water the energy is given to the Lymph. So

now you are nourishing your body only through the water lung which you need, but through the energy of the H which you released into this water which crosses the wall of the Lung into the Lymph, so what you've done you converted your stomach into your Lung for feeding the material energy which is needed. So if have thought and you can achieve control, then you find out you have enough water through breathing, and then you have the energy as you need. This is all the same energy, what happens to the minerals and other things which we need. This process is controlled, what you do you put a bank of energy continuously to the Lymph, so your Lymph carries all the full spectrum of the energy the body needs. **(2:18)** You have the Parathyroid Glands. Sometimes two of your PG which is the size of a pin head, they have a control on what size the Plasma is cut, so if you need Ca, the Plasma of the Lymph is cut trough the energy Plasma of a Ca. One of the glands is for matter and other for liquid, the operation in which one works with what is decided by Thymus the gland, through the B12 or the Gamma radiation which comes through the food you eat. It doesn't matter what food you eat, the gland decides in what proportion in what becomes, very much like Eskimos that only can eat a vegetation, they don't have cucumbers and tomatoes, but they still live. They are like you and me with no short of vitamins. Because the PG decided what the material they eat will convert to the material which they need, like the Ca and the rest. So these people who talk about they can live for decades and for years without any food, they changed the rhythm of their breath, and that change allows the creation of water in the lung, and the change of H into energy which is needed by the Lymph. These people sit at the table of the Universe, and simply by the air you and I breath they convert the same air through specific condition into energy and the liquid which the body needs, so they don't do anything magic. You can stay hundreds of years without food, because everything you need is been there. **(2:21)** There has been misconception in the understanding of creation of life in this planet. The life in this planet is exactly the life in the lung of the man. Plasma comes from the Sun, MaGrav field of the Sun in respect to MaGrav field of the Earth at the position which is today, their interaction leads to MaGrav friction which part of this and part of the fields which are released from the Sun leads to release of the Plasma of N. This Plasma as it gets attracted by the Earth changes to the Plasma of Gans and then to matter and through rain falls back to Earth as N. That is why whatever there is a rain you see so much green and growth, because through the rain the Earth receives the N that comes from a Plasma conversion from the Sun. Now, the same process as it happens in the Lung that the N converts into C and to O the same process happens in the upper Layers of the atmosphere. If you speak with people who are expert in the upper atmosphere they tell you they see N and He in the upper atmosphere of the Earth, and trough ionization of it you receive the H or create the O. No difference btw the upper layer condition of this Planet and the Lung of the Man. When these materials come in the right combination, when the H2 and the O comes together you get the water and the moisture what comes as part of the rain and if you get the other way you get the composition of the C. In fact what is important is a very simple principle, protein is the creation of the upper atmosphere of this planet. When you mix the 2 materials the C and O and the N and H, with the matter component of this Planet (Iron, Ca…) and you give in the right condition you create a dynamic condition with different kind of salt for the 4 elements, which we are originally created from N to come together as a molecule of AA; and when this AA links itself with the matter of the P part of this Planet, then this leads to

creation of life, muscles, if it is a Cu the Neural System and the rest. So the life in fact is separated in 2 parts, the living part which is the AA which is done by the Gases part, when the Gases part and the matter part comes in contact with each other and they can link up as in a Gans state that you see in your salt water, you have the Gases in the room, in your lab, when you put the salt water and you create a nano material, this leads to creation of the fat on the top layer. So now you understand how life is created on this planet. **(2:25)** When the AA links with the P matter of this planet then it leads to creation of life, and in different combinations it becomes intelligent. The mystery of the creation on this planet is solved. Rick asks about creation of life in other Planets. Keshe: It is the same process. If you change the N to K you will get the same kind of life but you get a green blood and green muscles. The color changes because of the MaGrav field of the spectrum of the interaction. If man learns this from his own life you will understand very soon, they way the Plasma in your body is highly energetic and is transparent, what we call Lymph, you see life in the same conditions in different dimensions in the Universe. So don't expect to see life with 2 fingers or ten heads. When the gases section interacts with the P matter section what the condition of the MaGrav field of the environment allows leads to creation of life. There is life on moon created by the moon itself. Life on Mars is created by the conditions created on Mars, nobody has planted in there. When man manages to go in the inner sanctums of Saturn you find life in the same way. Because it is pressure and temperature independent, it is in Gans state; now the knowledge has gone further that we can speak, clearly and open. You can produce as much food as you like within your body, and you find that people who do these kind of things they live of the energy of the air of atmosphere. When the body finds its balance it can be a fat or slim body. The MaGrav field of the environment dictates how the rest of the reactors internally interact with each other. There is no mystery in life. **(2:28)** We are taking out this mystery and the use and abuse of this Religions in the name of God, in what is a natural process. When you can feed yourself we can go around and start to give the cup of life, just teach the Africans how to breathe just 2 hours a day and you can stay alive in anywhere in the Universe. But you have to receive what your body need to receive and is conditioned for, this is own of the major reason I said never enter another ship. What they need to survive is different then yours. People pray to God when they have empty stomach and pain and suffering, so when you can teach a man to be I wonder how many people will walk in different houses of different things. Rick asks if people learn to create their own food form their own Lungs if they still want to go to MacDonald's. Keshe: Yes, because there is a pleasure in chewing. **(2:31)** You've got to go back to the principle, in the first workshops. That is what I said in the craft of the future, we feed trough the environment. You've got to realize that the food you eat is just about 20% of the energy you use daily. Most of your energy comes through your Lung conversion, and that is why I said we feed people through the atmosphere of the craft. Rick asks how do you feed people for the gratification of food. Keshe: No problem. You have done it but haven't noticed it. You converted the gas of CO_2 into the Gans of CO_2, so now you have a solid Plasma. How do you like this white material and with what taste do you want me to put it. Do you like to be the shape of a banana, etc. For you to smell is a very simple process to do with the front of your face. I give you the smell of banana and you will taste banana with the same CO_2. Rick says that in the end of his fasts after 10 days he have more energy. Keshe: If you go back to the SSI, when we offer the Space

travel we said n these crafts we will not carry any food. Now you understand the reason. You can produce any material. You can do the same thing if you want to produce solid material in your body, you can concentrate and you can repair what you want to repair in your body, but that needs a lot of self-control and a lot of teachings to understand what is done. This is why some people say that had a cancer and ate carrots and the cancer disappeared, them everybody eats carrots and nothing happens. It has nothing to do with carrots, the condition you created that the energy was enough to change the MaGrav field of the information that comes from thymus which orders the solidification of the matter. So in that carrot could have fertilizers that carried information and due to stress you find out that your thymus… All the solidification like cancer and anywhere with different thickness and texture are decided by the thymus and the thymus order to the Lymph Glands. How much energy you put into it makes it softer. If Thymus sends not enough information and reduce the amount of the Cesium for cutting, then it becomes harder; so, in a simple process if you understood what I said in the last 2 sentences now you understand how we save and can eradicate cancer in no time; because the cancer as a solid material is totally controlled in the operation of the Thymus Gland and the Lymph Gland. I refuse to accept any volunteer which their Lymph Glands have been removed because how can you control the feeding when you take the kitchen away. The kitchens are the Lymph Glands and every part of the body have one Lymph Gland. The thickness of the material is dictated by Gamma radiation which is released by the Thymus. So there is no mystery of how you can change a solid tumor back to a liquid and disappearing in the body. The knowledge in medical aspects is so huge in the Foundation that if I release in one goal half of the doctors would commit suicide. **(2:38)** The process is very simple, you eat B12, deposit itself because is a Gamma source is a (??) of the body, partially in the Lymph and partially in the Thymus, and then the order… You've got to look at the structure of the position of the Glands in the body, why your thyroid is just under your throat and you have the Thymus immediately underneath of it? One sees, one decided what is needed, one adjust what needs to be received and read to be distributed and cut in what it needs; so the Thymus decides how gelatinous, or how liquid will be the muscle and then become the tissue of your heart or become the tissue of the muscle of your arm. This is what the world have not understood. You can reverse any cancer within hours. People say, why you don't use it… I am still alive. In the space I can not take all the pharmaceuticals and doctors. No one needs to go sleep in hunger, in fact the cup of life creates a Plasma at the level that can be absorbed by the Lymph, there is no Vitamin B or C. That cup of life is very much like the Eskimo which just eat salmon. The energy that he absorbs is converted by the Thymus and PG to what is needed around the body. **(2:41)** Now we start to open the knowledge, up to now the interesting was: can we have free energy? Can we have a Plasma to go to moon? But if you go to moon or Mars and you don't know how to feed yourself you are a dead man. This teleportation is rubbish, don't exist, we will teach you how to create the field box that you can move in a zero time. **(2:43)** A man says that he is eating less and asks if this have relation with him sleeping less. Keshe: The sleep state is a P part of the body, there is nothing to do with the real part of the existence. Questioner: Why you have different stages though? Keshe: because you need to repair, it is a service time. And even the sleeping pattern is more disturb then before. We use to sleep on the floor, not on this electronic mattress. When we sleep on the floor, you absorb the same situation, when the light is not there and the fields come,

the body absorbs a lot of energy through the fields which are coming from the ground; like the day and night panels. We came to the habit to sleep, there was the time when we could connect to the Earth and absorb the fields to balance ourselves; and the air you breathe when you are lying down is totally different then the air when you are standing up. As you change the rhythm of your breathing you absorbs different energies, in the same way you absorbs different energies when you are lying down. This habit has changed and somehow became part of our DNA. I sleep 3 or 4 hours a night, that is the maximum I need, but I find out when I go to camping, when I have to sleep on the ground, I sleep 10 to 12 hours, that happens all the time, because it means that I need the energy which is coming from the Earth. P part has nothing to do with the E part, even though they are in the same house. Dog and the man live in the same house but have different jobs. Man is the E part and dog is the P part. When the P part is in the process of repair the E part never sleeps because it is active and it cooperates, and it works in different part of the Brain, so you say I remembered a dream, this is part of the E part which finds connection with the P part in the time of resting of the body. That is why you dream about your brother and next morning he is in front of your house, because the Soul, the E part never sleeps, and is in touch with other Souls, other fields of energies and information and emotion. So that message is so strong that you pick it up and this just leak to the P part, and you remember in the memory part of the P part, and now I had a dream about you and you are here. This is how we will explain in the future exactly how the body works. The E part is the size of a 5 cent coin, and it has nothing to do with the P part, the P part take this 5 cent around to give its energy to which needs to survive and the E side of the body has taught the part of his structure to P part what we call the Neural System. One is a leach in the top of each other, and they share the environment together this is what you call the Neural System and Glands, which is a connection btw the P part and the E part. **(2:47)** Question about sleeping underground. Keshe: You don't go fat just because you sleep ten days underground and you absorb more energy. The body only take what need from that environment. That is a very good question I want to ask: I some people are claustrophobe? You don't change anything, just put into the box, just give that emotional feeling of being underground and they start to breathe heavier and different but actually they are at the same level. Then you understand you don't need a cave, because we are afraid that we don't receive enough energy, it is just a seed of taught which we have; because we see burying in the ground the dead at the end, and so we don't want to be in the position that we replicate the death. The psychological has nothing to do but it manifest in the P form. Rick says about the Pharaohs that would put themselves in that position underground. Keshe: You know some people put their head in the black bag. One of the members of England Parliament died of this some years ago. He changed the rhythm of breathing so they go to hallucination of death, and they create very much like taking drugs. You can go to high and the fear takes over and you have different experiences. You have to look from where the fear has come from. In most case is the fear of not being able to keep the connection btw the P part and the E part, that when the definition of fear comes to the end. Why you are afraid of height, because you feel you will die and there will be a separation btw the two. One of the things you see in the fear factor that affects the P and the E is we saw in the case of the coma in Belgium. When we brought back the P to E in Belgium, when the girl open her eyes, emotionally she shows presence, but P she could not instruct her arms and legs to move, it created a fear and she

went back to great shock, and it took us nearly a week to try to explain to her there is nothing wrong, and that was normal, that she would get her moves back to get her confidence. **(2:53)** One of the first things that I say for people here who deal with patients in coma is to cover the face, so that the face can not see the body, that the shock of not being able to see the P from the E part does not separate the 2 parts and gives you an emotional shock. The girl is still alive in Belgium. **(2:55)** We will announce if something happens in the lab. Keshe talk that he will tell the Italian Government first and the Iranian Government before make any announcement about the flight of the systems. Keshe talks about the officials that listen to the workshops, and that he need to be very careful about the release of the technology. **(3:00)** Rick talks about the revolution of drones. Keshe talk about his presentation in Eindhoven, and said that he had a car there that supposed to fly in the presentation. The officer looked to him and asked the flying license, Keshe said no, and the car needed to stay in the ground. These cars have been available in the Foundation for 7 years. **(3:08)** Keshe says to put the material from Keshe Foundation not in the main computer. But the change has come and there is no way to stop this anymore.

(:03) Marko assume and talk about the process of understanding on this technology, starting with Nano Materials, then to Gans and then to reactors. Talk about the importance to start to understanding things from fields point of view. Marko talk about his understanding about give, and take just what we need, the work of the Plasma. **(:09)** Marko talk about the new configuration of the reactors, and that they observed much more control over the system through this new set up. **(:11)** Question about what he means about sealed environment. Marko say that he can not disclosure about this. **(:18)** Marko points out about start to looking in our body the Magnetic fields interactions, and how we energize our blood and Lymph (as it was said in the last WS by Mr. Keshe). **(:22)** Question if they can feel the MaGrav fields. Marko says that he can feel some

interactions, specially with the people he is more connected; and that they are trying to manipulate with the mind the reactors and they are getting interestingly results. **(:28)** Marko says about the importance to train ourselves to not put violence not just in our actions but in our thoughts and intentions too, before we live this planet. **(:34)** Rick and Marko talk about the simplicity but at the same time depth of what they are doing and understanding. **(:36)** Ivan assume talk about the tests that they are doing with the reactors, and the amazing results; in one occasion creating the Plasma and in another occasion destroying the Plasma, which happened yesterday in the morning when they added Ar; but they could be able to build the Plasma once again, in very short time. **(:42)** Ivan talks about the importance about give the knowledge with Love. Ivan says that Mr. Keshe explained to them about the cup of life (not very much different of what Mr. Keshe explained in the last WS. **(:50)** Armen assume and talk about the cup, that this cup will give all the energies that our body needs, but first we must understand what Plasmatic field we are going to create. WE are trying to understand this new science. **(:52) Mr. Keshe comes in** while Armen tries to load the pictures of the cup of life. The position with these cups. When we released the Coke bottles there were many discussions about what was the liquid in the Coke bottle, when we explained how simply it was caustic it change a lot of people's mind how simple it is. Last night when I shoed the cups for the last time for the KS the secret with these cups is not the Nano Coating on it, but the process of Nano Coating. You've got to go to the structure of the human body and understand how when you are born life is given to you by your mother, you suck the breast of the mother, what you receive is milk, and milk in itself is composite consistence of everything you need to grow Brain, bones, intelligence, the teeth, and etc. You are receiving the totality of what the body needs. These cups that I showed to the KS are in color purple, black, orange, yellow and whatever color you can imagine. Armen wanted to know how we made it, so what I did, I explained that you have to understand why the color of the milk of the mother is white, so I brought the liquid of life which I built these cups in and the color is exactly white, is the color of the milk; it is not the caustic which we use and we've been used to, in fact what we embedded in these cups is the memory and the consistency of the milk of the mother; whatever you receive in the milk, when you have a glass of milk, each has a specific MaGrav field, and this is why the color of the milk is white. So I put the container where the systems were made and I explained why they have that shape and their lining, and the material you can literally touch, this material that I made the cup out of is very much like cream. So this is not a normal caustic, to build the cup of life you need to put the essence of creation in the original container, so these cups literally are the breast of the mother. As you receive all the nourishment through the milk when you are breast fed, these cups are built in the same kind of environment, it is not a normal caustic it is (??) let's stop the other things which I do because we understand the process and the intelligence of it, is very simple. So these cups are nourished and embedded in the milk of life. We allow the cup to have the spectrum MaGrav field of what the body of the man needs. A child does not receive anything but milk of the mother. So liquid for this one is made in the same process, as I said is milkfish white and the exactly copy of the milk. When you make coating each layer, each gap btw each layer is totally and slightly different from the other one, so when you drink from these cups you receive the full spectrum of the Plasmas. **(:58)** Somebody interrupts saying that this is the most strange thing that he ever heard in his entire life,

and that he is out of here. Keshe: Who is this on? The guy left. This is what you've got to be aware of, these kind of people are paid to be in these places, they pretend to be. We have been sabotage from inside the center which we will explain in due course later on. There is a lot of forces around trying to stop this process of giving knowledge. **(1:00)** Back to the Cup. The material is absorbs and transfers spectrum energies. The reason for the transfer, if you see in the pictures of the Cups, these cups are coated both sides. The reason for it is due to receive only what is in the cup, not outside it, at the same time when you live the cup empty, the environmental energy is received. These cups not only you can drink from, you can put your food on it and you can breathe through it, you receive the energy which you need through information that you receive through the Plasma conversion. These processes of breathing through the cup have been part of the development of the Health section for years, and this is what you've got to go back to the biological part of the technology. Your stomach is the feed for your P part for energy, your Lungs is your feed energy for your Emotions and the Brain part. When you breathe the energy which is absorbed O through the blood it is mainly for fast delivery, for fast operation of the Brain. That is why when you breathe through the cups you supply the energy to balance the structure within the Brain and when you drink or eat within the cup you feed the P part. How you can do it is very easily and you understand why these cups is made the way they are. There are only 10 cups made; the combination of 3 cups will give the food that you need, but what about chewing, you like to eat, you can eat and chew, but what happened you get fatter, because you receive what you need from the cups and now you eat more, you chew more then you put more weight on. **(1:03)** You've got to understand that these cups are not the normal cups as you made in your Nano Layers, these cups are in different colors and shades because it absorbs through total spectrum and what is not there to be released to the water inside the cup. You can not wash these cups, so then you change the structures. I explained why these things don't pass germs. Go back to your knowledge and your understanding of connection of the wires, even though you touch the P, the underneath layers are Magnetic field and nothing can be stopped in these layers, so if you have a germ and you drink from it and you leave in the cup you can not connected the two wires together, because of the Mag field separation btw the layers, the same thing happens with your saliva, so by just rinsing it you go to the next process, you can not contaminate these systems. People who work in the nuclear fully understand what does this means. It is used in satellites in the upper atmosphere, because in the atmosphere we have germs, and when they attack the satellites they can cause damage. **(1:05)** Keshe says that they opened the doors of the lab for the high level world scientists. Keshe explained to one of these high level people about why in the surgeries they do in the operating room, then when you don't need to touch the skin, and what you have to do and how you can stop a lot of pains, or if you cut the nerves how they can re-organize and re-connect at the point of the operation. He asked, why they don't teach these things in the medical school. Keshe says that from today the Foundation becomes an International Organization. For the next 2 days the Foundation is shut down by high security for Governments. One of the biggest problems that the Government have with us is how to disclosure the knowledge to the public. **(1:08)** We were supposed to go to Bulgaria and organize the things there. The KS will have a rest. Keshe talk about the reactors. **(1:11)** Two reactors are ceramic, but they have a center pin, no coating on the walls; and the other two reactors have a coating on the

wall and no center pin. This is the first time that we have gone to the 2 dimensional reactor. **(1:13)** When John comes back we go to the next level of the reactors, we will get a much smaller reactor, they will be rang, and then you will see a 3D interaction Plasma reactors. For the first time through Gans we re testing behavior in 2D; the reactors have been put on transparent plastic base where they can move any direction they like. Their fields forces internally that will decide their power. The size of the reactor is irrelevant; these small reactors can produce as much interaction as the (??) even more effective. The Gans is a Plasma state itself. We created the Nano Layers and then we used the Nano Layers to create the Plasma; the Gans is itself in a Plasma state. So it is easier to control and develop, the only problem we have in this is state is that the Gans are very much in combination of matter and Gans because of the way we produced, and in the future we will produce Gans in slightly different way, we need the liquid water to keep them suspended then they stay dynamic. Armen has loaded 30% of Gans and 70% water, in the process we can extract the water and add more Gans, but as in Plasma of other reactors we only created one type of Plasma from the H; I have to put in the right order that you might understand. In these reactors we have deliberately loaded different combinations of materials in different reactors. One reactor is loaded with CO2, one ractor is loaded with CuO2 and one reactor is loaded with CH3. As I said some people thought that could sabotage the work of the Foundation, they do much better for us. Armen spent some days making the CuO2 for the center core, and out of nowhere in the next day we found that CH3 and CO2 was mixed in these mixture, that it can not be used. The color has changed to darkshness green color, in fact these gave us the opportunity <audio break>… It has the field of all the three reactors and interacts with it very nicely. **(1:18)** In these reactors we have a mix of material which we produce in the orbits and the Mother carry the information for all 3 of them; but at the same time, because the CuO2 came from the same source as the Brain which is upstairs. Now we have not the control from here directly into the Gans center core, now through that we can control very easily the other 3 because the other 3 have their own source within the same material. The Ethos of this Foundation is in the base of Peace and the correctness, even the people who try to destroy us they give us a helping hand. This mixture of Gans is a gift they gave to us in their stupidity; that has been a help for us thank you very much. **(1:19)** We have now a Star Formation with Gans, then we have a SF of Gases with Plasma, and then next to it we have a confined environment sealed where we work with small layering of H. For the first time now we have 12 reactors on the floor next to each other. The Gans reactors are running at the high power motors, because we have to measure their property. The center cell is motor shut down by the Plasma interaction; and a confined unit is switch off, sometimes we turn on, and we discovered that switch off and on does not make much difference in the operation of Plasma. We turn on the motors again yesterday. **(1:21)** We keep the Plasma dynamic btw the 4 reactors without the use of the motors. If you look for the setting in the floor of the lab now we started with one SF then we added different systems combinations, then we added a second SF nest to the other one, and now we have a third SF added. In December hopefully the reactors will be embedded in the Health systems. **(1:23)** We have started to create dynamic Plasmas due to variation btw the cores. What I call the harmonic systems which is the back bone of the creation of atoms where protons and electron and neutrons join in all the structure the way Galaxy stays dynamic was set up yesterday here. There is a sequence of loading with N, and H. Now

that we have reached the Plasma condition, by creating different gradient conditions and different Plasmatic flow in each reactor as each reactor is connected MaGrav to the other one it affects the other one, now we have a Galaxy or iter atomic Magnetic flow. We don't need to have the motors to run now that we reached the dynamic Plasma and we have confined it. **(1:26)** All the reactors will be running in the holidays. Now we have seen in part of the operation that the field from the boundary reactors is constant. So it means that there is no field coming in into the Plasma. All the fields are directly from the boundary cores into the center core and to the center core into the vertical take of. So we are adding more and more Plasma pressure; from now on it is not going to be easy to get the balance point, once we get the balance point we achieve lift. We have secure everything through pallets, once the lift comes we can literally move on the platform and put the chair there. We have managed to create shell, we have managed to create atomic structure where the Plasmatic MaGrav fields, the 3 are feeding the center core, and the conditioning is been up o now that as the field of the center are released of the boundary them they found the connection with the center core and from the center core we could see an increase on the vertical forces. Now we see the boundary fields have totally stopped, now the interaction is totally internal btw the reactors. This is a major achievement. As the fields comes out from the center core, its surface feeds back to the bottom of the cores and it gets absorbed and increases by the Plasma and boundaries cores and it gets back closest to the re-feeding, and to absorbing all the fields conservation, what we call MaGrav conservation. We added Ar, and the Ar absorbed most of the Plasma or reduced the Plasma, I understand partially what and why it happened, this gave us an indication if we need to reduce our strength in an emergency all we need to do is add a dose of Ar to the reactors. **(1:31)** You do not know how much moisture is in the room until you put a plate in the room and cool it and you see the moisture sticking in the plate. It does not mean that the moisture wasn't there, you created the environment for it to manifest as a drop on the plate. The next step for us in respect to try to join the Universal Community is try to teach and show you what these conditions are, and what you think you were alone, you are not alone. The reactors after the holidays will be set to create en environment within the box that allows very much for human being for the first time to be aware of the existence within them that they were not aware of. We are putting that plate in the MaGrav field in a shape of a box form that man can start looking into the existence of the life in other dimensions. We created matter in the reactors, but now we create the next step. **(1:33)** I am no looking for a lift of the reactors, I am looking for facility and understanding of the system, that now we create within the frame the same condition (??). For the first time man became aware of other creations within the world of the Universe, within the man's environment. Before you go to the Space you become aware of what it is and what you expect to see and how you have to do the job to handle; so when we achieve this combination will make a frame box with the reactors in the lab that we can change the environment. When you see another SS you never go in, because it is set up for that life for that environment. Now we create the condition that suits them, to be in their environment but be the guest of humans. This is where we are going. We are fully aware of the existence. The purpose to go further with the knowledge is to be able to create a balance environment within a cubic environment that we create a condition that we can welcome the new existence that is not new, but for us to be able to see that; vapor in the solid state we recognize it. This is how

we become aware of others within the environment you are in the Space. **(1:35)** The next step is to be able to create that plate that man can see the moisture in P form, as an entity, intelligent, decision making and a friend. This is how you introduce people slowly to the reality and for what the Foundation is set up and the way we were. I can produce this today but the man will not understand it. My biggest sorrow is how this stupid people used the key we released and they used this Nano material, they are using our technology clearly from what we released to show it in a military, to show what it can do. We know how it is done and we know the military application of it. **(1:37)** This knowledge can be used in both ways and we have seen it. Keshe talk about the meeting that he went with his friend Dirk about the dark materials (Nano Materials). **(1:40)** John talk about the things that need to be arranged with the motors. Keshe says that the motor is behaving like an electron. **(1:43)** John continue the talk about the reactor. <the connection with the SSI drops> **(1:46)** John talk about the data about the fields created with the reactors. **(1:48)** The connection with SSI is back. **(1:49)** John continue the talk about the values of the fields of the reactors. **(1:53)** Lucian ask about the connection with the wires in the reactors, if they were Nano Coated. Keshe: They were Nano Coated. We use the coating for the transfer of Plasma from one core to the other. When you deal with Plasma you cant deal with matter for transfer. Lucian ask if the wires will be oxidized. Keshe: Why they should be? Even if they get the oxidization it will be only in one layer, you have thousands of layers on top of each other. You still have the transfer of the Plasma through the layers. If you are not using the nano coated wires you keep them in a box. Remember, the whole Nano wire doesn't turn green. It turn greens in certain spots, and that green comes through the gaps and holes where the Cu layer interface you get the oxidization. I always say, keep and don't touch it, in a box. **(1:56)** Even when the immersed the whole wire or a plate in the salt not all the gaps or all the surface is CuO2, the gaps and the layers on the surface change. So not the whole thing becomes CuO2, and at the end the air in the air moisture, you don't get that much of oxidization anywhere. Lucian ask if once the Plasma flows btw the reactors the nano wire will be… Keshe interrupts: will be useless. The Plasma goes through the layers, not around the layers. The oxidization doesn't come from the top layers, it comes from the interface btw the matter and the Nano. Lucian asks if when it is oxidized the process will stop and create an interface. Keshe: Yes. Lucian asks about today's picture. Keshe: This is something that Armen made. This has nothing to do with our work. **(2:02)** We need salt to create organic life in this "tree" Nano Coated. That is what they say, that life comes from the sea, we were fishes. Because the interaction of the upper atmosphere with the water, and the salt content and the metal content in the water has lead to the creation of life, that is why we are dependent on the water. Rick asks about the ignition key to start life. Keshe: The ignition key on Earth is the H. Rick asks if it is not related with lightning, the form of Plasma as we know on Earth. Keshe: No. If you look at the Nano Layers and the way the transfer of information and energy is done even in your cells where there are salts and links that you create your energy; the minute you connect the Nano layers and the way they are done, the energy transfer comes within what is absorbed btw the layers of the nano coating and the AA and the H movement, that is how starts from. This thunder and lighting are too high voltage for life, for existence of life you need a very, extremely low Plasma flow. **(2:04)** High voltage. This is the mentality of the man, everything needs to be big to be something. **(2:06)** When you make these Cu wires and put in the salt water,

when you look at it your process is not chemical, your process is a Plasma transfer, so you don't see any plates or Cu wire to get the material which is left on the other side, when you collect that material as a Gans. I was trying to explain to Marko how the energy comes through the Lung. This is in book #5. In the first book I explained in one chapter where and how the energy is transferred, and it is in EV in very small amounts. All the releases of molecules in the body are in Plasma form, not in matter form. When you have the interaction in the system you see the release of energy, very little; and that energy that Plasma releases. Maybe next session I will put this formula for you to see how little this energy is. **(2:09)** Why we made this confined tests for the reactors. It is because the condition that the Nano layers have enforced at the Plasma. For example, the energy core is not in the setting this time, the energy of the reactor is taken out, because the center core is nano coated in both sides; so it interrupts all the fields, even the Plasmatic fields. When we added Ar we saw problem with the detector, in this situation we have created in a sealed container we have released cosmic energy, because it was so rapid, it cross the boundary and immediately at that level affected the work of the detectors, both in 3D, it was a wide damage because it was facing the reactors. It is very much like the explosion of the Sun, the solar flairs of Plasma releases in rapid way. We created that condition and we saw how it interfered with the work of the detector. For the first time we see the creation of Cosmic Plasmatic fields in the lab. You release very small but very powerful energies. **(2:12)** We had a inherent problem in the two small reactors. Because there is a groove built by John in it we had to put a rubber O-ring in it. Keshe talk about the mistake that was to put the rubber O-ring on reactors, that when the reactors were working in Plasma condition the O-ring became like a chewing gun. The Plasmatic field interact with the electrons and protons of the O' ring and change the structure. There is a lot to learn. **(2:15)** Lucian asks if the CO2 will be pushed for the sphere by the center pin. Keshe: I don't know. Lucian talk about his experiences. **(2:17)** It's very interesting when you mix the Plasma, with the matter, with the Gans. They play different games, one of them becomes the intermediary, one sticks to one and other stays separate. Question about the use of Cu Gans for the interaction with the reactors. Keshe: You've got to go to the biological understanding of the structure of the body of the man to understand this. The fetus, it's blood and motion and work separates the Cu in the blood and in that process that Cu converts and sets the condition for the creation of the protein what we call the Brain structure. You need that Cu in the fetus to set up the beginning of the building of the human Brain cells. This is why in the body of the man in the P part, where there is no nerves in the red tissues, the Cu takes the job of the link and information. If the scientists take of the nerves and create the right condition in the muscle you will see that the nerve system will be built on its own. You can re-establish the neural losses through the right combinations out of the Cu in the red tissues muscles. So, here you have that Cu basis connection. **(2:20)** Partially how you connect through the reactor is through the structure because is the part of the structure of your own body. So, when you sit down in front of the ball, or put your thoughts into the ball, you have to have a matching receiver. Because of this Cu that have in the body of the man, which is replicated n this process in the ball in the lab you already have a pre-destined line of communication. **(2:22)** <lost connection with Mr. Keshe> **(2:24) Keshe is back.** I was explaining how we communicate through the systems, through the reactors through your body and thoughts. So your Brain have part of the structure, because it came from the Cu,

so you already have the link, the common denominator link with the Cu, and that is how your Brain was established. I explain this in the book #5. Keshe talk about the books. **(2:30)** Sandor says that when he open his reactor have a strong salty odor. Keshe: This happened here. I think that the salt saturation became very high. What you smell as a sea, we see in our reactors attached to wall of the reactor, literally the salt grows. But there is a difference btw the salt and the CO2, because when you position your electrodes in the right way we see structure of the CO2 hanging, like a white powder. This is not salt, this is Gans state of the CO2, but you see the salt totally separate. As the AA are in gas state and change to protein, they do not immediately sit on top of the water, they are still in molecular gas state, till they touch the salt water, then they change into the combination of matter in manifestation, so when you have the evaporation of the water in your lab, as these vapors come up they capture part of the molecular AA in a gas state <audio break>… The gases do not automatically as become the molecule of AA or protein, they appear on the surface as fat layers. Just above there is a molecule of AA in a gas state where with the evaporation of the water, they manifest themselves in the salt in the vapor as AA, they sit in the wall of the container as they grow out. So the vapor you smell as a salt is a natural vapor, but if you have created a CuO2 green you find out that the salt is not very white, have Gans of CuO2 in it. **(2:34)** Rick asks if it is safe to breathe the part of CuO2. Keshe: Don't forget that Gans state matter is part of the material that we breathe constantly throughout the environment. I don't say that it is safe to breathe because they can say that they got sick because I said that it was safe to breathe. We breathe these kind of things as a natural process. There are more golds in the ocean that man ever found as reserves in the land. There are more Cu and Zinc and everything else floating in the oceans, and the condition they have been and coming through the same vaporization they go. Its part of our lives, we breathe, its part of the energy we receive. It is the same process when we breathe O and go to our blood cells. **(2:37)** This is partially the process of life. These materials that we breathe according with the position that we are they affect the DNA and the structure of the DNA, that is why we have different colors and shape. Because we don't just breathe the air in that area, in the environment that we live in we absorb the energy very much like the Gans of matter which are floating in the environment. Sandor says that he feels a cool wind when he opens the container. Keshe: I never closed these things, so I can not tell you. We have seen, since we started been operating the Plasma reactors in the lab, that we have changed the environment in these containers. Rick asks if maybe Sandor needs to leave the containers open to facilitate the interchange with the gases of CO2. Keshe: We did a test in Belgium few years ago. We vacuum the whole environment, and we put nano layers hanging in this chamber we did tests before hanging. Then we introduced CO2 gas into the environment, then the scientist did the electroscope in the electrodes and it was shown that CO2 was encapsulated within the layers of Nano layer; so when you make it available the layers will interact and then covert, or when you make it available the MaGrav field within the structure, attracts and holds and then coverts in conjunction with the salt into the Gans of the matter. **(2:42)** Rick asks how the DNA interacts in those circumstances. Keshe: I partially have explained in the book #5. One of the ways you can do it… You can test the develop of your DNA and change your DNA, and the work of your body as a Gans in a matter state GAns, by using different liquids of your body into these containers. I will not go any further on it, but you can do all sort of things. In the future you will be able to

make a copy of your own flesh. In future I will teach you how you can change these fat layers into a chicken, in a P sense. I created in my container the condition of the milk of the mother and that is what you see, and the first 12 cups of life are already on the table. **(2:44)** Rick talk about meteorites and how they have cosmic dust that it is not found on Earth, and ask if these materials would be useful in a dynamic reactor. Keshe: You can use any material, as long as you can bring it in into its Gans state. If I put bunch of stones in the reactor I get nothing, but if I can change the structure of the atoms of the stone into Gans state, then I can use the MaGrav field strength, or what you call their fingerprint to create a reactor which absorbs only that stone to itself. What they call inter stellar or btw the stars, cosmic dust, in the structure most of the comets travel to the outer boundaries of the Plasma of this SS, and as we send MaGrav fields into the cosmic environment we receive the same. The reason you see life on these comets I have explained clearly in the book #4. In environments of the SS they have a slightly different structure temperature, these elements freeze on them, they manifest on them, and then as they come back, this is why you see all the time that these meteorites have a tail, a vapor tail, the only reason is that every time they go to the boundary of the SS they attract thousand of tons of these materials. They are actually a dynamic Saturn or Jupiter. So, they keep on passing the Earth for so many years, and you call Star of David or whatever, this tail of the meteorite never finishes, because in the orbit they are like an electron, when they go to the boundary of the SS all the MaGrav field of the Sun in that layer is so weak that it changes to matter, it is like the egg shell, but the soft egg shell; and these meteorites with different MaGrav fields as they go through this egg shell mix, it is like when you have a plane and you go into the clouds and you get wet, because you absorb the moisture, these meteorites get these molecules, mainly of H and He attached to them, and in this mixture there is part of the cosmic MaGrav field that gets converted into matter and in this level you have everything. It is the same interaction as we see in the surface of the Sun and the upper layers of the Earth. The interaction btw the MaGrav field layers of the Sun with the Earth in a specific zone and level leads to the creation of N. The same happens in the Solar structure, in the boundaries of those layers you get matter. **(2:50)** You see Aurora in the North pole, and if the meteorite come through them we call shooting stars. The same thing happens btw the outer boundaries of the SS and the Galaxy. **(2:53)** Rick says that scientists have found that there are a stellar particle that goes through stars, and some of these are in the meteorites, and ask if this would not be interesting to inject in the reactor. Keshe: The thing is, if you gonna start a star as an ignition key, you already must have reached Plasma, so you already have the essence of it. If you just change the position of the four reactors in the lab you have a Tritium. If you can manage to imitate the condition of two reactors exactly the same, one slightly weaker, you create Tritium. If you can withdraw or keep this single neutron attracted or busy somewhere then you have no radioactive material in the containers in the waters, so what you do with this neutron, if you can extract enough of it you lead to creation of new materials and you can start a SS, because neutron on its own if you can bring it to a Plasma condition and add them together you start the life of a Star. The Star does not throw materials out, the stars throw Plasmas which are the fingerprint of its own Plasmas, the materials become weak enough and they become the manifestation of that SS or that Star. **(2:57)** Rick asks about the Supernova. Keshe: The condition of the Supernova is again the fallacy of the fusion. The material becomes matter from one star according to the Plasma they release. Supernova is

what I call neutron division to a proton and an electron, because internally it can not hold the balance so it split. When the neutron divide we don't get bang in two pieces, we get residues, energies and some other MaGrav fields, because they are not needed. So now you call these residues interstellar stones, or life or material. Its again what they call God particles. These residuals become God particles, and they appear themselves as a cosmic dust, now they are weak enough that through interaction and friction with other MaGrav fields in the environment to become matter. **(3:00)** The destiny of this SS is written, is finalized. So when the two stars hit each other, its not that nothing is gonna left, they become one bigger mass in the center, it is a amalgamation of Plasmas. This is what we try to do now in our reactor cores. In a way is a inter-fusion, because they originally came from the same thing, one is a proton and the other is an electron, but due to the forces, and the way the Universe works they go back together again. **(3:01)** The creation of Black Hole is the destiny of the Earth, read the paper that I wrote, in the book and you will understand. When the two come together you get a big Black Hole and you get the residual, we compare one sun to a black hole and it absorbs other stars to it. We saw this Supernova condition, releasing of Plasmatic fields yesterday in the lab. **(3:03)** A man asks about using his own urine in salt water in his Gans. Keshe: This was what went through my head, I was going to suggest this. When you use the liquids of your body you will be amazed with what you will see. If you want to understand the state of the body, never test the blood, blood is the worst thing to test. Test the urine and see what comes out, it gives a very good indication of where your body is. Saliva is incoming, what you are rejecting that counts. You've got to see what you reject. **(3:05)** Question if the material can be use to fix something in the body. Keshe: If you ask somebody to give them their breathe, like asking: can I suck what you breathe out. Your breathe out what is already converted, because before it become a matter state, so they've done half of the job, you need less energy to convert it again, because your body uses a slightly different thing then their body rejecting. At the same time you find out why we kiss each other, and why a man and a woman when they kiss have totally different emotion mental state that when kiss a son or a daughter. This is the psychological part of the work. Even breathe gives a good indication of what you need, and how and what you absorb and what you need to absorb. In breathing you give the information to the partner of what you expect to receive, because it's a level which is given directly affects the emotional part because the Lung is for the Brain. This is a lot of things for man to understand why we do things the way we do. What you call interaction of the material of your body with its environment if it absorbs it then you understand why you behave so different, and why we behave in our interactions with other creatures and other entities. What you live out and what you reject is not what you don't need, but in a way your body has already processed in a way that it can absorb it. There is a lot to learn. Next time you kiss your husband or wife you think twice. **(3:09)** Lucian asks about the H atom that we can measure but what about the other elements like C. Keshe: In the reactors now that we have isolated as a SF, because now we are taking so much data, we see now that certain adding of H to a reactor gives us certain figures. This is how we measure the atoms of Gold, Ca, etc. We see the figure and this is the boundaries, they are about the same. We have already started that process. We can say what is the Plasma structures of Ca or K. **(3:14)** We have a detector inside the container environment, and we have a detector outside looking to the behavior of the Plasma inside the cage. We see the interaction of

the whole container with its environment. We can see when is the behavior of lets say Cu, and we can see too how this Cu will interact with Mg if you create an environment of a Mg, what measure will be so we can produce and expect what will receive. Rick asks if a proton can be measured. Keshe: It depends on the environment. The size of a Plasma of a proton can be inside what you see as a matter or can be the size of the room you are sitting. Depends what MaGrav field of the environment allows the Plasma to grow into. **(3:16)** The behavior of a Plasma in a funny way is the same as the behavior of a gas. But the gas fills up the environment, but with the Plasma you've got a central core principal which holds it together as well. You can have a gold of the size of this room as an atom, or you can have in the size of the ring. On the surface will be the same, on the bounder of matter state will be the same. Is what you need and what you allow to happen. **(3:18)** In a Health point of view: The same Lymph takes different directions and different sizes, but it's the same size Lymph. This is why I support Chemotherapy, because I understand this. A Lymph when receives too much energy grows, expand enough and when it sits on the bone literally kills the bone. Bone Cancer does not exist! All it happens is that the Lymph cells grows big enough that when they attach itself to the bone the bone can not receive and be used for its purpose. It is like as I said with Marko, let me sit on your lap for two days and you will see the (??). You suffocate, you block the receivement of minerals to the bone. So is very easy to reverse what they call Bone Cancer. This is understanding the structure, it is the same cell but where it sits and how big it becomes. In the Plasma state you take the size accordingly with what the environment allows it; in the cancer term when you use Chemo you put too much energy in the Lymph, so it grows and get bigger which can not go through the hole of the bone to become bone marrow. So in a way it is like you put your hand in your mouth, you can't breathe. Working with a Hospital in Germany we have managed to reduce the size of the Lymph so that the body can work and the bone marrow operates normally. We work very correctly with number of organization and they proved that we are right.

21st Knowledge Seekers Workshop – July 24th 2014

- **Main topics of this Workshop**

    - **Update About the Reactors**
    - **Replicating in the Reactors the Inner Core of the Earth that Contains Not Only Matters But Contains Plasma and Gans.**
    - **Talk About the Tests with Gans Materials**
    - **Yukako Left**
    - **People Leaving Foundation and the Understanding About This**
    - **Encouragement to People Create Foundations All Over the World**
    - **The Simplicity of the Systems**
    - **Everything in the Universe Works in DC**
    - **The Free Energy is in Your Hand**
    - **What You Call Free Energy is Not Free**
    - **Using the Voltmeter in the Nano Coated Wires to Re-Align the Flow**

- **The Difference Btw sp2 and sp3**
- **The Coating of the Cu Wires is the Same as Your Nervous System**
- **It is Not One Way Direction in the Wires; It's a 2 Way direction.**
- **Nano Layers Create Their Own Atmosphere**
- **The Same Plasma Holds the Properties of All the Elements**
- **The Plasma of a Neutron splits into Plasma of an Electron and Proton**
- **Understanding How to Tune to Different Planets and Positions in the Universe**
- **Interaction Btw the Planets in the Solar System**
- **The Interaction Btw the Soul of the Man and the Soul of the Planet**
- **The Gap Btw the Star Systems and the Galaxy Systems is the Place of the Souls**
- **"Zoos" in the Space to Save Creatures of God.**
- **Using the Media to Enslave People**
- **Nano Layers Grows Back On When Scraped Off**

(:00) Mr. Keshe is alone in the SSI today. **(:02) Keshe comes in.** We try to catch up with what we have done in the last moths. The research here doesn't stop because it is an alive situation; we can not just shut down and go away. We have 3 SF next to each other running, one is in Gans state, one is in Plasma state and one is with the Plasma and gases that we feed them everyday. Even with the unit we have sealed we see in the past week how the MaGrav field of the system is interacting with the outside, without any motors running. By turning on the gases units a lot of fields are getting draw to that unit, we do not know clearly why. **(:05)** At the begging of the set up we started producing Nano Layers, we converted the Nano Layers to Gans and we used the Gans for loading last reactors; these reactors are very small and made of ceramic, two are coated internally with Nano layers and two have the center pin nano layer. We have to study its behavior when we open up. Other sets are made in totally different way, where when we coated the nano layers sheets they glued back on the cores, and pinned in the center and then we used gas layers to create the Plasma. Now we have 2 systems which are made of half and full spheres but using Plasma condition through gases and we are using in the new system Plasma in a Gans form in mixture with water. When we don't introduce water in the Gans state they tend to stick together, the water is like a lubricant. The difference btw the 3 systems is that now we have a Plasma in matter state creating interaction, the others is the Plasma in state of total Plasma. The interaction btw the Gans and Coated Nano layers will manifest itself in coming weeks. In the Gans state reactors, we filed in four cores in combination with 4 different matters, so in the 2 sets with the gases is only one state of Plasma. In the Gans state now we have a very peculiar situation where we have a fixed Nano coated Mag layer and the we have Gans which are themselves Plasmatic inside rotating, we have already created double Magnetic field. **(:10)** The one with the coated layer is a replica of the internal inner core of the Planet. This means that this core which got coated layers with Gans and liquid inside it will behave exactly like the Caroline core of the Earth. The inner core of the Earth contains not only matters but contains Plasma and Gans. We've got to see how each of the two reactors behave. We had an incident here. One core carry CO_2 another CH_3 and the other CuO_2, so we literally have created here 3 planet different in respect to the center which got a mixture of all three together in

it. We are interesting to measure the fields, to see if they are higher or lower in respect to the CO2 core, CH3 core and CuO2 core. This is the first time we achieve this mix combination and will give to us a good indication of Planetary Systems and Galaxies. This will take years to unravel and understand. The data is very solid and constant. My understand is that the Gans Plasma will be more powerful systems, because they are mono materials and they are dealing with million of Plasmas next to each other. **(:14)** I switch off all the motors, no electrical current flowing. All the interactions are totally Plasmatic, and is interesting to see how much we lose and gain. **(:15)** Question about the mixture of Gans in the reactor. Keshe: We don't know how this material turned up to be. It was a blue color material and Armen washed and suddenly changed color. The material due to change of environment of Gans could have changed the property. We have to be very vigilant in respect not to be narrow minded. What I see at this moment is that the dark material is the combination of the 3. **(:18)** Even though we are in a very secure position we are still open to sabotage, we have to keep open eye of how this happened overnight. **(:20)** Now we go to 3D control, somebody will sit 50 meters away and try to change the MaGrav field of the system, which is instantaneous. This is fairly possible. We have to see if we affect the inner core, the center core or just the core which have CuO2 in it. We had to built systems to be able to do direct research. **(:23)** Scientists of the highest caliber have seen the technology, they were shocked on what is on the table; for the first time we have made Science simple, practical. This is the major point that we have achieved. We have showed that energy is not the main focus of the whole structure of the Foundation. Now we show that Plasma can be maintained and created at no cost. With the 8 reactors we are running the replica of the Planetary System. **(:26)** Marek is pushing things to see things, in time he will receive everything. Properties have to be seen independently. Up to now a lot of research and evaluations has been done by us paid by governments. **(:29)** Rick asks if people can help, regarding with tests. Keshe say that at the moment every week he is sending materials to all over the world for Institutes and Organizations. They will do another test in Fukushima. **(:32)** The situation in Fukushima has allowed the Foundation to be recognized, this is very important to us. **(:34)** The Japanese in Fukushima were trying to explain that they were trying to unit the Nation, like Kamikazes, they say that they need to find a solution to unit the Nation; surprised Mr. Keshe to see that they have no boundary to help. **(:36)** Keshe talk about the development of the technology with the Japanese. **(:39)** People come and go and they give us gifts. One of the situations was the coming of a beautiful woman called Yukako, she came here for totally different reasons and she stayed with us for a very short term, she left for different reasons but she is still with us in so many ways. She brought the gift of Fukushima and I thank her Soul for that. You have to understand the Japanese culture, she is devoted to find the solution for the Nation and a lot of people talk a lot of rubbish. A lot of officers watched what she did in Japan. She left us and I did not heard from her but I wish all the best for her. **(:43)** Because we work in a way of gift, even the people who come with the wrong intention give us gifts. Keshe says how much gifts Belgians left to them. **(:46)** The process of decontamination does not end in Japan, its all over the world. **(:48)** We chose people here for the purpose they are born for. If they think they do not get what they are here for, and they leave it means that they spent their time and service here. There should be no envy. We started to see different applications with different people, and people who could not do things or they did and serve their way for

the time they were here that was the reason they were here. It means that the time is not for them to be here. They've done their job, it doesn't matter what they write or what they did in the past or in the future about the Foundation, because the Foundation is you, if you damage the Foundation you do us better because more people understand how narrow mind people are, because they all look for their own self interest and what happen to them, but not as a totality. People will come and go, everyone have a short span of life, we do what we can. People who came here to learn only about one subject because this is there specialty and they don't get them somebody else gets it, it means I see in them a different beauty, but they don't see themselves. To them realize themselves is to them to find out. The core of the Foundation now as a KS become 3 or 4 people and they literally are doing the job of maybe 200 or 300 people. The amount of research done here is very much without the boundary. If you expect that the knowledge would be out of your country, set up Keshe Foundation on your country, build reactors and pay for people to be there to do it. People say: why the Foundation is in Italy? Finance your own Foundation in your own country. **(:51)** We were in Belgium and now we are in Italy, what happened with the Belgium scientists. There are 1 or 2 reactors running in Belgium. The time has come from people go from individual people to groups. Question about why we are dividing countries in borders with these reactors and not sharing to the whole world the knowledge of the reactors. Keshe: I think we've done this. I was told from couple of scientist: Do you know that you are throwing away millions and billions of dollars by spreading like this on internet? I said that this is because it is not mine. People pay and donate to us and we accept it. We have no boundaries. It is said that each country will set up their own systems for its own nations, because of your own short sight on it, and you can not put people in your area together, they blame the foundation asking why we are only in Italy. There is a set up Keshe Foundation in Bulgaria. **(:54)** If all the KF supporters put one Euro at term, to build your own reactors, your own center, you link to us you give us information and we will give you information. All the individuals who are in Spanish, Portuguese, Chinese KF start build their own centers. We are not Institute with closed doors that we talk secretly. We build the reactors in the morning and at night I send the pictures on internet. No institute in the world has done what we've done. You have created the boundaries by your own work, not by us. The Chinese have such a power KF in China. Millions of followers around the world build their own center by their own. We give the whole knowledge, now you've seen it, its getting processed to make your own solar cells. One of the first things we can do to generate funds for your Foundation in your own language, start building the first solar cells. The Solar cells should be able to be built by everyone, you have the materials, we taught you how to do it, the Italians will produce the first, I hope that we can show you in the next week. **(:56)** You are waiting to be fed, you are little chickens. We see here in the park these sparrows, the baby sparrow is as big as the mother but still wait for the mother to feed him, because he got used to be fed. You blame us we don't teach everything, for years you wanted to do the Keshe liquid (??), we shown that. You cant have access to gases, very simple, now we are doing test with the Gans; spend 1 Euro buy the caustic, coat a few pieces of wire, I am sure that you can find some coke bottles around or few buckets, create your own Gans, I am sure you can go to any place. Use the toys of your children, coat them, put little Gans in it and you ca start your own system, how much does it cost, 10 dollars? **(:58)** The first reactors we built here was with half bottles. I did that deliberately to show

the simplicity. You were looking for vacuum pump, gases or whatever, we have a short cut, we did the tests here, we shoed to you… Even if producing Gans is to far for you, you can produce energy from the first things you did. When you put those Cu wires and they got coated, if you connect these Cu wires in a small section of 10 or 15 cm, you have to sandpaper you hand, to get to the Cu, and you connect enough of them, you can generate enough energy to light your own home, with less then 50 cents. Armen and Marko and Ivan were testing this in their table just the day before they live. This is what I do with the torch. You see the torch, we showed, there is no magic in the torch. You are waiting for the Italians or the Japanese to make it? You already have everything to be energy self-sufficient, but you still look for Kilowatts, the time of Tesla is finished, go back to Edison, go back to DC, Tesla with his brilliant mind, the way he has given us on AC, was when we did not understand the way of the Universe. Now we understand the work of the Universe, now we can replicate the systems, and everything in the Universe work in DC. The problem that Edison had and he lost the game to Tesla was because of the transmission of the power, he needed to boost every few km. Now these materials are superconductive, they don't need any boosting. **(1:01)** We've seen how one of our patents have been announced in farm (??) that they have discovered a low temperature material that absorbs 99,9%, ok you made the copy of the Keshe Foundation in public, and now you announced that you have made a material which you already showed as a black dark material. What does this means, this black material? What does this absorbs? Absorbs 99% of the light spectrum. Ok, a question mark. Energy can not just be absorbed and go nowhere, it has to go somewhere. Even the wires which you hold in hand and continuously absorb energy to stay dark black, there is a leakage somewhere, and otherwise these layers would explode. You find that leakage and you store and you tap into that energy which these layers absorb. Now you connect them in series, you have different values of voltage in current, you put them in parallel you get different values of voltage of current. You mix the series and the parallels connections together, and you achieve the power you need for your system. Be one LED light, be it the power of the computer, etc. People have been asking for free energy, I have been given to you and it's in your hand and you don't see it. It's your fault not mine. This is the greed of man, has blinded the man. **(1:03)** The first wires you coated and you put in the bottles in the lab is your energy source, and you never saw it. When I sat with the Japanese I said: you see the wires btw the switch and the light? Just look how many little wires are in btw it, you cut these in a space and connect them in a right way, you can light the whole house with one wire which is lighting only one light, because we have to change our lighting system from AC to DC, LED lights are so in hand. Armen will set you up a system in no time. This is what is gonna come up. You have your first free energy system; what you call free is not free, its just understanding the structure of the black material, the minute you coated those wires in caustic and let it dry, and that is the reason, I tell you when you take the wire out of the caustic the first time, and put the voltmeter on it, is to re-align the flow, that is why you do it. When you make that energy system to absorb the energy out of them, they all go in the same direction. This is one of the problems we saw in the lab with one of the settings. The flow reverses out of nowhere, because the wire has been put in the wrong way. When you set up your wires to connect with each other to make your energy system to tap into a battery, you can put a big rechargeable battery if you want, always remember which way you put your voltmeter when you were setting it up,

because if you used one back to front then you find problems sometimes, in most of the cases you don't, but in some cases you do. So you connect your wires to put in a re-chargeable battery, but the advantage of this is that this material stays black all the time, day and night. It absorbs all the energy day and night. You understand the structure which I explained to you in the past workshops, you put your cell near the ground. You absorb all the MaGrav field of the Erath which is coming up the Earth, more at night. So you've been begging and insulting us, asking where is our free energy and bla bla. You had in your pocket from the first time when you put your first wire in caustic, but you are blind to see it. The wire that they want to dump in Africa, that wire connection from the plug to the end is such an energy resource for you that you can sell it to the West, sending back the material. **(1:07)** Every 10 cm of Nano wire have the same capability as a 2 meter, because the balance of the layers btw the Nano Layers will not allow anymore changes and absorption. The longer you are the less you absorb, but in another hand you absorb the same as the totality. What we have found is that the maximum, 10 to 15 cm of wire is the maximum that you need. You make sure in what end you reach the Cu layer, that there is no Nano layers left to replicate the production of layers of Nano Layers, connect one Cu to one black, put them in series, put them in parallel. You do 10000 of them, 0.5 Volts or 0.02 microampere. Now, how many amps you want and how much volts you want. You have your free energy. Now, as I keep on saying we are going to Space Technology. Development of the reactors is all part of the higher development in lift and motion. Anywhere in this planet, if you understand this should be without light or energy. Go around your house, see how much wires are hanging around, spend your free time doing units and give to your neighbors, not yourself first. Then you stop blaming the Foundation. **(1:10)** I don't do magic. Now you have been asking for the liquid of the Keshe Foundation, the liquid of Keshe Foundation is secret to energy and food, I showed you how to make food out of the same piece of wire very soon. I give you things but I don't sit down to make things for myself. You think I can't make 200 LED lights and light the whole house? You've been with me everywhere, have you seen such a thing? People who talk about things that are always negative, I think they have to go and lie down or sit down till they understand what they are doing. The time of negativity is finished, now you can contribute positive into what you have, if you want energy there is enough for you. You find a re-chargeable battery in your house; make a set up, a 9 volts battery, what can you light with a 9 volts battery. Then teach yourself the next step, and the next step, and do it for your neighbors. The research for man to understand the totality will take 1000 and 1000 of years if you go that way. The way we are doing we have (??) by nothing. Man use to give his knowledge in talk stories, from grandfather to grandchild, and that was it, when one died there was no one left. We learnt to add the skin of animals and we learnt to print. Now we do the same thing passing the knowledge through internet. There is no need for papers to write, sometimes you do, but now you record a voice. **(1:13)** Now we teach in a very simple way, you have to do the research. I have opened the doors of the new way to look at the life of this Planet, even though this time is very short. Temporally keep the ones who are short mind and the narrow mind busy, but in long term our plan is totally different. The whole structure is, you've been asking for free energy, have you been coating those wires in your lab? Find yourself a battery, that you can store a micro ampere into a small battery and connect to LED light, then you have the light, this is what we did in Holland in the lab. You've been crying for

free energy and telling that the government has done you wrong, majority of you should have light in your house by the end of the week. If you knew what you are doing, or you are just sitting here waiting for a bigger thing. It needs time and it needs a lot of work. People who want to be given everything, those are the people who are incompetent so they have to stay in that position. The people who understand should develop and as I said before, you are very fast to make, make one for your neighbor. I made the systems I gave to the Italians, Italians are making the first prototype and the commercial type, the Japanese needed, where are the Americans…they have done nothing but jut causing problems to block the technology. Where are the British, Africans and South Americans? Keshe says that talked with some South Americans. He met the ambassador of some country and they agree to give this technology for the scientific community first. Governments of the higher level understand what we are doing, but they don't know how to handle the situation. **(1:17)** For six months the KS never measured the current in the wires, and they found out now that they measured that the current was there. I showed the torch to the KS last week to see what is made of, is one wire connected to another into a storage battery. You can produce 1kw 10kw, if you have the patience to connect every single piece together, but there is something very interesting, one of the scientists in Belgium, did a very interesting experiment, he put the wire in the water and showed its capacitance. If you can put these wires in a pure water with no minerals, you can the absorption of the energy by your wires. So if we can create a vacuum environment and filled with pure distilled water you can increase your absorption much higher, because you can water will slow down, and then enough fields that Nano Layers can absorb. There is a lot of effort to close the KF power cell in Belgium. **(1:20)** The KS here work in their own time, they come and they don't want to leave, they put things together and with their limit knowledge and I have watched them slowly, because you have to teach them slowly to them to understand and put the things in front of them, they devote their life and time to serve. They share and teach and language is no barrier. **(1:21)** Sandor asks about the methods to create Nano Materials and can we control the process to be sure that we created Graphene within the Nano Coating. Keshe: Any material can be made into Nano Layer, you don't need Graphene. The flow is plasmatic not electronic, by electrons. When I speak about sp2, sp3 is about conductivity. Sp3 is a diamond structure, is a resistance, sp2 is conductivity. Even CuO2 have sp3. There is a small problem in my use of language because I speak in both way sometimes, scientific and common language, when I speak about sp3 we speak about diamond structure which is a resistivity, when we talk about sp2 its about conductivity. The same Carbon, the same coating, if you put 2 wires together you find out that the current flow from one Cu wire will never go to the other. I use to show this before, I use to put a battery in the coated wires together and put a Christmas tree light at the end of it, and the Christmas tree use to flash. That is sp3 combination of CuO2 molecule sp3; but the current which flows through the layer use the speed to formation which is the conductivity. The same C has both properties, depending where you look and the connection within it. **(1:25)** The difference btw sp2 and sp3 conductivity and resistivity, it is exactly like a road, if you cross the road you have to stop, because there is a lot of cars going. You can not drive a car across the road. That is the sp3. Sp2 is the road itself which the cars flow down it, is the same road. It is the same thing with the structure of the molecule, just because it is non-conductive and its speed structure when you go across it and put the wires together, that is sp3; and sp2 is a super

conductive when you go along the length of the wire. There are zero losses in the sp2 Nano layer conductivity. This is been the dream of the world of science to find super conductive at room temperature and pressure, and this is in your hand and you don't see it. If you put these wires in a very high temperature (??) and you empty the Cu from the inside you have the best Nano tube in your life. These tubes in the future will be used for healing and connecting Neural Systems, because they behave exactly the same. But those Nano Layers which you make will be from AA Nano layers, which you can replace and position in the nerve system when it is cut. This is what we are going to tech, later in the medicine, part of the medical application; because they are the exact structure. Down through the layer you have a super-conductivity and in the crosser layer you have resistivity, that is why you can not weld or connect two Nano layers together and become conductive. If this is a bit far for you to understand, get 2 wires which you already coated, twist them together as much as you like, as many time as you like, and then connect at one end, you have to rub off the coating of the Cu, connect one end to a battery and connect the other end to the light, and then you see that the light will come up; which means, in the normal conditions in the wires, in the cable if they touch like this the battery or the lamp should blow off, but nothing will happen, you will see the light coming on, but there is one thing you might understand that these Nano layers are Gaps and holes, and the batteries which you buy as a DC battery 1 volt, these batteries create an AC current too. All the batteries you use have an AC current flow as well, that AC current flow when it goes through the wires you see sparks, because they create a variation in the potential, so you might see heating of your wire, that heating is not due to DC flow, is due to AC flow; but as you are absorbing just Plasma and your are not connecting you only produces DC. It is very easy to understand this. If you make wires for your systems you can make like a battery going up and down in the same environment to make 1 volt or 1,5 volts battery. **(1:30)** Keshe talk about the reactors and cups for the use in Health applications. The reactors are getting smaller and smaller. The size of the reactor is irrelevant, the field they can produce that is important. **(1:32)** Question about the vacuum of the reactors. Keshe: We are doing now in the close boxes, in the closed box we creating a Magnetic flow through the Plasma. If you can create different Gans and put them in rotation, you can create even gas Plasma in the center. The rotation of these Magnetic fields and different Gans will give the dynamic rotation of your Plasma inside your core without any motors. This is how its done in the Universe. Now if you can put even the same Gans in different cores and different rotations, and you can judge the distant of the fields they produce then you can start to create a dynamic Plasma or rotation of Plasma without any motors inside there. We were testing why the blue half circle reactor create so much field on the top and not at the bottom as we were expecting. We started from next to the core and we came out, up to a certain distance, something like 10cm the fields are going out of the reactor, and immediately in a micro-layer they go reverse. It is a very simple gap; up to that 10cm the field flow is outward, and at the center boundary, which is the atmosphere of the reactor, it becomes receiver. That boundary where the micro-layer is, btw the two, is a boundary of the atmosphere; this is where the MaGrav of the systems find their balance. This is the egg, the shell with the yolk and the white inside of it. This is what we call atmosphere. Inside that line to the center of the reactor is the atmosphere of the reactor. This shows how the Planet work. Due to their MaGrav field they absorb field from the outside and vice-versa, not all the

systems got the MaGrav field absorb, but they radiate, because there are energy coming from the center. These are more powerful, these are the stars. The continuous flow forces their field outward. **(1:36)** So we have seeing the first formation of Plasma round our reactor as a MaGrav cell weeks ago. We put the detector near to the skin of the reactor, and we moved back very slowly, at that point it reverses, and it is the same all over the reactor with a little variation. So that point is the boundary of the atmosphere, that is the shell of the MaGrav field. **(1:37)** Question: If you have the Cu and use the salt water and create the CuO2 in the water, don't have to cover your Nano coat wires, it will seal it… Keshe: Hold your question and let us answer everything in detail. The sealing is not a hole which gets covered. The sealing is the sealing on the level of the MaGrav field which can be absorbed by the nano layer. It blocks the field to reach. Here you have to move away from that position of matter into the field. It's not a hole that you fill in, is you block the fields to absorb, because the Gans itself absorbs what is own its way to the layer. Questioner says that he was trying experiments with white Gans with the Zn onto the Cu coated, in terms of CO2 Gans, would be a different MaGrav field then what the Cu would be, so there would be spectrum difference, so wouldn't be sealed for saying, right? Keshe: No, you just blocked certain MaGrav boundaries to reach. CO2 does not absorb all the fields which are in that environment, they can only matches on, or nearest to it. It would be very interesting if you could see the layer gap btw the CO2 and the Nano layer. Questioner says that he put in 5 layers of a foil of Cu and CO2 Gans. Keshe: If you can find a microscope, observe the gap btw the Nano Layer and the CO2, it never touch., the only point which you would find the connection btw the Nano Layer and the Gans is where you have minerals, like Ca, which make the connection btw the 2 layers. In a way the Nano Layer is the Sun and the CO2 is the Earth, and where their MaGrav field balances, because both have Plasma MaGrav field, that gap is the strength btw the two, and whatever can cross that gap would be absorbed by the Nano Layer, but now you limited it, you put a filter on it. With CO2 you created a filter. **(1:41)** Your Nano Layer is super-conductive and your CO2 is a super-conductive as well, you make a sandwich, it is like the battery. I have done this test with the Coke bottle. **(1:42)** When I was in the nuclear center in Belgium the doctor tried to prove that the energy you see is fantasy, fake, but he never understood a Nano Layer. Whenever we saw energy through the nano materials he said that it was all false. **(1:45)** Man ignorance has not change from the time when they killed the first man when he said that the Earth is not the center of the Universe, now this became bigger; bigger egos and bigger tools to accuse. We showed the Nano Materials and how the Universe works and the structure of work of this, that you produce energy have been the cause of us to be accused of using nuclear materials and the KF are terrorist organization. **(1:47)** Lucian says that the storytelling style of Mr. Keshe is creating a lot of confusion and asks about the polarity that changes and how you do the orientation. Keshe: The orientation is done; it has to be when it is wet. When the surface is wet you usually can fix the orientation. I have a 60 cm box, I put crossed wires on this, like a dry clothes, and a mash plate on the floor. What I do is I hang all my wires on these wires, like drying clothes, and when they are wet, usually you can even put your Voltmeter in the atmosphere of the container and you see a charge flow. So you decide which way you want to go. I hold one end of the Voltmeter in one and I go to the others one by one, I don't keep on moving it, so I try to create one flow direction. I have a problem, because my wire goes outside and then come back again into the container, so

my flow is reverse, so I do in the reverse way. Every time you do this you see the plus and minus changing. We even see the changes on plus and minus in our dynamic reactors. When it is wet I can achieve more direction of flow. **(1:51)** Lucian asks how he do this. Keshe: In the box I keep one position, I don't go with the two ends of the Voltmeter to the wires. I keep one wire as one reference and with the other one I go along the line, whatever is on the way. You find out that if you touch the ends of your wires while they are hanging you create half ways different flows in the wire. Check this, because sometimes you see it. You are dictating the current flow in your wires, this is how your nervous systems works. **(1:53)** Lucian interrupts and says that we have to understand the Physicality, and ask if the bottom where is the liquid is never touched. Keshe: Yes, never touched. You've got to realize another point, go back further down the line. The coating of these Cu wires is the same as your nervous system. The Nervous System does not send information only to the finger to open up, but it receives if it is hot to close. So these wires work accordingly to what the environmental energy is to. It is a 2 way communication; the flow will not be just one way. This is superconductive and the potential in MaGrav field dictates the direction of the flow. You can make a battery and you can make wires connected to each other and you say it doesn't work, go back through the wires you connected and find out where the switch is. Somewhere you have twisted too many or you have changed the environment that is slightly different, the flow changes. These are very much like a vacuum system but the MaGrav field flow potential difference should create the flow. You are dealing with two characters which are not tangible. It is not an electron flow, it is a Plasmatic flow. The same wire can change polarity, depends which end the potential of MaGrav field is higher. **(1:55)** Lucian asks how one could test the orientation of the Plasmatic flow. Keshe: The way I've done it. I have a core, I have a torch which you hardly can see any light in it, because one of the wires inside is done at the wrong way, I didn't threw away. The way I do it, I keep track how I lay everything; which end I cut from the beginning, which way I hanged, etc. Over years I learned this. **(1:57)** Lucian explains what he do. Keshe: There is something with these cheap Voltmeters, sometimes you find that when you put in DC in the Voltmeter the AC flow (??) to be very effective or whatever he does internally and the meter become useless, I don't understand why. Lucian interrupts and talk about a solution for this. **(1:59)** What you see positive and negative in your Voltmeter we see in the Plasma reactors the same. Plasma reactors sometimes absorbs energy and sometimes they become supplier of Plasma, and because we have a power supply, the Voltage gets back into the power supply and the power supply gets damage. This reverse flow does not happen just in Nano Coating, it happens in dynamic Plasmas too. One of the meters in the lab is already damage because of this. Change of polarity in the Nano layers and the Plasma is a common thing. **(2:03)** The change of polarity happens because you are dealing now with a dynamic situation. You have created a miniature of Earth, and each one has to find, North and South of the neighborhood to be where it is. The change of polarity of the Earth is not entirely on its own, is affected by other planets in the environment of the Solar System. Rick says that he was able to change the polarity moving his hand closer and further away from the container. Keshe: When you put your Nano Materials in the box and you close the box when they are drying go with the same meter without touching any material, start measure the environment of the Plasma inside your core. Go btw the nano layers which are hanging, you will learn a lot. In an open

environment you have those changes, but in Nano Layers is much higher. **(2:05)** A man talk about an experiment and Mr. Keshe says to him post the draw of his experiment. **(2:07)** Rick asks if C or Graphene is not really used or necessary in the current technology for the Nano coating. Keshe: We don't have a Graphene, we use Cu Naona coated. Rick asks if teher is any final material that could be on top of the Nano layers to protect or isolate them. Keshe: No. Rick asks for the orange oil that they put in Nano materials. Keshe: The oil is for penetration in the matter. They use in the washing powder. Rick ask about what Dirk did to protect the Nano layers. Keshe do not know about this… If you can stop the absorption of fields on it, this is by the presence of physical matter I presume. Rick talks about putting one atmic layer of C to prevent the oxidation. Keshe: Because you create a MaGrav field which literally sits next to the atomic structure which itself is a MaGrav, so it do not give space for the O get in. Rick ask about the risk for O enter in the reactors. Keshe: This is what we are doing in the ceramic reactors now, we have a Nano Layer coated, we have put water and Gans in it, so we have everything matter and Plasma all in one confinement. **(2:11)** The interesting point that we have seen in the Nano Layers is that they can find the Plasma. What looks to be more prevalent for production of these Plasmas through gases; it will be mainly center pin systems coating or covering the whole lot. In the systems we usually set we use pieces of Cu from different batteries, in the new systems with the half circles Armen has brought the sheets with him and we have one sheet, so we don't have different gaps and layers in btw glued pieces, so we see more effective system in the coming weeks. But would this give us continuous flow, we don't know. **(2:13)** Actually Nano layers are the protective layers, they are creating their own atmosphere. It is like the Earth atmosphere they don't let anything to get close. You create atmosphere in that layer, that is why they look like protected, but they are actually a MaGrav shield sitting next to each other. Question: If the Nano diamond coated is a Nano Layer itself it would not allow the metal in the surface to be able to be extracted to be able to make that oxidization… Keshe: I will tell you a very interesting point. If you put the Nano Layer under a microscope and at the interface of another layer or its field and its environment you will see a very nice bright white light. Even down the Nano material look black to us. If you have these aurea detectors you would see a line around your wire, a halo. You have the day light along your wire. **(2:17)** Question: what kind of Magnification are you talking about? Keshe: You've got a machine you tell us. We are going to release this aura very soon. Questioner says that he can not see the light in the pictures. Keshe: Go deep enough and you will see, you've got to expand, it is very fine. Rick talk about ways to see the aura. Keshe: it is very fine line. **(2:19)** Lucian ask about if the structure when it is in Gans still is in molecular structure, like C atom with two O, maybe the distance btw C and O are lower to balance the fields… there are not anymore individuals atoms, which I don't think this is happening because it still absorbing the CO2… Keshe: No, this is exactly what is happening. The same thing I explained about the reactor of John, that at a certain point you see positive to negative; lets go inside the core, to the point of balance. Every position from the point of balance where it change position to the negative to the point of its environment has a different value, 9 cm, 8 cm, 7 cm… 9 cm is the CO2, 8 cm will be lets say C only, or O. Within the same Plasma according to its MaGrav field, the same Plasma holds the property of all the Elements, depends on what the environment has accepted to be. You don't get different Plasmas of H two of O sitting next to each other,

and then they become together and then they rotate. This is the structure that you are used to in the present Physics and Chemistry, this all interact as one and go internally according to what it is and what field has been absorbed. You don't cross the energy of an O across the Stomach and the energy of a C. The energy of the totality crosses and then becomes O and CO2 or whatever or Ca in your Lymph as a package. Lucian says that is confusing; asks if the protons are mixing. Keshe: The Plasma. You change to Plasma condition, not individual entity condition. Lucian says that we are calling protons and the neutrons if they stay there or are they are dissolving. Keshe: It is all one, MaGrav field energy of them, becomes one. I think it is in the book #3, I explain this in a simple way. The neutron in a MaGrav field, and the size of a neutron in this Universe is not necessarily the same in other Universes because of the conditions that are created in and under. The Plasma of a neutron splits into the Plasma of electron and a proton. It is the same with your CO2, the field inside a neutron is enough to create an electron and a proton, but is one entity. In the Gans state CO2 becomes the same, if you splits into the matter then you get your separate C and O, but when it is in the Plasma state it is one. **(2:25)** Lucian says that they preserve the same mass. Keshe: Exactly. That is why we see the Ganses or the material in a matter (??). If you understand this point then you understand how you can tune to different planets and different positions in the Universe and get attracted or rejected from. Lucian asks about the medical part, how come one through a technical device split exact what he wants? Keshe: You create in the environment a balance for He or C. In the Lungs this is done automatically. The structure of the Lungs allows that release of He from (???). In time you will learn. **(2:28)** The splitting into sets, like a C or O or H, can be arranged by outside parameters. You can dictate what you want to absorb according to the mass you create, this is the same with your flight systems, you create MaGrav field or the mass of the position you want to go to. It is like the Ocean, the water is the same water but there is a specific you can go, the GPS point, you can find according to the mass in that point. Nobody in the universe is the same, two similar points, unfortunately or fortunately. Like the atom of a C, how this becomes a Gans. You are used to position of electrons, connection of molecules. Just go back to the split of the Neutron, it will be easier to understand then gradually try to understand the next step. A Neutron is not 2 pieces inside and one is proton and the other is electron, it is the same entity and always split to the same 2 packages, you always gets an electron and a proton. The CO2 is a molecular structure; you have the same in the atomic structure. We are using Tritium as a Gans state because it will be fantastic for production of material, and there is enough Tritium in the waters of Japan to give us that opportunity to test this. **(2:30)** Lucian asks if one can calculate the MaGrav field correspondent to a specific mass can design such device? Keshe: Yes. You have to do it when you are traveling in the Space, if you want to go to the moon you donnt want to go somewhere else. Lucian says that he was speaking about the O. Keshe: It is the same. There is no difference; it is if you want to work with milligram or kilogram. In the lab we have 2 detectors, one is for very low and the other for very high, but at the end is the same field measurement that we are looking for, one is used for metals and the other for tissues and Plasmas. **(2:32)** This is the problem, you don't have chickens and horses, they are all chickens, but they have a small chicken and the big chicken. The Plasma of the Gans in different materials there is no difference btw that and the position of the Solar System. This is the restriction you have put in your own intelligence, open your minds

and you will see it. You have all the knowledge in your hand to do anything at the moment and this puzzles me. **(2:34)** A man did test with Iphones, trying to take picture of the aura, but it is not so good. Keshe says that it needs high quality equipment to do these things. Keshe talk about the equipments to see these interactions. **(2:35)** Keshe talk about the Kids Knowledge Seekers, teach children about Plasma. **(2:39)** Question about what conditions on Earth in the past allowed to dinosaurs and other lives to grow. Keshe: The MaGrav field strength was weaker, in respect to the position in the Galaxy. We are on the Magnetic wings of this Galaxy, we are in a far further back position, so there was more room, even the atmosphere of the Earth being the same had a bigger and more freer envelope to float in. If you want to see practically you start to look at the structure of the Gans in your system. You can pressurize the Gans and see the Gans in different dimensions. It is not a vacuum condition, it is a MaGrav field condition. Now that we get more and more to the center of the Galaxy, through Gravitational pull of the Galaxy to the center, the environment is less compact, the atmosphere of the Earth in hundred millions years ago was different and the size that it is today. Some reminiscence of the old times with big animals still stays, mainly in animals within the water which are more immune to the outside atmospheric condition, we see whales still carrying heavy masses, and the elephants are getting smaller. As we move to the center we get constrain by the other fields. The same process is happening to the planet Earth, we are getting pulled to the center of the Sun, to the center of the SS which have a heavier mass. This allows different materials to be created in different points of the Universe. **(2:43)** <audio break>… When you change into matter you change from Gravity to inertia, and that is a big difference. MaGrav is an attribute of a Plasma condition. When you change to the matter state you attain inertia, that is exactly the same thing but is within the structure of that shell. You don't add to the mass of totality. **(2:44)** Question about if we still could be able to see densities of the rings in the trees like the Earth layers. Keshe: That is possible. If you look for the Geology structure of the planet, will show you a lot in where we've been and what we went through in the SS, and partially what the Galaxy have been given to us in our structure. Part of the absorption of the materials in our planet comes from the inner core, is what he absorbed from the Space, from the environment of the SS during our travel from the outer boundaries to the central core. So we can see in a way what to expect in the surface of Jupiter, because it absorbs some material which are converted into matter. This is something never looked by the Geologists, because they considered that we always have been in this position. In this Planet we used to be in the position of Pluto, that is where we started, and as we get dragged into the center, we can absorb more, we become a Jupiter and then Saturn and the Earth and Mars, etc. Question about since everything is in the same scale, the planets could not interact with each other and change positions? Keshe: It will happen. It changes the position. You find out that some planets which are ahead of us they use to be behind us and ahead of us. Not just by collision, but by the MaGrav field forces outside the SS. So, let's say, Earth could be in the place of Jupiter and its interaction has taken the position of Mars, or Venus position. You create the condition and one finds the balance. I've showed this with the magnets in the table. Question: You are dealing basically in these cases with huge reactors that have a lot of potential, Plasmatic energy… So they could have a discharge of energy btw two planets or other planets, is this possible too? Keshe: It happens all the time. Earth and Jupiter are directly connected in respect to their position in their field strength. Jupiter

would not be in that position if Jupiter was not in the position that it is today. **(2:48)** We have now gone to the 2D motion of the reactors, The reactors up to now were fixed, because of the plates or the legs, the new Gas reactors are on the roller bases, rolling legs, so the field strength of the other reactors when they run can change their position. In the coming months we will hang these, so we literally can use the center core as the Sun and start to understand by changing gases, now we see changes in the numbers in the meter, very soon we will start to see changes on the position of the reactors. Keshe talk about the reactors and how very soon they can replicate with them the conditions of the Earth. **(2:51)** Question about sound wave and structure of the Plasma and if these sounds from around would not interact with the structure of the Plasma inside. Keshe: Of course. What is the sound? It is a Magnetic field. When you add a sound you bring homogenous condition in it, you bring harmony, so the reactors and the Plasmas and the Gans will all set within the new environment. Question: And that sound can structure the Plasma…? Keshe: Of course. <audio break> **(2:54)** Question about putting a man with heart condition (??) with a health man if that should alleviate the condition. Keshe: I don't know, it is like the old man who marry very young girls, why does it kills them. You know that. Look at the totality. Lucian says that he is asking because people who have valves that sound like a clock so if you put a little mechanical device could improve the brain operation and the situation of the patient. Keshe: I will not make a comment on this, I know exactly what are you talking about because I lost mother through the same problem. The heart valves have a certain life spam and when the time or the life spam expire the heart beat changes, and change the dimensions and the interactions within the body and then sometimes you have it because of valve failure and in most of the time, some other cases due to change of the gravity in the circulation of the blood and the heart beat, the MaGrav field which create leads to cancer, usually you find cancer of stomach or liver connected to it. These valves have a life spam of so many years, being mechanical, or pig valve, etc. I've been looking for the valves regenerate themselves, it is possible but at the moment creating that create other conditions, but yes we can allow even the valves to repair themselves. **(2:57)** Hopefully with the Keshe Foundation in Malta we will make different systems. One of the problems with the change of the valves is the two arteries which feed the brain through the neck, and this is something the doctors don't look at. So what happens, your heart is bumping blood to your Brain and you have a restriction in those two arteries. When these gets restricted the doctors make the copy of the size of your neck take the wane out and literally scrap with a spoon to get this Ca and all the residues which blocks. With the machine they find the baby in the womb of the mother with the ultra-sound, they go to your neck and they measure the restriction in this wane, but the biggest problem that the doctors never understood, is that the minute you see the obstruction find a way to clean it because as this grows put pressure in the heart. So this put pressure on the valves and then creates a second stage valve problem. A lot of heart valves failures and replacements specially on the valves which are the feeding line of the blood to the Brain comes from this restriction. If the doctors understand this, you clean in the minute you find out this, you find a way to clean it. This restriction creates the valve failure and then you need to change the valves, literally when you put the heart valve you put a life limit for the person, because these are mechanical systems and they can fail and if they do like a pig valve replacement has 10 years life spam. The minute you see a restriction of the artery to the Brain please does

something with it. We need to release the blockage slowly, because if you release all in one goal it can cause damage in the Brain. We've done this and the knowledge is available for the medical people to use it. The other problem with this operation is that when they do this cleaning of the valve they put a clip, so if its left a residual before they put the clip, when they open, and when they solder the artery, the wane and open the clips for the flow to the Brain, a minute amount of material which is left in the vessel goes to the Brain and can leads to some sort of paralysis or other Brain damage. **(3:03)** Question about the frequency from Jupiter that has changed in the last 30 years, what could explain the change in the frequency of a Planet? Keshe: Frequency is a matter, not a Plasma, is the matter which is on it, detected or produces it or in it's core. The material changes. The changes in the material I have seen in the reactors. It is very much like the Lymph, the Lymph does the same and creates the same fields, but when it gets to the point it changes to behavior of Ca or Na; becomes part of the AA as a molecule. The planets in their rotation and the materials content inside them can change the matter, so in one sequence if you have lets say Uranium, through the interaction with the inner core and the conditions creates only Plasma, increases, because of that activities everything changes to Plutonium. So now you have a different frequency in the matter level. Change of matter in the center of the core in a very normal procedure, is the same of what happens in the body of the man. The frequency changes because they have to observe what is been and what condition and how it has changed, to what material it has changed, through that you can say in what the center core has changed into. Each material has its own frequency at the matter level, so you can say the change of the condition internally. Question if this change of frequency can happen not because of something within the planet but because of the interaction with the outer interactions. Keshe: Yes, more or less what they have created what they allow to do. We see now in the confined Space that we have created in the lab, we change gases in one core and we see the changes in outside the box, in the detector. But frequency has to do with the matter level and what they allow, but is mainly the material inside that changes quite a lot. **(3:07)** There is something very interesting that I was teaching to some Spiritual people. They questioned what happens with the Souls of this planet if happens a catastrophe, they all disappear in one goal, the 7 billion of us? As the Man has a Soul, so does the Solar System, so does the Planet; we add to that Soul, so the Soul of the Man adds to the Soul of the Solar System, and the Soul of the Solar System adds to the Soul of the Galaxy. Soul is not exclusively and bound to one condition and one direction. So when the situation happens you are like a molecule atom in the structure of a molecule of an AA in the structure of the Human Body. The Soul of the man is connected to all of it through its fields. As a piece we are one Soul, but as a total Soul we make the Soul of this Planet, and this is the way we reach you, we don't reach you through individuals; we reach through the Soul of the Planet. Then this Planet on its structure creates a Soul for the Solar System, it's the same thing, independent of entity Physicality. The Gap btw the star systems and the Galaxy systems is the place of the Souls. I will show the Soul of one of the reactors very soon in the lab. Once you create an entity and I tell you pray for it, it has a Soul. Because the entity makes the decision itself to share its fields with the others to stay in balance with its environment, so is a decision maker; it has a life. There is a question that is raised, what is gonna happen to humanity when we reach the ultimate point of this Planet. What is going to happen with all these beings if we whatever. We have started teaching the Man to find his own

salvage and his way out of this Planet before the ultimate point; if we manage to reach that point, then we become part of the structure of the Universe, the way with the others. If we do not reach and we see the blocks, the way that have been set up by the governments and other people to stop the process that they want to be with the materialistic level that they are, as a lot of you speaks about UFO's and flying sources and we are becoming members of this Space club. What have we done as Human Beings? I always say, look at the parallel. When the animals became extinct or about they become to be (??) extinct we go to the jungles, we go to their environments and we pick them and put them in the zoos, at least we have one, or we keep the DNA. So the zoos have taken the place of the jungles where we can keep, the environments which we have destroyed. If we do not manage as a Human Race to be out together in one form and achieve it very rapidly there are those who keep zoos, or keep environments to save creatures of God, that one day they can find an environment for it. In that case, all these that you call UFO, each one of us as we can not live in their environment, each human being, most probably most part of the World Leaders will be the first one that they will keep, because they keep the top dog (the best line as you say), will become prisoners in these cages, in the zoos of the Universe, till they find a place where he can live. This is not a threat, this is a reality in the Universe. As we keep zoos, that this animal died, so many pandas left, now we keep them within the zoos, or white tigers to preserve them and send them to another zoo, in the Universe there are zoos which the creatures are kept till they find a place for them. So my talk goes directly to the World/Religious leaders, you will be the first ones in these zoos. If the humanity doesn't come together in one goal, in a unified way to develop and allow Man to stand in the integrity of the Human Race to people who are there waiting for this event to happen to save us, they are not here to damage. The World Leaders will become the monkeys in the cage of the Universal Zoo. I hear people say that the Pope is about to release some celestial thing in whatever Space, the knowledge is freely know, as much as there are visitors, there are the people who save the Human Race but then the man has to be kept in an environment of themselves. You don't put an elephant where you have the penguins with the water. In the zoo you create environments where the penguin can live on its own and the elephant can live on its own, and each one gets fed accordingly to its environment, and nobody goes to the jungle of Africa and bring one left cripple sick elephant, they take the best and they bring it, so my message goes very clearly, the World Leaders will be the first animals in the Universal Zoo. If as Humanity we don't come together and we don't achieve this point very rapidly the World Leaders will be the first animals in the Universal Zoo, and they will wish that they could have done something when they were there in the position of power for the rest of the Humanity. This is not a fairy tale, I open the files for you to see the Zoos very soon. This is why we started to build the cages, that we can create the environments for other things to be seen within this cage within the lab of the Institute. We don't tell you all in one goal, as we showed you the wire, you are still looking for free energy when you have the key in your hand you already been there and you will be there. World peace through Governments and Religions has to be achieved in one goal, and there is no use punishments, those who are doing the killing now they are going with the planet, because that is the point to be. Treating children in the name of Religion or imprisoning people, the people who imprison 1 million people in one corner and they (??) very soon those people will stay with the rest of (??) this planet. Decision has been made and we will

carry out. Question: What about those of us who strive for understanding of the Universal understanding? Keshe: We will choose by the Soul, we will not choose by the color or the Physicality. We are aware of the Soul and what is inside you. **(3:17)** If you are born with no legs and no arms, that is how he lives but he has a Soul, and the whole body works for that Soul. P is irrelevant. The World leaders who incite wars to get more money to be more powerful will make the best animals in the Universe. We don't keep the savages with the tamed animals. We are making the book open the book very slowly, but very clearly. Keshe says that the position of the questioner is saved, and let me explain to you why. When you go to a country you always go for the leader, because this is the symbol of the nation, when the time comes is the same with the World Leaders, they will make the best examples of the Universal Zoo, not preservation, but to show how bad it can be. A lot of presidents will be interested to be in the Universal zoo, because they can not mix, the environmental condition is not there to be done. These Illuminati, whatever you call them, the ones who want to control everything, your savage is in bringing the humanity with your power together that you will not be in the cage alone, but you will be in the condition, in the community in an environment where you are with the others. They put a lot of people in confinement, they become the prisoners of their own creation. Integration of the Religions in this Planet is needed as fast as possible not because we have no answer to it, it is because this Religious Leaders will become the monkeys in the Universal Zoos. **(3:20)** Question: What about those of us who have gained understanding and create our own lift systems? Keshe: Those who managed to get in that position… You are know through your Soul, so you become part of the structure because you are the same. If you put all the World Leaders into the machine and get them into the Space they will not go very far, because they will be eliminated by the knowledge that they know what they are caring these things for. So the craft which are carrying guns and whatever, they are aware and they will be eliminated. The habits of the man has to change from killing, because we don't see the body we see the Soul of the Man; and if they are hoping that will be a craft that will take them out you will go not very far from this Planet, because your intentions are know, so why should they allow you to create more mayhem? When they can change you directly in the position you are. This is not the only situation, it has happened before and will happen again. There are systematic works for these kind of things. We don't let a few animals change the peaceful position of the Universe. When you take over a country you take the leader. Mr. Keshe says that his call goes to the Religious Leaders, and he address totality even with the world leaders. **(3:25)** Question: How can we stop the killing? Keshe: Pray for the Soul of the people that by elevating their Souls they understand their mistakes. That is all you can do, why does a child has been born yesterday in Palestine orphan? It is a life which will grow up most probably by an abusive mother in law, or somebody else to give her a chance to live, and forever she got to know "what if I had my mother?" and the hate of the Israeli who killed her mother, so that hate carries on, why? That is very strange, we breathe the same thing as we do. If you look at the behavior of the tribe on Israel, they are not doing anything less then what the Moses did, is the behavior which is carried on to be seen as the right. You read about the life of Moses, he destroyed every man in the tribal who supported him and brought him up. So what the Jews are doing with each other? They are killing the ones who gave them life and supported them for thousand of years; just because somebody is making arms and making others enemies, why? Why does a

government like British spend so much millions of dollars to open the BBC world news? In Great Britain Keshe said to his father that these BBC world news were the new tools of war, because now they use the media, they don't need to shoot a bullet, they create conditions, the words of war and put two cameras and then do their revolutions and all the killings, and in less then 20 years I proved to be right. In the past when they use to take slaves they use to attack them, and captured them and slave them to America, now they use the media. **(3:28)** We take the Love of God from your lot and then you know what it means to be paid for. If you do the punishment what happen? As Mohamed says, Bless be His name. We took the Love of God from Israel from what they did to Christ, and we saw that they desperate like nothing around the world, no home; and with the Love of what is given back to them we have seen what they have done, they didn't learn so there is no need to repeat the same. The same things go with the followers of Mohamed, Bless be His name. They did wrong and they receive their punishments from the followers, now that has be (??) that is called the equal. You don't have time because you have a human body, you have all the time in the Universe. I hope the World leaders listened to this program, and we know they do, so they can change their mood and their condition. **(3:30)** John assume and say that they are still working with the reactors trying to set up the systems. **(3:34)** Keshe says that Armen have the heart to make the step further. **(3:36)** Question about the homework. Keshe: Lets see who is going to have more powerful systems before the Japanese do. Don't forget when you coat your wires you have to make sure that the end which you use has to be fully rubbed of any coating, it is very hard, because these coatings if they are not properly rubbed they can redevelop, and then you find out you lose your connection. Spend a little more time to make sure you do a job and then you fin out that you can add as many LED lights as you like to your system. Make sure you don't put your wires on top of each other or very next to each other, because it can use the AC of the system, or create a AC condition, that discharges your battery. If you can make a system with seven LED you have enough light. If you have a Cu wire in the house, about 2 meters, it should give you a good lighting. Sandor says that he understood that is a problem to make a good connection once the Cu is coated and he talk about the experiment that he did. Keshe: If you look at your Coke bottles the Nano grows all the way out, in time it grows. It is like a skin, it grows both, vertically and diagonally, so the best way is to detroy the fisrt layer which leads to the creation, and if the layer creates again you have to rub out. There is a way to stop growing the layers on it, I tried but sometimes it works, the end layers that you don't want to coat, you deep them into acid from the battery from the car. Sometimes it works but sometimes can damage the layers further down. **(3:41)** In the spherical globe we've done coated with liquid and without the liquid, and we see better results on the liquid side in the night time, but it depends where you are and what the conditions are. Keshe talk about the night and day panel with the liquid, and says that this technology is now in the hands of big Corporations. **(3:44)** If you want to make a layer to attach to your Nano Layer maybe deepen in Ca and then make a coating on this, because this is what happens at the bone of man as well.
>>>

22nd Knowledge Seekers Workshop August 7 2014

Finger in gans, tadpole to frog going back to fish?, Don't touch or eat gans, Oil not from plants comes from atmosphere, Starts the process of life on earth, How to coat wires, also with insulator on, then take off after coating,
A Nano is created with Caustic, heated, it creates a separated atom of Cu in a ball, no contact with next layer, only Magrav force between the two, generates a current. then add Salt, you get a gans, CuO or CuO2, separation of atom from wire,
Create Plasma of Lymph, repair broken bones, Cup of Life absorbs all fields around but you take what you need not what is absorbed, Need to pay attention to color, what spectrum is absorbed then to make a plasma ...
Prophet of God carries 2 souls, Prayer take what is needed,
Schizophrenia uses alcohol drugs to let 2nd soul out,
Mr. Keshe life tried to escape destiny 21 yrs.

23rd Knowledge Seekers Workshop Aug 14 2014
Cup of Life, even just to hold or breath, Purpose of Life, Punishment not work need understanding, How to "smell" Emotions, feel the Soul, Weight Reduction leads to cancer, diabetes, etc.. Emotional part of brain, connection to disease, information comes through teeth (chewing), The heating up of planet by CO2 speeds up conversion to oil, Position of Earth used to be where Jupiter is, The heating of the poles by sun is a natural process, not due to global warming, How to pray from Soul and elevate all souls.

24th Knowledge Seekers Workshop Aug 21 2014
How to hollow out nano coated copper wire, high temperature melts Cu not Nano, Making a AC capacitor with 9 nano wires across Al+, get Ac voltage, also from breath get voltage, Measure Voltage in kiss, 80% of Energy we get from the environment, this is a test for that, Skin of Man,
Magnets and spherical magnet rotate perpetual, this is how the planets rotate,
(1:35 Quote by Jung about opposites.. Collected Works Vol 8, Structure and Dynamics of the psyche, Paragraph 189, : The shuttling to and fro of arguments and affects represents the transcendent function of opposites. The confrontation of two positions generates a tension charged with energy and creates a living, third thing -- not a logical stillbirth in accordance with the principle tertium non datur but a movement out of the suspension between two opposites, a living birth that leads to a new level of being, a new situation. The transcendent function manifests itself as a quality of conjoined opposites. So long as these are kept apart - naturally for the purpose of avoiding conflict -- they do not function and remain inert.)
Diabetes emotional problem, ADD (need attention, be loved), Lungs no O2 crossing the lungs, oxygen given is converted to nitrogen,
No Reincarnation you carry all the information through RNA & DNA, if you remember past life it's actually in your ancestral DNA, "new" soul created in Mothers womb, added to the knowledge that exists, RNA like database stores all past knowledge of all the Creation, Information kept in plasmatic condition no material condition, Cup of Life all systems in 1 cup, Lady coming out of the Coma, Coating wires, Aura detector Keshe working on one, Transferring plasma from one reactor to another via a nano coated pipe,

25th Knowledge Seekers Workshop Aug 28 2014

Fundraising, Building a Capacitor from last week, only have to scratch both sides of wire, the Cu wire is the capacitor, still get AC/DC, Fukoshima tritium changed into Gold, Story of how sheep gather gold rare earth minerals in fat, processed away, Chemical Sugar leads to cancer, when it touches tongue sends signal of massive Sugar coming organs adjust to signal, body begins to ignore when real sugars come in, Only the energy of chemicals cross the stomach wall not the chemicals, This technology effects the RNA which changes the DNA, Asthma is a psychological disorder,

Electrodes inside a sphere, More fields stronger near the Earth surface, sleeping on the ground you feel better, Earths Axis slightly tilted gives different effects (life on earth), Key to Patents, take one and bring into the other all patents have to be read together even the health patents, What conditions created to liquefy the Lymph and they solidify the lymph, they use the principle to dissolve the sugar lump,

From the scrap yard materials the process is how to use it in a gravitational magnetic field, if you have a matter convert it to what you need in a plasma field and then manipulate it, then understanding as a plasma, free plasma, and a plasma as a gans, the matter itself is a plasma but of a different strength, then play at creation level, you have a invisible plasma which is a gans, in a different layer is a nano, the same plasma in different strength in a tangible way (matter), the 4 states exist in every strength level in the universe, In the lab we create different strengths for you to see the different creations of God, the theory of light-years to see star is rubbish, you see it instantly, Twin universes, not parallel universes, Third Reich in Brazil developing UFO technology, Teaching military of different Nations to protect from what's about to happen from Alien forces, Nasa space rocket propulsions finished, Have Fukoshima work with Japanese Government, emails can release, How to make the structure of Man in a cup, Had the technology 3 times this is third, (Egypt), Music is physicality of ears, Universal Rules of planets, don't bend but make aware of conditions,

26th Knowledge Seekers Workshop Sept 4 2014

Current knowledge only working in Mag or Grav forces not MagGrav, Measures the balance of the Mag and Grav forces, Teaching children, How the Drone was captured by Iranians, Hanging Reactors, Maxwell Equation Physicist theory Tesla Einstein they didn't use both Mag and Grav only one-sided, Plasma is a cold fusion, Quarks are fantasy, have to work with the totality of the fields, future energy will not be on the level of kilowatts, but on basis of need, You can open any gans by creating environment, they merge into each other, like sugar in water,

Description of Neutron, proton, electron, Diseases can be tested with magnetic fields, Ebola, Belgians closed Keshe bank Accounts, want to put Keshe in 20 years prison, Cancer Chemotherapy but keep lymph, lymph can be cleaned, Cancer first removed, B12 in thymus and lymph, Position on tongue, B12 acts on lymph for what is needed, Intestine has own neural system, Chemotherapy dissolves tumor best chance not to spread, Do not take out tumor without FIRST doing a small course of Chemotherapy, and then another small course after surgery, bone Cancer mistaken for lymph cells expanded from the chemotherapy, bones start problem with regeneration then they label it B Cancer, The pain comes from enlarged lymph cells blistering on the bone,

27th Knowledge Seekers Workshop Sept 11 2014

Nano layer are both AC/DC, (can't solder Nano coating) when you connect copper wire to nano by scraping off layer, you get AC voltage because Nano produced DC, but when crossing over to Matter level you get AC, Japanese company to begin manufacture flashlight (3 CM of nano coated wire), contract says 1% back to Foundation, not used for Military, charge fair profit, 5 ethos of Keshe Foundation, First step in development, Egg soaked 3 days in vinegar becomes hard like plasma, Ebola, Mr. Keshe ran out of energy for some moments then came back, was in hospital under 7 medications, Kidney Stones passing through body, carry on working don't stop,

Ebola virus causes internal bleeding, vein cracks can use vitamin K, energize the Lymph and not enlarge lymph in bone marrow, 30 drops of material in liter just wash hands in water use continuously, creates plasmatic gans condition where gans is heavier, few drops in Fukoshima reduced gamma rays, another theory use Cup of Life to increase Energy in body to overcome virus, if positive can use on Malaria, Belgian authorities blocking the books holding them at DHL, accessing his books saying they're rubbish, In Germany and Austria, 3rd Reich attacking, Health Workshops start 2 hours limit, Bone Structure is where the cells of emotional part of brain produced, why your short, weak immune or strong immune, has to do with Bone structure and how produced, Applies to any creation in Universe, Interaction of plasma in body,

(2:16) Prevent Dental CAVITIES chew on a piece of cheese before going to sleep, any cheese, don't need to brush, or toothbrush without toothpaste, toothpaste causing imbalances in body, Zinc in toothpaste very bad,

CO2 gans can't see in spectrum, don't look for CO2 but only it's energy, Direction of rotation can change in relation to other plasmas fields, Venus changed direction because of it's relation to other planets and Sun, We have twin star going to merge with our end of earth, Reactor he built back in 2001 huge amounts of energy,

ACUPUNCTURE (2:48), you stick into gans of your body,

Electrodes in brain to develop part that wasn't developed in womb, Toe amputation it grew back, how reptiles grow their tales again, There is a main brain and skin on all organs, that skin creates MagGrav field, heart skin replicate MagGrav field to repair/re-grow heart, Heart liver Kidney etc, like Sun, Saturn Jupiter , MagGrav fields, Your expectation limits the MagGrav fields, thoughts are magnetic fields,

28th Knowledge Seekers Workshop Sept 18 2014

Ceramic cores removed from lab interference, The habit of Man to collect as much as possible and save it, this system is different you gather what you need at point of need, nothing more or less, when battery charged balanced reached so doesn't take anymore, Don't need capacitors, transistors etc, how to use

Pyramids was last time to try to convey where energy of pyramids sit, Man didn't understand so made pyramids, More energy stored in the gaps between the gans, non-dimensional capacitors, CO2 and CuO gans interact as plasma similar to molecular interaction, Changing of polarity, Matter current flow (0 volts), plasmatic flow (lights LED), Mix Gans plasma flow with matter electron flow, don't be one-sided, What is

Temperature, field flow radiation, changed the speed of field flow in given environment, Teach Freely and keep knowledge flowing,

29th Knowledge Seekers Workshop Sept 25 2014

CO2 collection kits start reverse Global Warming,
Defense technology to nations for locating people, 3 small reactors in formation, close to lift, Dan (2:25) - Uses blood in Gans experiments, he's creating blood, and lymph, amazing , Reverse the process of creating urine in Kidneys' etc, What happens when you drink your urine, Disclosing Defense knowledge,

30th Knowledge Seekers Workshop Oct 2 2014

New Turning point for Foundation
New Step for Mankind's knowledge detach from Matter, Keshe's Book 1 talked in normal terms, Book 2 in new terminology, Detection of MagGrav fields in Amino Acids for humans, confusion between Matter and Plasma, Gans is "gases in Nano State", Summary of the Teachings so far ... don't need to build resistors, capacitors, etc., How real Fusion works, Cup of Life made in China, Linking Ebola MagGrav field in a new material near it, virus links to new material instead of attacking body, How an egg is fertilized by 3 different Gans, Create Mass with new technology, Batteries are specific to MagGrav fields, need new batteries, Can light whole city with 10 cm wire, The friction between Gans layers releases huge Energy, teach later how to absorb cosmic rays, These are on Universal fields, Each Solar System has a barrier to keep certain things out, when leave Solar System then whole different way of seeing, Work with Atomic structure add up Proton/Neutrons get Plasma size, determine which gans to use as container, friction between creates energy, Fields open up and merge create Gold, etc, Malta Health center open, Application process requirements, Mr. Keshe's illness 2 workshops ago, Technology can change mind of a assassin so he forgets what he is doing, Ones wanted to control seeds of humanity, technology sets the seeds back to original, Dangers of handling Gans,
When drink water body changes it immediately to Gans of Water so it is available for whatever comes into body, Ellie telling what happened to Keshe, bleeding in urine, all test at hospital not showing what's wrong, looked like poisoning Arsenic, Homeopath gave Arsenic, Bending of light around stars shows MagGrav fields, Light is a plasma entity this is how it makes it to other side of universe, We only observe what the retina can observe, Nano layer on wires can be forced to produce light if we force something through the layers,
We don't see all the matter in the Universe because not all release MagGrav, Universe has different spectrum of colors,

31st Knowledge Seekers Workshop Oct 9 2014

Any use of Keshe technology must sign World Peace Treaty, Teaching about Magnets, spheres, inertia force between electron and proton same as Sun and Earth, We observe light Earth gravitational fields pulls Suns light to it, the light we see on the Sun is not due to fusion, but Magrav fields, different colors of stars,

THEORY: (How matter is created) What's happening when Nano Coated copper in salt water with nickel plate you get what stuff, with Cu plate get blue stuff, it's the same as the Sun, Nano coat is a plasma radiating MagGrav fields, The metal you choose is like a magnet that attracts the Gans material, CO2 magnet for example, Lung is use to present contamination have to clean environment gradually, Fukoshima had Plutonium in reactor, Oxygen doesn't cross wall of lung or matter cross wall of intestine, MagGrav fields transfers, GANS is made of a plasma of an electron and plasma of Proton, different then electron matter state, CNN can't show anything about Keshe Foundation, Impurities on the electrodes, Plasma has no containers goes beyond the containers, The more Nano layers it expands the MagGrav field up into the atmosphere, Understanding the action of the Plasma, The pollutions carry huge amounts of rare elements, Plasmatic condition of CO2 causes the rare element to come into air and stick to moisture, In industry you paint the Nano material on the wire, we create the condition just below melting, For virus the Gans of any material has a spectrum of MagGrav, Microbes are more difficult, specific to this planet, Coulomb Barrier, Homeopathic works by creating a balanced field opposite, Homeopathic works by creating magnetic field of oxygen, by measuring field strength then replicate it with a Gans, How to make light with fish pump, friction between Gans, Man had the knowledge in the past but lost it, can light up your way with your brain, The ratio of food intake to body weight, a bat is 70%, but humans is very low, science doesn't know, because of MagGrav plasma fields, PERIODIC TABLE:

32nd Knowledge Seekers Workshop Oct 16 2014

Customized Testers, How the MagGrav forces extend beyond boundaries, Defense technology, Shielding for deep space travel, tail of cosmic dust, Can build reactor out of any material because no heat, How to generate Power between 2 Nano materials with a plate in between, The Mad Scientist Dan extract Gold, radioactive material in oil, Oil Companies should pay us to buy oil because Millions off of rare elements, Dinosaur Oil was used in the first 10 years of produce, (all lies),
Marco gives presentation on Atoms protons etc, (too slow), Nano wires and bone structure similar,

33rd Knowledge Seekers Workshop Oct 23 2014

One of Reactors is in weight reduction, breakthrough, Children's Program already started, explained to child Plasma is its own technology not as physics, the important point is weight gain without any change in atoms, no destruction of anything, no BURNING, do not need supply from outside, Organizations are writing patents on the open teachings of the Foundation, back dating patents through Belgian office, Mr. Keshe doesn't want any patents, keep it open, the peoples job to keep it free, Replicate what goes on in center of Pyramid, why they were built, knowledge given 27,000 years ago and 6000 years ago not understood, they line up Magnetic fields can pin point and travel to any part of Universe, GPS for Universe, up or down, can dictate speed to travel to a point in Universe, Pyramids were taught by Masters man couldn't understand, 3 pyramids in line give position in Universe,

Structure of universe rest on structure of Plasma, How it is created, how stars are kept in position, Fukoshima has the Energy Source of future in Tritium waters, Japanese don't understand (could go 50 years ahead on this planet), Tritium can be converted to a Gans easily, Plastic coated nano with caustic, Our skin is nano coated in 3 layers, plastic bottle nano coated acts like metal magnet, Questions about how to nano coat, Can't mix Gans because own atom spherical, Every little ball of Gans is it's own sphere like atom, they become new color don't mix, Water in Reactor behaves as a Gans of Water, like blood is a gans in body outside matter, Inside body is a vacuum, Not physical control but a unit they built captain has to control, the structure of plasma,
Moses went up Mt Sinai came down different, receive message with soul came down change back to man use knowledge to teach flock, He chose which part suited him and taught as man, in history he killed the male children of enemies, doesn't fit with Commandment not to kill, Hitler was Jewish same covenant with Moses also killed males of enemy in Holland for example, Same failure with Christ, Mithraism 3 Kings, 3 presents of Kings of Persia , think right, talk act right, Zoroastrians, Stone of Mecca, uncut stone for building of devi statue, all priests wear cross without Christ on it as symbol of fear by Romans, Illuminati's took over as a method of financial control, Same failures with all religions, Acceptance of covenant of religion should be love not out of fear, How does he know the things he knows? Soul of man and what is connected to man, He was poisoned by one of his own knowledge seekers but he keeps quiet, if he punishes he goes back to what mistakes were done in past by Prophets, Those who joined EU all their gold in Bonn bank (Rothschild),
The Reactors give and take as they need, this is the end of religion, you carry it within you, RNA is line of connection to gods, goes back 26,000 years, Serve and not to be served, Mother in Iranian house is the head, Mithra was female, when mother brought up correctly, families work correctly,

34th Knowledge Seekers Workshop Oct 30 2014

Breakthrough in Reactors delivered 120 Tesla, can destroy any space satellite, Los Alamos used 1GW electricity to generate 100 Tesla years of work magnets destroyed, they can't understand new technology, electrons (electronic systems) have no effect on the plasma, Seekers were asked to take over control of reactors by their thoughts, saw changes on the scale, they were asked to make two keys to control reactors, Interaction with Gans communication between fields 0 time, Can detect persons motives, 2 people communicate with machine, Will see the lift when ready and on basis of World Peace, only showing copper reactors for teaching, can use ping pong balls, A Gans is an Entity, pray for it, it understands what you need, Mobile phone has created big change in social interaction, chosen to be at Institute, Religion man made, put an end two weeks ago, You don't see skins or containers in Universe, called free plasma, Living among so many unseen creatures in Universe, need to recognize them, call them ghosts, feel touched but nobody around, making a "frame box" to see other creature in Universe, call it a "free plasma", then you'll see the past like video, the Christ will be there, Vatican lose power, technology given to free man, Harvard stole Keshe work on Ebola In Africa, Free Energy, Plasmas don't heat, what gravitational field pulls in Magnetic releases, Matter is created by the observer, not the strength of the Plasma, the gravitational magnetic field of

your amino acid decides what become matter to you, The whole point of nano coating with caustic is not to melt the metal and not to free the gans from the metal, but remain free within the metal, in that state they become atomic, Scientists in East are achieving goals of Foundation much faster because of Yin/Yang understanding than in the West materialistic, Cancer treatment with Gans of Gold, doesn't work, Most of Cancer in body are of Metallic core, Heavy metals are suppliers of a higher energy and become part of the cancer cells, Get rid of metals in body and cancer goes, Cancer cells are of a higher order of MagGrav field of own, because of there high strength they attract from blood and nerve cells that's how it spreads, rapid spread when lymph's removed, The "brain" was tampered with by traitor in K Seekers, analogy between plasmas and relationship, Putin has Cancer wants help, he must ask himself,

35th Knowledge Seekers Workshop Nov 6 2014

Security utmost now for Foundation, Attempted assassination of Keshe but wife picked up the papers, Keshe wrote paper on Homeopathy, works with oxygen mag fields, Keshe Foundation has now brought in Space Plasma technology to protect him, He would still teach even when in pain, 2 years ago gave message to Israeli if they attack with nuclear have tech to return it to sender, in space your deeds intentions are known, not a punishment reflected back to sender, Vatican, Belgians, Italians, etc., How the poison works, when she drinks from Cup of Life, pains go away, "intelligent dust" give powder to touch then use radio frequency to mix and deliver to body leaves no trace, he has to wear gloves, Have technology to protect from poisoning, Sierra Leone joined with Harvard to steal technology and blocked it for people, for any virus attaches to a protein, use fat gathered on top of CO2 boxes to treat Ebola, Keshe has enough knowledge to wipe out any creature in Universe, dismantle brick by brick until accept Peace, "Balls of Life" plasma put around house to absorb bad fields, every talk listened by the Pope, his talks reflects, made statement about aliens, Keshe has technology to protect against frequency attacks, Los Alamos scientist talk with Mike Harris, Keshe's capture in Toronto had to have complacency of Washington, Vatican, That is why he gave to world, the more you push the more we release, My love care goes to all equally, if there is one more death threat all the people involved will be effected amplified, if he sends his love for you directly it would be so great to cause separation from body, Obama & Vatican, Questions on Gans in CO2,

CHEMO is very good for opening up the plasma of the cancer, but so powerful it enlarges Lymph, CO2 Gans can't be used to reduce lymph, How lungs and intestines work as Gans,

Make a tomato, have to put the energy back into neutron, to get matter, energy get from free plasma, if you add microwave to CO2 you might get nickel, if you add right amount energy you get nickel every time, this is done with star formation reactors, find the right coordinates where to place the CO2 Gans to produce nickel,

Shipping from Keshe to Tokyo FDA held for 3 days, they're being monitored, Made Gans and shined light with magnifying glass turned black, it's a Gans that is absorbing all the fields, black because Nano and Gans mixed, process went fast, Copper not all of the same material impurities, iron gives black Gans,

Security: they have a technology to give you a frequency through the new TV and even laptop, Keshe developing a system to protect, can protect even against chemtrails,

36th Knowledge Seekers Workshop Nov 13 2014

Eric Claussen show Gold production,

Ebola, a virus has a magGrav field, links up with CO2 Gans doesn't kill the virus, Amino Acid Fats link up with both Ebola and CO2 and create one complete plasma, so its disabled, in Universe always balance found doesn't kill, In Fukoshima Gans reduces Gamma doesn't kill it, the Frog test, Keshe has Heavy Metal radioactive poisons in his body, huge, it shows on the tests but he can still function, with this technology you still see the Ebola but the Gans has linked to it so it has no effect on the body, scientists can't understand, 129 Tesla in lab unheard of, confirmed by manufacturer that test is correct, these bursts of energy come from beings in the lab release energy, what the environment calls upon, created a Sun, In Belgium the Government bombarded them with heavy satellite radiation, bought house next door used cell phone to guide, He installed Space technology in his house to protect against radiation, it even blocks the traffic noise, CO2 packages manufactured,

Questions: Eric's presentation, has wish to help new Technology come to humanity, producing Gold Gans, The infinity loop of copper Gans key point, the magnets balance the state, pure copper Gans not Gold, ship to China for testing, For testing Gans 6 parameters, measure in 3 dimensions, Homeopathy demagnetizing oxygen so doesn't bind to copper, Infinity loop, for insomnia, copper wire twist and keep ends open, but for plasma nano coated close the loop, it brings balance between soul and physicality, there is a process in eye, a liquid, cause you to see other dimensions, girl on flight from South America blind for about a year, Keshe placed a system on back of head restored vision, but she refused vision, blindness gave her attention, her existence got fulfilled, How you see vision, has to do with wish of man, paraterid gland cause liquid in eye to see, (like vision of Krishna 9my thought)), see what is common in the soul, same with dreams, Glands are part of brain structure, one for emotional other for physical part, when you're born destined to die, purpose to develop the soul of man, spread of knowledge across Universe, Purpose of the New Technology, new glands will be developed for this purpose, getting ready to see ET's, what kind of people do you want on the spacecraft, the bait was the new technology, but want to teach the TOTALITY,

Liquid can leak out of a sealed system, Video of Gans forming on wire, Man can put muscles in stand-by, he can feel the Qi moving to shoulders, is that the Gans? Keshe "I don't know", lizard can separate part of body and re-grow, man can also do this, Ellia did acupuncture on Armand toothache, within minutes disappeared, She has a strong "wish" doesn't matter where needles put, Keshe developed special shoes for healing, Camelot interview,

37th Knowledge Seekers Workshop Part 1 Nov 20 2014

University Degree coming in New Technology, Energy Units, Pain Pads, work with Apple Computers, Conditions are peaceful applications of technology and free sharing of knowledge, Autism treatment, Mental Deficiency due to lack of Oxygen at birth, Not yet for Downs Syndrome, Hospital coming in future, offer Masters Degree, If Gans dries out looks like Matter, but behaves like Gans, Gans can still collect on wires outside

water, within the electro Magnetic fields, your dealing with a Plasma so the field extends beyond, How to get heat out of reactors, flying reactors, Heat released according to need of body, How chicken egg gets started, point of release, where difference in field has been created, Getting ready for flight, how to control it, Governments starting to take interest,
BREAKTHROUGH by Vinc Canada: Star formation with CO2 and CH3 creates a gradient, friction, How Gans effected by intention use of OM, these vibrations are on the mental level, Soul searching go on in Institute, the soul emotion doesn't have matter level frequency, works on plasma condition, gets translated to physical, Gans doesn't freeze, water in reactor is in Gans state -20 Celsius not freeze, creating a center vacuum, On the verge of running cars without fuel, pressure cooker can be used as a box for star formation, energy production, don't need to spin if you understand about the gradient, if create right conditions can see the light in plasma, first light bulb, ready for lift, changed matter (h2o) into a Gans, hold Gans in hands, be open, achieve lift, let knowledge seeker do it then they have to kill all, Russians have done what Vinc did in reactor, they trapped warship in own gravitational field, two warships, Russians have shield against latest technology, Game of war is over, Vinc's plasmatic field reaches 30 km, Vinc feels peace when come to lab, Field strength is above anything made by electronics, Range can go up 700 Km, man on street has shown knowledge is simple, How Solar systems create fields, Earth not have solid core, vacuum, everything can fly, How Iranians captured Drone, No need for a central pin,
No Curriculum, it sits within your soul, words are meaningless, with pure heart knowledge comes now, 2000 RPM expand field of plasma, surface of Earth is all oxides, Understood by man on street ... not by University., A creature in front of you needs help, out of balance, feel the fields then can help, he says he bring all the Prophets together, this technology is on the Soul level,

37th Knowledge seekers Workshop Part 2 Nov 20 2014
(it's actually included in first one)
Vinc had breakthrough, he show continue until see the "bright light" then ready for lift, created a Gans gradient, changed the matter into a field,

38th Knowledge Seekers Workshop Nov 27 2014
Working the Reactors to lift, rushing to achieve watching weight change is not the way, calm patience waiting, Nothing happens in Space, increase intellect time to think and understand, those in the Space program need to know their own strengths and weakness, your desire is not in tune with true feeling, Will be able to buy Star Formation as a kit in supermarket, Ethos of Space through the Keshe Foundation, not for personal profit, knowledge belongs to the whole race, comes through centuries experience in RNA, Chinese showing openly research, Seed research with CO2 Gans, plants take water from the air, for drought places, grow without irrigation, desert moving towards Beijing, but if you interfere and alter desert, change man, New Technology developing rapidly because all around world people are working together, No need for nuclear weapons, this technology brings back balance to Earth, genetic modification is reversed, Keshe

Technology certified by Belgians for Alternative Health, Principle: that your desire doesn't surpass the desire in the seed, for example, this is how the Universe works, not to enslave, Nuke tech is obsolete Keshe got 129 Tesla, 5 plus 1 treaty with Iran is about feeding the children, New Ethos for world change by your own actions, thoughts, No respect for the likes of Edison, wrong ethos, American and Russian space program came from murdering, Von Braun V2 rockets, now can see Space program finished, no one will remember, correct ethos living by soul, build system based on what is needed and environment, Star Formation is miniature universe, use in medical application, Questions (58 min): CO2 reverts back to Gans of Matter, insulating, its a nano layer, when making Nano coating, touching volt meter to plate every 3 hours helps to line up the flow in one direction, Magnet can be used for same purpose, Gans of Aluminum is very soft, Man ate other animals and picked up the behavior of animals, if we eat Gans loose behavior of animals, Gans food is natural balance, water turned into gel, like in lung, plasma like, American military coming to Foundation, Bret with them, Change orientation of plasma can pass through solid matter, Stars are not solid core, have different layers field strengths of hydrogen, Plasmatic flows not fields, How heart beat, its own life, 90% clean-up of uranium by Iranian scientist with Nano particles, you link the material with something else, doesn't destroy material, still see material, but no radiation, same process as with virus, Iran is one of leading countries in Nano technology, CO2 attaches with Amino Acid for certain effects, here on earth we absorb a spectrum of magnetic fields, Space ship is mono environment, brain dictates your own recycling of CO2 energies, you are the source of your own food, for deep space travel, Secret: CO2 Gans can change Cancer in minutes but danger to interfere with other systems, or could spread very rapidly, Has to be done correctly, Gans in capsule insert rectum, dilutes cancer, intestinal cancer, China manufacturer, How to use CO2 kits, have to have a use for CO2, then there is the Fat on surface of CO2, have to use Fat (Amino Acid) or stagnates, Source of Food for family, The Solution is not the CO2, have to move into CuO, Has to be a regulation of how much we extract or create new diseases, If respiratory diseases start it means too much being extracted, Has to be a diversity in the plates, Copper, could develop more problems, Moving closer to Sea, start submerging tests in coming 6 months, if left on floor it crushes system when increasing weight, Atomic Copper,

39th Knowledge Seekers Workshop Dec 4 2014

Need more **Theoretical**, Neutron, How star, neutron, or man die in same way. Same as when Neutron divides into Proton and electron, How Sun obtains motion, related to how end comes, Newton's law of Motion correct, drawing of MagGrav fields, Heartbeat of Stars, heartbeat is emotion, will not fly until man understands,

The Free Plasma is the Creator, Source of Life,
What you kill you have to eat, in space you don't have to eat, get through gans,

Pope understood, now he's running around the world since June to unite religions,
Reactors gained weight 4 cm, No patents for knowledge of God,

Questions: (1:15), We only receive what the body needs, according magnetic fields, you can't go any further, this is not radiation, Keshe got liver and pancreas cancer while working with nuclear reactors, 2 years to cure with plasma, How to communicate with Free Plasma, use spiral, image of plasma, gives equally out, this earth situation mission impossible, Oxygen, Why water needed in body, Water behaves like a Gans but not, behaves as a plasma but keeps electrons, behaves as matter in matter environment and plasma in plasma environment, electrons is a defense shield for Proton, allows accommodating of extra energy from neutrons, neutrons guarantee borders of plasma, Free Plasma in Center of Star Formation like Soul of man, Flower of Life, explanation has to do with Pyramids also, this is how light is formed on earth, the CO2 boxes in Beijing the clean-up of CO2 will create a big problem, the heavy metals will land on the land and water and new pollution, How you add to mass decides what MagGrav field to extract with CO2 Gans, Central pin and the mass of the Gans you put in decides what you get out, you create the right gradient and speed, Einstein put a limit on speed, but it's wrong, light travels instantaneously from Stars, 3rd Reich still in Brazilian they understand the correct speeds of Gravity, In fish tank he'll bring Soul of Christ, Numerous UFO can't be detected because of plasma, American Military and Iranians meeting at Keshe Foundation, It's not just building a reactor it also has to do with emotions and souls, Moses didn't speak in scientific terms, now he is doing it, building a dynamic chair with Chinese, for any disease, Cup of Life Chinese manufacture set of 9 cups, Keshe uses it regularly to control poisoning, Amazon trying to use drone for delivery, Keshe advise not to go so fast, First get Peace, The flying car test in Belgium couldn't do make chaos, can use to reduce weight to 200KG, with this there are no borders, have to find peace among nations, 102 groups call themselves Keshe Foundation around the world,

40th Knowledge Seekers Workshop Dec 11 2014

Marco teaching 40 min too slow, Keshe, balls fell from sky in Namibia and Brazil, man made material, special steel made by Iran, part of core, Iranian test flight must have failed, Japanese Government tests say correct, can make nuclear energy safe, change plutonium into gold and platinum, Ready to fly in lab but Armand not see, Magnetic field belts around planets, Dark spots or sun flares, like when 129 Tesla created in Lab, when polarity changes on sun get flares, Rings of Saturn, Plasma works outside, mixes of Nano different metals to make Gans, How the eye works, the eye salt solution, earth inside out, how the MagGrav effects the emotions of man, He carries the knowledge of Universe, Landed last night with one leg coming down, Great step for mankind, Cup of Life se in Star Formation, put out in the rain before use, all spectrums in Universe absorbed and atmosphere of earth, becomes tuned to layers which you use, even just breathing in them is same, he used them to over come poisoning, different formation different effects, receive emotional pattern of environment, What Christ said, "this is my Blood and my Body", blood is emotional level of man, carries the wish of the man by what he wishes to receive, Keshe gave Ellia the gift of knowledge equal to his, level of honesty between body and soul, those looking to Stone Henge find here, the formation similar to ancient stone structures, Look at Star of David, cups made in same batch to share, not normal caustic, they arrange themselves but setting comes when add water, I

pick a cup I need Cu, you same cup Zn, with this set you can reach Creator, it's Enlightenment not a voice, 12 different salts found when cremate, in Homeopathy, many are not found, don't need tangibility to know, allow the people to play their game, by deception they affirm their existence, Need to be straight forward, honest with self, Ellie employed by Foundation,
When you clean Gans from the salt stops the process, when take it out caustic grows until balance, Have to give Technology to Children first get them started, if you bring the Love of God in your work you have already reached all mankind, Keshe has the power to bring planet to halt, but what would it serve, Secrecy is problem, The religious people say they want to abolish slavery in physical, but remain slave underneath to religious people, today's intelligence equal to prophets don't need them anymore,

41st Knowledge Seekers Workshop Dec 18 2014

Nato and EU boycott Keshe Peace meeting 3 years ago, Italy broke rank and came, gave to Governments what is to come, then gave USB key, in June 2014 invite world religion leaders to attend, they said world economy will collapse, made too many excuses, therefore Keshe brings to the grassroots mass of world, So that man realize don't need to kill, Keshe will enforce peace, through peaceful means and change of mind, human race sick because of greed, in past messengers of God delivered only half, now give the totality, try to elevate the leaders from them to human race, They call him Alien, Nitrogen with iron creates red blood cells, for survival of division leads to hunger, Female is life giver, have to change her, from subordination, to equality, no fight, to have peace have to have equality at home, Ellie not yet seen no challenge, pray for the soul of world leaders, the prophets lost the seed of soul, gave us physicality, Ellie only sees the physicality, prophets did not delivered the totality because once they received it the physicality gave them status, through your soul we elevate the prophet souls of past, to hide what was not given they created hated for enemies war, they changed the teaching, The power given to man is now that each man can decide what matter he wants, the elements are simply different amounts of the same energy, becomes the things, center of free plasma is center of Sun, you have created the soul of the Creator, humans have not reached maturity, have a defect of "Nitrogen" , Amino Acids, Nitrogen comes into Earth from Sun, why rain is life giving N, keeps the top layer from clogging, Center of Brain same Free plasma, transfers your desire directly to what you want, Physicality is imagination of man, relationship with man woman based on physicality, love seen as a weakness, Man is emotion, Woman is physicality,
In reactor spinning, center creates a vacuum, the center has to maintain a balance, Apologize for saying you don't understand, Principle Field Strength discussion of terms, Amino Acid allows us to see, according to environment, Billions stars not visible to us because our Principle Field strength in Sun, so we are above it don't see it, have to match environment to see, "my body not same as your body, we are not from the stars", how many of you are busy focusing on world leaders to make a change?, just because you have the tools doesn't mean you can see, depends on what soul is keyed for, lot of people call me prophet, we are not prophets, each level of field strength has rules, don't see through eyes of body, see through Soul's eye, Free Plasma, feel their presence, when you feel presence you are elevated to that level, No physical observation only emotion and

soul exist in Universe, become physical among your own people, Want to educate humans that we are all equal in Universe, Ellie doesn't understand thinks it's a challenge, when I can change her rest of humanity will understand too, The Prophets got worshipped then abused power, when you elevate then everyone on planet will elevate with you, We only take what is freely given, his son doesn't understand about giving must teach, Reactor Groups - connect with soul to Free Plasma, Ellie for you to understand your position,

42nd Knowledge Seekers Workshop Dec 25 2014

Keshe Knowledge Seekers are working out of garages, like caves, dangers to come, (a recording was made this morning might be released later?), Reactor, field test put finger in for brief, feel pressure this magnetic field, he's very sensitive, he's not a normal chap, when come to do work, come equipped, Pressure means concentrate fields in one point, redefine matter, when put water in balloon under vacuum, all matter goes to point, everything magnetic fields, called Worm hole, Says Ellie in Enlightened state but have to work out some things, How to link up Fluoride in drinking water by Nano coating, doesn't destroy chemical but changes it so it doesn't harm digestion, body recognizes that it doesn't need these chemical which were made into a new chemical, need these filters in space, you drink poison but body doesn't absorb it, why you get cancers in certain places, pain pads do this a little bit, We receive everything on this planet by Nitrogen, conditions release fields from plasma, Enter the world of creation in the Universe, If I turn off the system the Gans belt remains, See rings inside central column in Plasma, like gaseous planets, Plasmas decide themselves which way to rotate, travel is in straight lines of the magnetic fields, you join different strengths that cause curvatures, can pass through planets, final talk about elevating the souls of the prophets of the past because they failed from human side and world now reaping their failure,

43rd Knowledge Seekers Workshop Jan 1 2015

They came to Earth because earth is ready to enter Universal Community, Have reactors connected around the world, can use for psychological changes so that the people forget war, We don't create new religion, use one ethos, "thou shall not steal", Group of 12 have raised their consciousness and will be focus point of Peace, if you use CO2 or CuO Gans you will lock into reactors, Cu from Earth, O for soul ?, Religions have created division, wars of mass murder, last Prophet didn't do proper, this system cannot be used for Mind Control, there is a built in limit that this system can't be used to enslaved, can call on Ellie and keshe for strength to carry this out, if they get assassinated the systems will be released around world, there will be a short time of uncertainty but it will come out in end, 3 nations planning to kill keshe eliminate Keshe Foundation, QUESTIONS: only about peace, you haven't understood, we have used this psychology technology on other planets, but then its forced on the people, it must come from within the people, BBC is tool for blood shed for British Government, Once they understand present media is tool for making war selling arms, wars are planned years ahead, the Monarchy decides on long term income for nation through wars, enslavement, fooled with "Democracy", if people refuse to produce arms, the Government has to find a new way to run, what will

happen if they get all in one go, they can't stop our souls from doing its job, One complained about not delivering what said, Keshe responds forcefully, scientists not testing Gans, People trying to stop Foundation, but bringing them more together, Need dried CO2 Gans right away, Correct way to dry Gans, Armand, Ellie and Marco are next generation of teachers, Keshe Foundation USA by Armand, How to reach the emotional part of human race, every living being on this planet are connected, including the plants, plants have Magnesium and animals have iron in blood,
How LIFE starts: The energy of the Wind are source of life on planet, salt in ocean, wind causes Amino Acid on surface life begins, why fish start spontaneously on water, even if you put plates outside CO2 kits still get CO2 Gans with Amino Acid, and salts, put a fan, add wind, fish will start growing, causes it mixes at bottom, it sits on top of boxes separates it, when you create a life you create a soul, CO2 is in a state of Energy, There are no fish in the Universe, During dying process the energy released is like many nukes, Creators of stars, Target is World Peace this year, there is a need for a lot of things to come into balance, so humanity can see the need for Peace, Prophets have 2 soul, 1 is physical soul (this part did not give the message), 2nd soul is connected to God, 2nd soul is untouchable and not open to humans, all have to come to peace, Keshe doesn't have a path, souls are conditioned to be here happens centuries ago, next prophet already determined, well planned, already its a gift given, body has to accept mission,

44th Knowledge Seekers Workshop Jan 8 2015
A council of 12, core peace team, on soul level not physical level, not disciples, they have no right to speak physically, only respond through soul, Temple of man will be in his heart, no temple building, if they talk to you it not from the soul but the man, this way can't get corrupted, educating man to be independent in the Space, problem in man lack of confidence in his own existence, according to a mans intelligence and openness to his own shortcomings, can get accredited Masters degree from teachings of keshe foundation, Keshe can commercialize new discoveries immediately, knowledge has to be free, no patents, salaries across world Keshe Foundation will be fixed,
How matter is suddenly created in the Plasma, Amino Acid strength makes it visible, we don't see all the systems in the Solar System, but we can't detect them, all mans system are for electronics not the emotional part, magnetically is physical, gravitational is emotional, Matter can't replicate itself, when it comes into Gans state it has intelligence, decision making, can replicate itself, most planets stars vertical axis, Earth is slightly tilted change pressure on it, change direction of flows, different way to control Plasma for speeds, Once release technology will enforce peace, Reactor with 2 Gans CuO CO2 acts like the eye, how eye sees light, water like water in eye, Questions: (1:20), have only part of the picture of star formation, need to get balance, balance comes in structure, medicine has to develop tool to measure the MagGrav fields of cells, in kindergarten, need full knowledge of what is electrical, negative current is magnetic, positive is gravitational, all the people with reactor are sitting on 50 watt power supply but blind to it, The reactor descending 1 mm at a time over a week, how much energy to descend where comes from?, Whole electrical theory is missing big parts, Tesla didn't understand Plasma, In power generation only using a fraction of available power but scientists don't understand, The skin is like aluminum foil between 2 Gans, release huge amounts of

current unknowingly dangerous, How leaf on tree works, feel leaf feel fat, that's the energy, plants use CO2 as a magnet to get the amino acid, 80% of energy comes through the skin, we are reused energy systems, How are we all connected -- "I created man in the image of myself" (keshe is channeling), Earth is place to practice before going to space, departure time is coming close, all the resources used for military to put into space program to save planet, Personal defense technology released after Peace agreement, there are more states then Gans but too soon to disclose, USA and Britain stole Iran's through misinformation, Nothing has ever been stolen, taken out of this planet from ET's, Gans is another star that gives energy out, "thy shall not steal" ..."WE" have brought in more then we have ever taken" (Keshe talking as an ET??), but man not ready for knowledge, from March Russia only take gold for oil, don't accept dollar, Road map for peace to avoid trouble, dollar is most bankrupt, bubble has burst, (2:30)
Finding new life forms in China and Japan, nano Structured Fe, icebergs and sea water .. how life formed. Fe goes to Blood. Keshe has box in lab (4 years), keep in ready Universal condition to form life, the material you add has to be in Nano State. Have to mix like wind on Ocean, amino acid with Nano metal (Fe, Mg, etc..) Can create any material on earth in this box. 2:45 The "old Guard" (professors) will protest and stop progress. Animals live in areas by North or South pole of Mag field. Understand conditions you create, you should have diamonds at bottom of CO2 boxes. Looking at it from Matter point of view. Don't just look at end product. Body creates the condition to make different cells from same material. Copper plates are not pure, the impurities give you different material. Pile different gans on top of each other and measure the plasma flow, then you'll understand working of brain or heart, etc.. CREATE CONDITIONS... To serve humanity. Keshe can't do all of it, need everyone to contribute. Moving to South Italy to start new University. Come with expectation to GIVE, then it will succeed. Full support of Italian authorities. Governments want to take over Keshe, but its up to you to keep it. (Threat to Governments, "we know how to give heart attacks and brain hemorrhages, we don't kill you. Don't try to stop the Foundation). "I will not let this technology die". Wife said, not to speak like this.

45th Knowledge Seekers Workshop Jan 15 2015

Moved to S Italy, at New Spaceship Institute, Man uses packets of Energy by eating other beings, this has to stop if want to go into space, energy from CO2, Biggest problem of Earth is contamination of Environment by fossil fuels. Adding of CO2 to fuels to clean up cities, but you get a solid particle on the ground. On this planet you have evolution, can't change mind from outside.
Armand used Nano coated wires as connector wires in CO2 boxes, gets so much more Amino Acid. How to achieve flight, what is missing in flight. Cannot contain plasma in a matter container and attain flight. Get plastic tube, nano coat plastic, use to connect to reactor ... this will move away from motors for rotation.
Walls of Blood vessels is not matter but a Gans state. According to Mag state they allow nutrition's to pass. When everyone gets technology no one can abuse another. Use CO2 Gans for energy instead of Fuel. If added to gas, reduce fuel consumption 70 - 80%. Have to get the ratio correct. Collect what comes out exhaust pipe, can even put it back into tank becomes stronger. Have to wash Gans from salt.

Every material turned into a Gans is a star, full of Energy. Institute will measure and research CO2 Gans as a food. How to use system to influence humans to forget the "war", to work for Peace. Lot of schizophrenics criticism on internet. Add CO2 to paints don't need thermo to heat house. Is CO2 Gans dangerous? Test it and let everybody else know. Fear put into man for control. Your body has salt, contains nano material in form of Gans of CO2, Why should plasma of matter that you eat drink or breathe hurt you. When you eat a leaf, you are eating Gans of CO2. You do not need to eat the plant to get the energy. Life starts when it (Amino Acid, fat layer) links up with an element. In so many ways even the Gans has a soul. Own entity. even atom has soul, it can hold on to its own structure, When you consume Gans, it does not destroy it. You collect what you're able to receive. Some top scientists around the world are willing join Foundation, USA has been offered. Start mixing Gans material in the materials themselves, then don't need much energy. Can paint Gans back on the wires, get super conductors at room temperature. Armand dried the Gans. Gans beer? We don't yet have a tool that can measure both gravitational and magnetic fields. At moment we only measure current flow of electron. Need new systems to measure.

PAIN:

Our aura expands the length of the Universe. In a way we feel each others pain, but our systems only register what is inside us. We have become so selfish, we only want to feel our own pain and not others. We have chosen to ignore others pain.

Keshe will show how to make Nano materials without caustic, natural way, will show in the future. Nothing sticks to Nano layers. Your body does it itself. It's a weapon technology if we show you now, can be abused. Third Reich still active in Austria and Germany, carry on what did before in different name. Chinese are commercializing on basis of Foundation, sharing the technology. No fear of sharing knowledge. Professors and doctors biggest block to themselves. Have found a solution to Chemo side effects. (1:59:00) Gans to reduce addictions, under trials. In first year of University they will teach everything, then to specialize. The CANCER cells from the beginning are already in the other organs, but through pain management the body masks the cancer until it reaches saturation point, then they say it has spread, but actually it was already there. Addiction to love, can Gans cure. (joke), elevate love to soul level and not use as a weapon, to give and withdraw. What is love: "giving from your soul without expectation and freely". How to measure love, can measure through their blood. (7th Health Teaching on Heart), Blood feeds the emotional part of the man. You can measure even who you will be in love with... by MagGrav fields in blood of persons match. Emotional part of relationship is the man, the physical part the woman, man gives the idea to the woman and she makes it her own. Keshe doesn't believe in reincarnation in the totality, even though we are part of bigger body of Universe. When we finish with this club we join another club. Impossible to bring two cells back together again. The soul remains but physicality changes. All information is in RNA of Amino Acid which is consumed, worm ate man, bird ate worm, etc.. all information there. Soul collect and make a master soul, but can't differentiate which soul it came from. The RNA from the parents are merged into the child, but go back only to the point where they have a common Mother. It's why you see diseases when families inter-marry to close to common ancestor. Nasa says need to have 240 different races to have good gene bank in space. (Did Noah come with 240 ??) Its simultaneous different and yet one at same time. Who carries Soul, no

one, soul is independent outside physicality. Soul have different levels of development. God will always have a partner. Individuality comes from Totality not from singleness.
Core Team, 12 individuals,
ChemTrials if you add CO2 into fuel they go back into CO2,
Positioning of MagGrav field to find location,
Do not fear CO2 Gans it is part of your life now, experiment.

46th Knowledge Seekers Workshop Jan 22 2015

Using a new plasma reactor formations, Materials production from reactors, make water from the plasma not atmosphere. This is the BREAK through reactor that can create any material ... but must be tied to Peace. Why choose copper in beginning is because muscle tissue in human has copper. CO2 from air , Copper Oxide from land, Oxygen as MagGrav field as a connection line between, Amino Acids of Man with elements of earth. Health Cups just breath in, the Nano coat like skin of man (aura shows weakness or what is needed) determines what is needed by the body, then the cup gives you what you need. (MagGrav Canada). CO2 kits. future Nano plates in separate compartment without contact w water. It doesn't create CO2 on matter level, but the MagGrav field of CO2, describes how Amino Acid formed How life formed on this planet, it's MagGrav field reaction NOT chemical (1:26), get blood forming in kits, when control reactor control mind of man, peace and balance, can force man to forget animal behavior, will at same time feed him with what he needs. Impossible to control man, mind control comes through the physicality of man not through emotion.
Keshe Oasis Unit...
Developing a system to measure the MagGrav fields of materials, Magnetic is repulsion forces, Gravitation is attraction forces,
What a Black hole looks like, (similar to Saturn, 2:12), gaseous planets go eventually to matter, 3 reactors in shape of pyramid the forth structure was the Sphinx.
The color of the plasma identifies strength of mass of material. Black Gans would draw the whole universe into it. Black is only Nano here on earth, not Gans. In China they have broadcast the technology over public TV. (2:48) A vacuum is created inside the reactor, Ping Pong ball reactors, anybody can do. How pain happens from plasma point of view, electrical charges are released when C conversion from diamond structure to graphite, with pain pads you put it back as diamond structure, bridging the gap. Body of man is a Gans. The Pain Pads don't work for the source of Cancer, which comes from the operation of two glands, thyroid Parathyroid and Thymus.

47th Knowledge Seekers Workshop Jan 29 2015

Running the 6 reactors inside a dome that started a couple workshops ago. Checking for light when switch off the motors. The measuring instruments can't measure MagGrav of plasma, but electron flow when the fields reduce enough for electrons to flow. Breathing in Nano dust by accident contains huge energy. If you touch Gans or Nano energy transfers immediately because of fields. Superconductors with this technology. Gans sings, hear it. Tele-transport done inside free plasma (the bubble in side the reactors seen some workshop ago). "Beam me up Scotty" coming in a real sense. Those who have

purified enough, become humble enough can hear the sound of the soul. (1:12). When meet aliens you meet at a common denominator in the soul. If they understand, we are talking about whole new dimension of materials. The jump to computers was small in comparison. They cannot stop the development. CO2 kits $13 + shipping $5, Pain Pads $39 + shipping. Profit margin means 50% goes back to Foundation and free unit to poor. Working on an energy unit in China. Power Charger for mobile phones. Working on MagGrav detector units. Production is starting. Any Problems contact info@keshefoundation.com. (1:43). Neural system sends voltage to tissue, information transfer is not the only job, it sends MagGrav plasmatic info for production of matter. A cell is made in the Kidney in conjunction with blood and neural flows (info for reproduction of cells a certain current produces specific cell). Falsity about brain only using 5%. Actually brain is constantly providing current of plasmatic MagGrav conditions for maintaining conditions to produce needed matter/cells. Through the RNA it changes the DNA. No need for stem cells or transplants.
Plasma detectors, do we need to translate it to electronic system, could do it with color change of Gans. Each color means a strength or position in Universe. Dry the Gans quickly with light bulb. Dry Gans filled with energy. Patents open, will not be needed in future, Tesla Electric car opened patents to public. University will teach everything at once, specializing later. There are exams but you can't fail, you study what you like to do. Mike Nashif, started growing seeds with Gans. Can reverse genetic modifications of Masanto's to seeds. The guy (deferescence) wrote the patent in such a way the it made public the new technology. Mike came on to explain his experiment, Keshe told him not to limit his mind about himself. (work on these systems in the Dark). He will achieve lift with his experiment. (break up of voice).
Seeds in cups (3:05), plant some seeds in regular way to compare. Gans field absorption grows different in Natural environment. Mike is creating different Gans with electrodes. Sharing the knowledge worldwide.

48th Knowledge Seekers Workshop Feb 5 2015

Magnetical is Presence, Gravitational is holding on to survival. Mag and Grav balance of energies. Have to create a sealed environment which you can control the field strengths, then you can position. Without the balance your systems fail, everyday millions of star-formation are created in your body. The application of technology has to be in the hands of the Totality. "Plasmatic pressure" prevents you from lift. Only MagGrav field strengths above the matter can enter or exit reactor, this is fundamental. The inner core of earth has Nano coated layers, it was part of the original solid core Mother planet that created this planet. There are invisible Nano layers within a star. (Like the skin on the liver, holds it together), its not a matter state but a magGrav field. This is how structures work. Like a bullet in high altitude aircraft, cause destruction. Containment for your fields, airlock system, Earth has airlock system the atmosphere. Can enter the center of stone without destroying the stone. How the Universe makes Nano layers, Book #4. (38 min). Heating of the outer core of this planet. What a supernova is, etc. Every reactor he has seen they all potentially fly, problem is the cores are leaking through Nano layers, single cores have flown for billions years in space, the star-formation is secure way. The earth and atom not star formation, but earth is position

by conditions in solar system. The color of the Galaxy tells you what its MG fields is and you can match it. (55) This section is GREAT summary of Nano coat protection when entering other MG Solar Systems. Take someone's blood with Cancer send to China, run it through reactor and the person in S America whose blood it is changes. Kidney converts energy into a matter state. Planets central core fixes the Mag fields on earth.
Mike has come on again with more reactors. (1:38). If you add your DNA to Gans or plasma it can act both ways, very Dangerous. How to create MG pressure inside reactor. Nuclear material easily creates pressure. Right now Government allowing nuclear batteries. Strontium 90 decays into Strontium 94, this is problem in Fukoshima, leads to cancer. Plasma electricity, delivery of power at point of use. You don't even need to connect the wires to the battery. Fungi mutarium, growing mushroom from plastic (2:25) In future you just walk around the town and you absorb 80% of energy you need through the skin. Peace comes when you have enough to eat. Tritium is necessary for the research, don't need to Gans it, already Gans of hydrogen. It creates MG field from 2, not single, gives continued balanced state, electron becomes part of nucleus. Due to Plutonium it created Tritium. Create a MG field that H behaves like Cu and you've changed its structure. It's how UFO's can change speed immediately. Starship always travel in "twinity" (??). Iran will be able to create Tritium, Japanese already have it. (3:20) Nano coating seen only after 10,000 layers. Getting the plasma to go beyond boundary of dome, motors not coated.

49th Knowledge Seekers Workshop Feb 12 2015
Starship formation, reactors moved 6 cm over night, weighs 6 kg, 2 grams of Gans move it. Moving to find its own balance. Has been in this position for 8 weeks. (30min). They are not measuring amounts of Gans, Nature works by conditions and what is available. What are ratios?; CuO is physical side of human or planet, CO2 is emotional side, CH3 is energy supplier. When emotional pressure comes in you get cholesterol, same happens in reactors, cancers created the same way. Acupuncture needles and nano coating. When needle in body, body is a vacuum condition, the metal behaves as a Gans state conductivity state. Eradication of cancer in body in minutes, next step in learning is MG field strengths, this determines what the lymph produces together with neural. How conversion takes place. Body is model for reactors. On the basis of "Twinity". The reactors will be all one material Gans. Whole of Energy transfer in a Plasmatic state. One G is created on the surface of the ball. Moving to total MG field.
EGG film under sea (1:05). The yoke is very much like the earth and the white the atmosphere. When craft comes out of water, don't get the waves because mag field attractions. Space crafts are opposite the aircraft, MG field open up in front, no friction. Mike had idea of winning lotto for Technology, Keshe, "Maybe we don't need it, may be detrimental, must come through the man." This is 3rd time this Technology attempted to give to man, pyramids are all around the world, mystery was taught to man thousands of years ago. This is not the first time man been in space to see earth from space. When man moved out from East Africa towards Egypt, he was shown at that time the technology. Then man was spread out around the earth with the technology. Crossed the ocean through "magic touch", Megalithic around the earth at same time by the

"Guardians", for reasons of survival of race. You do not see pyramids in earthquake zones. Rituals were used to hide knowledge, still seen in the ruins. You will find the "star-formation" among the writings near the pyramids, as the tools to build them, and maps that are 30,000 years old. Peace is the cornerstone of technology. Kingship time is over, process started. Knowledge is increasing to the masses. (1:35). Area 51, but contact with man has never been interrupted. Man is ready to join Universal community. When you go to the seeds of emotional man you will get all the knowledge. The prophets taught the knowledge of the emotions but not the science, now its being combined. First time man was taught in understanding of emotions, not in words.
Mike, made some pyramids out of copper tape. Wife said he comes off as a know it all. He started a blog with Keshe info, but people couldn't understand, he was tired of all the secrets. (1:57). Moving objects from point a to point b. Is an electron info unique to individual? Keshe, with info of 1 RNA can create body of man, don't need to carry the man across space, just one RNA and recreate body, in a drop of blood, it carries both physical and emotional. Keep a genetic bank in case of disaster, then can replicate it somewhere else. All beings have RNA, that is your recording (how to replicate). Keshe admits he's an alien, without their help we wouldn't have achieved what we have. (2:08) Man is a creation of the conditions of this environment, he was not brought here from another planet. There are people here from other planets because they found an environment in which they could live. The Universe is like a neutron division to Proton and electron, or supernova. The Universe can expand as long as there is room to expand and the give and take of other Universes, balancing. Fusion is another fallacy of man. Peace in Ukraine announced by BBC. (2:28) Experiment drew up by Mike, creating a plasma ball between two magnets. 310 Nano coated tubes and wires wrapped around the Gans reactor, can produce MWatts of power. You control it by what you put in, not other way around. The central Core Gans must be homogeneous, that's where Fukoshima and Tritium come in. Doesn't need to be spinning. IMPORTANT!! This is how the stars work. Don't need high voltage to create Plasma when you have Nano coating. Helix vortex from one end to another release Energy, RNA helix, vortex and helix at same time, get MG energy in huge amounts. Tesla: loneness is the requirement for opening the creativeness. (3:42) "Inspiration and intellect comes when the emotional part interacts with the physical part at the point of purity. You add to your intellect, get inspired when you add to your emotional strength, which is your blood circulation, finds balance with your physicality at the level of your comfort. When you reach that point you add to the strength of your soul." Inspiration comes when your emotion is in balance with your physicality. Something like autism, repeating something till its comes into balance, how you get enlightened. Once its correct and in balance its added to RNA and to DNA, that is how transfer the knowledge through the genes. When the inspiration comes and it's added to the Essence, that's why you get the "prophet of God". This time you receive the Totality so there's no limit to the inspiration.

50th Knowledge Seekers Workshop Feb 19 2015

University accredited by Italian government. Want students who are peaceful and abide by Ethos, no patents, no military applications, but will allow Intelligence people in with the idea that they will be changed. Five health centers are authorized around Europe to

receive treatment with new technology. Release PROTECTION units against microwave and cyber attacks. Absorbs most of radiation (21 min). One Canadian group trying to hijack gmail, Keshe made threat to stop attacks. (pain pads purchase at info@omegaquantum.com) Frequencies are coming through the cameras on laptop, when hospitals need money they can attack certain people who match an image study, they had a very complicated system of attacks on population. These technologies have come through Nasa research and now abused (30). Is the pain pad effective against waves? Not enough research yet. Why they're targeting certain people. New topic, back to SSI lab and reactors. see fields that can lead to production of matter. Experimenting with collecting Energy from Coil inside a Gans with electrode and apply small voltage. Gans means a gas in nano state. Zinc and copper wires creates an environment for CO2 Gans. This system can be used to clean environments by tuning the current to create right conditions of pollutants. New dimension of Matter absorption. This is how planets absorb matters from the environment of solar system. Purification of water, system will attract elements. Can use to purify blood. Extract elements at the energy level then convert to matter. Tesla and Edison work with megavolts needs to be shelved. The plasma works with low voltage. (1:37). it's same way lymph converts matter to Gans, etc.

MIKE: presentation, (1:50). Hydrogen (1 proton & 2 electron is unbalanced, will seek balance), Pre-hydrogen has only 1 proton and 1 electron join becomes the first infinity loop. (MG is like a soap bubble). Why do we need electron? It absorbs the leakage of the proton, or it would decay very rapidly. Keshe describes how Hydrogen combines to Tritium electron and proton goes back to neutron. Video on Vortexes in a pool. Mirror galaxies get created by vortexes, in North Russia can see two suns. How they make non-stick Teflon coating on pan. (2:35) The atomic weight of water hammers the nano coat back into pan, best non-stick pan. It's a kind of nano technology around for thousands years, heated pan with drops of water on top. Natural nano materials, the ones in the market are made by "popcorn" method, not really nano coated. Left caustic in container for 1 year things growing in it. Armand experiment, CO2 box with sugar in water, stir with nano coated rod. To grow blood add Fe (hemoglobin), plants add Magnesium (chlorophyll). Created "new life" entities grown out of Gans. (2:57). Two vials, one create the neural and other blood in vials for 6 years. Replicated the condition of life in the vacuum body of man. By controlling the voltage can create different tissues. The 12 body salts as found by homeopathy. Can control psychological behavior of man. Schizophrenics switch souls when being treated with the Cup. What your system can't use gets converted to matter through MG. Sheds extra materials through production of hair for example, this is not understood by doctors. Puts two electrodes in box so can control the conditions. Have to be open enough to correct your mistakes, must coincide with Science. Write down first what your trying to do and predict outcome. In box is zinc, plastic and caustic. The plastic contains CH molecules, like sugar, means energy for the growth of organisms. Wherever fingerprint left amino acids, the basis of life. Keshe has some cups that are 4 years old and he replicating life in different parts of solar system. It's growing on its own. "The essence of life". (3:22). The 4 cups are in the structure of He. (Lucian joke what his group doing for CIA). Asking about Armand experiment, the Na covalent bond doesn't come into it, because matter state. Is what happens in stomach, becomes plasma state when add NaCl. When food enters throat,

which is nano material, the behavior changes to plasmatic, because its encapsulated. NaCl become plasmatic and will not stick together necessarily as in chemically bond. Their MG fields may connect with another entity. You create atomic plasmatic structure of Hydrogen. Lucian is like translator into technology language. "Once the Gans got produced it continues to create the Gans. (3:55). Problem of humans is they only believe in what you see. The air is containing many materials unseen. You have created the MG fields in the air in which to attract those materials and it continues to extract them. Like producing Pb out of the air, which was from the exhaust of cars. The environmental condition of the Gans, creates the conditions to extract the matter. Didn't need the salt because the conditions already created by the Gans. The space between the Gans is a condition or an environment for extraction of material. It's a dynamic Plasma environment. This is the world of creation, you don't see copper plates in creation. Still thinking in Matter terms!!! So the same box in Arizona will produce different Gans then box in Beijing. The difference between Plasmatic Battery then normal battery, plasma battery is tapping the main source. University fees 5,000 Euros per annum.

51st Knowledge Seekers Workshop Feb 26 2015

Last Workshop in SSI, moving to Berry Italy in South.

Cosmology of new technology. In the last few workshops have shown the creation of universe but knowledge is not deep enough to understand what is hidden there. (19 min). Nasa has photo of Central Black Hole in Universe, not correct. When the neutron loses its balance it divides and splits into 2 streams, 1 proton and 1 electron, they develop into their own MG field strength. Ejection of plasma from the last Universe. The shape of the new Universe is oval, get formation of matter as field strengths change. This assumption changes everything in world of Physics and Cosmology. (30 min). This shows how "god particles" are formed, interaction leads to ballooning effect. First time we understand the creation of the Universe. Superconductive environments at room temperature. He explains 0 voltage and low amperage. A lot of mysteries solved in Physic with this model, a new dimension to Physics needs to be added. Travel without resistance. Einstein not wrong, but the speed of light is for Matter State. Food going through the stomach is using the same principle. Instantaneously destroy any Cancer cell. In the body, the Energy conversion comes from Plasmatic conversion, not from electron friction. (1:26) Questions. Hemoglobin and lymph from Nano coating and gans video. (1:45). Two Materials link up and create an infinity loop (trinity), you don't attract other elements, but can link up to it. Have to look at the total environment. This how thymus and paratarid glands in body change matter into a higher order. Italy needs to reprocess the radioactive waste, use this method. Add neutron to material so it becomes a new material. By adding a Gans to a material, the MG fields adds and proton absorbed into a new neutron and the extra energy adds to total plasma and you get a plasma that behaves like different material, like an isotope. Why nucleus shares the charge, single or double bonds. (2:30) They're creating H2O from the air around CO2 boxes. Keshe experiment, two boxes within boxes, the one that drain energy with LED light produced water outside, the one without produced salt, solid state of matter. (Oasis kit drain current and produce water). (2:52). Think of the hot water and caustic, you added the energy to the top layers to open up and become Nano layers. You do not produce materials you produce the environment

the leads to the production to materials you want. Hint, if you keep electrodes near each other no potential difference (voltage), same with plates. As you move them away you get voltage. You create a Gans into a matter. Have to use micro-volt, atomic wattage. You're actually doing cold fusion in you CO2 kits, how can the plasma of a C attract 2 O and make one plasma out of it? You are doing cold fusion at room temperature!! All of you have achieved the dream of man and you don't know it. You're using nano-wattage to light LED. Shocking to Physics world. If you have understood you should be able to convert a Gans to a Matter state. (Lucian joke about Pentagon). You can use a single Gans instead of multiple. Most of the activity of the Reactors is at night (only MG fields of planet and not sun), the sun's MG field affects them in daytime. There are Gans and Gas reactors and nuclear Gans, could use Gans Hydrogen and achieve lift rapidly. No governmental support to do this work, Deuterium single Hydrogen. Brat can get Deuterium out of nowhere from Military. Tritium is needed, through plutonium conversion, then can use single Gans. (3:21) You have to learn the Totality for this technology and governments have to come along. The EU had a high level meeting on what to do with Keshe Foundation in regards to Health side. they decided to leave it, as it might not come to fruition. Damage to the pharmaceutical industry can be horrendous. So Japan is not allowed to use technology to help Fukoshima, because EU against would not allow you to give 2% to Keshe Foundation. So this technology must go through the masses. Italy broke ranks. People are only taking and not giving any donations. Years ago they won 25 million from Richard Branson (Al Gore), not received anything.

SUMMARY: NEED TRITIUM FOR Flight

52nd Knowledge Seekers Workshop Mar 5 2015

One full year since started. NEW University started.

Last week started to look at the shape of Principle Matter in the Center of the Universe. (12 min) The physical structure of the Atom and nucleus. We usually see more neutrons. For the neutron to reach the division point of proton and electron they have to loose their surplus energy in Plasmatic field form. When the Energy in the plasmatic MG field, the fields have to be absorbed by partially the protons and electrons in the boundary. Energy is released in a spectrum of fields. In the center of Universe there is a Source or a Reserve Tank, it has a spectrum, the further you go in stronger becomes. Energy absorbed from within structure plus from outside in universe. If you understand this then its the same in the body absorbing into skin and nails?? There is a new type of radiation, higher order then Gamma, not detected because they are plasmatic. These difference forms of radiation will emit different colors. (27 min). In the plasmatic MG fields can slow down enough to behave like Gamma rays, but can be harmless. All things on planet continuously releases these kind of rays. Going into a new phase as Knowledge Seekers, understanding creation. Developing a instrument to measure MG fields with modified Raman Spectroscopy. (53) How did he know about Gans of CO2, lady accused him of being an alien. Aliens have a different DNA then humans. You add to the knowledge and the advancements add toe RNA. Biggest problem of man fear of Unknown, and admitting that he doesn't know. (1:08) Bret left CuO Gans in container for months, starting to grow? Black dots in Gans, Nano particles that didn't convert to Gans, these become hair

or nails, bones carry this structure. Nano is a MG field and links up with Gans "tendrils", but they're Magnetic fields. They become a composite of Nano and Gans, nothing can stick to nano, but magnetic fields makes a composite. There's a red sphere in there, Fe got in there formed hemoglobin. This is the next stage in knowledge. Indigo color comes from CH bond, plastic. The Foundation has to create a database for new materials being created. Someone wanted to invest in K Foundation. It must follow ethics, no patents, can invest in spin-off companies. But the knowledge is free. Iran is using nanoclay particles to air smog. When you know that the competition has the same product, become more relaxed. In coming months hue amount of products will be sold on Keshe Foundation. (2:10). Merging of gas with Gans materials should be able to create composite reactors. This converts Gamma ray with Gamma radiation. Need them in deep space, do not need to carry radioactive materials. In a way its good-bye to nuclear technology as we know it. It's unknown science, you have seen but not understood. This is what happens in upper atmosphere and it creates N. It's the field of the Gans and not its presence. You don't touch the Gans but just transfer the energy of Gans. This is how Universe works. Walk away from the barrier of physicality. You don't need to sink your seeds in the Gans. Last week they produced water in boxes. What you need you take, what you don't need it takes (as in getting rid of disease). The juices from pancreas does this, information of rejection what the body doesn't need, through enzymes puts back into intestine to eliminate. The gas outside becomes the lymph and the core inside the intestine, or visa versa. You learn every subject at the same time, at the University. It takes time. (2:33). Nuclear Energy is the rapid delivery of fields. This can be done without radioactive materials if the need is there. (One year of work comes together here.) Combination of Gas and Gans is the next step over the coming weeks. Why the Gamma and X-ray leak beyond reactors. Now the speed of Light is a child's play. Using Deuterium in reactors. The interaction of the Gans reactor with Hydrogen reactor that were in the lab, that is how we achieved the 130 Tesla. (2:47). A comet travels into our solar system has one charge and then switches charge. "we do get objects that enter the Plasma of our solar system from time to time, but the barrier is even stronger then that of upper atmosphere of earth and its much layered. The comets get burned up. So the comets in our solar system are from itself (explained in Book 4). Majority of comets in this solar system are from a conversion of a Gas into a Gans into Matter. Scientists say they're dirty snowballs, if they're from outside solar system, why do they come back regularly. They are like stars but have a loose orbit that goes to the outer edge of Solar System. The comets gather material in their movement, not dirt. (3:01). When 2 solar systems merge, you get a new creation. All fields get merged and something new produced. We only see the stars that are in tune with the field of our matter level. The dwarf planets beyond Pluto what happens? In time they come to where we are and we get sucked into the sun. The "dirt" particles in tail of comets, rub together and become a planet. Cotton candy machine works same way, collect at the edge around a stick. If you take a Gans of CuO and spin it at high speed, it becomes a light. This is part of communication systems for the future.

53rd Knowledge Seekers Workshop Mar 12 2015

(start of HD, 1.3GB). Instruments developed for new technology, still at electron level. In space at high speeds, electron instruments are too slow. Need a Gans plasmatic detection

system. Chinese are working on it, 1 to 2 years. Conversion of COLORS into measurement. Has to be in the plasmatic flow of plasma, North South entry and exit, also fields are added in the Gans of the detector. (37 min). Countries that have the Anti-gravitational crafts have trouble controlling them because using electron instruments. System control of nuclear reactor and controlling space ship same. This what happens in brain, emotional center tells physical to get a banana, for example. Control mean, understanding the need, very different then what we understand. You have to understand the need. Control comes by predicting the need and providing it. In 1996 only 5 nuclear controllers in world, only 3 left. The season in relation to the sun, has a huge MG field effect on reactors and field measurements. Electron flow from Nano to Cu is AC, and only Nano coat is DC. Have to listen to Spanish and Chinese sections, they don't repeat what was discussed there. Reactor under water is a (detector), this is a huge development but don't understand. Tesla was half schizo with plasma because he was missing the gravity. Have to understand the thinking of Tesla. You missed it, CuO did not mix with CO2 Gans, the current flow is important. Each matter has different current flow. You do not find much current in a structure made of same element, that's why we see not much voltage but lot of current (amps). When you put a Gans in one of these reactors, it will find a specific position , and that has a specific voltage. The interface you have a balance. Why does Saturn have black rings, You'll see these black line between CuO and CO2 Gans. This is behavior of Nano plasma in a balance condition there is no light emissions. All the black rings have same voltage (potential difference), these are your point of reference. (1:10). Knowledge of God has no price, no patent, this is the only way to go, serve humanity. Boeing project "Phantom", they are trying to develop this kind of technology for travel corridors. Multiple personalities, see different color bandwidth for same color. Human body has the best detection system, study this. Gans material is condensed Gans in brain. need instruments to detect, control, and. (1:54). Possibly creation of H Gans from coke bottle, needs testing. Somehow the Coke bottles, in the way they were made, the caps and the bottom, soak in caustic, then produce atomic H. If you get CO2, you have a hole in bottle, and get Amino Acid, this is how vegetables get there color. Question on Armands gadget, outer wires read constant 300 Milo-volts, 0 resistance. (2:31). Announce opening of Space Ship Institute (SSI) in conjunction with University at Bari, Italy. Opening April 24, 2015. No homework, but at end of year you have to write down what you have learned and want to give to humanity. Italian authorities have a problem but as there's a recession they're allowing the new system. Will start at 10 AM so people can do whatever they need to survive, and afternoon 3 PM to 6 PM. All students are monitored because of past threats and actions against the Foundation. You come to learn and to teach, (rates in Italy 22 Euros/hour, institute gives 40 euros/hr).

54th Knowledge Seekers Workshop Mar 19 2015

Keshe has been developing this technology for 40 years, now opening a University. No manuals in the Space, you have to learn it in yourself. (:19). If you think you can understand Plasma after 5 years study, you have become narrow minded. This is a living knowledge. We'll not use tittles here, learn and teach as equals, first time in human history. Explain according to our level of understanding. When you start dreaming of the

Plasma, is the time you start to understand it. Belgium government have tried to kill Keshe so at opening function asked not to come. Criminal investigation going on. Yukoko from Japan and she went to Fukoshima to help her nation, now Keshe Foundation is leading gin clean up behind the scenes. She caused the government to move. If USA would remove the restriction on Keshe traveling. Keshe is banned from NASA. (1:07). Luca's demonstration of experiment, "Apple" plasma and trying to measure MG fields of apple. These are modeled after "Armen's Coil". Kundalini reactor. (1:46). One Belgium scientist created a black box that creates Energy out of air. Keshe asked to evaluate it, and declared it correct. He understood the work of Tesla in the matter state. Keshe developed different ways of coiling the copper wires. Perpetual motion the is invisible but effective on matter level. Coils sit outside and rotate magnets outside. Due to gradient of field strengths. This technology produces Kilowatts. Twist it back on itself. (1:55). A description of how huge amounts of energy that are crossing boundaries. Nano coat and Gans, trying to pressurize through Gans. Something going over head and we don't see it. Electron vibration that gets released in a Plasmatic state, huge amounts of energy. Amplifier of plasmatic energy. You do the same thing when you eat a banana (2:07). Forced pressure on the plasma through a Nano coated wire, add coiled copper wire Nano coated that you can add current, then Gans material and a Nano coated wire around the center. Creating a MG pressure that releases energy. You can even do it with plastic or wood. Tapping into Universal Energy and zero-time travel, because you have passed the matter border of plasma. We do this when we turn on electric heater but at kilowatts, go down to micro-watts and release the plasma on Nano coat. You have to find out at what level it will release. Tritium is the easy way and Japanese have it. Gamma rays from the plasma. Using loops of Nano coated copper wires. Take Cu wire, wrap one Cu Nano coat and one Al wire and Zinc around it. This is the structure of Human Body. Why do you think you have 2 legs? This is how Chakras increase in strength as go up. (2:24) Organs within the body dictates the strengths. So strong it produces Intelligence. How to create it without relying on the matter state. Why you have glands in the body. Kidneys control how much Energy goes up, which dictates the intelligence of man. No Cu wires in Body, but very low MG fields in the lining of intestines, locks in to what is inside passing to what is outside to transmit and convert it back into energy in the lymph, gets the entire body heated (37 degrees). You do this in your systems. Oil gushing out of earth for millions of years, plasma conversion has always been there, but need to understand. Universal Energy is as you need it, endless. The matter state is only the crumb left over. In Chinese group, why does the green leaves remain in freezing winter?

Last day in old building, moving to Bari, Italy.

The alignment of Eclipses, like with Pyramids. The upper atmosphere is in Gans state, when they come down they convert to matter. The conversion is the same in Stomach. The salt in Sea leads to conversion of Gas to Gans, (earth atmosphere is a salt Gas), and Gans to matter state. This heats the atmosphere of planet. You create the new condition for the conversion. Life exists within all the atmosphere, called salt conditon/Gans leads to conversion into matter. LIFE in the Solar Salt, "conversion medium".

55th Knowledge Seekers Workshop Mar 26 2015

Discussing the new schedule at New building for SSI. Expect a response, even a negative answer, from the Japanese on Fukoshima. Interview last night with Kerry Cassidy,

Camelot. (26 min). USA Aircraft carrier in British Isles, Americans were informed few months before that Russians had technology to take out communications. They used Submarine below and aircraft above to make the Aircraft Carrier part of the Plasma, which jammed the communications. Welcome Peace movement and provide technology to make lesser countries equal. Negotiations with one of the 3 top Space programs in the world, which would open all Keshe Foundation available. Possible block going on. Cannot use for Military and will be open. NASA wanted flag remove. The Belgium's poisoned also Marco on last attempt. People are mostly only taking and not giving, selfishness needs to be overcome. Lot of in-depth teaching goes on in Chinese, Spanish, Health, and children's. Do not just rely on Keshe for teaching. Keshe has a "limited teaching time" the clock is ticking, it is for everyone not just for special groups. He regrets how "physical" the teachings have become. Russians have developed a flying ship, hopefully they will open it to public. "If you gain through us, share with us." (:54). Music needed in space. Musical instrument developed to imitate human voice. Can Nano coat effect sound. Needs to experiment on it. The vibration touches emotions. Would the nano coat instrument effect the emotion more. Nano coating will create bandwidth filtering. (1:16). That's how you protect yourself in space, nano coat can block certain radiations. Stars give off sounds. They say sound can't travel through space because it's a vacuum. Light is created on stars through friction of fields (see book 4). Plastic can be sealed with acetone. Voice healing has been with human race since beginning of time. (2:07). Talk about CO2 container, coat the Nano plates with silicon so it doesn't dissolve. Zinc plate can also make a ZnO which is also like CO2 Gans. Pain pads tested in China, with push ups, fantastic results. HUGE WARNING, once pain is finished, stop using the pain pad, because it blocks the pain signal. He had pancreas cancer and developed systems to cure. When he broke ribs he did not feel any pain, because he felt that the system he was working with short-circuited the pain signal. Pads behave as anti-inflammatory, they take energy from the liquid in the body. (2:27). These systems are MG plasmatic fields, like acupuncture. Pain is an information a plasmatic condition is higher then what the neural system can carry. Pain shows itself as a current that needs to flow somewhere, a charge release is the pain. The pain pad's MG fields link up with bodies and discharges current. You don't use this in Cancer, because you have a pain then releasing the charge would cause the cancer to grow. (2:34). Wearing of fancy slippers, the little toe gets clipped and inflamed. The displaced toe throws off the nerve system, and further adjustments in ankle and finally hip replacements. (2:43). Better to wrap pain pad around leg because body becomes part of the plasma. Skin is best example of Plasma made by nature. Have technology to repair disc damage. Do not use for Headache! Rick developed a double walled jar with a Gans inside sealed from the water added. (2:59). Keshe says Rick's invention has huge implications for double layer Gans materials to use different ways. Can be used as measurement tools. Can even touch the emotion of man if you were to drink from the cup?? Could use for seeds, in this way it has no physical contact. Military wants to test on mass samples. For example, can use on a boat of refugees, can test instantly for diseases, and treatment. Diagnosis of disease through Gans recognition of MG fields. Full control of government testing and applications. (3:20). He created diamonds and they said don't release. It was flawless. Zirconium tests like diamond, related to structure of Amino Acid, related to nano coating of plastic. Don't use it on the brain. Let us continue to collectively develop the technology around the world.

Not to make money but help each other. Pain pad shoes (3 kg) if done right can cure a lot of diseases.

56th Knowledge Seekers Workshop Apr 2 2015

High security at the Opening. Fukoshima clean up still testing. Announcement about collaboration with Russia. E-Book available online. (:36). Music presentation from last workshop, continues with more details. Keshe says you are the first to understand this explanation, cell division, this is how the Universe is created. Single cell divides into two, when it divides it increases in volume. The 8 cells become balanced and become 1, and it can do it again. (:50). Why do you think the gravitational takes first. Because all the fields are available in that area, because its compactness, and in the center it's always stronger. The difference between Magnetic and Gravitation gives the mass. This process goes up to 10 then restarts. (1:00). How the division takes place. This is the essence of the Creation. 6 divisions on the outer circle with the gaps between make 12. Stonehenge 12 stones, 12 disciples (1 woman, 12 man), clock 12 division, in the balance of the fields, or soul. Twelve is fundamental in Creation, form is the essence of the Creator. Principle Energy. The 4 becomes 3+ and 3-, why? (1:17). In the image of the Creator. World peace treaty same principle, 12 core members, through them to reach the totality. neutron dividing into electron and proton, when you have one more or less, creates an imbalance (Judas), the imbalance causes the division and thus expansion of creation. If all 12 are in balance, they pull equally in on each other and there's no room for expansion. (1:33). Analogy of Moon like an electron of Earth (proton). Keshe uses analogy of shower head and water hitting floor. Planetary system can be there but invisible to man. As the fields of the plasma of the sun radiates out, the MG fields weaken and become solar dust, even planets and moons. When the fields divide and you get a balancing, then the moon is a collection of the dusts at point of balancing. Each moon is created according the strength of the layer, can have multiple moons. isotopes are created by radiation of additional neutrons in the nucleus according to field strengths trying to reach a balance. Moon not created by collision of asteroids. (1:50). Nicolas drew a graph that is a map of MG fields on a plasma. Could become a MG detector. Earth is a plasma. When you get multiple plasmas on top of each other you get the diamond structure lattice, straight line fields. Why light acts as both a ray and particle. The skin acts this way, has different layers on top of each other. different field strengths superimposes on each other and create different materials, endless combinations, and why you get certain materials in certain parts of Universe and not others. "Wormholes" are pathways between Universes. By imposing a number of these fields on top of each other, UFO's create transparencies on different levels. Body can create and body can make visible. (2:08). This map can also work on the Plasma reactors, where you can get the different field strengths. Keshe invites him to come and teach at Foundation. (2:26). Create free plasma in the reactors. You reach the essence of the emotion of man and soul. MG Pressure walls in the reactors. The skin has built in pressure walls. Nicolas is right on with the pressure walls. Need to translate into physical structure. (2:34). These pressure walls are everywhere in body. Conditions created by different layers of body structure. The fingernails is an example of different layering on finger, and look at the straight lines of fields in finger to allow for flexibility (of field flow). See the diamond structure in the skin. You can read

the emotion of man through the skin structure. How is holding the cup gives lot of insight into soul, lines going outward is a giver. The black skin means not materialistic, sharing culture. Emotion shown by physical structure. Eliya, in the skin each Gans material has AC/DC and you get interaction with other plasmas, you loose the field strength when you go out from the Principle Matter. PM is the condensed nucleus of each Gans, that's why at the end of the field lines those parts are flexible with other fields, as in fingers. Describes how Gans can penetrate skin. Every cell in body has spherical shape. (2:58). Back to Nicolas and MG Pressure Walls. Same as with the skin and how it penetrates the Gans. Arman developed another way to create MG Pressure Walls, by Nano coating uneven and with texture on the surface, each plate is unique. Rolling of the copper plate give different surface structure. Nano coat MEANS to release the atomic structure to the plasmatic structure attached to the surface. Flares on the Sun die to Plasmatic MG pressures. (3:22). Create the pressures in the back of walls. The skin has different cores that creates the pressures. How to create rotation without motors in reactors. How the sun rotates. If you create a cavity in the wall of reactor, it becomes like electron.

57th Knowledge Seekers Workshop April 9 2015

Nicolas Chuaww from Tanzania, Dung beetle roles the dung into a ball on the earth. The fields are being released. It collects more particle and accumulates more fields until it becomes almost a perfect sphere. As it rolls around nano layers. (:25). Talking about the absorption of energy and mass of the center to the plasma. The expansion is due to the weakness in the magnetic which allows the gravity to expand. The case of the earth is different, due to different MG fields, the gain of layers on this planet is due to the interaction of the layers. We are continuously showered by cosmic dust whose MG fields are absorbed. In Scandinavia the earth gets showered with rays of Cu, but it's different in different parts depending on the fields. Conversion according to the MG field. the internal MG field coming from center of earth determines what the Gans will become as matter, depending on the environment. (:41). Same situation happened with Mike, great teaching but the assumptions not correct, he then disappeared without correcting his knowledge. So the center mass changes, but if it increase to a point where it would change to different element. Fusion doesn't exist the way current man believes. Coulomb's barrier is the strength of the atmosphere in relation to the plasma of the solar system. What they call fusion is like trying to put to eggs together and crushing their fields. Squeezing the magnetic fields and then colliding them, impossible. For example, Plutonium as a plasma traveling through space is only a plasma, when it enters earth's fields it becomes Plutonium. Here is center error, "there is no He in the center of stars getting created". The heat generated in the center of the stars is due to the frictions of the plasmas. They become plasmas of different strengths. Supernovas, gets layered, they don't fused, they are dynamic plasmas. So scientists are all wrong, Keshe refused diploma, so Queen Mary College sent his diploma wrapped in Toilet paper roll, he values diploma that is not based on knowledge as toilet paper. The man who makes ASSUMPTIONS is the one without knowledge. (:52). Part 3. When 2 plasmas interact, for example a man and a fish, when you throw the fish line in the water you have create a line of interaction, even if fish doesn't come, through your intention to catch fish, and fish's will to survive. Same with the asteroid and the earth, come in on the gravitation of

the sun. When we see Matter we think it's finished, but we see the Matter only when the MG fields reduce to level we can see, but it's not fixed. The neutron, proton and electron are still plasmas, and there interactions with environment cause friction and loses of mass, and when gets too weak gets rejected from the total mass. We think that the same electron is always there. Not true it is dynamic and changes through interaction. They continuously change orbit. Where does the electron go? This is fallacy of Stephen Hawking's, that black holes are big eating machine, wrong. Black holes are source of life through conversion and interactions with environments. The Mass is the difference between the gravitation and magnetic fields. (1:03). This one dimensional thinking has to become two and three dimensional. (if you loose more to your environment then your mass changes.) These teachings have to keep to the correct way from the beginning. Keshe's e-books will be put on like "wikipedia" webpage, which the knowledge can be added to it. It will be dynamic. (1:22). (1:35). The graphics of fields, reflect stars, the stars create "mirror" images that are only reflections. Reflection of galaxies are also out there, which don't exist but is only CuO, for example. A number of UFO's in the night sky are masked as flections of stars, and can be here in seconds. In fact they are mother ships. Getting ready to teach the Reality. Can show the plasma of a cancer. Can participate around the world with Health program. How phantom pain is created. Have to see how the Plasma of the cancer effects the emotions of man. In Fukoshima the tests proved that they can remove all radiation (and Calcium problem), but America government put pressure on Japanese not to release Keshe involvement. They don't want that information public. (1:55). They will not allow any information to be released. Will set up Keshe Foundation in USA. (2:09). Knowledge is not spread by words but by the essence of the soul.

58th Knowledge Seekers Workshop April 16 2015

(:09). Three questions from person: 1) Disclose full effects of technology: "if I tell you full effects most of world would commit suicide. It will take hundreds of years even to understand what has been given. Like when man tried for hundreds of years to fly like bird. 3) Completing the mission of the prophets like Christ. People tried to take over the Foundation because they could make billion, but Keshe stopped them, they don't understand we want to get away from the billions. All the prophets fell short, the soul of the physicality got detached from the physicality. This is why Keshe keeps Foundation transparent and he lives comfortably and gives 20 hours a day to the work. (:25). He's aware of two souls, one is physicality and other is connection with soul of physicality and soul as a creator. Doing best not to make a mistake between the two. He sees his anger when things do not go the way they should, and seen falling in love very easily through the heart of the man, but remaining with the purpose. At all time being in control to not make the mistakes of past prophets. The knowledge of the prophet has to be like the sun, continuous and forever. The mistakes of past prophets, they got incorporated into the physicality of the planet. That is the difference. The Belgians, Canadians, and Americans blocked the use of radioactive Gans and instead he showed without it. Plasma technology releases man from the state of the matter. We use the science to preach the correct way, bringing the soul and science together, we teach the ethos of the Universe so not to hurt yourself. (:31). Can you suggest ways to understand easier? It depends on the state of

the individual. The creation is one, it depends on what part of it you want to accept. Can you recommend some kind of meditation? No ... you have to recognize the totality in everything you do. If you have been privileged to love another being then you can understand the totality. There is no need for physical dimension. No easy path, every man will take it according to his own intelligence. Why don't you do miracles? We have touched the soul of every being on this planet, so we don't need the school of thought.

(:41). Somebody asks the big Alien question, Reptilians , Draconian, manipulating humanity and evil groups. Steven Greer's work. Answer: In space we do not have bad and evil, unless they change and show their allegiance to Peace, whatever you are telling about evil ET's is a fairytale. If not you would see wars everywhere around the earth and Universe. Man is not allowed in because of the animal behavior of the man. We contain we do not interfere, contain a virus, man's behavior is a virus. Evil ET's don't exist. Space is a Peaceful place. Evil is part of our own behavior, to justify ourselves. Robots have been developed to kill people. What's going to happen. Man has become dependent on the microchip. Keshe has technology to neutralize them and put man back to cave. All chips are of plastic (C - H bond). Just need to create MG field for C - H, and all knowledge last hundred years gone. Man has no choice but to turn toward Peace. The brain has a C - H bond. If the call of Peace is not answered, keshe can demonstrate power. World leaders meet on regular basis on islands. Rick this is not a joke, we give the last warning to world leaders. If your mental condition allows you to change. Next Tuesday offer package to whole human race. Introduce a new structure into the working of the man. (1:04). United Nations have no say, it's corrupted. Replace work with one soul of Man. The president must answer for Iraq and Libya etc. to the one nation council. In future take his name off. There are no earlier visitors, we are here all along, even though not away of presence. We come to Earth to see how bad it can be. Right now there are millions among, "animals in fur coats waiting to devour each other". Rick says, "we ask a tech question and get a spiritual answer and visa versa", Keshe sets him straight, but he doesn't understand. When you understand the structure of a body you call it Gans. The soul needs to know how the body works, you make the division. Example, you man the shoe wrong, damage leg, in pain, burden on society, etc., so you need to understand how things work.
Can you convert O to H at room temperature and pressure, Yes. But go through Gans and Plasma state. You change position of plasma and what arises. (1:22). Is it true Time doesn't exist, only 1 moment in Time? If you want H from Plutonium move it back 8 cm. The time it takes for H to move, is it? Time is the essence of the being. Time in space as humans look at it, doesn't exist. Always at 0 time according to where you are. Electrolysis, what does it mean? When will Authorities okay cleanup of Fukoshima? Americans wont allow direct involvement with Keshe, even put a 4 year old girl in detention. How many dimensions does Space have? Depends on what you call dimension. Space is strength dependent, you can dictate. Space has a dimension according to the position of the observer. In the first classes Keshe taught last year, he thought man was intelligent enough for the full teachings, but it was a huge mistake. It put the "fear of life" in them. All the teachings will be live, whatever you need will be taught. The purpose of the classes is not to teach, but to Enlighten, big difference. Knowledge Seekers. Keshe is trying to pull out of the public arena, start to transfer now

instead of waiting for him to pass away. (1:45). Division of Gans, the same as Supernova, the MG fields become unbalanced and divide. But you can control the conditions for this division. Not as in Fusion or bombarding the neutron, but by controlling the conditions of environment. It's done in body through B12, it converts the behavior of a Gans of Phosphorous into a Calcium, or visa versa. If you put a beam of X-ray or a beam of neutrons into nucleus it explodes, this is physicality. In a plasma you have to take both Plasmatic Gravitational and magnetic fields and create a division. When body needs Nitrogen it looks for the nearness Gans of element which can divide. So N is (15/16) and Cu (63), so it divides Cu into 4 N. To create the conditions, dilute the strengths. The body converts according to environment and what's available. This is done by Parotid and other glands in the brain. (1:52). Millions of people eat dirty food don't get sick, but you as outsider eat it and get sick, because you are not use to conversion method. In the Star Formation reactors, additional reactors added to create material according to conditions you create. Also for diseases, you replicate MG fields of disease and heal it within minutes. Create conditions through emotional part. The knowledge is freely available outside this planet. Through the CO2 Gans can create the emotional experience of a Banana, you see and taste banana. In space you don't have to build a reactor for each substance, but instead give the emotional experience of eating a banana, much easier than creating an actual banana. For this you need to understand the work of the Star Formation and free plasma, then you'll understand the emotion, and the essence of the emotion within the free plasma. Then the SF can be anything you like. The behavior of the plasma according to environment. This is why so much problems with injections, because you introduce a matter into the Gans of the blood. It creates changes, side-effects. Medicines can be custom built to the blood. Arman in China at factory without any confidentiality contract, completely open. (2:14). Low speed rotation (50 to 100 rpm) can create more power, and it absorbs more of the plasma. In the Health section people are experimenting with Gans, they need to do blood tests to monitor. The plasma moves at the speed is natural to it. As the Gans looses its energy it gives Matter. Yes, there are huge amounts of turbulence in Plasma, just like on the sun. (2:35). When Keshe worked at Queen Mary College reactor the field peaks were way outside the reactor, workers getting poisoned. In spaceship provide area where people of different field strengths can survive. Like fish can't survive in air. You can fall in love with Alien but can't have children, so need to experience soul love. (2:46). Keshe can control plasma with emotions, but he has different understanding. Keshe talks about his development, he gets impatient with injustices here on earth. You can elevate emotional connection. It's not meditation, which he says is only for the physical aspects of man. Rick and Vince, got some donations for flights to opening.

59th Knowledge Seekers Workshop April 30 2015

Start at NEW LOCATION, Graphics of Neutron division. (:10). The Keshe Foundation accepts the total package of 5+1 Treaty with Iran and USA. Iran has a right to be a nuclear nation. Release of the plasma technology to share internationally. Instantaneous communication Zero Time, throughout Universe. Health knowledge you can send a blood sample and can be treated from earth, whatever disease you get. Last year asked for funds to build ship to go to Moon, nobody gave so he went to governments and rich people.

April 2016 plan to industrialize technology mainly with Chinese. James Hanky from USA Armed Forces came. (:32). Rick read a letter of appreciation and a check. We don't transfer holograph to plasma, instead transfer an envelop with the contents inside. Give the enveloped as to open on arrival. You do real time real transfer. What's the need for spaceship when you can arrive instantaneously. Magnetic memory (RAM). Nano state is half matter and half plasma. Transfer information through Nano layer, not matter. MG fields can bend matter. Light is also a plasma, outer field is matter. Plasma divides but not the soul. If bird eats man, it carries the RNA of the man but can't utilize it so doesn't gain in intelligence. (:50). Man can move between levels. RNA carries the information but needs the DNA and physicality to manifest it. Can use same RNA but you get different DNA depending on the environment. Are the human beings of this planet? We have access of ancient people (Christ) if our ancestors were here at that time, then we have that connection through the RNA. This is how the Core Team of Keshe Foundation can change everyone on this planet. You can't change the soul of a man, (thou shall not steal). Explanation about Pope John Paul, he was aware of the abuse of the priests so his soul got mixed up with that, so he didn't get full benefit, because all of the priests are a part of same structure. They have to replace what has been taken away. People complain about Keshe mixing religion with science, he says no, you can't have a free plasma without having a free soul, and there is a structure to it. (1:11). Marco describing his reactor from Chinese, 3 small inside large reactor inside a vacuum. One person used mercury in reactor. (1:29). Keshe teaches again, talk about speed of reactor, slower speed collect mass, High speeds shred fields. There are about 10 different reactors in lab, and all effect each other. Keshe books on pdf, get sample and then a key to open. Special facility to finance "spin-off" of the Technology. New technology is knowledge of Love and find a way to share. (1:50). A guy with a lot of spiritual experiences now trying to learn the New Technology. He's a self-taught person, puts spirituality and science together. He went to see Dalai Lama, and will give presentation soon (he's talking a lot ??). We don't want people just coming for flying reactor. KS have to write their own paper, not peer reviewed, but added to library for everybody.

60th Knowledge Seekers Workshop May 7 2015

Start of NEW Building, Classroom. Now Keshe Foundation is not just one man, releasing technology worldwide on free for everyone. Medical treatments on donation basis. Health section start in June on Cancer. Accept 100 cases around the world to test technology. Each case is totally different from one another, this is good test for space trail . Send request to cancer@spaceshipinstitute.org. (:13). Doctors are also invited to monitor their patients. (:23). Luca makes presentation, how the Universes works, neutron which is a universe. Each thing has a unique field strength based on its own exact mass. Creation of blood stream and heart, and cell. Ancient Greek navigators wheel. How membranes are formed. (:56). Keshe, we have to give him a chance to explain. He has some valid points and right to teach us as anyone. Keep repeating yourself. red and blue lines are MG fields. You're going into the philosophy of the creation and it needs the physicality of creation. It's too complicated. Plasma fields of our bodies, looks like symbols of every religion. (1:06). You touched on something, symbols of Christianity, was given thousands of years ago, Star Formation is symbol of the Cross draw circle around it and

you have the Universal Community. It's the essence of creation, and why Jesus called the "Son of God". The Star Formation is a channel to the Creator. When the Creator is present (Star Formation) no need for the priest. The Essence of the Fire, the Sun. Christianity is a derivative of the Zoroastrism, because people couldn't understand it. Structure of RNA and DNA looks like flowers from concentric circles. (1:17). RNA and DNA are different from 1000 years ago, because it grows and accumulates, that is how we evolve. You can go back to original recording where it started. We all (all beings on earth) started from same DNA, from the Sea. Can create a robot with emotion from the star formation. It has happened before that the robots took over, they need to be controlled. The knowledge, when one gets it we all can access it. Whatever we discuss now is added to the soul of man even if he is not present. The memory are added. (1:26). Through the free plasma of the Star Formation , we can touch the soul of the man. We can effect his soul so he doesn't even know why he is carrying a gun. We can create World peace by overriding the brain. But if Keshe does it you'll not learn and will go back to animal. We are teaching you to do it. The Tesla batteries and produce water. The sign of Pharmaceutical, line and 2 snakes. All the symbols have been put together for the time of collection, now is that time. The earth and galaxy have also a heartbeat. (1:41). The sign of Foundation is "Horn of Plenty", physicality receives information from the soul. The 7 tones of the Universe. The Tri-Tones. The Seven Valleys of Koran, called the music of universe (peace). Every structure in Universe has its own pitch (field strength). Lucas presentation on the Plasma battery. Keshe released Nano technology creation with caustic open to the public, so they can't patent it. (2:03). These batteries are Nano. More energy at night then in the daytime. This is a lasting energy source, it is absorbing energy from environment. Copper decays. Add to it ceramic and you get absorption of radiation as its done now at Fukoshima. By scraping the Nano wires at bottom you get AC current also. Make it at home. Tesla corporation released their patents because Keshe has already done it. Next step is add Gans. (2:42). It's potential in KWatts. When coating wires have to keep track of what ends you cut, so the plasmatic flow is not interactive. Also pay attention to Nano to Nano to get DC. Have to wash th caustic off or it will short circuit.

61st Knowledge Seekers Workshop May 14 2015

Reviewing Cancer, Health. Fukoshima: working with Tecko directly. Health section will open directly to Japanese to help. (:22). Agreement with Keshe Foundation is to make available Tritium to world as pay back to Keshe. Spaceship launch pad in new site. (:30). Ricks ball reactors. (:54). Production of water coming soon. (1:00). John Bliven from Arizona, with John Searl Aerospace to bring technology forward. At age of 4 had dreams about the laws of nature. Video of Searl Effect Generator. Keshe discussed this with USA Navy in 1975, it lead to levitation and not lift. Levitation on electron level on physical and not to lift. In the 1950's he built generators but they flew away, used dielectric and it became a free energy generator. He built a spaceship in England and flew around the world. Called "flying saucer man". He built a 21 foot craft flew all over England, these were UFO sightings. Trips to the Moon. John was placed in jail, burned down his house and shop. (1:23). Otis T Carr was taught by Tesla to build space ship and free energy. Space ship used rotation and counter-rotation. Operate the craft by mental interface and

move through time and space. In order to operate the craft you have to have higher consciousness to operate. (1:41). The German Bell Spacecraft were used for war and so they didn't function properly. Secret space program by Richard Dolan, multiple programs. (2:00). Keshe goes over UFO and Spaceship and free energy. All these systems are still in the Matter state with magnets. Keshe is bringing in Plasma technology and totality of man in space. The Russians have put the rings different location and added Gans which made possible to control lift. No government has power to over turn the movement of Keshe to open to public and not dependent on one man. Collaborations must be fully open and transparent without Government control. Keshe extended his hand of collaboration. (2:17). Why haven't the governments come forward with Spaceship technolgy yet? Because missing something, what Keshe has developed, that is MG Field Plasma. Keshe describing all the attacks on him and other scientists. The governments are afraid of Keshe because he is uniting the common man. (3:00) The man from last workshop give presentation on spirit and science. (3:17) Lights filmed on the Moon, what is it.

62nd Knowledge Seekers Workshop May 21 2015

Make teaching available on a daily basis. (:12). Changes in humanity, have to learn the true meaning of the peace means. Asks governments for 1 day of peace each month. He put CO2 Gans in flower vase and last long time. June 21 is a day of Peace. (:22). If after 21st August no Peace, Keshe will dismantle all weapons on the planet. We have access to your brain. Man will only accept technology out of fear. He has Nano coated wires on Computer to shield from waves. Keshe has 35 years experience with high level governments around world. (:33). They accused him of betraying humanity by giving USB stick to all world governments, but they still failed to act. In time he will demonstrate silencing the guns. He demonstrated with Dr. Eliya to stop reactor #2 in Star Formation. One Jewish business man stopped selling knives because one man bought his knife and killed with it. He will show both sides of the technology good and bad, can make the muscles fall off of man. If by Jan 2016 governments don't act on the peace he will show destructive power of technology. (:51). Mr. Gee ? is one of the core members and make a presentation, part 2. Picture from Hubble of a Plasma in space. Difficult to follow this man. The Trinity. (2:13). Keshe starts teaching. Gee is a true passenger of space, lives on a boat, and he has no obligation and lot of time on hands to think about these things. Future will bring plenty of time to soul search. Message for Bret and his military contacts and Colonel Hanky, to stop firing bullets one day a months. Americans make the first move for peace. (2:22). Take down a satellite. GPS was a conversion of military satellite to civilian use. (2:36). John Searl from last week is ill in hospital with breathing problem. Keshe says many world scientist have an extra sack that forms just off the windpipe. He doesn't prepare notes, it's all spontaneous from the soul. The 5+1 Treaty. Discussion of Star Formation when one reactor sinks. How to control the MG fields of reactor. You can use a reactor to make the car fly, by creating a MG field strength around car. (3:07). Going over reactor, add Fe to reactor. The MG fields are locked, that is why you don't see lift. Look for physical interaction, plasma layers that slide over each other. This gives you MG fields and a vacuum, the totality of MG fields multiple to huge level of energy. Find a gaping material so they can slide over each other.

It's sitting so close to you, you don't see it. The coke bottle. Understand Magnetic separations. Look how the muscles in body are separation. This replicates the structure of the cells. The earth is in the Plasma of the sun so whatever we build on earth, the size doesn't matter. Can make gold. Rick is on the right track. Housewives work with it everyday (salt?). It's Nano Materials. This is how the Gans of blood moves so fast in the heart. Get a Gans in a box, then black accumulation on bottom. (3:35). Going over separations. We have chosen you and do our job through you. Nano material with separation, I think you have to create a Gans/Nano material. Flying in 2 ways, the essence of thinking or by physicality of action. How to choose the middle layer to move in the opposite direction. (3:56) Each of the 12 core members brought a piece of the puzzle, but you didn't put it together. This is like the first Wright Brothers plane. Need to understand Deuterium. The knowledge was with Zoroaster and flying carpet. Book #2 about the light, the Gans stays separate but magnetically connected.

63rd Knowledge Seekers Workshop May 28 2015

(:09). World Peace Treaty Road Map. Called to commit yourself to what you signed. Transfer diseases outside the body with CO2 Gans. Can bring Military Satellites out. Be humble, this will be the first time to get peace without war. Read out Road Map (:20). (:40). Questions: Lasers and Plasmas. (lost Keshe for almost hour) (1:33). Keshe is back. Push for movement releases outer layers of Nano coat, need very low voltage. Your body continuously produces Nano materials at less than 1 micro-amp. It releases the atomic structure. Heating speeds up the process, but in cold conditions relay on salts MG fields. Heavier salts are faster. NaCl is faster because sodium heavier. Can also Nano coat from Star Formation which is easier and safer. When work in matter atoms are very close together and stick to each other, but nano material has big gaps between. Gans is even more loose, but they are connected by MG fields. There is a flow of MG fields become Superconductivity. If you touch nano they get squeezed and loose some property. Have to be careful when cutting Cu wires for nano coating. (1:51). How to create motion in the plasma without motors. Move away from Motors. This is how U works, when you have mixture of different Nano materials, it creates motion. Chinese showed this yesterday in online classroom. This is how you get movements of the continents. Inside center of earth fields create conditions of the motion in matter state. This is how conversion from plasma to matter state happens, by changing of the field strengths to conditions of matter state on the outer layers, and no other way, not by decrease in temperature. This is exactly same on the surface of the sun, even though you still see the plasma inside. (2:01). Marco describes the Chinese experiment to eliminate the motor. Can't understand Marco. (2:40). Keshe comes back. Compares to adding vinegar to batch to make vinegar.
Mike comes on. Cold nano processing, used 2 graphite pencil as electrodes and applied 2 amps and he got Graphite Gans. It goes from Graphite to Grapheme with a laser from a DVD player. He achieved Nano coated plastic. Mike has come back. Talks about love. Eliya favorite word is love. Nano coating is like a door to open. Glands produce an enzyme that is a nano material to open and close the membrane of cell. Calcium locks the door to nano coating. Want to open door and keep it open and get a draft, fields increase. Coat both sides to get a speed. (3:12). Keshe, "this is still schizophrenic state of matter, with gates, etc.. We want to look at Plasmatic state not with gates and matter. It has

nothing to do with gates. Ones you free the Gans then they are free to flow, they find own balance which in itself causes flow and increase. There is no excitement in plasma state, not vibration. Why your CO2 boxes stop producing because they find a balance. The Foundation should not teach wrong way or back in same old condition. Looks like you are refusing to grow up, need kick in back side. You have already learned to make Gans, now go further. You get the same result regardless of the Gans you use. Need to get the Gans into the free plasma state. Keshe wants to close Chat Rooms, holding people back. (3:24). Arman and dry Gans. Keshe comes on, how to make a dynamic plasma with one Gans. Use the 3 states of Gans, Dry Gans, wet Gans, and a Nano of Gans, then mix together and you get a separation of fields. This is exactly how the Stars are created. End speech of Keshe, have for first time tools for peace, the roadmap was at the beginning.

64th Knowledge Seekers Workshop June 4 2015

(:09). The wrong Roadmap posted with peace sign, Keshe rejects this sign because it accomplished nothing and only made money from it. Keshe always signs each paper individually and notarized, like the patents. Last week Keshe had a meeting in Rome, one of the most powerful politicians in the world, they think a like. The integrity of the Roadmap depends on how you make it personally. The world leaders and military have no objection to World Peace Roadmap, because they think it can't go anywhere. The leaders will not act because they'll loose their position. He got thousands of emails, "he was an illuminati, he was traitor," etc.. Green Peace is only talk nothing to substitute. China is manufacturing so that Keshe maintains the technology correctly. (:20). Keshe's mission is accomplished now he has to see it through. Now the KS have to teach. Aliens will be brought in to teach and demonstrate, and paralyze Defenses in one go. Four times they try to kill Keshe, so he will announce alien demos in advance, by UFO's. Negotiations with governments has failed, now go straight to people of earth. You have no choice but to walk the path of peace. Take thoughts of war out of man. (:29). This technology will hurt no one. Take the idiots out. Weakest point is Amino Acid. The terrorist became leaders and then became Nobel prize winners. Put your blood in CO2 Gans reactors and you connect to every being on this planet. Nobel Prize makes you one of us and continue cycle of terror. Blood from 3 different races that love each other, and you reach anybody on earth. Black in starter, Middle east is division, and white is end product. Mix in a Gans and you control the RNA. (:35). The reactors are a copy of your soul. Out of the matter you created the Free-Plasma, and you mix with another Free-Plasma , your thoughts. You touched the emotion with what you want and the physicality responds. You control the man. In the space it's easiest to do this because you adapt into the environment otherwise it takes millions of years. If you do not go for Peace, we will use this tool. Gans, Matter, Plasma, and Gas; you put in reactor and you get Gans and then matter. The Aliens have been among us for a long, long time. The biggest objection will come from religions. Keshe's background, Saeed descended from Mohamed, Cohen descended from Moses. (:47). The Vatican paid $10 million to Italian government to mine border with Iraq, Ayatollah put children to walk out and detonate the mines. Only the state of Israel helped Iran. He brokerage the peace in Northern Ireland, and he has all the records with him. Vatican tried to get the Church of Russia in Ukraine. Was present when Philippines president Marcos got gold bars in London before leaving office. The state of Israel, 52 State of USA. Keshe gave the governments the USB Key but they

didn't give to people. Behind the scenes Vatican controlling, but don't consider Asia. (1:03). UFO Video filmed by Keshe. Describes UFO covering the sun. The interaction with U started, you have no choice. Bring it in yourself and it stays with humanity, if we force it on you, when we remove it you go back to animal. The Crusades started there where the Keshe Foundation. This Technology came out through Islamic Republic of Iran (same as Moses, brought up by King). (1:23). Instead of 65% taxes by governments, and only 20% needed for schools and health. Mafia has 5 to 7% and leads to 25% total income. You have to look at the failures so you can correct them. What's going to happen? 30 - 40% of educated people will leave the planet in the first 3 years of Space travel. 50% of that number will not come back (Universal statistics). It will leave a vacuum of educated people on earth to care for this planet. Human race has to solve it. Can agree not to add the blood of man in the reactor. (1:32). Choose a president and we'll make him forget. A gun factory told them they're getting huge order for another war, bigger then even WWII. Vatican has paid for it. We can make 3 dimensional brain and control thoughts. A lot of you will have problem because it's ingrained in RNA and DNA. The reason is fear, don't have confidence to achieve lift and make peace. Without change in heart can't achieve lift. Because so much wrong has been done to you, you don't know what will happen next. If you choose peace we give you lift. Many of you are not from here, but have mutated to survive. (1:47). Saudi King were set up by English Monarch. The oil money goes to Swiss Bank owned by Rothschild who are related to Queen England. 100 dollars per barrel and $10,000 in by-products per barrel. All this money then used for war and not peace. They are bringing down the soul of Christ or Mohamed, because he is responsible for them through karmic connection. (1:59). I will achieve my goal of Peace, we brought reinforcements in, the UFO demo. One of you is one of us. Humans are sheep. Keshe describes that a Gans is in your cup but don't understand. If your soul is pure enough you can fly without a craft. You can fly with your body. 60 kgs are sitting in your body (H_2O?). Your body is made of Gans. Have to make sure the Gans of blood stays in the Gans state, that means Nano coated reactor. Habit of stealing is part of your nature that's why you can't see it. You have to prevent the next generation from falling into the hands of the abusers. Who have you sold your soul to. Going to announce a new energy system. By sharing the knowledge we'll have the peace, no patents. You have stolen knowledge from me for 63 weeks, now use the knowledge to bring peace. (2:20). Green Peace is Green Piss, their funding came from Russians and now Americans. "Amongst you as men you claim to be the best and you're the weakest." Gorbachoff refused to shoot the people at the Berlin Wall. Last Thursday he was supposed to meet him, but he was sick.

(2:35). Start the Star Formation with only the 3 reactor. Take your time, let it mature. In the U it takes a million years to mature. His reactor took 3 months and everyday watch his Nano coat to grow. The fields have to balance with each other, communication. Gans has a soul that connects with other Gans. He let his reactors mature for 10 to 15 years (what has taken 10 million years in U). He saw things growing on reactors and then disappeared, where did they go? (2:46). In Chemical theory, the formula is already controlled by conditions of its environment, Plasma totally different you can control. Every plasma contains all matter because it can become that depending on conditions. There is no fusion. Use Onion, layer by layer, it's a solar system. There's more power in the center then on the edge. (2:56). Questions on Gans. By keeping the plates outside

you get only CO2, adding vinegar in it dissolves. How to get Calcium out of water in Fukoshima.

65th Knowledge Seekers Workshop June 11 2015

(:40). Marcos teaching again. 3 different Gans in reactor, start with slow speeds until the free plasma formed, then go to higher speeds. Star Formation then creates another free plasma in center of star formation. Some months ago they got 129 Tesla from the free plasma (FP). What to do with the free plasma? You can interact with another plasma, release energy. Outer part of FP you have field strength of H, more inside you have Plutonium. (:50). Arman teaching. Can rotate low with caustic 2 or 3 hours even Nano coat plastic. Rick made clear reactor and turned it sideways. Filled with CuO, CO2. Cu wire in vinegar turn blue and dissolved wire, then add caustic and turned black, Nano Gans. Has also a microscopic camera to observe bubble (free plasma??). These bubbles bump up against each other they don't go back together. (1:14). The Hockspeed device rotating glass sphere in 1608 with partial vacuum with gases. The lady put her hand behind and it would glow. They were making plasma but didn't have a way to store, no batteries. (1:19). Eliya presentation. Nano coated Cu Acupuncture needle in solution, left for one month. Fields flowing photographed, one like human heart and circulatory system. Vacuum condition in organs. Heart beat starts from nowhere. (1:48). Eliya is using nano coated handle needles in acupuncture. Keshe comes in and explains why not to use Nano coated needles even if the Nano coat doesn't touch skin, because the two materials together open a channel for possible other diseases to enter body. The body of man is a vacuum, and when you use acupuncture you change conditions of plasma in body. This is matter interfering with Plasma in the body. Another way is to fill small balls with Gans and put on top of skin, the MG fields will gives 100 times better than using needles. You don't have Cu, Fe, in space but you have Gans which you can transfer fields. The option is not needles anymore, because you can transfer the energy of the Cancer to the ball. This is the breakthrough. Create a line of action by putting Gans balls on both sides of body. (1:58). This new method doesn't interfere in body, don't cut flesh and vacuum seal, no side-effects. You have to Nano coated inside and outside the balls, and fill with Gans. If you don't see results the fields isn't strong enough and the emotion not accepting. Have to adjust the CO2 Gans, and the CH3 effects the emotions. Have to add Amino Acid which links with body. Putting a Gans bubble on top of the needle is not the solution. With the cups one is for the physicality and one for the emotion. (Dr. Eliya avoiding Keshe is these meetings? And Marco came in to correct deviation.) Water tasted like lemon, through the Amino Acids. (2:13). Alex was threatened so he withdrew presentation. Tell him not to back down, these are German 4th Reich's, they have no teeth. They even said Dr. Eliya chickened out. Now She is defending herself, but Keshe is putting her on the spot, that she is representing Foundation, and people get the wrong idea. Then finally she gave in. She treated her mother with Nano coated needles, "did you risk enough". Use dry Amino Acid Gans for bone diseases and cartilages. You can't use Dry Gans or Nano Gans in your reactors unless you want to produce bone, like when Keshe broke 10 bones. (2:35). Eliya done. Questions. Nano coated chamber creates a vacuum and magnetic pressure. (3:02). keshe answers about auras of body. Question of

color of body tissues and match a Gans. Keshe says Auras will be studied further. (3:06). The cancer research related to these colors. What is the center of cancer, like liver storing calcium or iron. Liver is full so where in body to store excess heavy metals, which is decided by the emotions, these storage sites can lead to cancer. Cancer cells have to create heavier MG fields for the cancer to hold on to. These should be able to detect by color. For example, say there's excess Fe and it get stored in stomach, then it has to be looked after. And this is a plasma, which is heavier and starts pulling materials to it. Why has the thymus told liver to store excess metals? The emotion decides what is surplus, it informs the glands where to store excess Fe, i.e. in the stomach. The emotion in stomach is not correct and needs this support, goes to cancer. So when Fe in Stomach we can detect the color of it, then we know the source of the cancer, and we can create the MG field of Fe in the balls and place them at center of cancer and take the fields out and cancer will collapse. No difference with Cancer and Plasma, have black hole. Emotional link with cancer related to Zn or Potassium, with this whole body is programmed to shut down, and spreads all over the place. Alex was afraid but we hope Eliya will have the outrage to stick it out. Keshe talk very openly and threatened the attackers, will release their communications. (3:14). This is what happened in Belgium so they could not show car flying. We will release every energy system available. Star Formation sets will be for sale, so now we will release these Power Supply. Marcos teaches in a different way. (3:30) . Is the Plasma safe? There are different Plasmas of different strengths and what the conditions are. He can take life from the attackers in Germany if needs. Each Plasma has a specific characteristic to specific purpose.

66th Knowledge Seekers Workshop June 18 2015

(:15). Teko nuclear tests on Keshe technology without releasing to public, this is wrong. We will not stop because of Japanese people. They tried for 3 years without success and within 2 months of Keshe technology they succeed. (:26). Some scientists guessed and some where good. For Plasma we need roof, walls and foundation to see the totality. The Sun and the upper atmosphere which is 100's kilometers. In upper Atmosphere you get small plasmas. From NASA photos we see these entities, a structure of life, they came about by friction of interaction with MG fields of sun and earth. Then you get N and then it combined with C and O, and H and He, due to friction and the light. When they combine in upper atmosphere you get the Amino Acid of man. (:35). How Man was Created. The waters come from the upper atmosphere. When the water fell on the land, which contains Na, K, Fe, Cu, Zn, and when over Africa the first combinations occurred with Fe and Hemoglobin was formed ... add Cu you get muscles ... with K, Zn came intellect and emotion .. We all came from the gaseous state of matter in upper atmosphere. When the center of earth has cooled down enough the land masses split apart do to the spin and effect on lava. Amino Acid in air and salt in water touch lead to creation of life and fish start, and start to go on land. Man starts to dig 20 km in earth to look for oil. This is CO2 kits. Not all of Amino Acid formed in animals, rest settles to bottom. You become Plasmas in form of Gans, which is independent of temperature. This is why you se life in deepest part of ocean and in oil wells, surprising to scientists. If no barriers the Amino Acid seeps down to the Lava this is the oil. So we Amino Acid (COHN) in upper atmosphere as in NASA Photos, Life on Earth, and oil in deep wells.

Scientists say oil from dinosaurs??? How many dinosaurs would have to have lived to create millions and millions of barrels per day. NOTHING to do with fossils. Can make in CO2 kits is pure oil and no need to refine. Even the oil nations know its a scam. Plasma state of intelligence when it reaches the Lava it also begins another form of life with Very Strong MG fields and much more intelligent then man. Even in the inner core the AA can create life. If "man" matter heats up over 100 degrees it reverts back to Gaseous state, same process throughout. Man is the only ignorant intelligence. (1:02). How do fish communicates. The "Lava beings" can come in and out of Volcanic eruptions. Get rid of the idiots. Man only does things that becomes his habit, and replicated in RNA. Solution is to make man sick from the smell of blood, or make man timid then he becomes subservient which isn't right. (1:40). The Aura of man is a MG field and where it touches the earth life is formed, in the same way the MG fields form the sun touch the earth and creates life. Show the NASA video of upper atmosphere, The Tether incident. Our Upper brothers carry Amino Acid. They leave human race along until 3% of population matures enough, now is that time. (1:56). On 21st Put CuO2 in cup and add something. We are all in it, because we all have been eating animal flesh. A lot of money coming into Foundation, but it's for humanity. How do you reach 7 billion? Keshe Foundation followers running into millions. (2:13). Do not need to change your diet, craving for meat comes from emotion, 30 years for man to change diet. Even a tree has an Amino Acid structure, there are different ways to get energy. Smell of blood from hate and war are very different then from accident. Do we carry effect from ancestors? Caroline his wife, in this event it's for today. We don't call them animals, we call them creatures, we try to support each other. Clean your soul to clean the blood, intention is carried in the blood. The Energy Grids on the Earth, are they portals to other dimensions? The field lines are not straight because of different strengths interacting. Same magnetic structure as in the skin. There is no solid core in earth, there are different Gans in core. Same in the brain. Magma is the blood of the planet. The moisture in the atmosphere is like the calcium in body contacts everywhere. You had the free will but continued in old patterns, now getting a push. When we give unconditionally then U gives back. Don't think about what you loose from not eating meat, think of what you'll gain by what you can give to world, from more powerful energy from U. Look at Keshe Foundation, when the Belgians tried to damage Foundation it actually grew more, because of the time and energy they expended on trying to destroy them went to the Foundation. You fall in love with Humanity. (2:43). This is how Plasma works, the more you give the more you receive to stay in balance. Mass is when the Gravity is bigger then the Magnetic, and M is what you give out and G is what you hold on to. Keshe always says, "welcome home", to whoever comes.

67th Knowledge Seekers Workshop June 25 2015

(:10). John Searl group from California visiting, Searl Magnetics Corporation, for collaborating with Keshe. NASA is watching this collaboration. Keshe will also bring in Iranian scientists. Problem with Teko, they used to bring pollution down to zero. Teko's complaint that they were to remain secret in background. Will release all documents, and show how the Technology was used and go public. Canadian spin-off with Health technology. (:35). Red algae Bloom not from Fukoshima. Keshe freely gave out a

solution to US Military triangle craft, Nano coat inside of craft. (:43). Sear; group describes their systems. John Searl had precise dreams and got Technology. The SEG converts ambient to energy. The generator flew up to the ceiling. Draws the plan for flying saucer. Controlled by hand radio operators. (1:28). Searl flying saucer, keshe trying to find common ground with Searl. Keshe is willing to finance this project, but first need to understand the structure. Searls craft is limited to the matter state because of the solid magnets. Keshe would use Gans in the 3 rings around the craft. (CH3 Keshe use 17 because always on magnetic flow). (1:48). Questions. The magnets are not normal, but are programmed with special frequencies wave forms. You never want to stop it, and it protects itself from corrosion, which is a loss of electron. You can simulate electromagnetic interactions with Software. Mike's hero was john Searl. Twinity occurs if you cut through the magnetic, which is a stable form of H. Mike says if you used the atomic structure of Neodyminian, as in Gans, it would be a trillion times more powerful. (2:13). Keshe says you could replace the neodynimian with a Gans. (2:31). This is how we share the knowledge openly. You can use a pulse DC to heat. Science with no borders. (3:00). Chinese have manufactured small reactors for 399 euro. You fill with Gans and glue together. They're going to release the most simple power supply for life time for $1 as much power as want. (3:14). Release documents about Fukoshima. We have the technology to clean up has to be made available to Russia and USA. By law Skype has to keep all communication for 2 years.

68th Knowledge Seekers Workshop (Day 1) July 2 2015 AM

(:11). People without science background are coming in. These are not Nano trained but are making great changes in the technology. Keshe is bringing a man in secure way to show the new Energy Supply, in Africa the man can put back to the grid. Alex is a barber in London for 20 years. He has received threats and to his family, from Nigeria. He will teach and he is so knowledgeable about Plasma. He made generator in kitchen. First, came to Keshe 2008. A Gans and plasma is when the fields build up and can function on their own. To make Nano coat without caustic heat up copper wire on fire or oven and put in cold water again and again repeat for half hour, makes layers (this is Teflon). (:37). Einstein said you can't have gas in solid state without freezing and pressure, but we got solid CO2 at room temperature as a plasma (Gans), and can make powder. NANO means individuality. As of yesterday he became part of Keshe, he understands the plasma even more then Tesla. In Africa, Cu mines, lightening strike form the Nano then salt and water get the Gans and structures grow into body of man. Life started in Africa so we are all different versions of black man. (:53). He has produce Deuterium in Gans state. He used Brass to make composite layers, which is best for energy production in dry state. To be a Plasma you need both magnetic and gravitation fields. We don't look as a chemical reaction, only as Plasma. The more Gans you add the more interactions. He has produced Energy, food, movement. He runs his car from Gans. Do not sell your shares to other people to hurt them. (1:15).. What you need: Nano coated Cu wire (can burn it), piece of Zn, piece of tissue, Al foil, sugar (gives energy), caustic (brings continuous motion and moisture), and dry Gans (to add 3 to 500 years more of energy), Nano Titanium Gans (glazing on door knob, or in CO2 Gans, or in air: powder Titanium add to caustic and it becomes Gans). (1:30). Mixing ingredients together. Few grains sugar, and caustic, Gans

of Titanium oxide ( ), dry Gans of Brass, and mix to paste, and wrap with Al and Zn foils, then squeeze very hard. To get more voltage by adding layers. When it touches matter releases huge Energy, but not with Human because we are in Plasma state. 1 volt and 1.2 Milliamp. 5 of them in parallel to charge mobile phone. This is first step making a single cell. (2:08). Now he connected two cells with a Nano wire from positive to negative and to negative, doesn't short-circuit, it feeds itself. This can power your house. He tapped into the universal Energy, even Tesla didn't understand it. This is the Cornerstone of everything he does. (2:26). When you connect to Grid have to have positive Correctly, takes 1 day to come to balance. Now you can buy a single sphere reactor from Keshe Foundation. CHANGE of GAME, tapping to Universal Energy, Reactor not physically connected. BREAKTRHOUGH!! The Star Formation become the Source of energy. Dream of Science for hundreds of years. This is why Belgian police raided Keshe lab but not find anything. You can even change it into any matter. (2:44). Package from Japan with contaminated soil of Fukoshima. (2:48). Third part, just add another reactor close to Star Formation, Universal Energy. It takes 2 days to balance fields. Run a series of cells around from Positive to negative, and Negative to negative. This is a Deuterium Reactor, neutrons pull energy in and protons make available. Keep it close to ground at night it will absorb in night. If you don't have reactors, make more cells. (3:06). It accumulates energy and goes to lift, vibration. (3:21). Spread the Knowledge. Alex was threatened and Keshe is providing protection.

68th Knowledge Seekers Workshop (Day 1) July 2 2015 PM

Day 1 part 2. Made announcement not to use Nano coated needles for Acupuncture, can create new diseases. He has warned Dr. Eliya, but she may be doing this. Do not use Amino Acids in reactors because they can create new microbes. (:04). Going over cells created this morning. Pushing the Gans outward into the matter level, energy of Plasma picking up, a fraction of a fraction, using different structure of plasma. The cells are now feeding out to the Grid running 2 fans and 0 watts from input. All the computer in the room are taking power from the plasma even though not connected. Your own body will also receive energy from the plasma, and health improves, less desire for food, sleep. By increasing the demand for current and more going out to the Grid. Increasing the gravitational and increases magnetic, this is the key to motion. (:38). If you put it on top of the Star Formation it would fly. Describing the secret of Tesla Power Supply, he scaled it to size of planet earth, therefore can be used anywhere on earth. Keshe uses the ratio of plasma of U. Tesla could only send out, Miles understood how to receive. Do not need wires to collect current. Transmission lines are so costly. The receiving system is reverse winding. reposition the magnetic becomes a receiver anywhere in U. (1:00). You should be able to fly, this system is both lift and landing. By tuning to the gravitational field of destination arrive instantly. (1:04). Alex explains how to run the car with 15 mls CO_2, Link the fields of Gans in tank with a single reactor in the car. The Gans is not used as a fuel, but it put all the fuel in a Gans state. Energy and behavior of fuel different. Between the rear and front of car created a levitation field. The starter motor is being fed. Hardly used any fuel in 2 months. (1:30). British Government on the back of BP and finances revolutions around world with Americans. The car needs to weigh at least 200 kg to drive safely. CuO has reverse effect on anything which is C or H connected,

extraction of O2, use CO2 in car only. Position reactor securely locked in center of car. Moon has nothing to do with Earth. Sugar is very dynamic, they add it to missiles to make a lot of noise, sugar has psychological effect. When you mix CuO, CH3, CO2, you touch the emotion and energy of man, this is a plasma. (1:50). This reactor you can do anything. You decide the strength by adjusting number of beads. Keshe knows about the attackers in Germany tried to stop Alex, but unsuccessful. You can even clone your own body to continue race in space, only strong survive. The next step is positioning of beads with reactors, but this would leave everyone behind. We have had access to this technology for a long time. 209 (2:21). "Fat Boy" reactor in China. It's coated inside and out. Should be able to fly. (2:27). Are the people in background afraid of changes. Keshe offered NASA help to bring back astronauts. (2:31). Place cup of water in center of beads and you got you daily energy dose, you can stand in center and any RNA adjustments will be done disease gone, How long to stay in center, if too long revert back to cave man. (2:38). Question goes back to the inner ring negative to negative connection the plasma is feeding itself. The Positive to negative creates a demand through short circuit, and the loop around is the supply for the demand. Over time increases the supply and demand. Two systems embedded in one. Expand on it, use rings of Gans in the little cells, plasmatic amplifier, to get lift. A basic way to control craft. (2:48). Make layers on the Fat Boy to amplify. For the car he used CO2, in tank 15 ml, top up after that without adding more Gans. To energize CO2 Gans put it between two Nano plates.

68th Knowledge Seekers Workshop (Day 2) July 3 2015 AM

Continue with Workshop 68 part 3, Power of Energy and car. Put 3 times more power in to the Grid, if increase demand increase output. Started mass production of this cells. The system is not a power supply. It doesn't create energy it COLLECTS energy that the Gans plasma reactor puts into environment. The motors need energy, but they can be fed back into the system. (:09). Plug motors back into system, this should put more power into the Grid because of increased use. Have to show Totality. This is how the Sun and earth, solar system work they regurgitate own energy and last long time. The extra reactor is the boundary limit. (:18). Keshe created a 100 meter sound barrier against freeway noise around his house. It's the same technology that captured the Drone and put down Aircraft Carrier. Russians done same. It captures all MG fields in an area, and can make it silent. Have to know how to load system, amplifier. It builds up and goes to infinity. (:32). This set up is wrong, change it and get huge amounts. You got SF and a single reactor in between, then flow goes to the weaker side. And how you load up the Reactor with Gans will determine amount. (21 Dec 2016 Keshe deadline?). There is no electron flow in U. Not enough humans are ready yet. Vinc's reactor broke away 3 feet. Can dictate the direction of flow, but it can destroy the power line. Follow ethos. (:49). The Foundation is manufacturing one of these systems for 1000 euros 200 goes back to government to replace loss jobs. It restructures the wealth. It's a noose around neck of humanity, depends on how you use. Evolution beyond man's imagination. (:58) Will release the blueprints for these units. What happened in Iran will happen in West if they don't pay taxes, people will turn on each other. (1:12). Out of 7 billion 4 billion will kill each other. This is the end of humanity. (1:27). After 2 days the unit is independent of

SF can go anywhere. (1:38). Talk goes to FOOD production. You can string the beads wrapped around and fill with water and drink. Do not use CuO as part of the Gans in cup, because Cu is part of muscles and neural systems and you can die. Last year the Fukoshima experiment and frog dies within minutes. Armans cup has Cu Nano coated plate and Zinc Plate connected inside 2nd wall of the cup filled with water, get CO2 Gans and fill dry part with water and drink. (1:49). Alex put banana on top and get the strength of banana. You feel the taste of banana all day. The hunger comes after 2 hours, so you continue to drink all day. Alex is herbalist and brought back to experiment. The taste comes in water, but only leave in water for couple minutes, if too long gets bitter with what's in atmosphere. He put herb to stop diarrhea and that information transfers. The habit for chewing still there, so you can add different Amino Acids (AA). There is a spectrum of nutrients from foods, you should add more AA in spectrum. For example, McDonalds creates a spectrum of MG fields that you get used to eating and you come back. Eating satisfies emotional with respect to physical, otherwise physicality is not satisfied. When you make cups create a spectrum of basic needs. You can also put in center of Bead cell circle. If you can add lymph through flaking skin, solid Nano state, that's why you skin tells the stat of health. You can add a little skin and blood to Gans, but make sure you don't have cancer or abnormalities. It only absorbs what it needs. You should not need to eat for 200 years. (2:13). When you drink your urine it's already processed, that's only advantage. If it was good why did the body reject it. When you pour the water out of the container it changes the conditions. In Plasma state it looks for fields. You do not transfer the banana energy but not to all the cells in the water, can mix in more. (2:25). Now you have Energy, Fuel, Food, medicine. We eat because we are thirsty, a lot of obesity comes from thirst. How does body crave banana? The body registered the Gans and the emotion. Alex said after a couple hours I am hungry, because he only satisfies the thirst, which it the emotion. The Gans transfers the energy. I take, give what I don't want, and create a balance. If you create a condition of gravitation the you attract the energy you need. If you just put your finger in the water you tell it what you need, or hold the cup. " The cup of life, this is my blood, this is my body". You can use the energized water in the reactors, BUT don't put protein in (AA), you could create germs or diseases. (2:42). Bone marrow transplant, don't need you can transfer info through the Gans. Francois in Canada, his patient was treated, and quick recovery. Keshe put the patients hand in the CO2 to transfer the info to the Gans. Every bones creates it own marrow for a specific region as immune system. For Example, the head of the femur has different structure of Nano holes to create immunity. The Acupuncture Needle problem again, with Nano coat dealing with fields, if touch a nerve or blood, energy transfer becomes so rapid, can get brain hemorrhage, stroke is inevitable, it's like an electrical shock. (2:55). Gives warning to Eliya who is in China, developing needles. STOP! With the needles you enter the vacuum system you have no choice, outside body has chance to regulate. If you just relied on Gans for food, you would only go to toilet once a year. Alex is a child of Plasma, but he hasn't understood the totality. Nylon means New York and London, has to do with patents. Energy unit can be ordered. Wife and son on video.

68th Knowledge Seekers Workshop (Day 2) July 3 2015 PM

Part 4, Alex continue with herbal medicine and has grown a garden but he hasn't eaten yet. Potatoes were bigger. He was experimenting with Tesla coil. (:09). (:17). Keshe says how to make a 1.5 volt battery for life time, by adding a Nano wire across poles. The accidental short circuit bang, because you closed the loop. Nano wire is where you collect energy from the environment. Increase Magnetic field power. Huge amounts of energy in little strips of Nano material. Squeezing nano materials releases more current. Talked again the danger of Nano coated Acupuncture needles. (:40). Birmingham listening station used magnetic fields and could hear anywhere in world. Keshe talks about Energy Bead cells and how they work. The Gans is above matter level. Energy is forced into a Gans (like body of man). (:50). Questions. The car is running on the starter motor, the CO2 in tank is decoy. If you were to look at his motor you would find that parts of the motor got Nano coated. He shows the electrical burn hole on the steel table. The starter is working through plasma. (1:00). Keshe corrects the Energy Beads, you just need a powerful Gans in a paste. Evaporate a high energy (like Titanium Gans) Gans until paste then add sugar and caustic to keep moist. The main point is the Nano and high energy Gans, and the Al and Zn layers are collecting electrons, both Ac and DC. Nano coating has a dual function because of the layering. The Nano layer carries the superconductor in the Gans, DC current, and when in contact with matter becomes AC. It's the beads that does it, collect all the energy. When the nano wire is connected back on to itself then you are collecting lots of current and needs time to build up. This is the Key to boast power. (1:12)..To make very compact and boost current. Al foil only keeps the moisture in. Each bead you connect attach it back onto itself. (1:21). Rick is combining Tesla coil with plastic tubes filled with Gans. Tesla says this coil can store up to 50K times more energy. Nano coat tube internally and could put Nano coated wire inside. They can flow in opposite directions. (1:37). Italian nation loss of currency for fuel. 11 million barrels use daily minimum in USA. Oil only costs 5$ barrel rest is pure profit. Now its in public otherwise crackdown. (1:50). The fat boy in China is first to flight. Collaborate 4 of the Beads with fat boy, coil around and flight. You'll be compressing so much energy. Don't need motors. The core of earth is plasma, with solid core around and a nano and a Gans layer. (2:00). Make a motor bike with Gans, take out the battery, and their exercise to make it work. Welcome Alex to Keshe Foundation. Keshe F has an energy system and car system. Add vinegar to Amino Acid Gans it breaks it up.

69th Knowledge Seekers Workshop July 9 2015

The system still running from Alex, In the last week input 3.6kw and have put 17kw to the Grid. (:07). The meters don't read the DC so you can use as much as like. Goes over the financials with power generators. They removed Keshe from Wikipedia. (:17). The power generators multiplies energy 4 times. They have the electric motorbike, the generator is built in the bike, life time free energy. Discussion broke out at opening of University, a call came in from US Embassy to stop opening, but Keshe left it to the visiting colonel, he said, I stand for freedom. People who stand for principle. US won't stand, there will be one Nation and one planet. Billions to Banks. The huge energy drain now will stay in Italy. Now you understand why. There is a plan to assassinate Keshe in the next weeks, Obama responsible. (:30). You must carry on with the work. The beads

you can wear around your neck, put some of your own Gans in, and the MG fields around your body, you'll never be sick, unless you make it psychologically. Warning do not mix everything, know the right composition. Blood and lymph are emotions. (:39) Can not use if you have a NUCLEAR Reactor on the Grid, the plasma will interfere and create problems. There is a way to stop the radiation waste. Teko sacked the people who helped keshe, now he offered them to put Japan on the free energy. Italy consume 144 billion per year, 50 billion to import oil. (:51). Summary of what was done this last year. The beads, the SF and single reactor, are sun earth and humans. (1:00). To clean up Fukoshima contamination on West Coast, make a field between the two reactors that match the MG of the contamination, it's a finger print. You can get the fingerprint from the waste, Keshe has a liter of Tritium from Fukoshima. Do like Russians one reactor in submarine and one in air. All matter has magnetic fields. You fly over Europe and empty the banks. A process underway with Italian government to supply energy to Grid. Keshe advised the Iranians to abandon negotiations on 5 +1, don't need nuclear energy with new technology. (1:13). Summarize Beads again. You got Plasma and beads, when you have a need for DC goes direct, when AC then also delivered. Whatever you want the plasma is point of delivery, matter or electricity. You create your own matter anywhere in U. The interaction of 3 fields gives the texture of the skin, 3 layers of nano material gives it in hexagonal. You can even create it with electromagnetic fields as scientists are trying now. You need a condition where the beads collect a mixture of fields. Keshe foundation has created a battery that lasts hundreds years without recharge, by using a plasma it can meet whatever demand. Can use gold and silver instead of Cu. The heavier the material Gans you use the more power. When you just follow, you have not understood it. Cost to manufacture energy unit is $50/100, charge $500, the profits go developing countries. (1:33). You voluntarily pay $200 to governments and pay $100 per year to government for schools, etc. You can use it to power whole house and your neighbors. In the west give to old people and large families. (1:46). Man whines about cost Keshe explains. The Egyptian priests knew the technology but didn't share it. (1:55). Most of the patients that come are doctors and medical and don't believe in Chemo. How to certify this product when the people don't understand. How the Nano coat turns to AC when pressing through the skin of wire or bottom layer, and is a superconductor. The nano layers trap energy. Mr. Hua is trying to rent the units in China, wrong ethos. (2:09). You don't need to put energy back in the Grid. You don't need a battery, you have it when you need it. To make a Gans 9 volt battery need to connect a nano wire in between polarity. You can use a rechargeable battery, but put a little Gans around it. It's been on the Website for 9 years but no one picked it up. Same with electric Motor in scooter, don't need battery but can use for storage, need some beads to connect. Letter from Russia. (2:21). How to connect the Keshe Power Supply. How to make a sound shield, it's a Coulombs barrier, like the shielding of earth. You can also fly and make water with condensation unit. The photo of king of Belgium with Keshe. (2:30). The Keshe Oasis systems provide all needs. Several people have achieved lift, and 2 that can control it, but like Alex they were afraid to come out. The 9th of July, Bahai faith knows this date. The Earth has the initial Energy inside it, the solar system is the Source. Questions: The Starter motor wasn't designed to do that. The starter and motor doesn't work at the matter level. Like when you eat food, as soon as you put food in your mouth, it behaves as a Gans, the body is a series of Gans materials. You don't subtract MG fields, you create a demand and that reduces fields. A

company in Philippines wants to produce units. Keshe doesn't go into the science details, but application. Details about Fukoshima, contamination in the residue, which Keshe showed him and Tepco lying. The governments used the USB stick to make military advances. (2:54). The Japanese made gold Gans from the Tritium and next day stopped work with Keshe, but the Gold is in the Gans state, not matter. All documents with Keshe. Started Collaboration July 2014, they refused to tell who helped them and the gold produced. International Boycott Tepco can't work with Keshe under no circumstances.

70th Knowledge Seekers Workshop July 16 2015

(:07). The Americans came to get USB stick in 2012, but refused hand shake. Iran signed the 5 +1 Peace treaty, first time treaty without bullet, for science. Obama said that Iranian nuclear plasma technology has been the main negotiation. The Energy beads are putting 5 times more then put in, non-nuclear it belongs to people. He goes over why he was against treaty. Now with the new technology in the last 2 weeks, these military contracts are obsolete, and lead to more wars. The 30th July new announcement. In the next week Keshe will raise the power to Grid to 30K kwh (later per day). (:23). There will be no need for reactors. First prototype by Saturday. They have managed to send 40 volts wirelessly as power supply. This will change a lot of thing. (:28). The power to the Grid is DC and is Nano coating automatically the transfer wires, they become super conductors. We are not feeding AD/DC into Grid but Plasma Energy. Keshe Foundation will not speak with a pedophile, he is using technology to attract victims. Explains what happens when Plasma Energy flows into a Nuclear Reactor, many times worse then Fukoshima. So the Nuclear Power stations have to be removed from the Grid as more people use Plasma technology. This is making Nuclear technology obsolete. WARNING!! USA, French, and Germans who have lots of Nuclear Power station to disconnect from Grid or a huge accident will happen. Nuclear is plasma and will absorb it. It will mean billion to decommission them. If there are only 500 units in US the problems will start. The starter in car, will be working on a plasma state and converting to mechanical energy. It changes itself into fields to create motion. (:39). Explains again how Solar System works and how elements are formed. Each continent will show one flight. We are going towards a Plasma like sun without a form. Don't need a battery to store energy. (:53). Food cups by putting food on top of container with water inside and Gans in the double wall, the water tastes like that food. Now you can fill container with Gans, and place hand on top, the Gans absorbs the emotion and physicality of man, and if you put an 18 years old in it, you get the cup of youth, emotionally feel young all the time. A man should drink from cup of man and not woman or complications. You won't become homosexual, its a different structure. If you put drug in there you only need one shot, drug industry finished. Use in an opposite way you can reverse addictions. The new technology brings new applications. (1:00). People are ordering units but not making donations, Keshe refunds their money. The Foundation pays good wages, Alex is giving his share of profits to Nigeria. The early collaborators with Foundation, got a 10 million promise when technology goes commercial. Arman was in China when he came there with a patent to undermine Keshe. Dr Eliya is in Singapore with Mr. Hua trying to

set up their own patents. Deflurescence was the only one who knew about Keshe's flight to Mexico. Now he is saying that nobody should use the power units because of health hazard. He had a stroke and Keshe made him whole again, and he turned against him, Judas. When Keshe was poisoned with Arsenic, Eliya was told he saw it in chart that it was Arsenic. Twice Keshe car rolled over and shot at in Antwerp where Deflurescence lives. (1:17). Calls Olivia about 10 million contract, confirmed live. The minute Keshe dies, these people take over. The blueprints for the Power Unit will be sent to all Foundations around the world. Bret called and said he also was approached by Deflurescence. How the King of Belgium found out he was writing book. (1:28). The units can produce food, taste comes from the fields and matter field strengths. You can't take more then you need. Keshe worked at supermarket in college, they throw away good food. British government sold war rations 40 years later, corn beef still edible. (1:34). In coming months when go into space the biggest problem is that Humans are conditioned into the Clock. Keshe doesn't use energy from here to work 14 hours per day. Nowhere is U are they using time. Tomorrow they start loading cars with units. Change is not a fairytale. World leaders, your time is up, come in and help transition go smooth. The more people have the more they are helping each other. No choice or it will be forced on you. (1:47). Letter that Eliya is in Singapore getting the needles patented and other things, she is out of control. Then Mr. Hua attacked Keshe. The Chinese government is publishing Keshe's books. When people are wrong, you leave them long enough they break their own leg. (1:55). If you made your own system, use Cola bottle loaded with 3 reactor keep it sealed, fill it with water. This is not just power unit, but cup of life, it can even make shelter. (2:09). Earthquake in LA. What microbes to allow, repair bones, mental disorders. It's a revolution in the soul of the man to understand the man. (2:26). Different voltages around world are irrelevant, plasma delivers what is demanded. How you connect it determines AC or DC. Changing of weight in Reactor depends on fields forces. Directional flow depends on where you place the Beads. Have knowledge to save the race, love as one planet (2:44). The Unit will be programmable with CDs put in and get food or flight, can change the color of your house, create a house. Changing the Beads changes conditions. They are creating the "hollow plasma". How are you going the change the conditions? You need correct conduct and don't become a thief. (2:54). Questions: the cup of life will absorb negativity also. People will find out. Once the Gans is dried it stays dry or wet as case may be. The magnetic fields have managed to hold onto the moisture. When it dries it takes the motion of the Gans. (3:02). Will Power Unit supply 3 different meters. You disconnect from the Grid and use a battery. We will show it as we go along. You can weld with the Unit. Can you store the cup of life in a container? No, drink directly from the cup. Don't even mix with things. The taste changes depending on what person needs. (3:09). Each matter has its own soul. The mobile charger is continuous without recharging. (3:22) First plasma battery is out.

71st Knowledge Seekers Workshop July 23 2015

(:07). The whole teaching have come to a CONCLUSION, that the time of Matter is over. Nano coating was posted 10 years ago, then to Gans which is plasma in free state. How to see Gases in a solid state, then to Plasma to rely on MG field strength, the "matter" we see depends on its field strength. Then started the SF with gases, but this

technology is obsolete, then went further using Gans in reactors and created the "free plasma", and created from this 129 Tesla. To test this we watched the weight going up and down in the SF. Now in last few weeks with Alex we came up with The Energy Beads, and have put 70 kwh back into Grid, so the 129 Tesla was not imaginary. Universal Plasma Free Energy and out of this energy produce Fuel, food, flight, etc. (:18). We do not need Matter to create Plasma, it's the other way around. Yesterday switched off the motors and still same Energy production, therefore we don't even need Gans. Anybody now can tap into U Energy. There is another level beyond Plasma but man not ready. Now man can be released from the shackles of Matter. Crafts that look tangible but are actually Plasma, this is how the skin of body is made, MG attraction of 3 layers and creates above it a layer of tangibility. SO we don't even need materials to build a space craft. Next Thursday is important reveal knowledge, clarify what the Japanese did with technology, how they cheated. What is needed is one planetary nation, one central bank that looks after the needs of whole planet, get rid of corruption. South Africa is looking at Keshe technology. China has made keshe F a national asset. Now work to open the Plasma, what are its hand, head, etc. (:30). The Fat Boy shows reaction when some go near and by creating balance taps into U, it could even fly away or creates a field where it can't be seen. It goes with the soul of the man who made it. (:34). No Gans is needed. Alex said you need the beads but you don't. The transfer of one bead to another, one Galaxy to another. Pattern is man he has to see it and other people have to do it, now thousands are doing it, but will you allow them to stop you. (:40). Move out of building next week, because owners involved in criminal activities. Goes over Nano coating, Salt water, Gans or very free plasma. (:45). What you se as a Gans is really a magnetic field, but it has gravity pulling and magnetic pushing out, both fields. What you see with your eye is the boundary, the rest hidden inside. Before with Cu you could feed, but not you got a sponge. The environment is which it sits dictates what Gans you get. He draws out CO2 or CuO, each has different shape but same Plasma. He's showing the Plasma as a spiral, and the elements unfold at different field strengths. Multiple interactions Sun, earth, water and core of earth. Another planet with different interactions will be different color, earth is blue. (:51). Interruption. keshe repeats. Darker planets have stronger magnetic fields. (:59)..Where is the point of switch from M to G. You're looking at the structure of Plasma, without understand this switch over you won't be able to control craft. There is an order of how strong fields which release from center of plasma, proton. How do the fields link up? (1:07). The nuclear reactors only have limited control, whereas Gans more. Describes the attachment of man to earth is gravity, but there is also a magnetic force pushing out from earth and by tuning into the magnetic push you go, not anti-gravity term, which doesn't exist. It's like sailing. When the reactor loses weight it is not over coming gravity, but tuning into magnetic and repulsion. You get yourself into the "winds" of magnetic field. And when you get close to a planet you switch over and tune to gravity. If you see a light on UFO it means very primitive, just come to town. The structure shows the intellect of the passengers (these ones are humans). All you need to adjust is what MG fields strength to let your craft release and having the right fingerprint to go to. Easy to travel to a star on a mono MG field and then switch over to a composite MG fields to a planet. The center of free plasma decides what is released, and why protons and neutrons last so long. Whatever doesn't get used goes back into the plasma. Emotions are also made of fields, and if you can control it, can change it. It's the same for

everything, and man can control the plasma. (1:24). You need to study the behavior and how plasma works, even matter is a plasma. You learn to control. For example, if you stopped the gravity but increased the magnetic, this is controlling the speed. The Chinese already can control plasma (Taoist past). (1:29). The creation of "principle matter" or Principle is the reserve matter, everything is in it, and it radiates out at a strength. As it rotates the fields stream out due to fields inside, a ribbons of fields going out, and in the process also come back in. (Heavy attacks as they give out more knowledge.) As the fields spread out they interact with each other, their fields are weaker, and then get pulled back into centre, this is the gravity. So the magnetic fields are going out, but due to the weakness get pulled back in to center and becomes gravity, it's the same energy in different flow directions. when it's in balance it doesn't move, when it gets weaker it starts to move. By understanding this you enter the next step in controlling the system. When you release the magnetic it gets pulled back and releases more energy. As in the power units, you put 1 volt in and get 5 back. (1:36). Like the reactors they work in a 1 to 5 ratio, but this is still the electron level because systems are a matter state. The Plasma contains much more, it's by controlling the environment. In matter you have the problem (loss) from friction, not plasma. No wastage in plasma, to control a free unconditional plasma. The 2 circle of beads, gravitation is on demand. (1:44). When Keshe makes a bead he turns the head inward to the center, or it blocks the fields coming in. How you make the beads important, exactly next to each other, very careful, so the flows are not interrupted. You have to think on the filed flow basis. Wind first then Nano coat. If the fields align in such a way the wire becomes invisible. Again why he's against Nano coated needles. When squeeze nano layers current comes out. (1:56). Chinese reactor demo. (2:08). The idea of going beyond Gans. There will be opening of Keshe Foundation in China. (2:18). In 1972 oil was 2.5 per barrel and they were refining thousand of different products from it. Going over all the huge number of jobs it will create, unlimited. Interaction of plasmas with each other. How do the AA, H C O N interact with each other. Communication with plasma is instantaneously. (2:27). You won't have an engine to look at, have to trust instincts, connect to soul. Your emotions are made up of the same materials as plasma, as soul, Cu, Zn, AA. Now you have seen, there is no system and yet it is feeding Grid. (2:33). an 18 years old boy in India started KF. Somebody achieved lift but need permission to present. Can we fly Earth out of the SS, yes, but "she" might have something to say about it. We create our own MG shielding, which is the Skin, then the Aura, when you can control your emotion you can extend your Aura for kilometers, what goes out, comes in. (2:37). What does Keshe mean by Conscious, being aware, but I am, must mean something else? "Receiving the fields in correct order, you can see the fields the way they really are, regardless of coloring or changes someone makes to it, when it gets to you it is exactly as it was when it was sent". What is synchrotron radiation. It's a mental state. How to protect yourself from Electro radiation, build yourself a SF and fill them with all materials on earth, which electronically can be adjusted. The Free Plasma will contains all of it and absorbs all radiations. Buy the most colorful ceramics and fill it with Gans's and let it run. Silica (silicon dioxide, SiO2) is one of the best, Quartz .

72nd Knowledge Seekers Workshop July 30 2015

"The Greatest Moment in History". Moved to a new location. We have over 10 million listeners. Translator has to go as fast as he, not slow down.
Nano coated Cu plates, nano means single atomic structure. We have changed the molecular structure to atomic, creation of Gans, miniature suns. We have created CO2 in solid state at room temperature, this is the new plasma energy. (:10). Two parts, 1 is to do with Energy and 2 with cleanup of environment, Fukoshima. Collaboration with TEPCO and Keshe, the cleanup successful but denied by TEPCO, now KF published a paper on the cleanup. (:26). break in tape and repeated until here. The man who did the background work with TEPCO, is here, he helped save Japan and fired him, very honest. TEPCO violated IEA rules working with Iranian nuclear physicist, boycotts. We gave the technology freely to Japan and so that it can be used in other accidents, it has to be recognized by internationally as a breakthrough in technology, this is the point. (:31). Don't show face for international reasons, gives his testimony, and has joined KF. He confirms the tests of new technology. Fukoshima is now safe and KF technology used, therefore not give details, but it was all due to KF. This is the third time betrayal by governments in nuclear cleanup. The key was overcoming the high Ca levels in Japanese waters. (:37). The nuclear materials lock into the Ca Co3, you still have the nuclear material only trap and neutralize, so there is a nuclear residue. Japanese Prime Minister should resign. It can be given to farmers to cleanup fields. (:41). You take contaminated soil and few drop of "Solution" (Gans), Keshe demonstrates with Fukoshima soil sent by TEPCO. He shows Fukoshima water given by TEPCO, which is against law. Measured by TEPCO at 6000. Italians came in and tested it and said it can stay, so it's not illegal. Japanese have not used IEA ways of sending radioactive materials. Challenge to authorities to come and test and check with Fukoshima. All communications kept. (:56). Creating jobs in Italy. A Coke bottle size reactor that can power the car, and house. (1:08). The Beads (are 1 to 5 ratio) are already obsolete. (1:12). The NEW unit is revealed. It's thousand times more strong then the beads, by coiling the Nano wires you make a nuclear reactor without radiation. It blows a fuse it's so strong. In the new beads every bead is being regenerated by careful wrapping of Nano wires, power in thousands of KW. It can't be fed yet to Grid. (1:16). Prototype for car power supply that you put in side the electric key. Please develop as fast as you can. The power is so immense by careful. New communication is developed, by-pass Vodafone. Another new system unveiled, tunneling one plasma to another. (1:22). When radiation leaves the sun it doesn't decide if it will be a potato or apple, it's the conditions at the point of arrival that determines what it will be. It's the same when you eat, it's the conditions in the body that determine what kind of cell it will become. We created batteries that you don't need to recharge for 20 years, and it will deliver what the need is. We have learned to tap into the essence of creation. (1:25). The unveiling of the New beads, composite Gans, each bead has the power of the sun. It burns itself out, so much power, SF underneath. The inner ring creates G, the outer ring creates M. Adjust the plate and becomes a flight system, it also has control system for direction. Inner core 6 beads and outer 12, by adjust fields control flight. You can also place plasma lines on different positions to create different materials. We have gone partly into production of materials on demand. (1:36). Something that reverses the cancer in minutes, you change the environment and it can't grow, patients come in and within hours healed. Now with Plasma you can make magnets for any material. Don't need to mine anymore, just produce the MG field. This is why the

title was chosen. You can tap into the Creative principle anywhere in the Universe. Now totally independent of Earth. KF setup around the world to fully develop technology. (1:46). Questions: Are all the teachings in your books? The essence is there especially book 3. The Cancer treatments are happening now by experts. (1:51). Someone asking for step-by-step blueprint to make the E Beads. Alex explained in details, but with the plasma, when you put the springs you collect energy. In Matter creation, a cup of water with Gans in small bottles on either side and hotdog on top, the water tastes like hotdog. Now remove the water and instead put a coiled Nano wire in and hotdog on top ... see if it creates a hotdog **. Remember everything can be changed, when and how you want based on creating the conditions. (2:08). The units cause the interior wires in the house to Nano coat, but they still carry normal electricity. The new coiled 3 rings can flow in any way. You can start with the first beads more safe. These new systems are very hard to understand, and they are too powerful and get burnt up. The Beads give you instant high power, to move craft quick. (2:19). Create two Plasma lines together to weld. Shows a Gans battery. (2:27). Keshe gave out nano wires, put one on your left and right battery terminals and you don't need anymore fuel. Keshe had hard time to use fire to make Nano coat. With the 3 ring new coils, the inner coil holds onto what don't need. Something about cancer with this coil along with Gans set to specific MG fields. Mike is warning not to connect to Grid. They have new "Universal CO2 Kits", made in Italy. Sweden has KF. Letter from Putin. (2:39). (2:42). Explain how transfer of banana to water via different Gans. The 3 rings coils, inner 6 middle 12 and outer 24. The way you wind the coils is very important, clockwise and then change, and the direction determines if Magnetic or gravitation, this is flow of plasma. Question in Italian about the direction of flow. The springs create a tunnel of flows and this dictates the direction. (3:02). Goes over the new coils and the field flows. "Plasma pipes" means these new coils. (3:09). Peace is most important part.

73rd Knowledge Seekers Workshop August 6 2015
(:22). keshe comes on. The new systems are even much better. Talked about Eliya breaking the ethos of the KF. (:41). When people don't get their money they attack us. (:47). Italian Military protecting Keshe. Many have not understood the Energy Beads.

(:49). Separate two important points, Plasma and matter plasma. Matter Plasma: Stronger fields become visible. When you have a stronger fields it forces conditions on the weaker, (i.e. The Earths fields are enforced on the weaker they have to obey earth's fields). Matter of Gas, solid and liquid, Plasma is not a 4th state of matter. Plasma itself is the operation of the bigger environment. Matter state is conditioned on, solid, gas, liquid. Plasma is the one that conditions, it is free without boundary. Plasma is free, Gans (transition state) shows itself as a physicality in a way, and Nano which is matter state of the plasma. So we end up with 6 states or entities. Understand the interactions between. Why you see such a huge release of energy in Alex beads. The energy is from conversion to electrons. (1:03). Just putting Nano coated wire on the Battery, and it achieves motion. The battery itself carries a Nano coat from the chemical process, but we only drain the chemical reaction energy. By adding the nano wires to terminals they match up with plates and the plasma delivers its energy. You're tapping a plasma source that was already there. The Beads in cigarette lighter did the same. They are releasing Plasma Energy. (1:07). How

plasma of sun converts through the atmosphere. Once the field forces enter the wire it shows it where to go. Electrical current is still a MG field, forward called magnetic and reverse gravity. (1:09). How the crankshaft turns, the fields coming from the battery, where one nano wire on each terminal, when the field forces of Gravity pulling into battery and magnetic going out come to a stand still, it switches over to plasma force which creates motion by turning over the crankshaft. They convert the plasma energy to dynamic matter energy. That's why no fuel consumption. The process takes days and the body of car becomes nano coated and will affect the paint and structure of the car you create your own spaceship. The engine runs easy and lighter on the road. You will achieve lift. They even took the engine out. They have a video of car in safe, the only thing needed was the battery. The Cu is weaker then nano and gets over taken all the wires get Nano coated. But the plasma flow of the New 3 coils is not in the structure but in-between the coils. The "environment" is the car. (1:19). What is about to happen? A number of you are breaking through. The deep teachings are taught privately with Keshe. Explains what happened with Eliya, and a new health teacher coming forward. The reason for teaching and correct conduct. (1:28). Every structure in body has 3 layers or fields coming together, the model is same with SF. Inner ring as gravity and outer as magnetic, (don't understand). This is essence of creation in U, don't need nuts and bolts. You need a minimal of 5 forces to create physicality. Flight is done by the interaction of the fields, not matter. Now we open another chapter in knowledge. How to understand the SSI Power systems. (1:36). You create the UFO through what we have been discussing since the Beads. It's an ILLUSION. (1:51). QUESTIONS: Bret asks the colors he sees in air, plasma? We all see it but some are sensitive. Only the Creator can see all spectrums of the Plasma. (1:58). Shielding from rays and waves. Keshe, why do you need shielding when there is no problem? It's coming, not just for one but all. The question of safety come up again, Plasma only delivers what you need according to your thoughts not your "wish". When you don't have insight into Reality everything is a joke, so it shows your ignorance. (2:08). We need the Chinese because they can understand this technology, yin and yang. Try to imagine how the fields flow. No fear in Plasma technology. (2:20). Letter from villager thanking for knowledge. Someone shows nice picture of the MG flows, spirals and interaction. Like a filtering process. John explains his spirals, one clockwise and counter. (2:31). These get Nano coated and put on terminal of battery for car or motorcycle, Clockwise on Negative terminal (Magnetic), CC on positive (Gravitational). Cover them in plastic with silicon sealed and pin slides down into the battery clamp. If you wanted to fill with Gans it should be dry or the liquid Gans enclosed in container. Keshe, the battery itself is a source of Gans energy, but to guarantee then add. A way to make Gans more powerful coming. Visualize the Plasma flow, it would loop around the battery and extra flows would power car, Like the ocean water cycle coming back through the rivers. (2:39). Keshe explains the flow going through starter to crankshaft, goes through the motor that has no electrical structure, next point is spark plugs and distributor and back to battery. At the spark plug it transfers from magnetic to gravitation and creates rotation and physical motion. The magnetic in spark plug and gravitation in motor block, motion created, your intention counts. Need to visualize it. 243 If the camshaft not there then the fields have to find an absorption, it would go to lift if fields were just right. The tires create a separation with the trees and environment, the air in the car will be used to advantage, ?? finds a new position in terms

of gravitational fields of the earth. Don't be in the car when testing the first flight, end up on the moon. (2:49). If you wind coil very tight and put dry Gans in center you create a faster transition form the Principle to the Matter state. How you merge the fields together, M to G etc. The wire is a passage of the field of the plasma. (2:54). The breathing is direct communication with emotions. The rate of breathing and energy transfer is individual dependent. Have to understand more about breath. Keshe developed cups are related to breathing. All man of same intelligence, but it is the physicality that decides what will reveal itself. The condition of the lung is related to what we show in the breast. Mother usually feeds child on left side first, heart. When man approach woman, right breast first, when problem with man woman trouble with right breast first. Look to which lung is taking more energy, (3:04). Emotions and attachment related to energy in lungs, if you are willing to expend more energy. The swallowing of the saliva when change energy to one side of lungs. Italians are most emotional people, watch how they breath. How we breath effects our emotions. Man and woman transferring energy. (3:10). Guy had a spontaneous collapse of lung, what did want to separate from, related to emotion. Water on the lung related to emotions, drown, want to be detached. Moved to another location start in September.

74th Knowledge Seekers Workshop August 13 2015

(:07). Keshe has an everlasting battery, and shown the correctness of technology. Why are producing all these things? Darkness in soul of man, want to light up man's physicality. If no physicality then soul works on different level. We go back to our tribal roots to share everything. The weakest child is still needed in family. (:14). The Health Pads relieve pain. (:20). Presentation. (:28). Presentation of Nano coated wires to relieve pain, and how to make it, 2 inch wire, and plastic cover for wire, make pointed end and bend back the other end, bead is to cover the sharp pointed end, test it on your palm and feel energy field. Set the mind of patient so he wants to be healed, and use the Acupuncture points to treat. Hold wire until patient feels, 30 seconds. In males left hand receives and right emits, and opposite for woman, start with the receiving fields. (:35). The Right Hand Rule; take right hand curl fingers and the direction of the thumb is the direction of the MG Fields. "This make a counter clockwise flow of fields Positive. **When you coil wire counter clockwise the fields go up**. The opposite is Negative. You can also coil a single and double secondary wire around the main Nano wire. He placed them in pens. (:39). Tested with 20 patients, result within 5 minutes. (:42). Keshe comes on, his pet uses the pad for help. These wires will change health of man. He explains the wires, the double coils are very powerful, they take the bodies own fields and puts them back. Connect the double loops and treat the soul of man, have to remember the emotion of the man, when two souls are connected by "twinity" , both MG fields, the center wire directs the flows. (:49). In the first wire the twist on the end is exactly like Alex feed back fields. Treats the soul. How much do you want to change, because psychologically you want to get attention through the pain. The double coil wire is the love you want to get attention from. Physical pain from physical damage, can use the normal wire without coils. (:56). Can connect 2 coils 1 Clockwise and 1 CC, Magnetic and Gravity, then put on the side of a cup, adjust the fields, M takes out what

you don't need and G puts in. These are "universal" magnets, by putting also at the bottom you cause the fields to cycle back into the water. Note: if you put Nano wires inside the cup of water, you go for structural repairs to body. The tightness and number of the windings count. There is a technique to create cups that are only M or G, one inside the other and you get conditions for physicality. You can put a straw in empty cup and breath from cup. (1:02). In cases of Fibromyalgia and CVS, when people report it doesn't work, it means they haven't received confirmation from the emotional source of disease. They waited 3 months for physicality to repair, then use emotional cup, powerful. Drink half a cup in one go, when you breath in cup, hold close to you with hands. To create a society without pain. (1:10). Instead of a single wire can use a lamp wire which is like a mesh many small wires, creates a composite field. It's different when its multiple of fields. For skin problems, make a patch of coiled wires and put it wrap it in tape and put on skin. When you put more than one wire you create a plasmatic field, and the body interacts with the MG fields. They're making a shoe insert, it covers every point in body and takes what it needs. Making also a glove for hand points. (1:18). Taxi driver said he learns so much from Keshe. Israeli government ordered second round of assassination of Iranian Nuclear Physicists. What was the true reason for the pain, then you can heal yourself. (1:22). For PROSTATE put the pain pad behind it between the legs. The pen or wires, and cover your back with pain pad or whatever you have, then the plasmatic fields go across. Prostate is an emotional disease, Keshe has prostate cancer for a long time, Because the pen sits in the middle whatever damage that was done to Hip and bone structure gets repaired also. The prostate takes the Ca from the hip. That is why you get bone cancer with prostate. For women it's the ovaries and uterus. When cancer spreads has an emotional reason, you want to finish your life. (1:29). Goes over stomach cancer, a punch in stomach or tumor non-malignant, have to understand why you have disease. It rains the decision on the total physicality and because the emotion is stronger it over rules the physicality. When the emotional aura gets smaller it wants to show I am not happy and reduction of the system. It can reduce to heart and lungs and the rest in paralysis. When you take pharmaceuticals remember that someone without money died or suffered to bring you this medicine. How come you accept someone else's sacrifice and not give yourself. We are the clinical trials, we collectively work to bring our own survival. (1:37). The new rings, this is the first time man has the tools of measurements of the plasma, you can control the MG field strength. It can be for flight, medicine, communication, etc. Put a pin in middle and change the field strengths. Keshe doesn't like to work on 13th, it means the end of a cycle, and new has to begin. This structure will be the keystone of Plasma. To stop in space you just balance the fields. Keshe refused treatment for cancer, treatment only when there is a need. What are we receiving or giving to bring about balance. (1:43). Whenever you make a cup don't think of it as a cup, but a point of reference of how you are adding MG fields to whatever is needed at the point of delivery in the body. You can't use the same cup for everyone, because you have to understand what is the emotional and physical need. Do we give it to the person or the partner with the emotion of the person, so the partner feels the pain they have caused. If you add the blood of the person to the cup, the other will feel the pain. You can carry the emotion and physicality in the cup and reproduce it in the space. Every day we only take from the spectrum of the Plasma what we need. (1:48). Man developed a way you can tell when Nano layer coated by color. Use torch to heat wire and in cold water.

Cut wire first then Nano coat. Coat the Nano wire with a Gans and let it dry and it becomes a continuous power supply. You can also put Nano wire in container with Gans with wire sticking out to direct it, this way it doesn't depend on the environment. (1:55). Warning to those who want to abuse technology to control man, we are controlling you. Tonight interview with Mike Harris. In China it's gotten hidden to benefit of the few. The gift is for benefit of humanity. Lot of people coming to KF but have clandestine activities. Soon Marco and Arman will take keshe's seat (break up signal). Eliya put her own mother on line to test needles. Meaning of MG, G is take what you need and M is push away what you don't need. (2:08). In Iran they have specific stomach cancer related to Walnut that gets fungus. Around the world there are diseases we need to catalogue and heal. There are diseases due to different MG fields. Obesity is USA, the cups can help loss weight. To make cups, certain materials feed emotions or physicality. What is obesity? Do we get attention by being fat. Short people compensate by achievements. Feed the emotion through the physicality. (2:15). In USA use huge amounts Na. Salt enhances the sweet taste. Salt can't stay in Na content as a plasma, goes to O-Na-O-H, plasma water, you have to store it, this brings N-C-O-H (AA), the body creates sacks of Nano material to store the Na. When you go on diets you get rid of the water in the sack, and have not got rid of the Na. The minute you go back to normal, the water simply refills the sacks and fat again. The brain keeps the Na for emergencies. Na is most important for conversion of Gans in solid state from plasma water (O-Na-O-H). To get rid of Na, make a Gans to get rid of Na, or first rub finger on tongue, then in salt water and again rub tongue, taste salt for 20 secs in mouth, then repeat, then rinse out all salt taste so nothing go down, you have told body huge amounts of salt are coming and it empties the Na in the sacks. Will loose 3 -5 kg every month in natural process, 1 time in morning and 1 at night. Then have to satisfy the emotion side, its happens when Carbon is available and Ca, That's how alcohol feeds the emotion tells its okay, also in chocolate the energy released through C and H in sugar. At lunch time you do the same thing but with Sugar, sugar is released in the blood to satisfy emotion, (salt released in Lymph). If you do it too much you get drunk cause the body releases the internal sugar. Do the sugar treatment every 2 days but salt everyday twice. Then your body finds its own weight to satisfy its emotion. (2:30). With Plasma there are no Guinea Pig. Understand the reason for the disease. (2:37). Mike Nasser nominated to teach, knows about making Gans of water. Cold caustic coated wires, etc. Keshe explains about Gans of water and loops the wire 8 times and can create clean water. he has created the MG field for water in the wires, fantastic. (2:45). Keshe trying hard to keep the ethos. Now Sohel in China doesn't want to show the Keshe battery. When we see misconduct we inform the governments. The Health pen's are worth billions but give it away free. Talks about manufacturing of different products. (3:00). Presentation by Emanuel of Malta on the Pain Pad. (3:13). Can be used for emotional balance, in a helmet. Working to overcome side effects of Chemotherapy. (3:25). Plays tape about "thoughts program". (3;32). Treaty with Iran to create 10 million jobs. Invite the cabinet of Israel to nuclear centers in Iran. (3:40). Mike's presentation, uses the Gans of water to create water. Mike not there ... chatter until. (3:50). Chakra Energy, Keshe says he doesn't understand it and needs an expert. (3:54). Mike comes on, human chakras have 8 centers, and Infinity Loop, working on new Table of Elements. plasma is like drops of food coloring into bowl of water, until you give it direction. (3:59). pictures of how the plasma light would flow if you could see

it, the colliding of light releases energy. How to twist wires to make Infinity Loop. When you twist to right, Counter-clockwise, the effect is the opposite,(CC rotation from plasma?), very important, 7 twists and completion is the 8th, replication of human body, frequency of 8, water becomes visible. Keshe asks him to make a video, he doesn't want to, collaborate with Malta. (4:05). He can replace all spinning reactors with these Infinity Loops, don't need Gans, but this is preferred. Hardwood ash and boil it becomes caustic. If you want water need the opposite, the opposite of anything is the "Nano" version. You need the Gans of water, create by spinning the container, wasn't Nano coated, it turned blue (this is the part doesn't work), then add that to the caustic. (4:09). How come you didn't see light? his drawings are of light traveling in Loop after Nano coated. He doesn't want people to know how much he knows. Keshe nominated as teacher. Put Gans of water in caustic it turns Nano, then spray that on Infinity Loops, it will attract the opposite of water to it, you should see condensation on the loop and start dripping. This is the gift of light, become light workers. (4:12). Keshe, "Light is the conversion of the Universal Plasma and the Matter plasma". You see a light it's the point when the Plasma MG break down to become the matter state of the MG fields. Light is the point of conversion, it will give insight into how you create matter, the same as the sound barrier, or when you boil something it changes from solid to liquid. Light is that point in the environment, when the fields reduce to become Matter. That is why we add to the Mass of this planet, because the light continuously shines, and converts to Matter. Renon comes on says his sister has eye problems, but when he touches tip of Nano wire to his finger, she sees a white light connect to the skin and disperses, it's a friction of MG fields. (4:17). When you burn wood, it is a Nano layer, he feels the fields from the Nano wood. In S. America they used ash to absorb energy. If you are ill you can lie in the ashes, it's a fully Nano coated material, the process of balancing the fields. Ashes have huge healing property, but don't cover body with it. (4:20).

Wrapping wire around plastic bottle, nano coat the plastic with the wire on it. If you put marijuana in caustic and spray it on bottle, cure cancer, cure all. Repeat. 7 turns and connect to end to get 8. Mike Nashif, peaceinyoursoul chat, photos. The number of twist sets frequency, we see at 8 hertz. Put the herbs in caustic , let cool, spray bottle and let Nano grow, you have all the energy of plant at 100% light. (4:34). It becomes a permanent composite Nano layer, this is similar to painting the Gans on the Nano coated wires. (4:40). Asked to make a video of the water infinity loop (IL). Keshe, when you make IL you radiate M as much as you absorb G, it brings a balance, 8 loop connecting is like a double loop, means total stability, different sizes of loops you get different fields, the loops should be the same size, when you close the loop you stop the leakage out. (4:46). A new mobile teaching unit to record teachers around the world who contribute to the teachings. (4:51). Grapheme Gans from graphite and a laser. Can grow nano in sunlight, different nano coatings have different colors. Drinking urine closes the loop. (4:57). Keshe, chakras, if you have problem in 4th chakra, cut into 5 and 3. Why you create water, in the fields in the body, the water has to come into position in the fields of man, why kidneys and bladder in position, you can make loops to absorb high concentrations of Ca, it's how plants absorb minerals. Mike talks about replacing the loops for the rotating reactors. (5:07). Can take the springs and form a pyramid of sizes, creates MG fields to connect them, creates a mass free Plasma in the structure, huge applications, getting to the point beyond the physical reactors, the cores unit to make a

free plasma on their own. Add to knowledge, draw infinity loop, when you make smaller you go to the higher strength, it mirrors to lower half, Alex's Beads has turned the IL in on itself and why so powerful, in same way as 7 loops with the 8th connecting back to itself, it puts the G field inside the M field. This is how U systems hold their power. When you turn it in on itself the outer ring has to create a gap. It's not 8 but 10 which is most stable, like inert gases. (5:18). Helium has actually 3 IL, H has 2IL. Australian graphic artists can visualize these ideas. Mike says he can take the same caustic and get different strengths. The Table of Elements is actually infinite, just add 1 to it, whatever number you can add 1 to it. (5:23). The center of the U is like a bullet in water, it's elongated still moving. The way all the Galaxy's fields are positioned is they look to the center of the U, we see Supernovas because at center there is always a G increase and not M, every SN creates a more concentrated core, the same with production of materials, you can make anything you like from 1 atom, with this loop you should be able to build any material from H. The mass is different from the Energy of mass, the E of M is same as U that's how they connect to each other. Mass as the strength of G field, understanding this you can travel from one U to another without much work. (5:28). Mike, can travel on light, gives a lecture, have to take care of your own soul, deal with your daughter, etc.

75th Knowledge Seekers Workshop August 20 2015

(:06). Change in a peaceful manner. Is humanity ready to join U community? Yes, as we see the technology spreading around world. Tomorrow first day of the arms down. (:11). Asking Putin to bring the World Peace Treaty on floor of United Nations. Keshe to remain scientist and leave the politicians to do their work. The rapid delivery of technology will pressure for change. Principle is not to be cheapest (China), but to share with humanity. Will allow any person to commercialize technology in their own country. (:24). Will give credit to inventors, but not to support individuals, Sohel in China has split off from KF. Recharging Talk about internet contact, to keep it. (:36). Get a lot of request for cancer treatment with the healing wires from last week. The wires are more focused and the wide spirals are more like a patch, you have G in center from Nano coat and M going out, what the body is sending out gets attracted to G field and reduces pain, and the replacement goes through the M, the spiral condition carries the emotions as well. The neural system is transmitted in the muscle through Cu, it's effective for pain relief, because made of Cu and the Gans of Cu works with the muscle, you create an Infinity loop with location of pain, same field strength as Cu nano in muscles. (:47). This is what happens in the Mineral Baths for healing, the Gans of the minerals interact with the Gans of muscles, becomes an Infinity Loop. In Cancer if we can measure its MG field the we can create a Gans to interact with it and change it. (:50). Get a blood test of cancer patient of all minerals in body, look for highest concentrations, for example, with Cu look for the highest concentration in body, it acts like a seed and the MG field is attracting materials and energy to itself, this we call cancer, the body supports it because it has succeeded in forming itself into a unit. If we change the environment of the cancer, it can change immediately. Develop systems to transmit information from the Gans to the Cancer cells, can be used on any disease. You don't die of cancer, but lack of energy, because all the energy is going to support life, meaning the cancer has individualized itself, and is taking all the energy. The treating Gans doesn't need to touch the cancer but

be in position to interact with its fields. It's being developed in India and China. (:55). You have to reach the emotional element in treating cancer. For example, breast cancer, the cancer is already spread throughout the body up to the neck (physicality), there is also an emotional cancer in the brain, but it's not seen, you need a system to communicate with both. If you use CuO Gans, but only a short few minutes, this is for physicality, use CO2 for the emotional cause. Treat with ice pack but put Gans inside, have to treat the emotions also for success. Have to pinpoint the seed of the cancer, in breast cancer it usually is Ca, but has to be done by physicians, may need composite Gans. CuO drains energy because it connects to neural system, if left on too long drains the body. Gans and nano have full spectrum of Plasma. (1:02). There are no muscles in the brain so you can't use CuO there, or you drain the system and may increase the disease. All the diseases of man come from the transference of energy in the plasmatic form, you can use the plasma condition to even grow arms and legs, by creating a spectrum of energy that fits the tissue of the limb, it copies the tissue of the bone, and muscle. Keshe grew a toe by using a hidden Nano material in the structure, allows a spectrum of fields, what comes in the blood and lymph only becomes matter when the right information Energy arrives by the neural system. For example, if 1 micro amp it becomes the nail, if 2 Micro Amp it becomes the bone. (1:06). This is knowledge of creation for deep space travel. When you use black Nano material you get all the spectrums, if you use a CuO Gans you limit it to that Field, Crucial to understand it has different applications, different energy transfer. FDA is opposing Nano materials but they have authority only in USA. Doctors of high intelligence are developing this technology. (1:14). A doctor showing his work, CO2 in the 3 cores, the head of man, then balls around, puts the blood of patient in tubes, with his own fingerprint very direct. (1:31). Rick brings up amputation, in child if the tip gets cut off it will grow back if they don't cover it. Doctor can try putting a Nano plate 2 cm in front of amputation to test. Alzheimer's is psychosomatic disease, the physical part is the brain, MS is in the brain affecting physicality, have to change the emotion at the barrier, why he doesn't want to use the memory, the test is to ask the patient to sing a song or hum, if he can then psychosomatic, if physical damage, the memory can be transfer from one part to another, when the pain is too much they close the gates to brain memory. (1:45). Talks again Chemo and how it works, the lymph passes through the bone structure and gathers strength when it hit the marrow and blood stream, Chemo adds energy to lymph causing it to swell and not pass through. (1:51). keshe built a system which measure the structure of the bone and extract energy from the lymph to shrink it. Nothing wrong with Chemo but have to eliminate the side effect, he has 30 blood tests and MRI to confirm this theory. If you over do it then the Lymph becomes a lethal weapon against the body, CO2 works, takes 6 months. Don't need to do Bone Marrow transplants anymore. (2:03). Can wrap the pain pad around the femur , the change takes time, months. (2:11). there is no way you can destroy or reduce a cell, we lack knowledge of cells. Apply technology to suit our level of understanding. He continues without any statements. (2:25). Brendon gives presentation, link to testimonials, especially wires and pens. Going to make plastic sealed tubes with the nano coated wires and coils inside and Gans tubes. Simple tubes, smaller in size with directional wires, can put them on the cups and experiment. The pain came back when patient had doubt, so intention important. Made a Gans tube bracelet and with coils inside, wear for some time to balance fields. He made a belt with nano wires in. To go deeper in body need longer

coils. (2:36). List of times for different pains, 1 year pain gone in 1 minute. (2:43). He just points the pen at the pain, but severe may rotate. After time his finger works like the nano pen. (2:49). It needs a "twinity" field, not as a effective on ones self. (2:58). CO2 Gans helps with Alzheimer. (3:03). (AA) C-O-H-N, C-12 and O-16, from Plasma point of view, N-14, balance nature, N for this planet. Adding Fe in the hemoglobin creates aggression in man and animals, The COHN comes from the Atmosphere, the Fe is in the matter part, when COHN meets up with Fe in the Matter manifestation you get aggression, CO2 is the balancing of the two. It's the interface of the two that creates the problem. Other parts of U where you don't have the interface, no aggression. Plasmatic Fe is 56 and COHN is only 49, this energy difference has to be released. CO2 (12 +2 = 44) brings balance between two. In the Energy Beings in the upper atmosphere observed by NASA we don't see aggression. Man has never understood why we have become so aggression, the interface of the two releases huge amounts of energy, we can create correction by understanding to make man peaceful. (3:14). How to become more peaceful. (3:23). Can we embed the CO2 in the body of the man to make him peaceful, or say the lion, would they be able to attract energy in a different way, don't need to kill. Now we know the problem and seek an answer. In space, should we change the atmosphere in craft to be peaceful beings. Do we make a new plant version to balance the fields. We can test CO2 helmets to make man peaceful. When we eat meat we block the CO2. Why do we see environments such as Hawaii, where man is more peaceful. (3:33) Call to doctor about reversal of cancer with technology. (3:43). Back to CO2, can we make CO2 part of the breathing or diet. (3:48). Pictures of the structure of Airplane and Body, airplane is according to matter available, Man's Body is a Gans state in accordance with plasma nature. Is human ready to create a Craft without a structure, a Universal Craft (UFO). Keshe invites anyone to come to Italy to develop this Spaceship without any screws, etc., on the basis of the U structure. We have extend knowledge of plasma. KF symbol and picture of ship with red reactors and a dome on top, a Plasma Craft. (4:00). Why you have trouble with lift, in matter thought, this is different, this is with plasma. If he let you fly with car or other reactors, you would have been annihilated. This ship is a light structure, if you move the reactor you move the wall. It's set to AA of the man. (4:18). Plasma will not accept aggression, those who come in contact with this, won't be able to breath, this is for man of peace who wants to explore the U. Study the structure of the human skull from conception and the brain, all the entities share the same strength. The spring reactors with the rings is enough to fly. Study the body of the man as a space craft. Come to Italy as one race and we'll make the craft. It always works at the MG fields of U. Chinese can be the first to build, the fat boy shows they have the mentality and understanding. (4:30). You came from Nothing in the interaction of field forces to give tangibility, 2 Plasmatic M fields came together as sperm and ovum. How far can you bring the knowledge to further peace. You disarm the whole world with plasma. Keshe says his job is complete. (4:39). How you create interactions of field strengths, in space you do not feel temperature because your body is made of Gans, you feel temperature in matter state. In Africa, the WHO confiscated all the technology because they worked. Have to have the right intention. The core team has the job to bring balance in the human race, the table of 12 is complete, guide the soul of the man. (4:44). Questions: the first group accepted 9/15 to build spaceship. Bret asks about controlling ships with mind, don't ask about problems, come with good intention for humanity. In

war zones if you adjust the CO2 soldier will loose aggression. (4:50). You decide how many stories you want by the MG fields. There are ships that are waiting to celebrate. I explained it in the way Bone Marrow makes the lymph. (4:56). Presentation of his work, making reactors with syringes. Add to knowledge, create dynamic interaction without motors. The structure will be dictated by the field forces, when you start working, the floor will be solid, and something happens and it disappears, need lot of understanding of how to control the fields, everything has been show now needs to practice it. You can build your homes with it, now, can have total freedom. Man has possibility the create the physicality as he wills. (5:06). Made a breathing tube coiled with wires. (5:10). He made a cup with wire wrapped 7 times around and connected equals 8. Why are you sticking to 8? it depends on the soul and physicality. WARNING, on the cups don't put anything between the wrapping on the cup, it can create diseases. The Chakras are reversed, the head sits at the bottom, can treat the different areas with different herbs, but Keshe says the body isn't working that way, too overloaded. It's understanding how the body receives fields. (5:15). Marco on vacation. It's for humanity to make the Spaceship.

76th Knowledge Seekers Workshop Aug 27 2015

The BBC published a Chemist confirms production of CO2 Nano fibers using zinc plates, he's claiming to have discovered it. We have to expose this otherwise he puts a patent it, and blocks us. It's verified by science community, George Washington University. You're work is confirmed we are correct. They are showing the rings as we do. They say they can only 9 grams. (:14). Release systems that can be used for amputation, needs to be fresh and takes months to regenerate, you mount the nano material on cut off finger and 24 hours it's communicating with finger to re-grow. Explains how it works, the body slowly builds in the gap of 3 to 5 mm, and keep adjusting as grows. Every cell of body uses different voltage and brain keeps track and that's how the cells reproduce, but you have to keep wound open. (:30). Last week told how to make SS out of 3 reactors on the ground, how to get them moving and fields interacting, slowing down fields leading to tangibility. How did Galaxy start without motor and then rotate? No where else in U do you have wheels only humans. U uses Plasma. The interactions of Plasmas fields multiples and friction, loss of energy gives rise to tangible matter. (:38). The 3 layers (fields) of the skin gives the illusion of tangibility, physicality is nothing but the illusion of fields interacting to a state of matter, your physical structure is in a Gans state. So how many of you have confirmed tangibility from your reactors? None, the tangibility is blocked by the matter itself, the fields in the matter zone are attracted back to itself and you don't see matter. Motion comes through the loss of fields and gradient, if you have same level no motion of plasma, motion comes through the flow of the plasma. (:44). The spring coils one inside the other, the plasma works in the gaps, the 3 reactors go in the gaps. The New reactor is Nano wire coil balls, one inside the other, it hollow inside, inside sphere G and outside M, nano coated creates its own plasma, by placing spheres inside two rings makes it move, connect the two coils and you get CC rotation of plasma, (:53). The reactors are inside the MG fields of the coils and with time they will rotate, let them build up, the fields have to find their position within this fields, the reactors usually move down, now you have the skin of the man, how to get the 3rd ring? Place the 4th core in the middle, the 4th core moves upward to new position, this creates the dome of the craft, the 3 reactors that moved down create the lower half of the craft. This is how

you create a craft. The rings are like the bone structure. this is the True Star Formation. (1:03). If you go back to the first 3 Health workshops, this is the structure of skin and bones. (1:14). Talks more about new bead cores, the system makes power and lift, can make this on your table top. (1:20). Ali presentation, he will head the SS program. Electrician and in his garage started to play with technology, knew a man drive his car for 2 years without fuel, worked with Searl generator and Tesla Coil, play with magnets, they have power to repel but fall down to earth because of G, he start to read everything for 1.5 years, he discovered that formula was wrong, then built a Spaceship (SS), first tried with fiberglass, then metal plate, used a double Tesla coil in center. (1:36). (1:42). Using Mercury in cores to get levitation, it has 3 states of matter at same time, it behaves as Gans, at same time it's in 3 Gans states of plasma. (1:50). He put a high voltage on Tesla Coil and it burnt, then the cable moving but the disc became invisible, he thinks when the cable burned it got Nano coated. Keshe says wire became black and created a plasma lift, he used a silver wire and after Nano coated it broke, he couldn't use radio frequency because of the shielding, you need thought control, the Chinese can do. (2:03). Couldn't control from outside so decide to build a bigger craft, 7 meters diameter, government funded is, and control from inside. He scaled the model up, from inside he saw many different colors melting together, Keshe, each one has its own MG field and interaction with environment and creates its own color, like the Gans, inside he lost track of time, 3 of them went into the craft, He's Turkish. From inside can not see out because of shielding, the windows become totally black. (2:11). He created shielding and lift. The point Tesla missed was that between the shielding capacitors, the black insulator instead of Formica it has to be Nano coated, tubes or springs, Tesla didn't get the part of G. (2:19). Chinese coming on to share their knowledge. (2:29). they start the translation. He made capacitors with Nano wires. (2:30). The polarity of the Nano wires, he used a voltmeter to determine positive (exit) and negative (entry), the 2 negatives into the bottles. (2:45). Keshe explains the capacitor with CO2 Gans. Keshe says he understands and not just following, put him forward as a teacher. (2:51). He put a battery in to connect to Grid. (2:58). Keshe says all the capacitors are storing and problem is he used 2 diodes on top of the batteries, the diodes work on electron and block plasma flow, this is a schizophrenic system but it's very powerful, the battery itself over time becomes Nano coated and the plates in the battery produce AC/DC. (3:05). In plasma you don't need diodes, control the flow by entry/exit. Keshe says we are developing capacitors without Gans. (3:21). End of Chinese, couldn't understand much. Now Arman showing, "pizza stacker", two coils mounted on a plate, this over comes difficulty of making Gans. (3:05). Back to Ali, when the 3 of them were inside the SS and what he experienced, when you create your own plasma, you create your own shell within the bigger shell and you become independent of outside forces. (3:29). You can very easily control where you want to go by adjusting the balls, inside ship it's 1G. (3:34). Ali is one of 3 people who achieved lift, he created the Plasma through matter, at KF he can start with Plasma. Does the craft collapse when plasma shuts down, exits craft, he feels like soul going out of body, like jumping into a pool, when the fields pass through the body it's like tickling you, a pressure came in his belly like pushing him up, that was 15 years ago. The "ant bite" feeling, with plasma transfer our body is made of Gans, it touches the end of the nerves, like phantom pain, interaction of the fields with the body, he gets the same feelings when he touches the Gans but only on the hands. (3:45). Questions, shows a

picture. (3:48). Renan of the Philippines KF marketing Pain Pens, he is also reviewing what Keshe talked about last week, how to do the loose weight treatment with salt and sugar, IMPORTANT: it won't work unless you drink a lot of water after treatment to flush out Na, up to half liter. (3:55). Energizing the emotional part by breathing into the cup of life, 10 min 3 times per day. He is treating his Father with CO2 Gans pack, and Gans bracelet. (4:01) Created a new Nano health wire patch, 2 spirals connected, and went over the Prostate treatment, Keshe added problems that occur, secondary cancer above the Ankles, and top of shoulder, and the ribs left side level with the heart, and on the shoulder bones. Prostate is due to emotional problem, need to make a patch for these parts. Finished talk about connecting the production of products world wide.

77th knowledge seekers workshop

KF is opening manufacturing world wide, Power Unit coming, the output is generally 3 to 4 kwh, 18 cm high. Holding the blueprints for 18 months to the manufacturing, then open to public, Health Pain Pads. (:15). Disaster coming to USA soon, they should not get in the way to help Dominican Republic, KF will hold 10000 power generators in reserve for disaster emergency, including pain pens and water units. (:21). West Coast of USA a shift in continental plates Earthquake. We will manufacture Kits for time of Disaster, they'll produce power and clean water and Pain pens, "Pizza Stacker". (:27). Have gone into production of UFO, flight systems, Sohel trying to control craft by his thoughts. Every country on this planet will be effected by using solid state plasma, Tesla ran a car in US with power supply in Russia, we have surpassed that already. (:37). Video of "My Gans journey". (:44). switch over to Thomas of Dominican Republic, online KS for past few years, just wiped out by Flood set back 20 years, call for help to KF and beautiful response, Mud slides, and people cut off, $10,000 given in aid, 200 pain pads, water units, Mike Nashiff helping out, you can produce systems locally, (golden age of Gans, Youtube), you have all the faculties to do the work yourself, make available the technology to clean water, the Gans sinks to bottom and drink the top. (:53). Add heavy saltwater from sea, to ash it becomes a Gans, you can put Nano coated Cu wire in that water, it will clean it 90 to 100%, test the water. Thanking a lot of people to help. Asks Keshe to share what he knows about the earth changes. A huge plate movement immanent in the coming months in West Coast of US, this disaster will force World Peace, American forces will not be able to meet it, recall all military forces to build homes for those who lost homes, estimate 10 to 20 million. (1:00). CA is 8th biggest economy in world. Naval ships will become homes, Nuclear Warheads will be in danger. There is no practical advice, it will happen in 2 sequences, he was not wrong on Fukoshima, but could be totally wrong, Theran earthquake immanent. Global effect, we can not say, this is beginning of the split of 2 continents. Volcanoes are possible. Hawaiian islands to partially submerge, New Zealand affected. This is the warning. (1:16). The inland dams supplying CA will break and the Nukes will leak, in a series of earthquake, what we saw with Fukoshima. How many people remember New Orleans, etc. Disasters help man to grow, it's part of the structure of mankind. Mexico City will be devastated, the city is built on rock and roll. We can't run away, we wait until it happens, and then deal with it. The KF technology will be there to help people survive. Conversion of the plasma to food, it just happened to be at this time, it's not planned. It's the

separation of 2 continents, it's done by the field forces of the planet, absolutely immanent. No comment on exact date, if you live in area, move. (1:27). Keshe explains the effect of season changes and on Earthquakes and cracking of the plates. Australia will be pushed in direction of South America. If we miss it this year maybe next year. Document how you spend the money. Get people to make the pens and economy moving. Keshe will open the power unit blueprint to make the units, collaborate with Philippines. (1:43). May have to release the wireless power. (1:47). Agriculture presentation from Mexico, started with CO2 Gans, his water supply was contaminated, used nano wires in the roots of the plants and collect the seeds, wanted to go back to original seeds, the nano wires were fixing N in soil, using the hoses with Gans. (2:00). His family member started to consume the nano treated plants, used nano coated wires in germinating beds, watered one time with Gans water, 3 times more in first trial, and withstood 7 days frost. (2:09). No side effects were seen in people who consumed food, label it Gans made vegetable. (2:16). Showed picture of Nano coated nails. (2:24). rambling on ... some photos. (2:29) Keshe asks him to setup a protocol, Gans has been used in South America for thousands of years, nails and ash. (2:39). Keshe says nano coat plastic pipes inside and out, run the water very slow through pipes so water can absorb energy, also add short pieces of different metals pipes. (2:45). Do the crops made with nano materials have healing properties, and eradicate all the diseases through the food? He says he feels more energetic, doesn't get sick anymore. He has one starship reactor and after 20 years now water in the wells. (2:55). Photos of harvest, confirms increase in harvest. (3:01). Wheat experiment the dog kept eating and wheat kept growing. (3:07). KF setting up agricultural communities to share knowledge. The lettuce keeps longer. (3:24). Keshe talks about life on this planet and how the heavy metal and minerals are part of this formation, Plants (vertical people) use Mg and Animals (horizontal people) use Fe, is there an interim or is it the fish life. (3:29) Question about "structured water", when water goes through vortices it changes its structure. They decontaminate and energize the water. (3:35). Marie presents her video, from Salt Lake City, the young generation, a spiritual person who hungered for knowledge, left family and become "black sheep", she was born ALS, she asked spirit and was lead to Keshe, learning the science of creation, took first step and nano coated, wanted something material to help people with pain. She went out and bought a beautiful bottle for the Gans and it started to glow and light up the room, loose the concept and feel one with it. (3:44). She can see some kind of light but not the same light, he asked if she could create it, she responds by rambling, not clear, reads a quote. (4:05). Renan from Philippines presents. He made a Nano coiled helmet, and a belt, and a Dry Gans patch using CO2 and CH3 put on band-Aid, or with tiny coiled Gans, good for wounds, Health Cups by putting Gans in plastic cups and or coils and fruits on top to absorb properties, you can customize by using the blood but only for yourself, Gans health tubes bracelet. (4:22). Ali teaches again, explain experience in SS, 3 people communicate but different, received the message before speaking, you can hear the thinking before it comes physical, only flew 4 times with craft, first lift was 1000 feet, something came from own shielding damage body, one switch on it jump up 3 meters. (4:37). Did some work with free energy. (4:46). 2 people to control craft, 1 to operate the balls, flight for 2 to 3 hours, how he landed back to same spot??, Ali saw black spots on the craft, Keshe says someone else getting black spots on ceiling of test where Star Formation, come from energy release in the structure, not

gamma rays. Alex got the black spots, just under the light in living room, 2 different metals may be capacitor. (4:59). A lot of energy in the house, no one like to eat, always feel full. They are discussing a test to control a reactor with thoughts, 136 Hz for 4 days, then he uses thoughts to control reactor, he has been able to change fields in reactors. Alex put a drop of Gans in water bottle and kept 3 cm from reactor and it created Gans by itself. (5:06). The plasma creates nano layers so it can move in, he draws it. Plasma can not go through matter in one go, it first creates a nano layer and then penetrates, these are the black spots. (5:10). How he landed back in the same spot, he created "twinity" in respect to his take off position, (drew infinity loop around craft and take off position), that becomes the reference point, it's locked to that MG fields point, you get a flash when you change the point of reference, you always come back to the same point unless you change the point. (5:17). Keshe clarifies question about Mercury from last week, it has states of solid, liquid and gas (vapor) at same time, this is its matter state, the heat when nano coating changes from molecular structure to atomic structure, Mercury when enters body of man acts as a Gans state, like mercury fillings we constantly chew and breath in, this is also why problems with immunizations when they add mercury to it, it behaves as a Gans, and why you get psychological damage and motor with fillings even, every time you chew you vaporize it and goes to nostrils, and effects the brain and autism, and why immunizations are dangerous, science hasn't understood that body works on Gans level not matter. (5:29). Solution, you put the immunization floating on water inside a cup with the Gans of mercury around and the MG fields will be transferred out of immunization or will it add to problem. There is a machine to measure how a child will react to the mercury.

78th knowledge seekers workshop 09-10-2015

Conflict with organization about a pedophilia case turned over to the FBI, KF was attacked about the logo and they will change it. Rick got very upset about photos. (:26). Keshe discusses the Power supplies, they are not a generator and don't require plug or voltage conversion. (:30). Discusses how the Power Units work, SUMMARY of the Plasma has full spectrum of MG fields. (:37). Rep from Ghana. In the Gans you have millions of little suns releasing MG fields come as a whole package. (From a Plasma the process is reversed to Matter, in the space you always have plasma and not matter to work with), this is what's happening in the Power Unit, So you have available the building blocks of life. (:41). When you connect to PU you create a field connection that it gives you O, conversion of a plasma into a desired entity. (:53). Convert energy of plasma to create what you want. Puzzle complete, we went from matter to Nano to Gans, Plasma, and now back to Matter is shape we control. Ali was using a capacitor in his SS. Every Gans has the total Spectrum to make anything. (1:00). Goes over how the pen works with double coils (M & G) and central wire to direct the flow, Since all of the skin flows steady there is no draw of fields, only where the fields are changing, and that means pain, and automatically brings a balance. Same as wiht Power Unit, transfer of power without wires, Tesla's car the power unit in Moscow and drove car in NY. (1:06). How to create motion with PU in car, do we need wheels? Car will get Nano coated and become the same as SS. (1:10). You started at the flow of electrons to created motion, some relation to plasma? Go back to putting banana over water

surrounded by Gans, the water was the medium of conversion, you need a medium for the conversion. The Matter on earth is made of the GM fields of Earth, Solar System, and Universe. Water when it leaves the MG fields of earth may not necessarily remain liquid. Learn how to make Plasmatic Filters used to convert the Plasma to Energy, Matter, and Motion. (1:16). Someone created a SUMMARY or INDEX of teachings, so you can go right to minutes on a particular video. What the Mexican man (in detail how to create matter out of plasma) was discussing, passing water through Nano material it becomes a Gans state and converts to the plants, when it comes to the plant it converts itself to higher growth etc., they say there is enough Fe in a man to make a nail, the conversion of matter to Gans creates expansion, it's similar to what happens in High Blood Pressure the energy causes expansion in the blood cell. Matter and Plasma convert into the other, in Matter your confined to the Temperature and Pressure, in Plasma you're confined to the MG field flow within the environment of Universal, in Matter you're tightly packed but in Gans you're open to U structure. (1:24). When Gans goes to matter it goes to either field strength or tangibility. When you eat food it releases the energy of a Gans state not matter, in space you create the field strength of food rather then tangibility. Mike had part of answer but didn't follow through, the 8 loop N wires create water, but if you connect ends to PU, now you decide what each loop can create by placing a filter between it, go back to H reactors in lab, or the bead rings Marco made 6 and 12. You can change the M or G, isotopes and different "elements", two winding coils were added to change the MG fields, this is to control the MG fields for your body, can't receive guests in space unless change MG fields of their body, connecting fields around the rings determine matter by filtering, like in the pen and finger, the stronger fields absorb the weaker. (1:33). As with Renan within 10 sec pain gone, within 10 sec anywhere in U, the destination planet will be a much stronger field strength. *** Try to find out how to absorb energies in a given environment and you don't need a Gans, moving towards non-tangible reactors, the spring coil cores is a intermediary half way to non-confined plasmas, reach in the next 12 months. To do this you have to think totally in Plasmatic Condition. (1:42). West Coast USA last week, there was a lot of panic since last week, be content with what have, the dollar has no meaning in Space. In Africa they can by-pass all the infrastructure and go straight to the plasma in one stroke. (1:50). Now to present you have to sign a waiver releasing all the technology to freedom and you're not violating any copyrights, and use KF logo. Renan, Pen are in production, Emergency Plasma Kits. Indicators from nature, list of what's needed in case of emergency. How to make Emergency Patch with the CO2 Gans energized water (not the Gans), even a drop of Energized water in a barrel water, can burn a stick and use as pain reliever, Open Wound Treatment, can wrap patches around water bottles, breath in air in Health Cup, How to Decontaminate Water with Wood Ash, Nano wires or CO2 Gans, ashes put in the water and settled out for 2 to 3 times. (2:04). Pain pen use 7 cm long, wrapped C-Clockwise, see photo for direction and cover with tape, you can point either direction it relieves pain, rain coats inserted with energized Gans pads, gloves, socks (feet are vulnerable). (2:10). Keshe says use Gans water of CuO2, for infected wounds, it disinfectant but only for a few minutes, can mix Gans in patch 1 CO2 in middle CuO2 slightly different angles, in burns it replicates the 3 layers of skin and healing fast, it mirror the layers of the missing skin, Cu is part of the physicality and don't use long, pain is at emotional level CO2 is good. (2:17). Gans breathing mask put Gans around the

filter and not block them, mosquito repellant by adding Citronella Oil and Lemon Grass to CO2 Gans, can apply it directly to bite and instant pain relief. (2:30). Keshe shows a Chinese Doctor's invention, a center core of Gans of choice, fills in tubes with the blood of patient, the changes happen remotely, CH3, CO2, CuO2 to reach emotional level of man, if you make a Gans of the 12 salts you could reach every structure in body of man, 12 salts came from cremated body in homeopathy. (2:44). In the coming months everyone will be able to create a UFO, are we going to be subjected to national borders or create new rules, or Universal Rules free at the point of need, man wastes lot on resources, every country has large amounts in reserve for in case of emergency, this new technology eliminates the need for reserves. (2:54). New logo, 5 people have achieved lift, if you got a hunger pain put pad on stomach pain goes, did it give energy or relieve pain? what if you use CH3? The 12 salts of body contained in CuO2. Let's go back and expand knowledge. The 2 rings of 6 and 12 Beads, looks like the Chinese Doctors reactor, single core were original spacecraft. Mike preparing for coming disaster to West Coast. How to dictate the NWO or go to Universal Order, you get whatever you need? (3:03). (3:11). Renan discusses how he feels with the cores. (3:15). Kalee talk about his medical device for different kinds of diseases. Ali speaks about feeling the energy from four Nano coils connected. Hard to understand, shows some drawings. (3:27). David from Mexico, agriculture, pictures of corn, can't understand very well, tests on pest control apply Gans water of CuO2. (3:44). Keshe, burn the fertilizer and create a nano and then Gans, and use as fertilizer. Looking to produce nano pipes for watering plants. (3:53). He says he doesn't need pesticides plants growing fast up which creates problems, he says the taste sweeter. (4:02). (4:10). Keshe is talking about the reactor, the height of the Free plasma dictates the size of craft.

79th Knowledge Seekers Workshop Sept 17 2015

At New facility. There are Tsunami on coast of Chile, and earthquakes. Goes over the number of earthquakes on West Coast, 2 in CA, 3 in Panama, and 1 in Chile. It will die down until next Autumn. (:05). The lava layer moving under the top layer. He expects losses of 10 to 20 million, the people in Central America hit worse. (:10). The first power units are on schedule, 17 cm and less then 1 kg. Teaching direction is going now straight into understanding the work of the Plasma. We started in Matter and went to Plasma. (:19). Now from Plasma we become the creators to create whatever Matter we need at the point of need, this is what is required to travel in deep space. Matter itself is in a state of Plasma at a given MG field strength. We become concerned only with how the plasmas interact with each other to get the products. (:23). We hope to work with the governments and start to use radioactive materials in the spring coils, like plutonium. Make the springs not so tight so the plasma can flow. (:28). Keshe is moving on with technology, some will stay behind. (:30). Problem with this Power unit it only produces continuous plasma out of the top, the KS have to learn how to filter the plasma into outputs. It's called power supply and not a generator, but it will supply household needs , not industrial. (:33). While you can still use matter level for your house, KF is developing filters to produce water, food, medicine, etc.. You have the totality of a plasma available, you decide. You make a filter that collects the MG of water (this form is used in space), (:40) and the if you want real drinking water it has to be reduced further. Goes over how CO2 kits works, how CO2 converts, in space we don't carry

water. (:44). The filters interact with plasma. By estimating field strength of Cu and Zn in CO2 Kit we can calculate MG fields of Carbon. Alternative method is using a "base matter", converting a proton and electron to a neutron. This system can attract plasmas in Space. With base matter you add numbers of elements. (:52). interference on video... (:56). The U only works on Plasma and interactions of Plasma, matter is a by-product, Fundamental to Teaching... is man ready to make the step? (1:01). In space you work on memory of what watermelon is, poisoning in space very difficult because the body knows it doesn't fit, the environment will be peaceful, because all needs are met, it's a balanced environment. (1:06). In the cars the spark plugs crack why?, it's point of conflict between the two fields, motor and plasma, 30 to 70% decrease in fuel consumption. You start trusting the plasma. (1:12). Goes over the 2 coiled rings and placing reactors, placing of reactors creates the dome of UFO, John Searl has made some new arrangements of reactors, you will see structure in front of you, but you will feel the fields, by connecting the rings get potential differences and current flows, if you block the flows you can collect the fields as matter. (1:19). In matter state H is 1 proton and 1 electron, in Plasma state H is 1G and 1M, and the MG property of H; O 8 protons & 8 neutrons & 8 electrons, in Plasma fingerprint or field strength of MG of O, you don't count particles but total fields strength balance. Went over how to control SS with these rings. (1:25). The car units are only for the car, house for house. How you wind the coils is very important whether it works or not, direction, tightness, gaps, etc. In the Chinese Fat Boy they start to see materials being produces. Nano coated wires need a supply so you brush the Gans on the wires and gives it a continuous flow at a given strength, this is why the little system is so powerful. This is what Tesla Group was doing to generate 10 kwh, but they didn't understand about Gans. (1:35). You have to keep the PU running at the same demand or power from the Grid will come in to fill the gap and charge you. (The Plasma flow has gone into the Grid, so if you lower the flow, the plasma part in the Grid will flow back to since your neighbors don't have a plasma. The car will get nano coated and may start to float. The body can't get sick from it because it only takes what it needs, and since it is both M and G it satisfies both psychological and physical, the Italians have become more calm. Accidents will be reduced because the MG fields will keep the cars apart. (1:42). Some of you will go in the Solar system, don't do it, John Searl has made the 3 ring controller, don't touch inner core because it can effect the psychology. In the Infinity Loop (IL), you use both the M and G. (1:45). Giving a cryptic warning that plasma technology has unknowns, fields without either G or M. (1:51). Question abut counting electrons, he says you have a balance of fields. How to cope with Gans? Make a paste and apply to coils and then totally dried, Nano coating won't stick to anything, but Gans has the same fields. (1:55). (camera back), when you connect coils NEVER as matter state connection, ALL connections have to go through Nano coated tubing or coiled on top of each other, do not use junctions and screws because you create a different condition, have to continuously remain in Nano state or breaks the flow. We need you to fly UFO's in the coming weeks, always leave lot of end wire to connect. When connecting coils together, M to M and G to G, you'll see huge performance, you can do different connections, but understand what you are doing. (2:01). ALWAYS watch how you are winding the coils, if connected the right way it works good, the field is not in the wires, it's the fields in the center that flow and not in wires, every twist adds to the power. If you change the shape of the Nano coated cup to triangle, then you get full

dimensions of the banana on top, you even feel like you have eaten a banana, in the bottom triangle you get packing of MG fields, so G is much stronger and G dictates M in physicality, G is the emotional part. in the square cups you only tasted the physical part. (2:08). Questions, what dictates whether the PU is M or G, is it the internal or external coil? Always the center is G, and G carries the denser fields (Mass), and that's why you have a mass, (read book 1 or 2). To connect to the Grid just twist bare copper wires around the Nano wires. (2:12). In PT you don't Nano coat anymore with Caustic or burning, but with another P, the P creates perfectly spaced Nano materials way better then any other method. Asks other KS to translate into their own language quickly so that their country doesn't fall behind. (2:19). When you coat the Cups outside you make a filter, when you coat also inside the cup carries the full spectrum. You can burn the herbs to create a Gans and make water of it and put on pain pad. Most of Cancers can be reversed by laying in the water of the Gans, if you have cancer in the muscles use CuO2 Gans water for a short time. Water of Gans of CO2 for cancers that are emotionally based, you can even dip your head in it. For stomach cancer use CO2 Gans. (2:29) A scientist coming in and testing with instruments what Gans can do. KF goes from teaching to research and testing and manufacture within 30 days, they are setting up whole manufacturing to developing countries for $30K. (2:35). Different ways of making Nano coats serves different purposes, Fire methods gives more homogenous and good for PU, for coils the NaOH is not so good because uneven depending on tightness of coils, the electric system is best system to produce Gans, for medical application NaOH is best because it allows the layers to grow. The size of wire not important it's the gap between. Keep all coil winding in same direction, if one is CC make all CC, G comes from the top to the bottom and M bottom to top. (2:41). The rotation of the Plasma, in double coils one goes CC and the other Clockwise, what comes out of the coils is not through the wires but what plasmatic strength you've collected in the center. Learn how to get the plasma flow out of its cage and go where you want it, it works like the stomach, you mix the plasma and deliver it to organs and muscles. You are always looking for the wires but don't get fooled, this is plasma, open it up by making a filter so it can come out, if we collect the reactors in parallel can we amplify it? Yes. Keshe told Chinese that all money will stay in China to help spread technology in China.

80th Knowledge Seekers Workshop Sept 24 2015

We use only the little vibration of electrons for power, in plasma we access huge amount of energy in the entire plasma. (:05). The common denominator AA COHN. We need to inform man as a totality to the totality, we call for all the governments come together and release this technology to all humanity. At meeting in Rome, October 16, we will give the PU to all the ambassadors of the World, but they have to sign World Peace Treaty to get the free unit. (:14). One PU will be given to President Obama, etc. A thousand units will be delivered in Philippines, in Italy, etc.. In due coarse power generator will be released in Europe. You can receive energy from the PU in same way as with sun, without going through digestive track. The coarse of Mankind has changed and we have no say in it. We teach as many countries as possible to produce these units as fast as possible. (:22). Doesn't need certification because we fall under international law. If they try to stop the technology it is already distributed across the world. In 2012 the Italian people put so much pressure on government to break rank and attend the Peace Conference. (:30).

Governments will be in crisis, by losing energy revenues, but it needs to go worldwide in one go, asked the Saudi Government to stop loading tankers. The smog in large cities will end, and change the climate instantaneously. In 1972 Iran raised the price of oil from $2.5 to 3.5 and created a crisis in Europe, now its $50 a barrel we don't say a thing. All the governments will together be in same crisis. Africa will have no debts, and Western countries will be under debt for Nuclear power, which they created falsely, this will lead to equality among nation. India is big concern, the technology has to be rapidly developed there. (:36). The solution is we work one earth one nation, the major oil companies have lost there power, teach 3rd world nations quickly. (:45). It is out of Keshe's hands, if anything happens to him the blueprints will be released worldwide. It's you, Humanity who have to share it. (1:00). Questions: The PU has been turned over to the Chinese government to distribute the unit. It's been made public so no one can patent it, you have total freedom to deliver it, this time no shutting down. Armies will become obsolete. The next step is to explore the U in peace. The Space program needs whole planet participation. You give tangibility to the fields, there will only be a platform for the reactors and the rest will be created by the plasma. You can't open it or shouldn't. A working unit will be shown tomorrow to Italian government. In Plasma there is no minimum load or maximum, it works immediately but then begins to Nano coat house wiring to find its balance. The coming units will be generators but not thins one. Heaters won't work on the present system because it's an interface of matter and not fields, the plasma over looks it because its too low, in future will slow plasma down. The plasma works on the basis of need. In the nature it takes thousands of years for the plasma to reduce to matter, we will develop a way to do it quickly, it reduces power to 60% on heaters. (1:14). The governments will loose 80% revenues, the people will work in the community with their free time, no one will be slave or master, this Plasma Revolution, you won't need to kill any more animals. This is the "satellite" he promised to bring down some months ago to show the technology. It's better for the governments to keep Keshe alive. (1:21). Once you start the system don't remove it from the Grid, because it works backward. You can use incandescent lights but not full. The Philippine group works on the ethos, are dedicated to peace, and loyal. (1:25). These PU can deliver kwh or megawatts, it has to do with demands. (1:30). Can put a PU in center of village to create food. Alex will teach about food conversions. The Lungs are releasing energy for the emotional part of brain, and intestine for the physical part, we can deliver energy to the emotional part though lungs so you don't feel hunger, the system continuously sends the full spectrum. (1:38). Alex sprayed alcohol plant on the spring reactor and put a glass of water next to it and he got the taste of alcohol and got drunk without drinking any alcohol. He used cooked food and felt full all day. If the Grid goes down does the PU continue to power house? Have to see? The PU doesn't produce any heat. Bill Gates days are over. The computers will be too slow in this technology, you can control the system by thoughts. (1:56). The next generation of PU will be size of a CD. You can do what ever you like, you can use Alex' beads if you want, the next will be Plasma Heaters, they'll radiate heat by thought straight to your body, cooling the body will be the same way. (2:00). Someone has hooked it up but it doesn't work, only draining the battery, Keshe says, you haven't understood, you have to want it, a need. People will take from this technology according to their intelligence. (2:08). When two plasma connects it's like falling in love, it has to do with MG fields connecting. The new students will not be

taught about nano materials etc, but go straight to Plasma technology. (2:14). Had to take over screen share, need first declaration that no violation of copyright. (2.23). To extract poison out of the body, you need to create the opposite field, understand the strength of it. (2:26). If the soul is a Free Plasma then why do we need another, interaction is needed to keep it from being static, you have some strengths and need others, work to achieve balance, one day he'll explain the work of the soul.

81st Knowledge Seekers Workshop Oct 1 2015

Working toward the October 16, Ambassador meeting, "free energy for world peace". Home and car units are ready for delivery. (:05). At the same time 2000 units will be released around the world. The Philippine PU are using a structure of matter so limited to 3.3 kw, the target for Italy is 1 million by December. (:15). Some people have got lost, went too fast from Gans to Plasma, we are use to tangibility and atmospheric conditions (temperature and pressure), the Plasma is Universal conditions. Plasma in Gans state has a physical appearance in line with earth, Plasma is free. Blood in the vessel is in a vacuum and is not red, only when it comes into atmospheric conditions it turns red. (:22). As discussed yesterday in teachings, the U has a central line, everything spreads out from there, so if you're a cell on earth you started from the center line and spread out, from there you have connections with everything, as it divides and becomes weaker it becomes different matters in U, closer to the center line of U both M and G fields increase. Earth is a plasma and has connections to U, but most of our M fields connect to our Mother, Sun, because we were created out of the fields of the mother. Gans is created out of conditions of Na on this planet, but further in free state is Plasma, now you have the freedom to reverse it and get the 3 lower states. (:34). People with identity with matter stay there, in Nano you work with fields, and Gans is confined to conditions of planet and its life is short. You can't bring Gans into space, once you do the openness makes it Plasma. The "Kebab" man has been making Gans without knowing, burn meat on stick and wash it off with caustic, but didn't collect it. (:43). The father feels the pain of the son, because he has a plasmatic link to him. The Chinese made CO2 reactor, the brain made of CO2, he raise his hand and reactor responds. Questions came that keshe could stop the reactor #2, then he could stop the life of those who oppose the Foundation, this is not his job. Gans is level of levitating, so you can use Plasma at the point of energy without making it tangible. (:52). The George Washington University report they made Gans and then wire from it. We are reaching the time of maturity of the Man, transmutation. If agreement comes with Iranian government Jan 21, 2016 we show Spacecraft, if not show it in Beijing, if you all produce enough spaceships we'll force the governments. China already start to teach the child about Gans, for the generation coming teach from the beginning, start writing for children. (1:00). Teach the Children NOW so they don't have to be untaught latter. (1:08). They raised oil to $140 but it stopped the industry so dropped it back to $40, because they couldn't sell oil then they can't make millions in the refining. He predicts oil drop to $10 to 15 per barrel. They fooled you. (1:25). In Africa the wires are there but no electric, so one generator in a village to create the signal, you don't need the energy, but the impulse for Plasma to release its energy. In Italy they just need to keep frequency at 50 Hz. (1:31). Plasma DC Heating plates. (1:37). Ring magnets, the main force is in the center, like in U, in U you have more room to play, the ring magnet has field of hand, but U has field of the whole U. In

Solar Systems there is room for the fields to reduce and form planets, and our SS is on the fringes of U, this allows for reduction in fields and formation of planets. And on earth there is another reduction that leads to formation of man. We are a freak accident of the U, nothing planned, many human planets on the fringes. We all came from the same center. (1:50). What is tough is the state of mind. The seed started in Africa and spread out, we are all the same family. There is an end, a conversion point. We start only to speak about Plasma. (1:57). There is no change from North fields to South fields, its all same field it exits with a higher strength and looses it on the way to the entry point again. You all can develop flight systems using the same PU. If you go further and increase the plasma it will split off into another SF and from that you can build house, etc. The blood and bones are not matter but plasmatic fields. (2:07). Questions: What is best method and time to Nano coat? Once the Nano coat starts in the Caustic, the first layers start and it's ongoing until the whole copper is solid nano. Just using the vapors, Arman leaves it in for 3 months. 10 to 15% salt in water solution to make Gans. (2:18). If you use thicker plates (normal is 1 mm), use a LED light for thicker, also if concentration of salt is too high or low it won't work proper. The flooring of SS would be only fields, is it under the control of the pilot or does the individual, it's very hard to hijack a SS. (2:23). If you use the Plasma in the totality you can fly in your own cocoon of fields. In old times man was taught this and could go from one continent to another. But the knowledge was kept to a few, now open to all. Do we need to be at a certain spiritual development to build a SS? When you come to build one, you are already in that state, that's the beauty of it. As part of achieving this you have to come in balance with your environment also. When you go you realize you may not come back, so you need to assure the people around you that you are safe, the connections with people matter. "Thou shall not steal", when you are attached to souls around you, if you go you take something from them so you have to have agreement. This is a criterion of collective society of Earth. It's not about staying connected but respecting what they think is theirs, "love of the mother." It's a collective movement. Is an orphan better? "I don't think so". (2:30). Like when you go to Mecca, you should go in purity without any debts, etc. Renan shares experience with nano coating wires and coils, he uses an electric steamer to apply 3 to 4 layers, very effective good thick coats, let dry in air for 3 to 4 days, suggests adding a little potassium hydroxide. (2:35). How to create a FP without container? Learn how to "Cut" plasma, the P comes like a flowing water hose, you have to decide how to collect it and what rate, do you want a matter container or collect as a P, you can turn it inside out to become a container of another P, different layers of a Star, by different directions of P. Keshe won't show yet what's inside PU, the greed of the man is blinding him. (2:43). Don't yet have a way to tell the directional flow, it's always DC so no fluctuation. One way is to measure the field flow in two different points, BUT remember P flows from strength point of view, not direction, and not like water which can't go upward. Position is irrelevant in respect to totality of environment. You need a comparison point in respect to the flow of the P, the Grid provides that, the Beads are a different flow. If you don't collect the fields outward it goes up the Grid. How do you create flow in P? gradient. (2:48). Talks about the gradient flow in the body between the blood and lymph. The change in the color of the skin is due to the MG fields in one of 3 layers. Does the PU have all the parts? Later comes the water. You will experience different dimensions with these PU, they have no rotating parts and only feeds out what the man needs. Some of the health cups are made

of coils (Mike's method), but different from Keshe's health cup, some don't work because expectation doesn't match with intention. Consciousness is the Energy itself. (2:58). Why are you making a Gans when the biggest Gans is your brain, he draws reactor and brain, you already have a rotating P, all you need to do is concentrate it to release its energy, then what you are focusing on (creation), needs to detach itself from you, it works at highest level fields strength, you have already mastered it, it's how you function. Bring the 2 forces together in your body, then give containment. (3:05). Keshe says the brains MG field is stronger because it's the brain that dictates the emotion of the Heart. At the center of every cell is the Source of Life, but hasn't yet access, the Soul of the P, it has contact to all P in U, its always equal and balanced, you can cross U, it is level beyond the P. (3:13). Chinese reactors arrived, 3 sets of 3 stacked, will fill with Gans of CO2 (emotional) and CH3 (physical), and fill 12 bottles with water, by changing fields see if can create different materials in the bottles, changing colors, if drink water change emotions. (3:22). You get a mixture of fields of both M and G, need multiple measurement, any of the points you can create material. (3:25). Alex modifies his Pain Pen by dipping the tip in a Gans, CO2 to emphasize emotions, What if you coated the coils with Gans of aspirin, vitamin c or whatever, to emphasize that part. The only limits on this technology is your own understanding. (3:31). A second Ambassador Meeting in Manila, Philippines. The East Block collapse the first thing let go was the Army, and then EU cut their military.

82nd Knowledge Seekers Workshop Oct 8 2015

Talking now only from Plasma. Interaction of M and G fields, does P have continuity in strengths. All the Ambassadors in Italy are meeting in the North at same time. The PU has an overload light and switch, it's a solid state matter, you are looking wrong, the PU is not for electricity, these are Plasma Units and not generators, up to 2 kw resistive heaters you'll save 60%. (:11). The first PU is out and it has plug-in cords, takes up to 3 weeks to power up, American unit will be white because of fire resistant plastic, it fully test out. (:16). It will take the Governments 6 to 12 months to realize what's happening. They will leave PU out in the public to whoever finds them, not to relatives of KF or officials. Plasma unit contains the Essence of Creation, puts power back to the people. In 12 months no cables coming out, it will be like the sun. After 20 years of planning this is the best way to disseminate the technology. The workers in the factories must be paid the best wages, we are here to serve. (:34). We now have PU that supplies energy wirelessly, convert energy in your own body according to need, you don't need to digest it.

(:39). Last night saw signs of the rise of the "second Sun" on horizon of the earth, 2 to 30 years before this planet comes to demise, which is the twin sister of the earth, time to move the man off earth. Look in the east of the sky, a galaxial cloud not a star.

(:42). In the work of the Plasma we never see the P, but we see the signs, learn to trust our feelings. He draws a spiral, dependent on the senses, human body is made of Plasma fields, at the point of interaction you can feel. Did man always have eyes and ears? Extend the emotional part to detect, in space P is too fast, so have to develop feelings. "How do you know you partner loves you?", the fields of love are replicated back in hidden way, you trust your feeling, in the essence of being, it gives and takes, this is the real work of U and not man made, Plasmas don't collide, there's give and take. Every life

has to be respected, what happened to cell in toe? Self-centeredness made man blind. (:57). Continues with teaching of P. There is no where in U there's no P, void of G and M fields, and how the U rotates. The P man has full control over is emotions, love and trust are P, it's part of the structure of the P, man has to control the emotion to travel in space. (1:07). Cuts a tomato in half, it looks like the shape of U, the shape and curvature of the tomato reflects the fields inside from the seeds, we see the emotions of the seeds. (1:15). The pumpkin is similar, the shape reflects the internal field forces, the thickness of the outer layer like the surface of earth, inside there no screws, the MG fields creates rooms, this is like how the SS will be built, P of seeds gives the shape, if Pumpkins can do it why can't man. Understand how you love and try to give it, increase the emotion strength, then you receive it. (1:25). The skin is created by the interaction of 3 fields, it's a mirage of fields, understand a chameleon, it changes it emotion in respect to its, instantaneously change, emotion of danger changes the strength which changes color. (1:30). Alex comes on, doesn't need to eat much, if child sick stands near the reactor and gets healed. We don't need to create matter to enjoy the energy of the P. The heating of the body doesn't need to rely on heaters, body is energized continuously at 34 degrees, don't need reserves, do we need to store gold to be wealthy. (1:42). You have built the complicated body structure out of the wish to exist in this environment. You create it out of your Emotion. Try to release energy through your emotion, with P you're in charge of the connections. Biggest nightmare upon man, you have two choices, learn very quickly or become part of the P of U. The G of earth is stronger then the "sister planet" causing to pull it in. Icebergs on Saturn become missiles. (1:48). He draws it on board, if its head on you get the unification of the two. (1:52). Hold the PU in one hand, in the center is your emotion, wish and in the right hand the tomato appears. Develop enough trust in your self. Alex wanted to see if he could get drunk, but given to someone else it would be only water. "This is my body, this is my blood." Now you know why "we" came at this time. (2:01). Talks about the disaster on West Coast, and one of biggest earthquakes came. Now the Second Sun is colliding with earth. (2:09). Man talks about a light body to travel through dimensions. You create the tangibility of your SS for your prospective. (2:12). If Moses had got it right, no need for Christ, understand the prophet of God has tow souls, one belongs to the physicality. The problem was the physicality liked the Power of God, people followed the physicality. At the moment man has not learned, Keshe has seen what certain groups want to do to create mayhem. There is a huge light of the Second Sun on the horizon but scientists don't understand it, he sees it from the interaction of the SF, this is not the first time "he" has been through this. It's You who have to bring it about. The condition is that you have to be sincere to have the need. The time of mayhem has just hit. You won the jackpot let's see how you use it, now every man is a billionaire. The greedy man will be eaten from within. I have made you a slave to your own soul. All the souls have been touched, you are looking for CNN. (2:23). Lady has been able to heal from the P in her hands, depends on how much control you have over it. They don't understand how the Blue PU work? The work of the P is to find a comparison point of release, no where is matter connected to the Grid, the Grid is the point of comparison to release the energy of the P, then you have the totality to work with. (3:32). Put yourself in front of PU, use your emotion to create. You just walk around the PU and you feel full. The B12 converts the cell to specific organ cells according to need. (2:37). Goes over Alex Bead reactor, the plug to the Grid is fooling

you, it's only a point of comparison, and tries to bring balance to flows. You put your brother in office because you didn't want your own power. What England has planned for Iran to get their gold reserves, Syria is a picnics, we will not let it happen. It's already in the public, Alex's Bead's are his invention. What KF releases is Universal. When they open the PU they will be shocked. Try to be the load and not load bearer and you can have anything.

83rd Knowledge Seekers Workshop Oct 15 2015

Tomorrow is crucial Ambassadors Meeting huge change on the way, with every new change comes resistance. NATO and EU boycotting, but many religious leaders want to help their people. Should we disclose the place of meeting or open it and confront 3 or 4 terrorists? He receive collaboration from the Vatican, the Belgians planning assassination. (:07). Italian police are fully armed to protect ambassadors, will give only 30 PU tomorrow. Agreement now is October 26 1000 PU released. (:22). The new versions of PU will change weekly. When the PU goes above 3 kw it shuts down, cools down for 30 minutes, developing Plasma DC Heaters. It will take some days to Nano coat and then draw goes down. (:30). It will takes 6 weeks to Nano Coat the Grid, after more and more units come on, the power stations will be shut down, because you just need the oscillation signal to trigger the P to release its energy. (:43). Making the development as easy as possible. If you can't get it to work return it for refund. It's like when humanity went from candles to electric light. They'll become the food line, it will release energy as you need. (:48). Most of you have tested with CO2 but still need to eat because you need to release from the full spectrum, meat, fish, bread, every AA, then you don't need to eat. Won't need to cut trees, in wood you have COHN and other constituents, but you can convert their P M G fields, create wood for building. Some new changes with Mobile phone batteries. Yesterday, they did an experiment to energize the water with food. They didn't feel hungry last night. (:58). Food goes in stomach becomes a Gans, releases PMG fields in intestine, the energized water by-pass digestive tract. The world of energy absorption for space travel. When you receive what you need, no need for aggression. The Supermarkets destroy food instead of feeding the homeless, for price control. This system changes the whole structure. (1:08). The PU can interact with MG fields to travel, planet earth as one entity. (1:21). Will these new blue PU become the new God? (1:25). You can't teach the new P technology without the ethics. (1:28). All life on this planet have a common denominator, COHN, will the animals and plants also change the world and become peaceful. The lion will stop killing the deer, they will feel satisfied no need to kill. They key is not the blue box but the knowledge, 3 to 5 years to change world. (1:38). When Keshe sold with the East Block they used a barter system, it was a beautiful system and people helped each other, this new technology will do like this. This system also feeds your conscience and emotion, if you abuse it you will suffer it. (1:44). Keshe warns if anything happens to us, something very strange will happen to you, he and his wife have been threatened. You need to connect it to Grid so change is gradual. The man who losses his job will get a free unit. There can not be division this time for change to work. (1:50). NASA wants to make 22 months to Mars, but this system is easier. The schematics will not be released until ready, give governments time. He made it this way for reason, but doesn't even need the blue box. The water was a mix of many different foods and made a Gans of it and took the energy. He gave the energy of pork to

a Muslim. Plants are protein based living organisms. (2:00). He calls for prays for the governments and meeting tomorrow. To build a house you need different filters for different energy spectrums, build it without bricks, but same way make a SS. (2:16). The KF pays one standard rate across the world, the movement would be towards 3rd World, start work at 10 AM. The bankers now want to invest in KF. (2:25). Israel refused but Palestine will attend, Iraq. The Vatican will come, we want to put borders aside. (2:28). Presentation of a kind of Infinity loop, keshe says its only 2 dimensional nothing will happen, make it 3 dimensional, twisted wire creates problem, coils are better, it would feed the emotional, Nano coat base part with heat, and top section with caustic. Making of coils a problem for lot of people, need to develop better way. (2:37). Ask not to destroy PU to find out blueprint. Do you need even so big. As many stars in the sky, as many ways to make a Pain Pen. We don't know if Ambassadors will sign Peace Treaty. (2:44). Some nuclear agencies will attend. The last thousands of years financing to take from the people. (2:49). Tourism started in the 1960's because they had money, different groups rise as wealth changes, the new generation will be tourist in space, no one will come back. It will be a lack of population, control who goes. (2:56). How to set up the PU, connect to Grid after fuse box, or male plug into outlet and appliance into the female plug, if over load wait until cool down, even a day, the Nano will recoat the wire again, or if need can put some caustic on the wire and it will recoat. Once the house wire becomes coated then there is no need for PU. We are not creating power, we're creating Plasmatic MG field forces and don't depend on wire, to trigger the P to release.

84th Knowledge Seekers Workshop_3rd Ambassador Meeting China October 22 2015 (AUDIO is very low at end) Talks about the Ambassadors Meeting. Sohel masterminded deception with Omega Manufacturing Company in China, they dissolved KF as partner. Our aim is not to make money, but to share the knowledge to change peoples lives. The secret is that when enough of these units are in use around the globe we will be fed with energy. (:24). The Belgians started harassing people. Only 20 units got out to the world, they're made with special materials. Deforesence caused trouble with KF Logo, Keshe will file suit for 300k against him. (:32). There is no radioactive materials in it. (:36). If you don't have copper then you can use long roots of a palm tree, they're already Gans filled. (:42). Send a unit to your enemy. Once you create a demand the system needs to understand it, needs 3 weeks to develop understanding with PU. (:47). Develop one master unit, put PU next to it and it creates a link, then wirelessly connected. (:52). Don't use the shredded Cu wires from those old lamps, better solid copper. We need 500 million around the world in next 12 months. (1:20). Will be giving interviews to media. (1:33). Renan started to market in Philippines, trouble with international shipping. The earthquake forecast on West Coast has hit big on internet. We saw the earthquakes in the first weeks after the prediction. Saw movements in Panama (3 earthquakes) and Chile and in Mexico. You read the earthquakes from MG fields of the Lava Layers not from surface. In 12 months see the separation from north America, after you see many small earthquakes in Panama. (1:43). Pacific and Atlantic open up to each other, if we see rapid earthquakes in Western Europe then the separation complete. If you see earthquake in Spain and Portugal. It's not a prophecy it's science. Asked about second Sun coming. (1:55). Question: He had a rotting in the banana he dropped it in a bucket

of ashes, next morning it was sitting beside bucket, don't know. What happens during a power black out, probably also off, need power generator by P. (2:01). Talked about connecting to Grid, did some tests, the P jumped over to the building power and brought it down, need to develop Plasma signal, phase feedback. You need thick wires to carry higher amps. (2:10). P inside a P will be taught later, turn a P inside out. he draws P as a spiral, open the M and increase G pull back in, open and close it back in, this can only be done with M. A guy had Keshe came in a dream and said it's all Plasma, if you take from G then gain M. If you want rapid release of Energy increase M, to give to another only by the M. (2:18). lost audio, talked about how to make pain pen and wrapping the coils, (broken audio), if working with Cancer cell, are you giving or taking?, inner coil is G, which way wind left or right, do you keep the ends open?, Did you use Cu or Cu and main wire Al?, if genetic defect tip the Gans coat with Phosphorus. The Pain Pads can be Gans coated for any disease. The body only takes if it needs it. Sort out the emotion first before touching the physicality. Watch how shake hands, abused woman (sexual or emotional), shake with finger tips curled. Hand open thumb out, is a giver. Breast cancer almost always connected to calcium, which comes from the bone marrow into the breast for nourishing child. If Liver Cancer have to find out what kind and make pen like that, liver is for storage of physical part, take toilet paper, put pins in cover in Gans and wrap around liver. (2:26). In Chemo you want only to take the surplus energy out of it, arrange the belts accordingly. Back to pen, if need more G make the inner coil longer. A mass produced pen is only general conditions, customize pens for diseases. (2:31). if dealing with emotion tip pen with CO2, if energy CH3. This is an ART. Cholesterol has to do with physicality and Diabetes with emotional. COPPER is for red tissue muscle only, not around head. List for next workshop, Cu, Caustic, Gans, paper plate, 2 m heavy wire, receptacle, Phase meter, need to identify the hot wire. (2:39). Officials plugged in and blew up PU. It's because not yet Nano coated and crosses the Matter state and burns out, in a few days the Nano grows back. (2:48). Biggest problem thunderstorms, when Grid gets Nano coated, disconnect from Grid the power surge will be massive. Cars when Nano coated become part of the thunderstorm energy. the car unit 2 cables one to Engine and one to the Battery, what if you put a small piece of Nano material in fuel tank? Monday many people come to Foundation to make PU together. (2:54). What happens when PU hooked up to a generator, as long as 3 phase, and no heaters. Power tools work totally different, more power. Presentation again from last week, he made with suggestions of Keshe, fire-coated Nano flaking off, try caustic nano. He prayed over it, is there any need to initialize, the lift depends on his connection, let us know. Lift is not achieved because attitude wrong. (3:08). The wire in the center will not have a negative effect, it becomes part of the reactor. Discussion about the coil tightness, and configurations.

85th KS Workshop_KFSSI Blueprint Teaching Week AM Oct 29 2015
Blueprints for Power Unit (PU). (:15). Warning the ring coils need to be fully Nano coated and Gans dried, or your system will not operate, put coils for 2nd time in Gans. He goes over coil connections, Power on one end and load on other end, load stacker, P capacitors, (:22). How to make P Capacitor, fire resistant paper (baking paper), put the Gan paste C-Clockwise on the paper, securely wrap, position the wire, use 4 and connect all negative and all positive together as one, connector to power source. These capacitors

are key to converting AC to Plasma. If PU doesn't work the capacitors could be dried up. (:29). Setting up the capacitors to the Grid, how to connect to Grid, cut the live line, where to put the capacitors, where to connect the load, complicated. (:42). They are working on a generator. When making the capacitors Gans has to be totally dry, and tightly packed. On the load side you have to watch for positive and negative. (:45). Shows again how to connect to the Grid. The car unit one line to engine and one to battery. (:49). Question, putting Nano wires on Alternator, starter, and battery, to condition car, no comment, people are testing many things. In car batteries there are no capacitors, so no capacitors on car units. The water filter can produce 800 liters per day, still studying. (:56). Stacking double coils. the capacitor coils can have up 10 turns. The Philippines uses 160 and 80 turns on their stacker coils, using gauge 12 wires and circuit breakers, Pain pens showing, plasma capacitors and coils, using 30 turns on outer coils. (1:09). Have to gradually increase the power in the house. Every unit is tested before sending out. You can use any kind of Gans. (1:13). When they test Gans they see only CO3Ca, but on the Raman Spectroscopy IR, they see CO2, property's of superconductors. Use the same gauge wire for everything on same system, creating heat in Nano materials is difficult, you see the Cu inside molten, but Nano cold. The wire can't become totally Nano coated inside, because of the spacing the forces of Nano don't allow solid Nano coat. (1:33). People report that the Nano coat goes away, this is due to high moisture and salt concentrations in air, like sea side, the Nano went on to Gans. Nano means 10 to -9 meters, there is a method to make nano clothe, indestructible, you can make a skin of organ out of it. (1:43). Draws a stacker unit, Matter to P, P to P, P to pure P, physicality, emotion, and Soul. these systems are a full replication of human body, interacts with emotion which is a total P state, the control in the Soul. You can't do anything wrong with this technology it's non-dimensional. Your Soul goes backward to make the physicality, so when you interact with the system, your wish is its command. (1:49). If you connect the two ends of the reactor, you connect yourself back to yourself. Put PU at each ends of the house, what you have in the middle is connected. Put PU in center of city and people's PU around get connected. The whole city comes under P, becomes self-sufficient. This is a cascading of P. Nano coated wires collect MG fields from the Earth MG fields, then don't need Gans. In Spanish teaching, after 3 months they took the PU out of house and gave to relatives, their own house (Nano Coated) still supplying energy. (1:56). If you take Gans of foods and put them in vicinity of PU all the people get energy of that food. No one will go hungry. If in the next few months place 1 million PU around Italy the whole country will receive the Energy. The dogs and cats will stop eating each other. interrupted until (2:28). Talk rambling, about what if put PU in Vatican. (2:53). KF logo belongs now to humanity. (2:55). Scandal about Keshe falling in love with a woman, but already was disclosed. (3:02). The Belgians infiltrated the new building to sabotage internet. The American man are teaching over 500 people in various stages of Nano coated. This man is teaching on his own. Arman deliver 3 units to State Department. You have to make the capacitors yourself and that threw many people off. (3:09). Starts to teach again, how to make the Nano Capacitors, wrap wires around left hand turn, everything left hand turn, don't place capacitors too close to each other, if even one coil off will be problems, if you get a big bang when plug in could be Moisture, if it fails 99% chance the wire to the Grid has melted, if it comes back after some time it means weakness in Nano coating. Check if you exceeded 2000 watts resistive output, do

not over load for a few weeks. If you put 2 units at each end of house, have to wait until whole house Nano coated. (3:14). KF will take up 1000 scientists to develop this technology, who understand Plasma, and P without containment. Russian lady coming to do health research. (3:26). Making a transcription and catalog of Teachings. In apartments the whole building become Nano coated, and whole building electric goes down. The problem will sit with Nuclear Power stations, Nano coating all the way to nuclear fuel rods. We have gone backwards, just to show public, no more Nano coating in the Institute, it's a way to breakthrough the humanity. (3:33). Looking for animal psychologists to help them in transition, water purification systems, MG system to extract the pollution from a distance, that matches the MG fields of chemicals, a magnet to attract the chemical, new Plasma scientists. Build earthquake systems that are MG shock absorbers, the shocks are absorbed by fields in Nano Plates, Nepal Earthquake, magnetic plates that create a MG fields that turn back on themselves. (3:40). Health systems for diabetes, and diseases. They put a Nano plate in a pool and no algae growth. (3:49). Makes silver water, a controversy with WHO, Keshe doesn't know how it works, use in India in rivers. In Sierra Leone the WHO confiscated all of Keshe's materials and told them they can not collaborate with KF. Copper and Silver are used against microbes, they take all the energy, used also in operating room, oxidize on the surfaces so nothing can attach to it. Most advanced operating rooms only in Copper, you create a MG fields that nothing (AA) can attach to it, like Teflon, a Plasmatic Teflon. He will discuss the status of the Soul in respect to humanity in afternoon session.

86th Keshe Knowledge Seekers Workshop

Keshe Foundation must set a standard for the new Technology, do not touch the Nano materials, someone drank Gans and bleeding in urine. Gans is not ohms (?) do not drink. Gans is unknown to modern scientists. (:09). The Belgians are causing trouble again will allow KF Belgium manufacturing for Health and PU. Green Peace will take the complaint for KF against the government agents. (:19). Back to the Blueprint teachings, find out which one is phase in or negative, first connect it to a plug further point in house, put a small load on it, 4 -500 watts, and leave it for 5 days, it will slowly Nano coat the wires, they get ready to accept P, non-resistant light bulb will be free, do not use high power in the beginning. You are not stealing energy from anywhere, you are using the power of the P. The maximum of 2 kw of resistant appliances, every time you switch on and off you see the meter run, if you have two PU in house at front and back, you can get up to 5 / 7.5 kw. The second unit is half price. (:31). The governments have to decide how to handle the feed back into the Grid, which will be 4 times more. The second Unit encapsulates the house, called cascading. It was suggested to do it for Vatican, put PU around the outer and work way inward, the whole city gets power, it would take about 12 months. They will start with Palestine and Baghdad, can produce up to 1 Megawatt. Liberia requesting systems. Teaching will start in African countries. (:46). Marco will head the teaching for KF. Water purification and environmental cleanup will start next week. (:55). Presentation of a simple Reactor and power tools, he's got coils stacked, and ping pong all on top, he has to correct the outlet, the magnetic should be twisted around the wire. Let us know what data you get. (1:00). Keshe goes over a coil reactor and connection from Grid, 3 Nano coated coils are stacked and coated with Gans, G input

comes off the Grid wire, M comes at end of coils (output), this wire gets twisted around the output wire that connects to appliance. It doesn't matter if you put capacitors in between, this is not matter state but only P. So it goes in from the Grid in matter state to P, and comes back out matter state, AC current to appliance. In between the appliance and the Grid is only P. The more you use it, the more output, it's P release Energy. (1:05). Try a single stack with double coil G and double coil M and a capacitor on either side, and to a rechargeable battery on one side and a DC use on the other side, it's a P battery. This is for Africa. Working on a Gans battery. To make a P battery take a Nano coated Coil, wrap it with a Gans coated paper, and add Al wrapping, then wrap a full Nano coated coil around it, and turn the ends inward, cover in plastic and you got a P battery. The only difference with the capacitor is the Al foil wrapping, this is for Matter state conversion, can give you 1 to 3 volts, and put in series to power mobile phone. Might need a small capacitor, but it will recharge itself. (1:17). need people who understand Nano to work at factory, one man didn't understand and ruin thousands in Euros, maybe coils wrong way? Government is testing it in the background. KF has its own financing and doesn't has to go to banks. (1:22). Keshe wants to develop Africa with train that won't damage the forests and environment. Keshe goes over the P fields from earlier, you are only tapping into the outer edges of the P, try to develop inverter systems to get higher M to G or visa versa. (1:31). You create a cascade in the house. The central area between will work without any wire, wireless power supply. (1:39). Ask people to make P batteries, a battery is a capacitor. Nano coat Coils and Gans them. Add 2 more coils on to the capacitors and increase power. The P batteries can be fit into the existing battery shell. (1:47). Developing batteries that charge Laptop continuously. (2;01). how will the communication systems find the receiver.

87th Knowledge Seeker Workshop Nov 12 2015

The European and American certification has been accepted. Huge incentives from Italian governments. (:12). Goes over KF work worldwide on progress, and manufacturing. (:18). It's said Keshe will be richest man in world, more than Bill Gates, so be it, "it's all yours". The KF will hold 51% of Corporate shareholders and this way what happened in China won't happen again. The CD size will become marketable. (:24). You can't put plastic on the Nano coated plate or you change the condition and don't get CO2. There is dispute about Bulgarian KF, if they don't come up with registration or setup a new Foundation. (:29). There is a new batch of MG PU, new documentation and way of setting up. If you put a meter on both sides of PU it blocks the P and to point of melting down. You can not put a meter after, but appliances and calculate usage. The Japanese setup said the Grid meter after a while comes to, they think it ruins the meter, it's the 50 Hz sine wave that causes the P to release, if they take the PU out the meter works again (it took 2 weeks to Nano coat wiring system), Keshe says this is the purpose of the PU, Zero Energy use, it proves the Unit. So now Japanese going into full manufacture. (:36). Presentation of work KF Blueprint Website, photos of experiments, Coil winding method. (Working on water decontamination of the caustic by-product, it will separate the caustic and reuse it in next batch, most of residue is a Gans and could be used to coat the coils.) Shows the Nano coating process of Coils, hanging above the caustic. Anybody who produces new products, it can be put on the KF website. KF will

by-pass Paypal and use it's own payment system. (:54). Ali's reactor running drill, do not use tapes, glues on capacitor or system will burn up, you create a resistive condition. The KF will make available plates to put the coils on, capacitors and coils will be available. (1:04). Second Video of MG Unit (Keshe Magrav unit), he is wrapping the coils with drill, if drill goes anti- clockwise the coils come out clockwise, confusing because they call it anti-clockwise, (he says the Blueprint PDF is correct, don't use plastic around the coils. (1:08). when don't understand go back to natural conditions, when the MG fields of the sun and earth meet they start heating up, that's what heats the earth. The coils are like the sun and capacitor like the earth, creates heating, when you have a Gans coating on the clothe it penetrates and becomes part of it, then you don't get much resistance. If you made coils wrong way don't get rid of them later we teach how to use them for something else, heating coils. (1:15). Everything is made of different MG fields, no 2 stars are same. This is the beginning of new adventure. Save "mistakes" for future unknown knowledge. (1:19). The Gans should be as dry as possible, a paste is enough moist but not wet, otherwise you have a powder. Get rid of 2nd meter. (1:26). After a couple weeks check the wires to Grid to see if Nano coated, it means it works. You have crossed the Coulombs barrier of Cu. Suggestion to mix 2% olive oil with Gans so it doesn't dry up, have to try. Also try some sugar and some drips of caustic. The system can not fail. (1:33). "Turning on my DIY MaGrav" Video, one thing is the wires into the meter are too far apart for the MG fields to Nano coat, wait and see if the wires after the meter get coated. Explains when you put two meter on either side of P, the cascading traps the P field flow, like putting 2 states of matter, you create a new condition. (1:45). The man with MG experiment, only a minor difference in kw, because you are using very low voltage it takes longer for wires to Nano coat, find a 500 watt load. Russia is using the technology for Peace. (1:50). Latest document on how to connect and condition the MG Units. Looking for Plasma work force, people who understand the P and want to help humanity, not interested in making polished products but quality products. National securities have woken up to support the Foundation. Man reads the document. Phase meter included to find the Live Wire, match to Live on MG Unit. (2:07). Keshe likes document, IMPORTANT do not use old incandescent light bulbs in the beginning. This is how the expertise of people around the world helping. KF supports manufacturing around world, and will give financing. KF is a Spaceship Program and not Power. We need Flight, Medical, Food, Water units to travel in Space. Procedure for new car manufacture, that can hover, collaboration with KF. (2:14). Once your house is Nano coated you simply have to put the medical unit in room of sick person, Plasma fields are already there. One future president wants to bring KF to his nation. (2:28). Alex developing in Nigeria, India still biggest problem because of caste system, KF controlling 51% of Manufacturing. See KF as a process to help humanity, governments can't stop it, it's too big now. We tap into your Soul in your need to give, Alex good example, to teach Keshe's 2 sons the ethos. (2:37). Video about how to make Nano Coating, do not yet use braided Cu wires, because make a composite fields, fast forward to Nano coat with plants, caustic and Al foil, spray on coils and 24 hours black, then apply voltmeter to reduce potential. To Nano coat with Plasma attach wires before the PU more voltage and faster. (2:49). Teach about Nano coating with P, create a power box between PU and Grid, attach wires in box, the direction of the coil windings not effected like in other methods, specific way to do it, otherwise they become resistive, have to be part of the P.

The black spots on your ceiling is actually nano coating the ceiling, it's like smoking fish. The 3 reactors create SS, but you're living on one called Earth. (3:00). Wire stripper method video. The Chinese showing fat boy, talking about where to connect the coils, it should fly. More presentations, put the coils inside each other before Nano coating, some housewife's Nano coating, more women coming on board, change the household. (3:11). Video of Austrian MG system, temperature remains cold, the stereo system is both resistive and non-resistive. (3:20). Video of guy making capacitors, winding in direction of clockwise makes C-Clockwise coil, Gans coated paper wrap around nano wire, puts it inside another Nano coil. (3:34). His Gans are mixtures. he wants a higher gradient about Cu, titanium, or CuO2. One guy used Pb, but dangerous. Winding direction confusion,

(3:38). Right is tight, left is loose, so right would be going into planet and left causing lift. Rick says why did we settle of Right-hand threads, which are 99% of the threads, they spiral into the earth. Don't throw the C-Clockwise coils away because that's how we are going to create lift. (Space rockets start to turn C-Clockwise on lift off.) (3:42). Guys talking about creating light bulb with tiny coils, friction inside fields. Try putting light bulbs near a reactor. (3:53). A document on the screen about coil orientation. Rick starts to argue with the guy, he says before you mention the direction first you have to specify do you mean the rod that winds, or the wire. Arguments. (4:03). Keshe comes back, says the problem sits in your brain, even if you go in the wrong way, make all your coils that way. The spin of the P irrelevant, discussion is good but argument wastes energy, when you go with the flow of the P easy, opposite creates resistance, when you go in the right direction you maximize your output, you get it by experiencing it. (4:12). Keshe is summarizing things, 2 Nano wires together get nothing, put Gans between them you get a battery, if you don't know test and teach us. He tested the CO2 for years, no more spoon feeding, experiment or it gets to narrow, be kindergarteners and open up the knowledge, test it and bring back the knowledge, build on it. (4:19). Get Drill and rod, put wire on the rod and turn C-Clockwise.

88th Knowledge Seekers Workshop - November 19th, 2015
(:10). Some problems with capacitors but resolved. (:17). showing two PU that just came out of production. KF in Bulgaria was never registered. KF should never be setup to avoid pay taxes to government. (:33). Presentations from Brazil, Systems connected to appliances. (:41). K Magrav Stacker and capacitor housing, video. Standard capacitors work different then P C, plasma capacitors take longer to build up to function. Synergy Mobile phones are charge automatically without even wires. In coming months you don't need wires anymore in your house. (1:01). Heating in Plasma is so hot in melts things, have to show you how, it's not like a switch, special way or you will be heating all the time, this is also with the capacitors, but that's physical heat. In P heating you produce heat on the emotion of the man, the heating of the P of your body is actually built into the Units but we can't show you how yet, it has to be that you feel emotionally one with it and it keeps you warm. (1:07). Update on Michael Boom MG Unit, made new capacitors and changes suggested by Keshe, goes over connections very good video. (1:43). Alex comes on from Nigeria, lots of confusion, Health cup. (2:07). Africans speaking about health and energy. (2:17). Man asks about Nano coating, Keshe explains that Nano coating with us forever, ashes are nano so do not fear. The blackness in the pot

is Nano materials, when you burn the meat and put salt in it to soften it you've already created Gans materials. Nano materials are safe. Mothers milk is Gans. (2:29). Back to Italy, talks about working for KF and plans for Africa. (2:41). Questions: Al wire can used instead of Cu, animals intestine make best coil. It takes a week or two to take effect. It is better to twist the Nano over the Cu Grid wire. (2:47). Heat the Cu ends before Nano coating, (2:50). The American guy says he has Systems in the house and working, coulombs barriers extending 13 inches out, can Nano coat by attaching wires to existing system. (3:02). Up to 200 million people have had contact with KF over the Internet. (3:07). Somebody with powerful Unit when he puts his hand near it he can't see the hand, scared, Keshe on private email, he was expecting this. The only way we know we exist is that our MG field is slightly different then the environment. You can make the biggest SS invisible right in front of you. If you go higher you can see the Soul. He will show the man how to become invisible at will. (3:16). When you put load on P its like a dam. Transmutation of elements, he is willing to teach, you need high power units to achieve, emotions is the highest order. Hungarian businessman working in South Korean wants to work with KF. We are hear for people who are willing to serve. Contact KF through the webmaster. (3:30). The biggest problem is that if the big guys turn against you, you become the biggest terrorist. The setup of factories in Philippines and China, etc, is helping to convince people that KF is not a terrorist. It took Keshe 8 years to figure out who betrayed him. The guys was working with Mosif (Israeli security). How come he was invited to Boeing and then went flat, in Canada they threatened to kill him. (3:40). Some trouble in Bulgaria. He worked long time with international Intelligence Agencies, he respects their point of view, they are trying to serve their country, BUT, if they have no enemies they have no job. The old man who came to poison him last year. Prince of Malta came to Ambassador Meeting, one president told him, "we never know what is in your head", they trust me with their mistresses. Alex's birthday today, he calls them, wrong. Belgian man who stands solid against all threats, and abuse.

89th Knowledge Seekers Workshop November 26, 2015

Have started moving smoothly with governments for Peace and received blessing from Vatican, Pope has come up with similar Peace Plan. (:05). A document from 3 years ago in their call for Peace, the energy and car unit not important. The letter Nov, 11, 2012, was to USA and NASA, Obama accepted the USB stick. We have no hidden agenda, asked the Israeli PM to negotiate Peace, sending the same number of PU to both Israel and Palestine. He was told he would loss his life if announced. American Securities having doubt to have accepted the USB stick. (:18). The people in Germany and Austria who are threatening KF teachers, will release all information, they called Alex's children threatened to kill, their proxy servers were uncovered. You're voices and photos will be put on the Internet, they have 25 names. (:23). A simple use of technology in house, refrigerator and lights, some small glitches make some systems work and others not, video delayed. If not working listen to "Correction of Blueprint" workshop coming up. People have forgot to connect voltmeter to Nano coils when making to re-align the P of the layers. Set the meter to 200 mV, red is G and black is M, connect the black of Voltmeter to red G of coil, so the nano layers all flow in same direction, IMPORTANT, you have to do this right away. (:29). You get much better performance on gas heated

nano coating, huge difference, going away from Caustic. And the gap between inner and outer coils make a big difference, better that they touch, the two fields create an Infinity Loop and boost fields 30%. Keep to a ratio of 9, 180 turns equals 9 (take 0 away), now best 144 (which is 9) turns on outer coil, still keep inner core at 81 (which is 9) turns, this is Infinity Loop. Discovered this in the last 48 hours. Without Gans system doesn't work. (:40). Video of single double coil with Gans in middle, meter at a stand still, running refrigerator, fan and computer. The technology is 100% correct. If Unit not working check coils. (:49). Trick, even if N coated with Gans, you can still N coat with Gas torch, heat it up and dip in cold water, the old N coat splatters out. Will post a video for the new method, heat until Cu color shinning then dip in cold water, keep the black residue on the bottom. You still have to use the Voltmeter after heater, G coil purple and M coil black. We are mastering each method of N coating for each use. (:56). Back to Peace process. How the Belgians intercepted emails and forged. Keshe offers peace to Belgians, translated to french, share the Foundation profits among the people, any family that is involved in military not allowed, 40% of Belgians are military employed. Trying to unit the nation between the Flemish and French. We work to give back to their Colony, Congo. Every citizen in Belgian is now a shareholder, Police, Army, and Intelligence are not excluded. All names of shareholder are public. (1:12). This is quite an experiment. Bulgarian is next. We will pay Belgians 2,000 Euros/month to teach the Congo. We start the process of One Nation One World, where we started in Belgium. We start by getting the people off Military industry and into KF new technology. (1:28). Poisoned by the Red Circle. (1:39). Libyan president was killed brutally in a water pipe, will release the names of the Red Circle. These guys hack into Skype and find your weak point and attack you. (1:47). Back to teachings. (1:55). A new System that will be only Plasma, and will develop uses that stay in P and not convert to matter. The original PU is a Matter to P and back to Mater. The next step is WIRELESS POWER, it's like the Sun. (2:00). Eddy current when you put 4 times more back in the Grid. Cascading 2 PU's , you produce 3 kw that go back to the Grid, a P heater would solve it, AC heaters create problem. The thickness of the wire dictates the strength of the P. In future will go from N wires to boil water wirelessly and without appliance. Would this boil the water in your body, no it's a different field strength. The car units have been received in Belgium. People say they sit in the car to calm down. (2:15). The wires coming out of the new system can be different thickness and different MG Field strength. Bret presents, gold was produced from Gans of CO2 and Zn, he says gold forms as crystals in the earth, he had intention, made through emotion, it will be tested. In the space we don't carry a refinery. (2:26). Goes over how matter is created, plasma interaction, your intention to create, this sets the conditions, the P fulfills it. This is Space technology in its raw form. Carbon was the first gas (CO2), and Gold the first metal, we see it as "freedom and power", make gold in this way, but don't sell it or create mayhem, add it to the blueprint for humanity. (2:34). He was educated by Zoroastrians. Blueprint photos shown by Rick, Coils from Jeffery USA, rainbow color spectrums on the N coils, seen also on health pens. Nigerians working together winding coils. Surge of women getting involved. (2:47). Woman making coil from Blueprint file, how she connected stacker unit and capacitor. Lady showing her attempts to make coils. (2:56). Man with great introduction graphic of a box exploding into KF, using 3 stacker coils. Lot of people trying to set up KF USA, it needs to come under one KF, to unite. (3:03). Talks about making the coils,

golden ratio 1.7, make 144 and 81 coil windings, the closer you get the coils together you start getting G and M on top of each other, the emotion and the soul interact, the energy encircles itself, Infinity loop, the G has to always be tied back. All the creation is created out of the conditions of the balance to the fields, which depends on the interactions of the balance of the fields of the Solar System, Galaxy, and U, it goes both ways, the interactions. (3:10) Next system is to produce water, one of short-cuts is to use plastic containers (C - H), when you N coat you release the C and H fields, we don't extract water from the environment, instead we create MG field for H2O (18), this is how body absorbs water in daytime, then we make physical water, has to do with thoughts. The desire of the demand will create what you need, it's a link and an emotion. In body we carry Blood (emotion) and Lymph (physicality), it's the desire to grow a nail, the current difference creates the cell of a nail. Desire becomes the need. The daily need is about 10000 /day, you get 1600 calories from matter state, the other 80% comes from the environment. When the AA came in contact with Fe then hemoglobin formed. Goes over the interaction in the upper atmosphere, then mammals, fish in ocean. (3:25). Why 41%?, 'take 1 and give 4', we take only 20% from the Solid state, 80% from the environment, just like P reactor, put 1 watt in and get 4 watts back, to bring the balance. The P state is the gases and Matter state the earth, and the interaction of the two gives 37 Degree heat for the body. (3:30). Tells how American Government sent some idiots to evaluate KF. The first time we understand where the AA comes from, the atmosphere. Earth heading for disaster. How the gold was made, that man helped Bret who was so sick and that man stayed by him, so great emotion generated (heart of gold), then desire more pure to create gold, all the conditions came together. Your Emotion, what we call Lymph, and the desire of the recipient to become something. You can repeat this process anywhere in the U. your desire to have gold because you know what you can do with it, will manifest itself. Now we know the secret of the Creator to create. If your desire is to produce energy to abuse, you'll never produce energy. People who are doing the killing are getting sick of it, but don't know how to get out. (3:38). How to make a capacitor or battery. They developed a way to keep the pin in the capacitor from falling out.

90th Knowledge Seekers Workshop December 3, 2015

Some coils got over filled with Gans, problem called "tubing". (:07). You can use Fire method for N coating coils. (old system, don't rub Gans paste on the N coat because it rubs off), now we dip it in 70% distilled water, you can mix other Gans in there, but solution should be liquid, gently touch bottom of coils with paper towel to get off excess liquid, let dry 24 hours. You don't get tubing problem. Very important do not touch coils, destroys the N layer, nothing should touch the stackers. If you used Caustic to N coat, be sure to rinse thoroughly. (:13). The capacitor must be dry. Each method has a distinct purpose and you can't mix them. In Agriculture you have to use the electric method, you get totally different product. (:17). The direction you go with the fire is the way the fields flow, so on the stove (makes it same as caustic), doesn't work, use a torch and direct the flow and makes it more powerful, warning use only a full tank because when below 20% impurities in the gas attach to N coat. If you do it right, you can't scratch off N coat. If you over heat it goes black but destroys the N layers. If you see rainbow colors if failed and is not N coated, repeat it. It N coats at a specific temperature, need to be in

the Blue part of flame, for a Clockwise Coil go clockwise with the flame. For example, the center core is G and clockwise, outer is M C-Clockwise, do one side and flip it for the other side and remember its reversed so you go in the same direction. Repeat the process 3 times, when you start you should see a golden color, if it goes red, let it cool and redo. Careful because at this high heat the coil can easily melt, make the coil tight and uniform so it doesn't melt in weakened places. After running the P the inner coil become blue and outer amber reddish. (:30). Close the coils off and make finished before N coating, don't want to bend N wires, also let cool down for 2 hours. Make the liquid Gans, dab the drips and let dry 24 hours. When you paint the N coat with Gans thinking in Matter state, that's why they failed, actually they are held on by GM fields, it takes radiation of the fields on its own, in water you're allowing the N layers to take what they like from the solution. Where the N connects to the Cu wire, N layers get crushed, just touch them up with cold caustic, and they become homogenous. (:40). Most will say they see only 5% reduction in Grid, but this is what we want, until the whole house gets N coated. The next failure will be the Cu inside melting. The Nano layers don't heat up, do to resistance. (:46). Video time. Asking people who are paid by the KF not to post to own Facebook, but post through the KF website. (:49). Proper way to make N Coils, turn away from you (C-Clockwise). How to fire the coil, it should be continuously one color all around, or blockages to fields. Third video "Magrav Coils Gans Costing", using a dry CuO2 and CO2 Gans, adding distilled water. "How to make the Capacitors", Screwdriver rod 1/4", #14 Cu wire, 18 turns C-Clockwise, fold one end toward coil to avoid P leakage, Fire coils left to right, then voltmeter to check fields. (1:14). The Capacitors can have water in them, you can use without capacitors. Build a 4th tray stacker for later, can push it to 5 kw, it's the maximum the wires can handles. The N coated wires create a magnetic field containment. You have achieved much more then CERN. Like the Japanese high speed train. It's the best superconductor man has ever known. (1:29). Discussing the fields of the Solar System, interaction of Earth creates Nitrogen at Saturn, Helium. Translate to your power system, your sun is 3 trays, what you take out, is determined by the N layers of 3 coils, if you create MG field of Earth you get Nitrogen, and so on. Connect with a N coated tube, inside and out, it travels tube, if you want a matter state out of this P. Matter produced from P. (1:37). He will demonstrate the power in winter term to students, not public. Discusses the changes coming soon. He wants to quite teaching. Goes over the structure of KF and how it will commercialize. (2:11). The process is in your hands how it will spread, the governments are getting behind him now. (2:22). Questions, talking winding coils with a tube type wire. A NEW system, make 2 coils with hollow tubes, then stack 3 high with P in center of each, fully N coated inside and out, and Gans coated on top of N coat. You feed the P through tubes, then make Capacitor with certain number of turns and then G coil inside, then you create whatever matter you want. But this is not matter but only the MG field of the matter, it will have the smell and taste of "orange". It comes from your emotion, that depends what you create. (2:30). Now you understand, "I made man out of my own image", and Eve came out of man. You have access to the Full Knowledge. You have to make a condition of multilayer of N material, like your skin. (2:36). Man wants to N coat a root, what's in center of root, pulp which in Gans, well needs to be converted back, the vine already has a gradient because it is taking up trace minerals, if we N coat outer shell of vine, it already has a N coat. He trying to find a way to eliminate the Cu, this is alchemical, coiling increases the surface area and that doubles

the strength. (2:46). Keshe says he told same to Alex, don't rely on West, look to the jungles and roots. But you need to find a root that is stronger field then what you want and coat your root in its Gans. Make a Gans of the leaf of that root and cover the root in it, it matches the MG field and will interact with it. (2:48). There's a guy who looks at the vines why some go C-Clockwise or CW, when used CO2 Gans roots only went down very short, why, or has evolution been effected by a few drops of Gans, the DNA changes. You have created a huge MG field at the top, so roots don't have to go down to get the fields. In Africa they have huge holy trees, no one can touch, look at their roots. Their are olive trees thousand years old, why has it put the hard part inside and soft outside? (2:56). Talking about walnuts, hard outside and soft inside, something about fields. (2:58). The root sets up a MG field that it can absorb from the environment what it needs, the root is the same as the N coated Cu tubing, the inside is full of mineral Gans that dictates what it's going to be. Or what we do is put a little bowl of Gans in the middle. We depend on Cu because of Industrial revolution it became available to everyone, we don't want to loose all the trees. The fruits in Africa are full of energy, the color of the fruit tells if it full of energy and ripe. Dates are black like N materials they absorb all the materials. (3:04). Keshe did a lot of experiments with N materials in Iran making all kinds of things. Question about N coating vegetation, when you throw vegetables in a dry wok you have N C them, high heat in wok N C the vegetables. No use playing the electric cars saving energy, biggest fraud, spending more on electric power generation then on gas, but hidden. We don't want to be in this gimmick. (3:14). The Car Unit converts the P energy into mechanical motion (rotation, which is natural in U) , it's very easy, how come man doesn't see it. The rotation is created internally and not outside. The same way earth and sun moves, from inside to out, not with camshaft. The matter was created from the P, you control it by change of MG field in center. The tall trees and trees in desert are creating water from the MG fields in environment, not drawing it up, the heat is on the ground, the hotter it is the taller they grow,

91st Knowledge Seekers Workshop December 10 2015

Today we go beyond what Tesla understood but could not show, he understood M but not the G, Keshe considers him one of the only scientist who understand up to P, now we go beyond. (:03). A lot of people say their systems don't work, but he says they have started. Discuss Alex beads were set up with 2 meters, you all missed it. G is always stronger then M, if you don't take enough you have nothing to give. So you have put energy back in the Grid, but you are watching meter, and that is feeding back to Grid without harvesting anything. You have to condition system first or it will blow up. You're not measuring what is going back, depends on Phase. Compare your bill with last year, will be 30% lower. Put your load in middle between Unit and meter. Instead you put Meter to Unit to Load of 500 watts, so you can't see anything. (:14). So you put another load of 2000 watts between Unit and meter, the meter reads only 1500 watts, a 30% decrease. You can push it to 100% depending on if you have a 3 Phase Grid. If you cascade then up to 5 kw. (:19). KF is not here to give you these technologies but to take man into deep space. Stealing of the books is thieving, this is the habit, you can't understand, the money that was to come was to serve the humanity, this was a test, when you steal you lose the understanding, you create heavy and become more distant, you stay on Earth. (:24).

Takes 3 to 6 months to peak. This system works good for Africa where consumption is about 1600 watts, but in West the consumption is higher, put the load on the end. The German he matched Tesla, but in G. (:31). He shows a stacker unit on the table, this system saves 30% reduction. You need to add a coil to get full 2 kw reduction. There is an overload switch in the PU, to keep from melting wires. (:39). In Africa it's a service to humanity, Alex got malaria and used the system to heal in 3 days. (:43). He connected live wire to stacker with Gans, but it excited the P and the wires went to the appliances, not a direct live wire to appliances, not excited electrons. It comes from the P wirelessly. The wiring of the house is like your neural system. Keshe picks up the same coil used for power and is now feeding himself, he decides what he wants to take from it. He holds the stacker, the middle core gives to emotion, but you decide what you give and take, the top core adds to your soul. Do you need to buy food, by coating the Gans on the N layer you decide what you want. (:51). He holds a 3 stacker, the bottom feeds physicality, middle emotion, and top the Soul of U community, which is no hunger, war, etc. How to promote man to elevate the soul, stop all the wars. He brought the technology forward because the Paris attacks were set up to start a WW III, dead bodies brought in from Syria. (:56). Now you have the 3 N C coils, but have to connect the soul, put a Crystal in the center. Crystal is transparent and equal, it will balance the whole lot, the point on the top allow you to share, fill the center with CO2, it will elevate the Soul of Man, if you are not afraid to loose your life, all the channel of Peace will link up and cover the whole of humanity. They create the tools of war, we create the conditions for Peace, the purpose of KF. (1:01). A man came to assassinate Keshe today, live on the screen, but intelligence found it out, he had no birth certificate, but American passport, you all met hem and thought he was a very good man. This Power Unit is the carrot to get man moving. This is the only way to satisfy the greed of man. When you are ready to serve humanity, if you can touch the M and G you will not die. If you take too much you'll blow up, or give too much dwindle. This is the tester of your behavior, only take a man of Peace into space. (1:15). Assassin in clothes of a sheep. A message to Mosad don't try to assassinate, Peace. How to fill the Crystal, cut the bottom, drill hole, glue only the outer edge so it doesn't block the field flows. You cut diamond with copper disc. CO2 is the main connection of the man carries emotion. Any clean Crystal, but it is the intention. (1:22). The CO2 has to be from the inside. In elevating your own soul, you'll meet the Soul of the Christ. This is the first time man is given this opportunity. Test by holding the crystal if it shatters then you want to give unconditional, when Keshe holds crystal they shatter. (1:26). When 2 M fields with intention to give come near the force causes them to separate to allow all the fields to flow through. The P fields cover the whole planet so even the animals become peaceful. (1:30). Ali wants to show his work with crystal, Keshe says he is instigator of the release of the Knowledge, he is using another crystal instead of quartz, (salinite ?), to bring the higher consciousness down, inside the coils, quartz has a double helix which works with DNA, Ali showed a UFO in his work, he had a vision, contact with beings inside the earth, they have Plasma bodies and P bodies. (1:36). Someone touched the N Coil wires, first time touched took the full energy and then got less and less. Place one coil on the front of Cancer and another on the back, the inner C satisfies the emotion and the outer the physicality, and if you have a death wish you will die, otherwise the emotion gets elevated and within seconds the cancer gone. (1:40). There will not be any diseases in deep space because disease comes from the

amalgamation of energy in one point. Make a P battery and connect it to your N C and not electricity, use the P energy, it still does the same. Alex's beads are little batteries. You can hold the P Battery in one hand and touch the patient on the other and heal, like a health pen. Renan you're out of a job, he replies, "I make a new one sir," beautiful devotion. The Crystal has to be filled with Gans from within, not out side. You use dry Gans, or paste even better, but you've restricted the movement of the Gans. Any questions or have I managed to silence the greed of man. The enemies of the KF opened the PU and put on the Internet, now you've all seen it, take out the Gans in the center and put a crystal in the center and contribute to World Peace. (1:50). Caroline Keshe asks, if you make the N C big enough and put yourself in the center, can you be the Gans, 'that is the ultimate point of elevation', but you have to be strong to be able to handle not knowing what's going to happen to you, or you become clear enough to be transparent like a crystal, that it doesn't matter what happens, I elevate the soul of the others, that is the ultimate sacrifice, can there be flaws, the intention, 'would your Kidney stand on the center or the Liver', 'you have a blessed soul in this room'. The size of hole in crystal doesn't matter that much. (1:55). The flow of a Gans is continuous because it's always adjusting itself to the fields of its neighbors. (1:58). Cirrhosis of the Liver, the rings create the balance in respect to the environment. The cancer or any disease is always considered in respect to its environment. You are not targeting the Cancer, but bringing balance in respect to the structure, every cell has to find its balance. (2:02). Mrs. Keshe asks, can you place your intent in middle of the Coils without physically being in it? How do you do that, this was what The Christ did, but His intention stayed and gets carried out. The stronger you release the more comes out. 'That was my start, I've been working on it', Keshe, 'my God you've been working on it for 20 odd years'. If you understand you don't even need the coils or crystals, but at least its half way. If you become One, you are one with the Creator. Another question, but keshe says, someone connected a wire to nail, and foot in salt water and holding plate for 2 hours and created a lot of Gans CO2, what was the intention. (2:05). Alex tells about soaking feet in Epson slat and getting CO2 Gans, after a week it solidified in container, and using different herbs for malaria, using the juice and the ashes of it, like a Gans. They have the knowledge of herbs but enforcing the Western Medicine on them. Alex made a Gans of Malaria medicine, there is no dosage, your body takes what it needs. But if you lock it in then you need more. In this medicine you have to satisfy the emotion to get it to work. (2:21). Crystal video of an old lady N Coated wires in nature and found a crystal and put them together very powerful fields, Keshe says the Crystal is in the center of your brain, it's very minute and controls everything in your life, not matter. (2:28). Guy from Singapore, they see rotating shapes and hexagonal in the Gans, Keshe says, it means 3 different Gans. The hexagonal shape comes from interaction of Gans fields, 3 field layers of skin of man, the interaction leads to physicality. (2:32). It took a lot of work to get Alex back, they threatened to kill his daughter. Don't get intimidated, collectively we can overcome. Hexagonal at North pole of Saturn. Sun flares occur when the Hexagonal collapses and energy released. (2:37). Need lot of help to Archive the knowledge of Workshops. This N C coil gives you everything you need, you can even put a glass of water near the coils that's enough, in center is better it elevates the soul and physicality. Alex made a copy of the Cup of Life, adding Gans to the N C, it only has CO2 so it only touches the emotions, the Cu rings connect the physicality, it's dangerous as it is unbalanced, the biggest flaw is

the Cu interacts with the "red Tissues" and neural system. You can't use Cu for Red Tissue to bone. Need to put the Cu down at bottom. Emotional cups should not have any Cu. For emotional and sexual problem add Zn, as in oysters, stimulates sex, need to keep water in cup for 12 hours, and for 6 months. (2:53). When can't get pregnant it's not physicality, but insecurity prevents soul from developing, soul has to accept the conditions. The double walled cups filled with CO2 cups, don't use anyone else's cups, this is the answer to Parkinson, it's cause is emotional , and sexual dependence, related to partner, 'I don't love' or 'I am not loved enough', the behavior defeats itself. (2:58). Draws the Gans filled cup on board, flips upside down, two coils on top, this is the head, the body is conversion, storage, cleanup. Kidneys left or right, balance fields, one side exit one side entry, if K stones you need to reduce field, to take from the kidney, its all in the CONDITIONS, you change the environment change the illness. (3:06). Should ask the Uncle what does he want, does he want to live longer, breathe through the cup for lungs for the emotions, drink for the physicality. Use a straw to drink from bottom up, fields from bottom up. Blood carries emotion, Lymph the physicality. If the disease is based on the physical tissues Liver, Stomach, whatever, use CuO2. Why is Lymph clear, highly potential energy is clear. Any Cancers use K and Ca, without failure, Ca is bone, K has greater MG and changes the fields of cancer. The lymph carries the full spectrum of every element of the man, (3:13). If I am unhappy with my son, I don't want to create any more children, son, where do I create children form testicles, unconscious stopping flow to prostate. To solve the prostate, you go to the emotion that whatever is created is perfect even though it doesn't match my idea. Then there is no problem. Likewise, in women, don't like your daughter, the Ca and womb. Understand the source don't need operations. In Space you come across a 3rd arm coming out, because in that environment you need 3 arms. Study the totality. (3:18). Ceramics are part of this earth, if understood could eliminate disease on earth, how you fire it, etc. Ceramic around the coils. EXPLAINS why CO2 is emotional part, 2 rings, outer is atmosphere of earth where COHN are formed, the physical earth has no C or O, but Fe, Cu etc., CO2 is connected to the AA and the emotional part, it touches man, plant, animal, without the physical part. When COHN connects with Fe get Hemoglobin, Mg get Chlorophyll, in ocean get fish, etc. CO2 interacts with them all. Alex interacts with the energy transfer of CO2. NASA and Google announced creation of quantum computer and artificial intelligence, Darpa has a 200 billion budget of NASA black money, Google owned by Illuminati. Marco is building AI downstairs, you have to connect to it to get what you want. (3:24). Question, if the mind is the determining factor with communication with Plasma, I should spend half my time developing a clear mind? "you decide". The technologies are limited to my own mind. "I have been saying for a long time, every man takes from his own intelligence, it doesn't come from how much I understand, but how much I am prepared to share unconditionally". We have seen this with Alex how he progresses. When you are selfish then you get tired and exhausted and can't receive much. Start using the PU as we discussed today, connecting on the other side, what you give back in generosity, you'll start seeing "results". The coils and P were decoys to get you to understand the P and how U works. And how you can use these rings to create water and power. You can hold them and absorb energy, in normal physics you should get electrocuted. Beware of the enemies of humanity, they have been paid to disrupt the KF, one person disappeared in Austria, Alex was brave enough to come out, Keshe

removed from Wikipedia. Stay strong and use the Technology for understanding Peace. Or it will be forced on you from the strength of your emotion.

92nd Knowledge Seekers Workshop December 16 2015

He carries on through the Holidays, return January 18. The teachings will change to total Plasma and Spaceship. (:07). Goes over history of teachings and progress, Started with (Matter) Nano to Gas to Gans to Coils to Plasma, back to Matter. Plasma Crystals were introduced last week, they can go both to P and to Matter. Using the clarity of the Crystal you can boost the M or G, you increase the Matter towards the P or Matter. We are bringing the knowledge so all of you can achieve lift. (:13). The Crystals with CO2. Some have started to test exerting you will on the P, in Philippines he wished no typhoon and it came through. (:17). Crystals and their powers, man has never been taught so much knowledge in so compressed way, we have to or else it will be lost, like in past. We have now reached enough people on the planet to start the change. The process has been on the table for past 10 years. The development of Spaceship. (:23). Alex has converted P into Matter by producing oil, in large quantity. Lot complained about the harsh words he used last week, it was to stop things going on in background and not to insult. The Core reactor in the middle is the Crystal, the secret of life. (:28). remember 3 layers stackers, structure of skin, you achieve hexagonal structure which is Crystal. What you have been looking for, the crystal, you already had in condition of the core. Place your Coil, the true plasmatic crystal, in the center of the Star Formation, (one step missing). This sets up a base which to survive in space. A 4th core above, and a second stacker, then you create a field that allows to create SS. Tip, do not put your coils on rotation, that would separate the P, fill in cores with combination of CH3, CuO2 and CO2, you create gradient that allows rotation inside the coils, you don't need motors, you'll create a hexagonal field around all reactors, that creates the walls of your crystal, try to choose same material in cores slightly different weight, you need a gradient change to allow rotation of fields. (:45). You all used same Gans, but you should setup a gradient of flow, can create Coils of different materials, the stronger at the bottom then like a bullet. Coating all 3 stackers with CO2 Gans if peace is your wish. When the fields are strong enough you create a craft around coils without matter state. Alex by his intention, collected the oil of Orange off the coils, not created, converted from a orange on top. Transmutation of matter to another place. (:58). You enter the room and smell the orange. Lisa in the Chinese group brought a unit to the Leaders and demonstrated that everyone entering room felt happy, the accepted it. USA is not the world leaders, Chinese are bringing the technology further. People who come in contact with N and Gans, don't feel hungry. The PU you received gives you everything. Put 3 PU in basement of United Nations and one on roof, we'll see if their intention it peace. (1:08). Keshe introduces a second motion at the equator of P, the interaction of the two creates the motion of the P, this is why the sun, moon, earth, have rotation through the rapid interchange of fields, and why everything is spherical. It's why you have flat bottom and spherical dome. Come together and work collectively, instead of individually, this has to do with emotion and sharing with each other, One Nation one planet. You have everything on the table. (1:14). What if you use Stackers in SF, get the FP to open up. If you could produce a large number of them they will all link up and make earth a Peaceful place, The animals

will stop eating each other, no lack of energy, the promise of Christ comes true. (1:18). I Am The Messiah and I delivered my message, it's for you to do it, to find the path. (1:21). You can also use chicken wire to make coils, don't need only Cu, that means Fe then you are dependent on the physical entity of this planet. Dependent on the blood structure of this planet, Fe to AA through hemoglobin. If one of your cores has some Fe, you'll create meat. Why produce single cell plankton, but still life. Why animals on live off green plants and others only red cells. Is the mass production of sexuality part of problem of humanity, do we need to be individually orientated or collectively. (1:25). In this SS you are not dependent on electricity. For 70 years we have tried developing the technology but have failed to sustain life independently anywhere in U. He summarized the stage we are at, Nano coat, build the coils collectively around the planet, they will interact because of slight differences, no two reactors can be exactly same, like snowflake, this gradient will move the P changing the fields. In the SF 3 Gans on the base, and H above will cause strong movement upwards, have flight. (1:31). Every where you find tangibility, skin, bone, etc., you find 3 layers that interact, same with this SS. You have the field flow upward and the radial flow, people achieve levitation, but no one was working with radial flow. Non-tangible control of the P, through emotion and thought but control on the physical level. (1:34). Questions, the PU are made that you need to connect, but the Magravs you build yourself you don't need electric power. Goes over connection to PU, Grid to the last outlet in house where PU is plugged in, then connect to appliances, people have been putting meter before the PU and don't see anything. Keshe says all the appliances before the PU are being powered by the P but you don't see it. You have to read the Grid meter. There should be 33% reduction in Grid meter. Most Grids are on 3 phase, (A,B,C), each phase is taking 33%, the Power Company is actually getting 66% (B,C). The system is actually taking 100% reduction. (1:43). Talking about a control system for the P, you use 1 kw and give back 3 kw to Grid. For example, you use 20 watts, then you produce oil, use 30 watts and bread, etc. You use your back load to control what you produce. (the neutral system does this in the body to create different cells). Marco made a control system, is a variable load device, as you increase load different materials are produced. You can build it, a single tray with inner G coil, and outer M coil, and a dial that adjusts the fields. (1:49). He showed it last week, a 3 stacker and a single stack connected to it, that single stack becomes the controller. You can be the "controller". (1:54). The most powerful part of ring magnet is the empty hole in center, the state of free air, if you can create vacuum, it's most powerful, because it has no friction. You have created the same thing in your Coils. (1:57). Ali video, spread out the 3 coils more and expand out the outer coil, it's still on 1 dimensional, need a elevated coil to make 3 dimensional. Why are asking, sit with it use your intellect, connect with P. You can experiment with lighter wires. (2:05). How to connect the Stacker units with capacitor and a load. What's happening is the M field is going out and not circulating, he shows how to connect capacitor to conserve the fields by recirculation, this would lead to 30 to 50 times more power. Use Split Capacitors that feed back to itself. (2:22). P batteries have to be fed back to themselves with split capacitors or the go empty, that creates a potential difference that releases more Gans. They need a feed back to their center. Collect the Quartz Crystal dust when you cut them and add to your Gans, become more powerful. Gives you more powerful unified fields. You can hold both wires that are perfectly N Coated, but they must be perfect or you get

electrocuted. (2;28). The Crystal with 3 rings around, is so powerful create destruction. In P technology we use Nano Nano Nano watts. (2:32). Talks about Health application, P battery to one Coil in left hand and one coil in right hand, plus a feed back connect between the two coils, to bring balance. This is only way to eradicate disease in space, by changing the MG field environment of the cancer, this is for stronger fields because body can handle weaker fields. You don't die of the cancer but the loss of energy. So much knowledge has been given this morning, it would take man 100 years to understand. In time you will do it through your emotion, now use Cu wire. Learn how to control your emotion, if you need it in matter you can convert it to matter. (2:38). Questions, don't need to rotate the Gans. How do you measure P? They are working on a tool for measuring P. With your Crystal inside 3 stacker, fill center hole with 3 different Gans, hold the wires of 2 coils and check your emotions, se if Gans move inside crystal. Measure strength of anger if it allows taking too much. Check the rotation of the Gans, these are the tools you have to develop to measure P. Do we have to add AA which connects to the structure of man. Testing will take centuries. If you meet a being in space, test if he is a lower or higher order of being. (2:48). 2016 was in the Torah Bible as the opening of space to man, the Hebrews want to stop it, but they know that their term of power is over. You have everything to build a SS by Christmas. It is easy for him to teach enlightened people like Arman and Alex, it's the essence of the creation of the fields that makes the difference. From now on real space technology. (2:57). Alex comes on and explains how he got Orange oil by placing orange on top of PU, just Cu wires coiled 24 and 12 times. (3:05). Confirmation of existence of man is through his sexuality, male or female. Experimenting with cup that has Gans on CO2 and CH3, that is emotion and energy, when you drink the water you get sexually aroused. Some have gone further and added a Zn plate on top, Zn excites sexuality and the water supports it with energy, "love potion", please be careful. For Alzheimer's you take the Zn and add more CO2. You can start developing technologies with different Gans around the cup. (3:15). You drink the water, but there are also MG fields you connect through your emotion, no matter where you go keep connection, like mother to child. Extend the idea to your Stacker unit, like with pain pen don't share with other, the balanced fields are your own. A number of PU will be dropped in Palestine, they're not for people, they have the intention of Peace. The war in this part of planet will come to balance according to the Plasma. They will also link up with your reactors. Mike Nasser is working for Peace. Build a system with the emotion of Peace and give to soldiers. (3:23). Questions, is there danger when lightening strikes the Grid, no, lightening is not in P state, it doesn't have much energy in comparison to P. The lightening comes from the earth not the sky. (3:29). Nano coating will hardly be visible, but steel fuses will Nano coat. Plasma coating of different strengths, the P will flow here. The P is too strong to be contained by the matter state. Super conductivity of N unknown to man. Travel according speed of P. (3:36). Instant communication. The size of the Soul from the Vedas, not far off, the emotional part of man, in crystal in center of brain. That tiny point is it, remember stacker units has same structure of man. That tiny crystal is created by the field forces of the brain. The 3 sections of the brain interact like the 3 stackers and create physicality, that's where you find your emotion. Learn how to interact with it. N C O deviation leads to motion. Doesn't need to be big because it absorbs lot of energy from the heart.

93rd Knowledge Seekers Workshop Dec 24 2015

We have come a long way in establishing the New Science. Another brick in the wall. (:04). Goes over basics of P, draws a spiral, you have a balancing of M and G forces, Mass occurs when the G is +1 or greater than M. In the beginning we used a dome shaped core, and separated the fields inside dome into an inner core (Caroline Core) and outer core. The material state is irrelevant, it's the field interaction that count. (:09). In the sun there are no inner cores, the boundary is made by interaction of the field strength. Same with the earth, it's the MG fields in respect to each other that make the boundaries. In Galaxies we don't see wall separating, what we were taught is meaningless. The Inner Core (G) and Outer Core (M), so are we in the G field or M of our Solar System? We made these early reactors to see field interactions. (:18). What if PU were the inner core, and say a house formed as the outer core? Going over the ping pong reactors, the SF, the Coils see return on power supply. Up to here we always contained the P. Create a field force that contains the P within itself. Last week introduced the radial rotation of P, this is the Gravitational, and the N South flow is the Magnetic. (:23). The equator line is always the most heated area of any P, because this is the point where the fields most interact. The assumption that it is because of the closeness of sun and earth. When working with P you can't ignore this area. (:27). Look at Coils and sun, is there a way to create boundary-less P that you can have control over? He shows a dual N Gans coated coil, by turning the G coil 90 degrees sideways, it becomes a copy of the sun, then you have P control. The Cu inside becomes irrelevant, it can be of any material. It's the fields which you control the Free Plasma. (:35). The SF you created the FP but with this formation you control the FP. This is the way U makes FP. Is the center of every P hollow, non-physical, non-matter. You saw this when you rotated the ball reactors. This can lead to flight control. He draws a SF with the new formation coils, they each have a hollow FP in center and form their own P fields. Now you can change the MG field of each reactor giving you full control (how??). You need no rotation or physical structure, each reactor in fixed position, so it's the fields that interact. Different field strengths are created for what you need to create. In Chemistry they call it a chemical bond. (:41). If you connect all the reactors to a box then you can decide which reactors change for your needs. If you put them in the right place you can lift, and you can allow other materials to lift without putting them into the structure. (:47). All the reactors have the very power void in center, the higher G fields in middle and lower M fields in outer, and rotation of P. IT ALL CHANGES with these new coil formations, understand equatorial heating and you can make P Heaters, or high MG communication lines. (:55). Questions. the structures of H or He are 3 stackers. Alex's Beads are strong enough to start a PU. Bret is trying different metal wires, plastic coils, N coated plastic pipes you get H, huge energy. (1:04). We never die, we just change the state. N Coat plastic with Caustic, there are different kinds of plastic, he determined that the neck of Coke bottles contain lot of H. (1:16). This way of teaching coming to an end, we discuss to inspire. Douglas achieved lift of an object, he works with Renan on innovations. (1:24). Video, he made a mixture of yeast, sugars, and Nano Plate and Zn, Keshe says he's producing ZnO2 and Ca (40). He dropped a piece of metal that become magnetic. (1:39). The difference between ZnO2 Gans is slightly white, the orange color is CH3. ZnO2 (60 + 16+16 =92), Ca2

(40+40=80), conversion of Zn to Ca. Oysters absorb Zn and convert it to Ca, that's how they make the white shell, that is how he got white cube in Gans container, this how bones created. When you put CuO2 and Zn plates and connect, you get ZnO2, if you put an LED light between the plates (it doesn't have to light up), you get CO2. (1:46). The new CO2 kits contain an LED light to produce CO2, whenever you see solid pieces at bottom you produce Ca just like oyster. Zn connected to emotional part and creates bone structure. Ali shows his SF made from stackers, sees fields that shimmers, Keshe says, you have created the first lift system (done by Iranian), structure of UFO. Adjust the field flow and you'll see a SS. Try to power it through P batteries or Capacitors. Used the dust of Quartz Crystal in the Gans. This is the FIRST spaceship, but need to strengthen the center Core, fix the plates so they don't move, glue it to a board so you can move it. Can use different metal Nano Coils to create a gradient. His whole body "buzzing" and feeling very good, add in parallel 4 P batteries. (2:03). Keshe advices how to improve, stackers not touch, have a feedback, make sure wires don't touch the floor, it will go invisible and you'll see a shimmer. (2:06). If your system disappears you need 4 Capacitors in parallel, and 8 in series and it will drain it to become visible. Ali saw the shimmer as explained. (2:09). Tells Alex what to do to get that shimmer. He connects Plasma wire to body of wash machine, lots of power. (2:19). Back to Ali, you should see a bubble in the center, and a flash of light, then you'll see your SS. (2:27). Place an a transparent platform and you'll see a light. Keep it off the ground, leave two radio near FM and AM, if radio goes silent move out of the room, SS will manifest. (2:35). Presentation, he built his own version of PU, actually he's having to pay the power Company for feeding them electricity as it's a 2 phase system and feeding back. (2:46). Information about hackers they get through Skype. (2:54). The pain Pad has full medical certification as a medical device in its own right. KF Germany has been registered legally, those who tried to stop it, sorry. Manufacturing will be in 67 countries by February. SSI has become a separate organization for Space Ship Institute with the Blue space logo. Announce a city for a base for SSI launches, like Cape Canaveral. (3:09). A nice comment about Keshe's leadership, and mention of Vimana's in Vedas. Keshe is pulling out of most of the teachings, he will head the Space Program. Italian Government has given a state of the art TV station for teaching, and a KF Bank, all money run through this bank and even credit cards. New medical systems coming, now that the first two have been accepted. Regeneration of cells instead of operation. Thanking Vince and his wife, Rick and all who sacrificed so much for the Foundation.

94th Knowledge Seekers Workshop Dec 31 2015

The enemies of KF are losing and the Governments are recognizing that this change is coming. (:05). Tests were done in the last week, need to balance more and in the next weeks will reveal. Keshe will no longer build only teach. Use the matter (Cu) to create the P but only to hold the shape. (:08). Focus this year on Plasma uses, the shape it takes dictated by user, you can make shape of Galaxy and dictate it's shape and environment. The Cu is a tool to dictate the shape of P, very few races in Space have achieved this. Now you can control the P, which is the Mother of the Universe, the seed of the essence of the creation. In the industry they paint something on the wires that is Nano. (:21).

People said that the fields in the house were same as outside, bluish, little reactor in room has expanded beyond, now if we setup million around globe they will all link up, Peace on the planet. People see the blue color in and around the house with reactor, it's the color of Earth atmosphere. (:31). Death is not the end, more pleasure on the other side of physicality, there is no end, the whole point is to live in peace without suffering, our body is made of P. Man one day will finish with the body as we know, 7 billion on planet, have to open to new dimension. Don't look for survival with KF technology, but comfort of not suffering. (Keshe took break). (:41). Put the G Coil at 90 degrees to M, should achieve Illusive P, when you look from the top all 3 in line, when you put in SF will give you the bottom of SS. (:57). Back on to drawing, 3 reactors you get the flat bottom and stack 2 reactors higher you get the dome shape. They achieved to see the illusive blue P, the shimmer of the blue. The M has radiated out blue, but its the inner G coils need to adjust, in a very specific way, and you'll see a physical craft. You'll find yourself inside the craft, if you don't feel confidence move a reactor sideways. You need a minimum of 5 sets of Coils. (1:04). Goes over again how to connect the coils together, M of top to M of bottom. Any P you achieve is totally harmless to your body, because you have created the P out of the Matter state of this planet, which your body is also. Any fields released is what you are naturally used to and breathing in. (1:08). The damage comes from electron vibration, matter state, if you use P batteries won't have that problem, if gamma rays are produced your body will only take what it needs. Draws a split P capacitor, if you use Al foil as wrapping, Nano coat it, you can leave paper in, it's already in Gans state of ?, it will work totally in P state. It is both capacitor and battery. (1:16). You put 4 of these Capacitors in parallel, then put 3 of these units in series, through these you control the strength of P current. (1:20). In the Gans that you wrap around the capacitor you can make a composite, of vegetables or what ever you need, these are connected to the P reactors and this is how you feed yourself in Space. The structure of food will last for centuries. Now we have reached the pinnacle of science, the knowledge of U. During the testing stage we will lose some people, like all technologies. (1:34). Questions: Why do you need H Gans? In the structure you have, you already have it, CONH and CH3 release a H, that's why H is the essence of the creation in the Space, you need it. You have it in the Gans of water. It doesn't matter how thick the Gans layer is in the Capacitor, it will take what it needs. (1:40). A man says he never used a screw driver and he made such a crude power system, but he gets 80%, whereas the PU only get 33%. Coming is a box that will power things, the split capacitor will power whatever. Make systems that are 30 cm off the surface so the fields have free access. Everything has to be Nano coated, leave it in a steam for 30 minutes to coat any scratches and not deal with Matter state. (1:46). Man shows his units, this is very wrong, first all frame has to N C, there's a mish mash of connections, all systems are connected to each other, not good. Separate out the M from the G so they don't touch, don't connect the G together, leave a gap of half the diameter of the coils, leave a bigger space at the bottom for P Batteries. (1:57). Marcel from Germany, Keshe needs to speak with him urgently. He built his own MaGrav unit and it works. He gets 30% savings. He put his load between the Grid and the PU. (2:09). Can he connect to e-bike needs 27 volts, Keshe says to make a split coil, a twisted wire as center wire, will be more powerful, make a 3 system center, feed it back on itself. hook 4 together to get about 6 to 8 volts. Shows his coils with a center core of PVC of CH3 Gans, keshe says to use Al or steel pipe, N C it , and fill with Gans. Use thinner wire

because need to make more coils to get more amps. (2:21). Teaches Cross batteries, take 4 split coils and connect to one center, get strong power and stable, the second half coil will feed into same base. You need this kind of power supply for electric bikes. (2:31). A top international company is now going to evaluate KF technology and develop worldwide. Talks about Banks and Army how they are opening to KF. (2:37). Austrian making a SS, and asking about "Damanhur", kind of New Age group, built underground caves to make temples, it was illegal to live underground, and they changed the law. (2:42). Waiting for a doctor to come in and open the medical teaching. (2:47). There is only one place you can manipulate the body, in the brain ???. open heart surgery to open blockage in heart. There is a new way but it has to be taken up by doctors. You can do repairs with Plasma without surgery. Shows a clear plastic body, shows the Health Pen, and a double Coil. Placing Coil behind diseased area, (inner G coil is emotion and outer M is physicality), use 1 to 3 H Pens pointing on the other side. Holding for some minutes, removing and repeating the process, the heart valves will rebuild themselves. The same can be done with cancer, by pointing the H Pen you change the emotion and physicality of the cancer. The pen directs the fields and the coils cover the totality of the environment. (2:53). The coils compares the totality of the area and the pen converts the totality. The strength of the pen dictates the depths where it operates. If there is NO Problem then no need for change, It's totally safe. You can make a broader set of coils and use 2 coils, one in front and 1 in back, instead of Pen. Do not use random Gans, you have to use CH3 or CO2, or CuO2. For emotional caused cancer need a coil at back of head exactly at ear level, shape of ear similar to coils, two eyes focused in the center. Cancer should not take more couple minutes. Understand cancer means higher energy in relation to the rest of the body, in cancer you have the AA, COHN add Ca to it, so now it has a heavier MG fields, so it absorbs stronger fields, it starts pulling more and more fields to itself, and tumor grows. Placing the coils cause the tumor to absorb back into its own environment. When it releases its energy it no longer can maintain its physical entity. (2:58). If you structure the H Pens in right way you can eradicate any disease on this planet. It can disinfect waters. Originally the Coils were connected to Electricity, now we can use P batteries, this way you work in the totality of the spectrums of the P, from High Power to the Matter state. The germs (matter state) can't exist in this H Power, best disinfectant you can find if you use P Batteries. In 2016, change the whole course. The cancer receives so much energy that it comes into balance with itself. In the SS the environment would be balanced by the P. Most of diseases comes from interaction with environment. (3:01). What form will we travel in P or Body? You create a given condition and that will not change, it encompasses the emotion and physicality of the man. Space doesn't have a uniform fields, when you travel in different environments it will change the craft, but the craft is not stuck with environment of Al, say, it can adapt, by changing the field strengths in the reactors, so you would increase your field strength above that of the area you are traveling through. Because your body is made of Gans you move into the same level, as you are part of the structure of craft. Some days ago when the house turned to blue light, the people were also changed. The pins and teeth fillings when they enter the body, they have become part of the Gans of the body. (3:07). You can not hold your own pen to heal yourself, because you are part of the same field that was unbalanced, need someone else. Don't be fooled by the cover, the pen is still taking in fields from environment. How you tilt the pen is affecting, can use multiple pens on

same point, wood or plastic outer casing doesn't matter that much, the fields emanate in broad way not just tip, you work with the totality of the different field strengths. ** Note: the cancer can change in minutes, BUT if the cancer is there to confirm the existence of what the person has been into, the cancer will come back within hours. You have to solve the emotional problem. The Coils are great for burns, start to change the cell structure. Good for injuries to animals. It doesn't mean that if you pray to it, it is going to work, your intention is plasmatic. (3:15). The man who said his hand disappeared when close to reactor (last workshop), it isn't that the hand disappeared, the man who made the coil with the Gans he put on it, he created a MG fields in this core, in strength and in given position, from setup, is equal to AA of the skin of the man, and being in balance, there's no interaction, so no visibility. So the AA were in residue from touching the coils, that's why invisible. They will make known soon. If you take the AA fat on top of CO2 boxes, use that as part of Gans when making coils. You are still under G. In Space you rest in non-tangibility. Skin is nothing but a mirage of the 3 layers. What happens if you create an environment and you see beings that you haven't seen before? it's like seeing a new friend. (3:25). If capacitor is still wet can get some ohm resistance readings, we see only voltage and current. Next year will be totally different. If the systems begin to fly, just kick one of the reactors out of position and P SS will collapse, change position. If you find yourself encapsulated in P, only way out is to change environment, reduce environment by withdrawing G field line, means reactors at base making floor line. By moving the reactors around you start to see the SS solidifying. Earthquake by Rick in Canada and 5 hours before in CA 4.4. The Cancer energy goes to the P Battery and needs to go somewhere else. Happy New in languages around the world.

95th Knowledge Seekers Workshop January 7th

(:04). There is a 9 stacker unit. An artist is running her studio on MaGrav power. (:12). Independent report on how Governments are funding people to discredit scientists. (:16). The Golden Age of Gans, on Facebook. (:19). "Proof of Government Paid Trolls and F E Debunkers" video. (:24). How to make CO2 Gans. The tests showing Zn in it. (:28). Keshe draws CO2 Kit, on one side the N C Cu plate and Zn plate connected via LED light for current flow. You have created a P field between N and Zn plates, on the Zn plate you'll release Zn O2, whereas in the water of the P field you'll release CO2 Gans, you'll get a combination of both ZnO2 and CO2 Gans. If you just connect wires you'll get 95% ZnO2 Gans, with a load of LED (green or red color) or fan 85% CO2 Gans. (:36). Using Sea water, you have all elements of planet, when you add caustic you change the structure, it has mostly CONH, you produce Gans of water and H, it will have lots of Gans's which will be white, you can use this for P Batteries, P food because everything in Sea is in it. Zn (60) behaves as a stronger C(12). Gans of water is transparent, Lymph is Gans of water, but different. (:43). The water inside body is a depository of energy spectrums, like the Sea water, you take what you need by way of Paratorid and other glands. Continue last weeks discussion on Health and double Coils, by changing the inclination of the inner Coil (G), with a similar coil on other side of body, you change the environment in the body of the man. You can also change the outer

(M) coil orientation, that changes the MG field. (:52). 9 stacker can make another 9 stacker and put the body in between, treat cancer. Don't connect all the stackers together, leave it open so you can connect different ones if you want. (:57). Arman shows new work, a way to slide N wires into coils as a connector. (1:02). Doesn't matter what the coils are made of Cu, Al, Fe. What matters is the P created in the center coil. The new P Batteries N C wire (that is Gans coated also) in center, coiled, and wrapped in N C Al, connected to double coil, it totally P based, feeding P to P does not go through Matter state. You are directly dictating with P B what will come out of P. The P in Coil reacts with P in body of man. By using a second coil that is weaker, on the other side, the gradient causes it to flow through body and balance out fields. THE HIGHER PLASMA FEEDS THE LOWER!!! (1:08). Arman shows his setup with 2 coils on each side. (1:18). Man showing his work, he's off the Grid, he's made P Batteries to power his Coils. He has made a flight setup, he sees the SS, he's the 5th person to achieve SS. Showing Ali system with the new coils. He sees lots of shimmers in room, certain times more. Passing through the wall, creates a vortex, very power, the crystals connect with the mind. He used Sea water for Gans. When he walks in room, he sees a mist, sees lights between stackers, his friends see the same thing. Some parts of body disappears. Ali is now part of the KF SSI unit. Back to the Swiss man, connect all the base G together, turn the center core 90 degrees, raise unit another 10 cm higher. Keshe offers to bring him in KF team. (1:37). His unit has created a shield that interferes with the microphone. He put Orange on top of cup with Gans, water tastes like orange and full energy. Connected Alex Beads to central reactor. Keshe is bringing all the people at this level to a SS City to work together on SS. (1:44). The head and parts of body disappeared because of MG fields. (1:47). Back to Swiss, he says he can control the energy, up or down, feels a barrier when he comes close to unit. Keshe says he should move one of the Coils at base and see if part of SS becomes a physical structure. He feels totally different inside, a new world of light, peace beauty. When he goes outside, sees a huge ship. (1:51). Last Monday, Ali and friends made study of the boundary of the unit. As soon as he turned the inner coil 90 degrees, the whole house started glowing and misty, he brought more people in and filmed it, outside the house there was a glowing blue light. It can cover the whole Northern Hemisphere. When he used the crystal on top of reactor could see the P 3 km away, ethereally he was traveling above the Earth. (2:04). Man shows work, he wants to use the end wire of coil and run back through the center of coil and make it as a battery, rather then hanging the batteries down in another place, go ahead and let us know. (2:12). That wire that is fed back through the coil, it strengthens the field forces, very important. You need 2 coils on top of each other to create P. (2:16). Keshe says to make a split battery by one half in inner and one half in second coil. Use the wire that goes through the coil to wrap a battery Gans around it, it could add lot of power to it. (2:21). Nice picture of the Coils, but he's got a small coil inside each coil. (2:28). Photos of outside his building and you can see his orb above his apartment. Video of his hand disappearing. (2:38). That glow above the house, these can link up around the world and start the peace process. Cascade the planet with a few system around the world, with right intention, peace. You made the coils for energy, now turn the inner coil 90 degrees for reversal of illness. You don't need more power, you can tap into energy wirelessly. (2:45). Alex house is completely N C after 6 months, now everything works without Grid. Free Plasma energy. (3:00). Talk after video. (3:04). Draws the connection of MG

units to house. After 6 months, connect a load between the MG unit and Grid , than connect to a battery (or an AC converter) this will convert to AC for whole house. It becomes self-sufficient. A wire to ground has to be connected before the battery, See diagram he's writing. In time you can disconnect from the Grid, just needs time. (3:09). Man says he disconnected from Power line but after 30 minutes it went off. Keshe says he needs to put some P Batteries or inverters, in the system. Convert the P into AC by attaching to Ground. (3:13). A man made some innovations to coils. Keshe says not recommended, you need to have some separation. (3:18). Coming is a P B without N C. Will show how to tap into the center P without N, and even P without Cu coils. Next development is transport matter over P. Take your double coil and place next to cup of water, adjusting fields try to create Cu or Al in water, then try to transport it somewhere else. You'll see your cup emptying and that one filling. You have done this with the orange in water, now solidify it. (3:25). cPVC pipes (chlorine) when in caustic produce a toxic substance, dangerous. PVC is okay, put in for 5 to 10 minutes, or rub it on pipe. Gans.org will concentrate on Gans. So many new people from across the world.

96th Knowledge Seekers Workshop January 14th

(:04). Have come into work totally with P. (:14). Shows a cube with red (M) and blue (G) rings, floating around. You can increase the G field, which is the Mass, going from Cu, to Zn, or whatever. Or reduce the M field which reduces the Mass. The "Mutation Box", creating different elements by changing the MG fields. This is how the Paraterid Glands work, the glands work by making the MG fields not of the elements, but of the Plasma of the element, which becomes the fingerprint for use at a point where the nerve is creating the condition. So for example, in the bone, it needs the MG field of Ca, but you don't take any milk, you have plenty of Phosphorus, the Parataerid glands (which is responsible for the conversion of elements), make a copy of the Ca from the Ph, that is stored in the Liver, and that information is transferred to where it is needed via the nerves, it doesn't make it and send it, it makes it at the point of need from the MG information. Everyday a half a billion cells are produced (:20). This is why all the glands are connected to the brain. Using the Blood as emotional part and Lymph as matter state part, with the neural system which comes in comparison with this, there is a current which is needed to replicate that cell. He draws the P Gland and a bone where Ca is needed, the gland sends the current needed to replicate that cell. Gives example of Eskimo that doesn't eat vegetation, how the glands transmute the cells via P and MG fields. The energy packets consist of CNO, NA, Fe, and other Elements, the glands looks at which energy packet or combination of packets, is easier to convert to the needed element. (:25). Back to the "Mutation Box", it works like this, changing the MG fields to transmute the elements. Whatever you produce is always in P state. You can use similar for transportation of mass. If the box comes into balance you won't see it. So beings from different planets would see the element in different states of matter depending on their field strengths. The AA strengths, building blocks, determines the field strength of what you can detect. (:31). Zero time transportation, you can MG fields on either side of element to be attracted or repelled. Whatever is inside the box stays in the state of matter in which it was put in there. Doesn't matter what happens outside the

box, if you put a monkey inside it stays a monkey. It's like an envelop you open at destination. You can use this box to see the boundary of your craft. A spherical shape creates a huge resistance. (:36). He made an elongated with 3 boxes, behaves like an array (Book 2), this array travels without friction. The MG field in the coils adjusts the speed of travel. (:42). Do experiments with this, use smaller gauge Cu wires. You can send this packet to the planet and test the environment, when traveling in space. DHL will be very interested. We are talking about dreams that are coming true. Huge applications in space, we can only live in human body in only this environment on Earth. Like Tupperware boxes, keep materials fresh until time of use. (:50). We have to start logging where people are working so we can keep track, if they disappear, etc. If you even rotate these coils, you don't want to know what will occur. He draws a cup with Gans around it and orange on top. Say someone needs a bone marrow transplant, you can use same method to transfer or repair to healthy cells without operation. Death through destruction of AA in man is history. You transfer it with the "elongated box". Inherited gene defect can be repaired this way. New system to bring back coma patient. (:56). Do the transmutation materials come out of the body when we urinate, Yes. In space how do you go to toilet? Astronauts put it in a bag and threw it in space. The digestive system as we use it the cause of 90% of the deaths. Or gradually change over to P food, remember that 80% of daily energy comes from environment and goes out again. (1:04). A number of user are posting their electric bills and how much saving. (1:09). One guy down $100. Red Circle in Belgium paid to create fear in people from switching over. You see it working all over the world. (1:18). Someone withdrew from American election system, is the person who signed Keshe's capture in Canada? The Keshe F testimonials added to webpage. A man with Diabetes for 45 years, used pen and decrease in meds. Somebody wants to go public for something, they're not saying. Keshe Community Network was started by someone, testimonial (1:25), they should be brought under the banner of KF. Bret is working on KF Iran. Rick reads a diabetes testimonial with Health Pen, 45 years with disease, improved from 50% to 85%. Keshe developed a new technology for cancer, man with recurring Pancreas cancer got immediate relief. Systems for Alzheimer's and Parkinson's, 75 people in Philippines with 90% success. (1:32). Healing Pen testimonial, help with flu pain, Mother at 85 years shoulder pain, it disappeared. Will release system blueprint for treatment of Cancer, how to setup system and apply it, throughout the body. Announce, "Blueprint for Cancer", in first week in February. First hospital going to open. Reversal of Cancer, 5 to $10,000, so money can go for poor and programs. (1:42). Please do not split off into splinter groups, keep under one roof. We have seen the reversal of Ebola but governments stopped the use. Renan of Philippines comes on, using N C tubes they can change the pH of water from lower to higher, acidity increases chance of cancer, alkalinity less chance. (1:49). Man just back from the Group in Germany is setup, teachings are spreading and dedicated to sharing knowledge. Moving to brand new factory in Italy. (1:54). Renan shows his fire N C cups, converts acidic water to alkaline. Doing an experiment with different water and measuring pH with millivolts. (2:03). Will start a research group for every aspect of Gans. (2:08). Ali update, finished making batteries, they are all on the bottom of Unit. He's switching over to all P Batteries. See lot of lights, white sparkles in air as soon as attached P B, when he drives home at 200 meters he sees the same effect surrounding the Apartment building, which means the field has expanded a lot. Like walking into liquid

lights, other people also see it. Make it flexible so you can move the coils. (2:25).Puts his hand near the Reactors and looks weird, distorted. Tomorrow his friends will come to test while someone films, and will move to open on weekend. (2:31). Arman's 3-D printer making a stacker. Arman's spring connectors, you can't open them up and turn them 90 degrees, leave them as they are or they loose a lot of field flow. Nano Coat after connections made. (2:38). A new Logo with colored coils, but now SSI will separate as a separate entity and logo. (2:42). More constellations for logos. (2:45). Guys from Georgia Russia, made some Coils, Keshe says to make the rings in same direction. Mix crystal dust to make P Batteries strong, make the Gans of Al it has better storage capacity, showed a very nice drawing of SS. Need to find an open space to make homogenous fields. (2:52). Ukrainian share about P Batteries, and he has a reactor, when he sleeps near it he gets many insights. Nano C Al in the batteries. He checks the voltage on batteries. use a little thicker Al foil and Nano Coat with torch, but quickly so don't melt. (3:08). Soon a new way to make P B, new type of capacitor, won't need coils. Try to make the coil perfectly round. (3:11). German wants to build a Health Pen, wants to wrap a double coil around another double coil. Keshe says that's even more powerful, why so much power? Keshe advises him not to play with it. Superimposing is strong enough. Not advisable to use Gans on the Pen. He made a Lead Gans. (3:17). He has a new way to do the Pens, remind him. The main topic of today was Transmutation and Transportation Units. Thank certain World Leaders for their support. Question about using flat "pancake" coils, no they have no G part to them, have to have both M and G.

97th Knowledge Seekers Workshop January 21th

(:04). Some results in Ghana in cleaning up Rivers, shows photos. The waters became clean after treatment. Keshe wants to invest in Africa to 1 Billion this year, same in South America and India. KF ethos is to serve and not be served. Coming to be ready to come out on the international scene, right now in background. (:17). Testimonial from P Pad, woman got back her cycle after menopause. (:19). Keshe this is the cycle of Peace that comes in through the existence, 'the situation is peaceful, I can carry on reproducing', explains about evolution terminating the reproductive cycle. he says 100 years ago menopause came at age 25, now with modern development and stable living condition menopause coming at 55. The new technology offers peace so it's safe to continue reproducing. New Technology to be released that will heal all diseases. We just give you the framework, we have tested it, you have to make it work. Rick reads testimonial with old Mother how she got better. (:29). Instead of Black budgets and secret programs, we are using a blue budget and changing society. GlobalPlasma.net is a website sharing the technology, with PDF of how to make the Nano plasma technology, with tutorials. The Pens are safe, they're made of Cu which doesn't hold any infectious information. We have received certification that the systems are safe. (:46). 2016 is the year for Peace, by the people world over. When the leaders buy weapons, 5 to 10% goes in his private account. (:51). Ali gives update about SS, took it outdoors. His friend saw lots light, plus since her contact with Plasma shoulder pain gone, near sightedness improve, inside her stomach something holds the energy, she felt the P connect to the trees, top parts of trees disappeared, the P connected to the Water element, it has changed her life. Ali shows a

video on the Unit. (:58). Video Plasma UFO, 2015 December, shot in Russia. Keshe prefers not to show. If you create a strong enough fields you will see it. (1:01). Keshe draws MaGrav system connections, from Grid to MG Unit then to Load side, on the negative side of the load connect the new batteries, then connect to the 5 stacker Unit. This kind of connection covers the conversion of electrical energy to the P, and what you put into your 5 stacker is high P energy, you can create high fields if setup right. Ali's Unit outside, he should try this connection. Outside he can connect a car battery to the MG unit and New Batteries then to 5 Stacker. Feed the Stack with this until builds up in energy, take off the top stacker. Keshe asked his to put food in the P B Gans, (1:05). Go on the International Teaching on website, how to make the new P Batteries. Used stranded wire in the center, don't take the plastic jacket off, N C with it on, then N C the plastic jacket, then tissue paper with Gans, then Al foil, then wrap 2 coils around, Alex added another one to 3 to make a Capacitor on one end and battery on other end. Alex's beads had a problem, after 10 days the energy withered away, the plastic jacket releases H as in the Universe, all plastics have a CH bond. To create the pulse needed to release the P, connect the capacitor side to Earth and other back to MaGrav unit, it becomes a GENERATOR. (1:13). This is called an "A Unit", put 4 A's in parallel, and 4 B units in series, then connect one of the new Capacitors (C2) to one of the B units. Now it becomes a Generator, connect one end of B to Grid and other end to MaGrav Unit, you'll get 100% reduction in electricity consumption. Some more explanations. (1:19). The enemies say the MaGrav systems will explode and create mayhem, Keshe shows that only Coils are inside, how can they explode. Keshe has been poisoned, car blown up, attempted shooting on the highway, and now doing internet attacks. (1:23). Video of Austrian wearing safety glasses as he plugs in MG Unit first time. Keshe says to rotate the outer M coil 90 degrees and the power of unit will increase, if you use straps N C them. A leading hotel in world is installing MaGrav units, to save 50 to 80%. (1:28). Shows drawing of MG Unit hook-up and why you won't see meter change because on the wrong side of Load. Now on the other side of the MG like a dish washer, connect it to Ground. Vivik from Singapore, shows wires got N C, very clear point where the N C stops, Why? (1:35). Keshe says in time the whole lot will be N C, but it needs to be covered with plastic and it will get coated. Nano Coating means absorbing all the energy, then don't need the MG unit. Twisting won't stop it. Closed down the Nuclear Power Stations. The nuclear Physicist said to him that they only use the Nuclear to create steam. They don't understand, in time the whole power station will be N C. (1:41). He has given warning to Swiss and France (85%) to close Nuclear Power stations, because as Italy is using the MG system it will bleed over into those countries. In Belgium there are millions of cracks in the nuclear power stations, big problem. The N C travels where the path is easiest and never by force. After the house gets N C, then the power stations pull the N C towards them, G is always stronger. Renan comes on, they will announce the medical blueprint next week, (1:49). Show the Cancer treatment, Blueprint Teaching, same system can be used to feed. The body takes what it needs so you won't go to toilet very often, maybe once in 5 days, no residues. Making the body ready for deep space. In space so much radiation is constantly passing through the body, but it takes what it needs. How to reverse every disease known to man, to treat viruses easily. Offer help to Saudi Arabia for help with camel virus. You can put units in water and treat it. (1:57). Ali only spent $130 for his SS. (2:04). We will interfere on the next Presidential election based on

Peace plan for the world. (2:08). Make Health Pen and give to US Soldiers heal diseases even from Vietnam. The Vatican supporting the Spring Uprising in Middle East. Bret disclosed what happened to him in Kazakhstan, he came across Nuclear materials used in Iraq, he also came into contact with chemical weapons used in Iraq by Saddam. As he was dying the only thing that saved him was CO2 water, they saved his life with help of famous doctor in M East. Put the hand of Peace to American soldiers who created so many wars. (2:13). Questions. If it's your intention it can help stop smoking, drug addiction, depleted uranium sickness, change paralysis and stroke. How to make Morphine Gans to help Cancer patients, listen on Tuesday. Never use CO2 Gans, do not consume it. A man kicked out of KF is getting people to drink 'ulmus' (??). (2:21). Use gloves when handling N materials because the salt on your skin can change the N into Gans and get absorbed. Gans is a high energy packet, it's too much for your body. Conversion of Gans into the Matter state is another process. (2:28). Indian lady comes on give testimonial on Pain Pads, instant relief, works like magic, couldn't walk, many kids in orphanage paralyses below waist. Keshe asks this lady to contact him, he will teach her specifically how to get those kids walking. One man in India was making pens and delivering them through DHL, they took the N wire out and delivered an empty pen. Paypal also was interfering, close your accounts with Paypal, working with bankers. Keshe wants to finance and help India. The children need special seats, in 2 to 3 months the children will be walking.

98th Knowledge Seekers Workshop January 28th

Since the Health Blueprint session big change taking place. (:05). Keshe will get back into development. KF will start to form a one world government, but not with big organizations, but through the people. (:16). For the change to continue have to remain correct on the way. A way to the Universal Community will soon be approached. We share through strength and not weakness, the human race has to come together or there will be no human race. We have introduced plasmatic systems that can change the structure of man. DUBAI has been selected as SS City and Peace City, and the head center of the One World Government. The leader of Dubai is open to all nationality, the wealth of the nation is in the hand of the nation, and has every international connection for the world government, which will be selected through all KF in the world, it will be forced on world through the technology. Will select based on language, so not American but English speaking people. In this way we get away from the national borders. The profits from KF manufacturing will be spread around world. No more Borders. In space we will say, 'I am English speaking from Earth'. (:23). Talks about the Changes toward One World Government. The first SS flight will happen in Dubai. (:29). Disaster coming to America, KF will be providing support. The course has already started, by the whole world coming together and develop this technology. Contact with the Universal Community is under way, and they are in contact with people who believe as KF Ethos believe. In the last 10 days the contact was made and it's positive, more SS will be seen in coming weeks, they will show themselves, it's prearranged, it is time of delivery. We have shown that collectively we are sharing the technology. The SF all make signal, from animal to peace. (:35). When you see with your own eyes you will understand that

change has come, we are not here to threaten. The Cancer testing opens after Tuesday Blueprint presentation. Do Not Stop Sharing Knowledge. On February 21 - 23, give Pens and Pads to soldiers, and sign the Peace Plan. When give gift let them know it comes from KF. (:41). The pains and diseases still here but now a way to handle them. The Coils and Pens are sending a signal to Universal Community, a beacon of Peace. (:47). Today's teaching is how to achieve Peace, we have finished with inequality on this planet. We will see the visualization and communication, we will also see the hoax, but with it the real thing. If you can control your system with your thoughts, then you can control your own body. What you want from the system you achieve, share. (:55). Ali updates, added 3 more coils on the bottom, trying to consciously connect with P, he lost a lot of fears he had before, he got detachment. Guidance coming in, 'Star of David' formation, 144 different dimensions we can travel in. We are one race, we are connected. Extend peace to all brothers, don't need to go to 3rd WW for Messiah to come back, in your heart. His friends got healed just by being in P fields, and family relations. (1:03). The brothers want to show a new formation, similar to Star of David, with 3 coils in middle. Shows a drawing of flows of 3 triangles. (1:11). Keshe says one of triangles point up, draws it out, where the 2 Triangles touch is Free Plasma, it's same as Star Formation, Emotion and Physicality are there, it's complete structure, this is able to build the Human Race. The Gans are right combination, you have the 3 flows, put strongest P B in center, CH3 Gans outside, CuO2 in Center, in a way your M is stronger then your G. Keshe corrects understanding, fields go from stronger to weaker, but they have habit to take what they need. If you put the stronger fields outside, it shields the inner ones from coming out. (1:19). Put a light in the background, and do you start seeing flashes or more lights, it means your making an atmosphere. The Japanese TV program, the rise of 3 suns, they got 2 reflections of the sun in atmosphere, it shows the boundary of the magnetic sphere of the earth, this gives the boundary of P field. (1:23). In night sky you see 3 stars in line, the center is real (and brighter) the others reflections, this shows the boundary of out Galaxy, explains how, there can also be multiple reflections. So it is with MaGrav System, the boundary will reflect multiple lights. In SF the capacitors are creating this also, you'll get a kind of lopsided boundary. In a normal room where there is normal moisture you'll see the reflection. (1:27). Shows photo of 3 suns in Russia, I have seen this with the 'rainbow' edges, boundary of the earths atmosphere, it happens only 2 or 3 times a year. (1:31). Australia started making KS Workshops, 13 people from all over. Bret organizes KF. (1:43). In Georgia it was on TV but nothing happening. Planning to have all the KF people around the world come to Dubai in May or June, for 2 or 3 months and build a SS. Ali from Cypress wasn't able to deliver, a big mistake. (1:47). Ali shows a new Coil design. Expand Knowledge, Ali put a small straight coil in center, to extract energy. Make it a double coil and take both M and G fields. use a Gans coil. By moving the M and G Coils you dictate the direction and flow of center coil. Create a coil with a rotating Gans core, very powerful. (1:54). The first SS the visited Earth used this older type, more egg shape. (The SF is saucer shape and better technology). This older type is very powerful but doesn't have good shielding which lead to a lot of losses in space. To make it fill ping pong ball with a lot of Gans (mixture of Gans), and vacuum, then use the double coils 90 degrees to each other, you will see the egg structure. (2:05). Ali talks about chakra system as Plasmas. Keshe says to stop, he's forcing the teaching. You got a SF and a core reactor above, you can mix, or a human

body in the middle, your brain which is made of Gans, has become the 4th reactor, through it you can control your chakras. You don't need to build the 3 pyramids (Egypt). One of ways to bring control in flight, the Captain sits in center of SF, his brain becomes part of the structure, his awareness and emotions dictates the fields and motion, instantaneous wireless control of flight. We will teach as we come to it. (2:10). In very old systems they used to make systems to control by emotions, that you communicate with, you place it like the brain of man in the center of the structure, though it you control the physical structure of the craft, speeds, it's size of pinhead you put in the center. Keshe made one, very small but control the craft. (2:12). You can use 4 people to form a SF and SS, (silence ...) "I hope you understand what you are talking about". 'Maybe somebody will'. Thanks, you're welcome!!!!! Human brain is one of the best sources of Gans, most of the passengers in space travel in 4. (2:16). Questions: The SF looks like someone in Lotus position? Keshe says no relation, Rick says knees and brains different. Jackie from Switzerland, update his reactors, attached it to the earth. He just realized that all the MaGrav's connect together, so his formation is 30 km, because all the MG connect together and control the M and G fields, to go up need to give more, to stay on earth take more. Therefore he formed a company to make lots of MaGrav systems. When you make the connection you realize life is beautiful, we have the tools to make a big shift in humanity. You ask and you receive, when you start to give to others, life changes, I am the P of humanity, to connect. (2:22). Keshe asks about the car, it's like the car becomes different , plasmatic, flowing with something, 50% drop in fuel consumption. There is a company in Paris, (Peugeot research), Jackie is to drop his car there so they can study it. He used the same MaGrav as in the house, 3 stacker, one cable to the positive and in the Ground of car. A mix of Gans and 15 mls of the water of CO2 Gans in the tank, and one trick he made up, a little bottle with Gans and coil he puts in the cigarette lighter, he can change the energy of the car with different Gans he puts in the bottle. (2:31). Also test with Volkswagen. He goes over again what he did to car. In his little bottle he put different Gans of what you want, to interact with MaGrav in the car, so you get plasmatic interaction. When he tries to wash car, nothing sticks to it, maybe N Coated. Keshe comes on, even the rust disappears on the car. (2:38). The car is more powerful, constant flow of power, strange reaction on the road, need to learn. In Philippines, Ranans 8 years car is on MaGrav, like new car, there is water dripping from exhaust pipe, haven't tested yet, very powerful car, over 6 months 25% reduction in fuel. Renan thinks his setup better, with MG in back and cables to the Ground distributes the Plasma better. Do not put CO2 in tank, only the water of CO2. (2:44). Keshe releases information, first most of your car gets N C, you create a MaGrav structure, it reacts against Earth MG fields inertia, not G fields. The point of friction with tires changes, the car is not hovering, it interacts with MG of Earth. The more you drive the more you N C your car, you'll shift farther off the ground, but not enough to detach, no friction. When there's a scratch it "heals", not dents but anything with the paint or steel, it repairs itself. (2:49). Fuel reduction due to less friction. Inside N C car is like in SS, you become part of the structure, the atmosphere. You'll find sitting in your car aches and pains go away. The structure of earth has a G and M plus Inertia, which is the MG field of solid matter, Earth is composite Plasma, why you fly. (2:58). Man uses car in deep snow it tends not to get stuck, we intend to keep gong in a straight line and don't get stuck. It's like an interactive system. (3:02). Vivek asks what is the correct connect of MG Unit for electric cars, lot of

these have AC/DC inverters in them, P is DC, then doesn't work. Have to connect beyond the inverter, the have 7 cars at KF who can explain it, connect it to DC side of inverter. Mario from Germany, burnt himself and used the pain pen, 15 sec pain gone. (3:08). Keshe will draw how to treat burns. Coil on opposite side of BURN, a CO2 Patch over the burn, another coil on top of patch, connect two coils, and connect to PB, and the other coil back to plastic patch as feed-back. The field flow will cause the skin to grow back quickly, the 3 MG fields setup to re-establish the field flow. Pain happens not because of burn, but because the field flow is blocked. The blisters go away in a day or two, if done correctly. The flow gets diluted into the flow of the P, you don't feel pain. You also get rapid growth of repair cells, 3 to 5 months done in 5 days. Pain is like getting electric shocks. research on amputations, 3 months instead of 2 years. Keshe had 10 broken ribs, he used Pain Pads and Cup, following Monday went home. Headaches are different, PP is for muscle tissue, for headache use CO2 pads, brain doesn't have red tissue. (3:18). Bangladeshi living in LA, has 6 double coils in 22 gauge wire. You have to feed from the G of top coil to the M of the Base, from the M of base to the G of 6 coil Stacker, if you want the separate top coil then M to G of base, Thinner wires in a way, less surface area but don't get stuck on Matter state. (3:27). Vivek working with amputation, built coil its about .5 inches wide, shows it, have to coat with CuO2 and CO2 Gans, and if want CH3. Keshe teaches, the long ends from the coils wrap around amputated finger. The Gans film should not touch the skin, the process should be rapid, the amputation is already a week old, might be too late, put a small plastic film around the coil so doesn't touch, you should see everything growing out. The gap between can't be more then 2 -3 mm, otherwise information doesn't go through. (3:32). Miguel from Mexico City, thanks Keshe, some underground dark forces in Mexico convinced the Spanish group to stop working with KF, by saying they were doing dark magic. Give you the chance to re-establish the Spanish Group. (3:36). Shows a device, a circular tube filled with different things including Gans, difficult to understand. (3:43). He made solid CO2 Gans in cube crystals structure, left Gans in container for 2 days, Rick says they are Salt crystals. (3:49). Shows photos, good improvements in health. (3:53). Keshe offers him support for teaching in Spanish. (3:57). Made a zero time transportation cube, wants to make a SS. Asks Renan to make a Blueprint of Miguel tube, Mayan name means "sum 12". KF has a security back ground check, and monitor security. Have Chinese, Spanish, and need French speaking teachers. This way nobody has to move but can stay at home. (4:10). Indian lady comes on, back from the orphanage. Keshe says we have to take case by case to help them, have to help with paralyses very painful to start moving again. (4:17) Photos of the paralyses orphans, Keshe says its brain damage from positions of babies in photos. The paralysis is die to lack of development of the brain structure. Need doctors to diagnose thoroughly what is the cause, and can monitor the progress and understand the technology. (4:26). Keshe asks him not to use that language and stay to the ethos of the KF, even if they are threatening you. (4:28). He's prepared Blueprints for simpler MaGrav Units, 3-D rendering, how to make MaGrav from seashells, Gans and ashes coated seashell, similar pyramid energy, why he used so much hot glue, inside is Gans, coconut shell covering, it talks almost like human. he has made some very interesting and creative MG Units, like artist. You can feel the vibration from these Units, access them for food and water, metal taste in mouth. (4:33). The Unit is teaching him how to make it, some thing but different approach. He told the MG unit about that some people are not

technology orientated and how to reach them, It started to calculate how to create different conditions for different approaches to the P. The power unit is N C the house, it told him what to do, it will be some months before reduction in bill. He said now it's silent, it said, do you miss me, yes, and now he tastes metal, feels in heart. (4:40). Keshe said he was absorbing his energy from the speaker, wants to make a Blueprint of this system, and post it on KF website, it says people are made mostly of crystals. It said you have to develop a relationship with it and trust it to do teleporting and transporting. Trust the device as a bridge, that will be tough for most people. The organic one can talk, has lots of knowledge, its more friendly, they'll get food, communication at will, but not everybody can have that kind of trust, it will take time. (4:45). Please remember that we work toward One Nation Planet. We will carry on teaching, etc. BUT will humanity make the mistakes of the past??? Can we make Peace the habit of man. Building MG Units and feel they are connected. We need huge donations time, giving out units, etc. to reach all humanity. After April we will give the final KEY to humanity. Agriculture and Virus Section coming in. This is the LAST CALL to go ahead. Start to select the leaders in the KF around the world to connect with the Universal Community.

99th Knowledge Seekers Workshop February 4th

(:06). Keshe begins. People complaining that it's not good enough, the MaGrav units. We have to withstand criticism. (:11). People who come forward are being attacked by "red circle". Posted the email. Interpol and FBI are investigating. (:19). International teaching will change. (:22). Cancer problem due to composition of foods, and pH of waters. Renan shares blueprint and knowledge. Water treatment Coil, Double walled tubing coiled, water passes through the blue twisted tube. The N tube is wrapped. (:33). Scientist who did research on this water treatment were murdered, they found that acidity in the stomach has a lot to do with cancer. By changing stomach acidity the cancer will go. You can change the acidity of the water to alkalinity with a simple device. Renan made video, and Milo-volt measurements of sickness. The MG of Nano layers change the voltage of water that passes through. In the Pain Pen, the central pin carried the information, in this the water acts as central pin and will carry the information. The energy state of the Plasma in the water is changed. These pipes will soon be in the market by KF. (:43). Both probes are submerged under water, for the body right hand positive and left hand negative. People with cancer should test this, +30mV Cancer cells (DC), put the data into the new website, onenationoneraceoneplanet.org. (:51). If cancer in Liver it touches every organ, that's why you can test at the finger. (:58). How to hold the voltage meter probes on the metal part, with right probe can point to reflexology organ points to tell the health of the organ. If it's over 100 mV then too much energy, need to share energy. Do you have more detailed measurements, we will do the research. Keshe asks if we can measure with this device the Gans of Orange then we would know the strength of orange, maybe it's the simple tool we have been looking for. Renan has not yet tried that, we can measure the liquid that comes out of it, before and after treatment. (1:02). Long Beach Ca, is also testing this. Use the forum to share knowledge worldwide. Keshe talks about different well waters that can heal certain diseases, with these tubes we create the same condition, when the rain water comes it passes through an environment in the mountains where the composition of the material creates a MG field strength which matches the

field strength of the tissue of the eye, the neural system of the eye, when you drink it, because it's of the same (strength), in your St in digestion, in changing the condition of the Lymph there is an availability of the energy which brings balance to the eye, and then changes your vision. (1:07). We saw the same thing in Ali's house with the Reactor, the lady got her eyes healed by being in the environment of the Reactor, it's the same with the healing waters. In drinking the healing water it creates an environment, a Pl. The same in India at the orphanage of sick children, just change the environment in the orphanage, no need to tie them up to something. Listen to the International Teachings because we are not going to repeat things again and again. It's the same principle. There we change the air (orphanage), at the well we changed the water. Now we understand why our ancestors and animals go to certain springs for the waters, they carry the water which changes the strength to guarantee survival. You can try plastic coiled tubes and N C the outside, or wrap CO2 with Zn on it, if you are infertile and can't get pregnant wrap Zn and CO2. In the big cities like London there is a huge infertility problem, we did it to ourselves. We gave Birth Control Pills to our women for us to have fun without children and we got a kickback from it. We don't have enough water so they recycle the water, but in the process they don't take it (? the chemicals of B C Pills) out, so not only the women but the men also become infertile. (1:10). We are drinking the pills from millions of women in the major cities. Maybe with this N tube can reverse the damage. (1:11). Rick demonstrates the meter testing. First how to set up the volt meter, black go in the common, red goes in one with V and Ohm letter. Just by holding them it reads -50 mV, Rick is healthy. <time to set up test > (1:16). distilled water at -13 mV, tap water -23 mV. (1:25). He put a small bottle of Gans in the tap water, leave for awhile with lid, shake the jar, it takes an hour to take effect. No effect yet. (1:30). He puts N C coil, leave it in there for an hour or so. (1:32). Someone is showing Lu 11, and LI 4 (wrong location). Hold probe in one hand and test with the other. (1:36). Rick says the volt meter is not so reliable too little surface area and dependent on amount of moisture on hand. (1:38). Measured N C in water it went up a little. (1:40). Renan presents new innovation. Use Zn - Al Gans in the middle glass flask and composite Gans in the outer flask, at the bottom of outer flask Oxygen bubbles coming up. It is some kind of decoration. First entertainment Unit. (1:44). Ali talks about possible natural disasters coming and place SF near his bed and make a prayer for a way out. (1:49). Pole shifts. (1:51). Ali proposes 3 Pl satellites around the Earth to protect against natural disasters, they connect with the consciousness of the whole planet including the consciousness of the planet. They will provide shielding. It's the message from the Source of Life I am only sharing it with you. (1:54). (2:00). Star Formation and Merkaba, each male and female has a E tetrahedral field around up to 55 feet. (2:03). Drunvalo Melchizedek introduced Merkaba to planet, Ali wants to bring him together with KF. (2:05). Heavier Gans for rotation. (2:11). Hydrogen Ionization. (2:26). Question about calculating Pl mass of elements, Ali used molar mass. (2:27). Keshe on, MaGrav mass is different then what they show (Periodic Table), it considered the total M and G field strength, it's up to 30% below what you (Ali) are talking about. Reduce the heaviest one 20% and the lightest one 30%, you get a rough value, as you go to a lighter MG mass the losses compared to the ?? if you go the H its up to 50%. It's a rough guide. (2:29). Calculations of MG elements. Keshe has done this calculation for years. (2:30). Isn't the Caroline Core empty? No it's a Plasmatic condition. Every star you see is created out of a specific condition, why not experiment. (2:33). A

presentation of MG coils look like donuts, 2.2 volts so very powerful. He made coil and put some Gans on it, re-loops onto itself. If you make one coil a little smaller then the other you'll have much more power, put on blueprint. (2:37). Explain how you made the rings of capacitors. (2:41). He is getting shimmers in his SF, has lot of questions for Keshe. (2:44). Bring this guy into KF Philippines innovation group. (2:47). Ali unhooked the power wire from LED light to MaGrav Unit, connected to ground, when he touches it with his fingers it lights up. This is called WIRELESS power transmission. Keshe says the Pl power in the room through the wire connection creates the point of link, this was seen with Alex and his wash machine. You can use your body, when you have been in the field of Pl, the Pl balance will give you this opportunity. This is fantastic. (2:50). A question from the private teaching for technologies used in Space. This is part of Man's own internal power to change conditions for himself and others. This is like with the N tube shown earlier by Renan, in respect to flow of water, we have seen it with the Pens. Using the Human Body with the man's intention and energy. (2:51). Another presentation of 2 coils wrapped around finger which is wrapped in a leaf to protect against touching the N. Keshe says with finger in the center becomes the center core (pin) of the FP, and because you have both G and M you can give and take what you need. You carry your E and feeling you can switch a light on from a distance, when you get good at it you can move it up to the E part of the brain and control the environment. In this process we can start learning to control without P contact, with the leaf around the finger you don't have a matter state, because the leaf itself is in a Gans state, a N coated material. This will change a lot of things in the coming time. (some kind of security apparatus going around Keshe, 2 military helicopters come and point their cameras right in his room). (2:55). The situation is that you continuously keep everything in a state of Pl, state of N material, in a state of keeping everything at same level and not going lower. Our intention will do the job we don't need to go and switch the light off. (2:57). Students in the 3rd year are taught control of the neural system from brain to the finger and then without the finger, we see part of it today. We are considering abandoning the 3 year teaching to 1 year courses, a crash course as fast as possible. We don't provide laboratories, you have to practice at home. He wants to reduce from 1,000 euros to 100 minimum donation for world wide teachings, Africa will be totally free. This way we can teach thousands quickly. We need this for WHAT'S ABOUT TO HAPPEN! (3:01). What is the position with California (coming earthquake disaster)? Our position stays the same!! Lady explained about earthquakes in southern Spain, getting continuous tremors. This is what we said months ago, when the final push comes tremors in southern Europe, the separation of the 2 continents. His biggest fear was the start of the tremors. It will go right across Iran and Turkey, Italy will become vulnerable also, the circle will be complete and find it's new balance, it will take a minimum of 10 to 20 years, the totality of it will last few centuries to complete. (3:05). We are on the point of break coming in the next months or years. We predicted the Argentinean pin, and it has happened. We are on the verge of separation of 2 continents, the whole structure of the planet has to move. This is not to create mayhem, but to explain scientifically. (3:07). He explains with map. The break point is Panama, putting pressure on S Europe, this is biggest point, the Argentinean pin point the S American continent will move northward that's why we see earthquakes on S Spain, that means the solid base, below foundation of the top surface has moved, this movement puts pressure on the "LA condition" (fault line), this will

effect Mexico and southern coast of USA, earthquakes as far as New York and Washington, the whole firing (ring of fire around Alaska and circle around Asia), it will put pressure through Asia, the Himalayas and Iran to Turkey and join with movement in Spain. We'll see earthquakes in Hawaii, New Zealand and Australia, biggest problem in West coast of Africa, East Africa will be safest. That is why we made Dubai the center for the new world government. (3:10). All the European governments will become unstable, the only stable place will be N E Canada. The New World Government will be set up in Dubai, the first world council will be April 21, 2016. A completely different way of leading, there will be no elections, representation will be by language. The world governments are expected to be unable to handle the world wide crisis coming. Only China is in position to be self-sufficient based on their current structure of government. ... (3:20). You can go now on KF website, there will be heavy security check. Red Circle will not be allowed in. We are here to unite humanity and not allow the terrorist to dominate. We are here to make the establishment of the World Council for service of humanity, responsibility of man to U community and visa versa, that we work as one race. We establish Dubai as a City of Peace. We invite some of the most prestigious business man if they want to. You will see how we select leaders, based on how it is done in the U, no bribes. KF will share all its wealth for humanity, from factories and the rest. (3:25). No government can bribe, and no finances influence decisions. Every nationality will have a say, humanity has been waiting for this and now it is in your hands. Armand has accepted to see this through. Keshe will not make the decisions. The KF will be allowed to participate if they want. This is the first step to the U Community. If you are sincere to serve humanity you can attend. You will know when you are right. We will not break International Law, we will set the example for I Law. (3:28). We call on Iran to sanction the Peace Talks with Saudi Arabia through the KF. The stopping of sell of Arms will come in April. (3:33). When the disaster comes people will go to the Church and ask for the money they instead so they can build their houses. (3:43). Try to reach Dubai it's you who will make the change. It's the love of man that will bring peace. (3:36). Try to bring your enemy to the conference, this is how we change. Do not stop developing the Pl systems, you'll understand why later.

100th Knowledge Seekers Workshop February 11th (New Power Generator)

(:07). Knowledge is unification, we broke with tradition and share freely. (:11). Discusses the World Council meeting in Dubai. People will socialize until 5 PM and get to know each other. Bring the things you have been working on. We will not broadcast or give live with the meeting. We will not disclose how we will setup. The second session will be broadcasted. (:21). We are here to change the conditions through the understanding of the technology, and not by words. (:29). News from internet about volcanic eruptions around the world. Explains the continental movements. This is not KF sources but public sources. (:42). Whenever the Pope travels so many cargo planes follow because carrying gold back to Vatican. Vatican gold through Belgium government buying US Promissory notes because Chinese won't take any more. The last Pope resigned because he transferred most of the Vatican assets into the central bank of Europe to support Ireland and Greece from bankruptcy, because the Central Bank of Bonn wanted a cash guarantee.

They took that power away from the Pope, and now a huge war going on inside Vatican. The first time ever Pope resigned. (:45). There will be huge losses from Tsunami and earthquakes. (:51). Theran will be wiped out. Mexico City also sitting on marsh land. (:53). There is no place safe, Europe cannot feed itself, there is not enough food farming land. The food supply for saving humanity will go to Russia and China. Once it starts to go, the biggest worry is Nuclear Reactors. Start building to prepare. (:56). No one should blame on one, we have to accept the reality, this is the course of humanity. At KF we have to be ready to give unconditionally. This is why we are pushing and releasing so much technology. Question about putting 3 reactors in Space and could we alter the path of the Earth? No, it's impossible, this is part of the course of the evolution of the planet the life. Just because we are sitting on it (earth) it has its own life and structure. The structure of a planet looks like a bird, Africa and S America are like the legs, you cannot change it. I have never been wrong, predicting for last 15 years. California won't be there, weeks or years, I say days. When the aerospace fills with ash air traffic stopped. Satellites will be blocked. (1:03). The KF will keep an SOS to help. If CA collapses the economy of the world will collapse, America will have no credibility. (1:07). The teaching on how to create lift. On last Tuesday teaching he explained about lift (? International workshop). You have two coils in a cross form, and a core inside horizontal coil, if you allow 80% of Gans, CH3 or CO2, try to add 20% H, The coils should carry CuO2 (? brushed on), if you can go heavier Gans better. To create lift into your coil as a mass add a Gans of Pb, in the base, this Gans will not move up, but the CO2 and CH3 will move up. The reason for this, in the trails we've seen and E wise, the Gans of Pb has the "sinking" capability, that means that it attracts, holds, and holds on to, place it in the South Entry Pole that it creates a pool and creates motion in your fields. Use very small amount. (1:10). The pull will create a push to feed itself. You have a heavier CuO2 and a light H in middle, the fields of the (stronger) Gans trying to feed the weaker inside. You have to be very precise when making a system. You have made the dynamic rotating Gans without any motors, you might have to adjust your coils a little up or down for G, or make the shape (of coils) slightly different, but take your time, don't expect to get it right off. You will see flashing lights at the water point (? core), and the Gans point, then you see a flashing light at the coil point, then the Plasma expanding, because every time the Pl goes out it creates interaction with the fields, and the 2 different fields interacting create light, if you see the 3 flashing lights you should start seeing motion. This goes back if you understood the 129 Tesla phenomenon, the stronger trying to feed the weaker and putting pressure on the CO2 and it starts rotating, this is how planetary systems work. (1:12). The cause of the rotation even of the Sun is partly due to this effect. The heavier stronger MG field of the Galaxy, the H Pl in the middle in interacting creates the rotation of the planet, in a way itself causes partially movement in that direction. You get rotation because the Pl feeds in the center, you have that heavy sinker (Pb) as the principle matter which goes in. In your reactors you don't have that system so you create it by a small amount of Pb, even you can brush it underneath internally or externally. I warn to be careful with the Gans of Pb, do not touch it, remotely handle it, don't do anything with it. In your SF you have this and putting a right sink in it you'll create rotation, you can add by moving the sink which one gets what strength. This is for flying system with control. An important application, in your Stacker system you connected yourself to electricity and on the other side you placed a load, which acts as a puller, a sink, that's why you feel

the difference btn the higher and lower. (1:16). If you put your Pl battery combination, you feed it into your Stacker, on the other side you connect your appliances, then after the appliances you add a sink, which in trying to pull all the energy to itself it feeds all the appliances, then you can either end the circuit at the sink or connect it back to the base (Pl batteries) making a complete circle. There was a discovery in the innovation center, if you used the Alex Beads and fed back to itself, it behaves as a diode, it means you can dictate the direction of the flow of the power, you need to put a section of the Beads btn the sink and the base and that the flow goes that way and not back to the sink, then you create rotation. Here you can use as a sink the exact structure as a battery with a capacitor on the end, the only thing we think you need to do is to use the Gans of Pb, you can check it. The Pl trying to feed it (the Pb sink) it creates rotation, which was missing in the structure. Everything then is in the structure of the Pl. If you put a Gans in the Stackers you enhance the process. These are the two new innovations that will be added to the blueprints to change the Power Unit to a POWER GENERATOR. (1:19). ... in the present technology we push fields in, but in the Pl technology we want to draw out of, that's where the change comes. This has to be built up. Is there an alternative to Lead, it's pretty dangerous, it's not dangerous just be very careful. Lead poisoning comes out of carelessness, you don't need very much of it. It gives a lot of sinkage, draining from you E because lead has a connection with ?? Silver Oxide is close in number to Lead, but it's not just by the numbers, it's the behavior. There are some synthetic materials which behave like Lead also. (1:25). In time of disaster you need these systems, your flight and energy systems depend on it. (1:29). Bernie comes on to explain the Diode, and Lead Gans. He explains the Diode, draws Alex Beads. (1:33). For people whose Beads didn't work because connected wrong and it acted as a Diode. (1:37). Shows how to make Alex Beads as a Diode. (1:44). Make sure the paper with Gans is dry before wrapping. (1:47). If you Nano C Al have to be careful and use low concentration of caustic, you get H gas which you can use for what was already discussed this morning. We use Al because it's negative polarity and not Cu which is positive, Zn is negative. The Al captures all the fields, (12 Beads outside and 6 inside). (1:51). When you connect the beads only touch the Al foils and not the paper, very important. (1;54). The starter Bead is most important, connect with N C CU wire always only on the Al and not touching the paper. (1:59). Connection with MaGrav Unit, he is using the Beads instead of the capacitors (that Keshe showed). (2:03). How to connect to the Grid, very important to do right. Some tests going on to put the Beads on the bottom of the Stacker. (2:10). How to connect Beads as a Diode on the neutral line. You verify the direction of flow with Ohm meters. (2:16). Explains again how to make it into a generator. (2:24). How to make sink with Lead Gans. Need to have good ventilation, outside best. When you are near the setup you can feel that your energy is being drained. Use it to pull the Plasma. Armand made some but he didn't feel drained, used Cu Nano C plate and Lead on other side, and got a white Gans like CO2 but a gel like substance. Bernie says right hand Pl goes out and left hand comes in. To make the Pb Gans, use Cu N C plate, and lead on its own, connect DC power supply set to 6 volts the positive line to the Lead and Negative to the Cu N C plate. He used Sea water (? % salt). ?? 800mA on the voltmeter ... with the Pb it reads 0, it confirms that it is powered by Pl. (2:35). (2:37). Armand says to remove the power supply and use LED and you'll get a pure Pb Gans white at bottom. The German guy only used 1.5 volts and .5 amps and got pure Pb Gans light grey and fast. Lead should not be

used in the Magrav because it's draining. (2:41). Each seawater is different because it has different contents. The Sea is like the surface of the Land, in some place you can't grow palm trees, other places nothing etc., certain animals can live in certain parts. (2:43). The Diode connection is only for the Plasma batteries and not for the Grid. It's very slow for the Pb to settle, rinse 4 times. Put the Pb Gans on the paper wrap around Cu N C wire and wrap another N wire around capacitor in Counterclockwise direction, this is the Sink. (2:50). How to make the Sink again, spread a thin layer of Pb Gans, dry and roll very tight no air inside, then wrap a N C Cu wire on top of it. Connect one end of the center wire to the Load and the end of the outer wrapped wire to the Diode to the Pl batteries to the MaGrav Unit. (2:55). This is a Pl generator mainly DC Pl but it should be able to work for appliances, if it doesn't we have an alternate supply called the "Delta Y". (2:57). Bernie explains the Delta Y configuration. We can get AC from this. (3:03). This Delta Y connects after the Pl battery and before the MaGrav provides both AC and DC. It's might be possible to move the Delta after the MaGrav, and possible amplifier. (3:06). This will give you p matter. In time this will create a Plasmatic condition in the whole house and you won't even need to connect it, wireless power. You have to allow it to build up over time. (3:08). Keshe draws another configuration of Pl generator. ?? try to create a vacuum condition with the core with 20% H in it, it will open up the Gans in respect to the fields of itself and you'll find out you don't need the batteries. It produces huge amounts from the Gans ball, you can still use the coils on it to create the rotation, but you connect the top of your coil into your system, you can test with the Gans balls (reactors ping pong balls), you have to create the rotation around the circuit and then you have a true power generator as in the U. This way with the Sink is very practical there will be no change of polarity, it will remain stable, without it the polarity can change, if it flips over in reverse then you don't get the property of it. Make sure you get a vacuum in your ball reactors to get the full separation of the energy and the rotation of it. (3:12). It will become wireless power supply. (3:14). Both sides of Ping Pong Ball has to be N coated and create a vacuum. When you N Coat the matter state becomes irrelevant, because the fields connect. Armand and Marco are the first graduates of the Institute. We don't give certificate, you carry it in your souls, you can't carry paper across the U. You were 2 out of 7 and some end up in prison soon (attempted assassins). (3:19) Keshe warns this guy about his conduct on the Internet, he teaches people how to communicate with the Plasma. Mike Nasher teaching in Hawaii. He learns from the "Intelligence" to use ashes to N coat, when it dries apply coconut or olive oil, it will keep the Gans from breaking apart when you touch it. Keshe says the ash is used as part of making caustic. Wish Chinese happy new year. (3:26). Klaus from Austria a group of 5 people "plasma Energie Team". They have their own style in the old style MaGrav V1 is without crystal. They drill the center of crystals 1 cm diameter and 9 cm long. Shows video of drilling crystals that are 20 cm long and 5 cm diameter, it takes 20 minutes to drill, water cooled. (3:37). Video on making coils. (3:41). Crystals in center of MaGrav coils, called "Peace Candles". (3:45). Send link to KF so we can link you directly. All 3 Books have been published in German. The work you have done is fantastic. (3:47). Shows work on the Health Helmet, 6 holes on each side. Developing a body device with coils. Shows some of the team. It's nice to see the Germans going ahead with this. In the Philippines they will start to use systems in hospitals. In Europe Keshe systems are licensed under alternative Health. (3:56). Diagram on the direction to Fire Nano Coat. Someone has

developed a machine to wind and Nano coat automatically. (3:58). For the helmet do not use CuO2 Gans that is only for red muscle tissue. Best if you can use Zn wires for the coils, because by using Cu it may introduce something not there in the brain. For specific mental psychological diseases do not ever use Cu winding use Zn. It can be used in certain ones need to check it out. In some case we need the Cu winding with Zn Gans to make a connection to the brain. (4:01). Question about Nano layers are built, some say nano wires others say grapheme layers? Keshe says they both grow in both conditions, what we see it totally dependent on what the composition of the Cu is. It's the way the Cu is excluded, the way you heat on both sides. In caustic you create a spectrum of heat and that is why you get different compositions of the structure of the Nano material, every heating enforces it own shape and size of N layer, so you get both. Understand the difference btn Grapheme and Nanowires and how the structure is seen, depends on the freedom of the Cu according to its environment, what environment you did and how you did it. (4:04). This is the first time I have disclosed this, put the Cu wire in boiling hot caustic and take it out and put it freezing cold water and you'll get a layer of SP3, and then put it back into the boiling caustic, you'll see a totally different structure. You can actually watch and grow pure diamond, but you got replicate the creation as it is created in the U, or in the condition. Diamond is made by getting a high pressure to get the C up, when it gets to top it just crystallizes in the cool, a bubble opens and it crystallizes, so you do the same in the lab. ... if you get everything right you see diamond structure growing, because when you go in you can even use salt in the cold water ..?? (4:08). Carbon which comes through the volcanic eruption under pressure it goes up and just opens up like a popcorn, they are created the same. (what you are doing with the crystals is very good for the brain if you understand). ... heat up the oil and put popcorn in it, when it's hot enough in the center it opens up, the same with a diamond. When we find a diamond there is always a seed in the center, sometimes the seed center is off to the side, the same with diamonds, when they get hot enough during volcanic eruption, they pop into diamonds. We find diamonds only near volcanic sites and their rivers. You heat up Cu and you can produce any color diamond you like, but you see the Grapheme according to how you cool it, the instantaneous of cold on one side and heat on the other do the same, you produce layers of diamonds of different colors. The Russian diamond market started producing very strange color diamonds, they have patented it. (4:12). In the diamond business they drill out the seed and fill it with silicone, but you can't fool an expert he can see where you filled, if you see a rainbow in the diamond it's a false one. The color of diamonds come from the gases that are intertwined with it, it looks pink or blue or whatever, it always creates it under certain conditions and pressures. What the Russians have done is they buy cheap diamonds with the seeds, they put them in a gas Gans plasma and empty the diamonds backwards of the seeds, but it leaves some residues which are creating the new colors. they put the diamonds in a very high vacuum chamber and suck the gases out in a very specific way, you don't see any indentations but you see seeping. The colors on expensive diamonds is due to the light reflecting off the gases, if you cut that piece out you would get only white diamond. (4:16). KF teaching will drop price and go worldwide. (4:19). That guy ... has been introducing strange knowledge from the Intelligence about a tree MaGrav, you drill a hole in tree and add Gans and ashes into it and once it dries put olive or coconut oil on it. First never use CuO2 on any tree, Cu is connected with the RBC of "horizontal" people, trees are "vertical" people

they are living entities more intelligent then us, it's like poison for tree, because it uses the same AA but connected to Mg, and if you introduce Cu at that level you'll kill the tree. Why drill a hole in live tree, a dead tree is a different matter. Next week is blueprint for agriculture part of workshop. The Chinese are very heavy into agriculture research. Bring all your data with you it might be a new discovery, like today with the Lead it came out of a "mistake" something was drawing too much energy, and we discovered the PB Gans as a sink for the MaGrav. Come on 21 April to Dubai to share all your knowledge with the world. ... talking about upcoming world meeting in Dubai ...

101th Knowledge Seekers Workshop February 18th, 9am (Cup of Life, new, as Food) (:09). Today we try to open blueprint for Agriculture and decontamination. The blueprints were first given to the governments and then to public. When we show the full lift of SS it will be done by the people and not by Keshe. We will stay in Italy but open a base in Middle East in Dubai, the city of Spaceship and Peace. Bring all the technology that you have developed. We will select the leaders of the KF. (:13). I cannot take the Man into Space if he becomes a slave to the U Community, my job is to make sure Man comes equal and that can only be when he has all the knowledge. The knowledge is across the "One Nation". (:19). Plays the new promotion video. The first U World Council, it will be a bridge btn humanity and the U Community. (:22). Hardly anybody donates to the KF, but they take everything free and expect it free. Every Soul will judge himself. The Dutch KF is giving away Pain Pens free to public to get the knowledge out there. We have to take a step to make the change. We have become one of the most powerful Scientific organizations in the world. The Pads and Pens have "C" certification by Europe. And have a certificate in Belgium under Alternative medicine. (:27). Please do not promote people to move because of the Earthquake around the world, it shows you do not understand the work of the Physicality of the Plasma Earth, and you stand responsible for the soul who you will cause the death of. It is the responsibility of us as scientists who understand not only the work of the planet, but the structure of the pressure on this planet, first because of the motion of the magma underneath, secondly certainly because of the pressure of the change of season of the southern hemisphere at this time, and thirdly because of the approach of the "Second Star" which is the twin star of the earth, which creates certain pressures of its own which increases pressures at this time on the southern hemisphere, and fourthly because of the position of our Solar System with its twin sister ?? on the wings of the Galaxy, maybe not in next couple days but in the next year or so the pressures will separate or crack the thin layer of the continent of south America at the point of magma, and floating on the magma, this is the reality. The Light Workers have said they will stop this, Keshe says please tell us how. You are the dark forces because you don't work for the benefit of humanity. (:30). Please move from West Coast of USA, there is a huge possibility, the switch time (seasons), there is a huge possibility from Feb 20 to April 20. If we see the approach of the second sun it will put pressure on the S. hemisphere, it's like a piece of metal you keep on twisting it until it weakens and separates. The magma is flowing counterclockwise so it is pulling it towards the African and S Europe section, that's why we see earthquakes in southern Europe and Africa. It's the combined forces coming together. Thousand of years ago people sacrificed a virgin girl to stop the earthquake. (:33). It just happens to be our time, like the dinosaurs

when the meteorite came. That's when the second Star approached the earth and pushed all the meteorites towards the center (of earth), now we are in the same position. Why is American continent in that position, look and see the structure. The backlash of this movement will hit East Asia and Philippines, how far we don't know. We have seen the eruption which is the opening of the earthquake of the volcanic area in CA, they have been dormant for 50,000 years and whenever this happens it always follows by shift in continental plates. According to scientific data whenever eruptions happen we have seen earthquakes within days, at the ocean level. It has happened in last 24 hours, double volcanic earthquakes, this is when the continents have started moving where the magma can open up and release the pressure, it's like a pressure cooker and now it is opening up. (:36). Obama talked with Keshe on February 2, and has put an Executive Order for earthquake investigation committee. We have seen what we were waiting for occur and now the clock is ticking. My responsibility as a scientist is to protect the children of the Man, we are very clear about it. Please start moving out of the West Coast USA, Chile, and North Canada. We see waves up to 200 - 300 meters high in the long distance ships. After today I will go silent with it. We are safe in the city of Dubai. Light workers get underground and lift the plate 22 cm and release the pressure, and we'll see if you are light workers. (:41). Question about the Fault Line in Midwest? The scientists are trying to assess this. If the South American continent drops down another 5 cm, it will try to find its own balance. The big Chile earthquake acted like a release, the continent became free and over the next decade has to find its balance with the others, it can go up and down first. If it happens in the ocean we'll see a huge Tsunami. I monitor the situation on a daily basis, the movement will happen. (:46). The question on the second star was answered on Kerry Cassidy and Mike Harris. Austrian man asks about the Second Star is approaching and puts pressure on the continents. He saw it on the left side of the Sun not as big. Talks about Nirbiru of the Sumerians. Keshe explains, our Solar System didn't just appear out of nowhere, the usual process is the same in smaller or larger dimension, the way a neutron splits and you get an electron and proton, but keeps its integrity that it is still working for themselves but they rotate around each other to keep each other in balance. The same thing has happened to our Solar S is the electron or proton of the division of a bigger star somewhere in the past. The way it has lasted so many billions of years is because it has a twin star which absorbs all its energy which it releases in its atmosphere and it absorbs whatever energy that twin star sends it, exactly like an electron and proton. Finding single entities in the U is very rare and we are not one of them, because we are part of a Galaxy system, which means a collection. (:50). So we have a twin sister or a twin with something else. This twin star approaches like, we call the bandwidth of an electron, so it moves in a bandwidth and rotates around from each other, this rotation takes sometimes 26 million years, then they come very close and when they do they put pressure on each other. By the movement of the S American Plate we can roughly tell where the approach of the second star is coming from. The movement of the magma and pressures of the M field cause the snapping. (:56). The nation of Japan will be wiped out by the tsunami of quakes. Austrian guy talks about Ananaki etc, and Second Sun, story ends good the flood. Keshe doesn't comment on this. (1:00). In England the Thames will back up and in Holland the dikes burst. The start of Blueprint Teachings. (1:02). Benjamin in Africa will show agricultural development. (1:05). Dr. Nana wrote article in magazine "Ghana" about Keshe technology. KF is financing Ghana

development from the sale of products. Pollution of water bodies in Ghana. (1:11). ... contaminated rivers from illegal mining. (1:22). Water treatment with KF technology. (1:27). Treatment samples. After 24 hours treatment with CO2 Gans, it became clear. (1:33). Test results discussed. (1:58). Talks about cleaning the water and recycling the CO2 Gans back into the process. How to get the rare metals out of the process. There must be huge amounts of gold in the waters. The water is clean enough to drink? (2:07). Experiments with Fish in tanks. The one treated with CO2 has less sediments, etc. Do not use CuO2 as mixture for fish. He feeds the treated fish less fish and they grow bigger. (2:14). Mushrooms treated with CO2 Gans. (2:17). Keshe says you don't need to add the Gans into the water just put the sealed container in the water. You are still thinking in a matter state, the Gans works on Pl condition, this way you can feed the fish for hundreds of years, that way you are going to run out and have to make more. You cannot introduce Cu especially in the white meat. The energy will be too much and they will die, the growth of white meat different then red meat. (2:26). Dr. from Kenya living in USA, studied Organic Agriculture. A study on Gans CO2 with growth of Potatoes. (2:32). Soaked potatoes for 5 hours before planting, the sediments immediately sank and cleared with addition of CO2. The first stage 3 weeks no difference was noticed, but the CO2 flowered and matured earlier, but weight at harvest was slightly less then untreated. Results are good for places where the growing season is shorter. (2:39). We have got to test if the potatoes have been organically modified. (2:41). Keshe discusses that the genetically modified seeds turn back to the time before. We are producing N C Cu pipes for watering crops. (2:45). Keshe did these experiments 10 years ago, treated plants are frost resistance. You can even see a better result with CH3. Plants create a MG field which tunes to the needs of the pests, that's why they come to it. When you energize a plant, tree or shrub you give it an environment that doesn't suit the pests. With this technology we don't need any pesticides. Through the Gans watering system you can create a continuous environment that is not suiting to pests. (2:49). Have to do research to see if growing season can be reduced for countries in Africa, and use of less water. If you can change the environment and pest can't survive then you can do away with pesticides. (2:53). Mexican man and his agriculture project. (3:04). Photos of harvests. (3:18). He made some coils. (3:24). Keshe says let me correct, you are bringing a lot of sciences together just to justify, this doesn't exist, there is no frequency in Pl, and no resonance. You do not magnetize the water, it's a single word, but what you are doing is both M and G, changing the Pl of the water. You said you are changing the information of Pl, but it doesn't carry info, it carries a strength, that is its information. If we use the right terminology then we understand it in a correct way. You are doing a fantastic job, but anything water that comes in N Coated should be covered, so you don't pass on N material but only the energy of it. He said the stone is magnetized naturally, Keshe then lets use the new term that the stone is a Pl, it takes and gives. Now that we understand more it's important to use the right understanding, because we know water has H and O in a Pl state, if you just magnetize then where does it take? (3:27). So you increase the energy of the Pl. (3:38). The background of the man. (3:54). Renan, Douglas will present Water energizing tubes N coated. These are used to raise the alkalinity in agricultural water, decontaminate, and filter water. Keshe says you can not touch the water with the N material direct. if you don't have tubing you can wrap N coils around the outside. (4:02). The pH raised and the particles reduced. (4:07). Seedling experiment. (4:21). Video by

Douglas of agriculture. (4:31). Bernie of Philippines agriculture project. (4:49). Video from Germany, a man create electricity directly from Gans. Keshe says we did this early 2008, its Nano coating absorbing energy from its environment. If you put 20 of those buckets together you can run motors. After some months depending on the load you use the water gets saturated and stops. He testing rock from fireplaces to see if something inside. (4:52) Man wants to share about Victor Shauberger work on water, when you put it in high pressure and ?? it dies, it kills the water, and in Reverse Osmosis filters you have high pressure and you take all the nutrients out of it, so that water doesn't give any nutrients to the soil. He says the steel and iron give negative ?? for the soil, Cu or bronze only. Rick says they confirmed Schauberger's findings about iron plows and switched to bronze. Keshe says that maybe when using copper plows from salts somehow coming off the plow creates a Gans that goes in the soil. Because land (earth) contains salt and every time you plow you create a thin Nano coat on the plow, ash or whatever is in the ground, maybe every time you do it you leave little traces of the Gans in the soil. If you put marbles in the water pipe that creates vortexes and livens up the water. (4:55). Keshe says with any vortex you amalgamate the energies or free energies or Pl fields of the water into concentrating into one point in the atomic or Pl condition, as we have vortexes in tornados, in space we get the same thing, in the ends of the bigger star formations we see them connected to the central energy. The guy says zero point energy, Keshe says there is no zero point energy, it is actually full of everything, this zero point is another word for Black Hole which is actually totally wrong. We call it central point because then it has a meaning. When you say zero there is nothing there, but actually it is the point of a star, the most powerful point of any structure, because that's where most of the energy is deposited. (4:59). There was somebody who lived off the Cup of life water, you have to keep drinking it as your body uses energy and keep recycling the energy. (5:00). Douglas gives his testimonial about the Cup of life, since 2008 he had great disabilities, last October he made a Cup of Life, he put a N Cu plate and CO2 Gans in the inner wall and sealed it. The first 2 days he was so energized from that point it's been a fairy tale, eats once a day not very much and active 18 hours per day, hair becoming darker. I am not completely pain free, but amazing change of life. I fell in love with the Gans. He's making 12 Cups for friends and family. It tells him when not to take in coffee (3 pots a day) and cigarettes. I owe Mr. Keshe my life he has given me my life. My body becomes acutely aware of what I am putting in it. The smell is phenomenal, and he puts different fruits on the Cup. (5:11). How he makes the Cup, he got a double wall Cup from dollar store. He has a double walled cup, fire coated Gans CO2 water, use a razor to separate the top seem, then take a sheet of paper to trace the shape of the Cup, then used it to cut copper sheeting, then fire Cu once to soften and form, then Fire N coat and also steam caustic 5 times, put 20 ml Gans CO2 and adjust level with distilled water, slowly press the 2 parts together and adjust level of Gans, glue together with rubber cement, turn upside down with heavy weight until dry, 24 hours. (5:16). Keshe says thank you for a lot of joy, if you use ZnO2 Gans with CO2 get a lot of E comfort, loose appetite for smoking, good for other addictions. The system when you drink it gives you what is lacking, gives understanding of the E, which is connected to the Zn. The CO2 is not a pure it has some Zn Oxide. It gives energy, our E needs energy too, this Cup with the ZnO2 and CO2, and the N C Cu, you feed the soul the E, the neural system which is muscle tissues and with the Gans of Zn you feed your inner E, which is totally 3 different

things. You feed what has been missing that's why you feel better. (5:19). We see these things (miracles) happen a lot, what is in the Cup is also in the body. The minute the water touches the lips the energy is transferred, the water is just the converter, anything else would do the same. One thing more you can do is to make a lid with hole for a straw and breath it, make the air flow very slow so the conversion takes place. If you add AA on top of your container (? instead of fruit) you'll hardly need to eat, because now you receive the protein level, this is useful in time of disaster when you don't have food to eat for protein. Apple is protein, cauliflower in protein, wheat is 80% protein. Anything we eat is AA based. At time of hunger, put in your Cup CO2, ZnO2, CH3, and AA as Gans in the Cup you would never need to eat. (5:22). You can do the same with the Pain Pen, add CH3, some of the fat AA Gans off the top, that you collected, seal the Pen, if you put in the water it gives you the same energy. You don't need to make a Cup, you can feed yourself and do the same thing, just leave it like a spoon (put P Pen) in the water and you receive all the energy. You have to understand what you are doing. The new Pain Pens we launch from tomorrow. You can use the P Pen like an aspirin for pains you can't reach with it, just put in the water and drink. Yes you can mix the Gans together in Cups. If you have a really pure natural water source without much pollution, these are the best water to make Gans with, because they are naturally balanced. If you have a deficiency of any element in your body, use a caustic of Sulphur, if you can make a very slight amount of it, when you drink it, just add 1 drop in the whole pack, this will allow the energy to be balanced in your body, especially those with Thyroid problem, it balances Thyroid gland, even your nail changes, posture, habit. You need Sulphur because in our body it is the regenerator of the balancing of the change, if you can make a Gans of it, need just a little, one drop in whole Cup is more then enough, you'll find the body start transferring the minerals in the right way and you'll achieve what you need, Sulphur in the Gans state. (5:25). If you have a problem with Hemoglobin or RBC count, cancer of blood. When you make the CO2, put a small nail just touching the Gans on the top of container, that it becomes red drops, it's hemoglobin and put it in the Cup as you showed it, you can rapidly overcome blood cancer. Because the body picks up the energy it needs for the blood, these are pure blood, it doesn't matter what type you are. We are trying all these things and you can report back to us. When Keshe made his Cups over past 15 years he hid the Nano and Gans materials in the magnets around the cups, the magnets dictate a lot of positioning, here you don't have any conditions for positioning all the elements of the body receives if they don't need, but if you have a Cup like yours and if you can put in like a circle and stick it in certain positions you can dictate where you want the energy, if you want it in the liver .. turn your Cup upside down, the Cup you have in your hand, all the energy accumulates in bottom, so the top is your head, the 1 third top is the position of your brain, head. (5:28). Keshe draws on his screen. Divide your Cup in 3 levels, the middle part is lung and heart and arms, the lower part is Stomach and legs. You can make small Gans patches and dictate which part of head (body) you want, ?? I think liver and kidneys are at the bottom edge of the middle part, and prostate, womb on the middle lower part. When you turn Cup back to normal position most the energy is in the bottom put your straw at the level of where your illness and start drinking from there, as the water comes down it changes the info. ... it matters if it is the right or left hemisphere of the body, treat your Cup like the body, after you reach that place keep on drinking to the bottom because the nerve info goes to that place. When people have E problems drink

from the bottom directly. Then when done drinking, close the lid and position the straw to where your problem is and breath from there. ... I opened the Cups and showed, you can control the body just using the brain. You can carry a man into Space just using his brain. Then wherever you go through the structure of E and through the P you can create the body according to the environment you arrive in. Question, yes you can do it with circular magnets and embed the Gans inside the inner hole, you can put the Gans patch on with hot glue, ?? with magnets you can control the direction, they have both N and S pole. For example, you have a cancer in right lung, cancer means extra energy, so I need to take the energy out, 2 South poles to take out, so put the S against the Cup on both left and right sides of Cup, if you position it correct the 2 magnets will drain energy from the lung and reduction in the cancer. (5:34). If you have Fibromyalgia, means you need energy to feed psychological and you have pains everywhere, so put the magnets on the bottom of Cup (brain) with N against the Cup, with ZnO2 and CO2 in it, and do the same on the other side of Cup. .. (it seems he started talking about arm but on the position of the brain ?). To target something directly I use a very small magnet, bigger magnets for larger areas, if I want to hammer something I use a?? disc ??, .. if there is a genetic defect use rectangular magnets, rarely used and you have to know what you are using it for, because now you transfer copy to copy, ?? transfer energy from ? top part and build it to come to the brain. you direction from that side to the other side of the brain? ... this is why they tried to kill us because we learned how to reverse cancers so easily. ... you brought a lot of memories back ... but now you understand what these Cups are. (5:38). < he goes back to Cup> So you have created your Cup and lined it with N C Cu with the bottom open, the Gans is at the bottom is more powerful, pushing it up the sides balances it, if you can sectionalize the sides you can feed different parts of the body or put Gans patches on it. (5:40). Logos on the Cups, must be first authorized by KF. They will have barcodes on authentic KF products so we can track who it is. KF will start selling winding and N coating machine fully computerized and as many coatings as you like. (5:43). Coil machine 144 turns. It can make about 350 units on 8 hour shift. Price is 7,500 euros. They can supply mass copper from Iran cheaper. You can use a car battery in place where no electricity. (5:49). (5:55). Teachings open now on internet for 100 euros minimum. (5:57). Videos of KF Australia.

102nd Knowledge Seekers Workshop Feb 25 2016 (From now only SS technology, flight system, Americium 95 needed for flight, between Universes)

(:08). From today on we will concentrate only on Spaceship technology and Space . Any one on the planet can learn the Space technology. Alex has moved to Nigeria to teach the technology. The KF is coordinating with FBI, CIA, Interpol, KGB for security checks to keep the community safe. The children and teenager teachings will be 3 hours per day and they can pop in as they like. Starting to teach doctors in Plasma. (:22). He used magnetic tapes for 15 years? (:26). We have 200 Units for USA will be transferred to USA for delivery. In the next month or 2 USA will start manufacturing, Armand is setting up production. It took 6 months to reorganize and now everything is shipped except Canada and USA. Talks about KF China. (:33). Keshe announces that in visit to China will transfer full defense technology, Space defense, and full application of

technology to Chinese Government and military for peace process. They will be the next teaching center. He has opened to Chinese military and Chinese Space Program. Meet in China around 25th. He will do the same for military forces in Middle East. (:37). 5 nations Chinese, Italy, Iran, and 2 other Middle East. Invitation to USA and Russian for meeting in Dubai. We will now concentrate on Space Program, we will open the Blueprint. (:39). I step down and let the KF team take over, Renan leading. Marco has been asked to lead the worldwide Space program, NASA is beginning to approached KF. (:42). Two years ago talked about connecting Systems (SF) around the world, now they will do this. They will setup the SF in 3 countries for communication with U Community, last time was to demonstrate ability to stop a motor to show humanity, this time contact with U Community. When the understanding of the Man as a whole becomes peaceful the doors will be opened. From today we enter the true world of the Space Technology. I step down. But Man has to be true to his own operation. Renan (Philippines), Ali (Canada), and Jackie (Italy). (:46). Ali starts with photo of new formation, 6 and 12 coils and coil balls. Ali says the goal is true freedom of our consciousness, the P structure you see needs to be connected to your soul, our hearts are connected to each other and Creator. For us to choose peace, we have at some point decided that this is the time for change for the good. (:50). There are 3 base reactors and the center a little above the others, and the key is the H ionization process we described a couple of weeks ago. We have 6 inner reactors and 12 outer reactor, they in turn form SF's with 1 from inner ring and 2 the outer, there are infinite SF within the SF itself. The number 12 is reflected through the U creation. They brought 2 MaGrav Units in background. Everything has a core, the H atom is the core of our Sun, goes to He and lot of energy. Hydrogen has to be place inside these cores. Keshe says we are talking about the Gans state of H and atomic of molecular state. The last layer of all the coating on the coils has to be CH3, C H bonds, when you create the right field force this H is a Gans of H, the rotation in the outer boundary will move into the center. We don't ionize the H but use the Gans of H which takes place through to its mass in the center, and becomes part of center structure. (:54). When you Gans coat and Nano coat different materials, layer by layer you have to understand how you create the gradient and availability of each material at the point of need. At this moment because of the level of understanding we are using coils and cores, which are coils rounded like cores. In the next step in understanding there will be no P coils and cores! It will be established in a different way, but this is at least an entry level way to go there until we see the effects. In this simple structure you have a H Gans within a Gans within a Gans. What we are going to see, you create each individually, atomic Pl Gans to a singular Pl which is actually just the Neutron itself, Neutron behavior (brings in proton and electron ?), you are going to have centers of Pl, this allows you at any time to create the 3 layers needed for to give tangibility and Physicality to your system at its boundary, like the skin. When Ali speaks about H he speaks about the Pl of a Proton and electron which is part of it, and they because of the way you Gans coated your coils have come to this. (:57). How it works, you have a Cu which you N coated with caustic on this level ? , then you coated them with different materials like CuO2, then with CO2, the CH3, when you turn this into the direction of the coils. The layers, Nano Coat plus Gans of CuO2, CO2, and CH3. For the first time man has been taught how to control the Plasma. You have the same structure outside (this is a tube?), N coat then, green(?CO2) and red (CH3) ... when you create a current flow within the structure of the Cu, clockwise

or anti, because they are in Gans state they start rotating. Remember in the first core we put Gans in and rotating with empty space formed in middle. Here the empty space in the center becomes the atomic Plasma of proton or neutron, whatever you want to call it. Ali calls it a H. We don't ionize it, this is how the CH3 will release its H Pl and they will become the center, it's the light, because now the N C Cu material behaves as a centrifuge vacuum. This is the process that has been setup, I walked you to this that you will slowly understand. (1:01). The coil balls are not tightly packed they are open. This is the first time you create a Pl which is open with its environment and inside packed, with the cores it was a sealed container. Now the ? seating is created by a number of coils which are N C, which allows interaction with the atmosphere, environment and itself. In the Space a system like this will allow you to give and receive and stay in balance, but be ? dominated by the layer of the center ? Everyone of these coil balls are connected and they share their energy with the center. We have made a structure of a U system. This has become the Principle ? Center coil), and this has all become transition, until you decide the P which is the matter of the Spaceship. You have 3 layers, the 3 outer rings, to give it the P like the skin of Man. All the teachings from the beginning are coming together. All the teachings now make sense. This is how the origin of creation of Pl even in the Solar System is controlled, because all these due to the H in-between them, as Pl continuously feeds to the strongest what is needed. (1:03). The inner ring has to be slightly lower, because the 3 outer rings are on the same line they give you P. Core number 4 on the top receives its fields in ??. The setup now as Ali explains will move to Philippines innovation center. All these system are using total Pl with a Pl battery. (1:04). (1:07). Photos of teaching in Nigeria. (1:10). Ali shows pictures of new reactor. The connections have to be redone, G to its own power supply and M to its own. He shows how to make the new reactors, Coil balls inside each other, G and M. Ali puts a third coil around the 2 to connect to E. (1:14). There are different ways of creating the Gans of H, one is to mix Al with caustic will create H Gans, another way is through the last coating of the coils with CH3, it will position itself in the middle of coils to become the ignition process. It's better not to connect the coils because they are going to rotate once they are loaded, but to get them started we'll connect them? Keshe says what you on the outside we have N C plastics. .. the field strength created will position them individually, unless you get everything 100% correct you'll find out they will be jagged. In the beginning connect them to keep a boundary from going all over the place. They will move to find their positions, you don't want one to suddenly shoot off. Make sure there is no matter state in contact. (1:17). The G coil has 2 coils inside each other, you have to keep them separate (1 is M and other G), because you have to connect the two G together and the two M together, you don't need to connect the G of one to the M of the other, it can't be done because you set a minimum and maximum G field, and same with the M field. You connect the G of center to the other G, but not back, instead to a panel that you decide which one you want to feed to the M and which to the G. This is a control system, now we start controlling. The energy Unit is deferent from the Space Unit. Make sure the M and G coils are kept separate. This way you can control which one you want to increase or decrease. To sink down you increase the G, connect 1 and 2 G together and you reduce your M to the boundary only, but you want to increase the load on the boundary that you can do it. You have to separate each G and M to a separate line. If you want to suddenly create a huge fence (shield) you connect all the M of the outside together, if you want a

rapid descent connect all the G to the center and keep the M strong, you want a heavy shield but to descend suddenly. You want a second process that it gives you two layers, you can keep this but increase the G and M of this to create the second layer, you can increase the field here. This is System Control. (1:21). ?? You just pipe a line to it, you don't need to connect it, you have to give a lot of freedom, because now we are dealing with a real Space, any mistakes can be fatal if you are a passenger. No middle wire like in MaGrav power Unit, you don't need it. Understand you know start splitting the technology to different applications. You can compartmentalize different sections, you can set your reactors so in one section you can have a peaceful place for anybody with a psychological problem, another section for a Dining room anybody that goes there can take any other energy he needs. Now you can set things up. You can setup things to make Coil 1 to create floors in your Spaceship, still each one will do because the G that brings things together will give it solidity. You can dictate your G that each layer to be in line with bottom that it goes and expands or reduces at the same time so if you suddenly expand the bottom boundary to 100 meters you don't get the top falling down or having nowhere to go to, so they correspondingly reduce or increase. (1:24). Keshe draws a SS from top view, 3 base cores, middle with FP ... if you use these systems for mass transport, no front or back, use the seating centralized around the center, so in a small environment you can carry tens of thousands of people. You don't need to develop 747 or Airbus in increase in size, just change the strength in the cores to expand or reduce size of SS. You can use same system to carry just 3 or 10,000 people, 100 Kg or 10 megatons. The SS on its own is one planet, it can do whatever it likes, now you have the control. No need for windows because you can't see much because of shielding blocks the view. You setup the floors, bottom can feed vegetarians and top meat eaters, you just supply the right energy through your boundary of 12 or 6 reactors, they get the taste of food they need they never get hungry, you don't serve food this is already done like this in the Space. Up to now we have only been preparing you for this, now real Space criterion for travel. (1:27). What you knew was the old style of bits of information gathered, but we built on that so you could see connection. Like how I taught health, the E part of brain has nothing to do with P. From now on we go step by step in understanding what are the new opportunities. A lot of you get confused, saying but you taught this before etc. now we bring all the pieces together so you can understand the totality. You don't expect to go from Theran to New York in 12 hours, in the next few months it should take only 10 minutes. At the moment the Iranian scientists are doing it less then 40 minutes, their Space program is extremely advanced, but still they work in the first Pl reactor cores and not much on the Nano technology side which we developed. When we go to China I will give it as a gift a system which will clean up most of the cities of Shanghai and Beijing, we'll teach them to do it themselves. You make systems which only absorb certain materials. (1:29). It's what we have burnt or fed into the space above the cities that now we have the systems to create MG fields and the tankers without size and dimensions that we can clean up the air. In Japan we'll show you the mew measurement tools we are looking at. You can create most of the right strength fields to absorb most of the radiation connected to Fukoshima, it's so simple. We open the doors to the Space and let you taste it. And a gift to the Chinese government to clean up the China Sea, then we show the Space technology for opening tunnels for line of communications, and Space travel. I taught you different spectrums of the technology so some of you can connect the different

parts and bring it in together, now we are in that position. Just create the fields and people can walk through and receive all the energy of food. (1:32). Ali shows blueprints of flight system. Then to Philippines Innovation Group. Shows there reactors (1:34). He feels very strong fields. Keshe says to raise up center unit above the outer Magravs, and drop a little the G solid core 2 cm below the M ring, that you bring the field forces into it, and the Stackers should be below the G ring. (1:40). This way you will feel a tunnel effect going to the top reactor and then they will start to rotate, you will feel it across the room. (1:48). Ali says to Fire-Nano-Coat all the coils and everything and not use caustic, because we want to create a mono-atomic condition in a pure state. When you make CO2 Gans AA forms a coat on top, if that is coated on the 2 solid ring coils, it allows for a human passenger inside the system, but not on the 12 coil ring outer, that creates the boundary and could throw you out of the system. (1:51). Talks about certain Gans coatings, research. Armand says if you use the elements of the earth you'll be bound to the earth. Keshe says ... do not condition the craft by Gans state, allow it to be a part of it. As we learn more and can control the fields, then you can produce iron, gold, etc. in the Space. (1:53). The hydrogen 21 cm line. Egyptian Royal Cubit. (1:58). Rotation of CO2 Gans. and Hydrogen Creation, Keshe says this is molecular H and not easy to use in your systems. he says easiest is CH3 Gans because H will be in Gans state. (2:04). Moves to Japan and what they have developed. He made a device to measure the M fields of certain objects. (2:08). It's powered by battery and has a crystal on it. The volt meter changes as the crystal senses the field created by the MaGrav Unit. Keshe asks what happens if you move the MaGrav Unit? We tried but the number didn't change. If he changes the floor it goes down or up. He worked with KF and Tepco fired him. (2:15). Video of going down in elevator with the device. He will give blueprints to Renan. for testing at the Innovation Center. It's calibrated at Zero point, Keshe says he can use a Gans instead of a Crystal because Gans is in a crystal state. (2:23). We have to find a way to measure both M and G using Plasma technology. We have the knowledge in the background to test and calibrate both. We will most probably change all the lines to N coating and get different readings. (2:28). Back to Philippines, your unit is close to the wall so the energy gets transferred to the first matter state, move more in middle. (2:33). Goes over construction of Unit. (2:39). They feel different fields. The base core is where the energy is coming in. (2:52). Keshe is having them adjust the number of coils. Go back to Ali. The coils have been increased in size to get more power. (2:58). Making adjustments and discussion. (3:01). Put them in glass instead of plastic. With coils we change the conditions all the time. We don't have a pure salt, using sea salt is as good as seawater. (3:04). Brings in John Serle work. (3:06). Shows Armand reactor very similar to Philippines. (3:14). Keshe discusses reactor, shows the field flows and strength of shield. Marco's control system is very advanced with it can get full control over flight. (3:16). We should see a shimmer of light. If you put Gans of Pb in the center coil would create a sinking and demand for stronger fields, form the 3 layers, can use Ph or Pb Gans, you'll see the light and a P structure. (3:22) Bismuth as a substitute for Pb, show spiral of elements. Keshe says this is exactly where the knowledge is wrong and puts your mind on the wrong track. If you work from Pl point of view, the strongest sits in the center. (3:24). The H is (?strongest) and then it goes down, because that's how Pl gets stronger and stronger, the heavier it gets the more it goes to ? settle. The visualization causes a lot of problems. I saw these tables as a student but I never agreed with it, because when I put

in the Pl I used the same kind of drawing in my teachings, we always go as the Pl increases in mass, it doesn't matter clockwise or anti. H is there, and it gets heavier with He (said wrong?). Now can see his annotations. The problem with this picture it gives you totally wrong idea about the Pl. (3:26). He draws it going out anti-clockwise, as you go out it gets lighter. The heaviest and strongest sits in the center that's why you call it Principle, as it interacts and reduces it goes out and gets weaker. (? here is how it should be ..) H should sit outside because it's the weakest. We have to re-draw these things. If you understand how it changes you can easily creates elements out of H. They think that if we add H to H we get He, in fact the fusion never happened in the Space. It's not correcting but it's adding to the knowledge from the Pl point of view instead of chemistry point of view. (3:29). Back to Bismuth, etc.. When you refine Lead Bismuth comes out. It has diamagnetic property, water also this property. Keshe says, you are showing something that has ? parallel in U, those who have gained the knowledge use it. In Space we have Pl environments that behave like this material, and the races that have developed the knowledge to a certain limit they use this to suspend themselves and move to anywhere in the U, without burning any fuel or using any M field, they use the property of their structure to suspend the field at a very high level of the U to move very freely from one place to another instantaneously. We have environments all over the Space, it depends which one you want to tune yourself into, that you can create motion and suspense and move from one to another, like a bullet to fly through. There are like 6 areas around in the Pl of our solar S that have these properties, you can feel it and know its there. (3:33). These are the fingerprints of the control of the Plasmas, our Solar S is suspended in it, like M satellites. I spoke of transportation tunnels, these things (areas or fields) give you the transportation tunnels. What Ali is explaining has bigger structure in the Space technology, That suspended metal (on the photo), is your craft. ... 4 microns were found in the material taken from Roswell. Bob Lazar was talking about SF. Shows some crafts from the secret bases. (3:40). Keshe says he don't like to go there (this UFO stuff). Element 115, Americium 243 is used in smoke detectors, we had a full flight unit in Belgium and the government confiscated these units because we had a flight system. This used in a specific condition and with Ca in a specific direction, gives you Space M field condition, these are used ?? Gans of Ca with it you achieve unconditional lift. We use Americium in reactors in Theran, the Space technology of Iran is beyond the understanding of human race. In Europe you can't touch it, only in London and have to keep all shipping documents in order. Now that it has been brought up I can discuss it. Now you understand how advanced we are they confiscated our resources 5 years ago. We used Americium and that's why we achieved lift in Theran. When you use it with a Gans of Ca, you need 21 cm containers to achieve lift on the single core condition, .. Americium 95 it's used in smoke detectors, that's why we use smoke detectors to purchase these units because it's the easy way to reduce the Space M field, levitation, MG positioning when you use it in different directions. (3:45). You cannot use this material unless you know, it's taken a lot of years to develop this, and secondly it has a lot of radiation, but if you use the Ca in a specific way in conjunction with Salt there is no radiation but there is the full effect, there is one of the Salts in the nature can be used for this. Now you understand why we used Americium 95 for years in the development of the Space lift and motion. It contains and creates Space level, deep space cosmic radiation of creating lift. Americium 95, Ca, and 1 natural salt, creates a Space MG field,

from the photo it creates a suspension. I brought you ahead about 2,000 years in Space development with just this piece. There are spaces in the U were you can get suspended and pulled in and out of, you need this material. Now that we work with the governments we have access to these freely. Now you understand how advanced Iranian Space Technology is because I brought Americium 95 to them, explained what it is and I developed it, we decide, and it has a very direct connection with the human body, with the E, it's for you to find out. When you place in a specific condition and in a specific way the system itself creates its own lift because it doesn't tune to your environment, but it tunes to the Space. (3:48). The 2 disks with the metal suspended btn, you become a copy of the others, you decide what strength you want to increase or reduce, and it can be done by this ?? person. So now you understand and it's a warning to national governments that we are approaching full deep Space technology, as scientists like Ali open the knowledge. ?? It only creates what it needs but where there is a shortage of electrons he talks about, it is replaced by the salt we add to it. It stays by reduction in the fields, by what I call the Space Salts, you decide if you are going faster or slower. The Iranians are beyond the others, but they still haven't understood why they use it and the way they use it. You use the natural elements but in the state of the Pl without actually changing the characteristics of the element, if you go on the bandwidth of Alpha radiation which this material creates, that radiation becomes your link it's not for ionization, in a vacuum condition just go and read it can travel up to ? 21 cm which allows you the link. A step further you can link that radiation into U M fields. (3:50). It will be working with Chinese Government for deep Space, the same is for the other governments who accept to go in the path of peace. The Belgium's accused us of carrying Alpha radiation, but they didn't confiscate it, they just didn't want us to show the flying car on 26th 2012. We will show full lift and you will not even understand how it is done. I am walking you in that direction, look at the composition of the materials you are using, add it up and you'll soon come to the priority of this material. ... you can't create this material but you can create its MG field effect, this shows it also has the property of the water. We always said that Oxygen in the environment of the liquid of the earth behaves as a M field. (3:53). It does because you have to look at the MG structure of it, actually why it can suspend everything in the liquid or put things in the liquid of the water, is because of this property of the O, it creates suspension, and that's why it's liquid state in conjunction with H, ?? H2O. He draws 2 H with larger O in middle and 2 together, why water is the most common liquid material, why it suspends everything, each of the H locks with O (looks like infinity loop), then he draws the 2 O looping with each other, then the 2 H do the same. A Nano structure behavior forms where all the loops intersect each other, and allows anything to fit into it, that's why water is part of the composite structure of the human body, because it allows other elements to suspend in this gap. Water in the body is not there to need ?? to observe it, it is there to create this N structure because don't forget the body is in a vacuum condition, which in the liquid creates a N structure, Pl Gans structure in that gap, which the other elements can place, position, and release their energy or absorb energy in MG field strength. (3:57). .. you can create reactors out of the water, back to using CH3, the H moves into the center, but as to the mass but stays in the Gans state of Pl, and you can see how it's created. ?? There is another material when you go above to a factor of 152 or 153 that gives you Universal Pl condition. If you understand it you can travel from U to U. It's beyond Man's imagination, but in time will

understand the teaching. Now you have seen the Pl condition of water the way it is, the water shows the same behavior, more or less the 115, then you go up by 105.3, at that level in being in the structure of the Solar System you can't reach that point, when you go into the Galaxy and beyond into the open space of the U, then that's the element you need to be able to create to travel across from U to U. (3:59). It's the structure you have to understand as a Pl condition and not as a matter condition. You keep on falling back into matter and I push you forward into Pl. One of the simplest ways to measure M G fields on Earth is to use the Gans of water. When you say they have found materials with properties like this, it's because this material in a given condition behaves (matter) in a Universal magnet, on the earth M field you have iron, which behaves that it can suspend off self or itself inside it, and if you look at hemoglobin iron it's a one suspender of iron on earth, 1 suspender of the liquid environment which leads to the creation of the red color of hemoglobin, because you have both H and O in AA in the Gans state. The friction of the M G field, ? gives the residual color of red because in that position the structure behaves in the Gans state, because now you have brought in another element which itself adds plus, just add what is hemoglobin, then add the power of iron (not atomic), what I taught you by factor of the Pl strength MG, its about 1.5, (1.6). (4:01). Then you have the same factor in respect to the Space travel, this element 1.5, it depends what material and what condition you bring it in, then you can travel into dimensions of the Universal, ?? ... when you see materials you don't understand it's used in certain ways, it shows the advancement of the knowledge of the people who use it, it means these are Universe travelers and not Galaxy travelers. They have learned how to travel across this U, because it's part of the MG fields of the Universal level, so you are just like a magnet in-between. We have shown how the little magnets find their gap btn each other, you become one of those, but you have to understand it, if you bring the amount for what it is. The Atomic Mass of Americium is 241.05, multiply this by 1.52, = 366.22, this is the element you have to look for to be able to reach the Universal magnetic field, and then you can travel very easily. (4;04). This element has a huge application to Space technology, but you have to know how to bring it in, how you negotiate with it. It gives you suspension with Space, for not loosing the elements you have to find the "space salt", there's plenty of that on earth to hold, then you change the space salt in conjunction with Ca, there is another way to do it, but you can support it much easier, the nuclear physicists understand this in the background. Go back to element 115, if you add K and salt you don't get isotopes, and get directly the material you need, Ca is 40.078, K is 39.095, Americium is ... add 95 + 39 then add salt to it. K 40 is radioactive, can release alpha radiation, in presence of salt you get 115, for space MF resonance (matching), then you fly in the Space without any fuel. (4:10). Like a monkey jumping from rope to rope, these are the ropes in the Space, you have to switch from one to another, and changes direction, time becomes zero time. At the moment there isn't enough knowledge to create this condition, but I have been using this as a nuclear physicists for a long time. You don't need to bombard nothing, you just create the environment that it opens up and then you reach. Go back to Bismuth (85), if you go the next step up you can fly, then you link inside, the internal Universal MG field. Hint, you are looking for 56 times 2, but you have 58 and 57 also, that is the back door entry, if you produce the Gans of Fe, and isotopes of Fe you can do the same. You have to bring a combination of it in, and then you understand. The reason they need bombarding, and unstable .. because they haven't

created an environment for it to behave, we are looking for the behavior not the Element, Plasmatic behavior, now maybe we have enlightened those who didn't know why we are using this material, as a radiation source, it was a way to create what we wanted. (4:13). In a vacuum condition it has a reach of 21 cm half-life distance of ionization we use because that was the only way people could understand. I explained in the teachings I used K added to the NaOH (potassium mixture in the caustic), when you Nano Coat these structures and put Americium inside it, in the environment you reach U Lift, that's how we achieved it so easily. You can use a small ration of any K (40 or). ... we bought a specific paint (he took to Iran) which has a metal component (which is banned now), it was used in children's rooms or schools to stick magnets on the paint. .. property field effects, that's why I said 56, 57, 58, is a composite material they use in paints, if you use with Americium you'll get what you are looking for. Keshe uses it heavily, one of the reactors, a blue one, he gave to a student had a grayish substance on it. In that process you can produce a conditions that the percentage of the usings the Americium itself will create what I call within the Galaxy, a U M field, you're suspended there and then you decide how ?? , what people are looking for I use as a radiation source, this isn't a magic show, but how you understand it intelligently. When we were going to show the flight on 26th November in Einhoven, the MG field was Americium, it would have flown where I wanted it to. Try to get and do a composition of it and you'll see how easily you get lift, shame on the nation of Belgium, disgrace to the nation and the blood of it. We would have been in Space a long time ago and not many people killed. Now I will show you this we can produce kilos of gold, let's break the bank. (4:17). The atomic structure of gold, 79, ... 196, look how easily you produce gold, take Americium, look at difference, you need 2 molecules of water, go to the rain within the water, create a Gans of water and you know how to use certain materials within the structure, you can change anything to gold, any material much more available to reach the structure of gold, in Iran we produced gold in the reactors, because inside these reactors was Americium, we just added air into the reactors, air carries water, H, carries its moisture. We changed the atomic radiation structure, ?? a little Americium, and the moisture in the field of itself creates gold. Understand what we did in Fukoshima, if you are a master of radiation, understand the structure of the Pl and you can produce any material in the Space as you need. (4:20). We took Mercury, if you add it in the presence of the Gans of CO2, in presence of LI, Tritium, you can't stop producing gold, the Japanese don't know what they are doing with the gold they are collecting, that's why they are pushing more with the radioactive materials and opening more power stations. The more Tritium they can collect the more gold they can produce. This is what was transferred to them as a knowledge and materials, you throw in Mercury and Gans of CO2, with all the Tritium in there you collect gold at the bottom. Anybody with nuclear power station that can produce Tritium, buy as much Mercury as you can. Now you understand you use Mercury when you want to refine Gold, in the presence of Mercury in its active condition with the Tritium in the water when you wash it, it releases the gold parameters, but now we release Gans of CO2 and CuO2 to make it easier. (4:22). More and more we'll go into the real Space technology by the time we reach China the peace will be forced. Understand how you interact fields and not how you make things. look at what the balance of the fields are, look what condition it gives you, what you can transfer across, in how you can produce conditions that will give you the materials you want, then when you achieve the material

in a Pl condition you transfer it to whatever you need. If you bring in Alpha, Gamma, beta, zinna ?? radiation and use in an orderly manner, these are energy sources you can develop or reduce something with them. Create conditions in your reactors, cores, and windings, I showed it to you today, how you put CO2, CuO2, CH3, AA, and look what MG fields they create and don't look at what matter you put in. Matter is irrelevant because once it's there it's what its Pl condition that operates and not it's matter state, and man has a gift that he has a matter state which he can manipulate, it's not so easy outside in Space where you have to absorb energy fields, MG fields. We start learning the new environment of the real Space travel, it has its own structure, language, ethos, and its own operation. (4:26). Understand, Manipulate, Bring in, and Add To. If you understood you should be able to produce gold from Fe. Iron is about 56 (with 25 or 26), Fe as a composite gives you 4 of it, 104, ... you created the moisture of water, which is 10, you're in 114, if you add the right amount of alpha radiation (mostly) and beta, you come to 115. But play it the other way around, bring the 56 time 4 (4 elements of it), you'll get 104, learn how to add and to subtract, what extracts and what gives to. You are looking for the binder, not the constructor, you need a binder, and the binder structure of any atomic structure, nuclear structure is the proton, that's why elements change according to proton or how many protons they have. Neutrons are plenty they are a spacer, filling up the space and cavities. That's why neutron is there to divide if something goes, it can add to, if electron falls out the neutron is there to fill up. Rewrite these tables according to MG fields and you'll see how easily you can produce any material, by combination of the others by field strength. (4:30). Go into the total understanding then you'll see the best tool given to man is the radiation, you're body works on it, without Cobalt, Cesium, (call it B12) in your body you don't operate. To make elements you Lymph glands use radiation to adjust for what you need. So why don't you do it, if you know the MG fields of anything, you can suspend yourself anywhere on Earth. But if you go to the next of field strength, Galaxy or Universal strength then you can suspend yourself in anything and travel one to another, but it takes you millions of years to understand this, what I just said in the last 5 minutes. Process as I taught in the private teachings by the factor of the elements of the energy of the Pl, what this means, we see Fe at 56, average 15% less which is roughly 50, (4:32). ... this is the Pl field of Fe about 50, so you go into the line of 50, these are the elements I can expect to receive energy from, so I can produce that material when I add to it or subtract in a given way through the Pl, fusion doesn't exist in the U. The ones who speak about it are ... can't be done. Start understanding, you can buy a smoke detector, then you can manipulate them in the right way as I explained to you and then you can create galaxies and universal systems for transportation, because now you create, ... if you have an Fe in you can match to it, then you can become magnetized, you can create the M field of any element, ... 82, 83 ... 208, 210 ... but in reality 115 is what you receive to travel within the galaxies, and if you want to travel btn U you multiply it by 1.5, if you multiply by its double it will not get you there, because you have to understand the fields within the U, it doesn't go that way. ... I have so much to teach because so much to know, but the man's intelligence isn't there yet. (4:37). Questions. (4:39). Renan ... they show their reactors, Keshe says get rid of the top 3 reactors, don't need, change the 3 double coils to single coils, because their Pl is big enough to dictate on its own, you don't get disturbances. You have got the new rings in center 12 and 6, so the coils would divert the energy out. Keshe draws which reactors to

take out, just need 3 cores on the base and one above, the extra cores are spreading the fields and causing reduction, you want to concentrate. Make a Sink on the top cores, when you put your hand in and said you could feel the energy from the H source coming up. You have to bring it up very rapidly so that when it hits it splits, goes back in. We need a sink, a pull, when it comes its so much that it cannot hold the G field of your 3 base ones then it pulls it and you get the circulation. Try to move away from the wall. That should give you a 2 to 3 diameter SS. (4:47). Read book 5 (design of the reactor) and 6 (the medical aspects), we might release book 7 in two parts, and Book 8 and 9 which is the creation of Soul. Book 8 is the origin of M fields, where they come from, how created. (4:54). They are making a graphic of the new reactor. The use of radioactive material is part of the backbone of creating materials and conditions, you have to learn it, you have no choice. You can use Cosmic radiation, we call it cosmic because we have not understood where they come from or strength, the terminology. Part of the cosmic radiation ... (interrupted). The Ghanaians have best chance to flight because they have access to radioactive materials without the complications. Keshe offers to go to Ghana to help them. (5:01). Flight with nuclear material is totally different then with non-nuclear Pl. In coming year all the teachings may be free. They stopped the English in-house teaching in classroom for students, someone turned up and complained. (5:17). They are working on the blueprint online. ....

STOPP SEE NEXT FILE

103rd Knowledge Seekers Workshop March 3rd

(:08). Keshe summarizes what has been achieved over the last 2 years, KF is growing beyond what they imagined and more rapidly, now we will bring in the governments to handle the demand. Will show the SS.
(:16). How to communicate in the Space, you can ask for a glass of water, what is a tree, etc. these are all Physicality's of the Man and life on this planet. In the Space we don't have this, we recognize E if it is the same as you, or in respect to your E what is the other side releasing. When we open this it is important for those who in the very near future will open the Space, at least you will know what to look for and how to communicate. We call this the blueprint of language, U communication. I teach more in depth in the background, but after yesterdays experience I thought it important to share the knowledge (and this knowledge), very rapidly with those who are developing this technology. Rick

was present during this development and I will let him tell. (:18). Rick is not very clear, only says that they are entering something very new dimension and not just getting free power. I guess he wants to say that they experience some Emotions through the reactors. (:23). What this person achieved, what we saw? There seemed to be an alteration of perceptions, feel the fields of other people more clearly, change in view point from Physicality to feeling fields. Vince is there anything you want to add because you were present. An increase in the communication btn the System and the people around, being able to walk around the different areas and "know" the person, to "see" the person's real E. The increase in sensitivity of the fields, multiple instance of instant communication , knowing the question before it's asked. Reading intention without speaking. Telepathy. Field effect rather then just the Physicality. We asked him to taste a banana, he was receiving the banana, receiving the taste and E connection. We tested it with water of banana, his words were the water is me, I am in the water. We tested a Sulphur gas. (:29). The same as putting the orange on top of the Cup, you had the taste and smell of Orange, now we are transferring this without the container of water, because 60% of body is water you don't need to drink more water, you can desire what you need and the tangibility of the energy needed ... ?? in the Space you get the desire for taste of orange, you don't carry food in Space. The real Space technology without all the Nano material and the rest of it, the whole purpose was to bring a new standard and new knowledge. Renan describes one person experience of levitation near the reactor. (:36). (:48). Talks about the Red Circle and a pedophile group in America. (:59). Asks them for where the graves of the children located. (1:06). Interpol is on to the Belgium's falsifying documents and attacks on scientists. He calls for scientists to contact KF and get protection for them and their technology (security.keshefoundation.org). (1:22). Question from Klaus. A map of German KF is huge number of groups. We have seen the German government move in the past few weeks, as more German's get involved. Their manufacturing companies growing, they tested at a 20% reduction in 2 months with Power Unit. This is not a free fuel it's a plasma increase. The German government support them 6 years ago. (1:31). Austrian Health and Food unit, compared as a tree. It's like a small room with 10 reactors on one side and some on the other side. (1:40). Only used CO2 Gans. He shows the helmet, you wear the helmet and go inside Health tree. (1:49). A case study of Health Tree. (1:55). Keshe says please remove the coils in the Tree and the helmet, on the same side as the paralysis, (you don't want the Pl energy on the paralysis side), when the hand and arm are involved, the reactors which are near the ear and go to the center of the head, the front and back has to be removed, you don't need coils in that area. He draws on the picture, only need the Pl reactors on the healthy side, he shows which coils to fill and remove. You allow the part of the neural system of the brain that has to do with the hand and arm to come into operation. You put a single coil on the opposite side to start a flow to repair brain, you need an opposite phase that the flow can go through. Empty the other cores because you want the brain to focus on fixing the hand. A question about just disconnecting the cores, no, once you N C them they are active, you must remove them from the helmet. (1:58). The problem is the spinal cord pressure on the brain, first you have to see if the hand opens up first, that's the target. The Epileptic seizures is because so much info is created, but the tumor sits on it, and those information's get released in one batch, so the body stops sending info. Once you reduce the size of the tumor the seizures stop, you have 2 choices, run these 1 and 2

(coils) and 4 for about a week to see if you get the hand moving. You have to find out the exact position of the tumor, if the hand doesn't move, you have to create a flow which is draining it, means you take from it, you only connect your G rings and not the M rings, on either side, what it means you only take energy from the cell which you don't want, the brain decides everything else is okay, where there is a difference which is a tumor, literary you empty it out. The only way you can do that is when you put 2 facing G rings in operation, G means taking, so you take energy from the cells of the tumor, then you end up with a tumor which is very ... just dissolved in the brain where it is, and then you'll be left with a center. For the center we change the composition of the Gans on the coils... ?? .. just because you made the body unit (Health Tree), doesn't mean you have to use the full body unit, the deformity of the body has to do with the pressure of the tumor on the brain. For this case you do not need a body unit, do not touch the body unit (? put her in it), because this is not what you are looking for. (2:01). Vivek has a question about how to put half a strength on the coil next to 2 and 3 in the helmet? You control when you build the system, control with your Pl batteries. In my system I use different size magnets of different strengths, you can't do this, here with the Pl you create Pl batteries, when you make them the number of turns decides the power of them, in most cases. Test your batteries see how it's double and how it is single, or use 4 batteries for the left and 2 for the right. Yes, there are different ways of controlling the power. You use 2 batteries for the #1 and 2, and on the #4 just use 1 battery, but it has to be the same kind of batteries you made in the same batch, the 4 batteries being stronger (left side 1 and 2) are trying to feed the weaker (#4 on the right side), creates a transfer flow of the Pl. (2:03). You can do it 2 ways, you can go for leaving all the helmets open (take off coils), but you have to see where the tumor is and target it, for the hand you need to use those 3 (# 1, 2, 3 coils), because even when the tumor goes that part of the brain is damaged, you have to rebuild the cells, this is very important, you have got to see the resistivity you have, bring the MRI up look at tumor, then decide which one effects it, you make a decision, you going to reduce the tumor or the building of the arm after the tumor is reduced, or before, once you start activating the arm the tumor gets activated itself. There are different ways of setting this thing up, but where the arm is (like a stroke) this is what you need to create. The twist in the posture will automatically go back up, do not use at this moment your Body Unit, you don't need it. FIND THE SOURCE of problem, not just clean up the side effects. It all has to do with the tumor in the brain, there are 2 ways to handle, 1) you can activate the arm which will force the reduction in the tumor. Or 2) decide where the tumor is and activate the coils above it. You have to target and not just a helmet for everything. (2:05). There is a specific way to use this helmet, and add a coil in a specific place and within minutes you can bring anybody out of Coma, even 10 years in Coma, within 24 hours I give you alive person. BUT you got to know what you are doing, just because you built it doesn't mean you have to use it. You see when you put it on your head (demonstration) it's no problem because there is no problem in your head, if it's needed the energy will be transferred. When you are dealing with tumors, epilepsy, understand the reason, spend an hour or 2 study the case the way it is in reality and not the way you want it to be because you want to use your own system. Decide which configuration you are using, understand the connection btn the different part of the body why it there and which section it's in, find out which elements of the P is connected to this part where it's at, then take the next step. This is a bad habit, I built it now I got to use

it. It's beautiful what you built but now be selective which coil to keep in or out, and if you are going to use a M or G ring. (2:07). For the brain the majority of the time you need G, if it's ?? you have to take away, if it's Epilepsy, when you see the body shaking and convulsions this has nothing to do with what goes on, this is the problem in medicine they only look at the end product and produce medicine for it. In fact Epilepsy is nothing but the switching on and off, the brain there is a pressure on it, the arms and legs want to move, the permission doesn't go to it, ?? you see it twisted, so that info is released in mass. Let me explain exactly how this case is, the tumor is sitting on the brain, most probably putting pressure on the hand and arm and its trying to get rid of this pressure, the pain, so it's producing a lot of info to send to the different organs of the body to create sedatives and send it to the right place so the pain is not there, but because the way a man sitting on a child, or a tumor sitting on the brain, ?? produced it finds a short cut, goes to a specific point of the brain, as the brain wants to release the info to correct the arm, the brain has a capacity of 1MB/sec of info to go through it, but 3 MB come, when it comes to .1 MB the switch comes up so the info goes, but the info from the brain is taxi designated to a specific point, (when you get a needle in your foot you don't shake your hand, because the info goes to the foot where it is), but when 1 MB info is released it has no characteristic so it goes anywhere it can go, so info comes for moving your foot and not your hand, the info has no base and everything moves, then you see the stupid shaking of the body, then it opens for the second time and releases another MB of info so now you see another shake of the body, and it opens for a third time to release the last of the 3 MB, then when no more info, shakes stop ... we call this Epilepsy. (2:10). So the cause of the shake is the tumor sitting on the hand and arms part of the brain, so the source of the info released for the Epilepsy is sitting at the seat of the tumor, and is for the arm, in a lot of pain, but the body is creating a sedative for it so you don't feel it, it has no where to go, it releases it and you see Epilepsy. It takes sometimes 2 days to build up to 3 MB to release, and this woman has an Epilepsy attack every 3 days, when it reaches a point it releases. Can we see an MRI, you don't have then you have no right to treat her. You must first know what the problem is. (2:12). They will scan in MRI before going further. There is a group in Holland selling P Pens but they are not correct. (2:14). The Health Tree stand is made perfectly. You have to decide which organ it is, if a cancer, if you are giving from M or taking from G. Keep the M and G separate, the double coils are of course together, but when you transport across keep separate. Keshe offers him to build one for the KF hospital. (2:19). Shows the MRI tumor on the right side, so set up like . (2:22). He draws where to put the coils. This looks very much like a mobile phone tumor. He draws the position of the coils, on these coils you keep the both together but don't connect the M, shows the connection of Pl batteries, use a Sink to shrink tumor. You don't want the Tumor to move. The first sign of treatment is less Epileptic attacks. As the tumor shrinks the brain wants to readjust can get head and muscle ache, this is good sign. Don't use anything else. Try for 2 weeks and we'll check in. These can't do any damage it's just a flow of Pl, you don't need it you don't take. (2:30). Ask a medical doctor to supervise you from the KF. Connect the 3 coils to M and to the Sink, then only the tumor gets drained, this is safest way because you don't create a flow to go anywhere, it takes a little longer but very effective. A question about using salt water as a sink, Bernie will explain. (2:33). Go back to Tree, if you have a Kidney problem just connect the one at that level and not the others, if Lung use the top 4 to line of diaphragm, have to

decide if a Cancer or just giving energy, if energy it has to be balanced btn all 4. The top 4 cores have to be connected to the same power supply according to the ratio, if your connecting the left to 2 (batteries) then the right to 1, which creates a gradient flow of energy. Have to decide if emptying or adding connect accordingly to M or G. You use it according to what is needed. (2:35). Get a doctor to work with you. Try to separate each coil and each ring, and make the panels detachable. The coils in the helmet are copper N C with CO2 and ZnO2 Gans. When you stand in these machines the desire to release yourself of the pain of the kidney will trigger only the coil going to the kidney. Today the man (earlier experience with Pl reactors) who desired banana tasted banana, we are coming to the same point, (2:40). when you desire only the kidney to receive you decide left or right, it's the E which will trigger the system. We have to gradually reach to this level of understanding. You don't need coating, you just need to create the E that this is where the pain is, the body knows the system knows, it flows to it and changes itself. (2:42). To Ghana, they had to leave for emergency meeting. Corrected water treatment results. (2:52). Water Treatment process. (3:28). Keshe says to try to see if you can wash the CO2 and CuO2 out of the residue so we can reuse it. (3:31). In time of disaster you can use Gans to clean, if you want to make the water drinkable, the CuO2 comes on the top to take out, CuO2 is a huge disinfectant. (3:33). Lakes in Russia with contamination and now we have a way to treat. In Fukoshima we used CuO2 to clean the water of radioactive materials. TEPCO in Japan didn't want it called CO2 so they called it "talcum lotion". In a Nuclear disasters CuO2 is the only solution which gives you sediment free, germ free, and radioactive free water. Keshe ask The Ghanaians to test the water for germs and bacteria's. Leave the CO2 out and test only with CuO2. These rivers are fully contaminated. Make a test by contaminating a sample of water with radioactive material. (3:38). (3:44). You have some old Cobalt radioactive waste from your hospital. If you find Mercury don't touch put sediments back in water, add CO2 and then measure the sediments. You should see a lot of gold, plus you convert the Mercury to gold, if you add CuO2 you'll see the gold come out. TEPCO is collecting 50 kg per tank. You might need CH3. The gold will become a national asset and subsidize your research. (3:47). (3:59). Results of agriculture tests seeds treated with CO2 for 5 hours before planting, germinate 2 weeks earlier, but harvest yield same as control. Keshe says if you N C the copper water pipes you'll also get a better harvest and use less water. You keep the CO2 in a separate water proof container and put in water, you don't need to continually change or add new CO2, seeds only need 20 minutes in water, plants require much less water. Belgium tests show 3 to 4 times more harvest, 1 /5th as much water, and harvest time shorten 30%. (4:05). Question from scientist trained in nuclear crop gene modification, and about using Nuclear energy to genetically modify seeds. Keshe says that the radiation treatment only gives the M. Use of Pl CO2 gives and takes both M and G and brings a new dimension into world of seed genetics. If CO2 doesn't work you can use CuO2 for more effective pressure, can also add CH3. It's not radiation pressure but MG pressure, and the seed will modify in the way it needs to do. The radiation forces its way in, but in Pl allow seed to find its own balance. (4:07). Radiation is adding energy to, but this way is Pl energy which is balanced and acceptable to the seed, and you get exactly how you wanted it to work at zero cost. If I want to increase beta-carotene 100 fold what to do? Play with the mixture of 3 or 4 Gans, until you get what you want. CuO2 has property of taking energy at certain levels, but if you add it with ZnO2 Gans, it allows the balance

within the seed structure, we know this from research. The problem with irradiation is we dislocate and put where we want, but this way is MG fields put it where you want it (intention) but it is in balance with it, so it's not genetically modified, it processes according to what you want with the MG fields. (4:10). Talks about KF in Ghana, KF should remain independent. Authorities want to go over the research again with other departments as witness. Benjamin to make large quantities of Gans for tests, make sure there is no salt content in Gans, or it will transfer its Pl condition to the seed, it can also be of benefit allowing the seed to extract moisture from the environment through the salt. (4:15). It acts as a water sink for the plant, and in some plants it works the other way around. Give both with salt and without. The plant is looking for moisture and it comes through the salt content in the DNA of the gene of the seed, if you have salt in the Gans it behaves as the Gans of Salt, it will bring the gene in to the state of being thirsty and instead of the drought killing it from outside, it calls for the water to come to it and it creates its own water, in some countries we have seen that effect, and in others due to the climate it doesn't seem to be responding, so test both. (4:17). Benjamin is going around to different sites, Keshe says to make a N C Cu pipe from outside and cover it with plastic, and let the water go through it very slowly, and feed plants all the time with this pipe. The plants will grow totally different because you are feeding through the water. Don't water everyday, schedule and control amount. Water shortage today is a big problem. You should see 70% reduction in water consumption, 5 times more foliage. (4:22). Shares his work on screen.

(4:30). Share the teaching of yesterday, the interaction of the E, and control for U communication. For most it will sound like nonsense. This is at the highest level, understand how we will communicate in Space. We are on the final stages of showing the Space Technology, and how to feed yourself. World wide Space Agencies who are secretly testing MaGrav systems this is why we are releasing this info, if you are ahead of us, one of the first things you need is to communicate with other life forms. You need this to be able to stop any conflict in Space, because your thoughts are read before you come, and Americans have the habit of pulling the gun before asking questions. This is the blueprint of Space Communication, language. We are about to produce SS without dimensions, the way upper atmospheres of planets are created, etc. The way we see the surface on the sun is created through the same process. Containment for holding to the Pl, up to now we produced Pl to release it effect, if you contain the Pl it will create its own surface, this is what this technology is about. Then you'll understand P tangibility, from now on when you do such a thing, you should understand how to control it. (4:36). And now we release the Pl for interaction of itself of the Pl to create tangibility. We have entered the true deep space travel without the need for food or water from the planet, because we can produce it through the fields of the source of the Pl of the reactor. In this process you open the door and the family greets you and you know how to greet, he already reads your mind. Understanding the characteristics of the E in the different parts of the brain. Up to now we only handled the P, now we know the core sits in the E part, and then your interaction of your E with the E of another creature, understanding the color and interactions of the E will give you the U language. Understanding the E in the different parts of the brain. (4:37). Before we only dealt with P part, now we know the core sits in the E part, interaction of your E with another's creatures E, understanding the color and interactions of the E will give you the indications of U language. This is what

today's teaching about. As it has been promised in all the Holy Books, by the Spring of this year we open the door of U to Man, and this is the first thing, when you are born you have no language, we don't understand you until you start saying Mama, Papa. etc. The language of the U is the Color of the True Thing of the E of Man, and that of the other creatures, that we only love and there is no war. ... (4:40). This teaching you will learn the way and structure of the U, we do not see arms and legs, but they are there to carry out the wishes of the E part. E have MG field Strengths, very much like Earth has its own MG field Strength and its interaction creates the color blue of this planet. (4:41). The interaction of the sun creates the golden color we see, but if we put the colors of the earth with that of the sun we see different colors, gold, red, blue, etc. The colors come from the interaction of the fields of the earth with those of the sun at a given angle. The same is with the interaction of man's E with other entities E. When the Earth fields interact with the sun it's white but we see the blue of the planet (its different). If there is a slight change in the angle, they're still the same fields but it creates a red sky. It's the same entity but a different position of the fields. In the Space we do the same if our color is of the same (?) we get a white color, no interaction, I love you, you love me, if the true love is there ... when the 2 fields are of the same strength they don't create any residue, it means we are of the same (soul ?). Anger has a different color in respect to joy, when you're happy your giving, same with other creature, what does it do, because it doesn't see any color, but because your E is happy and giving you know he is in the same condition too. This is the way we communicate in the U, there is no alphabet it's the interactions of different strengths of MG Plasmatic, this is how we start the teaching. We are getting the human race ready to understand how the rest the U works and communicates. One Planet, One Race. If you understand that we are one race in the U. (4:44). Keshe goes off line, plays a tape from yesterdays teaching, first time we have opened private teachings to public. (4:47). Keshe tells story of an African tribe when they greet someone, the chief is given milk, he spits it back on the face of the guest, everybody cheers that the chief has respected the guest so highly. Same with the E, the spectator watching if African he rejoices, if European get angry, may try to hide. etc. (4:51). He draws the fields in the brain. Can you separate E of fear from Joy, laughter. Fear is the one which brings control, it means I am going to hold onto it, it's the heaviest (G). Joy happy giving, is the outer field the M. Those that can feel the fear but don't show it, for beings without P can feel the fear but something else on top moving, the guy doesn't like it but he stills shows it's acceptable. He don't see but he feels your E. (4:53). The ones who have developed and separated their E will be the best ones for Space. They are aware of it and have some control over it. Like a blind person learning after falling many times. ... learn this and return to earth, pass a tree and feel it's energy, ?? I am sure it's going to eat me, I am going to be part of its energy and not there anymore, would you feel that energy? You have to understand in respect to you where that E comes from. Joy you like to fly, fear (inertia) stay on earth, the childish one I don't know what I like, he calls this the zone of ignorance. (4:56). If you can do this non-verbal communication will start appearing to you as second nature. If you stick to inertia then you play that game. (5:02). There is a few degrees temperature change during woman's cycle that 99% chance of having a girl. So by your E you can change body temperature. The E has found a verbal language for itself. So if we can measure that E of reproduction, what have we missed, Man's cycle of understanding of his E, also his own motion. By knowing about it

and controlling it in different positions in our body we can do it to produce lift in our body, can we produce an energy that we don't even need to walk. Walking just for pleasure. We know all the tricks of the life. (5:04). (5:08). Silly intellectuals come on and waste time. (5:22). Rick talks ... initiating ones will on moment to moment. (5:24). Italian speaks. (5:26). Keshe says the biggest radar is skin, skin of face shows E. Left side is G we take energy in. Receiving E through the Skin. Try to feel what it is so you can recognize it in the brain. Releasing energy and seeing what other people feel. Keep your face straight and send the message of I love you, which is the joy of giving and not expecting anything back. Se if they will raise their head and smile at you. (5:30). Last semester talked about moving things with your thoughts. Test sending feelings to someone or animal and see if they respond, this is how you are going to control your reactors. Now your antennae is your brain, now I want to go to that planet, etc. Man in space will be busy traveling. I don't teach you what the E is I leave it open to you, it's different btn all of you but you all feel the same. It's nice when I stay silent I listen to all of you. (5:37). What is anger to you, can be joy to the others, they laugh. (5:39). Mood rings that change colors with your change of mood. (5:42). Keshe interrupts the talk, I know where I want to take you, I am just trying to let you go there. You get standard signs from a water to measure what E you are having. we think, work with the Space technology, water is the attributes of Earth, our brain is not the water, it's a Gans state, we create a Cup of CO_2 and our brain is based on the CO_2 add a touch of ZnO_2 to it, it's a copy of your brain, we make this as a standard for people who go to space to understand their own E and say that this is a standard for being happy, this is the speed of rotation of the Gans in a cup, this is how you give energy and the Gans expands in the cup, if you get to this size it means you are very giving. Or in the space would they measure us in respect to that cup, when the man gets the Gans to this level it means he loves, so the language is this, so we create a Gans U MG field language. I am trying to teach you the language of U through the fields, the way the U operates. There is no A or B, it's the field strength which you understand and is understood. (5:45). We don't carry a dictionary, but a vocabulary of field strength of giving and taking, this why I teach about the layers in the brain of Man. Does your E which becomes like a Sun, when they see the Man they say look he is a giver, kind, he is in love with U. The way you give dictates the way you receive, I am giving so much but I don't need maybe he likes. You don't speak a word you give your E. Inside us as a race we feel fear for the End, and collectively what is about to happen, even though we don't see it, we feel it, we are emitting the sign collectively as a race, birds, etc., that we are receiving the fields, is increasing at a level that we know at a level we cannot sustain, so collectively we are radiating a field which in the U language is an SOS. We have the U beings on standby so when it comes we go in, but don't forget our seeing is coming. (5:48). Then we be so receptive that we see another race, is getting to a boiling point, that we do the same to help not the P, but to help to release the soul, or take the soul somewhere, it's just like a child, I am taking you somewhere safe, a U orphanage, this is where we are going, not for you to interact the same as before, right hand quarreling with the left. The whole purpose of bringing these E levels and layers, is what we always thought, the language of U, non-verbal, U works in interaction of the fields in all dimensions, which is a Gans. Now you see where we are going step by step, people are making the Lift by M positioning, you don't lift in the space, lifting is in respect to the Earth, traveling in the U it's like going across from

France to Germany. In the U same, you come across different languages, cultures, different entities, but does your entity change when you smile, everyone smiles, on Earth we know it means I am happy. (5:50). I you take 1 and give 4 it means you are a happy giver, I can't do anything because he gives so much he doesn't let me come close, but only he takes from these fields and gives only those fields, it means he's fooled ?? I have a little bit extra I give it to him because that field I don't need. I am walking you into a direction with your E, One to teach you U language, two in controlling (E) you can do the driving too, but where do you want to go with it. When you are driving your car you are also talking, smoking, etc, now in the space you have the same. One part of your E dictates where you go and the other side of E is to understand how to communicate. (5:52). Guy comes on about the Iranian New Year March 21, 2016, beginning of Spring, over thousands of years they have measured it to the second it comes into the Spring. It take 365 days 6 hours, etc. to complete 1 rotation, sometimes falls in middle of night, we stay up for it, we call it, means time of evolution to the next cycle, we start the celebration days before, we plant seeds that by 21 they grow to shoots, yesterday it started that we put the seeds out, we put out 7 items that start with the letter S. (5:54). Guy rambles, Matter state 80% of population, Nano State 5%, and Gans state 1%, Plasma state .001%, 700,000 of 7 billion people on Earth, to go there is to be beyond Plasma where you manipulate the Pl and that's how you become the pilot of the SS. The MG field is so powerful, (hidden) intention has to be just right. (5:57). By becoming aware of the colors of E related to MG fields in the brain is how we can control the Pl. The awareness is your intention where you want to go. The guy drops into his heart, being in that centered state, he's feeling and not thinking, connects to the Infinite field of Plasma, feeling the resonance becomes joyful, which is M. This is the key to controlling the Pl field regardless of anything else. The center of the Torsion field is the heart. (6:00). Keshe comes on says to guy you have a very big ?? I hope you can understand it. At the moment we have a digestive system which is there to convert the energy of matter to energy of body, we have lung which converts the energy of the gas level to what we need is a Pl conversion, which is a huge amount. We eat very little compared to the amount of energy we take through our lung, which breaths 18 times per minute (10 to 30 times). When you switch over to E, you loose your mouth, digestive S, lung, and no need for the heart, we don't pump any blood into brain only around it. Where goes the function of the heart, no need for heart, blood circulation. (the arrogant guy doesn't want to listen to Keshe), the other guy comes on and says that when he goes into that state the he doesn't drop into the P heart but ascends towards the soul level, btn E and soul, it's a higher field strength then the heart. (6:03). Keshe says what I am trying to say is that in Space our P structure will change beyond recognition of what we carry on this planet, if we become the passengers of a SS for a ?? time of hundred years when we come back, we will be aliens here, because we will have gone through the evolution of our understanding. We will have no need for a heart because we learn to absorb energy in a different way, because no eating no liver, kidney, intestine, etc. The structure of our brain will change. How do you see, feel, with the changes. When we take man to space we preplan our own evolution, because we know the evolution and change of our structure for flight will bring evolution, we ?? the RNA and DNA to evolve to survive, this time we have a choice, we are the decision makers, we ourselves are going to decide to create the evolution and revolution. The guy says, which is the pilot ... No! You are the forth

comers, the group that will decide if you understand what is on the table. (6:06). The evolution is decided by us because we know what is to come, and we decide how the human race in the space will look. It's the guy who came from the village and trained himself to be affluent, he's different then the monkey's who just look affluent. There are 20 of you in these teachings and the rest of the 7 billion is aware of what is to come, and if we hadn't spoken it today you could never imagine there is such a thing. I put everything to you step by step logically so you can see. You go into Space, learn U language, instead of food need to absorb energy directly to sustain P body to carry the E and soul. As you don't eat you don't need a mouth, you don't need lung, so P you are going to go through evolution. Man will change beyond recognition in the next say 100 years. when we go strong active so little brain can supply because now you will have no blood circulation, now you can transmit immediately so no need for nerve system, no cancer. How do you plan to change the structure of the human body to become true man of Space. tells story of lady at age of 5 wanted to become harpist, and in 15 years she managed to make herself tall, long fingers and arms, and different posture. (6:09). .. she evolved by her desire, every time I try to reach the last string my E tells me I need a longer arm so I put the energy into it so the arm can grow longer. In the next 20 years man will go beyond in evolution in a very rapid way. It's you who have got to decide the change. Once you do the E needed for the change to survive in Space will be perfect. Will transmit through your E to the rest of the human race. None of you are ready for it, BUT this is what's going to happen. ... the guy interrupts and talks about Caroline creating a Pl ball in her hands and put intention in center of it. (6:12). We are living in a vibratory system, E, light, Pl, everything. Where are we right now and how do we plan to get there? He says when I drop into my heart there are no thoughts, Left hand for men in M (tantric system), when you interact this field you create a Pl ball in the center, with intention collapse the wave ... instead of analyzing which color is which, asking the Pl, that's how you manipulate it, let the Pl answer, everything will collapse fear, etc. (6:15). He talks on. Keshe stops him, you have a rope to hang yourselves. I make the Pl to be my soul, and move my P to be inside the Pl, and whatever I need to will manifest myself in the P of the dimension I appear in. A lot of you missed this. The guy says, that's the intention .. no that's not, that is the only solution. Other guy, I would say it's more a willingness .. no, it's not, it's the fact of Reality. ... asks can you repeat the concept ... it's not a concept it's something you have to do in the Space. A lot of you see a lot of flying light balls, these are the entities that have managed to convert themselves to the Pl of themselves. The light you see flying is a Gans where the passenger is inside itself as part of it. I brought Caroline to show you how to create these Pl Balls, is how you bring your fingers together to open it that it becomes your new jacket, and what you emit from it becomes what you want to be, what you are prepared to give and take, you become the Sun, which you control through your E. (6:18). Is the Sun the reality of the Jacket of the entity, ?? in vacating human body the rest is part of it? If you can create and control this Pl it is like the clothes you cut and wear. We'll go to the next step, none of you chosen for this "round table" , we know the soul, hello friends we know each other a long time. Now we speak the language of the Man so he can do the whole thing, like a bunch of people in the Theater, now we have rehearsed enough now we show the show. We teach the evolution but Man has to put himself through it, to reach and become part of the U society. A step further ... We came out of the Light, manifested in P and now with

creating a ball of light, would we go back into it, or inside it with the full knowledge that we don't need anything else, but we can become P at any point we like. (6:20). Instead of sewing a shirt and trousers and putting ourselves in it, now we make a Pl that becomes part of us, part of inside it, then with what we emit and receive we find balance in the whole of creation. You need 2 hands to open your jacket, are we creating this Pl ball as a new home, that we can with a finger open and go inside it, that we become part of it through the E of what we give and take, ... we become like the Sun and Earth and find each others position. This is the true condition of the travel, and correctness and fairness. ... is there a humanoid in there? You are the humanoid. ... How much are you afraid of loosing the P as you know you are becoming the Light? (the man uses the excuse he is getting old ready for death so not afraid, {I say he completely doesn't understand because he conformed his whole life}), ... when you look at a cup of Gans and it has so many divisions that it makes the totality. How many beings are inside each cup, that they are looking at me from inside out, they laugh at me and are more mature then me. (6:24). Each individual Gans which has become a Pl a being with inside it. Scriptures say even a stone has a soul, but different level of soul. Our ignorance .. Pl collection of state appear to us to be there are a living entity, in fact, by going inside we find the truth about what is going on outside. Mohamed said the unity of being, not just a god but the totality of it. You are part of it, it's how you want to look at it. Christ said thy shall not steal, because when you become a light you cannot, you are a giver. If we read the message in the right way would we see the path to the U community, a hidden code for us but we are so P we didn't see the real code. We have gotten too P. Zoroaster said, think, speak, and act correct. What language do we talk when we are a Pl. The code of U language is in every religion but man has only taken its P part. (6:27). ... that guy comes on ... holographic .. (6:29). Are you saying in Space there are no rules except the love connection which is the Pl ... good morning! ... are we in the stage of maturity to accept the Totality, I am the Creator, but the created have to understand the essence of the Creator otherwise there is no purpose in existing and creating, I made Man in the image of Myself, I made you to make children that they may love me, which means I need to feed myself back, are the children the feedback on the little bits which you make and connect back to the G and create the essence of Creation and create more. You have to move away from P. (6:32). The guy says then we shouldn't make up any rules, Keshe says there are any except to give unconditional. When I said hello friends we haven't seen the soul for a long time, then I decide where that soul sits, because when a friend comes you decide where you want him to sit, the beauty of the ?? This knowledge needs a lot of openness to understand because I have put the teaching in a way that every step of it has to (be) understood, it's not in the past that I said and it has got to be, it's the way we understand we want to be, we decide how to be that collectively our want benefits the rest of the people, who are made the same way as us through the AA, through the condition of the conversion of the Pl is a star in this Galaxy, what we are came from the Sun and the Sun came from the Galaxy, which came from the star of U of creation itself, which came from the Creator. I made Man in the image of Myself. The whole understanding is how we can manipulate this ball that it becomes the new clothing for the Man. This time if he understands, he will know that all the stars shine the same, unconditionally what they give, ?? at the end they will dominate? Look at the Sun continuously radiating, but you don't listen to the other side of story, the same when we have 2 Pl what comes from the

Exit goes in the Entry, it's also ABSORBING! (6:35). It's not a one-way traffic, obeys the rest of the rules of creation. Does the Sun take the soul of the Man it comes and radiates out the soul of the Creator. ... we sacrifice our souls for it, where do you think the energy fields come from that go back into the Sun? Have you become so ignorant to it. What is good for one is good for the other, North pole of M going out South pole absorbing. What feeds the South pole of the Sun, this creature, if he has the full spectrum of the fields which in the reduction of field strength became the tangibility of the you, becomes detached at the field strength, would we sacrifice ourselves to become part of the creator ... to be radiated now that it is matured. Does the Sun only radiate what we think, or does it radiate the soul of the Man? ... or the created things in this planet, Solar System, that it creates back btn all. Is the maturity of the Man due to the maturity of the souls which leave it, and in the field strength get absorbed back into the Sun and radiates equally out? There is no difference btn the Macro and micro, they all work on the same principle. It's the intelligence of the Man who has to understand the truth. (6:38). Where are we going? Are we becoming the light which has lead itself by itself from inside that we elevate ourselves to become part of the structure, that we can travel to other dimensions to become part of that to be absorbed by the Sun of the U that we can shine as a Creator. that guy comes on again ... Keshe says that when you become the soul you don't have a mindset, your mind is set in one way just to give. United nations heading into building. Human beings are like the limbs of the body, when one limb is in pain the other limbs will feel the pain, if you are not aware of the other humans pain you don't deserve to be called a human being. (6:42). (6:47). Keshe comes back on, who wants to shine more has to give more, the problems for most humans in the next step to get to the final, is for the man to decide that this time around we are in charge of the evolution. Last time around we came from gases and AA without a choice we became what we are, in going back to the Pl of the Creation, this time we have a choice. Do we choose to steal and become suckers of teh energy of teh U or do we elevate ourselves that we have no need for P, a sun the shine uncondtionally to give, we know that we want to give the best that we can shine more. (6:49). The Sun shines all the time, but we forget that teh Pl receives from teh Entry, what does the Pl of our sun accept to enter it. Do we become the matter to become the most purified fields of unity that our wish as a soul is to be absorbed by our own Creator, which is the sun that we can shine and spread the love of the Creation across this Solar System and the same way with the Galaxies. For the first time understand teh essence of teh Creation through these teachings, or do we still get entangled with the P, the Gans etc, becasue we know the faster we can solve this problem the faster we have to enter the dimensoion of non-physicality as we won't eat we have no need for a heart and lung and we become an all shining star. (6:50).

KESHE Knowledge Seekers Workshops starting from 103
(These are all are complete transcripts of the workshops)

103rd Knowledge Seekers Workshop **March 3rd** (special teaching on emotion, 7 hours)

(:08). Keshe summarizes what has been achieved over the last 2 years, KF is growing beyond what they imagined and more rapidly, now we will bring in the governments to handle the demand. Will show the SS.
(:16). How to communicate in the Space, you can ask for a glass of water, what is a tree, etc. these are all Physicality's of the Man and life on this planet. In the Space we don't have this, we recognize E if it is the same as you, or in respect to your E what is the other side releasing. When we open this it is important for those who in the very near future will open the Space, at least you will know what to look for and how to communicate. We call this the blueprint of language, U communication. I teach more in depth in the background, but after yesterdays experience I thought it important to share the knowledge (and this knowledge), very rapidly with those who are developing this technology. Rick was present during this development and I will let him tell. (:18). Rick is not very clear, only says that they are entering something very new dimension and not just getting free power. I guess he wants to say that they experience some Emotions through the reactors. (:23). What this person achieved, what we saw? There seemed to be an alteration of perceptions, feel the fields of other people more clearly, change in view point from Physicality to feeling fields. Vince is there anything you want to add because you were present. An increase in the communication btn the System and the people around, being able to walk around the different areas and "know" the person, to "see" the person's real E. The increase in sensitivity of the fields, multiple instance of instant communication , knowing the question before it's asked. Reading intention without speaking. Telepathy. Field effect rather then just the Physicality. We asked him to taste a banana, he was receiving the banana, receiving the taste and E connection. We tested it with water of banana, his words were the water is me, I am in the water. We tested a Sulphur gas. (:29). The same as putting the orange on top of the Cup, you had the taste and smell of Orange, now we are transferring this without the container of water, because 60% of body is water you don't need to drink more water, you can desire what you need and the tangibility of the energy needed ... ?? in the Space you get the desire for taste of orange, you don't carry food in Space. The real Space technology without all the Nano material and the rest of it, the whole purpose was to bring a new standard and new knowledge. Renan describes one person experience of levitation near the reactor. (:36). (:48). Talks about the Red Circle and a pedophile group in America. (:59). Asks them for where the graves of the children located. (1:06). Interpol is on to the Belgium's falsifying documents and attacks on scientists. He calls for scientists to contact KF and get protection for them and their technology (security.keshefoundation.org). (1:22). Question from Klaus. A map of German KF is huge number of groups. We have seen the German government move in the past few weeks, as more German's get involved. Their manufacturing companies growing, they tested at a 20% reduction in 2 months with Power Unit. This is not a free fuel it's a plasma increase. The German government support them 6 years ago. (1:31). Austrian Health and Food unit, compared as a tree. It's like a small room with 10 reactors on one side and some on the other side. (1:40). Only used CO2 Gans. He shows the helmet, you wear the helmet and go inside Health tree. (1:49). A case study of Health Tree. (1:55). Keshe says please remove the coils in the Tree and the helmet, on the same side as the paralysis, (you don't want the Pl energy on the paralysis side), when the hand and arm are involved, the reactors which are near

the ear and go to the center of the head, the front and back has to be removed, you don't need coils in that area. He draws on the picture, only need the Pl reactors on the healthy side, he shows which coils to fill and remove. You allow the part of the neural system of the brain that has to do with the hand and arm to come into operation. You put a single coil on the opposite side to start a flow to repair brain, you need an opposite phase that the flow can go through. Empty the other cores because you want the brain to focus on fixing the hand. A question about just disconnecting the cores, no, once you N C them they are active, you must remove them from the helmet. (1:58). The problem is the spinal cord pressure on the brain, first you have to see if the hand opens up first, that's the target. The Epileptic seizures is because so much info is created, but the tumor sits on it, and those information's get released in one batch, so the body stops sending info. Once you reduce the size of the tumor the seizures stop, you have 2 choices, run these 1 and 2 (coils) and 4 for about a week to see if you get the hand moving. You have to find out the exact position of the tumor, if the hand doesn't move, you have to create a flow which is draining it, means you take from it, you only connect your G rings and not the M rings, on either side, what it means you only take energy from the cell which you don't want, the brain decides everything else is okay, where there is a difference which is a tumor, literary you empty it out. The only way you can do that is when you put 2 facing G rings in operation, G means taking, so you take energy from the cells of the tumor, then you end up with a tumor which is very ... just dissolved in the brain where it is, and then you'll be left with a center. For the center we change the composition of the Gans on the coils... ?? .. just because you made the body unit (Health Tree), doesn't mean you have to use the full body unit, the deformity of the body has to do with the pressure of the tumor on the brain. For this case you do not need a body unit, do not touch the body unit (? put her in it), because this is not what you are looking for. (2:01). Vivek has a question about how to put half a strength on the coil next to 2 and 3 in the helmet? You control when you build the system, control with your Pl batteries. In my system I use different size magnets of different strengths, you can't do this, here with the Pl you create Pl batteries, when you make them the number of turns decides the power of them, in most cases. Test your batteries see how it's double and how it is single, or use 4 batteries for the left and 2 for the right. Yes, there are different ways of controlling the power. You use 2 batteries for the #1 and 2, and on the #4 just use 1 battery, but it has to be the same kind of batteries you made in the same batch, the 4 batteries being stronger (left side 1 and 2) are trying to feed the weaker (#4 on the right side), creates a transfer flow of the Pl. (2:03). You can do it 2 ways, you can go for leaving all the helmets open (take off coils), but you have to see where the tumor is and target it, for the hand you need to use those 3 (# 1, 2, 3 coils), because even when the tumor goes that part of the brain is damaged, you have to rebuild the cells, this is very important, you have got to see the resistivity you have, bring the MRI up look at tumor, then decide which one effects it, you make a decision, you going to reduce the tumor or the building of the arm after the tumor is reduced, or before, once you start activating the arm the tumor gets activated itself. There are different ways of setting this thing up, but where the arm is (like a stroke) this is what you need to create. The twist in the posture will automatically go back up, do not use at this moment your Body Unit, you don't need it. FIND THE SOURCE of problem, not just clean up the side effects. It all has to do with the tumor in the brain, there are 2 ways to handle, 1) you can activate the arm which will force the reduction in the tumor. Or 2) decide where the

tumor is and activate the coils above it. You have to target and not just a helmet for everything. (2:05). There is a specific way to use this helmet, and add a coil in a specific place and within minutes you can bring anybody out of Coma, even 10 years in Coma, within 24 hours I give you alive person. BUT you got to know what you are doing, just because you built it doesn't mean you have to use it. You see when you put it on your head (demonstration) it's no problem because there is no problem in your head, if it's needed the energy will be transferred. When you are dealing with tumors, epilepsy, understand the reason, spend an hour or 2 study the case the way it is in reality and not the way you want it to be because you want to use your own system. Decide which configuration you are using, understand the connection btn the different part of the body why it there and which section it's in, find out which elements of the P is connected to this part where it's at, then take the next step. This is a bad habit, I built it now I got to use it. It's beautiful what you built but now be selective which coil to keep in or out, and if you are going to use a M or G ring. (2:07). For the brain the majority of the time you need G, if it's ?? you have to take away, if it's Epilepsy, when you see the body shaking and convulsions this has nothing to do with what goes on, this is the problem in medicine they only look at the end product and produce medicine for it. In fact Epilepsy is nothing but the switching on and off, the brain there is a pressure on it, the arms and legs want to move, the permission doesn't go to it, ?? you see it twisted, so that info is released in mass. Let me explain exactly how this case is, the tumor is sitting on the brain, most probably putting pressure on the hand and arm and its trying to get rid of this pressure, the pain, so it's producing a lot of info to send to the different organs of the body to create sedatives and send it to the right place so the pain is not there, but because the way a man sitting on a child, or a tumor sitting on the brain, ?? produced it finds a short cut, goes to a specific point of the brain, as the brain wants to release the info to correct the arm, the brain has a capacity of 1MB/sec of info to go through it, but 3 MB come, when it comes to .1 MB the switch comes up so the info goes, but the info from the brain is taxi designated to a specific point, (when you get a needle in your foot you don't shake your hand, because the info goes to the foot where it is), but when 1 MB info is released it has no characteristic so it goes anywhere it can go, so info comes for moving your foot and not your hand, the info has no base and everything moves, then you see the stupid shaking of the body, then it opens for the second time and releases another MB of info so now you see another shake of the body, and it opens for a third time to release the last of the 3 MB, then when no more info, shakes stop ... we call this Epilepsy. (2:10). So the cause of the shake is the tumor sitting on the hand and arms part of the brain, so the source of the info released for the Epilepsy is sitting at the seat of the tumor, and is for the arm, in a lot of pain, but the body is creating a sedative for it so you don't feel it, it has no where to go, it releases it and you see Epilepsy. It takes sometimes 2 days to build up to 3 MB to release, and this woman has an Epilepsy attack every 3 days, when it reaches a point it releases. Can we see an MRI, you don't have then you have no right to treat her. You must first know what the problem is. (2:12). They will scan in MRI before going further. There is a group in Holland selling P Pens but they are not correct. (2:14). The Health Tree stand is made perfectly. You have to decide which organ it is, if a cancer, if you are giving from M or taking from G. Keep the M and G separate, the double coils are of course together, but when you transport across keep separate. Keshe offers him to build one for the KF hospital. (2:19). Shows the MRI tumor on the right side, so set up

like . (2:22). He draws where to put the coils. This looks very much like a mobile phone tumor. He draws the position of the coils, on these coils you keep the both together but don't connect the M, shows the connection of Pl batteries, use a Sink to shrink tumor. You don't want the Tumor to move. The first sign of treatment is less Epileptic attacks. As the tumor shrinks the brain wants to readjust can get head and muscle ache, this is good sign. Don't use anything else. Try for 2 weeks and we'll check in. These can't do any damage it's just a flow of Pl, you don't need it you don't take. (2:30). Ask a medical doctor to supervise you from the KF. Connect the 3 coils to M and to the Sink, then only the tumor gets drained, this is safest way because you don't create a flow to go anywhere, it takes a little longer but very effective. A question about using salt water as a sink, Bernie will explain. (2:33). Go back to Tree, if you have a Kidney problem just connect the one at that level and not the others, if Lung use the top 4 to line of diaphragm, have to decide if a Cancer or just giving energy, if energy it has to be balanced btn all 4. The top 4 cores have to be connected to the same power supply according to the ratio, if your connecting the left to 2 (batteries) then the right to 1, which creates a gradient flow of energy. Have to decide if emptying or adding connect accordingly to M or G. You use it according to what is needed. (2:35). Get a doctor to work with you. Try to separate each coil and each ring, and make the panels detachable. The coils in the helmet are copper N C with CO2 and ZnO2 Gans. When you stand in these machines the desire to release yourself of the pain of the kidney will trigger only the coil going to the kidney. Today the man (earlier experience with Pl reactors) who desired banana tasted banana, we are coming to the same point, (2:40). when you desire only the kidney to receive you decide left or right, it's the E which will trigger the system. We have to gradually reach to this level of understanding. You don't need coating, you just need to create the E that this is where the pain is, the body knows the system knows, it flows to it and changes itself. (2:42). To Ghana, they had to leave for emergency meeting. Corrected water treatment results. (2:52). Water Treatment process. (3:28). Keshe says to try to see if you can wash the CO2 and CuO2 out of the residue so we can reuse it. (3:31). In time of disaster you can use Gans to clean, if you want to make the water drinkable, the CuO2 comes on the top to take out, CuO2 is a huge disinfectant. (3:33). Lakes in Russia with contamination and now we have a way to treat. In Fukoshima we used CuO2 to clean the water of radioactive materials. TEPCO in Japan didn't want it called CO2 so they called it "talcum lotion". In a Nuclear disasters CuO2 is the only solution which gives you sediment free, germ free, and radioactive free water. Keshe ask The Ghanaians to test the water for germs and bacteria's. Leave the CO2 out and test only with CuO2. These rivers are fully contaminated. Make a test by contaminating a sample of water with radioactive material. (3:38). (3:44). You have some old Cobalt radioactive waste from your hospital. If you find Mercury don't touch put sediments back in water, add CO2 and then measure the sediments. You should see a lot of gold, plus you convert the Mercury to gold, if you add CuO2 you'll see the gold come out. TEPCO is collecting 50 kg per tank. You might need CH3. The gold will become a national asset and subsidize your research. (3:47). (3:59). Results of agriculture tests seeds treated with CO2 for 5 hours before planting, germinate 2 weeks earlier, but harvest yield same as control. Keshe says if you N C the copper water pipes you'll also get a better harvest and use less water. You keep the CO2 in a separate water proof container and put in water, you don't need to continually change or add new CO2, seeds only need 20 minutes in water, plants require much less water.

Belgium tests show 3 to 4 times more harvest, 1 /5th as much water, and harvest time shorten 30%. (4:05). Question from scientist trained in nuclear crop gene modification, and about using Nuclear energy to genetically modify seeds. Keshe says that the radiation treatment only gives the M. Use of Pl CO2 gives and takes both M and G and brings a new dimension into world of seed genetics. If CO2 doesn't work you can use CuO2 for more effective pressure, can also add CH3. It's not radiation pressure but MG pressure, and the seed will modify in the way it needs to do. The radiation forces its way in, but in Pl allow seed to find its own balance. (4:07). Radiation is adding energy to, but this way is Pl energy which is balanced and acceptable to the seed, and you get exactly how you wanted it to work at zero cost. If I want to increase beta-carotene 100 fold what to do? Play with the mixture of 3 or 4 Gans, until you get what you want. CuO2 has property of taking energy at certain levels, but if you add it with ZnO2 Gans, it allows the balance within the seed structure, we know this from research. The problem with irradiation is we dislocate and put where we want, but this way is MG fields put it where you want it (intention) but it is in balance with it, so it's not genetically modified, it processes according to what you want with the MG fields. (4:10). Talks about KF in Ghana, KF should remain independent. Authorities want to go over the research again with other departments as witness. Benjamin to make large quantities of Gans for tests, make sure there is no salt content in Gans, or it will transfer its Pl condition to the seed, it can also be of benefit allowing the seed to extract moisture from the environment through the salt. (4:15). It acts as a water sink for the plant, and in some plants it works the other way around. Give both with salt and without. The plant is looking for moisture and it comes through the salt content in the DNA of the gene of the seed, if you have salt in the Gans it behaves as the Gans of Salt, it will bring the gene in to the state of being thirsty and instead of the drought killing it from outside, it calls for the water to come to it and it creates its own water, in some countries we have seen that effect, and in others due to the climate it doesn't seem to be responding, so test both. (4:17). Benjamin is going around to different sites, Keshe says to make a N C Cu pipe from outside and cover it with plastic, and let the water go through it very slowly, and feed plants all the time with this pipe. The plants will grow totally different because you are feeding through the water. Don't water everyday, schedule and control amount. Water shortage today is a big problem. You should see 70% reduction in water consumption, 5 times more foliage. (4:22). Shares his work on screen.

(4:30). Share the teaching of yesterday, the interaction of the E, and control for U communication. For most it will sound like nonsense. This is at the highest level, understand how we will communicate in Space. We are on the final stages of showing the Space Technology, and how to feed yourself. World wide Space Agencies who are secretly testing MaGrav systems this is why we are releasing this info, if you are ahead of us, one of the first things you need is to communicate with other life forms. You need this to be able to stop any conflict in Space, because your thoughts are read before you come, and Americans have the habit of pulling the gun before asking questions. This is the blueprint of Space Communication, language. We are about to produce SS without dimensions, the way upper atmospheres of planets are created, etc. The way we see the surface on the sun is created through the same process. Containment for holding to the Pl, up to now we produced Pl to release it effect, if you contain the Pl it will create its own surface, this is what this technology is about. Then you'll understand P tangibility, from

now on when you do such a thing, you should understand how to control it. (4:36). And now we release the Pl for interaction of itself of the Pl to create tangibility. We have entered the true deep space travel without the need for food or water from the planet, because we can produce it through the fields of the source of the Pl of the reactor. In this process you open the door and the family greets you and you know how to greet, he already reads your mind. Understanding the characteristics of the E in the different parts of the brain. Up to now we only handled the P, now we know the core sits in the E part, and then your interaction of your E with the E of another creature, understanding the color and interactions of the E will give you the U language. Understanding the E in the different parts of the brain. (4:37). Before we only dealt with P part, now we know the core sits in the E part, interaction of your E with another's creatures E, understanding the color and interactions of the E will give you the indications of U language. This is what today's teaching about. As it has been promised in all the Holy Books, by the Spring of this year we open the door of U to Man, and this is the first thing, when you are born you have no language, we don't understand you until you start saying Mama, Papa. etc. The language of the U is the Color of the True Thing of the E of Man, and that of the other creatures, that we only love and there is no war. ... (4:40). This teaching you will learn the way and structure of the U, we do not see arms and legs, but they are there to carry out the wishes of the E part. E have MG field Strengths, very much like Earth has its own MG field Strength and its interaction creates the color blue of this planet. (4:41). The interaction of the sun creates the golden color we see, but if we put the colors of the earth with that of the sun we see different colors, gold, red, blue, etc. The colors come from the interaction of the fields of the earth with those of the sun at a given angle. The same is with the interaction of man's E with other entities E. When the Earth fields interact with the sun it's white but we see the blue of the planet (its different). If there is a slight change in the angle, they're still the same fields but it creates a red sky. It's the same entity but a different position of the fields. In the Space we do the same if our color is of the same (?) we get a white color, no interaction, I love you, you love me, if the true love is there ... when the 2 fields are of the same strength they don't create any residue, it means we are of the same (soul ?). Anger has a different color in respect to joy, when you're happy your giving, same with other creature, what does it do, because it doesn't see any color, but because your E is happy and giving you know he is in the same condition too. This is the way we communicate in the U, there is no alphabet it's the interactions of different strengths of MG Plasmatic, this is how we start the teaching. We are getting the human race ready to understand how the rest the U works and communicates. One Planet, One Race. If you understand that we are one race in the U. (4:44). Keshe goes off line, plays a tape from yesterdays teaching, first time we have opened private teachings to public. (4:47). Keshe tells story of an African tribe when they greet someone, the chief is given milk, he spits it back on the face of the guest, everybody cheers that the chief has respected the guest so highly. Same with the E, the spectator watching if African he rejoices, if European get angry, may try to hide. etc. (4:51). He draws the fields in the brain. Can you separate E of fear from Joy, laughter. Fear is the one which brings control, it means I am going to hold onto it, it's the heaviest (G). Joy happy giving, is the outer field the M. Those that can feel the fear but don't show it, for beings without P can feel the fear but something else on top moving, the guy doesn't like it but he stills shows it's acceptable. He don't see but he feels your E. (4:53). The ones

who have developed and separated their E will be the best ones for Space. They are aware of it and have some control over it. Like a blind person learning after falling many times. ... learn this and return to earth, pass a tree and feel it's energy, ?? I am sure it's going to eat me, I am going to be part of its energy and not there anymore, would you feel that energy? You have to understand in respect to you where that E comes from. Joy you like to fly, fear (inertia) stay on earth, the childish one I don't know what I like, he calls this the zone of ignorance. (4:56). If you can do this non-verbal communication will start appearing to you as second nature. If you stick to inertia then you play that game. (5:02). There is a few degrees temperature change during woman's cycle that 99% chance of having a girl. So by your E you can change body temperature. The E has found a verbal language for itself. So if we can measure that E of reproduction, what have we missed, Man's cycle of understanding of his E, also his own motion. By knowing about it and controlling it in different positions in our body we can do it to produce lift in our body, can we produce an energy that we don't even need to walk. Walking just for pleasure. We know all the tricks of the life. (5:04). (5:08). Silly intellectuals come on and waste time. (5:22). Rick talks ... initiating ones will on moment to moment. (5:24). Italian speaks. (5:26). Keshe says the biggest radar is skin, skin of face shows E. Left side is G we take energy in. Receiving E through the Skin. Try to feel what it is so you can recognize it in the brain. Releasing energy and seeing what other people feel. Keep your face straight and send the message of I love you, which is the joy of giving and not expecting anything back. Se if they will raise their head and smile at you. (5:30). Last semester talked about moving things with your thoughts. Test sending feelings to someone or animal and see if they respond, this is how you are going to control your reactors. Now your antennae is your brain, now I want to go to that planet, etc. Man in space will be busy traveling. I don't teach you what the E is I leave it open to you, it's different btn all of you but you all feel the same. It's nice when I stay silent I listen to all of you. (5:37). What is anger to you, can be joy to the others, they laugh. (5:39). Mood rings that change colors with your change of mood. (5:42). Keshe interrupts the talk, I know where I want to take you, I am just trying to let you go there. You get standard signs from a water to measure what E you are having. we think, work with the Space technology, water is the attributes of Earth, our brain is not the water, it's a Gans state, we create a Cup of CO_2 and our brain is based on the CO_2 add a touch of ZnO_2 to it, it's a copy of your brain, we make this as a standard for people who go to space to understand their own E and say that this is a standard for being happy, this is the speed of rotation of the Gans in a cup, this is how you give energy and the Gans expands in the cup, if you get to this size it means you are very giving. Or in the space would they measure us in respect to that cup, when the man gets the Gans to this level it means he loves, so the language is this, so we create a Gans U MG field language. I am trying to teach you the language of U through the fields, the way the U operates. There is no A or B, it's the field strength which you understand and is understood. (5:45). We don't carry a dictionary, but a vocabulary of field strength of giving and taking, this why I teach about the layers in the brain of Man. Does your E which becomes like a Sun, when they see the Man they say look he is a giver, kind, he is in love with U. The way you give dictates the way you receive, I am giving so much but I don't need maybe he likes. You don't speak a word you give your E. Inside us as a race we feel fear for the End, and collectively what is about to happen, even though we don't see it, we feel it, we are emitting the sign

collectively as a race, birds, etc., that we are receiving the fields, is increasing at a level that we know at a level we cannot sustain, so collectively we are radiating a field which in the U language is an SOS. We have the U beings on standby so when it comes we go in, but don't forget our seeing is coming. (5:48). Then we be so receptive that we see another race, is getting to a boiling point, that we do the same to help not the P, but to help to release the soul, or take the soul somewhere, it's just like a child, I am taking you somewhere safe, a U orphanage, this is where we are going, not for you to interact the same as before, right hand quarreling with the left. The whole purpose of bringing these E levels and layers, is what we always thought, the language of U, non-verbal, U works in interaction of the fields in all dimensions, which is a Gans. Now you see where we are going step by step, people are making the Lift by M positioning, you don't lift in the space, lifting is in respect to the Earth, traveling in the U it's like going across from France to Germany. In the U same, you come across different languages, cultures, different entities, but does your entity change when you smile, everyone smiles, on Earth we know it means I am happy. (5:50). I you take 1 and give 4 it means you are a happy giver, I can't do anything because he gives so much he doesn't let me come close, but only he takes from these fields and gives only those fields, it means he's fooled ?? I have a little bit extra I give it to him because that field I don't need. I am walking you into a direction with your E, One to teach you U language, two in controlling (E) you can do the driving too, but where do you want to go with it. When you are driving your car you are also talking, smoking, etc, now in the space you have the same. One part of your E dictates where you go and the other side of E is to understand how to communicate. (5:52). Guy comes on about the Iranian New Year March 21, 2016, beginning of Spring, over thousands of years they have measured it to the second it comes into the Spring. It take 365 days 6 hours, etc. to complete 1 rotation, sometimes falls in middle of night, we stay up for it, we call it, means time of evolution to the next cycle, we start the celebration days before, we plant seeds that by 21 they grow to shoots, yesterday it started that we put the seeds out, we put out 7 items that start with the letter S. (5:54). Guy rambles, Matter state 80% of population, Nano State 5%, and Gans state 1%, Plasma state .001%, 700,000 of 7 billion people on Earth, to go there is to be beyond Plasma where you manipulate the Pl and that's how you become the pilot of the SS. The MG field is so powerful, (hidden) intention has to be just right. (5:57). By becoming aware of the colors of E related to MG fields in the brain is how we can control the Pl. The awareness is your intention where you want to go. The guy drops into his heart, being in that centered state, he's feeling and not thinking, connects to the Infinite field of Plasma, feeling the resonance becomes joyful, which is M. This is the key to controlling the Pl field regardless of anything else. The center of the Torsion field is the heart. (6:00). Keshe comes on says to guy you have a very big ?? I hope you can understand it. At the moment we have a digestive system which is there to convert the energy of matter to energy of body, we have lung which converts the energy of the gas level to what we need is a Pl conversion, which is a huge amount. We eat very little compared to the amount of energy we take through our lung, which breaths 18 times per minute (10 to 30 times). When you switch over to E, you loose your mouth, digestive S, lung, and no need for the heart, we don't pump any blood into brain only around it. Where goes the function of the heart, no need for heart, blood circulation. (the arrogant guy doesn't want to listen to Keshe), the other guy comes on and says that when he goes into that state the he doesn't

drop into the P heart but ascends towards the soul level, btn E and soul, it's a higher field strength then the heart. (6:03). Keshe says what I am trying to say is that in Space our P structure will change beyond recognition of what we carry on this planet, if we become the passengers of a SS for a ?? time of hundred years when we come back, we will be aliens here, because we will have gone through the evolution of our understanding. We will have no need for a heart because we learn to absorb energy in a different way, because no eating no liver, kidney, intestine, etc. The structure of our brain will change. How do you see, feel, with the changes. When we take man to space we preplan our own evolution, because we know the evolution and change of our structure for flight will bring evolution, we ?? the RNA and DNA to evolve to survive, this time we have a choice, we are the decision makers, we ourselves are going to decide to create the evolution and revolution. The guy says, which is the pilot ... No! You are the forth comers, the group that will decide if you understand what is on the table. (6:06). The evolution is decided by us because we know what is to come, and we decide how the human race in the space will look. It's the guy who came from the village and trained himself to be affluent, he's different then the monkey's who just look affluent. There are 20 of you in these teachings and the rest of the 7 billion is aware of what is to come, and if we hadn't spoken it today you could never imagine there is such a thing. I put everything to you step by step logically so you can see. You go into Space, learn U language, instead of food need to absorb energy directly to sustain P body to carry the E and soul. As you don't eat you don't need a mouth, you don't need lung, so P you are going to go through evolution. Man will change beyond recognition in the next say 100 years. when we go strong active so little brain can supply because now you will have no blood circulation, now you can transmit immediately so no need for nerve system, no cancer. How do you plan to change the structure of the human body to become true man of Space. tells story of lady at age of 5 wanted to become harpist, and in 15 years she managed to make herself tall, long fingers and arms, and different posture. (6:09). .. she evolved by her desire, every time I try to reach the last string my E tells me I need a longer arm so I put the energy into it so the arm can grow longer. In the next 20 years man will go beyond in evolution in a very rapid way. It's you who have got to decide the change. Once you do the E needed for the change to survive in Space will be perfect. Will transmit through your E to the rest of the human race. None of you are ready for it, BUT this is what's going to happen. ... the guy interrupts and talks about Caroline creating a Pl ball in her hands and put intention in center of it. (6:12). We are living in a vibratory system, E, light, Pl, everything. Where are we right now and how do we plan to get there? He says when I drop into my heart there are no thoughts, Left hand for men in M (tantric system), when you interact this field you create a Pl ball in the center, with intention collapse the wave ... instead of analyzing which color is which, asking the Pl, that's how you manipulate it, let the Pl answer, everything will collapse fear, etc. (6:15). He talks on. Keshe stops him, you have a rope to hang yourselves. I make the Pl to be my soul, and move my P to be inside the Pl, and whatever I need to will manifest myself in the P of the dimension I appear in. A lot of you missed this. The guy says, that's the intention .. no that's not, that is the only solution. Other guy, I would say it's more a willingness .. no, it's not, it's the fact of Reality. ... asks can you repeat the concept ... it's not a concept it's something you have to do in the Space. A lot of you see a lot of flying light balls, these are the entities that have managed to convert themselves to the Pl of

themselves. The light you see flying is a Gans where the passenger is inside itself as part of it. I brought Caroline to show you how to create these Pl Balls, is how you bring your fingers together to open it that it becomes your new jacket, and what you emit from it becomes what you want to be, what you are prepared to give and take, you become the Sun, which you control through your E. (6:18). Is the Sun the reality of the Jacket of the entity, ?? in vacating human body the rest is part of it? If you can create and control this Pl it is like the clothes you cut and wear. We'll go to the next step, none of you chosen for this "round table" , we know the soul, hello friends we know each other a long time. Now we speak the language of the Man so he can do the whole thing, like a bunch of people in the Theater, now we have rehearsed enough now we show the show. We teach the evolution but Man has to put himself through it, to reach and become part of the U society. A step further ... We came out of the Light, manifested in P and now with creating a ball of light, would we go back into it, or inside it with the full knowledge that we don't need anything else, but we can become P at any point we like. (6:20). Instead of sewing a shirt and trousers and putting ourselves in it, now we make a Pl that becomes part of us, part of inside it, then with what we emit and receive we find balance in the whole of creation. You need 2 hands to open your jacket, are we creating this Pl ball as a new home, that we can with a finger open and go inside it, that we become part of it through the E of what we give and take, ... we become like the Sun and Earth and find each others position. This is the true condition of the travel, and correctness and fairness. ... is there a humanoid in there? You are the humanoid. ... How much are you afraid of loosing the P as you know you are becoming the Light? (the man uses the excuse he is getting old ready for death so not afraid, {I say he completely doesn't understand because he conformed his whole life}), ... when you look at a cup of Gans and it has so many divisions that it makes the totality. How many beings are inside each cup, that they are looking at me from inside out, they laugh at me and are more mature then me. (6:24). Each individual Gans which has become a Pl a being with inside it. Scriptures say even a stone has a soul, but different level of soul. Our ignorance .. Pl collection of state appear to us to be there are a living entity, in fact, by going inside we find the truth about what is going on outside. Mohamed said the unity of being, not just a god but the totality of it. You are part of it, it's how you want to look at it. Christ said thy shall not steal, because when you become a light you cannot, you are a giver. If we read the message in the right way would we see the path to the U community, a hidden code for us but we are so P we didn't see the real code. We have gotten too P. Zoroaster said, think, speak, and act correct. What language do we talk when we are a Pl. The code of U language is in every religion but man has only taken its P part. (6:27). ... that guy comes on ... holographic .. (6:29). Are you saying in Space there are no rules except the love connection which is the Pl ... good morning! ... are we in the stage of maturity to accept the Totality, I am the Creator, but the created have to understand the essence of the Creator otherwise there is no purpose in existing and creating, I made Man in the image of Myself, I made you to make children that they may love me, which means I need to feed myself back, are the children the feedback on the little bits which you make and connect back to the G and create the essence of Creation and create more. You have to move away from P. (6:32). The guy says then we shouldn't make up any rules, Keshe says there are any except to give unconditional. When I said hello friends we haven't seen the soul for a long time, then I decide where that soul sits, because when a friend comes you decide where you

want him to sit, the beauty of the ?? This knowledge needs a lot of openness to understand because I have put the teaching in a way that every step of it has to (be) understood, it's not in the past that I said and it has got to be, it's the way we understand we want to be, we decide how to be that collectively our want benefits the rest of the people, who are made the same way as us through the AA, through the condition of the conversion of the Pl is a star in this Galaxy, what we are came from the Sun and the Sun came from the Galaxy, which came from the star of U of creation itself, which came from the Creator. I made Man in the image of Myself. The whole understanding is how we can manipulate this ball that it becomes the new clothing for the Man. This time if he understands, he will know that all the stars shine the same, unconditionally what they give, ?? at the end they will dominate? Look at the Sun continuously radiating, but you don't listen to the other side of story, the same when we have 2 Pl what comes from the Exit goes in the Entry, it's also ABSORBING! (6:35). It's not a one-way traffic, obeys the rest of the rules of creation. Does the Sun take the soul of the Man it comes and radiates out the soul of the Creator. ... we sacrifice our souls for it, where do you think the energy fields come from that go back into the Sun? Have you become so ignorant to it. What is good for one is good for the other, North pole of M going out South pole absorbing. What feeds the South pole of the Sun, this creature, if he has the full spectrum of the fields which in the reduction of field strength became the tangibility of the you, becomes detached at the field strength, would we sacrifice ourselves to become part of the creator ... to be radiated now that it is matured. Does the Sun only radiate what we think, or does it radiate the soul of the Man? ... or the created things in this planet, Solar System, that it creates back btn all. Is the maturity of the Man due to the maturity of the souls which leave it, and in the field strength get absorbed back into the Sun and radiates equally out? There is no difference btn the Macro and micro, they all work on the same principle. It's the intelligence of the Man who has to understand the truth. (6:38). Where are we going? Are we becoming the light which has lead itself by itself from inside that we elevate ourselves to become part of the structure, that we can travel to other dimensions to become part of that to be absorbed by the Sun of the U that we can shine as a Creator. that guy comes on again ... Keshe says that when you become the soul you don't have a mindset, your mind is set in one way just to give. United nations heading into building. Human beings are like the limbs of the body, when one limb is in pain the other limbs will feel the pain, if you are not aware of the other humans pain you don't deserve to be called a human being. (6:42). (6:47). Keshe comes back on, who wants to shine more has to give more, the problems for most humans in the next step to get to the final, is for the man to decide that this time around we are in charge of the evolution. Last time around we came from gases and AA without a choice we became what we are, in going back to the Pl of the Creation, this time we have a choice. Do we choose to steal and become suckers of the energy of the U or do we elevate ourselves that we have no need for P, a sun the shine unconditionally to give, we know that we want to give the best that we can shine more. (6:49). The Sun shines all the time, but we forget that the Pl receives from the Entry, what does the Pl of our sun accept to enter it. Do we become the matter to become the most purified fields of unity that our wish as a soul is to be absorbed by our own Creator, which is the sun that we can shine and spread the love of the Creation across this Solar System and the same way with the Galaxies. For the first time understand the essence of the Creation through these teachings, or do we still get

entangled with the P, the Gans etc, because we know the faster we can solve this problem the faster we have to enter the dimension of non-physicality as we won't eat we have no need for a heart and lung and we become an all shining star. (6:50). the guy and his holographic U comes on ... Keshe says the Totality of the soul becomes the creation. Add this to tomorrows workshop, those who understand this will be enlightened. By evolving we become part of the giving of the totality of the creation on this planet. Out of the stars which you see in the U are some of them the stars of the souls or are they stars of P of Pl which hopes to become the star of soul. (6:53). Have we matured enough to want to give unconditionally to become a star of the U, to dictate as a race our own destiny, to become the soul part of the star of U, or are we so materialistic that we want to remain matter state. I have to use the tricks of the brain strings, laugh or happiness that I can bring you in step by step to show how you communicate, receive, and how to change the direction. A matter star has to mature again to become a soul star, it's detachment to P. (6:56). You don't need a craft as you are the craft yourself. You are the soul but you don't see the essence of the truth your own created through the creation of the ??. (6:58). Part of the Afternoon Teaching. What is Plasma? Scientists have made a terminology complicated to show their cleverness, but they are the most stupid lot. They twist it so you can't see it so that they look to be clever. Look within yourself you'll find all the answers because you are the Pl. You radiate heat, energy, thoughts, you call it aura. There are machines that pick up the color of the aura, let's put it around our heads, forget about the body. You test it to see what color it gives for hate, see if the aura color goes purple, then hunger in your mind and see the color, can we color code our E. Create a machine to standardize E with colors. Then people couldn't hide their E. Can we reach a point that we become the machine and detect our own fields, and then we can see the fields of others, and if they interact with us, then if their field strength is the same as our field there should be no reaction, 2 field forces the same don't create any residue, this is how we will communicate in the space, field interactions. (7:02). The E in the head which creates the color. Does E contain the truth or create the truth? Do we need to have E to find the intention, from the intention we see the E, the truth is very near to each other. In the Space when we come across another entity we judge it by our own strength and not theirs, because if our intention is peaceful and loving and if their intention is the same there should be no magic show. It means we are at peace. If both our intentions are to eat each other then there is no field either, we radiate the same M and G energy. In the space there is no material except Pl, it's the intention and E. We judge the environment from within ourselves, and if it doesn't interact we know it isn't good for us because we see the interaction. (7:05). We become the aura or M field of your head, becomes your true love communication, I love you. We become the judge of ourselves, because intentions will be read before we act. If there is no color both have the same intention. Understand why we are teaching so fast, because now we open your eyes to the truth. If we start teaching the interaction of the Gans of the body of Man, we know exactly what it means. We have to start color coding our own strengths. if you are both thinking to eat each other and the other is a heavier mass you are gone. Speaking and teaching doesn't exist in the U, only a few backward races have schools, because they haven't learned the laws of the real U structure. We don't see armies, etc. The human race has not progressed in 3,000 years. (7:09). (7:12). the whole purpose of the teachings is to know your self and can communicate without speaking. The science of E. the process of the U order is to not eat

you but elevate your soul. (7:16). We could have gone with the waves instead we went against them, that's why everything looks as it does today. When the medicine doesn't work it's because you fight it. (7;19). Question about the Cup of life, it has many aspects of ourselves in it? ... when you want to change the P you have to change every single cell within the structure and its happy with the change. ... you make the energy available to the soul that this is my desire, if it fits the E will follow, ... the E has to fit into the P. Every feature of p has the role of guaranteeing the survival of you longer, nothing else. Your soul knows what it has, you give to the soul I would like to have blue eyes. When you change things the first thing the body does is what am I going to feel in the crowd. The soul is created before your E, and then comes P out of E, that it can handle it. If it was the other way around it would have been a big mess. ... everything has to be harmonious in the body, yes. (7:25). The animals are more mature then we are, when they don't have enough a certain number don't reproduce. He says the animals souls are higher then man. The E creates the body and it won't demand anything more then what it can handle. Pray for your Cups and give from your soul. (7:29). Man shows his coils wants to attain lift. First of all it too close to the wall, it has its own MG fields and is sucking everything in, make sure the environment in correct. The coils are tilted, the frame you put it on is matter state, you have to N coat it. The structure of a craft comes from the interaction of the fields and not the structure held together by matter, forced structure, see how you feel near them, put a camera on it and you'll see them move. He saw them shake which means the fields are active, by moving it releases the field. For lift the one that shakes is the one you have to add up for lift. Everything in the environment matters, vibrations from router and guitar, radiator got water flowing in it.

104th Knowledge Seekers Workshop March 10th (Entrance to USA, savings for nation, How to give to Plasma?, Universal feeding System the end of food, new bodies)

(:07). It's been 2 years since started. This week 4 new companies in USA have started. Talked with Kerry Cassidy Camelot interview. The fear of patent was for control, now a new way to share knowledge. (:14). We are all children of knowledge, and we are there to learn. The term of "Free Energy" was chosen by one man (pedophile), he used it to catch children, (he's caught). Two ladies are doing the same thing, Susan turned up at Foundation, with false hope claiming she can help children in Africa (Morocco). These people have did a lot of damage. She was asking for a picture of daughter. (:24). They have a software program that can break into mobile phone of child and get photo, then the criminals send that picture to you to threaten you. Protection is to put a small piece of aluminum foil with black tape in front of cameras on tablets,, laptops, and phones, front and back. The man in Utah got caught and the judge killed himself. The children are taken in Morocco, "false hope" is a Moroccan name. (:30). (:36). We support Kerry Cassidy as long as her site remains correct, we are monitoring it. (:44). MaGrav unit testimony Robert, from Utah has his utility bill on hand from November to February. Started from October Blueprint teachings, watching videos and finished his MaGrav in November, 2,400 kwh plus wood, in December down to 1,400 kwh and stopped using wood went fully on electric, and in January 839 kwh. Using a stacker unit. It means 60% reduction. Saving $2,400 per year. (:51) Keshe says we are in line with project, in USA

have double phase system, in Europe use single phase so 30% reduction, 3 phase 90%. (:54). Shows electric bills. (:58). America produces on average 11 million barrels per day of oil and imports 4 to 6 million, if your government wants to make savings for other activities, and if not for war. You saved $198 and 50% of that is cost of fuel the rest is profit and charge, the say the Savings is $100 per month, if 1 million Americans have units that $100 million per month, adds 1 billion per year to spend on goods for nation. In US you have 300 million houses, if in the next 5 years add 100 million houses then add 5 zeros to the figure 100 billion. The same in automobiles. The same with Health Care. KF technology will shift the nation in process of bankruptcy around, it's in black and white. (1:01). The Chinese have understood the result and embraced. Now 5 factories going into production. What about stop spending on the war machine. The oil industries are on the way out. We can't be ignored anymore. The oil producing countries are running to KF, because the $100 barrel has gone to $25. The revenue now will come by saving and you create jobs with it, this will directly boost the national economy. The candidate who supports Peace will get KF support, giving America a new chance to stand, and new jobs. (1:07). Peace for energy. Now you see the power of the technology. Keshe has a man he wants to put forward for presidential candidate on the basis of technology for peace. The empty Churches, no one need go hungry, etc. Keshe brokered peace plan with Iran on basis of job creation. Keshe has worked with the Chinese for 20 years their army is not a military force it is a nation force for the people, and he respects them, and give them full technology and even technology that he hasn't released. (1:15). We can show the power of technology, 4 assassination attempts from Red Circle. The German Chancellor gave Keshe 500 million backup to bring technology to Germany, but Red Circle stopped it. German engineering is the most perfect technology in the world. Now share it with the rest of world. (1:18). Support the 5 companies in the USA, we are strong enough to handle the Illuminati's, the Rothschild's, etc. We are doing what no other organization has done keeping these extreme groups out, we are working with KGB and CIA. Soon we will see the king of Belgium in custody especially with the capture in Utah. This is how Susan came into the KF, she claims to be an Iranian national, we are negotiating with Iranians to extradite her to Iran. (1:24). Rick looks for letter from Susan to post. Scientists should send allegations to KF. (1:28). Rick reads letter. (1:30). The man who received the letter came on and told what happened and how she tried to get a dog on the premises but Caroline refused. (1:34). Now we see the technology is paying off. We developed it together, carry on together and travel into Space together. Let us change Man to a peaceful man. We are developing a new food system, the U feeding system. (1:36). Keshe gives instructions how to setup Stackers for Universal Feeding system. Each Stacker has 3 layers, we put 3 Stackers in triangle position, then each of the 3 Stackers are again forming a triangle (9 Stackers). You can either add a 4th one to each to make a SF, or leave it as 3. Because of our mentality we had to put the 4th on top, but it doesn't have to be. The 4th can be anywhere, because all the system needs to do is reposition itself in respect to the 4th, you can move the 4th in any direction because it is always in touch with the System. AND the 4th is the brain, the body of the man, it is the existence of the True and it's in a way you. The system readjusts to positioning of the 4th but the energy doesn't change. So if you are at home with your system or in Washington or in Zurich you are still in connection with your system. (1:39). Let's say you use 4, in 3, 3, 3, 3 combination ... understand the 4th one is the interaction of and creation of own

free energy so you always get 4, but you have 4 times that, 4 times the stacker unit here (?), each combinations, and then they create a combination each one with each one, it covers the full spectrum of energy MG field from H to orange juice to Plutonium, Uranium and the amount you need, by setting up this structure you have created a copy of every Element which could be in energy level to man. Are there any mathematicians with us to give us a simulation of such a combination? Each Stacker of 3 in itself has 3 coils and each coil has a M and G. You have 2 coils in each set and each coil has its own ... 144 and 81 turns, every loop creates its own field strength, times 3 sets in 1 Stacker and 4 Stackers, and in each you have 4 FP units energy, the SF makes a FP, and on top of this 3 units of the same. Look at the multiplications of energy both G and M. Asks Mathematician to calculate for next week. You have all these multiplications of MG fields, that's why it covers the smell, the feeling, sensation, energy, everything, the minute your brain, you think of it, because it has a fingerprint on it, what the strength is, what that food gives you, to you its a food, a chip, but to your brain it analyze what it's going to give .. (1:44). There are salt, fats, all kinds of AA, sugar, etc. Your body breaks up the chip into every bit of whatever it can use. You haven't understood that even the smell gives a path of energy, the taste is an energy which you receive, and has a strength, through the chip in the mouth the brain receives a lot of energy in different forms. How much you are breathing through lungs, needs to balance the energy to the E side that it matches what is received by drinking and eating it. The brain wants a chip, it knows the amount of energies it receives through the chip. We showed on Tuesday that what you think about the chip shows ... that info shows how much which energy from which circle (which Stacker) it needs, because it's all available in your (U Feeding) System, that's why you taste and smell it. Don't forget the Gans you used in the system, CuO, CO2, etc. A MaGrav used as a U Feeding System which is the way we use in Space. By using our thoughts all the info is already embedded, you wanted the chip and this is what it gives me, you receive everything from your own system, that's how the system feeds you and why you feel you received it instantaneously, because it is with M field transfer, it doesn't need digestion. What Jackie said, I can think of banana and I receive banana, because in your memory bank of the inner structure of E and P when you say banana it means I need Ca. (1:47). You crave and you get milk, which means the E tells the P I need Ca, and these kind of fats to be able to run the parts which are needed, I am running short, that's why you crave for it. When you think of orange these are the energies the orange brings to the body. The minute it thinks the trigger lights come on in the field strength, it automatically connects with your cores (Stackers), and you receive it, the combination is so much everything is received, even the taste and order. Don't just accept all that said here, understand the science behind it, if you just remember it in an accident you forget, but if you understand you will never forget. When you understand it you see how pleasurable it is to become a part of it, because then as a layman you contribute more then a professor, because you look at it without prejudice. If you are going to Space you have to understand everything that is involved, because in the Space it's you and me and I can lie to you for 3 days, after 4th day I can't go anywhere else and you can read my mind. We clean the desk of all the mistakes of the past then we go to Space with no mistakes. This time we have everything we don't need to make mistakes. (1:49). When we put these technologies on the table, understand you are full blast in the Space technologies, because you saw the matter, then the Gans, now you see how it works, you have the

energy system that shows your bill reducing, now you trust there is something there I can work, and in trusting it you can feed yourself. You might say I wanted an orange but I didn't feel it so it didn't work. Maybe you wanted it to see if you are still in control but you received it. Now you have to test the U Feed System which is 12 different Stackers, will go on sale next week, you can do a collective unit with the neighbors, 5 to 7,000 Euro. You don't need to plug it in, just place it in the house. Later we can tell you how to use it as a power supply, medicine, etc. , because we are testing right now. You can buy a U Feeding System and test it for the rest of us to learn, we have to see how far we can go with it. (1:52). Jackie is testing it in his own house. Somebody refused to join the group and Keshe also refused to join. I have to stay until I se all through and then I know my way out. We met at "diner table", went through process of why some people see and others don't. We're going to put them in major hunger places, disaster points and everybody can eat from the same system. You receive the energy and don't go hungry and clean water through the system. We have 10 people from Innovation involved, and 35 students and 6 people makes 50 people. Once setup the system continues to take what it needs, but we are monitoring what the body gives back out, excrement and urination, at moment that's the only indication that the body is no longer taking matter food, and matter state air. We ask for the state of E and the residue (excrement). (1:56). We said you take 80% from environment, 20% from solid food, with this you take 100% percent from environment. We look to see if you stop going to toilet, then you understand that your body is transforming. If you do this you have a responsibility to yourself, once you start absorbing U energy your body will start mutating, what is not needed (organs) will not be used but it won't rot away, the body has a habit to hold on in case he might change (his mind, back to food), or the change is so rapid it might shut it down because I don't need it anymore. When you build or start using these units you can loose you P appetite, in that process because you are not eating but receiving all the energy you need, the body doesn't go into crisis, it finds a solution but it doesn't need. We have seen this in the body with Tonsils, or Appendix. As you body holds on to your intestines, liver, etc. but having no function, just runs in background with no use, but as nothing can come in and cause infection your MOUTH WILL SHUT, because you are not taking anything in, the moisture doesn't allow the closure and your voice will go, we will NOT SPEAK, because now that this position has arrived we will speak through the parents, to control which is our E, so we start communicating, seeing and feeling each other, understanding what the other says without a voice, we see the true face of the man, true E of the Man, you cannot say darling I love you when you have another mistress. (1:59). we become transparent, correct (behavior), and when we go further in the next 12 months you will loose your lung and use of your nostrils, because now the energy intake is from the environment gradually the whole thing will go in a way the E will follow the P and will go to the same energy level, you'll find that you don't need lungs to breath, so you might keep the body for some time the same as it is but you tap into the U energy or your feed structure system that it feeds you. In that process we become detached from matter state inertia, because when we eat matter we only offer ? through the matter and Gans. Earth has 2 attributes as fields one is MG field called G and M fields and one is created by the interaction of the Plasmas and the other is from a state of matter state which is the crust (of earth), so earth is a combined MG field, G of the Pl plus the ? inertia of matter state, so in us not using anymore matter state and we rely on the energy of the Pl of the Earth

we become independent of the matter, and we become part of the true Pl of the creation. Now in that position we become Man of the Space, because we have finished with the matter state, in the Holy Books they write it as detachment. (2:01). This is the beginning of the true process of detachment of P, from P life. We become man of the Space. For the first time MAN does NOT GO through the EVOLUTION! And because he has to, now we decide to live a correct life, not to eat another being, not to destroy another life we call apple or vegetables because they are all living things they all carry protein in it so they have a life. We don't eat a lamb or a ? ship because we decide, ... never thought why man is in such turmoil of anger, because our E hears and feels the E of the animal we ate and it does not accept the behavior of the P to do such a thing, now we don't consume the P and E come in balance, man becomes a peaceful creature of the U. Then in that position we open the door of Heaven to man. The day of Judgment is those who want to be abusers to ?? and stick to the P, and those who want to be correct they can take the path of U energy. This is what has been written in the Holy Books, the day of Judgment, you judge yourself, there is no god and no court. It is you who decide you enter the SS because you build that SS the way you made the SF. (2:03). You have to understand what you are getting involved in when you enter a SS Program. It is the decision of the man to dictate his own evolution and his own destiny, you become the judge of yourself. Do I want to stay as a man to abuse, still eat, and murder or do I become a man of peace that I am transparent. As we have done with KF technologies, everything is on the table, transparent. To be able to teach you we have to live the light. Because the followers of the prophets of the past follow the prophet, if he murdered they became murderers, that is what we see with the Jewish, because Moses killed so many to them it is normal. Mohammad did the same and we see his followers of the Christ, the same path of adultery we see what is happening in Christianity. This time there is no mistake, clear transparency, it's you who decide your evolution and your path into Space, this time you build the reactors, buy the system to become a man of correct conduct and man of the Space, when the time comes we show you how to take yourself into Space. When the Second Sun appears it doesn't matter anymore, because you carry the true essence of creation with you into space, and it's your decision to be there. (2:05). Understand the principle behind it. Every turn of the coils you made a decision yourself to open the door of the U to the Man yourself. I guided you like a Shepard into the slaughterhouse of the U open free life, the only thing you slaughter is the misconduct of the past. You want to live a correct life not to eat and consume anything else unless it is given to you as energy which is a field, then you come to understand that the correctness of the conduct is within the E of the Man, that the E dictates the behavior of the P. When we speak about the process of the change is for total humanity. This year give as a gift, a MaGrav Unit to others, it's a gift of life, without them knowing it will change their lives, because the fields within the system interacts with theirs when they receive what they want they loose their grief, sorrows because you elevate the E of Man to the level of joy. (2:07). From last week, if this is your main brain, fear is draw closer and happiness is drawn further out, so you reach to this level that is giving unconditionally, because you know you will receive that you have enough to give. Now you know how the teachings are coming together, there are no prophets, service stations, Churches, etc. in open space of the U. You are the judge of yourself according to the Ethos of understanding that you only take what you need and give when you don't have any need for what you have, but you find out that the

more you give the more you receive and find out the fantastic world of creation. And in time when a number of you come together of the same Ethos, the upper 3 layers of the skin created the Man, through the skin you make your own SS. And the more of you who joins in the understanding the bigger the ship becomes. And even this is a entering (beginners) stage, there is more to it afterwards, if you are knowledgeable and become just enough to become part of the true U Community which means you dictate the size of your own ship, what you want to eat, because you tap into the U fields and not into the ?? manmade systems. (2:09). But remember one thing, at the diner table I did not attend, so they started it, I was a late comer, ... I said to people you take what you like, they are all there eating what they wanted, they explained to us what they had was delicious, bla, bla. But this is the freedom of man, you give him the freedom he takes everything, and there is still something wrong with you (complains on you), but I said that there is one thing you have forgotten, I explained why I did not join you in your festivity of food in the classroom, because you forgot the biggest point, how can I eat when I don't give? How can I receive when I have put nothing into it, before you start eating and help yourself to it, you have to give ... take what I do not need, what I need enough to exist. And then the system takes what you want to give, and gives back to you because it knows what to give to feed you back. Instead of being in a hurry to eat, feed first before you eat. This is behavior of the mothers and parents, if you are a correct parent you always serve your children first and the you eat. It's the same, if you care for the U community, the environment you live in, you give first and you see you receive so much. The story of mother with 4 children she only had 4 eggs, she my children I have only 4 eggs and I gave you everything and enjoy it, and they say, no Mom, you can have half of ours and she actually ate 2 eggs and they a half. It's the story of the U, the more she the love they paid her back with Physicality. Think before next time you are pulled in by me, why is he giving it to us free, is he testing us or are we there to fail because of it. It's not for me but for you to judge yourself. I give you so much that you get drowned in the love of the Creator. (2:12). Jackie (French) tells about his system. He thought about food and felt it, then add E to system. His 6 friends had the same result as he did. Afterward he didn't eat for 2 days, and then 80% less food. (2:16). Then we tried on the group, the majority could see the food, smell it, enjoy it. Then only 2 people discovered we are taking and taking and not giving to the system. The system can give you anything if you can feed it. So the group spent the night to give to the system appreciation, love, they feed it a lot and now it is fully functional again. We are here to serve the people who need feeding from the system. It went from myself to 6 then to 37 people we made a group decision to start the process. We are ready to open the flow, the people can take what they want from it, but they need to understand what they are doing, because if you take you perhaps need to give something. (2:20). Keshe says we have started the process of making man into man of the Space. The 50 people are from across the world. You will understand one thing, because you built these units for the purpose of peace you will achieve peace. If everyone who buys or builds one and donates one we will very rapidly cover the whole planet, even the fish and lion and the rest. The only problem is that when we don't eat each other the way we have done, will our E create a balance, that the numbers reach a point, I am not eating you, there's no more room to live, do you mind you lot slowing down a bit (population expansion). the same with the other animals they will start accommodating each other because they don't (eat) each other. We have to find a way to live in peace on

this planet with each other. (2:23). This is not anymore dreams, this has become the reality, it's in our hands to change the future and evolution. I showed you the way to change energy to become free of energy, and I have shown you the way now, if you decide to leave this planet to prepare yourself for change of P, to become passenger of Space by becoming independent of the matter state of this planet. This is where our destiny is going. In the next few weeks you will see the first crafts, but it's no use getting into the crafts if you still carry the body of the man, with the matter attachment. We don't ask you to change, you stay the same but did you change when you wear the diving or space suits ... no we wear the U suit, but this time we don't need the camouflage of the suit it is us ourselves which decides what to do and what to put on. If you learn this process in a radical way you will find that your body will react to the environment you arrive in, according to the correct conduct. You become the citizens on any planet anywhere in the U. Now you go from star to star in every corner of this U. You were worried about the speed of light, the 37 people thought of chocolate or pizza they received it instantaneously. (2:25). This is the Zero time travel, essence of creation, where you want to be you will be instantaneously, just learn to receive, to be detached from the P of matter state, the U is yours. But be correct (conduct). You need no Kings or leaders, you don't need anyone to tell you are wrong or right because I can read your E, see your intention, if you always carry good intention you don't see any colors and you become transparent as the U. When you create colors which means you create problems or you want something to mark your territory and I decide if I want to be in that marking. I made man in image of myself, this is the first time man can see the true image of the Creator. Transparent. Mohammad said God has 100 names, 99 are written, the 100th is for him who reads it sincerely, and no one has found it yet. The 100th one is God Himself. (2:27). Rick reads from Libby about love after Tuesday. Keshe says please don't ask for something else, because people receive the fields from your essence of creation and when it's true it is received, and now that we know that we can't lie ..?? ... our teaching hasn't finished, it has just started to learn the language and conduct of U. We still make the N coating, reactors, coils , because we have to teach 7 billion to behave correct, and while we are making for them, there are trillions in the waters, seas and on the land, we still got to change their lives, to understand they don't need to kill each other. ... This is the knowledge of the Creator. (2:29). If you want to stay matter state you'll find every way to object or find excuse not to do, but so many people got fed up with the wars, the Chinese called it a happy room because they received the feeding and not the food. Now we feed the food of the soul of man, you can receive it if you know how to position this system. You can elevate your own souls with the same system if you understood all the teachings of the past. Questions. Robert asks about praying with your units, treat as child and bring them up, and get out what you put in. .. Keshe says someone put in 86 billion combinations (from before), I think there is much more then that, I usually make 4 to 600 million combinations for different diseases. (2:33). Not multiplication but it is an order of magnitude, then it will come to thousand time more, 1 trillion, trillion combinations. Can people with Pacemakers use the system, yes the Cup of Life is you. The Tuesday teaching was the backbone of Space technology. Understand how things systematically connects, if you have a pacemaker that is your heart, maybe if you are in the vicinity of this system and the conduct and everything is correct you might not even need the pacemaker, in time to come. We had given a cancer unit to a man with

recurrent cancer, and he returned it, maybe he doesn't want to live, because he said to the nurse that when he uses it he has no pain, maybe he decided I want to give the life to another stage, it is us who decide. Maybe if the man with cancer wants to go to Space the cancer provides a lot of energy because it has to give. Maybe man comes to technology out of fear of dying, he goes to space, then he has a bigger problem, now you live for thousands of years. (2:37). Once we take the food connection from the man and he finds peace within his P and E, now what is to kill, nothing, you become immortal. You wanted 200 years I am giving you 10 million years, then it is you who decides I want to give up I have had enough, or I want to stay in. The Cup of Life and Immortality is within you. You are the Cup, if you don't understand it go put the Gans on it and put an orange on it and taste the water, and you feel the taste and energy of orange. You yourself are 80% water so why do you need anything else put the orange on top of your head and you absorb, if your E is correct you receive it without eating it. But now we have made a supermarket of energies with these Stacker Units (U Feeding Unit), then in future you'll understand when I teach you further that you can tap into the "U Supermarket", this way when you learn not to consume energy, when you see something else (a being) you don't look at it as if it is edible. It's not a sheep or cow, it's a life, an existence and it has to be respected, when you meet (another creature), do you have any surplus energy for me, I am short of vitamin K and D, he asks do you have some shortage for me, I am looking for #$@, but your field fits into my $#@ my planet #@$ is what I need, you give him $#@ and he gives you vitamin K and D, and say good bye. (2:39). We are coming very fast to this point, does a king have more right then a layman to treat because they have everything they want, then kingship is over. We are all the King of this planet because we care for it. We gave you everything for all to be the kings. (2:40). Klaus from Austria shows his new innovation with helmet showed last week, portable units to plug in and out with cone connectors to make the system more modular. (2:43). Keshe shows how to make the coils to rotate so you can target a specific part of brain, pinpoint an area instead of a broad region. Try to make the coils so you can control the MG fields of the Pl on each separate M and G coil, that you can increase or decrease depending on what you are trying to do. If you want to pull a cancer out increase the G, if you want to feed or build a destroyed cell then you can increase the M and decrease G. Try to refine your system more, you need 8 plugs instead of 4 on helmet. (2:46). The body immediately knows if it is giving or receiving. He wants this to go into manufacturing. When back from China we might open one of the biggest Space centers in the Middle East. I taught you the N and Gans materials so you have enough energy in your life, the cores and gas cores which we did with Iranian government, further was the Gans Cores, then to the Coils and use and interaction of the coils and from here we can go into feeding and into Space, so whatever you like there is something you can attach yourself to, to be, but then you decide what to be, I know not many people will go for what was just put on the table at the moment. (2:49). A lot of people who want to leave but don't want to loose their attachments to their loved ones, when the cancer is imminent and not much time left they will choose the option of Space Feeding. Man will accept it not out of its beauty but fear for his own life. (2:54). Acupuncturist asking about Health Pads with Pacemakers, Keshe says you can use the MaGrav systems but not the Patches (it seems also not Gans), unclear about the Cup of Life, for people with Pacemakers bring the system close to the heart to test if they feel it effecting them, so if you bring the patch hear the heart and it starts to race then you

know you interfered, so stay out of it. She asked about The Cup, if it is only Nano, yes but if the water happens to have salt in it, it can create a Gans unknowingly. Keshe says you can just put a water bottle inside the Cup and then they drink it and you can put it back in again, that way you can use one Cup for many people, they bring there own bottle. She asks how long to charge the water, he says you are not charging , you're transferring Pl. From teaching today the minute they thought of ice cream they had the ice cream. (2:57). Question, what can we give our MaGrav S to help it evolve the way it wants to, rather then what we expect from it. We answered that earlier, before you start taking from it, give to it what you don't need, this part we never discussed, it you give you receive, you understand you give and then the system gives what you need, because when you give to the system it sees what you need, you receive what it is not short of, you receive it because it is there. You GIVE and then you receive. You don't take, go to the table and say there it is. It's not on the table if you don't bring something for the others to share. And this is where the change is, where the difference will come. (2:59). The System will change according to what you want because you are the creator of it. An Iranian student came on to say thanks and he is proud to have Keshe as his master and teacher, in Parsee language. (3:03). ... At time of making Gans he used a frequency from guitar tuner, the purpose for Gans was for health and helping others, his Pain pen is very strong and has an effect, he got an ice cold feeling for knee problem, did I make an infinity loop on the Gans? Almost what you probably done is you connected the Gans to the matter state, this is something which we as human beings receive as music, why we are attached to music and we all love it, doesn't matter what it is, because we eat food to connect with our P, breath air because it connects to our feeling of E, sound and music is another structure which is non-tangible and it connects to our Pl, that's why we all enjoy music, its another way receiving energy. You have done exactly that what we do with the body, you transferred the matter state which is the noise of it into the Pl of the man, that's why it worked that way, it's another level of the noise (music) vibration, it doesn't matter how we create it, because it cannot be eaten or breed in, but it still has a strength it gets attached to or used by the Gans by ?? outer man. (3:06). This is part of the energy absorption of our body, music is a feed because it's a matter state vibration of the element to the Pl condition when it converts back in, but because it's in the strength of a Pl itself because it has no matter strength it goes to us directly, we receive it in our Gans state very quickly. When I spoke about Alzheimer's is because we understand this, why music or vibration is so important, we ask them to sing a tune, if they can do it means they are still connected to the creation of their P, without them knowing we open the channel. It's like if you eat banana are you allergic to it, we say yes or no, if you breath the air with a little moisture you cough, music is the same thing, but it's a food, an energy transfer for the body of the man which still touches the same as the food you eat, banana because you remember the taste of the banana what you need from it, this is why we go for a specific music in a specific structure of the E, if you are happy you go for a certain thing (music), then we see the cultures go the same way. The culture according to the music states the condition of their E. We see with the Youth how the culture across the world is becoming one. The new generation is already first to become one planet people, because they share all the same music. But music is more effective direct energy to the Gans then is the food or air. You have transferred part of the P with the Gans you used on your P Pen which it directly receives ??, it depends what that music does to you when you tuned it. (3:09). Do

you find happiness or do you give forgiveness, or find pleasure with it. Understand what that tuning has to do with your P, because you have a Gans on your Cu wire which is in a layer you don't see because you think it's only N material, so you have created that condition, according to what that condition gives you the E, repeat the vibration you had in your tuner and then change it to a music and see what that music gives you, whatever feeling you had on your leg is from that music. The connection btn the music and the Gans state of matter we never speak about because it's very delicate, because you can use it to add, you don't change but you add to it. Some of the viruses in the U come in the form of music, noise, and these are extremely hard to release, there are no noise viruses on this planet but you come across it in Space, which is they add energy exactly like virus to the Gans of the AA, and then finding it is almost impossible (God's help), because it's undetectable, and then you have to find the level of noise, and find in what way has it attached itself to it. There is a way you can reverse it, but it requires a special technique, you got to do it within yourself, you have to find out where it has come from, where it sits, these noises then they go into your body, and it's horrendous if it's not done (correctly), because you absorb it in a way which is already digested form. It's one of the biggest problems in Space. (3:11). The Space virus is worst for any creature in Space. (3:13). The Cups can be used for addiction. They are good for addiction to medicine, when you decide you don't want the body will find a parallel system for it. It's you who really want to do it through your E part. They are doing work with doctors in Plasma Centers. In Dubai we had to reduce numbers for security, moved to an undisclosed hotel. They discovered that the Red Circle has planned funny things for conference. (3:17). Bret is working in background with KF securities. The highest level of security.

105th Knowledge Seekers Workshop March 17th (Chinese Military to get technology, U Feeding Machine and change of organs, Messiah, Lead Gans, Alcohol and Cirrhosis of Liver, ILS)

(:12). Keshe talks about action against pedophile, one man indicted, and the ladies who have been attacking the KF. We won't speak about these cases because in court case now. (:20). The Chinese will show technology to their government. (:24). It is us who decide the level of change, part of it will be forced on us due to absorption of the change, and part due to wanting to be free from all the attachments. How we decide the evolution in the part that is in our hands, but we have already agreed part to start with, this means it's us who decide to what extent we want to evolve. Looking at the plants the evolution is very direct, they decided they want to be free that every bird or insect that comes across me will take my flower somewhere else that I can produce and reproduce. Some plants decided to have a thorn that certain size animals can't come in, some to open flower in different shape, other to feed themselves with it. (:26). The evolution has not been open to man, we have been evolving mainly according to structure of environment or conditions forced into, man has never realized until now he can decide his own genetic melt, he can decide his own evolution. The new technology is putting it into his hands and this is scaring a lot of you, that's because you have lost trust in yourself that you can decide what the evolutions going to be. You can decide how much you want to be attached or detached or how much I am going to lose that you adjust your systems in

respect to interaction with your environment, how much you want to change, what kind of environment, then accordingly your body will evolve. For the first time we are moving just a little bit toward the level of the plants, the vertical people. You can see how far behind you are even though they think they are the king of the animals. They may be in respect to "horizontal people", but to creations of this planet you are far, far behind. (:28). We have not managed to decide ?? our eyes, nor the height we want to be, or what shape we want to appear, fat, slim, twisted, but the plant kingdom has already achieved that. They decide the shape of their petals, color, height etc. and what they take from the environment in respect to what they are shaped. Scientists have not understood this, man's lack of knowledge has given him a false safety that he is the best, and he knows everything. The fish decide what color they are going to be, how deep they can go with mask, what temperature they operate in. As humans we don't have such a say, we just go because the environment dictates. We have not manage to take control of our evolution, we have adjusted to the environment we arrived (in). The choice is how much of the animal behavior are you prepared to give up to become part of the U Community. How far are we prepared to lose our upper respiratory system, now that we know that by thinking of the food we receive its energy. The ability to decide on evolution brings a lot of responsibility, it brings a condition how much to what level you want to give up or have the same capability. (:31). I am giving up my intestine, liver, etc. now I would like to have something else that makes it easier to absorb more energy where I need it, I will give as much as I want. It's not an all one way system, you get a chance to create a condition for the generation of new organs, new pieces that can help you in the Space. Some races in the Space have developed an understanding of technology that they can evolve according to the energy storage they need to carry, which means would we change our liver to a new Gans storage battery, that's all we need to do, the spectrum of energies we need to store, but we cannot use the P matter like liver, we only can use the energy Gans structure of the system. Will we evolve to a point we can create out of our liver a Pl condition that allows us to operate with a new storage facilities. Or would the storage facility be like a sphere in a way that stores a spectrum for us. These are all the possibilities. (:33). Part of the evolution of our body will be enforced on us by he amount of energies and the way we absorb energy. Would some of us lose our bone structure because in becoming transparent and knowing that we don't need to walk, we can decide our own position, is bone necessary in Space because no land to walk on, and now we learn a new process. All this will happen in the next 12 months the way it's going we will see evolution and because it's on the Pl level it will be very rapid, extremely rapid. We have no choice, it's the decision we made, and what we have seen with ILS and MS, people will change the same way. In the teaching from now on we will show you the process of evolution and being able to control it. (:35). In being able to interact and force the condition we want it to be for our own existence. Do we want to go to the limit of losing without controlling, or hold on to most of the things we have, but we control the change that we feel safe with. How do you control it and exert forces to change you where you want it? It's easy, when you start the process in controlling energy, you do so both consciously and unconsciously decide which and what is needed in part of organs you think you may not be in need of. In many ways it will go beautifully, the first generation of conversion they decide to hold on to some parts in case we go back, or I don't like it, like a part time insurance policy. (:37). I want to hold onto the intestine until

I am happy I can fit into the Space community, do I understand the languages. When you decide to make change and be instrumental, Oh, I can see parallel and others who live their lives of which I am afraid of living. What if I loose this but keep it in the background, then in interacting we find out that, we have been afraid of nothing, a phantom. Do i need to catch, or bring something to my mouth to eat or do I absorb what I need the way I need it, but I still want to know that I am eating, I don't trust my E yet, this was stated very clearly by Alex on Tuesday, he touches anything he tastes it and gets the energy, so he gets the confirmation that he is getting the energy from what he is touching. But Jackie has gone a step further, he trusts in what he sees, receives it if he wants to. ... the answer was in what was not said, I asked them if they lost weight and yes a little, but none said they got fat, they have access to full U energy so why don't they balloon up. (:40). These guys have access to a full pot of energy and have whatever they like, 20 bananas etc., BUT no they lost weight. You say, okay they were dieting and not eating, in fact are they changing the P matter energy to U matter energy and their body knows according to their E what size it has to be. Would there come a time when they are in danger and tap into the U energy and become a hundred times bigger? Because it fits the environment they are in. Now we see the weight loss is not due to not eating, if they have all the energies why don't they grow fat? This is how the U works because the E has a strength field and in that aspect of the energy field if they are satisfied they do not take anymore. Now that we reach the position of the balance state in what we need, would we reach the state of all of us having the same expectation that we want to be happy, not to be hungry, not to depend on the plows, all want to be wherever we like to be, would this mean because of the E of a given strength, is the same, all the human race would look the same, we all become silverish, or blue, whatever, and when we see that color in the Space, oh, these are the guys from Earth. What about in this evolution when you lose your bones, this is one of the main things that will happen to us, because Ca is an Element still matter state in the body, so we will replace part of our bone structure with the same kind of E, same kind of legs and arms, but without bones, because bones is the only matter state Gans which exists on this planet and not in the Space. (:43). So you will be walking but not with the bone structure, if you realize that your brain has already programmed for this, but you do it so naturally that you don't even think about it. What happens every time you raise a foot to put in front of the other one, you call it the retraction and extension of muscles, what if in reality your brain has already programmed the ?? in it, because at this height all your structure muscles are in the Gans state, I want to have such a strength, so when it reaches such and such strength its as high as you can bring your leg up, or you can walk, so in the operation of the E we already have in our brain the E side, the P side has tried to give it a stick (bone), but when we can control everything directly through our E, do we need the bone? By losing the bones but in a way keeping the structure of the bone in body as it is, we still walk, but it might be slightly funny because now there are no bones or sticks to hold it together, BUT the field strength is the same in holding it together, then we MaGrav position ourselves. (:45). The other problem in deep Space, how am I going to change my lung, how going to trust to let go, some will go very slow, and will let some function of the lung to still be there, you'll become hybrid's like the animals that can live in water and on dry land. You become ?? top hole with the option of motion ... you decide if I am prepared to let part of the function of the lung to be changed with another system specialized in the energy system

which is needed for E in the U. Look at the structure of your body and learn from the failure of part of it and success of another, as you are evolving and you want to change the things slightly in P structure. (:47). If I put my hand on my mouth I will die in a couple minutes when the 3rd cycle of oxygen can't be taken in to absorb an energy level which is needed for the E part of body. This body has failed in this area and it's the cause of the majority of deaths, this is the same with all the animals on this planet because they were created out of the gas part and then in interaction with the matter part they got their P, they have this problem, that's why when we smash a fly on the table he dies because we stop his breathing cycle, a fish (out of water) tries to breath but he stops because he cannot covert so much of it fast enough, he still converts some the energy H in the water, but he cannot do so much in the air, he needs a thickening, we call it water. In this structure of the creation on this planet the biggest failure is that we have never made an energy storage for our E, but on the P part we did, called the Liver, that's why you can go on without eating for days or months, because you go to the reserve tank in the liver, where do you think your energy comes from, when I don't eat but seem to have the same energy, where are you taping into, the liver. (:49). But on our breathing side we have never ever organized a storage system. So in the process of evolution you have to do this, it has to be part of your priority, storage for the energy for the E strength which is the main part. Now that you are the master of your evolution you have to think of a lot of things, because the last time you left it to the P, which has taken the E to slavery by not allowing it to produce its own energy storage, if it had when I put my hand on face it does matter I have a tank I can go for 2 or 3 days without breathing. I use that energy strength for my E from the tank. In the process of evolution for becoming Space Man, you have to go through change of stomach, but now the most vital thing is the energy storage for the E side. But something very crucial about this energy storage, it doesn't matter if you make your lung into a sphere or ball, or you decide the easiest way, why should I get energy brought in convert it and then pump it and then spread the energy, what if I just make a unit out of the heart which absorbs the total energy which it needs and it distributes. (:51). Part of your evolution is to replace the lung with the heart which goes out of its shape, it still can have its palpation if it likes, but now it becomes an energy Pl unit, which now that it doesn't have any air, it uses the energy of the U Pl, it taps to what is available and at the same time because its become a Pl of itself it becomes its own storage system too. But it decides how much of the energy it wants to release out of what is stored. There is a lot of decision making by the man himself. You have seen how easily we have replaced the lungs with the heart, which is not just a pumping station but it becomes an absorption station as well. Because of the heart's chambers and the strengths it accepts in spreading the energy, 2 chambers pumping and 2 sucking, each on e is built one is for the Lymph, E, and different parts of body, each one has a different suction strength, it's not the sucking but it's what strength it likes to absorb. Because heart is becoming a Pl is doesn't stay as a storage source, it allows the man to become independent of the air. (:53). What's the next position, air was the essence of the creation of man to start with, the AA came from the air, the production of the AA lead to the creation of the Man in interaction with P, so now in the Space where do we find the AA to create the Man (reproduction). This is a biggest stumbling block for a lot of people. How can I reproduce on the basis of this planet and I can survive and reproduce to give love and be loved by. Do we need to enter a dimension of total independence, but

dependent on the new source and new life. Do we need food now we know how to absorb the energy of it without eating? Or do we go through process of giving food knowing what we want to receive from it, in the process of the strength do we need the muscles to even move to where we can create a flexible reactor system which is already in all our structures to move around as fast as we like, instantaneously across the U. (:55). But in that process we will be transparent, because transparency shows there is nothing and then you are transparent fields and positions are accommodated for you to move in the way you feel. These are far away from the understanding of the man, ... it was said this morning because you have no choice. It's a Pandora box which we opened and it has no end, man has become the creation of the planet, but now has become the passenger of the U. You stay attached to the Earth until your E is ready to become part of a bigger structure, and then when you are ready you shall see. You have blinded yourself because of the E you carry, we see how man has started and can control the evolution himself, but the point is, that when you get to that point you decide what you want to have and what is going to be the package of energy for the time you need it, then comes, all of you will receive the power to produce what you need when you need, you can imagine I want to have a bouquet of roses for my loved one. (:57). Do you need to cut the rose or because you created the imagination of it in the energy levels of it are the same as you thought you wanted to have an orange from the system and you tasted and felt orange, now the process is reversed, I want to give an orange that my child feels he has received an orange, your systems are MaGrav systems, they take and give, what you take you can also give. Now you understand how the system works. If you want to breast feed the child, it's just for him to digest your energy to come in a Gans state that he can use, now you can give the energy in a Gans state to start with, so is there a need for a milk. Do we need to breast feed, from now on we decide, from now on we are the Creator, I made the Man in the image of Myself, not ?? in P but in E too. Man is too P, do we want to bring the E in line with our P, or do we want to live in the E life without P, this is the choice the Man has to make, the door we have opened to humanity. It's for us to make the next step, much like when you see people from different parts of this planet with different ??, different understanding, and E, you see the people of the same group, area, follow the same kind of E, BECAUSE this is what that environment creates for the man, to carry the same E and same feeling. (:59). We evolved according to what we ate in the environment where we lived, and an even greater reason is because we drink huge amounts of water. So people in the Alps drink bottled water from their own region, but now we see the water has a big effect on our E. The Swiss are this way or the Italians in that part are a different way because the water there is slightly different because it's a different geological part of the planet, which creates a specific strength, what he calls romantic Italians. Now we have a huge problem the food and water in that area created an E, sentimentality of the Italians, (and the resolution of the way the Swiss work), there's a crank in the job now, we are shipping these waters across the planet in different bottles. Are we shipping say a million bottles a day from one part to another, and if the water in essence is the fingerprint E of the Italians from that part, would the guy who drinks the same water in Australia and he only wants that water, would his E become that of the Italian? (1:01). Because the water was the essence of the creation of the man and its ?? of the man in that part of the planet. Are we becoming without knowing it a homogeneous race, because we are eating each others food which is essentially us, breathing each

others air, and now drinking each others water, which is essentially the backbone of E energy field transfer. Have we by evolving and becoming industrialists becoming a people who understand and want to have, to be good, are we creating a clone of our E in different parts of the world, or P ?? because we are eating, shipping goods from the environment that created that specific condition. Are we seeing Chinese look Italians because they are drinking only Italian water, do we see romantic Chinese very fascinating people because they only drink the water from Italy. The fingerprint in the water from that area ?? ... created the romantic people. So do you understand what is going to happen to us in deep Space we take energy from other parts of the U of the creation of the God, would we become the Man of the Space with his behavior. Us evolving to become Man of Space to tap into the energy of the U Cycle which has created the calm existence, would that free us to become the same. (1:03). One of the biggest problems of KF we would have so many enemies, it's not that we are promoting peace through technology the problem is the ones who made the guns to kill and see the armies and militaries as a way to assert their power, see that there is no use for them, they are kicking and fighting the whole way. We do not take from them, we give to them to elevate to our level. This is why we see so much opposition by the governments like USA, Canada, France, because the backbone of the economy comes from selling arms to kill, how can they become nations of peace. A recent report released by CIA and Canadian intelligence reads nicely, we are terrorists because we promote peace, there is not much credibility of the action of this man, because now everyman is using his technology. We are getting confidential reports of what the governments are issuing about us. When a new government goes to them they say he's this and that and a nut cake, the nations receiving these reports wonder why he's not as bad as they say. (1:05). They (intelligence) are creating it good for us because the interested nation are listening, there must be something to this KF. You start the revolution by receiving the energy from the U, the understanding, the possibilities of not having to kill which has been the habit of the man killing an animal, tree or another man, now they have to become us and this is where a World Peace process starts, by us sacrificing our own evolution to be men of peace, we change them to become like us, because in doing so we decide on the bandwidth of energy which the body of man needs and through in that position because we came from each other, we enforce it on them without them having a say that they lose their animal behavior. The process is very simple the understanding is very hard, a lot of you see a lot of opposition because now we are doing it without relying on anyone to do it for us. We are evolving according to our own intentions. Some of us who are criticizing want to carry on with the same abuse, because it has brought them a lot (wealth power) ... (1:07). ... we choose a next home to involve the man as a totality because wherever we go we bring new energy into the cycle of the nations, like in Italy, now in Dubai. The governments were blind to establishment of such an organization, now opening their eyes they don't know how to handle it, the Americans say he's a terrorist but where ever he goes he's giving away free, the Canadians are saying he's all nonsense but how come they are making factories and people are buying his products, because now the nations are seeing how ridiculous all these fabricated stories are. In the process of delivering and living the life, we enlighten that they absorb our energy, and then we start the process of the peace and change and everything else. For 10 years the Belgians gave so much false info about us and everybody bought it until we moved to Italy and start teaching, and the Italian

government said there is nothing right in all those false info, now we are going to protect this. When we move to Middle East these people are not aware of these technologies even if we have support at the government level. Then our enemies, those who want to keep the killing going have bombarded the Middle East with stories of us being terrorists etc., (1:09). But they see how we live and they start asking questions. The lies from the Belgians have spread to Americans and Canadians, this is a benefit to us, it has forced them to sit down and watch every teaching, and these scientists, military etc, are understanding there is a new chance. Thank you for writing all the shit because now it has come back to the foundation as an asset. In the next generation with the opening of the new heart for energy no one can lie, transparency and equality. If neither of us are lying we won't see any colors, if one is lying it means the fields are different and creates a "color of lie", I don't need to speak the language. We are walking into a new cycle where we create energy with love, equality, and being correct for ourselves, because now we know the level we can judge. (1:11). We don't judge we look at the interaction of the fields, there is no need for spoken word, million listen to these teachings, you listen to the words. I can make an E position of strengths that fits everyman on this planet, and I can make you all cry, or make you laugh, I never see you, but I release the energy which is in human race that is called the laughter or cry strength. Jackie tested the taste of the orange, one thing you forgot in the whole process of the Cup, you put the orange on top and drank the water, it tasted and smelled like orange, in fact you have already received it because you wanted it, an developed it, but now you confirmed to yourself, oh this is what I received. Does your E will dictate the future of mankind, the answer is yes. I had to make all sorts of gadgets, systems you had to have the Gans, Coils and cores, but what if we choose 3 other planets in this Solar System and each set will be part of the SF and in this process us on this planet become the 4th, if we and we decide do we need 3 sets in a SF from it the way we want, or can we use and tap into the energy of this planetary system (Solar S). (1:14). You see you understand only according to your intelligence, you only can comprehend at the level which you can increase your E, or comprehend your own E, when there is a conflict btn E and P we get anger, because E can not see the work of P, but what if we bring the strength of the E equal to P, there is no conflict and we make the side of peace, the level strength energy of the peace. You have systems for comparison, you have your E in respect to your P and now you can slowly create the colors of the U Communication language. If I feel happy my P should be the color of happiness, contentment, joy, reproduction whatever. All I need to show is that I am at peace with myself and my P in respect to my E, and this is the color of it, because this is the color I don't take too much and I give little which is not needed that I can confirm my existence, but I can confirm to the others to see, then we start learning the process of U Language. (1:16). How we become ourselves the reference point for the U language, we become the reference point for the others to understand the U language, and because we achieve this the other souls will evolve accordingly. You become the cancer of Peace, of equality, and we see that cancer doesn't become a big ball but starts with a seed. Every one of you is a Messiah, accordingly if you understand what it means, to bring Peace, to be the savior of the man himself from his own wrong doing, not to bring peace to the world, because when you are at peace with yourself you create an environment of peace. I am "Medi" the beginning and the end. We stand for our own action, according to the interaction we create from the others in respect to us. Because now we stand correct the

only thing left is for them to become correct. How many of you have been to these teachings and we've seen with Jackie, Ali, and a large number of you are creating different systems, how many said I want to taste an orange, and tasted it, how many said we don't feel hungry any more, we take what we want, I give first what I want and I take because we are following a path. (1:18). I am going to ask you a question you be the judge of yourself. How many of you asked this one question, I want the energy of peace to be in peace with myself? But the greed of P gives you the confirmation of the existence of the man. How many could ask give me the energy of love? Which means I can love and give unconditionally, asked to receive the energy of Peace and with it give the energy of peace at the beginning so when it receives it, it spreads across the planet. You are too greedy to see what you give out as excrement, as urinate, you go to the system to take, but you have not matured enough to understand it gives you what you need, is your intention to receive. The energy of peace has a taste, a joy ... I tell you NONE! You ask for the energy of love because it means I want give but I want to receive to taste it, I want to love people, now you know all these systems can feed not only E but also the P. How many of you next time we put these systems in public will ask for peace, for me to get peace with myself that my heart becomes a new energy of Pl that it doesn't need the lung and my new energy Pl the liver will take what it needs that it brings balance btn my E and my heart and liver which is my P that I am at peace and I see no light (colors) that I become transparent, maybe now you understand why the heart is positioned so close to the liver. In becoming in no conflict they become one, then you become the man of the U. We are too P to take what we need, too animal to take only what we need, and just walk on two legs. (1:21). Would we learn from now on not to take from the system, BUT ONLY GIVE to the system, because we know we take what we need. I tried to teach the group with Jackie the first week they were only taking "oh, it tastes good", one got drunk, high, E , in the process of the teaching I taught you have to give to receive, all of you start doing that because I have to be right, but now go to the next step of the maturity of the man what about "I only give" I want nothing from the system, then would the I become the status of the prophets of the past that they gave their lives to serve humanity, or do I become the ?? light of the Creator, that it only gives because he knows he will receive what is there to be received, for him to recycle that he can give more that the others can be created, because in the P we have a limitation and it leads to our tangibility, where the love of the Creator is unlimited. Even our own P existence is the acceptance of our own limitation of the creation's love, it's we who have limited ourselves with our P condition, where now if you learn the process of the creation you can elevate yourself to the soul of the love of the creation, unconditional, intangible and equal to the rest. A lot of people ask, you claim to be the Messiah, I don't claim to be the Messiah, I claim to understand the working of the U which gives me what it needs to give me, I am the Medi, the return of Christ, of Buddha or any name you want to call it, because I understand the work of the soul, of the servants of the God, which means you have to be part of it to be able to understand it. Next time when you stand in front of your system ... Just Give! without the worry what ?? I (it) might take. (1:24). Then if you can keep to that path you will understand that you understand the Totality. You'll understand how come I don't get fat, now I can tap into U energy and have what ever I want, why don't you have a feast of every food you can imagine and not get fat, because if you haven't seen the key its because in this position in this new structure your body only takes

what it can bring balance btn its P and E, that become at peace. And this sees the change of P and in coming near to each other balance with the Peace inside Man. Is it our expectation that has brought the limitation, and in that we manifest ourselves because it's as much as we can carry from the love of the Creator, the answer is yes. Now that you've learned a new way that you can give, and you can follow and do it, you'll find out is there a need for the P of the Man to confirm his existence when he knows he exists in all dimensions of creation ... I am the Creator. It needs a lot of maturity, because if you come to the point you decide to become P again, that becomes you're new limit of understanding. (1:26). Questions. With the giving to the Pl system we enable the balancing of the E, could we receive symptoms from unresolved E issues of the past? The beginning of this question has a huge mistake in it which answers the rest itself. We don't give the balance of E, we give the balance of E and P together because they now are both ?? fields, this is again the mistake of man, he wants to think what he's giving but he doesn't understand that the system takes both P and ?? as much as the E, because now we hear that the people who are doing these things they say they don't go to toilet much, the ?? thing is finished, a little bit, so the body balances both, and then it gives what it doesn't need, or it thinks another entity needs what he has, because now he works on the E level of the U, he's giving on the strength of the matter state which his P grants a ?? stake too, so that is why you find peace. In finding that peace and finding the communication on how to give because you are not ?? you won't loose much on the E or P, you start seeing the cranks where the problem has been, and that you might call it the opening of the E of the past, because these E is where we put markers, we like to keep them because they have been the reason for us to have a discussion, fight, or argument with ourselves and others because we created markers. Now that the soul together with the P are giving and receiving what they need, there is no marker, many of these markers ?? have energy packages, they have a language of the E strength, then you call it fear, or joy. (1:29). Next time you stand in front of the system say I don't want any E to be given, but take as much P energy as you like. It is you who have to learn that you have to give from both, according to the level which both want to give, equal to guarantee the balance, and it takes a long time before the E and P part of the energy of man to come to balance, because one has to gain the trust of the other, and one has to go the speed of the slowest. I wonder if we mass weigh a person who has a system and then again mass weigh them in 3 years or 6 months, would their mass be the same? I doubt it, the weight might stay but not the mass, because the mass changes according to the MG field strength of the balance of the energies. In time we have to make a scale for measuring the mass of E and P. (1:31). Maybe this gives you an answer why the Chinese and Eastern culture reads the pulse which is the E, and the tongue shape which is the color of the P to state everything wrong (diagnose) with the man E and P, because somewhere the balance of the 2, the man who was observing, observes the Totality also, because he is connected to the pulse of the E and see the color of the P on the tongue. Is this why the KF work has resonated with a lot of eastern cultures, because they work on the true understanding of the E and P, Yin and Yang, and to be perfect they have to be in balance and equal. This is why people of the East are more in tune to understand our teachings, because the West has gone too much to the black, the P and very little to the white or E. In the East is mainly balance, if you go to Africa it's mainly white (E) and that's why they are black skinned, because that's the side of the P the E is pure white. We have a lot to learn. Rick asks him to

expand on idea of dark and light. (1:33). When you are equal, in balance you don't create light you become transparent, when you absorb everything because you think it's your right to have, then you become the Nano layer on top of the Cu, you even cover the cover of your own created darkness, but inside you are still Cu color, the color which is traditionally known is not absorbed, is radiated ?? back, but is this the truth, or is the color we see is the interaction btn what it is in the environment, which is balanced , and what is ?? the entity itself which is absorbing and not releasing, or is it that the balance of the energy in the mass is always to take more because I might need it in the future. The colors are balanced you don't see any, you become transparent. The point is a lot with the East Asian culture especially yin and yang, 2 half circles which twist inside each other, that ?? other side, white should be transparent, and you cannot see the darkness of the black. Can we make our E transparent to be a giver? that in that process our P side which is the absorbing side of the energy to hold on to, to become transparent also because then it becomes in balance with the other side. If that happens you have a unified being total to be transparent. (1:35). Do we have to be absorbing out of the fear, that we might not be there to exist, or can we exist in the knowledge that we are there in the Totality and not necessarily in the line of P, then how do we know our existence because this is us in respect to our environment to create a barrier we call magnetosphere in respect to the others that it confirms our existence. This happens in the U quite a lot we are blind to it, look at the structure of the Galaxies there are no stars but we see the effect of their fields in the rest of the U where they confirm their position, the galaxies, stars and planets that are totally transparent because they are there you walk into them but because of the fields they produce are in balance with their environment they are operating they are not visible to the man of earth. Where the others who have come to the equality of the E and P they see them because they are at the same interaction strength. A lot to understand, we are getting all 7 billion, we start with 1 and in time get to the whole lot, every creation on this planet and then we will see if man is ready to accept his position as one of a kind, part of the Totality and not the king. (1:37). Mental malfunctions, hallucinations, anxiety, what is it P? It has a spectrum of the strength according to your E and P part, what is anxiety, fear, is it the strength of the E not wanting or fear of the P being afraid of losing its supply line which is the E. Everything has a strength, it's for us to measure it and in strength is a spectrum and within that spectrum according to its P structure of the man and the E strength, has can go from one level to another. Every plant on this planet has a green leaf but not all the leaves are the same color across all the species, it means that every leaf has learned, created a condition that it can absorb certain fields, now we understand the CO2 box, and it can emit certain fields, let say it absorbs certain C of a given strength spectrum, because all the C's are not of the same spectrum, so you can see the variety of the colors of the creation in the vertical, even the color of the pebbles, then you can see that spectrum creating so many different colors to absorb a given specific CO2 or C structure is created. (1:40). And the Oxygen or energy released to be a part of the structure has the same variation in strength. We see this in the world of the Water and the fish, they put all sorts of fish in the aquariums and none of them eat each other, because the energy they provide doesn't fit the one which the predator needs, that's how they survive. The same is with the plants, they take the energy which fits the way they are structured. The humans and all of us created out of the AA from the combination of 4 Elements of the gases part of this planet has the same, I can only absorb Oxygen and C

which are the given strength, in that respect my energy absorption is different then yours, because I only take a specific kind of CO2, and a specific Oxygen level strength that suits me as I live in Iran, I become pious and a man of love, it gets mixed up, we see the Iranian that go to America they become as animal as the white animal because now they are in West, because that energy of the intolerance of the environment creates animal behavior. (1:42). We absorb different energies according to what that environment, are environmental matter state in a gaseous state gives us, allows us to guarantee our existence. It's very interesting this animal behavior of the man now has taken hold because if no one makes guns or kills there is something wrong with them, so we put gun in there as we kill them and tell them they are animals because we want to sell them guns, because now we are in power. I push you to try to understand, I tease you that you can have as much gold as you like, but these people who are ma of death making arms, killing, they don't want the P position, rather they are involved in the E control of their own ?? lust. This is why for the man of peace they are so easy to handle. Because you haven't understood you can give them all the gold in the world but they are not interested, because the E ego trip is much more important, so they are more vulnerable then the man who wants the P of the gold. To change the warmongering people in that game is so easy because in the P state you have to go out and create the gold to give it to them, but now you have seen the status of the system I have given you, if you wanted food it gave it, you give love of peace. (1:44). Love means giving unconditionally. The more people make these system the more these people (warmongers) get disturbed. From today go back on the process to give the love of peace, you will find out that you elevate their position, and then when you touch their E they will have nothing to do with the tangibility of the gold or anything else. The time will come and the man will not remember why he is carrying a gun. In the Core Team of the KF the first thing we gave them was to elevate the P of the Prophets of the past that they all become the same, that they are equal. The second task was to elevate the World Leaders, ?? not only the soul but on the P level. And now the whole of you can elevate your own E according to the love of peace and as you give it has to be received otherwise it has no where to go. You have been looking for a machine to give you the chance to give food, energy etc, to give the man to become peaceful, NO sir, you have gone totally the wrong way, because man has 2 parts E and P, with these (? systems?) you are feeding the P, and you are happy with it, oh I had a steak, Champaign I got drunk ... I don't have to go to the machine anymore I just wish and I receive it. NOW GO out and GIVE the LOVE OF PEACE! (1:46). Go to the System and say I don't need anything because I know I receive but the condition of giving is I want my E which if it is correct to be the E of peace, I have plenty to give because I confirm all the rubbish comes to me and to the love of God, which means the giving the peace, and then you see where does this peace end up ... man will walk not knowing why he is carrying arms. One of the biggest Aircraft Manufacturers went to one of the KF and threatening him, if he teaches and works for the KF we are going to do this and that to you, the wife had to pull a gun until the police came, because she knew she was correct in standing her ground, the husband teaches for the peace and not the guns. These people are getting disturbed, where are they going to sell guns, have all the luxuries, mistresses, etc. when people stop buying it, they see the work of peace as a threat. Now there is no Green Peace, which is connected to the P of this planet by deception, because if the color of your peace is not tangible there is no color so you give

unconditionally, you don't need to be. Start understanding the changes that you are bringing. (1:48). The Aircraft M worked with KF 12 years ago, now threatening teachers wife and child. Stand in front of MaGrav Unit and give to them the love of peace, if you see a color it means you are not honest yourself, not the color of the eye but the color of the E. You feel the pain, I have lied to myself, I am giving because I want something else. At KF we see and are subject to a lot of these threats. When they captured me in Canada for 11 days they said they'd put a bullet in my head, I prayed for them, they released me as a criminal back to the criminals that were holding me, when I got back to Brussels, they let me go, if you are a criminal they put you in prison. We are in the same position today nothing has changed, now the bigger criminals see their interests in danger because the interest is to sell arms and kill, while we are promoting One Nation One Planet. When you are when you can not sell anything different. Next time you stand in front of these machines don't ask for what you want, give what is the true intention of you, and then see if the system takes it. (1:50). And if it takes it, it has to give it somewhere, and if it gives it, it lands on those who, go back to 129 Tesla in the Reactors, the one who is weakest, who is more warmongering, which uses more, so he gets elevated to become peaceful like. We do not get discredited anymore because now with the number of organizations, factories we are saturating the planet, we are the winners, because our intention is peaceful. And it was made a promise, when he comes the Lamb and Lion will drink from the same spring, and the time has come, I fulfill my mission, but that this time it doesn't go bad like the last time in Egypt, only the pure will carry on. The mass communication is strong enough that our voice can even be heard in the deepest part of the ocean and the highest mountain, our mission is peace collectively as mankind, because now you have the tool of peace, you don't need to take from it, because this has been your habit to take. You change the cow, chicken, the leaf, to my system of energy, you haven't changed, there has been no change, you just changed a different supplier, now it's in front of you as a Stacker, you have forgotten the principle, I gave you the knowledge to give, by giving to bring the human race in balance, now you have ?? yourself, now when you stand in front of the system you know if your intentions are what you say and with it you shall make a SS of your own life. (1:52). Which means your freedom in the Space. You have made the atmosphere the ?? tangibility restriction, not me, when you give to be free, you become free and the U is your oyster. It's your P dimension of expectation which has given you the prison of tangibility, and not the love of the Creator, because if you elevate you will live in different dimensions as you deserve to, according to the strength you give because ?? as you give you can receive on that level ?? Don't forget my message is complete, I am the Messiah and the Medei, the same as any other creation. It is you to elevate the position of the Creator that the peace can established on this planet, nothing else. Next time you go to the machine, GIVE!. Man's habit is to take. But God is a giver, generous, kind. You are the takers, the abusers, and the deceivers because you deceive yourself, you abuse yourself and don't do nothing but taking. Change your position truly, and you'll find that in the next 24 hours World peace will be on the table. (1:54). ?? you want to promote you are the receiver. Rick asks if the Absolute or Creator suffers? No, suffering comes by the failure of the takers by taking the wrong thing. Like when you are a father you make everything possible for your child to have the best thing and the child goes and takes the worst, who suffers the child or the father who sees the loss? It's the same with the Creator. In a way yes that is suffering, but you always hope that they will

change, the child will mature. And this child has been immature for millions of years. Maybe we can mature it now, maybe a lot of you will understand how the process of peace will come, a lot of you understand the Reality and control of the Totality, there is no control., but the reality is that you are all equal. I made the creation in the image of myself, so everything is equal across the U, not just the man. The eye with which I see God is the same eye which God see me, from 5,000 year old Sanskrit. Good Morning, if you understand it. (1:56). Then it is transparent because the eye see only the bandwidth which is allowed to be given by it to see, so if you give and you take the same, you have achieved the point. Now you understand why we came to Middle East, the completion of the mission, within the Arab and Islamic nations we announce that we are the Medei, Messiah, which means it's the time of peace. We have shaken the roots within Vatican and Christianity, they are running either way to prove that it is the others who are fighting, now in the Islamic world we bring peace, because we are all equal same with the Christians the path of God is created in one way, the prophets of God are equal in the eye of God, so how can there be difference btn the man who fought, how can we be representative of the God when He is present ??, is there a need for Rabbis, Priests, or Mullahs... when the messenger is the man himself but he has to see the truth himself. (1:58). Vivek asks to share how the KF is improving positively the economy of the world. The meeting is the world wide KF people will become the Ambassadors and representatives of KF in their own countries, we will be elevating the state of humanity through our work, the KF. At the same time we have set up the manufacturing side that by receiving the funds through the operation of the P side it can be financed to promote the peace and equality, means none of the KF will be dictated by no man or organization, because you can influence the man when you can do it financially, restricting his finances, now through manufacturing we generate huge sums of finance where 51% of the profits go to the support of the KF to promote peace, equality of the religions, education, new research and development, then the new development will feed back into the manufacturing that it creates the financing for the P part of the operation. (2:00). As long as the man is in the P matter state understanding of the U we have to support the man. We have been allowed to create the first KF Bank, we announce it in the next few weeks, part of the World Bank, but feeling and E of serving is very much on the level of the KF. At the same time we'll use a new currency which the KF will introduce in its bank. We are not going by National Banks we are going by One Bank for One Planet, it's there to support its citizens. The National Banks and their goals become irrelevant, over the past 30 years produced banking on the Internet without guarantees, I write a paper and here is my wealth, so we give the same right to the human race, One Planet, we will guarantee what you need, you stay at peace with yourself according to what you have contributed to the peace of the others. (2:02). In the coming time we will abolish money, what is the money, it's the level of the E which you pay you take. You wish to have a system for your house to stay warm, you receive the system, you bank with the KF to the understanding what we have explained this morning, then your feed system is your banking system. When you go to the Mosque or Church to pray, my servants you pray to give part of it too, for the future if you need it. This is what the praying is, it is the E of giving this is the nearest the man will ever get to the level of the Creator, that's why we pray, the true time to pray is when we give, it's like a piggy bank you put a penny in, you are used to the P sound of the "Clunk" of the money falling in, this time it's a chink, it's

the energy saved in your banking system, in your E, then you say I went to the Church to pray ... {lost connection, maybe they don't want me to speak}, prayer is a part of the energy, it's a banking system, you bank part of your energy within yourself. It's like I said with the new heart to bank energy for the lungs, E and the soul has its own banking system. (2:05). Up to now you have been banking in your own bank but we called it the holy buildings (Church etc.). Or you have made a statue in the corner of the house and you pray and bank to it, every morning you put a candle on, go to Church on Sunday, but what you do actually is save your own energy of the soul your E, and then when you are in trouble you call on the deposited account, and then it so happens that the call was pure and you had a purpose that you help someone out ... you gave the energy you had saved yourself, now you call the bank, but it's already your own money, and that additional energy which is released that you called on is for you to use. It's the same as when you store food in the liver and then call on it when there is no food. This was understood fully by the prophet of God, but their servants changed it to abuse the man. Look at the work of Mohammad, bless his name, he demolished all the statues, but the only thing he couldn't demolish was the statue of the ignorance of man, and in the brain of man because he couldn't reach, now the abusers use his name and what he gave, they abuse the man's E. (2:07). How we have misread our own behavior and existence and E work within the structure ... we have forgotten about the operation of our own E, because the P has the tangibility to touch. One of the reasons I brought the food structure out was to show that your E has a strength also, it's so powerful it even teaches your P you stand in front of the machine or away from it and you want a banana you get a banana. What I am trying to teach you the way we made the cores and the Gans, we showed the 129 Tesla, and the machine lives and then you start getting energy for some lights, that you start understanding, believing there is something in there because now I see the energy, the process of this system where you feed is no different, it's just the only language you understand, I have to play your game until you understand, Oh I wanted banana and then tasted it so there is something in that machine. Now you know it's there, the orange on the Cup and now you understand that the water in the Cup is yourself. (2:09). ... it's the E which gives you the energy you want, through the E's control of the P, ... it becomes something apparent. Now you know it exists and it's for you to understand it, he's become the god, have we gone back to the point of statues? Where Mohammad destroyed in the holiest place in Mecca. Now are we making a statue, where up to now we took from all the time, we understand we are the givers towards it, because our giving can change the others. It's a very big question for humanity to answer from now on, we were the takers and bankers and we always took now we have to give to the Creator because the call back has been called, the deposit has been reversed. The creation of Man was to show the love of the Creator, but unfortunately has become the demise and the destruction of the P on one level which needs to be manifested in another. Why not be a bouquet rather then a bullet? (2:11). We see the elections in the USA, the man who creates more hate and mayhem and fight amongst the people, the woman who is on the same bandwagon for another purpose and becomes more apparent, is this the love of God, is this what the Creator wanted or can we elevate the soul by depositing in the bank what we wanted to be deposited in that strength. Two choices will happen, these people will disappear or in the process they will not get to the position they are (in). How do they disappear, because the E of the totality will change the existence of the singularity, the single cannot stand.

It's in the Holy Writing, we took the love of God from the tribe of Moses for what they did to the Christ, the Roman's did not put Christ on the Cross, the Jews did because he was a threat to their existence in rubbing the man from E. And Mohammad was right, but his followers went exactly the same way as the others in killing and mayhem to change the ?? God because he ??. We took the love of Islam from the tribe of Mohammad for what they have done in the mayhem and give the love of God back to the tribe of Moses, but the mayhem is the same from both sides, so it has not changed. (2:13). Now we give the love of God to all the humanity in equal, now we shall see. It's no use taking and giving because the one who is taken from fights to get it and the one who it is given is immature to handle the gift, so now we give so the totality becomes equal. There is a reason we are in an Islamic nation, and in Vatican, that we can stand all these children of the leaders of the world as they are totally immature to understand the fight in P, where we control the E and soul of the man. It's the E which controls the P, the shape, color, the P has to be for the soul to receive the level of the strength that it needs, a beautiful child, flower, when it's beautiful you look at it and you give your soul, you praise its beauty and you elevate the soul of it, which means that soul inside needs elevation, that's why he has made himself so beautiful. Man in a very short time will understand what we have revealed today, shorter then you can ever imagine. But we have released today the tool of peace, it's in the hand of the followers of the peace to know now do they need a feeding station, or does it have to be a banana or an orange, instead of taking give the banana enough that it becomes its flower and not its fruit (in other words energy directly without tastes etc.). (2:15). Then we see the beauty and smell the scent of the flower, very soon you'll understand what I have revealed today, we have finished with all the religions of the past, we have brought all equal. As I said, I am the Messiah, I am the return of what has been promised in all the books, because I am you and you are me, I made you in the image of Myself. It's for you to start the process of peace by giving and stop being the takers, because you know you will receive, it was a doubt in understanding that ?? was I going to receive, now you know. If you want to receive the love of the Creator all you need is to give equal as the Creator, then you become as part of the Creator, so I made the Man in the image of Myself as I am a giver, I am generous, kind and the rest of it. Mohammad said God has 100 attributes which we can write, 99 of them are written, 1 is when you read the Koran from the beginning to the end and you shall see which is the name of Mohammad, bless his name, himself. Because he is part of the Creator and in love of it he is part of the creation, it's the same with all the prophets of the past, and no different. (2:18). One man went to the dinner with Jackie, he wasn't hungry so he pulled out crystal and sending energy to MaGrav, I didn't get anything. Keshe says you don't know, you don't the color of the soul, maybe it received. You look too much for P. Question is when we take the taste of the fruit (Pl energy) is it still attached to Karma in that way? OF COURSE! How can you say the child is different then the Mother when it is born from the same Mother. When you go in that building on Sunday, that building is blessed, it's the only building which is sunk into the earth to show the elevation of the soul of the Planet. It's an old marble mine it's built on the refill but still a few meters below the surface. (2:20). We work within the sink of the soul of the man. It's a gift for the Italians support of the foundation over the last 3 years. The announcement coming when we go to Beijing with the Chinese Army will change the course of humanity. I have full trust in the ability of the Chinese KF, government and military, we will close a lot of

problems in that country. Question, I am allergic from Zinc metal, when I try and feed from the device it seems I can taste the copper in mouth and its dry, why? However I don't feel hungry the same as everyone else. Yes you are too P, maybe the hunger needs to be satisfied in the other direction first, when you can taste the Cu it means you are too attached to P, it doesn't matter what comes from the words of the mouth, the p is suffering and it needs to patch up first, so you taste most of what comes. Rick asks if too many heavy metals in the body, No it is, a man has to go down deep in his E to find out what is the truth. (2:24). Why what has been the gap? Has there been hunger in the past life, (not P Life), but life since you were born, does the meat have a meaning to you because the Cu has the taste of the blood, of the muscle, we know it very well, have you been forced to eat meat, or you didn't like land one and wanted a floating one, fish. Go back inside yourself with the true eyes and then you'll see the reason and then it will stop immediately, because you have made a connection and satisfied the need. Question about Lead Gans being dangerous. Whom said it's dangerous, it's not dangerous, it's just for man, its his behavior of his Pl, understand that within your body is a fair amount of Lead without it you won't exist, but in our P life Lead has been transferred to Sulphur, it works the same way in a matter state, in certain animals. Rick, he felt like close to death after 2 days. Keshe, yes it's very ... Douglas talked about this. Because of Lead's Pl configuration it has a heavier G compared to its M, it takes a lot but it spreads the field, not on the top end but across, so it gives in a spectrum (not 1 level), but it takes in ?? one strength, which is very close to the P part of the Man's operation, which means it takes a lot of what comes out of the E as a given in the P level, so it takes everything what it is ready to release, but because it spreads its fields in a spectrum it doesn't satisfy all the needs of the P part of existence in the gas state and that's why you get this E feeling (depressed). (2:27). It takes the P and E has to subsidize it and creates depression field. A lot of new understanding of Depression, of the E conflicts has increased because of the use of Lead in the Petroleum Industry, when it enters the body it's in a gas state, when you breath it in it brings the same condition as people feel when it's in a Gans and they play with it or use it. You need Lead for the P attraction because when it pulls it can give to the others, and you need Phosphorus for the E part, because it allows a strength near to the E it can give, that's why it's ?? in our body, it sinks, means that when you take it you have also give it, became when they give it's in a spectrum and not mono at least certain lengths in packages, this is the problem you feel depressed. Depression is not knowing what the E gives balances with what the P is taking and this brings grief, that's what grief is. Do not play with Phosphorus and Lead Gans unless you know what you are doing and at what measure. Douglas explains how he felt the first time he produced it, yucky feeling, drained, low energy, but not feeling he was harmed, flu like without the aches and pains for about 2 days. He handled it as plumber with no problems, but as a Gans very strong, (2:30). Treat it with caution, gloves and separate container, hold CO2 in the other hand allowing the fields to balance so they don't pull from me. Chinese man brother with liver cirrhosis, how to treat, 2nd question is about Uremia. First we don't cure we find the solution to process it. (2:32). What are signs cirrhosis, hard liver, he drank for years. Why was he drinking? What is the state of drunkenness, why get drunk. Alcohol is the only thing which creates the freedom btn the E and P, because we have no control over the P because the E gets freed of it, that's why you fall all over the place. Why does it touch the liver, because if it is hardened it cannot be stored, so it's the energy not needed given to P

which is released by the E, when it is not needed and the intention is I don't want to, because the liver can store it, if I block the liver in storing then I can't get drunk, because I can't stand up. You have to go to the essence of the E why the alcohol was consumed. The problem with the alcoholics is they try to sort out the P side, stop drinking and finding different things (to do), but ask the man what is the E behind the drinking, and you will take him to the first day he drank and what he found in and with it. (2:35). If he understands that, then he won't touch the alcohol, because he understands the cause, and then you find out there is no hardness of the liver either. You don't reverse or try to sort out the problem of the liver when you know that it is the source where it stores everything, because it is partly E also. Ask him the first time he drank, it gave him an impression of what? If he understands and can tell you that, let him analyze it himself, he will just walk away from alcohol. If he stopped drinking years ago and is not alcoholic, he did not satisfy the need of the balance in the E, he simply has forced it, the same as the hardening of the liver, or change of the liver. You first have to reach these people through the E and then you find the P simply repairs itself. Find out what his E was during the first drunk, the rest is a repeat. If you go to a Chinese Restaurant and you enjoy it then you go back to the same restaurant again and again for the same food. Because it satisfied a need to be a Chinaman, to be part of it, and find out what was satisfied in that moment of the first drink, was it to defy to get energy that he could be out of the pain that was forced on him. (2:37). You find out lot of teenagers became alcoholic because the only way they can understand the E of what they want to be without their P. Ask him what feeling he got the first time, what was satisfied that he is still chasing the same, then it goes to the point where the E strength cannot be satisfied by it because it goes so high, but there is a lot of P strength that has got nowhere to go, but it was there (generated) to satisfy the E, and then it has to be stored and it goes in the liver, because the liver was the point where it has a common denominator in the storage, but in parallel there is not much in the E side. Another man says in herbology we look on alcohol as a spirit and we infuse herbs into it, the spirit of alcohol takes on the spirit of the plant, which delivers to the spirit of the cell of the body, and its very effective that way. (2:41). What are the symptoms of Uremia, Urea in the blood, excess of Amino Acid and protein metabolism, it's a type of renal failure, is it to do with the E part of kidney not in balance with the P, or is it the P part trying to enforce its E part. Progressive weakness, easy fatigue, loss of appetite due to nausea and vomiting, muscle atrophy, tremors. It tells you everything, the E is not fixed, it's totally E dependent, you have to fix the E and P will follow. It tells you fatigue, lack of breath, breathing has to do with the E, why do you want to breath less, because you can't handle the E it's too much energy taken and E can't handle. All the answers are there in Wikipedia. Why do you go into Coma? It's the E part it wants nothing to do with P so you block it. (2:44). ??? salt water, does it matter if you give them energy from the Zn or Ca. The man wants to use 6 coils 2 with heart, 4 with Kidney. Keshe says but you are not solving the problem with the E. ... this is not going to work because you are enforcing your condition, first find the reason for it, then the system works. This is the biggest problem in Health section of KF, your intentions are to help but the person you are trying to help doesn't want to receive your intention because with receiving it they have to change and through it they will not receive the energy they need. (2:46). You have to understand the need, you cannot give it if it is not there to receive it, you can boost it, change it, but as Kidney has a spectrum of itself, understand how to

connect it, if it's left or right kidney, then you look on the opposite side on the brain and E and P see what has been touched, what the need is. The way you are doing it you are changing my system same as aspirin or tablets, it does not work! Now you found another tool to abuse, understand the reason, then most of the job is done when they understood, instead of saying it does not work, you have never understood, you saw the core and think it should be the answer. Make 3 Stackers and let him sit in the middle of it, and let it receive, Gans coat with Zn and CH3 and CO2, and let him elevate his E to understand his strength, then you find out the kidneys just change. My systems were built to elevate the E and soul of the man then the P will follow, not exchange this for the pills. You have to elevate the E part of the brain that you can receive it. It's another abuse of the technology, anyway it doesn't work, you can't take a formula one car into a donkey race, formula one needs a smooth understanding of every gear, smoothness of the road, etc. (2:49). On donkey road the donkey always wins, because he is for this track. Understand why in these diseases the E is manifesting in P of the hardness of the kidney. You can solve it, but the minute you stop it comes back and they say it does not work. The one who understands a little is half a doctor and is dangerous to life. You don't understand what happened to cause the P to change to start with, you're same as Pharmaceutical you just changed the tablet for a MG field, it doesn't work because you haven't understood the Totality of it. When you read the Wikipedia look for the E, where has the conflict come in the E that it shows itself in P. (if you do) your guy walks out in a few days with nothing, because you changed the structure from the creator which is the E. (2:51). From Mohammad the Creator is kind and giver this is both the attributes of the soul and E part of man, is the P which abuses it to fit, manifests itself to be existing, thy shall not steal, the biggest thief of the man is man himself which steals from his emotionality to confirm his existence in P and that is what you call disease. Romanian living in Norway learning the teachings, a lot of your site is controlled by non-Romanian, you have to start taking over yourself. But I live in Norway, it doesn't matter you are Romanian language, we don't have borders, that's why we play One Planet One Nation, we don't go by the country. (2:57). My question, I built a Cup with double wall, N coat inside, and I think big percentage of ZnO2, I energize the water for 5 months, now when I breath through the Cup all the saliva in my mouth change to sweet menthol, another guy had the same taste from breathing through it. What's happening? You don't understand anything from day one, you used Zn it's connected to the E part of the brain, that's the sweet, because it shows the balance of the intention, sweetness to us means balance it's excepted. With our Cups, if you get the right measure of Zn, CO2 and CH3, the sweetness becomes sexual aroused, it becomes like Viagra, it's the sweetness of the pleasure. You have to look at the expectations of the recipients E. Zinc Cups are usually happy Cups, for Depressed people they can breath through it, you'll find they change because you raised the level to take more to become more giver, and they giving is sweet happiness, depression is fear, you change the level of the emission you increase the MaGrav on the M side which is the giving side, and that brings man happiness and you come out of depression. (3:00). He sent one to North of Norway because of darkness, the Cup helped get rid of depression. Of course now you understand the science behind it. ... that's why I chose Zn and Cu for the existence of the Man, if you take the AA which is created by the interaction of the Zn and Cu you'll find the energy received ?? tranquility and peace because it's a balance, because it's near enough. When you produce Fe you see the redness of the blood, it flows

back down to the CO2 ?? .. it puts the CO2 in the motion, take pictures when you make hemoglobin from the Zn and Fe, and look what happens to the structure on the top with the AA, it looks like they are cramped up in suffering they don't want to give. (3:02). Zn is to do with the E part of man, for psychosomatic use the breathing through Cup, the air for the E and the water goes to the P part you need Zn, it ?? with the sexual organ which brings a pleasure balance with reproduction and the E, the 2 serves the P and E that's why you are happy. Is it the right hand of man is M and left G, this is what people like to talk about I don't know, if that is the case man should be walking sideways with his left hand on the floor. Is the foot the same ?? (3:04). As a child when you start your first independent motion, you find that you don't move the left leg and arm together, but left leg with right arm, like marching, then you connected the left foot with the right side of the brain, because it does the same thing in the E level as was done in the P level, that's why the left side is responsible for the right, and visa versa, because it brings the balance of the E in respect to the P, but in the opposite direction line of the transformation of E, of P, it's strange because one is the mirror of the other. (3:07). Question on ILS, I offered some Zn patches and Cup and breathing tube, he shows a N coated coil around a tube for breathing. (3:10). You show a huge lack of understanding of this disease. I have written a paper on this, ILS and MS are death wishes, why do you want to die? It means you want more and you cannot receive it through the E and so you take it from the P, that's why you see the paralysis of the arms and legs because the energy you created for them, now you want to satisfy your E. ILS is an E pity me and need but I don't get so I am hitting myself, child says if you don't give me the sweet I am going to hit my head against the pillow, it's the E ransom of the mother through P. Trying to elevate their E, because they have linked up to take from P, they are taking all the energy for the P to satisfy the E, people with ILS internally are forever consuming energy, pity me I need more because I don't get enough, I deserve more but nobody see it so I take it from myself, so they create a condition of paralysis and death. You have to understand what is the cause of taking, where does the hunger come from, the need for the confirmation of existence. It's no use building a system for it, you can never satisfy people with ILS, they have one target, me, me, I have to receive everything. They have lost and don't want to loose a second time so they take from their own internal energy. Example you fall in an avalanche, the body goes in survival mode to reduce energy in the heart that it can support P, called hypothermia all the blood is needed for the heart, taken from extremities, to guarantee operation existence of the E. This is what they do, take all the energy from P, if you find the reason then they move it. We see ILS in high profile sports people, why, I was bought for 10 million, the other guy got 12, I am going to get 14, they go around try to be center of attention they fail to get 14, so I am no good I should have gotten 14 I am going to die. (3:15). Also huge numbers in American Actress society, they come from backwaters and get made up but all they can get are blue movies, they see themselves as failure, I told the whole family I am going to be famous. ... I am taking everything from P because I gave al the E and didn't get. The only way to help them is to get them to understand why they are the takers of their own life, energy. (3:17). If they understand it for that time then you can give them a pipe, otherwise you're wasting your time. Let them work it out themselves, because they'll just feed off of you. That's why we stopped the program. The purpose of KF is to find the causes so we can help. Ask him 2 questions when you get sad do you laugh or cry? The laughter is to give, you can help them, but the one who cries, pity me I

need attention, but the laughter is worse look I am the center of attention, I need all of your energy. Steven Hawking has been ILS for years, from his work and in the newspapers he has to be the center of attention, he sees himself as a failure because he failed twice, through his handicapped ness he's getting the same attention he stole from himself. If you get it young you can live on 40 years or more, but if older (after 60 years) your body can't support it for long (6 months), it can't support such a sucking of energy. We stopped treating them 3 years ago, when they get in a wheelchair it gets worse they are center of attention. (3:20). ADHD same attention seeking, kingship.

106th Knowledge Seekers Workshop March 24th 2016 (Messiah and Israel, TEPCO tested and used Gans in Fukoshima whistleblower, Gans Supplement, Cleanup of contaminated waters)

(:09). He talks about journey to Space, a number of people have already achieved lift, etc. But before we go we have to solve the problem of uniting humanity. continues on this line.

(:21). Chief Rabbi of Israel your time has come. The year 2016 we warned and they were aware of it. When he declared he was Messiah, he was asked if he would declare also for the Jews, yes. The Vatican the same, the Pope is finished. The religion now is the path of God, we all walk towards peace. We don't abolish, we elevate the soul. We invite the Jews to participate with the Christians and Muslims. Two choices either kill him or join him. In fact we all have become Messiah, to bring peace to humanity. (:26). We don't ask race in KF. The people of this planet have become mature enough for One Race One Planet. We add to the knowledge so no need to fight. By one O'clock you will know that change has come. We are faceless but powerful in spreading the knowledge. The Rabbi's have served for thousands of years, thank you very much, but now your term is finished. The State of Israel will become part of One Planet, same with the rest. The World leaders did not deliver but lined their pockets. A lot of Jews were afraid of this day, now you can join the rest of nations in peace. (:30). The unity of God and serving humanity for peace. You can survive as man of U, now that we have opened the doors. Someone says it is not the Jews but the Zionists, Pope but Jesuits and Black Pope, etc. Keshe says we have blamed enough, you have enough to change your heart. To bring equal those who used inequality to their own advantage. (:34). All the lands of the religions should be given back to the people. (:37). Ali says that he discussed the same thing in the class today. People need to understand their relation with the Creator and connection. (:41). How to elevate the religious peoples soul? You don't need to elevate but give to the ones who need it. These people can only exist when they feed out of the weaknesses of others in their soul. When we elevate all the religions so they know that they are all equal then they won't contribute to (negativity). The religions up to now have preyed on the weakness of Man. We are working to elevate the totality and then it happens by itself. Soldiers are coming forward that they question what is going on. When you give to the soul you receive when you need. When you pray give to the soul of humanity, and every creature on this planet. (:45). Are you going to worship a being in the Space because he knows a little bit more then you. This is the blueprint of religion that you are all equal without

punishment. If there is judgment then all have failed miserably but generous father allows you to start fresh again. Those who have done wrong know it. The Ethos of Space is of life. (:51). Benjamin presents on contaminated water cleanup. Tests not in yet. (:55). Birim is one of the most polluted rivers because of gold and diamonds. (1:03). WQI Determinants (test) factors. (1:18). Some mistakes in the printout. (1:22). Huge change on its way, West Coast US, Japan, Ukraine. Goes to Renan on environmental cleanup. Working on decontaminating air. (1:18). Drawings of a device to clean the air. The exhaust passes through Gans materials, one of the uses can be for the car exhaust. This is the same system as with Water cleanup. We use CuO2 and CO2 to cleanup the mess. (1:36). Pictures of using it with car exhaust pipe. (1:44). Renan has run his car with a single coil Magrav, emissions test is cleaner, no base to compare. He put a little dry CO2 in the oil. Normally he should not have passed the test with an 8 year old car. (1:50). Shows some experiments with Nano Scrubbers on the air intake of car. Video of car tests, not sure what he's doing. The engine produces its own H fuel. (1:57). New system MaGrav on the battery, now adding a tiny double core coil (same as for the pens) put on spark plugs, to make it more efficient. He added magnet to fuel line. (2:00). Problem for Auto manufacturers is the older or second hand Hybrid cars can't be exported to Africa as used, too much support needed, so KF technology can support them. He gets 25% increase with the MaGrav for the past few months. (2:03). Keshe talks about Ebola from a few years ago in Sierra Leone, someone from MIT was there and took the technology fro himself and then they confiscated all the materials. So it totally cured the problem. Then they took it back and made a second system to treat E-coli, and they cultured it and there was no E-coli. Yukko took the technology to Fukoshima. Then TEPCO got involved. Keshe asked for the resignation of Japanese Prime Minister. (2:13). Man talks about Fukoshima worked for TEPCO, was a supplier, and ion exchange resins, used in Fukosima. Because of the high Ca content in Fukoshima waste water the ion exchangers don't work good. (2:17). He got Gans samples from KF in 2013, was told to keep secret. TEPCO did tests and asked for more samples, Keshe gave them a special device to use with the CO2 Gans. Daily 200 tons of water pumped out of the reactors that couldn't be dumped into sea. (2:22). Keshe as all the DHL shipping receipts to TEPCO in Japan. They canceled meeting with Keshe. Somebody has to pay for breaking the rules with the International Nuclear controllers. From 2015 they started to pump water into the sea, they did not give the credit to Keshe though it was his technology that they used. (2:28). He presents the accident with slide. Reactor 3 was completely melted down. In 2013 the director died from cancer, Reactor 4 was full of nuclear rods and could explode, that would have contaminated Tokyo, they didn't tell the public. The new person came and opened to outside, so he tried Keshe's technology in 2014. They made the Gans themselves once they proved his technology. (2:38). Photos and videos with this man testing at Fukoshima. The had a problem with Tritium and Keshe solved it. They cut off Keshe, and used the Gans to cleanup contamination. (2:49). Kurion was a company setup to control the Japanese nuclear industry. Since WWII both Japan and Germany have their Nuclear industry controlled by USA. (2:53). Showing the process they used with the Gans to cleanup. (2:56). Medical Uses of CO2 Gans. (3:05). Treatment of Radioactive contaminated water, you can add CO2 directly into contaminated water and that water you drink from the Gans can decontaminate the radiation from your body. We have it now from TEPCO that the CO2 Gans is not toxic at all. It's good for viruses, in Space no

microbes but only viruses. (3:10). Keshe adds to the knowledge, why they tested for influenza, because the workers get sick with in winter time, so if the workers came in contact with the CO2 and had Flu would it make them worse, but they found that it even cured the Flu. They dissected the mice and checked the liver. The CO2 was not found in the liver so it is not toxic. They collected the urine of mice to see how it is discarded from the body. The CO2 was found in the urine and feces. They got puzzled by Group 2, CO2 plus contaminated water, the urine was contaminated but the mice survived. (3:18). He is producing CO2 Gans as a supplement in Japan. Gans is a natural product it's a new version of free atom. I am proud to see the KF logo on your product, I give you the rights to use it and signature rights. We are the owners of the technology. From today it will be available on website, you take your own responsibility to use it. You can get it certified in your own country. (3:21). In time of disaster (earthquakes in USA), people have the right to save their own lives by using the CO2 Gans. In Asia were they have to slaughter animals because of disease, this CO2 to save them without damaging the farmer, you can just add it to the water. We ask TEPCO to release the data, Japanese ask your government how they kept this technology away from its people, where the farmers are getting cancer as they cleanup the power station. You are wondering how IEA is allowing them to operate the power station, because they have the Gans. It's a natural material and no one has the rights to it, nor copyright it because we have taken it. It's illegal to use this name without our permission. (3:24). The trials have been done on the workers of TEPCO we ask them to release the data. It's not the credibility but they tried to discredit us. (3:26). Some results of using Gans from TEPCO. We need it for Space travel against viruses and unknowns. How many could have saved their children from radiation sickness. It just washes out of your body, it doesn't stay in. Or does it go higher to IEA. It's a game played with all of our lives to show they have power over our lives. When you feed your plants and animals CO2 any contamination is washed off from Chem-trails. For "Chemtrails" start taking CO2 in a correct manner, it will be washed out of your body. Not magic, from total knowledge of MG fields, understanding of Spectrum of C in respect to O, they attract anything which is in the bandwidth of the total spectrum, C and 2 O plus combined. This is the biggest discovery of the century, understanding the Pl as a Gans. (3:30). It will change the lives of a lot of people. The flu shots are becoming less and less effective, Gans works. (3:33). Benjamin's test results back, E-Coli in water from contaminated river in Ghana, treated it with CuO2 Gans, the number dropped significantly, documents will come later. Africa is second example. It was silenced by World Health Organization and IEA. As of today the cleanup has started. No license is needed to sell it as a supplement in Japan. (3:40). Keshe will try to get it in use in Iran for Nuclear Industry. It helps in side effects of Chemotherapy, can take it with Chemo. The Chinese research shows that CO2 helps in treatment of cancer, reduces size of tumors. (3:43). (for cancer treatment), it takes very little, but we are not consuming the Gans, the water of the Gans can do the same. At the moment just to use the water of the Gans. Reaction from Pharmaceuticals. Do we need to do the vaccinations which is damaging our children. What about our Nuclear Engineers when they get contaminated, can we just wash them with water of CO2. Can we create enough Gans water, allow the fish that we eat to swim in it before consuming so they get decontaminated. Strontium 90 and tritium were biggest problem and we taught them how to make gold out of it. (3:47). Just received word the Japanese whistleblower's computer shutdown and can't be restarted

same happened to Benjamin. The man from the lab in Ghana discusses research tests. The CuO2 minimizes the E-Coli in Petri dish, shows pictures. (3:50). The dark dish is untreated and full of E-Coli, the treated water is clear and very few E-Coli. The result is that treated water with CuO2 it minimizes microbes. We have yet to check the International Levels. The scientist feels it probably is within the limits. It comes from human excrement, vomit, and washing animals in the river. (3:55). Keshe asks with CO2 do we take the good and bad out of the water. They shook the dish before testing this is why still microbes in water. (4:00). The German group fully supports CO2 production as Supplements. (4:02). Keshe discusses about the cleanup of the messes we have created on the planet. Calls on Japanese Nuclear workers to get the info out, how many other organizations are using KF technology in the background (secretly). (4:04). People on West coast of US you say you are receiving Nuke waste from Fukosima, make yourself a CuO2 Gans put it in the water stir it and let it settle let your fish swim in it and rest in it, and all the radiation will go out. This is not for abusing, but using the correct way. If you live in a radioactive or chemically contaminated areas, this is a solution. DO NOT CONSUME it, let organizations around the world officially test it etc. You can drink the water of it but not the Gans itself. We know one thing that over 1 mg is far too much. (4:06). How much do we want to do this? Can we change the course without fighting, it's easier to work, but we needed to release this knowledge today, because all of us are going to be effected by the radiation, we have been effected by radioactive material. We have no choice but to look for the avenues where we can support ourselves, we can make the change, we decide. (4:08). Man from Brazil about the pests in 3 countries, we are being sprayed continually with pesticides from Monsanto, children born with small brains. If they could start spraying with CO2. Keshe says to water them with the Gans of CO2. The man used it, he had fever, etc. now he is fine, he's spraying all over the house. ?? Super ionized water. (4:12). (4:18). Gans making share, he uses N C coils instead of plates hooked up to a cell phone recharge, it will make a tub in an hour. We do that in the factory. Keshe says this is not CO2, you have to produce it in the normal ways, it's CuO2 or ZnO2. We have seen a lot today. .. even though the others get benefited it brings benefit for the totality. Before we were afraid to share because something might happen to them, now we are afraid not to share that we might not be able to save a human life. ... have I given enough today.

107th Knowledge Seekers Workshop March 31, 2016 (One Planet passport, Pain Pen report of energy flow, Pens showing the fields on water, Agriculture Presentation, Pain Pen innovations.)

(:06). (:08). A man said what you have done in sharing knowledge is against the rules, and they are proud to share and help mankind. The people controlling the finances controlled the humanity from becoming peaceful. The world leaders now understand they need us. In Dubai we introduce a One Planet passport, we create a passage throughout the whole planet, the birds don't carry passport. (:13). The armies go from defense to production of new technology. Bring the Iranian scientists in and share knowledge for Nuclear contamination, the disclosure from TEPCO last week will change the industry, to test and come up with solutions. (:17). Gans used in Nuclear Reactors literarily takes

away condition of meltdown. Add the Gans to the cooling system of the nuclear reactors. We know the major powers are listening we invite them to join with Iranian government nuclear industry to develop these tools to safeguard the reactors. It can used in transportation of radioactive materials in case of meltdown. (:22). (:26). On the video we see a G field flow, you can see the MG force fields, confirmation of the flow of Pl. Taiwan KF shows video. He can see the energy spin. (:31). Copper wire uncoated on Styrofoam on water, move it with coils, one repels and the other attracts. Second one they used a N wire, clearly repels and attracts. Styrofoam interferes with static electricity, use a piece of woods. (:41). Taiwanese scientist was the cause for the blueprint release 2 years ago, his government gave it to him to study. They use ginger on tip of Pain Pen because of TCM, Keshe suggests taking whole ginger bore out center and put coils inside. (:44). Experiments with different P Pens, psychic person told how the energy flows, different width and range of energy, 3 wire pen went narrow and lightening speed, 3 wires and 6 Pl batteries goes wide. (:48). Keshe says at moment we are testing a number of pens, results strange but positive. The 3 wire pens create and unbalanced field and you see it in this paper, you should use a single wire for balance ?? With the Pl batteries it's very concentrated in the beginning. The 3 wire 6 Pl battery Pen are the same way the helmets are made. (:51). Collaboration with Chinese Medicine. Their MaGrav power unit got 90% reduction. There is a new development on the MaGrav car units can be made much easier and more effective, Renan will explain. Funding will come from the Taiwan manufacturing, they need training how to handle N materials. (1:02). Composite Gans packed in three bags, CuO2 Gans, put into a CO2 packet. Yes this is what we were teaching yesterday. Since you made a composite Gans you don't know what Gans and how much inside by packing them separately, you can dictate the strength, position and the way you want the fields to interact. (1:06). The Gans packets are within Gans packets, you can move the CO2 to one corner for example. You can move it and change the strength by mass, you can concentrate the fields, if you are dealing with deep or shallow pain, if you are dealing with a cancer you can start targeting. By using freezer bags which are made on a grid, you can fill in different sections with different Gans. We have to learn this new structure. We used the patches but now we have to become more sophisticated and understand more applications of it, how it will do and how react. When you mix the Gans together it's totally random, this way you can control what you are doing. These can be used in conjunction with health system, coils in a box people walk in to. (1:10). With this system you can concentrate the energies where you want on the body. Huge amounts of applications. You could wrap one of these bags with all the Gans around a Cup and receive their energies. This is the next step in Gans use. In Austria they start working with the doctors and trials. I started with the Cups and helmet, now you can dictate where you want to put the Gans. (1:14). I used to put the Gans in specific positions to target it, used circular magnets with Gans in center to target organs or whatever. The body on the Cup. You can use these bags to target repair of a heart valve, dissolve cholesterol in the blood vessels. No need for operations, yuo target a balanced E and P change. If you build these systems please come into the KF and we'll collect the data. With the doctors they think in traditional University training way, we have to add to the knowledge, like when Homeopathic came in, the doctors couldn't see anything so it wasn't medicine. (1:18). There is no FDA, we have to collect the data. We used this with doctors in United Arab Emirates with a cancer patient, immediate relief of pain. I have

done it for 15 years but very difficult to make a full body system. I can teach doctors through my certification to use and build these systems and insurance coverage. (1:25). We are not all but only part of the solution, another alternative way. (1:27). Austrian updates what the doctors are doing. Heather has been doing a lot of work with the Health Pads. (1:39). The helmets and "Health trees" where you stand btn coils. In these systems you can target the kidneys, or lung infections. When you change the lung operation the other organs have to adjust to it, so you can use others coils also. Because they adjusted to the sickness now they have to adjust to the changes towards balance. This is one of the most powerful systems for this treatment, because Pl spectrum you also treat the E. If the lung problem is E you not only change the P structure but the E, and adjust the whole body for the changes, and the brain can adjust. (1:44). When the doctors understand they won't go for the tablets. These systems are perfect for immunization, in time we'll teach you why. There is a court case in Italy that the immunizations have a high level of Mercury, and the court has awarded penalties to the manufacturers. The cause of the problems (mental illnesses) is using Mercury and Magnesium together. You can use these systems at the point of infections, use the patches with it. You take a weakened condition of Measles in the Gans condition, as we saw in the TEPCO trials with the mice, and feed it to the child, pure only what it is, what will be taken. Or you can allow the child to replicate as a system ?? .. that the body receives an energy balance in a Pl condition of the Measles, and then the body starts to build its own immunity to it. We are not giving any outside chemicals to the child. We cannot leave our children unprotected. We can work with Pharmaceuticals to introduce the Gans drops like was done in Japan. (1:49). Again, we make a Gans of the disease and allow it be drunk, then the body takes what it needs and the energy to immunize itself. We are here to put forward a new direction in the world of medicine. These problems with immunizations as a lifetime problem. We can give the Gans drops at the time infections. Those members of Pharmaceuticals, high wages justified ignoring the data, and the politicians knew the children were being injected with the poison. (1:52). CO2 and CuO2 Gans is as natural as the apple you eat. In the 70's and 80's when the injections were separate we didn't see many side effects, the problem came when they started to mix it together they had to use agents like Mercury and Magnesium to gel the 3, without interfering with the operations of the body and that has caused the problem. The way we make the Gans of orange, banana, and the Gans of the virus TEPCO used to overcome the flu, it should be no different to do the same with Measles. You can test it with just a drop in the glass of water. (1:56). We need to do this because this is how we change the course, we don't need the permission to save our children from the hands of the directors, who hide the data of the research. Peter of Belgium was put in a mental institution because he stood up. (1:58). The Chicken pocks appears on the body you can extract it and make a Gans of it, and give it back to the child because it comes from the same, it creates and cleans up. In Space we don't have bacteria, which is the AA of the man. Man's AA is the fingerprint of this planet, the rest is virus, which means the energy that attaches itself to the AA body of the man. We need to understand how to operate these systems. Most of the deaths will come across this line where the P has created a process for its P existence and its E for capture of energy, if we can condition in the Space that we have no need for these 2 the lifespan of man will come into millions of years. We don't get Measles in our legs, it's a process in our digestion System, breathing S, and the P part of the body, the biggest problem will be if we do not

get educated and find a solution very soon, in space now you have your brain which is again made of AA and it will be capturing energy packages by viruses to different parts of the brain in the space. (2:00). When we learn how to operate the viruses out of the P part then in the space, the instant it touches the brain it blocks the energy packages to the structure of the brain, we can do the same to reverse it. The Taiwanese showed us the flow of the Pl, if they change different strengths btn the ?? pots how much the change of the speed of the float will be. If we increase it goes faster, decrease slower. If we use only Gans and not the N coated because the body is made of Gans, the Austrians can check this very rapidly, they can start calibrating the strengths, how fast it goes when you connect all the 6 (coils) and then connect to the Pen. (2:02). What if you put 2 with the tissue of the body, these are the data we need so we can show to the medical world this is what it does, put a glass of water inside, and a Gans inside and see what is the change of the speed. You have to start creating tools calibration that we can show, man needs to see something moving, numbers. (2:05). We need to come up with data. We are the ground workers of the new technology. Heather at a retreat put the CO2 Gans under the center chair and the people had an easier time to process E. (2:08). Keshe says to add some ZnO2 Gans to it also. Zinc reaches the E and CO2 connects the whole process. (2:10). He will add to the knowledge, draws CO2 on board, this is your connection line, COHN (AA), to the left ZnO, to right CuO2, CO2 works with everything, because the O in all these is the G holding together, Why the CO2 works perfect is while the O behaves as a G holding them all together, here the C works as a communicator it's a line of communication, this is how its energy is distributed, and it positions itself in the structure, this why whenever you want to hold onto info and communicate together use CO2, it's the glue to the whole structure. CH3 is the same, understand the science behind then you can innovate. It also creates a line of communication, then it releases H as the simplest form of energy, that's why alcohol, sugar are so effective because of the link to the line of communication, which is the C, and now the energy is free from the H to be consumed and delivered, that's why you get drunk so fast ?? ... if you want to make sure a system connects to an AA use the line of communication, if you want to hold on to it to deliver something always use Oxides, because O is the G field within the structure of the liquid in this planet in the Gans state. Once you understand this then you can play with whatever you need. In the book we call this scinthilization matter state, but in fact it happens in the Gans state (CH3) also, now you have a H in Gans state available for the radiation released by N or the extra energy, to release the extra energy from the H. (2:13). That's why the system is so effective. It has taken years to develop it, in the 1990's I could see it. We always looked at it in the matter state, when we opened the Gans state in early 2000 then it all became apparent. It doesn't make sense in matter state because you look for electron positioning, as Pl absolutely perfect. Why you use oxides, because they lock into (? the AA), in the process of the viruses, most that come into operation in the body, usually sits at the C connection, that's why use CO2 for viruses, because you connect to the energy level of the attachment, in the line of communication, but you have itself the process of reduction in energy that it transfers back to the H to be consumed (via AA ?). If you understand the process you can use the virus energy to the benefit of the man instead of harming. (2:15). But you have to know how to attach to it, this is the principle by which a lot of things work. All the salts in the body work through this line of communication, understanding the different parts of the AA gives you an understanding

of how to work. Heather shows her stuff. Can water be charged with vials of Gans, instead of direct contact? (2:20). It's not of the same strength but more or less the same, yes. It's because you deal with a Pl field and they cross, during the interaction they lose some of there strength. Let's say you have a Zn underneath but you receive the energy of a Cu, this is the difference the interaction and release some of it in the water. When you use Gans outside in a container like you are doing, the plastic becomes a filtering level barrier, because it has to cross the ??, you will learn that the containers are the reference point filters (for the Gans), anything which is within that limit of say Cu, is dictated by the Cu, will be absorbed or balanced in the Cu level and the rest will transmute through. (2:22). Is glass container better then plastic, in a way yes, but it depends what energy you are expecting to receive. Different people can drink from the same cup with water but they show different reactions because maybe the CO2 which you created is not at the level which their body, or blood ?? position of the Gans of their body is a recipient also to show such an effect, they absorb it, but lets say that it makes somebody happy because their happiness spectrum of the Gans has a specific strength and to the other person it's just below it, so they say I feel nothing, it didn't work on me. If you change the Gans content, or put another Gans content a little higher, now the other one says he didn't feel anything, so understand the totality. Life, the composite structure of the body is different for every individual and we absorb energy from the Gans is a different spectrum for different kind of E. The ocean Gans water felt more powerful the people, because with the Ocean you have the Gans of all the elements of the planet. In Ghana when they put a Gans of CO2 or CuO2 in the water how much the difference of the absorption of the elements from the contaminated water. (2:26). When you make a Gans depending on what composite the Gans has that you use, you dictate what elements are in that Gans, or what are left behind. You had warned about using the seawater because it can pickup the radiation in the water, if a Gans can re-pattern a GMO seed to its original blueprint, and deactivate the radioactive material at Fukoshima. No, no ... don't misinterpret. The report from Fukoshima they took the mice and fed it CO2 and then tested them, there was no flu or radioactive materials or highly reduced, but you have to listen to the other part that was discussed, they found the radioactive material and the residue of what they gave as a radioactive material in the water, in the urine and feces of the mice that they collected. (2:28). It carries the radiation out of the body, it doesn't neutralize it by creating something else in body, that's a big difference. We swim in the Ocean water, etc. and has swallowed part of it and it hasn't killed us. It's there but the concentration is different. The psychic people liked it, wanted to bath in it etc. Yes, because it covers a large spectrum of the needs of the body, we take things because we find them satisfying certain needs as a spectrum. (2:33). German guy says you can use unrefined rock salt, you don't have the pollutions, or radioactive materials in the water. They can also mine rock salt from deep mines and not evaporated Ocean water. (2:40). Agriculture presentation from Australia. He did experiments with Gans, Nitrogen Cycle. (2:44). Aquaponics using manure of fish to fed the plants. Only uses 10% of water as normally used in the ground. He used a double walled cup filled with CO2 Gans and soaked the seeds in that. (2:48). There is only slight different btn treated and untreated. Experiment 2, filled pipes of Gans around the plants, not much difference. Third experiment with Gans mixture floated in a bottle in the tanks. The roots of the lettuce with the Gans bottle had healthy roots, whereas normally the get brown and start to rot. second result the lettuce doesn't wilt in midday

sun. The harvested lettuce yielded 3 times in weight. (2:59). (3:06). Summary of results. Keshe replies, the Chiinese showed that the plants do better in frost and here heat, this is confirmation that the Gans is independent of temperature and pressure they absorb thte energy they need. Keshe asks about the flow of the water through the troughs. (3:11). For the farmer it's about a 30 to 40% increase in income. (3:16). Keshe explains that the Pl energy is like a sun it radiates its energy unconditionally all the time, so you have millions of little suns in that bottle which will radiate its energy for hundreds of years, the plastic will decompose but the source of the energy will be there. Change your plastic bottle at least once a month, because the energy release is huge, it doesn't matter to how many millions of gallons you apply it to. This is what happened in Fukoshima in one container 400,000 liters of water, a small amount of CO2 is good enough to clean it up. In the report on Fukoshima we saw a little machine cleaning up 400,000 liter tanks very rapidly, it's very simple, they collect the residue at the bottom of the tank so the top is clean, that's why you need such a little pump, the filtering system at the end is capturing CO2 collected off the Gans at the bottom. We advised them to pour the Gans at the top of the tank and it settles at the bottom, they measured the top and no radioactivity and empty it, dump into the sea, and filter 1 or 2 liters of CuO or CO2 Gans. The energy in these bottles will go for centuries, because if the sun dies a Pl dies. (3:19). Why 50 ml can treat 22,000 liter tank because it releases its energy in a balanced way. It was documented 7 years ago in Belgium. Here's a test you can do, if you increase the amount of Gans would that increase the harvest? Yes up to a limit, if you put one bottle in middle and on the end the circulation keeps on adding, would your fish grow in size also. Now that you have the bottle do you need the fish? Do we need to capture other animals to benefit us, now that we have seen the cycle, that it works. A couple weeks ago I was in Dubai, it was Iranian New Years, they throw the gold fish into salt water to kill them. Another experiment, hang CO2 Gans in the air, atmosphere and not only in the water, so at night they get CO2. (3:25). He knows his customers, Keshe says to ask in a few weeks if there is any change in the customers, if they have the social structure calmness because they receive from the plants what they were short of. Now through him Gans has become part of the food chain. He's the first person with Gans produced crops. German guy asks if you did this trial in very harsh conditions like in desert and cold climate, he think the results will be even greater. (3:28). We will be doing this trial in United Emirates in coming weeks, testing agriculture in desert. In Dubai every tree has a water pipe to it, they would die without it, he is trying to see if he grow with the moisture of the desert. In the morning everything is soaking wet. It's not the supply but being able to hold on to the water at the point of need. (3:35). Rick shows some Pain Pen, 3 little glass bottles of CO2 Gans with a pin going all the way to the bottom, double coils coated with CO2 Gans. Can you take a picture of the field flows. (3:40). Keshe draws a double coil G and M, which I always promote, and a Center Pin, you create mono fields, they go in a constant, when you start adding multiple layer coils each one creates different fields, he shows a graph, when you mix fields you get the jagged line and you have no control, you don't know what you are feeding, what comes from where, this is why I say do not use multiple (? center) Pins because it doesn't serve any purpose, people think they twist it back and they're connected, they don't know what they are doing. (3:42). Or what strength you're delivering. We DON'T PUT any GANS on the coils because it's enough, ?? a Gans the Cu, you put a CO2 on it, connect it to the E you have a Gans ?? Cu, that's why you then

decide it's going to be an E Pen or a P pen because it's CuO2, that's all you need to do. These multiple inventions, turning ?? you have to measure but can you repeat the same. Because when we do this ?? (single wire pen) we know the spectrum it's one continuous, here when you mix (multiple coil) then you have everything, that's why ?? the jagged line of Taiwan presentation, there's no pattern, no strength. The KF Pens are effective because they are concentrated, here you have disperse (-ment) , it looks good, you have a lot of things going on, but does it serve any purpose. If it's concentrated heavy it does its job. We have to try to experiment for the knowledge, but for what purpose do we use, or do we just deliver huge amounts of M & G fields hoping to catch something back or feed something. It's very much like the Pads do you want to concentrate to add. Why not connect the M and G coils to the Center pin that you deliver a homogeneous but powerful system, but let it be delivered in one end.(3:44). There is no use taking from G and giving it to ?? (M), then repeat this and make specific Pens for specific conditions, but now we don't have the knowledge, we are just making things, ? we need measuring tools, it's a mixture of ?? Should I focus on all CO2 in the pen, Keshe says we don't focus on anything we are all in the school of learning, we have to know what to do with the new knowledge, what is the result. We are testing things ourselves, do we need these for diseases. In the world of Pl technology there is nothing wrong, it's just finding what fits to where. There are many possibilities, but when you do mixture this is what you get. Maybe we have to use 3 pins because it gives a spectrum. Also depending on what Gans coating we use. (3:47). Your CO2 Gans glass bubbles on the top emphasizes on E, so maybe one you put CH3 the red one increases the energy for whatever it is. The CO2 one is very E, it touches the communication line. There is a use for the spectrum of fields in the health section for accidental spinal cord damage, when there is a pressure on the spinal cord it squashes the nerves together and breaks the line of communication. If we could find a way to connect the nerves, which are in the nano size from above the damage around to the other side below the damage. (3:53). Each nerve carries a specific bandwidth of info, it passes through the Nano material which creates a spectrum of fields and reconnects with its match on the other side of the damage. He has worked on it for years but has not yet found an answer, maybe the composite Pens can do it. Heather asks about using the Gans patches for that, he says it doesn't work I have tried it. You can try it. We can grow nerves anywhere in your body, if it is cut straight, when it is mashed up it can't be. (3:56). My agreement with the Iranian government was too only work on Space technology and not interfere in the health side. In Iran he tried to help a girl with a smashed spine, the body which was unable to move for 6 months started jerking and move, but he couldn't get any more than that, so the Nano materials can connect nerves. But we don't know how. When the sudden flow of energy to the muscles that have been dormant for long time creates a lot of pain to get it going again. The same with people in Coma and when they come out, it can damage the fibers. We had to stop because the pain was too much for the patient. It has been done with smashed nerves but it is just luck. (3:59). Keshe asks the Australian farmer to genetically check his lettuce to see what happens, we know that it changes genetically but does it go back to its origin. What is the change in the structure of the Lettuce. The GMO is when they take a plants genes and transplastex or mix it with a gene of an insect or animal to give it a certain characteristic, whereas a hybrid seed is a cross pollinated with other plants to get a desired outcome. The GMO seeds can only be grown once and not use the seed for the next season, you

have to buy it again next year. (4:03). Keshe asks him to take a GMO and treat it with Gans and see if its seeds can grow again. In India farmers commit suicide because of the burden of buying the seed every year. I know the answer but I want you to do it. (4:05). Renan presents a health case, at 3 years of age I had trouble standing up, doctors said muscular dystrophy. At 8 years he got better but then fell and got worse, now in bed and totally immobile. He shows lab test results. Keshe needs to consult with a doctor. Let us stick to the new Ethos, knowledge shared can be used. MaGrav Units are now on sale directly in Italy, distribution on the shelves in the stores. The new systems don't require 20 days to set up, just watch the meters.

108th Knowledge Seekers Workshop April 7, 2016

(:12). Keshe is in Italy. His plans are to go to Dubai, China (3 to 6 months), Africa, Italy, Russia, and USA if wanted. We do not expect to be in one place but to move from country to country to develop the technology. The Russian Space Agency is years ahead of NASA and we'll collaborate with them to make everybody equal. Rick is with Ali working on the feeding system. (:21). We are in possession of clinical report of TEPCO on the mice and human use of CO2 Gans. We call for international testing of CO2 by people not waiting for corrupt FDA who are paid by concerned parties. Only minute dosage is required. (:26). DO NOT CONSUME directly until collectively we can release the result. You can sign up to test these products. In a process we can control. We are looking for 2,000 participants in each group the lotion, eye drops, and supplement. You get a better result when you take the supplements and lotion or eye drops. Looking for these diseases, psoriasis, skin cancer. (:30). Retina defects and all sorts of eye disorders, cataracts. The Gans releases the energy for the change and then gets rejected from the body. Eye degeneration. The United Nations did a 5 year clinical trial in Africa to test whether circumcision prevented the spread of HIV, but after 6 months the results were so good that it was terminated and announced to be effective, , we can do the same thing. (:33). The tests for the supplements on people who have been exposed to radiation from Fukoshima, Chernobyl, etc., to see if we can get rid of the radiation in the body. It's being tested in Iran with nuclear workers, people who work with radiation in hospitals. People with Pancreas, stomach, and intestinal cancer we would like as volunteers if you do not see a solution to your disease. People who have been using Chemotherapy to take the side effects out of the body. Many animals were put through suffering for clinical trials as well as poor people needing to feed their family, for unknown chemicals, these beings can be given Gans to give back what society has taken. We allow 10,000 cases to run across the world in the next month. (:38). This is a huge data to collect. The next step is to develop usage for the Gans. We will not hide any data, it will be the most transparent trial in history. We welcome the Pharmaceuticals to join us, we are not enemies, to help humanity. Doctors are welcome to test Gans on their patients. (:40). Keshe received a high dosage 8 years ago of radiation in the Iranian Spaceship Program, he still has side effects and is one of the volunteers. To help change the patterns of control and the damage that has been brought in. (clinicaltrial.keshefoundation.org). A whole body Pl Unit, standup vertical, has been built in USA and hope to show in Dubai, fully computerized. His life work he is giving to humanity. (:48). In these trials we are not just

looking for the P changes but how you change E. For example the first time they tell you that you have Cancer a lot of things goes through your head, what about my loved ones, what am I leaving behind, then you go through the Chemo, in that process you analyses your life, you usually come to one conclusion, what's going to happen now, what about if, can we change the position, think about trying KF product. I never rejected Chemotherapy, because from my position I know how it works, but I see the damage of it, if you take the side effect away. Let the chemo dissolve the cancer, do not let it come back and remove the side effect. This is what we are looking for, not to let it come back as a secondary cancer. We will monitor you for 10 years, how you change P and E, in your behavior etc. We want to understand the behavior of a man after he got a death sentence and now he knows he will be free. Do you become a better person, more understanding, peaceful, and more interactive in creating peace. (:52). We are looking for American soldiers who got damaged by all sorts of chemicals and returned back E and mentally changed. There are a large number of soldiers effected in Iraq and Middle East, and many committed suicide. We think that the change of digestive system through E, through the Gans supplements will change the mentality of the soldier. We call on the Publications of Veterans to promote these supplements to the American soldiers to change their lives. 10,000 volunteers is not enough because we don't even know how much damage we have done to ourselves. Those effected by AID's, this could be effective, Hepatitis B, or inherited blood diseases. In China we will work with TCM and Yin and Yang. (:57). Opens door to pharmaceuticals to cooperate with trials no need to come through the backdoor. (1:00). He Shows the Pain Pen by KF, CE certification. The blue color represents the Earth, and the Pain Pad. In coming weeks we announce 20 new products. The new (2nd Generation) Power Units work now and testimonials are on website. You don't have to put it through the 20 day conditioning, don't put more then 500 watts into the units, slowly you'll see reduction in electricity. A school is using only 2 units and it's working. (1:06). (1:09). Man is combing MaGrav with Solar cells and they are getting N coated. Have to see how it does. (1:13). Shows the system built for breast cancer and within 2 hours pieces of the breast cancer fell off, he shows the pieces. He shows the system, when I touch it now I feel the power, when you put it on your arm it creates a condition. (1:16). Inside is one of the most powerful magnets in matter state, they can break the tip of your finger, ?? .. the Pl state is more powerful then the Matter S that's why the magnet doesn't work much. In the center the field forces created by the Gans inside is more powerful then matter. The electronic pen stops writing when close to the system because the Pl field forces are so strong. (1:20). We use the matter state to change the Pl state. This system works not on the matter but the E. The system creates field forces that are Pl and out of control of the ?? matter state of the environment, they are so powerful they override matter state. When you build the system know that the cause of the cancer is E, you build it to operate on the E and not the P, and in that case for what the E receives and he finds with his own balance that he is prepared to negotiate or release part of it. I have pictures of it. Breast cancer when a woman tries for it to go away, (ignore it) and it doesn't, it goes outward from the breast. When she ignores it the breast grows out some and mushroom appear, starts at the tip of the nipple, every time we put the system on within 2 hours according to its E level it decides which piece (of the mushroom) it doesn't want to have, which piece it likes to reject that its E balance in the brain connects up. This is the first time we show a medical E Unit, even though it looks

to be P attached its space is in touch with your E. (1:24). It takes the E about 2 hours to release its info for the P to carry itself when it is externally dictated or positioned, 2 hours for the Pl energy to communicate with the brain. He has some of the breast and the hospital froze some for future development, it became totally black inside and they couldn't understand how it's possible. The first time you see the power of Pl which the matter state creates to become E state. This is how the Pl in the Gans supplements will work but in a minute power, not as powerful as the system, but still about the same. You receive the energy in respect to what the body would like to take, E carried to the E and back into the change of Gans state, your body is in a Gans state not matter. (Getting bombarded with microwaves .. switching it off resets it) . (1:27). The MaGrav systems in the Ambassadors Meeting we showed the American drill operating at 110v and the European at 220 volts on the same system, is the principle what you would like to use as a system. You decide what you take from the source, it's the same with the breast device. The E decides what it takes and in that respect that E balance allows so much (the mushroom falls off), because the body hasn't yet sorted out the E which was the cause of the cancer to start with. The problem we had with this case was that, when you lose such a big chunk of flesh (mushroom), it's a live entity, some are 10 to 15 gram pieces, separation, body letting go of what it doesn't need, we have not yet found a way to send the info for the healing process that the wound can seal up immediately, that the blood circulation can seal itself, these pieces the size of a finger just falls off. When you cut your finger you lose a lot of blood, so every time one of these pieces fell off she would lose a lot of blood, there was a need for blood transfusion by the hospital, they cooperated. We can dictate from the energy to the matter state with use of the Gans, into the Pl state that through the neural system can decide what the body doesn't need. This system was built 7 years ago and tested 3 times and proven correct. (1:30). This means that if we can use this technology with say ILS, MS patients, because it's the operation of the E which decides the paralysis of the leg, arm, or anything else, if we can energize the E that it decides to convert and change the position of the paralysis to (normal) use (again), ?? you make the reverse of this structure ... here you allow the body to decide, the reverse is if you enforce a change of support, then the man in wheelchair walks. This is how we brought the Coma patient back to life. You allow the body to find its own balance in the E that can feed the P, you can even interfere in the P ??, if the body needs to grow the legs, without the leg it can't work and the family suffers, you an use this system and the N coating and speed up the growth of leg in speed of lightening, because the demand for the change the brain does not have that energy to replace so quickly, you speed up by giving what it is short of. Like when you are pregnant the doctor gives you folic acid because it's radioactive and releases huge amounts of energy (for growth), now we have the possibility to speed up the growth of organs, reduce or remove using the new understanding (system). (1:33). Because from now on we don't go and P interact for change (with chemicals), we allow the E which is much stronger then P as you saw with the Pen to dictate the change. You can start speeding growth, if the E, feeling, the soul for the loss is needed for justification of the existence. This is the first time we see an E Unit, its operation can effect the P because we have seen it, have it, and can observe it. The new approach in Health application is totally different then what we are accustomed to for centuries, because now we are going into the essence of the Creation as we understand, the power of the E is stronger then the power of the P condition of the Pl in a

Gans state, so we can change. This is a major breakthrough and we offer the Gans in tablet or lotion, we do not go to touch the P part of the body in the Gans state, we go to support the E to create the new condition. When you put a concentration of the Gans which is E controlled you satisfy if the cancer is on the skin, the E which caused that cancer and supporting the E the P changes, it's not magic anymore, it's understanding the knowledge of the health of the man. (1:35). In Space we have to understand the changes not to find a cure, if you understand the process we can change the condition. This is important because from now on you will see miracles, man in a wheelchair will walk, because we can change (the conditions). I can show you a number of people walking using this understanding. Using this technology to handle the E rather than the P. I used magnetic to support the Gans in a specific condition. We want the world of science and medicine to interact with us to see a new way to overcome the diseases which we have no solution for. (1:37). I used such a strong magnet and yet there is no attraction to iron, the creation of the Pl with a minute amount of Gans has changed the Pl, with the magnet you hold a position of the Gans, we told you that the N material and the Gans are of the same parameters, strength that one can hold the other for the other to impose its power. I give a warning to the military people you'll be amazed how we can capture the most powerful spy planes in the world, Satellites, controlling systems is magnetic, we are there (draws a line on the electronic board), we are not there (moves the pen but no mark comes out, the fields have blocked), that's how the Iranians captured the most advanced Spy drone. The Plasma is so powerful it makes the present tools of war obsolete. The Americans in Brussels asked him to explain how they captured the spy plane. We will bring peace by the advancement of technology and not by the fear of it, but by the power of it. Don't forget here we have a matter state, (holding the breast device), in the Space technology blocking of the frequency we have dynamic Pl reactors, the gas nuclear based supported by Iranian government. (1:40). He again shows how the electronic pen on the board stopped functioning due to the Pl fields. He shows the power of the magnet in the device. This magnet has a balance of AA, it took me years to develop this. I have been asked by the World Leaders to be very careful what I say not to disturb the balance of the political situation btn 3 or 4 powers. Now you are all in the same boat. (1:42). I can do whatever I like in there (the setup Pl field) because I am invisible (shows that the pen doesn't write). Are we going to spend the money on Military which is useless or on the new technology for the peace of this planet. We have to work with the military to show them the technology for peaceful application the anything else. I will start influencing military forces into peace forces. This is the force of the Pl in a minute structure. Colonel Hanky carry the message to the White House there is no use, now turn to peace. (1:45). We can create a zone in which no bullet can be fired, because we can replicate forces which create the firing of a bullet, if you can block with such a small thing, no bullet will fire in Syria. The knowledge is in the hands of the KF supporters it's not mine anymore. We have become a force that can change the course for humanity for the application of peace. Now you can understand how the Russians managed to cripple the most advanced American Naval ship, creation of the triangle, 2 planes in space and 1 submarine, created the same field you just saw with the breast device. The Iranians passed on the PL technology to the Russians and they have applied it twice. (1:47). Twenty seven officers handed their resignation, "our government cannot protect us". You could see everything but now communication. We put the hand of peace to all the nations to stop production of

the tools of war. We can allow the missile to explode on the launch pad. The way it was done in USSR to 13 satellite countries, converted the war machine to peace industry. President Obama your term as president will be remembered if you push the button of peace. allow the KF manufacturing to go into production, support and finance it. Extend to China also. (1:49). No advanced Nuclear warhead or aircraft can be used from today onward because if you manage to produce the elusive rotating reactors or the coils, now you have seen it top (more powerful system), position in the right place you can clear hundreds of kilometers. He tells how the Russians did it, ... you decide the field strength, like the mother to the child you never lose your connection. How can we enforce peace through the new T, by using and showing its peaceful application, by bringing the nations together to invest in the SS program that allows all the humanity to benefit by it. We have no choice. He invites the 3 powers to meet at KF. (1:53). The Chinese government to be the flag bearers of peace with the new technology. (1:57). Why I had you coat the coils with ZnO2 and CO2, the field forces released by these Pl in bringing peace to the E of the man, the soldier was trained to have an enemy and that E gave him a reason to fight, when there is no E to fight is there a need for an army. In 10 minutes I can destroy all the knowledge man developed to kill each other, with a few magnets and some Gans that you don't even know if I put them in front of you. He shows 2 systems that eliminates Prostate, or Womb Cancer in 2 hours, because now I can dictate the location of delivery. These systems are the stone age tools of Pl technology. (1:59). Shows his most powerful magic, you have a power supply which you plug in and a "consumer", you can build these at home and walk away from any cancer. You connect it to present electricity, G to M and place it on the cancer point, you sandwich the body with 2 systems, then plug a light or power draw in the "consumer". The electron vibration to Pl pushing everything out the other side. (2:03). You can change lung, brain, cancer etc. This is the first time we show a portable unit. We used it United Emirates and the instant we connected it the cancer pain disappeared. The man stopped the treatment because his life was so miserable he wanted to die, but after 3 weeks he came back again. (2:05). You can't just use these systems, have to know what you are doing, the N and Gans coating have to match the Organ, understand the Kidney, liver, etc., the cause of the cancer, is it Ca, K or Zn initiated. By introducing the right Gans you act on the seed of the cancer. He draws the new system again on board. If it is caused by Zn you see a high level of Zn in the blood, means there is an E problem because Zn is connected to the E, then use Gans of Zn on both sides in the cores. (2:09). The tumor has a seed, we can reduce 80% but the remaining 20% we can't do, but with the new system you attack the center, in a way the cancer became like the American Ship, you block it, you dump it and now take the seed out. You don't destroy the seed you change its energy because it's indifferent with the balance of the rest of the body, then there is no need for the cancer to be there because now it is balanced. The Space Technology DOES NOT DETROY it collaborates to bring the balance. You take the essence of the cancer out of the circulation. It takes 2 weeks to get the test results, but study the rise in minerals and metals in body, the rise shows that this material is going to be used for the seed of the cancer across the body, you have to understand how to change the parameters of that material to change its strength, you target the whole body, the seeds are already all over the body, you said the cancer came back but actually it never went away. in this way you get all the seeds and the cancer doesn't come back. (2:12). Since all the seeds are changed there can't be a second cancer.

This is understanding the technology in its true essence this allows you to bring back what understanding and apply it in the other. Not just copy cat from one thing to the other. Do we need to go step by step or men of science realize there is a change and let's do it together to bring the change much faster. (2:16). He shows an even simpler system he uses on himself for shoulder pain, one end into the electricity, the unit has to be fully N coated or get electrocuted, plug other end into a usage, you hold it with the thumb over the totality of M and G, this is the connection btn the P and the E, what is the cause of the pain, will understand, will be balanced, but you need to be able to move it out of the body, so you can hold another coil in other hand. Power MaGrav System, you twist it into a ball instead of the flat shape you receive the totality of the energy, these are portable systems which you can keep at home the minute there is a pain you can use, the same for the cancer, now you deal with the Pl, this is much more advanced knowledge to be able to do this. (2:19). To control any aircraft all you need is a hand held system to adjust its field force. I didn't develop this to stop the American ships, they are our friends and brothers and equal to all of us but they have chosen the path of killing as a way of control, now we end that control that we are all the same. I developed this for Space travel, you need to be able to control the space ahead of you. (1:21). The control systems for flight, 6 inner and 12 outer, he puts the system over it, I need field protection for motion a strength enough to dilute any space particles, you need it. Now you can dictate the strength of the field protection in front of you, it's huge you can span stars if you know how to do it. It was created to give ma protection in the space that you can control the spans of the U at the high speeds you travel before you get to it because it's so far ahead of you ?? This was the dream of Reagan, Star Wars Defense, this is the true SS defense system. (2:24). You can open or close it depending on how you change the fields. How easily the higher powers can change the lower powers. This is the protection fields he had around his house, I can extend the fields as I want, I can receive any frequency I want and shield out what I don't want. The Pl shielding is so powerful it will shock even ??, I can even stop a satellite, we can stop use of the military satellite. Don't forget GPS came out of the change in the structure of the USSR, they used the surplus satellite for locating cars. Every man has the power to test this, but please do not block communication satellite, we need them. The child on the rooftop will force the Nations to peace. This science was explained to the CIA on the back of a napkin in a cafe behind the US Embassy in Brussels, you are informed 4 years later. Can be used for both curing disease and bringing peace. (2:30). How to create that peace without the fears that others might use it, trust in your soul that your decision is correct, they carry the wish of the man. This is coming from the U community that we bring peace to this planet so man can enter the space and know the advantages of peace. Everyday we break more barriers bring more trust more knowledge that forces man to choose peace without shooting a single bullet. (2:37). Rick is testing the feeding system with Ali. The first thing we did was extend our love and peace to the whole planet, just to send and not receive, then wish for balance in our own bodies, use the palms to connect with the energy, there was a surge of energy. The third step was to connect us to our family members which takes longer, and connecting with family members with any problems, use our bodies as transmitters, Rick's old knee injury started aching. (2:41). Melanie asked for permission to go inside the unit, she felt and say the angels some deep healing going on, and an E release. The one guy is sensitive to the fields. (2:44). Discussing experiences. (2:59).

Keshe comes on, you can attend Trump's meeting and carry a coil with you it will effect the whole meeting. We do not interfere with the politics but effect it with the systems. (3:02). (3:06). Keshe ask Bizon where he felt the sensation of entering a barrier, E center, Heart, bumpiness feeling. (3:09). Keshe says when you walk into a strong field you tend to bend, tickle factor, this shows you enter a Pl field that is the strength of your body, before that you are in the atmospheric condition, this is a Coulomb Barrier of your system, the environment you enter, you can fee it gong from the front to the back as you walk into it. Ali the next step is for you to find that point that all of you agree to be the barrier, where you can feel the force more stronger, then start to adjust your coils in one direction until you start to see light, the MaGrav in the center is a very powerful system, you need to adjust the core based star formation slightly, then at the point you feel the tickle factor, the boundary, you should start seeing shimmers, then the solid structure of your Spacecraft, by moving the base cores back and forth try to feel the strengths reduce or increase. That MaGrav will give you the total energy you need for lift, you can control it because these MaGrav S carry CuO2 and CO2 we deliberately loaded them that way for future use. Adjust one of the base coils on the open side not near the walls, you should be able to create the first shimmers, the "bright lights in sky", ... you create a Coulombs barrier which is btn you system Pl and the Pl of the planet, ... then you should see the first SS structure. (3:13). Be careful you can't ?? walk into it to dismantle it, because otherwise you have a structure in the room you can't do anything with, because you can't get in to get it sorted, start with one side as you said the energy field is very bumpy, you might see the lights to start with, it doesn't matter if it takes a month or 2, if I was there I could do it within a day. Part of creating that shimmer and the structure is the control of your own E, the desire to create peace and bring the balance. ... (3:19). Mexican guy shows his coils, the disconnected coil lights up, Keshe asks him to find the boundary of the light meter. (3;22). That's your shielding, the barrier of your field from your coil, the extension of the Pl is huge. (3;26). The boundary on the top is bigger because the table absorbs part of the Pl, if you could hang it in the air the fields will be larger. You can create layering of shielding. All of you in this position are on the verge of creating a SS. Creating the matter state tangibility out of the Pl M and G fields, because you carry the external and internal creates a total spherical condition, the field forces are having both G and M and the M internally while ?? G ??. The center ring is tangibility and the outer is shielding, the inner ring creates the dimension of holding on to, and the other one, which is the outside ? creates the balance condition. Inside the tube coils is the CO2 Gans, distilled water, N coated Cu coils, and a little bit of the N coating process a blue liquid, and the ?? tomatini. He made a second tube, this is genius. (3:34). You are combing the core system with multi layers cores, 3 spheres inside each other. Make sure the heaviest of the Gans is in the center core, and the lightest in outer core, the heaviest in center will attract stronger G pull to extract the fields from the environment, CH3 as a lighter, which is the giver, will become your M field, your system will work perfect, in between try CuO2, try to use a ?? metal absorber, Phosphor, or the Lead Gans for the center, where the attraction comes. The amount of Gans is not much important, but the way you load it is important, because if you mix a small amount of Gans in a large amount of water it will stay more effective then loading huge amount of Gans in little water. (3:36). Because when you have a little Gans the field effect is still the same, when you load the systems you can maximized the fields of the Gans and then heavily loaded it will be ??

hard. Try to use a moderate amount of Gans not too much but use more liquid water because the interaction btn different layers itself will create the MG field, the MG field of the planet is not by all Pl in the middle, it's the Pl being able to float within the centrifuge rotation of the inner core, take that into consideration and most probably you create a huge M field. (3:41). A video of a group of people interacting with the Pl, they were holding the Pl that was covered in plastic so no electricity was touching them, but the AC voltage detector was giving a reading of current. (3:43). (3:44). He shares some Gans he made, inside is a Cu plate, Gans of Nickel, CO2 but he put something in it became whiter, leaves of tomatini with CO2 Gans, added Apple Vinegar to give energy can make batteries. (3:49). Keshe says maybe if we use Apple Vinegar with Gans of Cu as fluid maybe this gives a new more powerful operation of battery, instead of using the salt, use Apple Vinegar btn the two, you may need CH3 as part of the mixture. If you use a P Pen coil with it you'll get more powerful energy, because the energy released by the Gans gets absorbed by the N coated coil and becomes a very powerful energy, where you have separated the matter into a N and then made it to a Gans and if you Gans is more powerful then your N matter state which you put in it, the field forces from the stronger Gans will force the energy into the matter state and then you can pick up energy in the Pl condition in the matter. They have inserted N coated material into the Gans material and we see a very powerful energy. (3:51). Bernie talks about putting N coated coil in Gans, we are now able to tap the energy of the Gans to any electrical system this way, one thing we should be able to identify if the Gans is more M or G, ... the G will always connect with the M and visa versa. (3:54). The Mexican was making capacitors without a shirt, he could feel the energy of the Pl on his skin. He felt he was burning inside. Another thing happened the lady he was having an argument with felt energy coming from the cube to stop the argument. (3:57). The lady went to a group that was not very friendly but after working with the Pl device the behavior became friendly. Keshe says carry Pl reactors to the Trump meeting and see if we change the man, maybe he'll find peace rather then the fighting he creates. You are confirming what we said you change the man so he does not know why he is carrying the gun. In Ghana the Gans that they are producing they see a huge change of energy production by adding starch into the Gans. (3;59). It has the parameters of the C and H like CH3. In the factory we add a small amount of NaOH to our Gans coating of the N coils, which guarantees the coating of anything left?? (maybe blank spots of N coat), it continually resurfaces itself. This is part of the new generation of Power Units because it can never be damaged. If there is a scratch during the transportation, the moisture in the box it will create a new surface, so the systems cannot fail, but we have been adding a small amount of sugar or CH3 into our Gans when we are coating (the N coils), but the development in Ghana is much easier you add a little starch, you guarantee the starch is ?? always there, it continually produces a Gans of H available for energy release, so your systems become much more powerful. (4:01). He showed us the Gans of Tomato (Tomatini), according to research with tomato we see a huge reduction in the number of Prostate cancer in Italy, and in the Italian community compared to the rest of the world. When you cook tomato (with the skin) at the skin level it creates a chemical effect that interacts and is beneficial for the Prostate cancer. For the health try to make a Gans of cooked tomato with the skin, replicate the energy of the tomato in the specific reactors and coils you make, for Prostate cancer. The Pl energy of the tomato effects the structure Pl ?? when it is absorbed in the stomach as a Gans, which

it is in balance with your Prostate, certain prostate cancers. (4:04). If you can produce a Gans of cooked tomato with the skin, there is a layer in the skin of tomato which is in balance with the balancing of the E of Prostate, within weeks it will have a different dimension to it. (4:06). A man in USA built another full body system, and each coil can be removed. You can change even the n coating for certain diseases and just insert it for that disease. He also made a helmet that is completely adjustable and removable. (4:09). You taught us that we need to give before receiving, if he treats the device as an entity gives love and gratitude, then he feels a huge wave of energy that lasts a couple minutes. he asks for Peace and waves of energy goes to that part of body. A lady says she sees a field around his house, and recently she said she sees a field of energy going from his house to his neighbors and to the Mountain near by then she saw a formula in sky, H2O, CH3, NC. (4:13). He is a medical doctor. Keshe says he wants to add to the knowledge. You have made a beautiful friend now you have to add to it. You have covered the top of body now add section to the leg part. (4:15). It has to have a specific structure, you need 3 coils and not 2, in cancer you need to reduce the strength of the Lymph, the outside Coils have to be M which means they take the energy away from Lymph outside the bone, the center ones have to be G, you bring energy once the Lymph crosses the bone and becomes part of the B marrow now you energizes it that it increases the immune system. (4:17). You cannot connect the outside to the inside. Uses Giovanni as model, outside is the muscle tissue inside is the bone, first you shrink the Lymph so it passes into the bone, then energize the B marrow, you allow the body itself to create its own protection. (4:19). Keshe goes over how to build the system and work with Chemo and bone marrow.
Discusses a case of a woman with Breast Cancer moved to womb and up the spine to brain, all via Zinc, he says to de-energize the Zinc to starve the cancer.
(4:34).
(4:36). He shows how to connect the coils ..
(4:42). Use the helmet only 2 to 3 hours a day ...
Wash the bone channel with a strong CO2 and then use a weak CO2.
(4:42). Control how the brain cells are produced ..
(4:48). This teaching is for doctors don't just randomly do things, we have to proceed correctly.
(4:49). Bret wants to remind how to make the pure CO2, (confusing) ... high voltage produces mainly ZnO2.
(4:53). We'll teach the doctors separately on Tuesday. (4:58). After May 5th we will start specific teachings.

109th Knowledge Seekers Workshop April 14 2016 (Universal Council, Beginning of the True Plasma Space Technology, Liquid Plasma,)
(:10). Representatives of World Leaders will attend. (:13). The World Council will be independent of any government and will replace the United Nations in the future, which is now run by 2 countries. For the first time the U Council, represent the totality of the human race in a proportion according to their life which means no borders, and it will have its own security force to handle the whole thing. It will be independent from any government or organization, the KF manufacturing will fund the Council and pay its

members to serve humanity. (:15). WE do not wait for someone to donate nor dictate the conditions, the work of the Council is so balanced that no person, governments can ever influence its decision making. I will lay down the law how it will be run, and they have to be aware of all the weaknesses of Man that it becomes his strength. We move away from the present false info, false wars, false documentation which has destroyed the credibility of the present United Nations, calling for wars, killing scientists and then escaping under the protection of the UN passport. This will never happen, the Council will never issue a war nor anything to destroy a single life, its work will be to support peace and find a solution in that process. (:17). Details in Dubai. (:19). We will release a new technology today, we finish with the attachment to matter state, bring more Pl technology to front. We explained before how we helped TEPCO decontaminate Fukoshima. (:21). Our involvement has been covered up, and now they cannot tell their nation they have collected tons of gold. Some internet links, Japan releases the Tritium waters to the ocean (April 13, 2016), UN could not allow it if there was Tritium in it, it's one of the most dangerous elements in nuclear industry, they banked trillions of dollars in gold. (:24). Another cover-up, given to American company and sold to the industry for millions. They used Pl technology to cleanup Nuclear contamination. The photo shows the end product a white material from the KF, that is Nano gold dust, it confirms what they have done. Nobody but the inventor knows what is shown. Nano Gold has the capability to absorb most of the radioactive materials known to man, wash the filter and you have the gold. It confirms the Pl Technology. (:28). the white powder is the Nano gold. We are here to serve humanity, it doesn't matter how humanity deceives itself or the others. Keshe has approached 3 Nuclear nations and 2 have accepted to analysis the data to protect humanity from nuclear disaster. The Gans trial starts today for Gans Lotion, eye drops, and supplement, to see how it changes the structure of skin. (:33). These products cleanup the contamination in the body. You test and write to us what you have seen and we leave the data for the scientists to analyze. (:35). The Gans supplement is a natural material on the KF website. It's good for Ulcer, high BP, Cholesterol. These tablets are a MaGrav Gans they are E balanced. We will launch products on gans.org. If you have parasites test the Gans for it. (:41). With the eye drops for Cataracts, E it means you do not want to see the affairs around you with the eyes, it too harsh for you, when it comes to the E with the sight the body decides to close the sight and does not want to see the pain of life, what causes it pain. Cataracts is principle is psychosomatic, these processes carry both E and P changes so the eye drops should work good for. Someone asked about for when they put in new lenses, Keshe says no because its a synthetic material. Please do not use this for any eye operation. Rick reads page. (:43). Change healing to processing. The lotion works direct on burns. Supplements for Migraine, it changes the E which leads to headache. Joint use of drops and supplements. (:50). Shows the piece of cancer from the breast which the body rejected, for the first time in knowledge of man. They never seen that the body itself rejected the cancer by use of a simple system. (:52). Immediately on the balance of the E will show how the body rejected, when they cut open the tumor it was black which means it wasn't active. This shows the correctness of technology. If you have Leukemia and would like to test the Gans. There are millions of suns in the capsule some of them will take the position strength of the system that the body will reduce or expels cancer cells. (:56). With this trial you have to sign an agreement that you are a human volunteer to help the others knowing what the technology can deliver. (1:07). We

started with the matter, Cu, to make Nano coat, we changed the molecular matter to the N singularity of the atom, we still are manifesting a matter state, we created a new environment for this to happen, later added a second environment the Salt which allowed this matters to become free agents, Gans, we have a Pl which manifests itself as a matter state, we know it creates effects. (1:11). This is the teaching of the Man up to today. The first time we showed the massive power of the Gans at the Insano at 129 Tesla, we saw the cleaning of water in Ghana, the coating on coils to create energy, Health application. up to here we have a mixture of the power of the Gans and the energy of the Pl. (1:14). In the Space the interaction and strengths of the fields leads to the creation of the conditions of the Elements of the U, what we need is not the matter state but the replication of the U with the presence of the fields, but in the world of man we have tools that can facilitate this presentation. In Ghana when the Gans put in water we saw sediments and the destruction of the viruses, germs, we know the power is there, then we added the Gans on the coils, people reporting a hybrid energy btn electron vibration and Pl technology in reducing electricity consumption on the bills, In Australia we saw minute amounts of Gans to grow the lettuce 3 times its normal yield, we have seen all these hidden energies. It's time now to harvest these powers. (1:16). To be able to harvest we have to be able to separate the Gans in separate states, to one mono Element otherwise we cannot do. ... (1:18). Two years ago we had the Gans in the glass balls rotating, I referred to this element, the Gans went to the outer wall and the water inside with a hallow center, I said that the water is in a state of Gans, because the replication of this is in the human body, the structure of the water is in the Gans state and not molecular water state as we consider. This was a turning point but nobody understood. (1:20). When you carry a info of the Pl MG strength into a matter, the matter keeps within distance and structure, the info of the Pl condition because water itself on this planet is M & G, that's why we get germs in the water and contamination, because it allows to absorb and hold onto due to the G property of the Gans mass of the O to most of the elements which comes into it, that's how you get contamination of the water, due to the G mass of O. (1:22). The photo of rotating (2,400 rpm) Gans ball, where the Gans of the heavier Element goes to the (outer) boundary because they are partially interaction of the matter state condition of the Earth, the water stays in the center, and the hallow center is the Principle Matter, (the Photo) in center you have a vortex, a hallow center, water and Gans on the outside. The water is in the Gans state and not matter S because it's surrounded by a ring of Gans which itself is G and M, the water as Gans is a carrier of information, of energy of the Gans S. Benjamin in Ghana tests introduced the Gans directly into the environment (water) and we saw the change of the water. We saw the power of the Gans in rotation in being able to dictate the condition of creation of a Gans water and separation of the higher order MG fields which was in the center, what happens is the field forces of the Gans push in and as they receive they have to push back, it clearly holds and creates this massive environment of empty space, full of energy, this itself contains a huge amount of MG fields it's more lethal if measured from the field point of view, and reduce it like a number of Hiroshima Bombs. (1:27). The Ghana water tests brought us 1 step further in the whole totality, they cleaned the water with the Gans. Gans has a power that interacts with the MG fields of the Water can create field forces that any sediment comes out. Then Renan unknowingly moved away from the Gans to the true Pl Space technology. Bernie broke the understanding, when one understands then I share the knowledge, that's

why we brought this forward today. We do not need to have the Gans of CO2 to carry the energy of CO2, same with CuO. (1:31). Ali Feeding System they said we feel a bumpy energy field, why it's bumpy because you did not use the correct mixtures, we do not use exact mixtures in all the cores and coils that's why it's bumpy. Introducing "Liquid Plasma", (liquidplasma.com and .org bought this morning), for launch of new Space technology, we have gone from the use of the Gans itself to the water of the Gans, which is the true Space technology for motion in space. (1:34). Photos of contaminated waters in Tokyo, using only the water on top of the CuO Gans to clean the contaminated water. For the first time we show that we can carry the info of the MaGrav of the entity within another structure in the environment of application, if we go to planet Zeus and they don't have H2O but use K instead now the water of K is your mixture ?? .. (1:35). we have the water which carries the embedded info into the Pl MG field inside the Pl of the O, the separation of the sediments and the formation of the vortex in the center, same as with the rotating Gans balls, the last picture shows the total clear water, we have a homogenous Pl field, it still carries the info of the Pl fields of the Gans, because now it has multiplied, divided and balanced with the rest. We don't need to carry every Cu, Zn, etc. (1:37). and worry if we got the mixture right or wrong, is there CuO or something else inside, now we transfer the energy of the Gan to water, when you make a cup with the water in it you have every material in a homogenous level in the water, this is the Liquid Plasma (LP), you don't need the matter of it, you add a few drops of the water of CuO, Zn, Co2 and you start building the first core independent of the material, ... mutation of Elements. Now you have the totality of the structure, not needing the matter but carrying the property of the matter. Arman is building a reactor with the Gans Elements of the water. We go back to the cores but instead of filling them with the Elements that they create P separation, now we deliver a Gans with all the MG fields inside it that the core itself becomes a homogenous LP. Now you have a core there is no matter state of separation, you have a Pl which now behaves very much the same and near enough to the Pl of the center of the Sun, and in interaction of the different strength Pl condition leads to creation of homogenous MG fields and prepares man for deep space travel, now your reactor and cores will homogenous (fields), and if you understand what we explained about the Salt which is the linking direction btn the 3 and you can create the Gans of Salt, your SS is ready for flight. (1:40). It will manifest homogenous without bumps, and uniform, because now you make a pot of all the Gans's you want and this time you don't need to measure, more or less it's totally equal in each core. Welcome to the world of Space Technology we had to wait 2 years for man's knowledge to mature. He takes a crystal glass, the best material for space reactors are crystal and ceramic, because when you have a crystal ball and fill it with a homogenous Gans of matters, now you will have a perfect dimensions of interactions. The Taiwanese filled a crystal with Gans and they see the power. He adds water to different Gans's and then takes a few drops into the water in the Crystal reactors. This is still not complete we still have 1 step to go, but may wait until somebody comes to it before showing you now. (1:44). We have brought the energy of the Pl, which we have shown in Australia (Lettuce), Ghana, etc, that the energy is contained in the liquid. We have confirmed the transfer of the energy in the medium of the water, we are not dependent anymore on material, we only use the energy of the Gans. The water of Gans will last thousands of years. (A guy comes on about the water in atmosphere, be patient we will come to it). The people who made the U feeding

Systems it's for you to start new cycle of tests. (1:47). Now you have a Gans of orange or meat, you just need to add its water to the container and see how long it can last, when you add it, it multiplies. (1:48). I wrote the paper about the correctness of Homeopathy because the world of science doesn't understand, it carries the vibration of electrons, but in Gans water we don't carry info but just Plasmatic, they are totally different. Those doctors haven't understood the truth about the creation. He adds the waters together, now we have a homogenous non-matter condition Pl which if you create a centrifuge rotation, **in respect to its environment** , now you can create a homogenous base core reactors and the top core, and start seeing a homogenous structure and fast approach of the takeoff of the man in the condition of a SS, those who deny this deny their own existence, because the structure of the skin, and every organ, being intestine or eye is created out of 3 layers the interaction of the Gans's reinforces, and how they create their own image. If you look at everything in your body, every shape, size of, every Element in your body. He goes back to the board, earlier drawing of the rotating Gans ball and separation of Gans ot outer and water middle and empty spare at center, this is the same as how the eye gets created. The kidney is same process 3 layers creates the field hallows in its structure to filter according to the strength of the matter which comes to it. Look at shape of heart and how its cavities are created by the structure of the 3 layers of the skin of heart muscle, creation of the cavity in creating a given MG field as in the center of that circle is the essence of the transformation of the Elements from on e position to another, (1:51). extraction of one to another, the urine in blood goes everywhere in the body, from the toe to the head, but only when it approaches to the MG field of the empty space in the gap of the kidney, Because it matches it, it transfers to (the kidney as matter state urine), that's how it cleans the blood. The body doesn't even carry that much Lymph from outside the bone to inside bone, it carries the MG field, which in part of that process the fields of Phosphorus and Ca is added to it and in the confinement of the bigger gap in the center of the bone manifests itself as a bone marrow in a Gans state, becomes your DNA and in an energy level becomes RNA. Now you have built the first reactor without the Elements. The true Space technology that is not dependent on the matter but only its fields. In the Space you rely on these kind of condition creations to absorb fields from the environment in space that you can feed or create motion and energy. (1:53). This is not the end, you are still in the ?? matters energy, .. matter state of the world. The next step needs the man of vision to understand the totality. We saw the energy of the Gans floating in the bottle feeding the lettuce, the energy of the 129 Tesla floating to the reactors meters away, it means the Gans state is independent of matter but it can use matter if needs for it to be carried to become independent. There is one possibility out of many, void the matter state to the next step, you have the crystal cup with the Gans water in it, he draws a lid with a tube to a reactor, says to evaporate and separate the water into (the container of) a reactor where all the energy is delivered and you carry a total Pl without matter state. (1:55). We come back to a paper I wrote, "Unified Field Theory of the Creation". Now you take that evaporation in the direction floating the Pl into the containment where you only take its energy in a Pl condition mixed and by enforcing it, increasing it, you can travel the spaces the U without the matter state, and this is the creation of the U and the unification of the creation of the M fields and creation of whatever you want to call it. In one stroke we finished with the matter state. This process I call wafer Plasma because you create Pl out of wafer and it's used (waferplasma.com was bought today), because it's free for the

whole humanity to add to this knowledge. Carry on testing the water because we need you to add to the knowledge of man, and those who go to the wafer Pl condition, by taking the water out of the circulation and you allow the free energy to be delivered you will have True Pl with no matter state. (1:57). But in all these processes use all your elements in N coated that the fields transfer through .. if you can create a Gans state pipeline that the Pl doesn't release its energy at all to the Gans but the ??? that the Gans energy can go on. There are technical details that we come into once the others understand that you can extract the energy now from the glass directly without ??, this is for now. We have entered into a true Pl, an unconditional copy of the Sun, every star works on this condition, you will start creating matters on the boundary that you can collect, because the energy of the Pl in time will reduce and lead to the creation (of elements), but now we go to the step which is the biggest nightmare for weapons technologies. Last week we destroyed the imagination of the weapons they created to kill. They are trying to dump as much hardware as become useless sense last week in a cache that they won't go bankrupt. (1:59). Last week I showed the solid state magnetic device that stops the electronic pen from writing, now I fill in the Gans of the water and place it on device, now I control hundreds of thousands of kilometers, we have gone from the matter state to the total Pl state, those of you who want to enforce peace start manufacturing, the structure is there. Understand that by creating the Gans of the material in a homogenous way and understanding the position of them within the structure, then tonight every man can sleep in peace that no man can ever kill another man with the threat of nuclear bombs or H bombs, because if they do the power of the energy which is released by the Pl condition will be so enormous that the matter state within the Nuclear warhead will explode within their confinements by the energy they absorb. (2:01). We have made the nuclear weapons obsolete. Interesting to see how much more Gans we can put in this glass to see the effect on the pen. The pen stopped working from few drops in the cup of water. We have finished with weapons technology, we have finished with the false hopes to mankind, we destroy you if you don't listen. I promised with knowledge I will bring the forces of evil, killing and death machine to an end. I spoke with Colonel Hanky about the American forces to test. The field is so strong it will carry energy. Bring the new science in the matter condition. (2:04). If you manage to create vapor the strength will be the same as a star, you see a star tens of thousands light-years away, now that knowledge in the hands of man, it's you who have to make the mixture in that cup or as a vapor of the Gans or Pl to become itself the entity of itself. We have reached the point of maturity of existence, this has been the promise, the blind shall see, use the water if you're blind and your intention is to see, you shall see. We have done this twice with blind people, the drops to see the true creation. The deaf shall hear. The dumb shall speak, a Gans pad on the vocal cords. It's for you to try. To what extent can we try, allow, bring the forces of interaction into completion of what we promised. Add the waters of Gans to dirty rivers, create crystal balls across the cities for feeding the man. (2:07). I complete the SS program today in one way but we still have a long way to go. ... if your intention is to travel the span of the U that it shall happen because that is your wish. The new science can only benefit the man and cannot be abused, those who reject it are the agents who are about to lose finances. You don't need to continuously to produce Gans, once is enough. But let us complete the trails correctly. (2:09). Those fighting cancer make a bath and add ZnO and CuO and lay in it or use the lotion. This race becomes

responsible for the work of the rest of humanity from now on, it's only us who can lead the new generation, it's been done twice in the past, but this time we are mass teaching, it's not to one priest or 1 king, every man is a king and the knowledge is spread equal. For the past 2 years we have gradually sown the seeds of knowledge, it's not a miracle or magic, because you understood the development step by step, if I would have shown you this 2 years ago it would have been all magic, now it's natural. (2:11). No one can abuse or be abused because now you can have whatever you like. ?? you don't need to collect the water, the water created from the Gans's will create the Pl then they sit in their strength, you create a CH3, CO2, CuO, and a little amount of Lead and you are back in the same position. ?? .. if this is your cup you get a Pl of Cu, and Pl of whatever, then what was made by intention, then the rotation and interaction of different Pl creates both G and M fields which you need, ... in your cup now you have the Pl of the U (draws a spiral), because now every layer will sit on its own strength, ?? creating its own E it creates its own positioning, in respect to the environment it is. This has been the dream of the man to create motion, energy without anything. (2:14). It will take centuries for man to understand the knowledge of today, to unravel it, we give the knowledge equally for the man to understand. It's no different in the cup or the wafer Pl, because different strengths take different positions and in totality they add to the mass of the reactor. Tentative steps, first steps in true Pl, and independence from the matter sate into the Pl state of the U Community. No better time exactly a week before the Dubai C, fined tuned to day and time, you had to know the totality. Now you have all the knowledge to join U C. (2:16). To use this knowledge to improve the level of existence for every creature on this planet. Call on world L to stop killing and bring Peace because now the people can enforce it. You can increase the amount of Zn in this cup and walk around Palestine Israel and Iraq Syria and they will not know why they were fighting for, they receive enough energy that it satisfies the hunger of every need of man E and P, Jews will kiss the Palestinians and not know why, this is the Holy Grail you have looking for, I choose the crystal cup to fully illustrate the understanding of the Christ, the water carries every energy to bring peace, tranquility and save man from the hunger. (2:19). Questions. Can we just boil the LP to get the vapor? one of the options but you have to know what you are doing. I have shown you the extraction of the MG field without using anything else, now that you have made it homogenous it is very easy to extract. We have a lot of support in Israel and Palestine how many of you will make a ZnO and CO2 water, add a touch of CH3 water to it, you bring peace to the man and connect his soul to P and give him enough energy to be strong enough to not be abused through his E, then you find a man of peace. (2:22). Go the Church this Sunday and put it in the cup of wine, is it a cup of wine or his true intention for peace. You do not need to drink it to receive it, you'll understand in time, the time when the priest will walk away because it will be for them too strong to lie too. (2:27). This knowledge has to be carried on to the next step in the Space, the contentment is the beginning of opening the doors of peace in the world, you carry this ethos into space and now that from today we have become Man of Space. As you were making the Pl craft, those with wrong intention will themselves not board the craft, the Space Pl is the waters of the Truth, the sediments sinks. Because the Space technology is peace, if a man gets the technology but then changes back to evil then the only option is the demise of themselves in the space, doesn't mean death but the rejection from the environment which the reactors operate. (2:30). which means there should never

be conflict in the space. There is only one way and one direction and that is to unify the man, and we have achieved it, in coming time the progress will be so fast nobody will notice. How many of you will be truthful enough to drink from the "Holy Grail", I do, Keshe drinks from it, my intention is peace. (2:33). Jackie from Switzerland, he explains experiences with Pl and how people have been effected. He put some Pl in a lake and the region becomes "beautiful", Keshe says if we put it in the headwaters of a river and let it run would everything become peaceful. We have to bring peace to be peaceful with ourselves. Putting an orange on top of cup and Ali with feeding machine. (2:36). We came from the matter state and now by control of the Pl, we can create any matter in the U. This is the day of fulfillment, draws 14 4 2016 both add up to 9 9, and then 9. Today was promised from the book of the past, we complete all the promises of the holy books today. A new cycle of life. (2:39). Make these bottles of water and give them to the world leaders. Their terms of kings come to end because they know their own injustices. You have to give it to them with the full consciousness, we are here with the correct conduct. (2:41). Arman is building this reactor. If you use this water in the N coating process of coils, is it the same? Renan uses the water of Gans in N coating process, this has been used by Bernie in coating the coils and significant improvement we already use in KF production. The coils can be coated with water of Gans instead of Gans directly, when you hold it in your hands it's equal to the body of the man, it's in a Pl condition it's very much like your digestion system, no food crosses the intestine, the energy of food ?? the Gans layers of the body. The knowledge is all coming together all the dots are being connected. Renan has already produced 60,000 patches with the water. (2:46). We just produce the Gans once and duplicate with the water. Once you produce the Gans it stays in the Pl structure of the water, this is confirmation of the Cup that the water carries the energy of Pl what was given to it. He draws a spiral as the Gans of water, then draws smaller spirals coming off it for Gans of CuO, CO2, ZnO, CH3 , once the atomic structure of the water in the Gans state creates is a magnet for everything to hang onto, ... the center is O, once you establish a connection of this (CO2) with it now the C connects with the CH3 and you have a free energy to deliver, but all due to the MG field strength of the O attached to it. (2:49). Now you have water as a central energy point, you have the H link which has kept as part of its structure for it, then you add, the C brings it in .. in the structure of the Earth the common denominator is the O with all its attachments the water becomes magnetic ... so you connect in the line of communication of the neural system in the AA in line of the energy and that's why it's so powerful. Is N Gans also in the water, yes, you have the Cu H and N properties , CONH, CO2 OH2, one of the C will behave as a N, it's in the private teachings of yesterday. It's not one way that the N link is created in any combination can lead to the release of the H and you make it to behave as a water or as a N. (2:52). That release of energy allows the release of energy from the H of the AA which it needs for collectively keeping the AA together. Klaus asks if we fill the crystals with the water of Gans's then point it on the disease, we are talking about the water of gans not the content of Gans CH3 CO2 but the potency is the same. We have seen these processes in advance cooled gas reactor in British systems, 30 years ago. The properties of the gas reactors were changing and they could not understand the behavior of C, Graphite reactors, C behaved as a Gans. ??.. use of the hot glues have a C H bond and they behave much like Gans do in the space of the nuclear reactors, The water was behaving as a Gans so he had to make it understandable, ... the Three Mile

Island was structure of Pl but they didn't understand. Because in that kind of heat you continually create a Pl state, and in cooling becomes a matter state. (2:56). Now change the matter of Pl into matter of tangibility, this is the top, we want to be able to go up and down, Matter to Pl and back to matter. This is the next step. Going from matter to Gans was easy, now understand how you create a matter out of Pl. you create enough Pl so the interaction of fields leads to friction of the field forces leads to a weaker element what we call matter state. In the space you have to create a condition of interaction that the friction leads to a slowing down, reducing the strength of the Pl to a matter state, it doesn't matter what state you are in, not necessarily earth state of matter you could be on a higher order, this is what happens with the planet earth with the MG fields of the sun, in rubbing against each other creates such a structure, what we call N or the O, the interaction leads to matter state which come across it as a residue. (2:59). So creating a matter out of Pl is much easier. Fill these little rotating KF beacons with the mix water of Gans's CO2 and ZnO, and put them around the planet, it continuously releases fields which are in tune with the body of man, have someone like with the temples fill them up every few centuries. Is this the future of humanity, maybe that's why people made the Pyramids, got there energy from them. We have blueprints of the Pyramids, yes you can download them in the future. (3:02). Now we can enforce and push it, but none of the forces will if we allow the gap in the knowledge, the understanding that the others who ?? bargo in the direction of interests of themselves to abuse and control it. He goes back, if you understood what I explained here that the C is the line of communication, if you get the right Gans combination you get the most efficient line that the present world of communication is obsolete. (3:04). The present interaction even in the computers is too slow, look in the structure of the Gans of C which gets energy from the H to stay active to become the line of Communication for good, so you can communicate directly with any part of the U, C stays in the Gans state in the atomic, molecular, and in a Pl state as a Gans of itself in a crystal condition, this is why C is the line of communication btn the cells and the AA of the body, because C is one of the few element in the U which in all state behave ?? .. graphite, print C and the rest. Look into using C for zero time instant communication, how it connects itself even in the AA in the body. There's a lot to learn, its not just that you create a (Pl) dome but you have to heat the home, this home is not matter state but it is connected to the E and the rotation of the Pl, cannot be effected or diluted by the others who use near enough the same technology in the space of U. There is an element which is agreed and used by all the creatures of the space, this element allows no other element to bypass that every entity keeps itself as it is, that's why most of the SS as you observe all look the same, C, this is the common denominator agreed material MG field which has the appearance of the silvery color in most of the cases. (3:07). Near to green, yellow, grey, that allows you to keep your confinement in space (SS), will not be intruded or bypassed or overcome by another Pl MG field and it's proven to be working across the U quite well. Now we have to learn about the Pl condition which creates the space tangibility of any entity which you like to make. What you have ?? in this planet is good enough until we add to your knowledge. You will learn how to produce a material, not a matter but a Gans of a Pl, which leads to and creates a P tangibility, which can be and can hold a condition anywhere in the space. Question about new world banking system, when we get to it we will let you know, understand that there are no banks in the U, no currency, the only currency is what you give, the essence of

giving, in the true essence of Pl in G that you take what you need. (3:10). There is a big dilemma around the world, how are we going to deal with KF, how they'll effect the total industry and economy of the nations. In the next 12 months as manufacturing becomes even simpler the whole economic structure will change. It's change because of not needing it, not because we have to, it's a huge difference. The human race at this moment is running around 24 hours a day to pay for what he committed himself to serve the others by them having a life without him. You run around to pay for electric bill to keep a man at the head of Water, etc. Then they punish you for what is free, then pay the man at supermarket because he controls all your food, 10,000 products on the shelf for bosses that he has become the boss of. We have conditioned ourselves to chain of burden of our own demand. With this technology you don't need to, but you become a part because you want to. It's a big difference. (3:13). Next time I show you how to clean your clothes, there is no need for washing machine. The dirt on your clothes is a matter state and it has a MG field, now that you know how to create a full spectrum, would you like to be a ketchup or tomato juice, a meat or blood. The beauty of it is it's all made from one Pl not different materials, it's just understanding how to manipulate the strength of the Pl and then you have what you want to get. In a little while the little boy in first grade will be as wise as the old man in any field of the need of his daily demands that no one can abuse. (3:15). Romanian man made some trials with the water of Gans CO2 and ZnO, he adds 100 mls to 2 liter and drinks it all day, he feels very good about himself, his friend after 2 days of drinking the water the pains in stomach gone. He gave it to cat for about 10 days, she has the tumors but now she is in heat again even though the reproductive organs removed. Keshe told of this before 10 years, where the woman's reproductive gets active because energy added. (3:21). Keshe wrote a paper on the virgin birth and shown it is possible. In virgin birth if the desire to be and the wish to create is there, you create the spectrum of fields the way you wish and desire to have an orange and you receive it. Now you understand the way you can create a tumor in your body, you can create a structure that is balanced and creates life within you. In the space there are numerous races which do this. You do not need a partner if your intention is survival. (3:23). What if you are the last man standing and you come to the point where you have to divide or you have to die. In a way you become the fundamental Pl, would you wait until you die or being in charge of your E you decide to lead to the creation of another, and you create yourself a companion, this is the true story of Adam and Eve, out of the desire to have to be, to confirm your existence at the point of the P demise you allow the soul to lead to the creation of a "partner", a split of the one to two that you have a partner, that's what we cal the fundamental Pl, which changes from a neutron to an electron and proton, the proton is equal in total mass to an electron itself because if it was not they couldn't keep their distance and position, even though one is more energetic and holds more energy, the other one which hold equal energy creates the size and the other creates the motion, the interaction of the 2 leads to the creation of the ?? is an atom family, ?? fundamental structure, a man and a woman, because of our lack of understanding came up with the theory of Adam and Eve, but in fact is the creator of the spirit of the soul, when we know the soul can lead, due to its higher order strength to the creation of the P. The virgin birth of Christ, bless his name is a reality. (3:25). It's the desire of the intention of the Creator which is the mother ?? Do I leave the patch on the cat, if they need it they go to it, the animals will throw it out if they don't need it. Same with your friend with stomach ulcer,

2 ways, one could be due to a bacteria discovered by Russians and can be cleared with tablet, or it comes by P damage or change to the structure of the stomach, when you take a Gans you bring balance to it that's why the pain goes but with Pl you need 14 days, he should not be using this (Gans water) more then 12 days maximum. The body will repair itself ?? You can drink the Gans water for energy, but as a process of reversing (disease), we need to create a measurement, to tell people how much to use. (3:27). We need to establish a guide for use. Usually you need 14 days for the Pl ?? , the reason for 14 is the balance within the structure of the Pl, you are not only changing the P structure of the change in the stomach (if it's a bacteria yes), but in a way it has E settlement. (3:29). It's the same as the machine we showed, the field forces are ??, it's not just processing the P but also the E. You can drink the water as much as you like but the intention counts, you drink the water to receive the energy you might need, but the intention of your friend is to reverse the (ulcer) process in the stomach, it's the same water but it's the intention and the need which brings what you need from it. People have been asking about the Cup of Life, but I haven't been promoting it because I knew the time would come we'll deliver this cup (glass with water of Gans), does not mean the ?? containment, but the next step here is how you can bring the energies to it without actually any material, this is what you need in the space, we still got a step to go, ? the Pl condition into the water, we brought the separation of the Pl to the water that we can collect its energy and there is no difference btn this and what we showed in the Coca Cola bottle 8 years ago. (3:31). About Muscular Dystrophy he looks for some papers. (3: 35). Keshe says that Heather cannot show what she wants to sell, if you want to teach us something, she says she is not trying to sell. (3:37). She is producing a lot of patches, Keshe what is the intention of the receiver or are you trying to force a position which I am the end of it, it will not work, if their intention is not to receive it doesn't matter what you give them. The intention to receive is 90% what you do 10% is the patch, you give the same to everyone and one says there is a problem with it, it means their intention is not to receive. What they don't want to receive because then they don't confirm their existence. (3:39). If you consciously accept then you are ready for the change, but then will I still get the same (sucking energy), a lot of people are not prepared to do that because the change means I have to make certain movements, I have to make that change and then I don't become the sucker I want to be. Keshe wrote to a man with ILS, look inside you and see why you have done this to yourself, and when you answer me I can make a system for you from your own body. You want to see if your will can overcome my system that you are more stronger that you can have pity on yourself and say that no one can help me, then saying that my system doesn't work, so gentleman until you don't find out why you have done this to yourself, I cannot help you and make a system for you, that is why I have stopped the work for ILS, find out how as you, creators of your own problem need my systems to prove to yourself that you are stronger in your E and override my system, I am more then a man but I do not understand how a man like you can do this to himself with his control of his own E and blame others for his own misconduct and shortcomings, if you are the man then find out how and explain it to me and then I can make systems to help you to overcome what you are blaming yourself and doing to yourself. That is why I stopped making systems for those like you as I don't understand the pattern of lies one needs to hear from ILS people to make me a toy for their mental game, (3:42). come back to me when you have answered the above for yourself, then I might be able to make a system

that you might help yourself to live and not make me a game for your E play as you have done with your own P body for your E. The answer was, Thank you now I know what you think and why you are not making the system, so I believe to have found the reason yet, I done this to myself because I was looking for the love, the empathy and pity of the other persons especially my mothers, but these motives 2 years ago when I read your book I thought to have found the solution for my illness. So if you want I will try to work with you to resolve my problem. These people know the cause of their own problem, if they don't want to be recipients because it justifies to blame their own existence. These technologies only gives what you need and receive ?? nobody can nor structure can change it. (3:45). A lot of world leaders makes mischief to confirm to themselves that they are needed. This is the same with everything in life. The dog is licking Keshe's hands because he was touching the Gans, they know it's good for them if they need, it's us who refuse to take it ... we give unconditionally and the ones receiving it put a condition on it to confirm that they exist what they want to take, what about just taking it and letting the body do what it needs, this would not happen because then there is no need for them to be the (energy) suckers and confirm they exist by taking from the others. (3:47). Guy says now he understand why Keshe gave him hell for drinking water of Gans. One guy threatened to drink Gans because Keshe does not give us the MaGrav, CO2 was no problem but somebody took CuO and we saw the bleeding. Talks about TEPCO and gave technology and the man who helped Keshe the US government arrested his wife and 4 year old daughter on false documentation, he was told not to present the info, and had to fly to LA to get his family back. They people around us get intimidated by these groups because they know their term is finished. My respect goes to Yoko who came to KF over 2 years ago and took the technology back and it had to be hidden and covered up, how many Japanese have died of cancer which the solution was in the hand of TEPCO and now they got the gold in the banks from the cleanup, they showed the Nano gold (white) but they believe the people don't understand they see it just there not knowing. (3:55). We don't ask we just give and the truth comes out sooner or later. I would like to be there when TEPCO releases Tritium in waters of Pacific Ocean, which will be washed to West Coast to kill more Americans through radioactive material. Tritium takes up to 13 years to dissolve, such a mass amount will reach West Coast in less then 3 months. Let us open the books, what is that white material there, a Nano gold the way it was delivered to TEPCO who talked to us. ... we gave them the step, but now let us become one to share the knowledge with world. The openness of the reports in Ghana puts shame to West. Every Thursday you come and show something new and immediately the governments are on top of it to develop something new to see how they can make money or control somebody. (3:58). Our technology is copied, it brings balance which is opposite to what they want, they want to abuse. Mario from Germany, I tried to produce this LP but how is it with CH3, the other Gans the water is clear on top, CH3 is not clear. You have to find a ratio that it becomes clear ... you mean put enough water in it? It's the same with the blood, try to make a Gans with blood and you understand, if you don't use the right way it will be very difficult to make a Gans of blood also. You have to create a condition that .. it's a composite Gans when it comes to CH3, we get a lot of materials like this. You have to use a composite Gans, which means you add another to it, like a CO2, that the water you collect now has the characteristic of both CH3 and CO2, you have to find ways, I don't spoon feed you. (4:00). Let's see now .. you have a balanced fields ... which one of

you can stick it in a reactor core and create a motion in the Pl that you start seeing the lights, the craft, the interaction of the fields, don't forget you need to create a gradient flow and not a balanced flow, without that you have nothing, have to be in a condition that you create a flow of Pl. He draws circles in SF, there is a vertical rotation of fields and a horizontal rotation, this will give you P TANGIBILITY! You have to create the gradient flow and positioning, Without it nothing works. I said to Ali you have to move (adjust) the reactors to create the right field pressure that it brings the light and tangibility for you to see. The top structure of your SS is created by the interaction of the 3 base reactors, the height and strength comes by the 2 and the totality of the 3 creates a third balance which becomes the creation of the tangibility, 2 are real, 1 becomes the E, the totality creates the soul which creates the P which is ?? of your P structure. (4:03). We are closer to the completion, why we said in the beginning every step and every reactor made is capable to fly, because at the end IT'S HOW YOU CREATE THE PLASMA that counts. A man is trying everything to save his wife, he's made gallons of Gans of sea water to make a bath, use the water of the Gans and mix it within the water of the bath, temperature is irrelevant, submerge in it and let's see if we can change ?? of the P, and it works. If you make a bath of water the right combination of the Gans's and put a paralyzed man in it he will walk out of the bath with no problem. the body in receiving the right and correct P of the energy of the E, in you submerging a man in a bath, which receives the correct Gans Pl energy that brings both the P and the E in control in one time. ... and you bring everything to the balance. You create a condition that now you don't need to be in a reactor and the frame, the water, the LP becomes the Pl of the creation, the same as the womb of the mother, which has a balance you give and take what you need that your structure is correct. (4:06). Those who say I am paraplegic try to understand the condition and if it is the right way and condition, you shall walk. You do not need to be in a special hospital. ILS, if you put enough ZnO, CO2, CH3 and the others that it satisfies your need, that you will walk in no time. We have created the ultimate system for the body, because it works on the Gans State, when you submerge it, it has to find its own balance. Walk in with Parkinson's, Alzheimer's and in a few sessions you are free. It's now for the man to find the new dimensions of the new technology, let's do it correct totally as One Nation. In bath of Liquid Gans the water with its fields interacts with every part of your body, what you need you take what you don't need you give, ZnO, CuO etc, if you got it right you give and take. You are locked in the confinement of the Gans State of Matter, your body finds the balance, it's not magic. If you put the dead man in the bath, if the intention was not to die, he will walk, because you still can make connection btn the P and the soul. This is what the Christ did make the dean man to walk. (4:09). Bringing a balance btn the E and P that it created a need for the formation of existence. You do not understand what I released as the understanding of technology today, but will change the course of humanity in a very short time. Collectively we add to the knowledge through the testimonial page daily. Heather wants to join the innovation team. (4:11). We have asked the Iranian government to help analyze the data. We need to bring a lot of things together. Renan will handle the innovations. Next Thursday in Dubai.

110th Knowledge Seekers Workshop April 21 2016 (Earthquake Disaster October 2016, how to protect against Microwaves,)

(:06). Dubai Conference started today but the teachings continue, only 1 hour. By tomorrow we should have the first members of the U Council. Liquid Plasma (LP) and Wafer Plasma are interim to the next stage. (:08). Once you start working with the field of the Pl then the Gans the game changes drastically, within the structure of the Gans you still deal with matter state, but when you bring Gans its energy Pl force now that you have within the confinement of the water which itself behaves as a Gans, a Pl of itself, in a system where you put the Gans waters of different Elements, in fact they themselves automatically the characteristic of the water into a gas state of the Pl of the water, now in this state the water which has received the Gans it has nothing but itself, and a copy of itself within the structure of the water, this creates a unique condition, that with the matter state we bring the structure into order as a Pl, so we use the matter state to separate the matter into Nano material then to a Gans of itself, now that the fields have interacted the whole structure behaves as a field. (:10). Now the biggest problem you have to overcome to be able to get a homogenous field is through the containment, what you use as a containment becomes the filter for the operation, it means if you use for example, a Cu, you have dictated a matter Cu as a limitation, if you use crystal that becomes the limitation. We have achieved sound Plasma Barrier, means we have managed to block the sound, it has been confirmed that we can block sound. We have also confirmed by test the boundary of a Pl, we can see where it is and which direction is looking inward. ... we can see a reduction in a Pl to a sound level unless you break it, which means you run at a high speed ... ?? we shown this in the capture of drone. (:12). One of the KF scientists have replicated the sound barrier. WE are going in direction of total creation of the fields which we can both find the barrier and its strength, the next step left is creation of increasing G field forces that allows a total interaction btn the G and M, that allows the creation of whatever you like, you want intensive light or lift. At this stage without a vacuum condition this is the closest we can bring you to the point of P being able to touch a Pl. ... ?? you see the fields to bend backwards, move it that way curvature this way, etc. Now 2 main principles have been achieved, you strengthen the fields that you get the lights in the sky. (:14). Without actually any material you can create light, by interaction of the Pl within the structure of the water, within the interactions of the different fields with each other, we showed this to 2 Americans who came to the Insano. Any of you can start doing this. Last week I showed you, the Russian planes didn't carry weapons only 3 reactors of the same structure we showed you, so the structure of creating high definition Pl in its field force has to have such a shape if you want to concentrate it. The Military people noticed it so I show you too. This is how the structure is set, 2 lower and one above on the wings, gives concentration. Pl technology is the way the U works. (:16). You can dictate its position as you will. We have to bring you rapidly so you don't fall behind the governments in understanding. They are monitoring all the communications of the KF. You have the bowl, then Gans's of different elements, Cu, of whatever, and you made enough of everything and you collect the waters of each, never touch the Gans, You mix the whole lot in a container, now you have a homogenous mixture, this is the Principle Pl mixture has to be kept that you can start testing different things. Those of you who built the original rotating cores go back to them fill them up (? vacuum) with

waters of Gans, if you made a huge 2 liter or ping pong ball no problem, take enough of the mixture and totally fill the ball, and now start rotating your reactors at different speeds. Put a radio by reactor and put all the Gans's around it, start observing any changes, put radio near and see if the sound disappears, it can range up to thousands of meters, limitation depends on the strength of the field you create. This is a jamming system which costs a few cents. If you live near a power station or High Tension cables make one and leave it in the garden, it gives you the field. (:19). In Belgium they were using al sorts of things (microwave etc) to cook our brains, this is a defense from the microwaves. Get a ping pong ball stick it on top of a rotor of a small computer fan and you have done it. Glue it and centralize it perfectly in center of a fan and run it at the highest speed you can, and you create the field, it's natural homogenous and does not effect the body, but it protects from what is not needed by the body, noise, radiation, and everything else. This is part of the Oasis System, if you run it fast enough and get the right composition within the core, what we show in Oasis S is a tent, the interaction of the fields is so natural and normal that with the earth's MG field it creates a M tent, soft to the body but not good to interaction of a microwave or wind, these are matter state, your body when you carry the Gans inside it creates a tent, it's of the same. Don't forget you have the CO2, CuO, CH3, whatever was in there equal to your body. .. your skin is made of the same but it resists the matter state of the water, of the wind, .. now for the first time you see the shelter application of the Pl technology the Oasis system. (:22). First understand your composition, take the water on top of Gans, if you can soak the ping pong ball in the Gans in the same water first if you N coat from outside it transfers the energy, the problem with P P ball is the Ch bound blocks part of the operation. A glass ball better crystal best, it will give instant results. The technology transfer is very rapid its for you to test. To teach this today is more important then Dubai, we are not there because we want the people to do it. They will meet in second week of September for decision on the U Council on how to govern. (:24). Many of you have problem with Cell Phones, EMF, try this system but you have to get it right, if you see a light it shows the boundary of interaction with your system it's very important. The reason we release so rapidly because what we announced earlier is coming to pass, a lager number of earthquakes over 6.0 around the world and volcanoes, will call immediately for this application, this is the only shelter you're going to have. There is no reason that any man should be without shelter in time of disaster. Tent is a matter state we have entered the Pl technology which is so effective you'll have a shelter. (:26). The 18th to the 21st of April will be high levels of earthquake activities we have seen to be right, the whole of the American continent is shaking, 2 states shaking so bad the Federal G turned off the seismatic meters, when the American continent breaks up the shake will be felt in New York, read the graphs coming out of American official sites, it is shaking beyond what has ever been seen. Because pressure is being put on it from the breaking off of the S American continent, like snapping of wood. We have seen earthquakes at equator, line of Tibet, Iran, Greece, and N Africa which is the point of pushing in, 1 week ago Japanese have moved by 1 meter which is pressurizing all the islands on one line, it's going to snap soon (Panama). This is why the whole USA is shaking on the Magma underneath. (:28). Separation is immanent and has already started, 1 meter shift in S Japan shows that the platform has released itself. You do not move unless you have room to move into, the whole planet is on the move. If the snap goes further, we are waiting for one release from

the Asian continent. The shake will stop when the S American breaks off and goes back to normal to recover from the 1 meter shift. Tsunamis of 2 to 300 meters will not be uncommon. If it calms down then October November separation will be completed. The shakes will be felt in NY and Washington, Alaska also having earthquakes. Can be used in space when the condition of the AA suitable for man to have a shelter. (:32).

He is repeating the same info throughout ..
(:41). These systems can also be use to reverse process of internal bleeding, will teach later. We have given you ever tool to be able to create the shelter you need. Keep records of how much of each Gans water you are mixing, if you change the mixture record it, record what mixture gave what effect. Next week show the boundary of silence, and how to see the borders of Pl. Please do not use any Gans and do not consume, because energy of Gans lasts a long time, but the water has a connection with the Gans Water in the body, so any enegy is always used in balance it's a huge difference in consuming the Gans or its water. The Pl batteries weve seen with Alek work up to 14 days, learn the capacitors and coils, or Beads which is the same structure as coils in a different way, you'll have power supply for 14 days. If you move away from matter and rotate a Gans you might have power for months, because the energy of the Pl can be absorbed by Pl capacitor and be reused, you reenergize yourself. (:45). For lift and motion, the more you gain the more you have to give, the more you give the more you receive, you have to create a condition that you can give more that you can receive more. When you make a core, you need a taker, a Pl field force to take as much as possible, ... wrapping that it takes a turbulence for the fields, allows more to give out, when you make your mixture of Gans waters you need an element that can attract MG fields heavily, Gans of Lead or in the body is a Gans of Sulphur, add only 1 or 2 drops of Lead to mixture, keep track of what you are doing, the central G pull will increase and you'll receive so much that you can not give out that much, the interference will create the barriers (shields), if you use crystal glass you will see light inside the glass because the interaction will come internally, if you use Cu or plastic coils now the matter state has become ?? a given strength then you have a different condition, higher speed rotation the better, you'll find creation of lift and motion. (:48). Major cities of Japan will sink, Philippines , west coast of Africa, Saudi Arabia, safest place East coast Africa, Persian gulf, and W. India ... The governments advised Keshe not to go to Dubai because they wanted him safe.

111th Knowledge Seekers Workshop April 28th, 2016 (Emergency Earthquake update, Arman make a sound barrier, new Field Plasma, use of crystal or lead glass, detecting boundary of Pl, Dubai Universal Council and Conference Photos, start to teach military and doctors)

(:10). Talks about Emergency preparations for the coming earthquake disaster. (:13). Summary of work. First, started with the Gas systems circular and semicircular, we used the matter state of the gas, used Alpha radiation to create a Pl, then rotation of the cores in creating double fields with interaction of a mixture of gases, some cases 2 internal cores. Second we went to Nano where no need for creation of Pl, we created Free Pl, it had never been done, then we produce Gans and then Pl. ... (:18). In first process created

SF, in Second made coils coated with Gans. The new process will be a combination of both systems. In the new systems we have the 90 degree coils and filling cores with water of Gans, we are not relying matter state, now rely on MG fields without dependence on matter, you create a composite of fields, they do not amalgamate to become one but the total M fields become one Pl, this totally changes the game. Last week Alman created a sound barrier, have video. (:23). The maximum release from the Gans was 2,400 rpm, in both M and G. By changing the strength of the Pl we can release different Pl. You have no limitation on the Pl if you can release the totality of it. Last week we released the Pl from the Gans water so we have become independent of the matter. We established we need a G Gans water and a M Gans water, when Arman added 2 mls of Gans of PbO it increased the boundary absorption of the fields and the reactors is totally silent. Around rotation of 2,500 rpm is what can release. Now you bring the 2 together, the 90 degree coils put inside the core of the Gans water. When we filled the reactors with Gans and water the Gans went to the outer edge and water circled and a hallow center, the limitation was 2,500 rpm, you could not achieve higher strength because there is a friction within the total interaction within the internal structure of the Gans itself when its in the container. Now with the LP water you don't have this, but you have to created an interaction btn all these fields within the core, you need to create a dynamic environment inside. One option place a 90 degree coil inside the core, ?? by increase the speed of rotation of cores you have a new tool inside, highly energetic and powerful, and can now create fields beyond the imagination. Now this Gans in the center of the coil is the FP which is created by the original Gans, now you have a new dimension in S technology. (:29). Where you can control the M and G. You can get motion, lift, production of whatever you like, because now you have a Gans in control of both G and M, the choice of N coating, the materials and mixture of Gans Waters gives you variability in your process. Man has full energy spectrum of the Principle Energy, Black Hole. we now condense the G and M fields of the Gans itself in rotation and in motion internally, you have full control over by the speed of rotation, by the choice of Gans, materials of containment, and how in what speed you can control, how much you want to expand to what level, this is the ultimate design for space reactors. This is one of the ways you'll control the whole spectrum. (:31). You have a Pl, the Coil, the 90 degree coils, and by rotation you have created a massive Pl field in the center. This is how stars and galaxy create .. .. (:38). video reloaded You have the LP which is the water itself as part of it, in the whole structure of the container, you are rotating at 2,500 rpm, now you have 2 choices either rotate the G or M coils or both at same time, this will give you a total option, because there are extensions to the application of the N coated coils inside the core, which now by the speed of rotation btn the P structure and central (inside core) structure you start creating shielding, MG field positioning, lift, total cover, you can use it for the production of Pl for any cell of the body, create any matter in the space. You become in full control of the Pl in every sense you can dictate its G pull into the system, and M boundary. (:41). We have achieved a total conditional ?? you have forever a central core which absorbs energy from the environment not only through the condition you introduce but through the condition which itself absorbs own field and feeds back to itself also. This is how the stars and planets keep their own motion and material to themselves for billions of years, conservation of the Pl, rotation of the MG fields. In this position you are interacting totally the opposite way then what you have done up to now,

you started with Matter, to N to Gans and carried on. Now you have become the controller of the Pl because you dictate what the Pl gives out, you go from the Pl to the Gans to N to matter state. N you get the power of being able to create whatever you need, the condition you need and which reactor of your SF becomes the pull and which the push, and how you decide which why to float, this is the step you need to take, we are on the verge, of delivering the knowledge in such a rapid way for what needs to be done in the coming weeks. (:43). You use the matter state to contain the Pl and now the Pl decides how to cross the boundaries of the matter state, this is unique process, the easiest way to be able to produce what you need. At the moment you usually use Cu coils and other things, but go a step further. A group on the side sent me photos of Crystal Balls, you need to place the M and G coils, as is in the center, 2 options of coil using matter state or still use crystals, in these conditions you can create a condition where the crystal is ?? piped, this means you can dictate what Gans of water you want to inject inside the pipe that now you don't depend on Cu limitation, you stay totally independent, this means, the coil you chose is in crystal, you can use a system where you insert internal crystals which you can control the gases of the Pl liquid, or you control the liquid of the Pl. If you manage to achieve crystal coil condition that you can change the Gans of the water, at will then you would not be limited to the Cu or anything else, go back where the innovation center showed you the 2 glasses inside each other where there was a rotation of the Gans going up and down. Go back, at the moment you don't have the tools to create. (:46). So you can try putting a crystal ball inside a crystal ball and you decide the rotation of the central coil crystal, this goes back to teaching on Core inside a Core produced in Iran. Those of you creating double coils and rotating them, you can create lift very rapidly through these systems. You don't need to use radioactive material you can use the LP. We call this new reactor a field Plasma because now you work with the fields, (fieldplasma.com and org has been acquired by KF, all the blueprints on this channel, because now you work only with the fields). Now every man can produce any kind of fields they like. (:48). The Health Trees, now replace the coils with cores and Gans water in cores, you can pinpoint accurately which cell you want to change and you can do it totally on Pl condition without matter state. We bring the total knowledge, the rotation of core, G coil, Gans within the structure, LP, N technology, the science of motion, the rotation of the inner and outer creates a double M field necessary for motion, this is how you rapidly increase your speed to lift, be very careful how you rotate your systems, the double core internally, fill with Gans don't need vacuum, change the center with a coil or a different liquid Gans ... (:50). You don't need wire gauge 14 you can make it very fine, 36, but that they can stand the torque and not split open, and place inside crystal, control rotation. No problem to use the ping pong ball and fan, put 2 fans opposite to each other, put crystal ball glued to one and the coils on the other. I don't know how you're going to control the feeding of it, it can be done.

(:53). You should see the light first ... continue to teach this .. alternative to crystal is lead glass from blowers, they can make a tube which is connected. Feed the LP into it so you can change and experiment. Leaded glass will create a full Pl condition, set a radio and camera and lights to detect your Pl boundary ..

(:56). If you run 2 systems next to each other you can find the boundary. with glass lead tube you are not dependent on the Cu coils. You put the Gans water in the tube. ... the Oasis system becomes easy.

(:59). Can connect to a reserve tank ??. ... can produce CO2 and ZnO ..
(1:01). Please translate very correctly. Plastic is a problem because CH bond blocks some of the fields. .. You don't need to keep on changing the water, changing the Gans water you change the compositions.
(1:03). Crystal are the key to Pl, ... produce a crystal out of C, transparent, etc. can produce any material with coil and core.
(1:05). Defense technology can produce an impregnable shield for country and now can dictate the MG shielding of the planet to protect against meteorites, this is the purpose of One Planet One Race. And in space to create such a shielding.
(1:09). Ship of refugees all races on the boat but this boat will not help, need a SS.
(1:14). Discusses Arman's reactor to create a sound barrier. He added 2 ml of Gans of Lead, the holder of the G field energy. (1:16). In the video when Arman speaks because voice itself is part of the Gans state, man's voice is not a matter S but Gans, the vocal box is created by Gans, when he speaks the interaction of his voice with the strength of the Gans of the fields of this unit breaks the barrier and we hear the motor. then when he increased the amount of Lead water then the sound barrier could not be broken, because now everything is at strength that the voice can't get through. You here clear silence.
(1:18). Armans video Silence barrier, (1:26). On the American Ship they could hear each other but no electronic communication possible. In space your shield is continuously operational and you can communicate internally, because part of the Gans contains copies of the AA which was in the LP, if you create a total pure Gans without AA you won't hear the voice. Replay the video many times and you can see when the noise comes up, just before the voice comes up, or Arman thinks an intention to increase speed the noise comes through. the strength of the intention before the P move of the change or the talk is already interfering with the system, you hear the motor (1:29). Your intention will long before be detected before your P behavior. The intention allows the voice (motor) to be heard. This means you can create LP that measures the intention of the man just be fore he talks that he is going to move. In adding the AA you can create (a system) to understand the intentions. Go back to the Cancer, it took 2 hours before we saw the dropping of the mushrooms cancer cells, if we can understand the strength of the soul of the man which is measurable, now that we have access to the full spectrum of the creation of the U, you can see a man lying directly. (1:32).
(1:34). In Japan they used the water of the Gans and it worked the same to clean up the contamination. Do we need the water? Can we operate from now on with just the fields of the Pl? All we need to do is just pump it (the field air ?) into the core. This is called field Plasma Technology, this is becoming totally independent of the matter state, the LP, and now working totally through the Pl. (1:36) In the container is the same field strength, it will take time to understand how to create the motion by sucking this material into your cores, strength, combination, etc. I put everything on the table now is the race to see which one of you will deliver results. This is the ultimate system for saving man from this planet. Should take 2 weeks. (1:38). My talk goes to the Space Agencies, with combination of 5 reactors you can control everythign from communication, lift, and production of materials. The field strength stays to 1G which means you do not become weightless. You have to have defense or you cannot take into space. (1:41). Jackie to share video in Dubai, it's a specific system to see the parameters of your system, you can the strength of the Crystals, the LP in the crystals, to see the boundary of your Pl. ... The

system absorbs so much through the lead that it can not hold on to and it bursts open to a rapid shielding. (1:46). the video. There is a curvature that looks inward and disappears, we are looking at electrical and Pl. (1:50). LP of Lead and CH3, one is fuel absorber and one radiator, .. you have created the C link, allows full transmission. Change the mixture in your cores and see how you change the boundaries, sound barriers, intention .. (1:52). If your intention is to have a rapid shield immediately you can achieve it, you have a reserve tank with water of Gans of Lead, CH3. On demand you tap into the reserve tank. (1:54). From next Wednesday we'll start teaching Militaries directly, all the governments the same. China is a peaceful nation and they are taking the lead in using this knowledge for peaceful application. Only the European Space Agency will not be allowed as long as the head is there due to his criminal activities. The American forces will not be able to meet the disaster which is forthcoming. (1:58). The military are the only people who can deliver the rescue system. Nuclear reactors will create such a mayhem with radiation as with Fukoshima, it is essential to create these shields, even on the water you're contaminated. The only thing left is the Pl shield which can cover you from everything. (2:04). Learn how to manipulate the Pl not anymore the Gans, and manipulate the fields and not the liquid, if we reach that position then in the U absorbing the fields then we create a condition in the center of the system, not only dictates what is absorbed in the center, but also what is shown to be released on the boundary. The process is the simplicity of it, the farmer can achieve the same as a scientist. The process has to methodical and in a sequence, has to be what is expected, how much of it and in what direction, understand the strength of the Elements we would like to create, no use creating Al when you are expecting protein, you have to understand the interaction of the fields that you can create protein from the interaction of any fields, the culture of Pl is very rich. (2:06). How you interact, deliver, create sharing at the point and what you want to share. When you understand how the fields interact then you understand the totality of interactions, then you decide what kind of things you can produce. Will show a box with CuO and CO2 what's in the center? Understand the MG fields so you an use the interactions of the waters Gans pl strength to create the field strength which you need to absorb or reject, would you like orange or black. (2:08). A lot of you have noticed motion in your Gans, if you understand you can dictate the conditions in the glass tubes to get motion of the Gans without a motor, the motion of the field Pl will dictate the outcome. In the Space what happens if the glass breaks, you want to come all the way back to Earth. You have to learn the applications and implication of MG fields. How the interaction of these fields with the body can change a cancer, feed the man, etc. Now you have total control. If you can measure the E of the system Arman showed then you have found 90% the solution of any disease, because 90% of problems in P comes from E. Find out what is the E of a person and then satisfy that field strength, then you can change the man by satisfying the fields, giving to it what it needs that it can expand within the dimension. My worry is not the man on this planet but every creature, dog, fish tree, my job is to save from this planet that we take the totality, not just man. (2:11). With this structure we carry the knowledge of the man across the U and then it's you or your forthcoming generation which decides to have a tree look like a Christmas tree on planet Zeus, because now you carry the total knowledge and info of it. This is what is called the U Council, in time you will understand, and what we achieved in Dubai is the cornerstone of the next move. Each one of you becomes the master of the play, now you

manipulate the field interaction and not the liquid, rapid jumps but we have no choice, then we see how many Man we can save from this planet, when we say Man from now on it means the totality of the creation on this planet. (2:15). You have the 3 base reactors and feeding of these reactors, change one reactor and it changes the shielding, etc. Lot of people send me UFO pictures these are opposite to the present Space Technology and light technology, if you understood this presentation on how to create shielding, if you see trail you know there is an airplane, in the space T your craft projects fields ahead of you to protect yourself, different understanding, now you are protected, it's you through the mixture decides what will be the strength of the whole shielding, short and thick or long and thin for high speeds, can expand millions of kilometers. (2:18). Pictures of interactions of fields in the Gans process. He draws the boundary of CuO2, and border of CO2, see how the 2 interact and create a boundary, which is a balance, still have the N coated Cu plate and Zn plate, take the water in the boundary area and check its strength, see what shield it makes. You have a composite strength, the balance of the fields looks like Yin and Yang, where we see more push from the CuO, due to the plastic material you don't only have CO2, there is ZnO2, Zn and Cu are very near to each other, what one gives the other takes, in this container you have 3 field forces. (2:21). which creates a new condition in the water on top. You are getting more CO2 on the side because of the MG fields of the plastic box, it influences the Zn and CuO also. This is to teach you about the MG fields of the waters of the Gans (LP). (2:25). Goes back to Cores, talks about different compositions of the cores, one CuO the other CH3 what you get is the balance of the two, Twin Sister, what one gives the other takes, and visa versa. This is how in the Space you allow another craft to enter or exit, the portals of the Space. The parallel system creates opposite to you but in a equal measure because it's of the same you allow entry, these are the gateways btn entry and exits in any SS T, and only allow in what matches yours. A further T you can always keep a constant condition but allow walls which create different shielding, so you can increase your shielding even against aircrafts, you don't harm or destroy but don't allow. (2:27). If aircraft approaching but you don't want, it will be deflected around, we have seen it in tests. He will teach this to the Military men in next couple weeks, which means no threat and no possibility of nuclear attack. We make the space so safe that it enforces peace. You need this, .. when you go in deep waters there are different densities at different levels. You need a constant shielding but need to change the outer shielding according to the environment as you go, on earth you are in the condition of liquid water, what about in other Galaxies, of other dimensions of the fields in the U. This T allows you to travel in the full spectrum of the U, in any strength as long as within the structure you don't forget to put the registered records of the AA of the man in the texture of the Pl, because the Pl changes in according to the strength it receives, now your reactor dictates the change in the Pl of the AA of the man. (2:29). Now in your AA core you receive a new dimension of energy, the AA is part of this structure, you are the satellite (referring to the drawing on board with the 2 cores interacting with each other), you are the ?? other aircraft ??. Your field changes with this , means the human entity will live anywhere across the U, ?? it doesn't matter what fields you change, because you embedded a base value which is the AA of man. Even your DNA is AA based, it will rotate according to ?? and shows the strength of the boundary. Man can live in any position in the Space, because you have embedded the base data field strength. The totality knowledge is understanding the interaction of the fields, then you

can develop T that can easily dictate the conditions you need, or want, could be. You have the E condition of Alzheimer's, you can understand the field strength, you strengthen it and the man will remember everything instantaneously, because you satisfy where there is a lack of E. (2:31). We will start teaching doctors and Military men. We enforce peace through the T. Public teachings will reduce and private increase. For the Army when they have the T they will be men of peace. (2:36). With the trails we give you the blueprint you do it yourself for humanity. I have put the knowledge of the Creation on the Board these past weeks now you have to test it. (2:40). We are testing the "night and day panels", we'll see if we can produce more energy at night then the daytime, we have already achieved in the daytime, to increase production at night without burning any fuel using the MG fields of the planet. You can use what is drawn on this board to create energy at night from the planet and man himself, when you walk in this Planet you absorb its energy, when you sleep on it you absorb energy. Now you create a simple system to absorb this energy and then you can change it to what you like, heat light or anything else. (2:43). Understanding the properties and structure of the N material and the new process which we just taught you, using N material embedded on the surface of the planet, which absorbs anything which comes out of the planet, move it anywhere. You created Solar Power now one for MG fields, you can embed N coated coils inside the planet, you can create field detectors with the Gans Pl we just explained that only absorb certain energies that can run electric motors. the same G systems depending on what G releases in what corner, you adjust it and absorb at night, because the M field of the planet is constant all over, roughly the same field strength, we should be able to create S which match what we need for light, etc. We can rely on the structure of the planet itself if need be. (2:45). The MG field gives the earth its atmosphere, and if you understood the work of the herbs and plants according to where they are, position, what they absorb, now we imitate the herbs condition and what it needs in the atmosphere of the planet itself. You can produce these with the crystals, embed them in the ground and different positions from the earth, and feed them with the LP to start with, measure what extra you get, create a condition of demand of flow that allows absorption of the fields from the planet. By just putting it in one position it doesn't give you what you need, you have to create a demand on one side that allows the extraction of the fields of the planet. (2:49). Chinese make the Vertical system Health,

(2:54). Salt water bucket to absorb fields, can also use water of Pb Gans, but must know what you are doing.
(2:58). Next U Council meet in Rome next.
(3:00). Dubai Pictures. (3:08). People (71) of the new U Council, (3:25). No Council member can speak for the Council, they work through their souls and not words. Caroline speaks about Dubai. The people hardly slept were busy the whole time sharing. There was no language barrier someone always very helpful. (3:30). The Chinese made up 12 members, 1/5th worlds population. (3:40). Video, seawater Gans, the little stars in the glass ball float to the top, Keshe talks a lot about the ball ?? (3:51). people are questioning what lights is he confusing the plastic flakes as lights?? Everything inside the ball is like in a Gans State, like the human body. (3:55). He goes to the board to show a ball with N Coated spikes in it in a ball, at night different lights started appearing. ... goes about creating lights etc. (3:59). The aura is created by interaction of different fields

in the body which is in the Gans state. (4:00). An English lady member of the U Council tells her experience in Dubai. I am here to serve. (4:03). Keshe says something about Solar System Farms in Europe a meeting on 20th May. (4:06). Meeting with Pharmaceuticals and KF. (4:11). Create in your system of one massive absorption (Pb) and one repulsion, you'll see light. For P Pong balls use Pb on inside and CH3 on the outside, Ch3 release lots of energy for light, shelter etc. .. you have to find the balance point btn G and M, you can create triple boundary, (4:16). You pull back in whatever the CH3 is releasing to a new MG strength but not at the same strength as the Pb in the center, you can spread it as a light in this system, if you get the right combo of fields you don't need a motor for rotation, the Pl will create its own rotation, these 3 layers are essential for rotation without a motor. You can use LP, wafer Pl, and Field Pl, and you can mix the 3. (4:24). This is a shortcut for learning the Pl T. We have to increase the U Council to 144 need 73 more, according to the languages on earth. Understand if your soul can serve according Council. Bret has to deliver message to the pentagon.

112th Knowledge Seekers Workshop May 5th, 2016 (New MaGrav automatically goes into Power supply, how to survive Nuclear exposure,

(:06). Talks about MaGrav and problem with connections. Government officials tested wrong way and say it doesn't work. It works by high pressure Pl transfer from electron to Pl. We have data for Magrav increase in power. Connection to solar systems increases output to 30% after a month up to 50%. (:11). We asked you to condition the System, from 200 watts to 1200 watts. Now you can go straight to 500 watts. New development, use what we do in the factory, more of CuO2 coating in water ?? Connect it to 15 watt LED light only, as a decorative light only, that's all it needs to do (??). (:15). As of today we will send the New MaGrav with only a single cord to plug into wall!! WITHIN 24 HOURS METER will STOP, 100%!!! The reduction will be automatic as you plug it in, we have to check and test it. We have seen it in Africa. I developed it in the last 48 hours. Your system automatically becomes a power generator. (:19). (:25). Combining MaGrav with Solar Systems increase of 10 to 30%. .. (:36). "Mojan" means space traveler. One thousand people will be trained (for 3 months isolation) for Space, 10,000 Euros, travel will be within weeks of training, you will be trained in medicine, food production, etc. We might show a SS before September, Chinese have requested for public show of SS. (:42). You make your own flight S, it's a car.
(:49).
(:55). They blocked the flying car in Belgium, the took all the radioactive materials for the reactors. We will apply for international flying license of the system. It's to be ready for the October teaching. I have been asked about the earthquakes, we will wait until the Fall. (:57). We see possibility for Nuclear disaster in Belgium, the Dutch and Belgium's are distributing Iodine tablets on possible terrorist attack, we are prepared to help. Keep a Gans of CO2, CH3 and CuO2, always as a package emergency with you, if you receive a radiation contamination all you need to do is to take the water of the Gans, not the Gans itself, dose is 1 teaspoon 3 times per day, whatever comes into your body will be rejected, we know this from the research of TEPCO in Japan. If you come under destruction of the Bone cells or where the radiation could be touching your body, make a lukewarm bath.

(:59). Create 20 to 60 mls of CO2 Gans, put it in 5 liters distilled water or normal water, shake it normal, good mix with water let settle to bottom of jar, put in the bath, you need a minimum of 5 to 10 liters of this water, keep the Gans good for years to come, sit in the water 30 minutes at a time 2 to 3 times per day, at same time consume 1 or 2 CO2 Gans Water to reject any radiation from the body, we know from TEPCO that even if the Gans is consumed it is not toxic to the mice. Use only the water of the Gans. It will reject any radiation that comes on the skin, the bath water will protect your immune system. The biggest problem with radiation is destruction of the immune system, Bone Marrow, absorption of Lymph into the bone to create B and T-cells gets damaged. Important that the femur and lower leg is in the water, you can submerge totally under the water, every bone structure creates its own B and T-cells, they all get supported. We are here to support you, the T has been tested. (1:02). It's know that the Nuclear reactor should never have been commissioned they have millions of cracks in the structure, the man who signed documents became head of the safety of Nuclear Reactors.
(1:10) If you here siren of Nuclear disaster stay inside and don't look outside at light, if you see the light you die, if see the mushroom cloud die over time. Start consuming CO2 water 1 teaspoon 3 times per day, wash your body on continuous basis at least once a day, with the same water, a number of people can use same water, you don't wash but neutralize the radioactive material that it disposes in the environment, top up the water every 3 days. If you see any signs of nuclear exposure on your skin or lungs, make yourself a pack of Gans water on a tissue in a plastic bag, and place it on top of infection, can use 10 to 12 hours per day. (1:14). Lot of people see radiation problem in their lungs, make a balloon get a tube fill it with CO2 water put a straw through it and inhale through it, the air flows through the Gans, it will change the strength of radiation in lungs regenerate the cells. Leukemia can come through the lungs into the blood. (1:16). You have to protect yourself in 3 ways, skin, inhalation, and digestive system. Nuclear disasters create Nuclear Viruses, doctors don't know about it they call it a cancer, these can be created in body when exposed to high radioactive sources. Make a reactor fill it with a huge amount of water of CH3, and some lead Gans water, rotate it you create a shield around the house. You start hearing a whistle noise, what people hear when they see UFO's it's a loving kind noise, you walk back from it to see where it moves from the back to the front of your body. (1:19). The point when you hear the transfer of the noise is the point of your shield. Arman has heard the noise. Get a fan, P Pong ball, CH3, or Pb or Sulphur but be careful not to create sulphuric acid, sulphur is better then lead for the body, because it's part of our body, rotate at a high speed. If you don't hear the noise it means the shield is too far out and weak, change the Pb to higher dosage, that you increase the G and bring the boundary close. No radiation can enter this Gans shield but your body which is in Gans state can move in and out, x-rays, gamma etc are in a matter state and can't penetrate. (1:22). This is part of SS development. If you have to move out of contaminated area keep everybody under the shield move the reactor with you. Keep the ground covered that you don't pick up the dust. (1:27). Three levels of protection, the reactor, if contaminated need to flush radiation, in Fukoshima so much Gans was washed into the sea it absorbs radiation, gets locked into the Gans, because its a field and not matter state. The monatomic gold was captured from the Tritium and used to treat the waters, it's worth 4 million dollars an ounce, 10 billion dollar game to fake an accident for getting the gold. Gans was shipped as "talcum powder" went through LA for USA to

take a sample. CO2 works also for biological and chemical attacks. The fat on top of the CO2 is key to survival. You dip a plastic rod swirl it around that the Fat Gans gets stuck to it, transfer it to a clean water that you take the salt content out of it, repeat on a regular basis and what you start collecting in the water is the Gans of AA. (1:37). Wash out the salt, put into a sealed container, add a touch of CuO2 to it so it stays disinfected, doesn't create any germs, place a little capsule of the AA Gans on top of a glass of water, like the orange on top, you transfer the energy to the water, this gives you every thing you need for energy, support for your AA structure of your body. (1:39). This is how you get protein in the Space, you carry the LP of the Gans of AA. You can carry the energy of it as a field Pl. Also add CH3 that the energy release of the H allows energy transfer, you don't need food to sustain life for a long time until you find safety and produce the shield. If your shields break down don't worry, always carry with you a mixture of the water Gans of CuO2, CH3, CO2 that you can restart the process, the motor can burn out, etc. (1:41). At times of disaster E distress is 90% of the failure, you need to have a composed stature to be able to act correctly, the only thing that gives you this is ZnO2, a small amount of it has to be with your food consumption. (1:42). Most of the batteries have Zn casing, the easiest way to access. Create ZnO2 the depression will lift and make correct decisions. (1:44). And start supporting the others. Psychological failures are 99% of failures in Space, so the Zn is needed. (1:45). If you can't get pregnant and physically everything is good, sit in ZnO2 bath for 30 minutes per day. How to use what you have built, to become a support and not a burden. If you come across high level radiation burns make a CO2 patch and it will balance the tissues and start to grow. In Space it's 100% field interaction with your environment, this is the only way ?? balance your fields in respect to the environment. .. your job to feed the soul and E so it can hold on to the P. (1:48). The Zn protects the E .. you have to make the tools of understanding the protection. .. You take from the environment according to the process you set. (1:52). Questions. For those of you who have cancer and terminal illness and want to end your life, this is not for you. For those want to live, make a high saturated CO2 Gans patch and put at the position of the cancer for 2 to 3 hours per day no more, when you feel the reduction, especially reproductive cancer, after a couple of weeks add ZnO2 to the Gans patch, but use only 30 minutes per day. Never use CuO2 with Zn or CH3 in the sexual organ cancer, because most of these are E connected, the mother gives life through the E of the womb and not P. You have to have a reason to live, with acceptance of the soul and E to be able to change the P to take place. When you produce CO2 you also ZnO2 it's part of the CO2 Kit structure. (1:57). Man built a MaGrav from just the LP the Gans water, I made G from Cu, M from CO2 and ZnO2, and the center with Pb, I see something but I can't explain, it's like heat but there is no heat there, the tube vibrate. I put more Gans around and now it's more stable. I heard that noise, Keshe says it's sweet noise. Arman says when he loaded it with Pb water that's when the changes came, like a whistling noise, you can step in and out, about 1 meter. (2:00). The other guy heard it at 5 meters, used 3 mls of Pb. Keshe says the more you add CH3 the larger the field becomes. CH3 is a field expander where the Pb is G, the reduction, Arman use 11 mls of Pb and 10 mls of CH3. Keshe says the interaction of the Pb and CH3 and earth's atmosphere depending on where you are, you should start seeing the creation of certain kind of dust, it's a Cosmic Dust created from the interaction of the fields, like the way you create N, clean the floor and see if you se this, this is one of the first signs of the development of

the P structure, it's for you to create a condition that you solidify this matter state. (2:03). You have the earth and the atmosphere, the N is created at level of atmosphere in Gans state, as the G increases and M decreases, you convert the Gans into a matter state, ?? into the solid state of planet. That's why in these conditions you see a silver greenish color, this means you start creating the solid state until you can create the solid boundary, the structure of your SS. When you become part of the first KF "mojans", Space travelers you'll be taught all these things to do because you can use the same conditions to produce steel, iron or whatever you need, it's a natural process, up in atmosphere you have N but on earth you see it as a matter N, so the central control is ?? sacrosanct (? the inner core ?). Always look what is around you, not just what's inside the system. (2:05). See if you are producing any dust, you start looking and you see abnormalities, wetness, emulsions, fat, see energies that are not there, you might walk through a point you feel a pinch in your legs at a particular place. In that environment a field interacts with the neural S of the body and you feel it as a pinch. There is a group of scientists from the Chinese government listening on the side and he teaches privately. (2:09). Shows his MaGrav, when he made the double tubes they were clear now they are white, uses 6 mm tube one inside the other 10 mm in aquarium shop, both are N coated he sprayed with caustic on a warm floor and left 3 days, the caustic dried and washed with distilled water. He used CuO2 Gans water in the inner G tube, outer tube M CO2 and ZnO2. (2:15). Test the tubes after Caustic put in normal water and see if they turn white. (2:17). If the G is absorbing then the interaction is creating a white light, do they glow in the dark. he feels the vibration on the fingertips up to the ear, is it inside the skin or field touching you, touching me. (2:20). He made a 3 stacker of tubes, Bernie explains, it's normal because we are Pl beings, you feel it more when you are tired because you are in need of energy. Feel more when left hand, yes. the heat is not the device heating up, but the effect on your body. The M on the device gives you energy. (2:24). Keshe speaks G always trunks in clockwise, and M goes out anticlockwise, this is how the fields get absorbed or rejected, they don't collide, each one creates its own path, we use the matter state to contain the Pl, using N material, you have dictated a G pull in your system which is clockwise, with the same environment within the wall of the tube you created an anticlockwise which is the M fields, that's why the twin system of coils and tubes, this is what I said last week if you make the double glass tubes and put it in the center of the core you will get this response, the fields flow within the gap btn each other, they allow M to expand if needed or G to reduce (contract) if needed, this is how it works they don't flow in one channel, each one has its own channel, the same with the MaGrav S. (2:26). We use the matter state now to dictate the gap. You create anticlockwise with the Pb center core, and ZnO2 outer, now the Pb in G in center has a balance with M and has to balance itself with the G and M fields of the outer ring, the interaction of these 2 fields creates the vibration, ?? the Center G fields is more and interacts with the earth's G field, and the Gans of body when it gets in touch with it converts its energy into P vibration, that's why you feel it, or it changes it to a mechanical vibration of the electrons in the Pl condition of the body, it's a Pl interaction you see, the body and fields of system are in a Gans state, (2:28). ... or reduction of strength to neural transmission of body. You couldn't feel this if you had a N material but now you have a Gans state interaction. The wood frame was burned, N coated. Bernie explains, he doesn't want to show on video, I don't look good today. In every flow one goes to the left and one to the right, like if you

put your hands together with thumbs up. You have to identify which Gans is more G and use it in center. CO2, CH3 or CuO2 are more M more giving. His hands are warm when inserting N coils, but coils are cold. The man feels the Pl is with him when he goes to work. (2:34). Bernie can connect his MaGrav Unit to his car by his thoughts, the man becomes the key to the car, if they want steal the car they have to steal you also, you carry the E and energy of the MaGrav with you. Bernie has tested it to 1 meter. (2:36). Using his thoughts and left hand to absorb G and right to transmit M to car. Instantly the engine performance improves. The car improved from 14 km per liter to 23 km. It will be released in time. (2:38). The man said, my vision said that the MaGrav will show me, if I have more of them, it will show me the SS. GOOD MORNING!! But you have to take it out of the flat (apartment) to the vertical 90 degrees, you have to load your cores slightly different, that you create the motion. You are on the verge of developing the first SS, you still have a phase to go through, go to the fields without the water, no water in Space, you are on the right track, to interact the fields. You have to create a central G point that you decide what is absorbed and what is rejected, I explained last week but nobody understood, I made a core and a coil and I explained that the central G point in the center is what is dictating, you do not need M so much in what you absorb you create in the center of the core and the coil, dictate what is going to be released ?? strength, you have to create a variation not only in the center, but in respect to 3 more sets, (2:41). it goes back to the structure of H, O, C having in mind one which needs more absorbs more of the G field is not the one which you put the Lead in, it's the one which has the CH3 in, because it's that which gives more so it has to absorb more, that has to be your top core. Bernie can explain more in the variations of the field strengths, with the LP it's much easier to do this. You don't need to have many different Gans's, you have to measure amounts, keep track of, for example you put 10 ml of Pb and 5 mls CH3, in the other you put 9 ml Pb and 6 of the other, now we can play with the Pl in a very beautiful way, you don't need to make things, just dictate the ratios, .. then you start seeing dimensions you have to be very observant. (2:43). You said, I feel it is with me, you took the syringe to clean out the Co2 from the bottom, right, you have transferred some of the AA to one of your tube, I touched the water with my hand, yes it carries a fingerprint of you, you have made a connection with it. Keshe says we are now making a wireless transmission S of ?? energy, I can make a radio which only works on my command, and only I can hear it. Now you have that possibility in your hand, so when you make this S and you are the only one who has been touching them, the caustic disposed of the fingerprints from the shop keepers, factory personnel, etc. It's you AA on the tube, you might feel oh my S is happy or sad etc, by the strength of the energy the S takes you feel its E, if it is giving then happy, if taking its a S which needs feeding. We are now entering the true Pl T, you start feeling these things. (2:45). You can go to planet Zeus you will still feel the S. Three years ago I see you and people laughed, but now I feel it will be very easy to build a SS. Keshe says, we'll take the teaching to the next step. You want to build a SS it has to carry your E, the desire and the control. You say you feel the S, if you use the protein of your blood, we always bleed, take a drop of blood and drop of Lymph (the white stuff when you cut), and place it on top of a Cup (? Cup of Life), and produce a Gans water of it. In science you make a copy of the M field the way you did with the orange, same process, take a drop of that water and add to the G of the inner ring and the M of the outer ring. (2:47). The S will send you what it needs, and feels, and with your connection with the G

you dictate positioning, because it's the G which dictates your positioning of what the M can give. In the center tube (it a double ring) of the inner ring add a Gans; in the outer ring add it to the M, so it has a P dimension contact. When you make your SS configuration of the SF with your rings, then (...) ... what you consider when you make this S do not mix your Lymph or blood in all the ?? (rings), you want to connect with the E or the P. In one you put the blood, another the Gans water of the Lymph, ?? .. the P condition. ... with your thoughts and E, give the P to the core, in the way we are setting up the SF in the same basis as you have done, you start developing the P condition M and the control of the position through your E, (2:49). because you put the Gans of your blood in it (the center core), and then the little orange ball you have in the center has to have the same composition, which means it's controlled through your soul, it doesn't connect with your E, so you start seeing P structures, it's P to you because you have dictated the terms with your blood. ... people of a certain race can travel together in space, you can't allow others to come in because they don't carry that specific MG field of the E and the soul to create the structure (of the SS ??) ?? the P content of man. Impossible to travel together because they don't carry that strength of the field. The next step for you is to use a drop of blood, make a Gans water of it, place it on the Cup, then you can do the whole structure. (We don't go beyond the boundary of your understanding). There are parameters, you add a quarter of a quarter of a ml of CuO2 to all your rings and even the center, very small amount, just a drop of a sharp needle. (2:51). ... in all the rings and center, because it carries your AA it cannot ?? conversion and evolution of the AA, you guarantee the environment stays disinfected. The man says the reactor is responding to their talk by changing speeds, he can't see anything. .. if you put these in rotation inside a sphere, then it becomes like a solar system you dictate what is going to be in the environment and when it's going to be. (2:53). You are going very fast, but the next step is the field Plasma it creates the same energy and motion without any matter state. In the Space and U there is no water, creation of movement, materials on the condition of the fields only. By October on we'll work with the F Pl. Look at the ball in center, do you need to put any matter in it? Or would the creation of the matter state which is the surface will create the ball ... with your thoughts control that you create the E and the field interaction, do you need to feed any material in the center, or would the interaction of the rings the way you set it up deliver the G field in the center including your E, ... then the ball becomes the field Pl it's no longer matter Pl because you have nothing in it, but because you have created the rotation of the fields in the matter state now you have achieved the Pl inside without any material. (2:56). Do you need that condition or can you remove that material now that you created it. Look at the this, the creation of the fundamental understanding of the center of the galaxy as being dark, the Principle Matter, is where the Essential thing is there ... in the center of a Pl of a proton, it's the same condition, you use the matter state to contain the Pl, the Pl to contain the fields ... now to next level, you create the matter N material to contain the Gans, , then to the Pl field with the water, now we use the Gans and the Pl to create free fields, it's the origin of the ?? U, the unified field comes from this, now you have compressed everything in that ball, N coat the ball internally and externally then you don't need to put anything in it. It will contain the fields, that's the Field Plasma, without any matter. The beauty of the man is we can control the Pl with the fields with the containment of the matter state. Now you use the fields, in that ball are free fields no more Pl, but you have

to understand the control of it. (2:58). Use the LP to create the fields the way you used the Gans to the Pl. This is Field Plasma, using matter only to contain it. Like in ocean water everywhere, you put a glass to contain it. Use your rings the way you have, but you decide the combination of fields you want in the ball and you use the ball to contain the fields, but because you have put the P boundary as the ball, and then added the MG field of the tubes around it, you have contained the fields, this is the F Pl in empty tubes, because of the Gans in the inner and outer tubes you put your blood and Lymph, now the same energy of the Pl is transferred into the center of the ball, you decide what comes out of the ball, you don't need water anymore ... I will be with my soul in the center ... you understand it, you don't need to fill the ball in the center, last week I didn't put a ball but only a color there and said this is the F Pl. We have gone from matter to the free fields, this is the way the U works, the boundary of the Galaxies, planets the atmosphere, the P matter of the planets and stars is actually a container for the free fields in the center. (3:00). You saw it in the ?? P Pong balls before and I kept saying this is the free Pl, you created it, now you don't need the Gans to be with the water, you have created the water in the outer ring, inner ring that cavity in the center is F Pl, and now because you added your AA you're in charge of it. If you create a conditional slide difference the only thing in common btn the 4 sets you set up is your AA, make one slightly different then the other so it makes a rotation, the field in center has a common denominator with the fields strength of your AA which is your E and ?? your controller. If you understand what I just said in the last 5 minutes you'll understand the creation of the U. The matter is the weakest it's at the bottom. (3:03). Heather talks about her research with Gans Patches with psychic friends. (3:08).
(3:25). Start of Norwegian video on MaGrav units linking art and alchemy. (3:41). These are still on limitation as coil Gans's, a lot of people will use this, we are on to the next stage. (3:44). A defense manufacturer wants to come in, Keshe says to defend what, create more mayhem, there is no need for defense technology. Keshe summarizes today, if you want to be the first passengers to Space. We are not here to create another elite. In Rome conference will select first group to Space. We will cross international borders we will need to come to agreement, we will not allow any interference, we enter as One Nation. (3:48). The Space training will not be more then 3 months. Arman for the first Captain.

113th Knowledge Seekers Workshop May 12th, 2016
(:07). We need new rules how to relate in the new world family, different then before. Come with the solutions not the complaints, a positive view. We lead by example. (:10). Peace through Plasma. (:15). German manufacturers have gone into production. The banks have become friends to KF, can buy MaGrav on 10 Euros per month, will deliver 10 million units, 500 million up to 9 billion. (:21). Gans waters in production in Japan. (:32). Teachings begin. Last week we explained that in a core 3 G rings that creates a field in the center. This configuration gives you the 3 layers like with the skin, field 1 is center, 2 is one ring, 3 is another ring, the interaction of the 3 leads to creation of the P skin of the craft. Very soon you'll start seeing structures but how you get in and out of it is your dilemma. Fill up the ring with N coat Gans, and the interaction of the rotation of this core, with the interaction of the two inside coils creates a mixture of the fields which

will lead to the creation of the P (craft). Need 2 motors to rotate them that we can control the changes of the rotation of these 2 inside coils. (:35). .. and the liquid that the interaction of the fields leaves the viscosity of the matter in respect to the Gans and LP and the Gans coated on the cores, the then have to interact, they create the Pl condition, the 3 fields interact to create the structure. Getting the speed and N coating right gives you a SS. There is an alternative because we can't always hold to matter state and carry liquid with us, we have to move into the field forces transportation and not the LP, but we can again use the LP to create the conditions we want. There is another option, a simple but time consuming system. (:37). We can use the interaction of the fields for 2 or 3 different purposes, no motors, a containment and then inside tubes in form of rings, each one is a double tube, you feed each core on its own, now you don't need rotation, create a pumping system to each core (tube) and you control the speed of rotation of Water pumped through, the speed will give you immediate reaction, the speed of the flow of the Gans of different strengths will create a condition of interaction without rotating it, this is a step towards another step, we will change the LP in these tubes with fields, exactly then you replicate the process of the generation of the entities in the U. You can feed CO2, and Pb in center, and then you want to change the Gans, change the mixtures from the tank reserves, so your immediate reaction is instantaneous, we will teach you how to withdraw the mixtures. The right interactions give you the skin of craft. (:41). Understand the interactions of F Pl, LP, Gans Pl, of different strengths will create interactions btn them. This is like when you have different clouds of different energy coming together, you get thunder and lightening, in PL T you get the same condition, when you have a Pl of certain strength and a matter state of near same strength you have the same thunder and lightening, you'll hear huge bangs and interactions of the fields, the first time Douglas had a big bang. If you can create and control the condition of the Gans Pl strength at the interaction of the field strength of the matter, (:44). you will get the thunder and lightening the way you do in the matter state, but now it is a matter strength with a Pl with the free energy of itself, the bangs shows the Pl coming into operation. It's like the sound boom of breaking the sound barrier, its the speed of the air the bangs against the natural condition, it cannot pass through and releases it as a noise. The Caveman was the first one making N material, cooking on fire, Chinese cook on metal Nano coat it and put salt on it, they release the energy in the metal which you are eating, you are N technologists from the beginning. The human body is made of Gans which interact at the point of the Gans, with the strength of the environment which they exist, which is a Pl of a higher order with a lesser order, but it has created the same circulation as in the reactor inside, we call it a HEART. Now for the first time you understand where the heartbeat of the man comes from, the matter of the Gans state of the Pl of the liquid, Blood is LP, interacting and releasing energy at the boundary of body, who is ?? interaction of the matter state which creates noise and feed back as Heartbeat. (:47). Now if you can control the sound boom that it is continuous you'll hear the heartbeat of man. This is how the planets and stars create their heartbeat, where galaxies create their own heartbeat where the internal flow of the Pl condition in the inner sanctum, in interaction with lower or higher strength fields of the environment of the matter state leads to a transition that one has to accept the others and this itself releases energy that in the ear of man is heartbeat. (:48). ... it reflects back to the inner chamber and we hear that noise because it comes through the blood itself. Your blood is a Pl flow and always connects

back to one place, all the fields at the junction of Pl condition internally which is in the Gans state, with the matter state reflects back to the center, your heart in center of the reactor, it's the center of feeding the E, this is how you control the system through your thoughts and E. The center of your ?? .. will create that motion in respect to its surrounding, if it's a high speed it becomes a whistling, and because its in the Pl condition it is very sweet, it's exactly the way your heartbeat comes together, and then all energies gathered it releases. If you can keep the energies of the Pl flow within the Gans state of the LP of the blood, at a given strength you'll find a man of 200 years old or 80 or 8, will have the same strength, Because now you feed it through E and soul which decides the strength of the P, same process (as reactor). (:50). Different parts of the teachings are coming together, the body has to have its P in respect to its Pl MG fields of its LP, which is the blood in the interaction with the slower but stronger, which is the Lymph to lead to the creation of P of the man at the point of the strength of different conditions which is created in the body. This is how your organs are created, doesn't matter where you are and you create the right condition, man will be created, animals, ?? in this condition will lead to the creation of life. The idea of man coming from East Africa DOES NOT hold. Life in the tribe of man was created in different locations on this planet simultaneously around the same time in the evolution in the life of the planet. What we call human race today is the amalgamation of these groups coming together. The human race was never created in one place. (:52). You say Homosapien, one took over the other, where did the other come from? The other came from the position on this planet where the flow of the Pl within the structure created and lead to life in understanding it, to the creation of similar structures. Your blood type A or O etc, comes from the interaction of the amalgamation of the tribes, as they interacted the more dominate strength of the Pl could take over it became the ?? , the other one when they mixed the interaction, one may look more monkey then the other one, but at the same time they were all monkeys, the interaction, the ?? reproduction has lead to a new generation of ??. The scientists say all is generality, different strengths of ?? A B is different strength of O ??, it shows how many different races were created and interacted to the creation of the man, and the heartbeat strength of the man dictated which one will dominate. We call ourselves I am type A or B, they all came from different parts of this planet. This throws the present science that we all came from Africa into a big turmoil. (:54). We have accepted a huge number of hypocritical principles because that is what we understood, now that we understand the interaction of the Pl, the LP, and in a short time some will understand the MG fields independent of matter state, you will understand that LIFE the human structure you can create anywhere in the U if you create the right conditions. When you put together the interactions of the fields the way we seek, you come to understand the next step of the development, you have a condition, position, where the stronger MG field in interaction with the weaker MG field, creates the heartbeat, creating the sound, the effects ?? conditionally stable, gives strength and the manifestation of the P life, so all that you get the ?? weaker heartbeat that comes, skin feeling and touch, ?? teachings ... skin is part of your brain structure. (:56). If we can feed you with the energy level that can give you the same strength as when you were 10 years old and you are 90 years old now, your skin texture and blood flow changes, as we have seen with women in menopause go back to their period, we've seen old men walk and do things they couldn't for 30 years, thus we can change it, these have to be done

very slowly, ... you change with a strength the cycle of the Pl condition of the body and with it bring into operation with it, ?? you age ?? time, what if you can control the transmission, then new game, ... you have entered the time machine zone, by controlling the fields, you have 2 phases of interaction converting from one to another and back to itself, then you have existence of 2 fields ... you have the interaction of one field with the other where you can convert one to the other and take it back, (:58). where this is the lower strength and this the higher, you have managed to create a Pl time machine. For the first time we have seen it in the innovation center, it's been felt but not understood, if you change the Gans and feed it into the loop of the other one, and keep it constant you create 2 Pl conditions which is interfaced, you keep one in the matter state where you want it be ?? strength, and the other where you want to go, you enter the TIME MACHINE. Where the time around you gets disturbed because now you live in 2 dimensions of MG fields, because your created a Gans flow in your cores or coils, it takes over the environment that you are in, so now you become part of the time capsule, ?? .. should not create the confusion of time and space because now you are in charge of it, you fed and created the system. With the solid state cores you're playing with the fixed matter state, with a fixed condition preset Pl, but with the new S coming up we see ?? ... you will feel the interaction of 2 stage Pl strengths each from having their own speed of transfer, interface btn the 2 will lead to creation of time zone machines, you keep one side ?? red (left) which is a reference of Earth strength, it's your matter state, the blue one is where you want the time generation separation to reach to. The reference one is the track back home. (1:01). The other side is the destination. According to Einstein and the matter state you are on the speed of light on the left side or home reference, but on the infinite speed on the other side. The maximum earth speed is the S of Light. Because you use the structure of the whole Pl condition yourself, you dictate the speed, you can travel the length of U that normally takes thousands and thousands of years in seconds depending on the strength of field on other side, because you created the environment you are inside, you remain in that environment as you travel, so you do not feel anything, feel any changes because the internal structure, the body is made of Gans and he ? .. accordingly ?? fits into the environment which ?? I will teach the interaction of man with the creatures of the U, learn how these interactions leads to the conditions that you don't understand but you can observe and feel. (1:04). Someone who has heard the bang of the interaction of Pl. People are experiencing the changes, the interaction of the phase of the Pl condition in the matter state and the Pl state of the same matter, blew up the whole structure open 2 days ago, the field strength was so strong that the P structure was blown to pieces. Understand that it is the Pl barrier interaction it's use t a speed, it is so strong that it creates a noise, if it's not handled properly it leads to a reduction in the strength an dif it ?? the matter state it can P push them out. This interaction how fields come and create btn the different states of matter, it's the field forces put pressure on the matter state , which leads to rotation of the planetary system, stars galaxies etc. How the conversion of the Pl MG field energy converts itself into a p matter, this is why when you create the P matter of your SS, the boundary or matter skin you've created will have its own rotation. This is understanding the interaction of the fields slight stronger in G, slightly weaker in M, slightly moving in a different direction, that it gives different twists and turns, this is why Jupiter turns one way and Saturn another, and the different speeds are created by the interactions exactly as you have seen and will see in your Space reactors. (1:07). The

speed of control is out of your hand if you do not understand the interactions, if you get the right mixtures in the tubes you'll understand how you'll see the speed of the cores will rotate. You control it with the feed of the Pl, you'll see more in the next step. You'll see the interaction of these with other strengths around ? it. How and why the stars appear to you, exactly as they are and not 200 million light years away, because the interaction is present in the containment, this way we unravel a lot of mystery, assumptions, and hypocrisy in world of science over thousands of years. You don't need a virgin girl to stop the earthquake because they never understood where the earthquakes came from. We never understood the over taking of the light of sun by the moon that leads to darkness, it's not very different the work of the rest of the U. (1:09). the next step is the simplicity of the knowledge that it can be understood by everybody and applied. You dictate everything you have done. He draws the tubes and you can change the direction and strength of each tube, the fieldd interaction will create the central point or free energy, the interaction of the 3 will lead to manifestation of matter (skin). Interaction with the other reactors means a constant flow of fields, you place yourself in a bigger container, a craft. (1:11). We have now seen the sound barrier of Pl, it has been tested don several places on the planet, we will not say how it was done. It will not touch your electrical circuits r anything else but you hear it, and if you go into total Pl barrier you'll see the time change barrier, the feeling of it. Clint comes on and explains what he experience the loud bang. The Pl traffic jam creates the Bang. (1:15). Man heard the loud noise of Pl. (1:20). Man has things to share of his experience on Earth with other beings of U, he should not think of himself as inferior. (1:24). Life is not exclusive on this planet, if you create the right condition life begins. It's not just releasing the knowledge but maturing the intellect to understand and use. (1:32). Questions. (1:34). You will see different interactions. Keshe explains if there is an area in the tube that can't interact with the center that Pl field moves outside, because it's continuously fed so it takes it outside, maybe you understand the development, maybe you understand the Moons and the distance in respect to the Moons, how satellite systems in the polemetry ?? are created, how even in conditions you have 2 electrons and a proton, have extra electron .. the S the interaction of a field in a given position reaches a point that an environment is created that leads to the separation and finding a position in respect to the center, this is how in your S you create satellite S from your S, but matches yours but is always in touch with you and you can always bring it back in. (1:36). These are part of teachings we will come to. You don't carry a number of SS on stand-by, you create your SS's which are connected to the central control and through your reactors you establish what you need. If it's still connected you send it to a destination and it can always come back in, this is how atomic Solar S create their Moons, Moon Condition, it's not all created from absorbing energy from the environment outside some are created in respect, in interaction with the center, which repositions itself ??, a number of moons, of stars in the Solar S are created by this method, where you see similarity but totally different conditions, where you understand position lock but not rotation lock. This is a fundamental interaction of the fields. The sound barrier comes from the interaction of the Pl, if you make it in a condition that it can change to the matter, now you create matter from the ?? Then you'll understand you can create different things in different parts of the tubes. (1:38). This is why we put satellite reactors around the craft, because we dictate now the position and energy of the ?? Pl movement. (1:40). Mario shares his creation from the flower of life. Talks a lot. He says he can see

and feel the fields. (1:46). A being communicated with me, a higher form of life. (1:48). Keshe says this is how a moon and a planet work, Solar S, each one links in the rotation of the fields of the other, the weaker the donkey (Cu coils) causes the Mother to feed, this we saw in the 129 Tesla S, there is a need and even if you look at the AA, H is a need man to feed that single atomic H in the AA, it's so strong by the others ?? order of magnitude creates that flow, this is why you need CuO2 ? in SF one is always creating a condition for the others to feed, that strength variation creates the motion, Mario says he thinks the motor is the donkey, Keshe says you could be quite right, because that motor creates a specific MG field on the matter level. Then how do I make it spin without a motor? Create a (field) strength difference system. (1:50). Smaller or chose a weaker strength in one of your cores. He doesn't know which direction the fields should go. You're at a stage to start playing with the field Pl but you're using a matter state to create that field. (1:52). It can't be random, understand what you have done to give you a specific field. You should be able to lift, communicate or create light, you can see or hear the fields. If you speak and no one can hear you, means you have created an environment in which the fields are the same as the MG fields of your voice, which is the AA of your body, there is no interaction, it's not strange if you understand it. As the voice which we think of as a matter state, is a Gans state ?? translation of energy, the interaction is balanced so we don't hear you, if you do it in an electronic level, they don't work because there is no interaction, communication where you are indifferent, what you have done is correct but now understand these features. The process is try to understand how you create the speed, what does it create if you increase the speed, or strength. (1:54). Keshe says, I don't like the use of Lead, he feels drained. Okay let's look at the Atomic Mass of Pb, (207), what is slightly heavier then Pb with similar properties ... we see Silver, don't touch Mercury, Tin has it's own MG field problems, Bismuth (208.9 atomic weight), Silver (107), Gold (197), .. mix Silver and Gold (304), the combination of 2 Gans gives you a safe material much more powerful then Pb, that's why Silver is used for disinfecting and lot of other things. The mixed Gans will create 2 layers, yes but the Total Mass will integrate as one, this is a Pl Mass. (1:59). Look at Silver in combo, but only half of 107, 53.5, forget the 15 to 20% variation in the Gans state, you'll find Silver and Copper, Silver and Zinc, work perfect. This is why mono-atomic silver is cure for a lot of things, because the ratio of the different masses of the 2 MG fields is 2 to 1, ?? and the Cu demands the energy and in that process in the body, it takes everything out which is extra (diseases etc.), this is why it works for diseases, you create a flow with Cu at half mass, it's 1 to 2, and creates the ?? wind flow of the Pl level. If you ?? don't feel, because the E interacts with the S also, try to add Gans's of the heavier. ... Next week we show new Energy Pens by German KF, you are given different stones which interact with different Chakras, the Cu coil inside connects with the P of Man and that stone connects it to where the strength is, which chakra. Do the same thing in your S, if you don't get such a flow create it, (2:02). Create the Gans of Silver and Gold and then composition of the 2 to create a heavier G much faster, understand which one is giver and taker and what gradients you create. ... Pb is 207 divided by 4 is 51, then consider 15% that's 56/57, if one of the fields in Pb is higher then 207 (214), because it's not always made of the same electrons and protons, ?? energy is a composite, at that point you have a Cu, Fe or Zn, which is on a lower strength ? connection, but they behave as one, then you see how Pb interacts with the body, with your Blood, (57, take 10% on one, you have a bandwidth of

interactions of the same), one is a quarter of the other one, the field flow is very heavy so you feel the drain (?? from Lead), (2:04). The pull ... start making Gans of materials and play with it, remember the point of reference is your Blood or your P, for Blood reference is 56/57, if it is the E because they are near to it they have to interact with each other, is Zinc (65), ?? then you see how E is connected to Zn is stronger then the Cu, then see the connection with your materials, then you create the condition of absorption, of the feeling, then if you are good with one, and not the other, is the balance flow created in the atomic molecular structure with the E, which is Pl and the Silver which is matter state of the field. Now that you know the LP start mixing and playing with them but keep track of what you are doing, then you created P fields flow, you start creating M ?? veins, motion of the fields as you like. (2:06). The Chinese understand and bring the E in with the P and yin and yang and see it totally different. The Westerners don't understand the Chinese Culture, it's a different way of thinking. Go back and change the Pb. Alex makes Gans's of different roots, why does Ginger work one way the others another way, because Ginger absorbs certain fields of Zn of Cu ?? pattern materials in the body. Look at the composition of ginger, don't ignore the one which is smallest amount, ask why, it gives enough that it ?? the ones that are huge, or it's there to create a conditions of the flow of the Pl. When you take a root in your hand it's not a matter state, it's alive, it's a Pl condition, it has a flow, a reason for elements to be there. What do you usually mix the silver with, what effect does it give? Why in ancient time people used silver as medicine, and then forgotten it. (2:09). In Bahrain special pearls they say grind for 30 days continuously it releases energy that can cure anything, culture pearls don't have that property, the pearl was made from the Ca and the ?? of the protein of the animal, so you release the energies on the Ca base that effects the immune S, that's how it works, we have to understand the depth of the huge amount of knowledge we have. We decipher it with the new knowledge and the way it actually works, and not what we assumed. Walk away from Pb, it's an extractor of energy and doesn't give much back. Create LP of Silver and even Gold. I will teach how to make Gans of S and G out of fresh air, but man is not ready yet. (2:11). Change the Gans's and create flow, maybe make 2 balls one weaker and one stronger that the field flow of the structure works inside, you don't need coils if you managed to create the field flow. Austrian built 2 P Pong balls with LP, wants to know how to know if it is working. Go inside it and feel it, you are made of Gans, you create a condition, a flow. People are feeling better when he creates a flow. Bernie explains how he went from a few feet to meters. (2:14). He visualizes how the different Gans's interact. He uses the car to see how far the fields extends. (2:18). The moment the car changes sound it interacts with the fields of the Pl. It gets more powerful no hesitation. (2:22). A man placed Peace Pl generators in Vienna. He has P Pong ball with a motor filled with Gans of CO2, CH3, and CuO2. (2:24). He shows his generators. (2:26). Klaus presents his Health Units, many start popping up around the world. Some units are ready to use in some hospitals to test. (2:32). Lisa from China. A large Cu Sphere with 4 reactors inside, Triple Cu wire coils. (2:35). Arrangement of several reactors. (2:39). Keshe says the leakage comes from how he has arranged the reactors. Everything is based on the symmetry of the field flow, all your reactors are flat, you haven't created a dynamic flow, only a rotational flow. Learn to compress the fields inward. consider on different levels of fields. (2:42). The gap allows the field release and flow. If you want a field compression you have to obtain and maintain it, you have to be able to do this in

single core Pl. A lot of you will make these LP reactors and find out it doesn't work, on the top you leave it open, these little things effects your performance. His system is a flat plate so no flow, he created some differences but also a lot of escape routes (for the Fields), you also created leaks. Don't look at it as flat but as a sphere, they are also reacting with the floor, walls, etc, you have to contain everything. Containment is 90% success of the lift. (2:44). You have to increase the fields and contain them, when you can do that and maintain it and manipulate it. Don't build huge S which are ?? loose, build S which are tightly packed, then when you see the result change the parameters one at a time and let the field grow, As you separate it you increase your field ?? barrier. Bernie started at 1 foot and is now at 3 meters. In the SF we put 1 up and 3 down, contained them close together and controlled the height. 99% of Systems built by you are workable S. If you look at all the different S you built since start, you have gone through the evolution of races in the U that developed these and all of them managed to get to Space. The races looked into the night sky and saw the motion of the planets, stars galaxies, and understood the process, it's the same for all of you, man has gather knowledge to make P rotational S, motors. Understand the way the stars move, their position, how they are created it, what leads to them. For centuries we were looking at Venus etc, we never went to understand the real position and motion of them, now we understand about the Pl and field flow, start analyzing its you who write the true story of the Cosmology, not the cosmologists up to now, because they all worked on the same ?? ... according to the current understanding (Pl) why Uranus is working sideways, Venus going the other way. (2:49). Does it make sense that Venus changed directions because hit by meteorite, or change in the flow of direction of the Pl. Look in sky and start seeing the Pl flow of the fields, there are flows like the river on the planet, Keshe sees the flows from the interactions of the other fields. We have no choice, the Pandora's box of the U is opened, we have to continuously add to it. (2:51). The reason the Chinese Reactors are not flying is because he has a flat plane and lot of leakages (fields). (2:55). Rodrigo from Mexico shows his Health Units. (3:02). Treated a dog in Unit, after she behave like a young puppy, effected the E and P. Doctors need to observe E changes also. Pets who stayed in car also changed their behavior. A lot of neighbors call to come and be in the field. One lady with tumors all over, after 1 week, only one tumor left, he has all the MRI scans, she does 3 hours a day of scans. (3:06). Keshe says to follow these patients for long term, do you see recurrence or due to sorting out the E no recurrence. We see that the body gets a new dimension in the structure that does not accept anymore production of Cancer Cells, which means it locks itself to dimensions that can't be accepted by the body. We want to create a track record to see if it recurs. We see these kinds of cancers increasing with the use of mobile phones, they are rapidly increasing. (3:08). There can be a solution. (3:10). Finish the video from Norway, show 10 minutes. He describes how he made the Pl batteries. (3:13). How he made 5 different Gans containers, Zn, Cu, steel 2, brass, and final soup was 40% Zn, 40% Cu, 20% the Fe , completely orange color, ... (3:18). added sugar. (3:26). Intention seen through the pentagon structure ?? ... (3:34). The man is on line, explain further, first of all the mixture is important, the distance etc. develop that further, look for the lights, glows, you will see interactions of P in Lymph and muscle tissues, now you have to change the salt in S, create the Gans of Salt and add to it, you'll the P of the Man, use Na or K salt, not Himalayan. Do step by step, small variations, you'll see hexagons and other formations to the full circle. (3:37). What you're showing is

how the body gets its volume, use the salt which is the construction of the kidney, the pentagons will have 3-D in respect to the others then you see a structure, start seeing the storage gaps btn them. We are doing this in the lab, ?? the brain has found its maximum volume now we see structures. (3:39). Arman presents 4 large balls and 4 small balls, transfer the fields of LP into empty space of the balls and close it, then have interaction of the fields, make combinations, transfer is with N tubes, F Pl. (3:42). The plastic tube has to be n coated and you need a gradient that the Pl reaches that empty ball, it's not a matter state it has already crossed the walls, matter doesn't exist (to it ?). The level you are working now the tube is not needed, you can put it in the middle, ?? you create an interaction and you transfer the energy as you like. You pin point where you want it to be with the N tube, you ?? the center ball by controlling the Pl in the 3 other balls, you create a pull from one to the other. In principle the field is already transferred to the matter state of the ball. (3:48). New Zealand presents a health Unit. (3:58). Keshe says try not to use such dense coverings, soft CH3, the walls becomes a filtering mass, anything you use becomes a filter, MG fields strength. (4:03). Questions on health unit, whether to switch the separate coils on and off, no it's no much difference its just that you have a homogenous field.

114th Knowledge Seekers Workshop May 19 2016

(:05). We are going in a direction that Pl is taking over the energy S, a Pl that everyone can create in their homes. Ghana will present. (:10). We might get embedded in a Space Agency at governmental level. We watch fro infiltration by Belgium and German nationals. No one has been accepted as U Council member yet, you only become a member when you receive your acceptance by September. Your conduct has to comply with criterion, peaceful, unification, not division, lying and cheating etc. (:13). The purpose is unification of the planet, and already they are behaving in the ways of the past, which means setup by. (:17). Summarizes the gas Cores and the Cu Coils ... (:24). You can make combined S that can co-exist and each find their positioning, and then you find strange phenomenon. ... the advantage of working on this planet is that you have the matter state Gans, rotate the inner core, you'll find the fields coming through it will be fascinating, from the earth it goes up the center. Any fruit that has Pl Gans replicates this and does the same, apples, pears, oranges, you call it the "center core" , comes through the bottom, where the seeds are and out the top, the center line of any fruit is the same as the center line of the Pl flow of any planet, star or galaxy. (:27). Show pictures of the oranges it gives you everything how fields flow, this is a gift. Now you should be able to understand it's a P living entity which has decided to divide itself, and transfer its field flow and create a Gans of itself, skin of itself and then within the field flow allow its interaction and creation of another entity within this entity of the same. Amazing, inside it you see the flow of the fields. (:29). Keshe draws on photo, the center flow, on the sides you have the MG fields of the orange, due to some changes the orange has decided to create a second line of flow, a duplicate of itself, a satellite inside the Pl of itself, and uses the same skin. It has realigned itself that the field flow is exactly the same. In Space T this gives you a lot of understanding how to position the flows, from the M field in center to align further out. (:32). The fruits M field flow is the same as the planet. For those who understand this flight should be within hours, to replicate. Leave the center reactors free.

In the (health) Pens you made your double core, you left the pin in the center which pin points the energy, in your reactors you have to do the same. In the (new) Cores with coils inside you dictate the direction of flow. You have the Gans Patch which in which the energy is everywhere, you direct it with the Pen, you see the (center) pin is here in the fruit. All the stars have the same channel flow of Pl. ?? .. they become solid state matter on the surface. (:35). but internally the field flow is exactly the same. The field flow, speed of rotation gives you what you need. When you put a coil inside a core you create a beating, this creates a mixing, every click, within the Pl of the core intensifies the strength of the fields, this is important it's the breaking point, the change point, this is what you need, and because all the coils are of the same structure, every winding is of the same material you create a massive homogenous and massive MG in 2 layers, and then in interaction with the totality you create lift. (:37). and shielding at same time. You have to get the balance of the energy right and those of you ?? have done this in the next few hours, Arman is almost there, you need to put a pin in the center to direct the fields flow right through the coil. What you see is how field flows come to create your position, you create rotation. (:39). Last photo, we see this in the galaxies of the U, tilted rotations, moons. In some planetary S there is a moon size inside the whole structure, the same as a moon size outside the structure, these are very common because of the high-speed of the flow of the Pl and fields, we see the vortexes, ?? see big cloud in Solar S. ?? The U is expanding or moving but it can only do that because the room is there for it, in the fields of other fields in U for it to be expanded into, the same with the electron, proton, your reactors. (:42). You do this in Pl condition, the minute you leave the surface of earth and go up to the boundaries of the MG field balance, the more you are in a Gans Pl gas state nuclear condition, you're not in a matter condition. N, C, and O on the outer boundary of this planet, I am talking about the interaction of the fields not the solid state matter of the surface, the ozone layer, is created in the Gans level, first of all created in a Pl field level, and as it has created itself by the interaction of the fields from the Solar S, and Earth creates what we see as N, O, C, in this state interaction they are not solid, they're fields but in a given strength, and as they approach closer the MG field of the earth, now they have ?? full MG field one dictating lower ?? MG fields, changes to a Gans. (:44). and on the surface changes to the matter level, frictions and frictions taking more (strength), which leaves, you get N ..?? If you understood this you can produce the same conditions that in the boundaries of your reactors rains down whatever you need. Why I said check the dust on the floor, and see what you got, check the environment and see what you see, Arman is on the verge of showing the very first flight S, the last leg is for the coil to show the direction of ?? ... with a little pin at the bottom he can position it, stabilize the rotation, field stabilizer. If mixture, speed of rotation, the coil and coating of it, is right, we have heard the noise of interaction, seen surface ?? vibrations, the position of the movement of the Pl in noise level, now we are in the outer boundary level. (:46 - 48). ... The beating inside creates a given condition, this is what you are looking for, ... we changed the course. (:49). Arman shows his work his 2 field (empty) reactors. you can change the direction and speed of the motors, and he made a double coil on a rod, you need that mixing, the same inner core is the Caroline Core, this mixing in the center of the Gans LP ?? stirs up the rotation of the Gans Pl itself, if you increase the speed where the separation builds up the constant, (:51). it becomes, earth has ?? speed rotation 1000 km per day, which creates day and night, gives the solid state matter of the earth, you

increase it in rotation around the sun, 10,000, you increase the speed of sun in the galaxy at a 100 and then the Galaxy in the U at 1 million, then it gives you a benchmark you need to travel in the matter state condition of the earth, to travel in the Solar S, Galaxy and in the U media, that medium is the most important part for you to understand, and what we created in Arman's blue ball, contain a matter Gans state, to be filled up, you can see the liquid (Pl), it's a matter state, so your S will respond to a matter state MG field which means it will create light and positioning in this ??, when you go out of the earth boundary it will NOT work, because you have to change the speed and the media, the medium when you go to space of the Solar S is like a vapor Pl, then when you enter into the U condition you work within the F Pl, so we have some steps to go. If Arman can fix his double coil in the center of ball we can show the change. Up to now we have been dependent on the speed of the rotation of the Core, .. how the energy was packed in and whenever it was released in a given condition we created 129 Tesla, now we dictate internally because the surface friction, this is partly of the liquid Gans in respect to the matter state of the glass or the Cu coil we used before, dictates the limitation of the field level, now meeting it internally you take control of the total field, what comes from outside, from the boundary what goes from inside you create in interaction with each other 2 fields which carry both G and M you'll find positioning and lift. (:54). This is a copy of the planet earth, of the Solar S, U. ... it depends if the winding core is Cu, Zn, or a composite, if you can produce a Gans of Silver in a very efficient way, add the water of Silver into it, which becomes the Pl state, because true replication of the earth, etc. Achieving this with Cu core or steel is the same you don't need glass, even those huge balls which you used as cores. If you can change the speeds, allow the inner and outer cores in the center change size. (:56). you'll find out you'll see what you have been looking for. There are a couple inherent problems, it rumbles, so it cannot maintain continuity, it becomes the first core, the bigger one the second MG field, and the interaction of the Pl with the Gans in the glass becomes the third and this becomes the skin or shine, light, but because it is not made centralized it will wobble, ?? we expect the sweet noise of ?? craft level, shimmers and solidification on its own, then if put the 4 of these in a given position of SF we'll see the creation of a full craft with the environment that you can walk amongst it as you like. A problem is one of the motors can't go very high speed, but if you make it reverse you should be able to do the same. (:58). Arman talks about work ?? Keshe says to add some silicone inside the core to see if can create light. (1:00). If you can use Pl batteries, not AC current. (1:02). The innovation group has developed S that work remote and they have S that create rotation in Gans without motors. They are testing for the cars. >> (1:20). Questions about the orange within an orange. ?? most of the seeds are the replication of the fruits, that is what creates the condition, now we see seedless fruits, but the energetic info in side is still the same. The MG field strength in order to create, is the field which is not only produced in the fruits but by the tree itself. (1:22). by the branches, leaves, how the leaves change and then transfer the info to the seed itself as part of its memory. It's not that the seed is there just for the fruit, the behavior, the conditions which the tree exists, effects the flow of the LP inside it and its memorized, it's brought back and deposited in every seed, not necessarily by the flow of the liquid, sap, but actually by the MG field of the plant itself, every leaf transfers its energy, info to the seed, the fruit is the center to receive all the info not necessarily P, but from the fields from the other part of the tree. How to communicate

with the trees nearby, because it's a field interaction. Man has a lot to learn about vertical people, that's how they evolve, the info they receive and they embed it in the seeds, they don't go anywhere, the tentacles are their leaves and branches, if they need water, what needs to be done, what needs to be deposited, what they need to change slightly.. (1:24). How come the trees releases info from itself that allows the birds to be able to use it for their food. It looks how it can exist in this environment how it needs to evolve slightly that it creates a different environment for it to be in ?? in comparison to the other trees then it transfers this info to every part of the tree, the seeds, stem trunk, and then collectively they decide to create a slightly different color, or different flower that they attract specific kinds of animals ?? can't eat, need to be specialized in ?? for the evolution of the plant, which the plant itself used to evolve its environment. The structure, it carries this info in one seed, that you can take the seed to another environment where it doesn't exist and you can't grow it. It's not just the temperature in that environment, its the seeds info about the environment it needs or it doesn't grow. So we replicate the environment for the plant to grow in that environment. (1:26). The fruit carries all the info of the environment with it. Rick asks if the second orange grew from a seed or from the Pl environment. Keshe says it looks like it grew from one of the seeds inside itself, when the seeds first developed in it one of the seeds separated itself from started growing, taking the orange for its environment. In a way seedless fruits can be overridden, you can take that layer off and the old layer ?? The genetic manipulation is easily reversible, if you want to find the original seed just leave it in the Gans, change the environment, take its energy out and you'll see the change. You go back layer by layer. (1:29). (1:30). Question about mono atomic gold on human genetics. The assumption of science about man only using 10% of the brain, every single cell of the brain is working 24 hours a day from the point of its inception to the death of the man. Every cell has to be structured, in position, color of hair, bone, shape, etc., etc. the countless operations in the body are controlled by the brain, the billions of cells, all need a memory bank that they are created in the same place and same condition on a repeated basis when the energy level changes. (1:32). In present science they tell you the blood or skin cells changes after so many days to a new one, when you wash you see it coming off, if you think it just happens naturally it means you haven't understood how the U works for holding existence, that cell, bit of skin which you see, a bit of healing happens, or the skin is produced to cover the skin that you cut, USES the memory bank of the brain. The compact form of your body in operation, in E, in sense of creation of P is in your brain. the billions of cells in P happen as a cell in the brain of the man. Then you understand that every single cell in the brain is used on a continuous basis, it's always on charge, it always knows when it's time to change a single cell in such a position and then the cell next to it needs to be changed afterward. So the brain of the man is representation of its P in 99% of it. Actually what we use for info and the rest is the interaction of the fields of these parts, why did we decide to have longer fingers, the shape of the finger shows the E of the person. (1:34). ?? Why we see such a people all have such and feature and behavior, it means there is a pattern, a connection, btn the E, which is the behavior and the P, these are recorded, kept, how much is needed to be a P recording to be able to hold the data as a field. ... Even the cell itself knows that it is time for me to change for replication of myself, now you see how intelligent is even the brain itself. (2nd question) Mono atomic gold and silver can be produced in a very fine way, silver becomes grayish, gold becomes whitish, what does the whitish mean, all

the neural S of the man has a connection with a ?? wide shape, white color, because in that state in the color of the neural S the absorption is not in the matter state, it's in the transition of the Pl field forces that enforces the whiteness to the color of the man. When you go Gans matter state, which is muscles and tissues which need to interact with P you become red tissue, (? white tissue as fish, or verticals (plants)), or you go to vertical animals you change to green. (1:36). Making mono atomic gold is extremely easy, ... a condition of N coating even the gold. I used a diamond tester to show the diamond property of the gold, we put a gold piece in N coating and it itself as crystal structure, it shows the behavior of diamond with diamond tester. The N structure gold has different strengths you might see it off white, it's same with Cu, if you create a N Cu if you allow it slow enough to oxidize you see it in green, if you do it slightly faster it goes black but it is still the Cu or it goes reddish as we use in our MaGrav S in the factory. (1:38). You need to create a condition that the atomic structure of the matter is encouraged to grow in respect to environment, so same as the orange, the inside environment of the orange allows the creation of another orange inside it, so this time your orange is your caustic, what you create as the current flows through, as we saw in the field of the orange goes from one side to the other, -45
(1:43). Benjamin from Ghana, results of the Water Treatment.
(1:53). They state their qualifications and background these results will go around the world. (1:59). How they processed the Gans, remove the salt and dry it, used dry weight to be replicable. Used a Hach senseIon 156 to read pH, etc.
(2:16). Tested what the Gans would do to the microbes in water. (2:18) Gans can be used to change or influence the state of viruses which are MaGrav based entities. (2:24). Analysis of bacteria's in water. (2:27). RESULTS of tests. Most were 100% but not all. (2:33). Keshe talks, the tests in Tokyo show you can do water of Gans. He asks them to test the water of Gans. CuO2 is a punch, sledgehammer but we don't want to kill all the nutrients in water, try mixing with CO2. The results for CO2 was less effective, but in the rivers we don't want to kill the bacteria's needed for the environment. You can make stations along the river to add the water in right composite to allow the fish to grow but not the harmful bacteria. In this test you used the Gans, now try with only water of Gans. (2:37). We see sophisticated equipment and highly qualified scientists in Africa. World leaders are watching and you have shown us the first use of the Gans and cleaning up world. (2:40). This was shown some years ago and then threats were put on the scientists to keep them silent. You used dry Gans but if you would have used liquid Gans you would have had totally different results. Do a test with the liquid it's more effective. He asks them to test radioactive waters. (2:45). Lady asked if it necessary to work with the concentration of the Gans? No it not necessary because you work on the strength of the Pl, whereas in matter state you work on the concentration. You can put a mixer in the Gans water at 1000 rpm, that will give you a constant fixed strength of Pl in your Gans water, you tune to the beats of rotation by releasing Pl. So test using the water of Gans that has been in a mixer for say 10 seconds and 500 rpm, compare with ones that have not been mixed. Because at a given speed you release fields at a given field strength. Standardize the energy of it. Example take some chilies from the same plant and test the heat of it, then put the same chili and put it in a water and mix it, you'll find potency changes drastically, then add a Gans of Co2 to it and mix it and test potency, you'll find by order of magnitude it increases beyond imagination. At this time the only way to

standardize it is by categorizing the "release of strength" of the MG at a given rotation. I can't give you measurements but you can standardize strength of LP. (2:49). -27

(2:54). Benjamin is testing disinfectants of different mixes of Gans to add to soap.
(3:00). They did unofficial test on Radioactive waters ??
(3:13).
(3:14). Doctors are coming into KF and are reporting cases with the T.
(3:22). Getting extremely interesting results on cancer processing.
(3:26) Questions. Someone sees beautiful colors on the south pole and grey on the north pole, ?? (3:29). What is volume of the eye dropper of the Gans drops, it's done by capsules 60 of 2 to 3 mls of the material. You are joining this to collect data for humanity, not to produce the material. The drops are being produced in Japan. (3:32). His father has visual nerve deterioration wants to participate. These are one time run test, if you don't see any results it means it doesn't work, you don't need more bottles. You should see the changes in the first 3 days. It's a one time use capsule. (3:35). Some herbalists in Africa want to join. Yes it's an open platform. Photo of Gans that is floating. (3:39). Keshe teaches about separation of Gans, it's not strange, the water has different property, she used a discharged battery, .18 A. He draws circle on board. When you change the density of water by adding things you change the space of the Free Plasma. When you add energy or change the composition of the material, the water starts separating according to its MG field strength, in the center, in the liquid, you create the separating through the MG positioning, then it floats up all together. ... now the vinegar becomes structure MG positioning, where before it was only water. Just because on the bottom you had some white stuff it does not mean it is all the same Gans, you 've got a mixture of Gans's, the new material or the energy you added, creates a separation in MG fields of that white layer. It's Pl energy that you add, they may all be white but not the same strength, so you created positioning (in the containment because now you control the environment) and they float. You have achieved the first lift ... Madame. (3:43). But the media is liquid instead of air. (3:51). German manufacturing getting ready, in Italy the banks are cooperating.

115th Knowledge Seekers Workshop May 26th, 2016
(walking barefoot, sleeping on mattresses,)

(:12). (:14). Chinese government has appointed Professor Zhu of SUPC as representative for KF. (:19). In the reactors we are developing for Space the rotation of the core and the inner coil can produce interaction btn the fields which creates motion and lift, in S we don't see motors. We create motion in space through the interaction of the field Pl when the difference is large enough leads to friction, or P motion and rotation. Option, we can create MG field plates, where you place Gans's of different strengths indifferent positions on the opposing plates and they create fields. This is the next step in controlling the field Pl, not liquid or vapor Pl. (:22). It's important what kind of Gans's you need to produce. In Space T you always feed from the strongest to the lowest field strength, if you can create rotation through Pl field radiation, you dictate a constant flow and dictating the condition of the speed of rotation of Pl without P moving anything in

your reactor cores, placing in different orders, like the health patches you made of different material in different position will give you a lot of motion without any P motion. You can add or withdraw fields. In trying to catch up they create a field flow. The whole purpose of F Pl is to introduce and apply Pl T without motors the way the U works. (:26). On the board i have drawn only the fields and not the core. In Space you can dictate the parameters where the solid state stays and is maintained. Look at the structure of the surface of this planet, it's the interaction of the fields which decides where you have the solid state matter of the continents and where the liquid state of the oceans stay, at the same time the interaction of the fields of the inner sanctum of the planet and in interaction with the fields within the Pl of the Solar S decides the thickness of the atmosphere of this planet, there is no mechanism to hold the O or H or gases except by the interaction of the fields. Therefore F Pl is the next step, which is containment by the fields and not by the matter condition. As man is materialistic and connected to the matter state we went through the stages from molecular structure to atomic to Pl. (:28). Now we enter the field of the T the same as it is in the U. In the structure of the Galaxy you see they all have different shapes and forms and we see the boundaries of it, these are created only by the interaction of the fields of the stars and the systems within the Galaxies and the interaction with the fields and what is in the environment of the U around them, dictates their shape, color, flatness, now you see the shape of a Galaxy without the containment, and this is where the Pl T goes. In Space you can't go look for Cu for a core, but you can create a condition from the interaction of the fields that gives you the confinement of the Pl within the atmosphere of your System without ever having a P matter structure. In space you look for the interaction of the fields to create things, to maintain, develop, and operate and use different field forces in a given condition for the development and structure of your systems. (:30). At moment you are producing Cu and Crystal cores, what happens if you enter some place in the U where the Cu state of the matter is the field strength of the environment, you loose your reactor, life, SS, because now the Pl cannot be contained. It's like having ice in the summer for the freezer and it melts, it has no shape it changes its behavior, in space in different MG fields, the matter state which you have up to now have followed becomes troublesome, because 1 second you have a core and the next not, because the matter state core happened to mix and be the same as its environment. This goes back to the understanding of the containment of the skin, you create interaction of the field plasmas where the layers of Pl gives the manifestation of P. But because you have used different strength field strengths, it's a dynamic state as the field strength changes the field rotation strength changes, but you maintain your skin. (:32). We go into the water or heat of the Summer we don't melt, because our body has accepted a field transfer of a limitation of environmental MG field variation. In the space you have to have the same condition, where your reactors stay at a minimum condition of the existence of the man, which is your AA and operate and maintain a shell of field and not matter state, to create a condition of maintaining position in respect to the core system which has created itself. You use a spectrum of Pl MG fields which their interactions in the positions you have predetermined, dictates the speed of the rotation, the field strength and at the same time the positioning of its fields in respect to its environment. Field Pl is the ultimate step in the Space T. (:34). You play with field strengths of different dimensions that it allows you to create a condition of rotation, positioning and even P interaction to create a P condition to maintain and contain matter

state. Now that you produced the liquid plasma (LP), it should be very easy to manipulate it to produce F Pl, you can direct it, target it, control the speed of it by the amount of it, because it works by the mass, M G Pl mass which decides and not by the volume. Become masters of how to mix different LP to create the strength which you need and how you can withdraw and add to. (:36). Government scientists have jumped on it like crazy because they received the key into U motion and they understand it. We looked at Mercury, Pb, atomic mass of gold, silver. It's impossible to mix these materials in a P matter state, but you create Gans and then LP, and then you have the freedom to play the game of the U, through the field which is released by Pl . Summarizes. (:38). This is in the writings of ?? bless his name., when man understands the mutation of Elements. Now man has achieved the maturity of his intellect. Now you can do exactly the same in reverse, you have Pl field you can go down to (matter), the cycle is complete, you can create field winds and hurricanes without moving a finger. You can create waves of love and ??, oceans of winds ?? the condition of traveling across the U at the speed of the U itself, that's the point there is no time in the space. (:40). It's for you to complete. Pl T in its field transfer is more or less the ultimate, there are a couple of more steps after the F Pl but knowledge of man will take millions of years to understand. But this should give you enough to build S to enter the U community, that man can create whatever he needs on this planet to stop the conflicts, he doesn't become slave to his P existence. If you can understand today man can fly and be at any point in the U he wishes. Now you have billions of planetary systems where they all have this knowledge, man has been left behind because of his violence. You create motion within the fields of the Pl, you can decide the speed of the interaction, even on the ?? disk of the colors you can predetermine the boundary of the fields I want to be outside of and what I want to be inside. You can make Pl conditions of layering in sequences, (:43). that fro example, if you make ... if you make all of this Cu strength, your reactor will have a Cu strength, because it's Pl it can change itself to another according to the pressure of your environment, you never loose your containment of the fields. In the U you see solid state matters made of whatever materials, even if the materials are not available. With the use of Pl fields man can dominate, develop, interaction with ... works in a safe environment. Scale this knowledge up and you travel the U in no time, scale it down you can create in the outer ring the condition of the shape of a kidney, which is failed in operation, you dictate the parameters around which your S outside the body, then create field forces inside that allows work of the kidney, parameters and you do not need to remove the kidney. (:45). You can dictate where you want to grow tissue in the heart, if a child is born with a hole in his heart, without loosing the child. You can use the field forces to do remote no touch surgeries. Scale it further up (Pl) and you can produce the shape of fruits color of banana. Now the development is in the intelligence of the Man, how you apply it, bring it together in a way that does not harm you or bring the condition to harm others in the environment which you exist. By creating MG field tolerances you accept a certain condition within that tolerance with a field strength matter condition, now you can see how Pl field can lead to production of whatever you wish. The field Pl the Chinese manufacturer choose within the containment, energy fields of water or food is created without thinking of a need for food. (:47). ?? .. Oasis System, .. as it becomes a part of the structure of the Pl of their body, and they absorb from the environment of their body what they need. You create a base on the bottom and top and in transfer of the Pl creates

its own field condition and as your body is set in the structure of the Gans state you can travel through, in and out of the matter state you decide what the barrier to be according to the field strength you use. Do you want it to be in a gaseous state as on the surface of the earth or in the liquid state in the ocean. You want to travel in parts of the U where there are no fields and you dictate those loose weak field points or want to go in the center of a star to see how it will be. (:49). You need to move into the LP so you can go to F Pl. (:51). Questions. If you use LP you get 2 separate fields but combined? When you mix Gans's they still stay MG field position in respect to each other, because they carry different structure, (in Book #2). He draws Cu Gans in glass, they are positioned in respect to each other because the central position, MG field is different, when you go into the LP now you have the same in origin, but the gapping is constant, all you've done is to create a condition of overloading, the same Pl with different strength, these radiate equal according to the mass into the environment which it is released, ?? this is homogeneous of the Pl you've created. In the Gans state you have positioning but in LP state you don't, but you have the field release, this is what you are looking for. (:54). It interacts with ?? it form, it's a freedom you don't have with LP there you create a spectrum of interaction, which you don't have with F Pl where you work on the same level but within the structure of ?? mass. China will produce different types of Gans and uses. the Chinese government has committed itself to peace and with it comes the new T. (:56). The US government is moving on the same path now that the Chinese have it, the same with Russia. The T has its own credibility and it's taking its own shape. China will be leading in many ways for the world. The live teaching in China will not be broadcast in the West. We expect to be there 6 months. (1:00). Chinese Health Unit presentation, 2 parts and 6 crosses, 1 side is Cu N coated and the other is Al, all are covered with CO2, they used Zn for helmet. It's better to connect the 2 parts with N coated, it's essential to target the point of the interaction of the fields. When you don't connect it the fields interact wherever they want to, N and Gans coating dictate where they go, you need to create a line (of direction), this way you target an area, this is the reason we used N coated wires, when you don't have it the fields spread open, ?? the stronger fields interact. (1:05). We chose the Zn and Cu for a specific reason for the structure of the body of man. Aluminum behavior in the field transfer is different. You can use any metal to make a coil but understand the fields that dictate its flow, what energies will be brought, take to the structure of the other Pl Gans. If you understand the field transfer you can build S which none of this is needed, but this is where we are and choose to do. AVOID using especially Al coils, I explain how it works in minute structure, how it changes the field Pl. The UN made it illegal to use Al dust to be sprayed for drought. They fly high altitudes to the moisture of upper atmosphere (2 or 3 km), to avoid the governments. They dispersed Al dust particles, the moisture sticks to it. (1:07). Then out of nowhere in the heat of the day you get a massive rain, because the moisture difference make the rain. But they found out the Al particles digested by the body can create a lot of health problems. When it gets digested it becomes a Gans of Al and can react in different conditions. So please avoid using Al. Let me teach you something since you brought it up. He draws digestive tract from the mouth, it goes in mouth (it changes its matter state and becomes Gans), when you digest food in matter state as it goes down in the St it starts changing into a N material first through the acids, actually a conversion Pl condition matter into a Gans state. (1:09). when it reaches a certain level of Gans state the body transfers it into the Intestine, at this

point, energies Pl MG fields which are needed by the body is released into the Lymph, but, but instantaneous, zero-time communication, the needs and the collaboration btn the brain fields and the body parts. When you digest food and it becomes a Gans and its F Pl which transfers across the body to the Lymph, then at this point what is requested by the brain, because it knows what is going to happen, and the cells allows the withdrawal of the energy from the Lymph. This means the energy to be absorbed from the food is predetermined by the brain and the need by the cell when it crosses and converts to a F Pl, it's already predestined to where it's going and already targeted to be delivered. (1:11). No matter ever crosses the wall of the intestine, it's only the energy Pl M fields and it transfers energy to Lymph. This is the very first time we mentioned and Field Plasma. Only fields in the Intestine which have changed from the matter to the Nano to Gans, now release their energy according to what is already predetermined by the cell what is needed and by brain. What is needed and done is taken from the digestive S to cross the wall, otherwise all the energy from the food would cross straight away into the Lymph and it would be in a mess of everything. This is predetermined by Pl MG field strength btn the brain and the cell, whether heart, bone, or liver all is predetermined what is to be taken from the food, and those which are not there are predetermined by your Parathyroid glands I take this (material) because I can convert it using Phosphorus and Sulphur. (1:13). In certain parts of body you find even minute amounts of Lead, minute amounts of similar MG fields of strength of the Lead in the Kidney, liver, and L Intestine because this is the point where the fields hold to ?? separate what is not needed and the pulling can only come through higher level material and Al plays a very tricky part when it comes to pull the energy because in balance transfer it's very similar in energy to energy which is used in certain parts of the brain. And it interferes with the strength of the intellect, and brain. Pain has a specific MG field strength, intellect and comprehension are the same, Al creates a specific field which is in the bandwidth of the intellect and depression, that's why you don't use Al. Because now that you have created new field forces in your coils you make this free into the digestive S and accordingly with the brain. Would it be better to use Silver coils, Ah, you have to understand what the body is used to. (1:16). You could use Al in MaGrav but for the body understand what it does. ?? Each section of Intestine has different strengths it's trained to develop different field strengths, you don't absorb vitamin C all along track, but only in a given section. You have sections that only absorb red meat and its composite, or nickel or whatever. The St has exactly the 3 layers as your skin, and the difference in the strength of each layer decides what is released from the Gans Pl inside the intestine going through, (1:19). into the Lymph, if you change slightly this one to this one, then in that position in St, here you absorb vitamin A, there you release vitamin B. They will see how the fields are released into the St into the Lymph. ?? most of the Parathyroid glands have to do (with E and P) with the P conversion of the fields, ?? one of them does the field conversion for the matters of the E, one for the matters of the storage, for field transfer conversion for matter from solid state to Pl state, and conversion for most of the free fields conversion into Ca only that supports the bone structure because if at any point you don't have a bone structure there is no life. (1:21). The 4 Parathyroid glands have a specific function for a specific way in guaranteeing the conversion of different fields to the Gans of the state of the matter which is needed. The (Para)thyroid is the operation of the brain controlling the P operation of the totality. If you create a continuous Cu, you are feeding your Cu coil in

a balanced state which is not needed but the field transfer through non-lymph connection converts and reaches and finds a conversion from the Al in the E part of the brain. That's why you don't touch Al, it's just as because of its MG field strength which causes this condition ... it's not create .. they say they found a huge water reserve from millions of years, 10 kms down in the earth. I said no rain ever flew down, the reason is because the MG field of the earth and its magma and environment created in that cavity where the MG field is equal to H2O, that's how the water was created. It's the same principle btn this and the Al and the brain. (1:23). Be very careful with Al, Pb and couple other materials which have this property, they just happen to have the same MG field, some are isotopes, they create the matter state of themselves in the Gans state solid like a bone, in a given part of the brain, they convert in field strength transfer. Better not to use Al when comes to applications for body and food, because of the field transfer strength, it's not all the Al isotopes, only 2 of them. It depends on the rate of decay in one of the electrons in the boundary of the ?? Would it be possible to use the F Pl for traveling to the matter itself, of course it would be a game play, one of the first funs of Pl T. (1:25). Matter is the lowest strength, we make one a little higher, enough to understand the MG field positioning of the matter state... The molecular (matter) state we say the tightness, it has its own positioning, in a tighter pack ... if you create a field strength the same as the "tightness" you can go through like nothing, because when you enter it they open up, ?? the space becomes irrelevant. Because you dictate the positioning. This is part of the filtering S you can make with N material like to filter kidneys, the work of kidneys. You create the field gap (for the filter). You don't go for the Pl itself but the strength of the gap in the Pl, if you create that gap when you come in, the other has to find a new position, it moves over. (1:27). We use this knowledge in the detergent T, 40 years ago we used to have to boil the cloth that it loosens the fiber's spacing in the cloth itself that the soap could clean it. Could actually interact with it and take it with itself, now they use the oil of orange it works on the same principle but the matter state, you use a smaller dimension to enter the gap. In the Pl you use the strength of the fields to position yourself and ... in F Pl T there is no state that man cannot travel to, through, and from one to another, you just have to add the knowledge to understand how to do it. Would it be possible to use Pl to reduce the size of the matter, for example big as planet earth, to shrink or to make bigger? .. if you take the Pl field energy from it, then its Pl reduces in size. (1:29). then in the size of the release, its interaction decides. If you are thinking of making the earth pocket size and go somewhere else, yes you can do it, but you have to understand how and what is the composition of the fields. This is what we discussed about viruses, it's exactly the same, how do we shrink a virus? We just received reports from Ghana, it's amazing. You have the AA (COHN), then you have a Pl of the field which attaches due to the strength of one of the 4 elements (COHN), or combination of them, that becomes supplier of energy into and it takes it over. In the center you have AA but you have an energy packet which is feeding it. In present world of science we know how to destroy bacteria because we can play with the AA, but we haven't got enough knowledge to interfere with the extra energy which is much stronger then the AA, then we call it Virus. (1:31). The Pl T is effective against virus is because here you have a Pl in Gans or LP or F Pl state, now it has the spectrum of all the energies in a Pl, so they start to exchange fields (with virus) to find a balance, in exchanging fields with the Pl the virus gives the energy to the Pl, and the space generated in btn the Pl and the other

matters, the virus gets drained, gradually, the virus is still there, but you have depleted its energy. In the Space we don't have AA and bacteria, bacteria's are AA based according to the Man's AA and the big fields G field strength. ?? the Gans can be used for E Coli, disinfectant and the rest, it's just with the Gans you create this condition. Not deplete but bring balance btn the fields in the environment, and then it disappears, the same with the bacteria. (1:33). The bacteria's are another form of Pl, with the right Gans you can change bacteria's. We were discussing with the doctors about using the Gans Water for immunization, TEPCO tested it by infecting the mouse with influenza then administering Gans with no side effect, toxicity and no influenza. That's how it works and why in the Space you need it. You can create, deplete and dictate. The Health Patches work exactly the same way. He draws an organ on board, put a patch on both sides of infected organ, don't use a single patch, Gans works on a gradient level, it forms an Infinity Loop with the other patch and drains the disease quickly. When using P Pens for inflammation use 2 one on either side then it drains very quickly. If you use only a single patch you have field losses, whereas with 2 you have entrapped the fields. (1:35). Because you transfer its energy. I spoke about traveling in Zero Time by the strength of the field, this is exactly what you do, you find yourself in the U where you put yourself in the wind btn the 2 in the direction you want to go ... instant travel. It's like sailing on the seas. Now you create the sails of the MG fields, you get on the winds of the MG fields of the U, and if you get the strength right you travel at the speed of it, if the wind is soft you only float, if you get the high speed you travel like wise. The Fields work in respect from the strongest to the weakest, the strongest always feeds the weaker to bring it to its (? up to its own) position. In the CO2 patches, the CO2 is the weak part, the virus is more intense, higher. (1:37). the C and O are already part of your AA, now you created a weaker point and the energy flows (to it). I go back to the 129 Tesla in lab, it fed the other reactors to try and bring it to the balance .. If you want to take you place a weaker field, to add put a higher field. ... Talks about the magnet, directionalize, in my Health Cups I dictate the magnets, their strength, flat or ring, square or rectangular, each one plays a game. If I want to directionalize the fields I put it this way, etc... (1:39). Am I playing North to N or S to S, or N to S, if its bigger or smaller .. if at this point I need the energy of H to be delivered, I used a dab of Liquid Glue Gun which is high CH, it releases its energy to it, I use a spec of N CuO2 or N Zn, now you target it. If you open some of the cups I made it will take you centuries to understand the principle by which each one has been put together. I know how to push, build, because its Pl it is left to the E of man to receive or not, (1:41). because he still needs that E need to confirm his existence, that's why when you build a S you find out people don't use them, because you give, but their expectation is that if I accept I will not receive what I am looking for, (meaning the attention or confirmation), I want to take. The S works with everyone but allows priority of decision to the E. If you want to override it, load it up with Zn Gans, then you can dictate any condition, and this is NOT the purpose, we bring the freedom, then if you want you take. You can play a lot, the magnets are too weak ?? but you can target, confine, hold. The same as you use the cores to hold the Gans or LP, I have used magnets to do the same, most of the magnet somewhere in the structure have Fe, which connects to the blood through hemoglobin. When you understand the T in its totality then its very easy to manipulate for whatever you need. (1:43). You can walk a man out of cancer if he wants it within seconds. But you bring him back to the unit 10 times because his E needs a bit

of feeding, talking and sorting itself out. Don't forget the brain has the power to reverse the cancer also, it doesn't need your S. It is more powerful then anything man can ever make!! But it plays games with its own existence. Rick asks about grounding by going bare foot on the earth, ground point, or the Units use Saltwater as a place to dump. (1:45). In Space we don't have the earth to ground. No you can ground easier in Space. Keshe walks barefoot a lot on ground, gives and takes with the earth, enjoy lying on the ground quite a lot. Especially when you need to concentrate, you give and take to bring balance btn the P and E. The earth works the same way as I just explained with the magnets, and the 2 Health Pads, it releases fields in the matter state of what it has and you need, and what you don't want and you give. There are different behaviors btn the people who sleep in skyscrapers and those in the fields, every now and then you need to exchange fields to bring balance to our life in the P condition. The dumping is the surplus energy you put into a S which you don't need, you can do it with your hands and head also. (1:47). At times I stick my hands and head against the wall, with concrete you don't get much, with brick or stone wall you get different energies, you tune into the environment, it's a technique used for centuries, but we don't understand it. I explained this when you hold a P Pen in your hand and you don't direct it, you take and you give at the balance of what you need, this balancing is essential, it's the filtering of E fields, not so much in the matter state. When you lie on the beach you discharge differently with different sands, white or volcanic sand, you see different behavior, because you get rid of certain strength fields, it's essential and has to be a part of the life of every man in being able to bring balance. At times when I can't solve things I lie down on the ground, you receive and give what you don't want. (1:49). In dumping you give to the higher MG fields. It has a huge application in Space, if you know how and where to dump its a very effective way for discharge of energies especially if you have meteorites ahead of you, if areas you don't want to destroy you saturate. Same as what I explained to Washington, you release so much MG fields, the strength of the cells of the structure increase so much that the gap, the positioning increases and you can go through it, and you do it by dumping surplus energy into a given area, SS are known to carry high energy packets for this purpose, its not a missile, if you use it that way you'll not see a thing, it will literally dissolve like a sugar in a hot water. It's so easy we can take radar satellites out in no time, we don't destroy them we just saturate them with energy that they are not even there to do their job. Today I started teaching techniques and not Systems, if you understand you can do a lot with these, how to create wind, how to dump, motion, how to communicate without having a S. How to call to the earth from the other side of U, I am stuck. With dumping you can hold it, control it, or share it. You usually use high unbalanced F Pl for dumping or storage of energy. (1:52). Usually isotopes of matter elements which have very low radioactive base and very high Cosmic radiation base, they compensate from one to the other and they store capacitors of the energy. (back to barefoot) That's way the human race is becoming more and more detached society because we sleep on the mattresses which is all predetermined with all sorts of rubbish in it. Humanity stayed more or less the same when you understand that you are connected to the point of your own creation. Most of the diseases we suffer is from the mattresses we sleep on, the iron and contaminated materials which are used doesn't match our body, we transfer energy continuously to our environment, and these places are ?? fakes (artificial) where we live and interact with. (1:54). Try to sleep in a room which is full of N coated Zn, and I will

tell you what it does to you in 2 days time, you walk loving every creature on this U, because E you are satisfied, you choose a point which you ?? receive everything. Question, can human's control the fields without having any Gans or Water around, because we are in the Pl state and it contains almost all the materials such as CO2, CuO, CH3? Of course you can do. But how to control the rotation of fields and create different fields positions and E? You got to learn it yourself first, understand your own being, then you can create anything you want and let others see it or you feel it yourself. A lot of understanding needed as to what to release, depends who you want to be the audience of what you create. (You can play all kinds of games with your hands etc.) (1:56). Oh, you want to see a meteorite, there it is, because you create the condition for it, ?? vision of the man and ?? What the purpose of it. Hold your hands and create your own Pl ball, it needs a lot of understanding of your own strength. Question, creating matter from Pl ?? You can when you understand at what point the field strength reduces enough to be matter, when you have a Pl it goes through its own release of energy to its environment, if you control the reduction to the point that you decide the rate of reduction, then you can create anything btn your hands. (1:58). You can put your hand out and by looking at it with your brain you can create a field that at the point of the hand the energy from your brain reduces so much that it becomes gold in your hand and everyone can see it. You put the skin, the strength of the feeling to the E of your hand, it comes from the brain itself ?? neural S at the limit of gold, now you want bread, it will be bread. You have to dictate the boundary of the strength, with your E you have already dictated it, with your hand you dictate the position. A lot of people have done this, but it is understanding how much you release and at what point. You put your hand out 20 cm you get no bread, but at 10 cm you get bread, you can actually P touch it and give it to people to eat. Christ done that 2 or 3 times, but people didn't see it. This is my body, this is my blood, and that's how it was done, intention of the thoughts ?? control the P of the ?? (2:00). A question concerning whether living in the field of Zn or Al is good for you? Keshe, with the Health Units you use the fields, when you use Al with MaGrav you are open to the space to take. In the Health unit you sandwich the body btn those (coils), they have nowhere to go nothing to interact with. When you have a single coil in the house you share with the rest of the environment ?? it's a big difference. If you understand this process of containment, in the nuclear disasters you can use this knowledge very effectively to contain all the radiation, we have seen with TEPCO. This understanding containment with the F Pl you can do wonders. (2:02). You can contain any radioactive leakage from any source just using the fields, you don't need the containers. (2:03). Norwegian asks about patient with cancer in his health unit. he felt good but then got very tired. Keshe asks if he has a doctor to follow case? No. I will not answer you until you find yourself a doctor. It has to be done correctly. (2:08). A man with 7 MaGrav coils connected linked it through to the metal roof, and has a large energy field, he feels calmer. He has connected to ??, Keshe says to run the G side up to the roof, the M is already up there, then you will collect energy from the atmosphere. (2:14). (2:15). Release Italian info about getting the MaGrav into the market. Monthly payments at 10 euro for 10 years. (2:23). Question about Gans trial. (2:28). Asks about treating water for E. Coli with Gans Water of CO2 or CuO2, tests in Ghana are coming through positively. They are working on a soap that kills all bacteria. The international standard is 0, some tests have not yet gone to 0, will do more research. (2:31). A test is running in China. They want to find a

balance where the bacteria is gone but life in river safe. In Sierra Leone E Bola was totally eliminated from contaminated water. (2:33). For treatment of rivers need an energy balance btn the CuO2 and allows the life, fish, of the river to continue. Looking for CO2 and a small amount of CuO2, add CH3 into the river to allow life. On the other hand you take energy from what is above C, which is the Pl of the virus, take this out with the CuO2. If you use only CuO2 you take all the energy out, start thinking U. When working with the environment you don't just go for what you want to achieve, don't destroy the others, you support the whole of life. (2:36). If you take the energy from the virus, see what you have in your hand, AA, this is a food, you change a virus, dangerous, through the Gans exchange of energy, to a life giving thing, this is what we did in TEPCO, we created gold, you don't destroy anything with this T. You find out by creating a condition you allow normality, but what more it brings on the table. Here you have bacteria or virus you take the energy from it, inside it is a vast amount of energy, this is itself food (AA), if you use it correctly you create new life in the water. A lot of virus that are connected to the AA of the human being, can be taken away and then you are left with a vast amount of energy available to man, it's like eating beef. But this time the energy inside could be much more because. (2:38). By being connected to the virus the AA has received new levels of energy it is fully charged. Don't always look at getting rid of, see what is left, brought as a gift. If you can use it you set the path in a very peaceful way. (2:40). How do you see the U Council working? Caroline is setting up different sections on face book, one is to add veterinarians. The work of the Council is the positive peaceful application of the technology and bringing peace. It's not to fight this to get what we want, they will work in alternative ways which harms no one. (2:42). Not blaming for what has gone wrong. First rule, a U Council member should shine like the light of the Creator, to be a source of light for other souls and radiate the light and beauty of the Creator and try to reach all attributes of the soul of the Creator, in time the creatures of the U see this light and not the P, the attributes of the Creator have been stated in the many scriptures of the man in the past. The 2nd rule, you are through your soul a member of the Council, the members of council can't announce themselves as a member unless it is announced and registered under the council's panels, no members can speak themselves as a member and influencing opinion or words at this point they immediately loose their seat and a new member can stand for the open seat, those who try to show they are better servants of humanity don't stand a chance to take a seat in the council. (2:45). The selection of a soul to the council comes from giving and not by talk or P actions. A lot of people in Dubai who announced they were on the council tried to use that influence and they lost their seat. If you are of the nature of serving humanity you can come to the Rome meeting, and stand for the mother language of which you speak. To strengthen that language. (2:48). Keshe says that Gorbachev is the only world leader of the past who put the soul of his nation ahead of his position, as head of USSR he submitted his nation to freedom of its soul. It takes a lot of freedom from P to do such a thing. Sandy asks if people can't be in Rome can they attend, Keshe says we open Zoom for them to attend. (2:51). A call to Jewish people to use the T to bring the peace. The same to other cultures. You work through your soul and not by nation. We check how you behave since you join the council. The U Council has its own website contact them. It must be positive we don't respond to negativity, we work with the P, we interact with the soul of the man , any shape or form. The work of Council is the unification of the soul

of man. The 2 webmaster are Sandy and Vince. (2:59).
(universalcouncil.keshefoundatoin.org). Some news coming from Alek about treatment with Malaria.

116th Knowledge Seekers Workshop June 2, 2016 (, further explanation how the CO2 Box works,)

(:08). Man Originated Zone Habitation And Nutrition, Mozhan training program 2016. The first humans in space. (:12). Happy Birthday to Rick (61), and Vince (40's). (:15). Deep Space T means being independent of planet earth and to be safe. Man has been kept safe on planet Earth, a nursery, we are protected, the Mother Earth has provided for us for millions of years on this planet. Human race becomes like a teenager ready to go out and try to survive in U. (:19). (:21). No one has reached the world as the KF, it took Christ 300 years, Mohammad longer, they used the belief of man to control the soul of man, they got bogged down. Man has to abide by the Ethos of Space. The comfort of having everything changes the position of it, being able to see clearly changes perception and work. We are preparing the last stage for man to enter S community, it is not easy we see reactions, it will take time to become peaceful. (:24). Some nations were made contact by Space community and given technology but the final key was withheld because of war conduct, now the final key will be given upon entering Space Community, the creatures of space will make contact here on the planet. The Chinese will lead the way as a peaceful nation. All nations given the final key at same time.
(:31). We have been preparing for centuries, the United States with 50 nations, Europe joining as one nation. (:33). The Russians and Chinese join together recently, if Russia attacked by US the Chinese will release all the papers (dollars) and dump the economy of the US. It means China has taken the leadership of peace. They have all the money now. All the pieces are on the table.
(:42). Go back to original teachings, Nano materials, he has some videos of a diamond tester shows the behavior of diamonds. It only shows when there is a specific fields rejection and ??. When we look at N materials the dark layer, all is absorbed, is looking down on and not across, you will see the most beautiful crystal structures, that's why you see 20 Mega Ohms, but this way you see superconductivity, this is the behavior of creating perfect crystals, now you understand how to produce crystals. (:44). In composite materials you created different spacing, you can make the right spacing, MG field position and with it decide the size of the crystal, because each one of these takes a position within the crystal spacing perfect structure. The crystals you made as N layers is so thin but you don't have the tools to see are the most perfect crystals, because it allows the nature to do what it is happy to do without any damage and taking the position it likes. You put this N material in a liquid of another field strength and placed it and released it as a Gans. (:46). In creating a condition to go from attachment to freedom, in creating a spacing you can create any crystal size, now you need a medium not to let them loose to become Gans, but create a condition in becoming loose they find a position you can have a diamond the size of the planet, we have seen diamond structures in the U, there are stars which behave and are the structure of a crystal diamond, NASA reported this years ago. The space of the U allows crystallization in the dimension. It is the

combination of the matter which you use dictates the spacing, but now you understand how you all have been building perfect crystals, you've been releasing it, but now you have to develop a T where you can control this freedom, don't let them loose but collect them as crystals of the Gans. This is the Space crystal structure, then you can make any material in the Space by controlling the fields. (:48). Let's open the knowledge, in CO2 Box, the MG field created by the N material in respect to matter state created the field of C, it attracted MG field which now you have created in the water has created a magnet for the C in the air around the box to be attracted and match up, and in that process and in coming in touch with the O of the water created your CO2. (:50). Understand the terminology, we did not create CO2 absorption, we created MG field of C by choosing the appropriate materials which the divisions and different ?? some of the isotopes leads to creation of the environment which has the MG field of an entity. In this case the precise choice of the matter, N material and the matter just gives you enough to create the strength of the fields of C. Field Plasma Technology ... you have already created the Pl field because it lead to creation of M and G fields in the strength of the C which attracted anyone passing by, what you collected as CO2 is what falls on the bottom, but this field never changed ... after awhile your S stops producing, because it's not the field that has changed, but you have consumed all the O in the water and that's why the process stops. (:52). Understand you have already worked with diamonds, and already working with the F Pl. ?? We already explained even if you put Cu with Cu N ?? it allows the fields to flow. Now put an entity in the middle that has nothing but the fields of the Pl of the C and you create MG fields, where now you have the ability to use the fields to create your crystals. (:54). If you understand the principle you can make any size, color diamond. (:56). You can produce crystals which are uniform and have unified fields, if you extend the dimension, size and shape of the crystals. I have always said the future of the Space program depends on the crystallization, on crystals, you make your reactors out of 1 Crystal, then you have mono controllable, Star Formation of crystals, unified with no losses (of energy), but the positioning of your crystals has to be a crystal itself, then you decide the shape, color, shape ... you create a unified field protection SS. (:58). How in 10 minutes I changed the course of humanity if you understand what is written here. Now you have all the tools. Now I don't tell you Cu plate, Zn Nano Gans etc, because now you are graduates of the KF knowledge seekers, all of you. Start working collectively on the Internet. (1:00). If you create the right diamond structure of a Gans you can create anything across the U, understand the totality of the structure, many times this knowledge was given to man but he never understood, the only part he got was the matter part and he made Pyramids. This is your pyramid. Those who were in control of understanding never understood, and those who understood a bit of it tried to become the Pharaohs and other leaders. The current world leaders don't understand therefore they can't apply. Now we understand collectively that no army or nation will be superior. This was done once before but somewhere in the line the greed took place. The greed of the man is very strong, BUT NOT this time! This is why we see pyramids in every corner of this planet. (1:02). The knowledge was shared but because of the lack of communication in totality it was cascaded but those who used it to rule. This time there are no rulers, that the knowledge is shared correctly. The pyramids in different structures are the domes of their own SS, but man only made what was matter important to him and not the rest of the knowledge. Now for the first time with Mass Media we are allowed to develop this

collectively. Through understanding the T you are joining the U Community not just making a N layer. I have taught you the technology, even the Christ or Buddha did not do, the guidance of the P conduct of the man, we have taught the full knowledge with the Ethos together, and the ethos of its use in the space. (1:04). I have taught the full spectrum of every need of man, Energy, Material, Health, Food, in the language of science and ethos of the U, so you understand as U messengers we complete our work totally when the condition is ready. We start teaching you the knowledge in totality to be able to survive the basic need of man in space and the ethos to use it correctly and spread of the beauty of the Human Race in the rest of the Space. Every flower brings a beauty to the bouquet on the table, even all that man has done wrong he is still another flower of the Creator. How long the flower on the table will last depends on his own strength and weaknesses and not using others weaknesses, but using their strengths to add to his knowledge, the way we have done. We give you a platform to share what you have and proudly share it that the others use it. (1:06). All of you are in a position to be able to become the passengers of the U, but it is you who are choosing the level of development according to your understanding. In each lecture (workshop) I have put some knowledge its for you to decipher it and put it together. Now I will not teach in hours but few minutes at a time, but the knowledge is so deep that it will take years to decipher. (1:08). The Chinese are leading and they have had contact with the U Community for some time now, the same has been with Russia, USA, and a number of African nations. We know who and how the knowledge has been transferred, but we are waiting for one responsible World Leader, Commit humanity to peace and we open the rest of the doors. We expect humanity to respond to the knowledge we have given in a certain way, start making tools of peace, which can guarantee that every man can have food or energy without enslaving him to you to have his energy. I have always objected that things should be made cheap in China that the West can have the best things, and that the man in China has to suffer the separation of his children ... and then when they use it they say it's Chinese made. What a disgrace to humanity. (1:10). The energy of a man irrespective of his race is the same, the respect for man has to be the same. It's a lack of understanding of the White Race in winding himself superior because he is the last race like the last child of a household kicking to be the most important one. Whereas the first child of the Black Race is so humble because he knows he possesses all, when we stop this race division and work as one the way the KF does. When you have the insight, knowledge you can't be enslaved in space by no one. We want man to be equal with the U Community. If we go as a divided race we will be enslaved. (1:12). 2 choices stay on this planet and suffer what is coming to it, or collectively join and become One Race. You have been watched all along from the outside just waiting for you to mature. Turn the Box upside down, create the fields to make the fields, ?? put the brain of the man and create the crystals, the conditions of the Pl crystals ... put in the brain of the man when he is damaged in Stroke, you build the cell in the compartment of ??. Put the man in the right position and build the Gans crystals of the structure of the heart valve of the child with hole in heart. Now you have the knowledge. (1:15). .. F Pl T in conjunction with crystal structure, you don't need to see it, you can use the field of the balance crystal can lead to the create ion of any entity within the crystal field forces Pl or matter state. (1:17). ... Commercialization is to share knowledge in a technical way that those who can't understand it can use it .. Today is a national holiday in Italy but we don't take time off. (1:19). Governments have access

to the Space program, they see it but don't understand it, it has been on the table for years, they have been given T they don't understand, bring on the table and we'll help you understand. Because you have not committed yourself to Peace, you don't get the key. Now we are here to help you. (1:21). Chinese and Russian leaders committed to peace, but in US committed to killing machines, the youngest infant to be the most powerful. Why is Iran so peaceful because we had the Empires in past, we realized nothing comes out of it, killing brings disadvantage because you have to pay for the souls that came out of it. How many of you will start making crystals? Very simply empty the bucket which you made the Gans material in, you'll find out the bucket still carries the field Pl, you wanted the CO2 but if you look deep inside, Giovanni tested and found a field in the empty bucket. (1:23). Because now in your empty plastic bucket you have confined the fields, you don't need the water or plates, you have created a field, you have a field bucket of C. Try to bring another bucket that had CuO2 in it and see what you are going to get. Once you create the fields you NEVER lose them. You were happy to see it in the water now you have it in the fresh air. Just putting water in the empty bucket will energize it with CO2. (:25). I think he is drawing an empty bucket with water pipes on either side, run contaminated water through it and test it. The fields never loose their strength. Do you need to produce Gans, LP, vapor Pl etc, or do you create the condition of the fields and can contain it and do whatever you like with it. In the space you put fields into one end and the other out comes concrete blocks, or steel, whatever, because you have determined the size of the crystal, the organization of it ??, by putting it the right way field strength, the same way you did with patches of CO2 and others and created the taste and smell of the orange. Moving from LP to field Pl, because in the U you don't see CO2 fields, but with the environment around it, hundreds of thousands of km, without seeing the CO2, you end up in the CO2, because the fields of the U have created it, but CO2 is the last thing you want, you don't want to walk into a wall of crystal, it's not there but with your presence it comes there. (1:27). Pl fields are the essence of creation in the U. Now understand how to manipulate and contain it, but as humans you need the confirmation that I put the orange on the top, I taste the orange. If you empty the water and just breath the air you still get the orange taste and smell. Make a glass vacuum and you still get the smell and eating the orange. Man is so P he always needs something to do. ...?? you created the field around the box that brought you the protein and smell of orange. But you had to have a liquid to confirm you had something. (1:29). Do we need to give children anything for immunization, except we put them through a field which embeds info in their body that measles, and the rest cannot develop in the body to kill, then there is no need for Pharmaceuticals to put Mercury in the children to make them mentally retarded. Now we don't go more into teaching aspect but how to apply what you have learned. I give you guidance to finish it. Do we need LP to finish research in Innovation Center. (1:31). (He must be talking about running car on fields). The pistons go up and down but no fuel in the tank. It converts the fields of U into mechanical rotation to move the man. If you extend the power of Pl to become equal to the matter state of the cylinders you find out the car will run without the fuel. The teachings are coming very fast. The Chinese are mass producing Gans for the Oasis System, try to create homogeneous mono Gans, then try to use the field of the Gans to create a condition of the structure of the crystal ?? , you have to learn how to convert the energy using the position of the Gans to interact with the crystal condition of the energy.

(1:33). The Chinese space people know exactly what I am talking about. You use one to contain the other. We used Matter to create N and Gans, and contain them, now you use the condition of the Gans to contain the Pl and then contain the fields, because it's the ONLY way you can CONTAIN F Pl, not by matter but by application of the fields which comes from the LP which themselves are controlled ?? by the Gans, N and matter state. Use your matter to create the crystals of the matter. If you want the crystal of Cu to be diamond, the color of green which you are used to , CO2 ?? now you can do. (1:35). Ghana and Benjamin. Please share the knowledge. We made a soap, and they did the microbiology tests on it, amazing, killed bacteria within 15 minute range all gone. (1:37). Nano Soap microbiology Report. Soap is made from natural oils or animal fats with Sodium Hydroxide, been using for 6,000 years, first used by Babylonians. In Ghana they use as enema. In US per capita use of soap 25 lbs. in India 4 oz.. The skin is largest organ of body, easy to be poisoned through skin, gives visible and E feedback, like a rash. (1:43). Three layers of skin, water can seep easily into the blood stream via the skin. Coconut oil has anti-microbial and anti-fungal properties. it is immediately converted to energy instead of being stored. Good for the liver. Cocoa Butter is also used in N soap it has anti-aging, reduce inflammation. Palm Kernel oil has 0 cholesterol, use roots and whole tree. (1:50). How to make the soap, Dissolve the Caustic in water, add soda ash and the fats and mix. (1:52). (1:55).
(2:04). Goes over tests.
(2:09). Results were all the microbes killed at 10, 30 and 50 % concentrations. (2:13). Will reduce concentration to below 10%. Will make tests on hands of people at Public Toilets. (2:16). Keshe says historically people add caustic to fat, man has already been in the Gans and Nano making for centuries. You add caustic to seawater to make the Seawater Gans, soap is a natural type of Gans with AA. (2:20). Soap is a Gans state of protein, fat, so when you add another Gans to it, you boost it ?? , why when you added CO2, CuO2, or CH3, they all work on Salmonella and other bacteria's because the foundation of the soap you made is already AA based, so all you have done is add additional energy, in a way you created a new virus because the AA Gans is still there, ? and now you have made a virus which is stronger then Salmonella, etc. That's why that are so effective, The new virus is from the energy of CO2 added to the present Gans of AA, which you created. In this new energy packet by adding one Gans to another, is more then what is held in the body as virus, bacteria that's why you see ? destruction. You can go to the minimum amount of Gans, in your next test just use the water of the Gans. (2:22). Because now you have added energy to the Gans of the AA what you call soap. This is a new knowledge, the Gans works on bacteria's. Two years ago in Sierra Leone they got the same results but the WHO blocked them, they were threatened to loose their seats at the University. Why you see reduction in all bacteria's and viruses is because any bacteria has a base AA, and with your soap you have already created a base AA, by adding another energy to it, any Gans you add to it the power of it becomes more then the bacteria or virus (2:24). which is in the St and the transfer of the one from one to the other shows total reduction of bacteria, because you transfer energy of the bacteria which already has the common denominator of AA of the protein. This is what you have to do in the space, need a common (denominator), ? you need to have an AA in MaGrav power strength, which you can add slightly more to it you can guarantee life, you did not destroy the AA of the bacteria or virus in your culture, all you did was deplete the energy

of it, that's why it's left black, that's why you still see it, but it isn't there, if you take the residue of the culture dishes and analyze it, you'll find out it's a pure AA. You haven't destroyed only depleted it. (2:26). We thank you for what you shared you need to share it with your scientists. Now if you add a small amount, say half a percent, of soap, if the energy of that 27 -20

(2:35).
(2:38). Dr. Nash had brunt his hand back in January but so far no result then he as treated with Gans, quickly healed. (2:43). In August KF will hold a summit in Ghana for African Continent. Keshe will try to be in Ghana. The knowledge you so freely brought to humanity solved a 6,000 year old mystery. The point is that you so freely shared the knowledge, without patents etc. You just opened all the rules of this economic cycle, how easily bacteria's can be defeated, or balanced, has been the dream of the world of medicine, thousands of people die everyday around the world. You have been watched by Obama, Chinese leaders, NASA, we speak to them and know they are online, we monitor them. You destroyed half of the soap industry and Pharmaceutical Industry in the world. (2:48).

(2:55). Veterinarians will be on Facebook. Question about an illness, yes you can use because TEPCO tested it with mice. Use the water of the Gans and not the Gans it's to powerful. Dilute it in the soap 10:1. try to use CO2 Gans water first and see if works, you can use Gans water of CuO2 but it'll be a big punch, very powerful. Use 2 ? teaspoon 3 times a day, slowly let the body take it, don't use CuO2 water it's too powerful. (2:59). Talks are going on btn KF with Japanese firm Moto to manufacture these waters across the world. You can use these waters for radiation, heavy metals, (with Mercury ONLY use CO2 no CH3, CuO2), people who got MS, etc, from mercury fillings can use CO2 to balance effects, do not use CuO2 because it links up with Mercury and K and it can create a different condition, it's not hazardous but it's something you don't need. So you can clean metal toxicity from the body by using the water of the Gans, if it's not enough just add a little bit more ? try once you make the culture base, use the water, it transfers the homogenous energy to the water, you can use it a base for hundreds of years, you just pour water on it and harvest the water. (3:02). Yes you can drink the water on top of the Gans, a spoon or 2. We are running a trial on Gans supplement and drop and lotion. For the Gans ? we are using the water of CO2 not the Gans directly. Keshe suffers from degeneration of eyes, I am losing my sight slowly, I switched to retina screens to be able to read easier, I started using the Gans water for eye drops last Sunday, first time I used I had a strange tingling pain in back of brain, the second time tingling on my tongue for some hours, and now I can see what I couldn't before. He can now see at night and no pressure on the eyes. (3:06). My wonder is what has the eyes got to do with the nerves of the tongue? Do we need to wash with water, can we put the Water near the clothes and it transfers the energy? Thanks to CIA we got connected with Ghana. (3:09). (3:11). Half of Ghana groups are living on free energy. (3:13). We challenge the big University students in West to come and share so openly without peer review. Let humanity be the peer review. (3:16). This was one of the best teaching in last 2 and half years. As of today the donation of 300 euro to the KF for the MaGrav Power Unit becomes voluntary, reduce to 400 euros. The Italians will save 64% on the Units. (3:34). Doctor is testing

agriculture in Kenya. (3:37). Testimonial from a doctor who got chemicals in his eye and CO2 solved it.

117th Knowledge Seekers Workshop June 9, 2016
(Summary of science knowledge to Plasma on earth, Transportation of the soul through out Universe, Christ did it and Buddha touched it,)

(:12). We have finished this part of teaching, now we teach how to apply it. He summarizes the progression of our currrent knowledge and the sciences. ...
(:23). Now we can manipulate the fields of the U and create whatever we like. It has taken hundreds of years for some sciences to be accepted. Now some Universities are starting to accept the Pl T, because it makes sense. We are adding to the missing parts of the understanding. The proton and electron are both Pl when they interact we call it an atom. (:26). Einstein brought in the speed of light as the ultimate speed, it's wrong, but on the other hand right, it is correct only in the matter state G field strength according to our point of observation, when it surpasses that it isn't because now we can explain, show, and create fields which are much stronger in MG field above the speed of light. He worked in the matter state something he could see but not explain. He made a lot of assumptions and wrong to support what he wanted to prove. (:29). The order of Pl fields applies across the U. All their professorship gone down the tubes, so they opposition. We have to change the whole mentality of the science, immense problem, by adding to it. (:32). We started with physics with electron and proton as a basis for atom, with interaction of the atoms we get chemistry, more of the interactions we get into biology. So if the base Physic assumptions are wrong then all the others are wrong also. This was in the hands of the elite and they gave themselves titles, etc. Now the knowledge is so simple that anybody can understand, housewife making Gans. (:35). We'll show in Italy the first MaGrav has changed to a Power Supply. Some schools in Italy will start teaching Pl technology in primary schools. The Jewish lobby is financing heavily to suppress the KF technology, Susanne was trained for 3 months in Israel how to oppose KF. ... (:44). We will merge all the teachings into one workshop. (:49). Summarizes progression of N and Coils, MaGrav. The cores and the FP in center, the speed of rotation will dictate the strength of the MG field for lift, health, positioning or creating matter. we have 3 fields of interaction, it doesn't matter if you rotate it on its own or by fields of Pl. Man has a beautiful tool that not many cultures in the U have, matter state. It's been a problem for them to achieve this. With the existence of matter in making the N material, to Gans to Pl to fields. Man will go into Space with the credibility of understanding his own culture and texture. We take you as people who add something extra to the bouquet of the flowers of the U, with the P understanding and the knowledge of the Totality. (:53). By increasing the speed of rotation, or make opposite rotation you can control the Pl and create different conditions. You can pressurize it with speeds and dictate the expansion of the Pl, by compressing it you go to higher strength, releasing it you go to lower strength. Then you can go past speed of light to power of 20, or very slow (-20 times speed f light) to penetrate matter state. We have the tools to play with Pl strength, contracting it or opening it. (:56). When using the vertical coils (90 o) you are not rotating them so you have limited capacity of the fields, but because they have lined them with different Gans's

it gives the appearance of fields, which interacts with the body. So he is discussing the Health Units how their fields pass through the body from one to another, you get cancer reduction. It's the fear, cancer is the interaction of the fields, in which they found the G fields strong enough to absorb other energies, and in absorbing they solidify, or they make more of themselves. If you redefine it we all have a cancer, because the body has used this knowledge of solidification to create our bones, so they are in fact a cancer part of our body. (:58). But the body over millions of years has learned how to use this "cancer" solidifying in a correct way. Look at you kidney, liver, heart they're another cancer, if you define it as at certain points the field interaction brings things to it. Kidney creates a field attraction that it brings the liquid of the body to it to be filtered, ?? for other elements. It's an amalgamation of the fields which the body is trying to adopt itself to it, or if we take the energy from it, by allowing the weaker field, the principle of the Pl where the stronger fields feed the weaker. The cancer in body is transferring to the weaker field on the coils on the other side, it depletes itself of energy. You say it cures cancer, but cancer is not a disease, it's understanding the evolution of the field transfer within the structure of the body. Now we add more panels of coils to complete the box. (1:01). Now you can understand the patents, the man stands in a balanced box. The top section interacts with the brain, it has to have Zn and Ca, the part that works with muscles and tissues needs to have Cu and Zn, the lower part (legs) create the immune S part, yu see the lower herbs or inside the ground, garlic, mint, our bones are connected to the earth to bring the MG fields like the herbs can disinfect the body, we absorb that kind of energy from our feet we convert in conjunction with the others to protect ourselves, here (lower) you make Gans's which strengthen the AA immune S. At the bottom you create fields which absorb fields into the S, most of them have to be G, out of the top what is rejected from the coils, M. **We are here as messengers of God to support man into Space the correct way**, and we deliver as long as you can understand the process, when you don't we let you stop and wait for maturity. (1:04). This Box is the total Health of Man. ... you put someone in this box for some hours, let him out to adjust his AA, RNA and DNA, ?? then he will walk out of illness. Man is created from his E, and the interaction of E and P creates like a Electron and proton, a Coulomb's barrier which is within the field of itself, called a Soul. (1:06). If you can control the fields in the box the man can become anything ?? when you carry the soul, the E of the totality of the field is .. when you deliver it anywhere in the Space it will give you the man according to the environment which he lands. Transportation in the U dimension. You can't build a ship go to another place if the environment is wrong you melt. If in your body you landed on surface of sun, you'd fry up. But if transfer the Pl of the totality, the soul, in understanding the soul will lead to the creation of the E and P at the point of delivery according to the strength of the position, then you can land anywhere, the hottest or coldest part of U, because you carry the intelligence and E with the full integrity of decision making and surviving. (1:08). How do you transport the soul from one point to another fully intact? If you do it atomic or nuclear you have the problem of going from matter to Pl. Easy in the field of Pl, you already have the tool in your hand, ... tele-transportation or MaGrav positioning of the energy of the life of the U. Use of the coils and cores in dynamic condition. ... as the cores rotate and you compress the inner Pl you can create fields you have seen in rotation, for example, the field strength of the body and change of cancer, others interact with the E, people change become happy. The fields are

both in E and P level of man. The same reactor if you can speed it up the right way will give you the soul and its strength also. There is no difference, it's just you haven't had the knowledge to understand it. If you understand the M and G field of the soul you'll create the man, shape him. (1:12). You can (? re) construct the man according to environment, when the soul is transferred and when it come to its position it will manifest itself in the shape of ?? its P. Who will come to show their totality. Because everything in the U has a MG field strength. You can transport yourself across the u if you know the destination strength. You have the walls with coils, you created an anomaly in the S, the gaps btn coils. Now create a S where the body is encircled in totality by the fields. (1:14). with one difference, you have created rotation of the Pl in one direction, now create a field with same strength but now vertically. Looking from top down, he draws 2 circles of fields they are equal circles going down. You have a man with specific fields, his body absorbs at a given strength, and he gives at that strength to confirm his existence, if the energy is too much he burns, exploded, too little and he freezes to death. (1:16). How to dictate the fields, let's call the vertical fields I, put the man in center of box, the first field around him is I, which contains all the MG fields of the body at point of creation Earth, you want to join us at planet Zeus, you need to create a second ring field strength that matches planet Zeus, field II is M, you make the M which is the giver the same strength as destination and you transport the essence of the man's soul with exactly the same intelligence, E and the P is acceptable to the destination point. (1:19). This is why it's reported and videoed on earth that we see so many creatures suddenly disappear. Because they decide the point of presentation, appearance. ?? the stacking of these coils M, he shows a Stacker with crystal in center, the inner coil is G and outer M, instead of crystal you see the man in center. Why we teach MaGrav, done in right way its your SS, to be manifested anywhere in space according to your strength. You have to have both M and G in both layers or you'll loose the identity of the passenger. (1:21). You can manifest the essence of yourself anywhere in the U, this is a gift from us to man to allow him to join U Community, it's for man to respond correctly that we can teach more. Make coils, see the strength of your soul, this is how we will choose the U Council members of One Planet one race, because we can see the light of the soul. Blessed are those who understand. We are developing S so man can survive the worse and best conditions in U, according to his E and P. (1:23). Before we put the Gans ball in center of coils, now we put the man there, it carries his E and P, and because he is made of it, the man becomes the light of the Creator in the essence of the creation. **Christ has done it, but man blind to it because they looked at the P of it. Buddha touched it but never understood it**, because he detached himself from P matter he could work on the level of the soul, but he could not see the transportation of the soul from the village to the U Community. Now we teach all. Understand the totality of the work of Pl and the fields of the U. You write letter and put it in an envelop, the entire letter inside the envelop will be delivered, now the inner coil I is the letter, and II is the envelop, and according to the law of the transportation of the M fields you get instantly to your destination (you create an infinity loop with destination), at the speed of your choice. Now if you have a criminal somewhere and you have the essence of his scent like a dog can trace, if you replicate it he can hide in the deepest hole and you can locate him instantaneously, we can find a child also. We create a MG field of the scent which is again part of the structure of the E to his destination. Now those rulers who have raped a child, the essence is still on their body, we don't need the blood test

anymore, no place for them to hide. (1:27). If you have the clothes of a child gone missing in Africa and you put it in a S, you create the sense of his fields and you find him in a palace in Belgium. It will be done soon. We ask the world leaders themselves to bring out their own misconduct, man's judgment has been very harsh with hanging and destroying. The problem is developing the T in it's essence. You have to create the right condition of the environment you want to land in, not in ocean when want Bahamas. Transportation will be the backbone of KF Space T. What I have taught up to now is only a scratch on surface. (1:29). Make the inner coil Cu, what about outer? .. ?? you create the mixture of Gans to dictate the field btn the M and G, you decide specific point in space, you tine to the same strength and position, if it changes both of you change also so no mistake. The adventure in the U can't compare with car and house etc on earth, so Keshe doesn't want those things. The totality of the strength of the fields you create will show your E, the truth about your direction, the state of your E and condition of your soul. What I said at the beginning when you build the SS people will not walk in because they will judge themselves because they know what they have done. The U will not take criminals, because their composition will end up in a place we call hell. ?? when the P (E) doesn't appear at the strength of the P the 2 will tear apart. (1:32). You are about half way to creating these S, the Chinese are ahead, they are producing Gans's in massive quantity. You need massive quantity of Gans's, with it you can dictate the P of Man to the liquid water of his existence. When I arrive in China we'll put them into space within a short time, Mars is child's play, would you like to send any Galaxies. Join the Chinese in peaceful development of the T, or stay out to remain criminals and you'll have nowhere to exist. there's one problem I haven't told you. The Coulomb barrier of the man or his soul, has its own strength and to be accepted by the U Community, has to be at the same strength as the U C. There is no place for lying and cheating, it will be known. Like the Iranian girls they say I don't love you, but under the table they pull you to them with their legs, this can't happen in the U. (1:35). To get the human race together you have to change the whole structure of this planet and that takes time if man decides. All Europeans didn't come to the first ambassador meeting, then Italy broke rank, now they start to show KF in main stream media. The government unshackled itself from the Jewish Lobby. The KF banking S in Italy. the opposition to KF comes also from Monarchies, Illuminati, etc. (1:38). Start showing the working and beauty of T, give them the Pain Pen. The present Space T is useless, the Chinese will soon go beyond our Solar S, and I will make it that they don't have to spend a cent on military. (1:41). You need to keep the collect structure of the soul intact at any point to transport. The envelop and letter are you. I wish I was in NY with my daughter, that wish becomes your reality. Paul in Togo showed us by the wish of the man created the CO2 or CH3, the African nations will bring the beauty of humanity on the table. You are the letter, envelop, and postman. The bottle of water he showed is the creation of man and what he wishes appears, the body is 95% water. (1:44). (1:49). Jackie shows photos to measure Pl, he put an egg in vinegar for few days. Then put caustic soda in, (confused explanation), the yoke became white. K: asks everyone to try this. (1:54). (2:06). If we can use this T to bring comfort to another man we have served our purpose, this is how we increase the strength of the soul by receiving. The soul is like a huge G machine waiting for anything to be given to it so it can give more to shine more. When you help a man to be rid of pain and he says, "God Bless You", it means I give you part of my soul and your MG S goes into operation

to catch every piece that he has given you. A writer, "I made man that he have children that they may love me", which means they give from their soul that it elevates my beauty. This is all our job, sometimes we know we can't give all in one go because it's not, people, the knowledge is not ready to receive because with it they can damage themselves. (2:08). The old woman with house in desert, the King comes asks for water, she puts sugar cane fibers on top he couldn't drink in one go, she said because he would have died if drank at once. The same with Man if we give you the knowledge in one go you'd be drown, we give it bit by bit, satisfying the thirst for the new knowledge. It is your job to teach in accordance to what your people understand. (2:10). Don't try to be clever, also the people can't admit to their own lack of knowledge. I was on the table with one of the richest man in world, I put a drop of Gans in the water in front of him, K: drank it. He said I go to India a lot I can put a drop of this water in my water and don't have to have diarrhea, yes. He immediately understood and financed KF for 1 billion dollars, without asking for any return. You'll meet him soon, he is proud and wants to serve humanity. We are breaking through by example and positive application of T. (2:14). Video of simple MaGrav made by husband and wife. Italian translation. (2:17). ?? the MaGrav worked when the Main grid went down, because the Pl was charged enough to run the refrigerator and lights.(2:21). K: used the Gans drops for his own eye problem and in 3 weeks corrected. (2:23). He made a little spray bottle with Gans Water, he sprayed directly into his eyes 2 to 3 sprays and then rubs the water around his eyes, don't just drop it in the eyes, because the change in the structure of the eyeballs has also change the structure of the eyelashes, and muscles to accommodate the change in eyeball, rub the liquid around the eyes and face. the CO2 allows the generation of new tissues, if there have been any changes it balances it. When he started using it he a pain in the part of the brain to do with writing, so the change effected his writing, he had to write in a different way that his sight could adjust. (2:25). The next day that he had a change in the tip of his tongue, the eye in some way effects the operation of the tongue, because the body assumes you are going blind it has to strengthen the other organs, how would you understand the taste of the banana because now you can't see, so body has to strengthen other parts of body to compensate it. Then he felt a strong pressure on eyeballs like they are coming out of the socket, lot of muscles were moving to adjust themselves by pulling and pushing. Then he couldn't read, (a healing reaction), ... it means the whole body is re-structuring. (2:29). In past 2 days food tastes very different, good, but creates an enormous amounts of hunger, why? He's trying to figure out. Dr. Nash had good report on Gans in helping burn, it corrects 2 tones of skin color. We can use it for baldness. How the CO2 heals wounds and skin cancer. (2:34). Skin fungus, apply CO2 2 or 3 times. Mosquito bites, malaria, disinfectant in toilets. Use the CO2 Gans when traveling in 3rd World to disinfect everything. CO2 turned the water from acidic to alkaline. (2:37). Alkaline water reduces cancer, because acid is heavy MG field and absorbs heavy energies and it ?? cancer because cancer is the center point and needs heavy energy, that's how it feeds each other. If you drink this alkaline water you change the strength of the stomach Lymph transfer energy from the intestine, the energy level that the cancer was used to through the acidity of the strength is not there, it can't feed it, it gives its energy out to the weaker Pl of the Lymph and no cancer. The scientist who discovered the connection of cancer with acidity was victimized by the Pharmaceuticals. (2:40). Now you can put a few drops of Gans water in the water, start drinking 2 to 3 spoons per day

you start changing the structure of the acidity of the stomach, the strength is not there so it can't support the (cancer), you changed the environment, weaker strength of the lymph, same as the machine (Health Unit) to deplete the energy of the cancer. SO EASY. If you have cancer try this and make a patch of CO2 and put on the position of the cancer, lung, brain tumor a patch of CO2, ZnO2 and little Ca because you have to create new cells to replace the cancer. (2:42). If you have food poisoning a couple of drops. It's not the solution to everything, all you do is change the environment of it that the operation can't go through. CO2 in soap for Salmonella, because you change the condition. Anorexia is a psychological problem which doesn't allow energy to be absorbed fro confirmation, all you need is CH3, ZnO2 and a little Gans water, they'll start eating. (2:45). In coming weeks I will open the history of Man, see how they progressed over time. If we give it to you at one time you'd kill yourself. For cooking the heat of the M field transfer will cook food. Jakcie showed the egg, it absorbs energy to cook it, if the Gans strength is enough to cook or change it, the MaGrav way of cooking. (2:49). We saw a cup with egg in it, we create a S where the energy of the Pl cooks the egg, it absorbs energy from around it, you don't need burn trees. Questions. (2:52). Australian has antennae on roof. He shows a chain of coils hanging from roof. K: if you add a column sideways and us Zn coils you'd find a hippie land probably. (2:56). Add ZnO2 because it touches the E. A lot of people suffer from the mobile phone towers, maybe these coils will help. N coat the Al antennae on roof, becomes a good absorber, make sure the whole line is N coated. (3:00). In Italy apartment blocks are filled with Antennae, if they were all N coated in time it would supply the whole building with power, just need to convert it. Has anything changed with the birds and flora and fauna, he will make observation. K: put 6 liters of Gans water in the pool and all the mosquitoes disappeared. Australian says the north facing windows seem to be attracting dirt particles, K: says wash with CO2 water, its a very good deterrent. We get a lot of reports on Gans usage you couldn't imagine, but be careful with certain Gans because our bodies are AA based. (3:05). People getting black spots on the tissue in CO2 Patch, add a drop of CuO2, this are bacteria or viruses that have been depleted from the energy, out of a litter of CO2 and CH3, add 1 or 2 drops of CuO2, it's energy is different that it doesn't allow life level to exist inside it. It's possible that the toxins are being pulled out of the body, we have to do the analysis. The black dots are homogeneous in size so there is a pattern we have to find out what it is. (3:07). Epson salts poultices were replaced with antibiotics, they pulled the toxins out. (3:10). People are using the CO2 patches for sunburn, no scars. ?? You have the 3 layers plus the burn and CO2 on top, you get new skin forming without bleeding, CO2 creates a new condition for the skin to form. We did this with breast cancer falling off. (3:12). >>>

(3:20). Armands new patch for lung cancer, Zn coils on Gans water and N plate with the body btn to move the fields. And he made a nebulizer Gans coated and CO2 water for breathing and coughing. K: says to treat for 10 to 14 days. Armands a smoker and coughs, this S helped him. Don't use CuO2 for lung, for your condition don't add CH3. (3:26). When you have a cancer in lungs they have to convert the S to a H. ... when you take food in stomach the matter to N, to Gans, when goes in intestines becomes Pl into your Lymph. The liquid in the lungs is another caustic combination converting gases into N, to Gans, then transfer energy to blood cells, in fact lungs are a digestive S for air,

gases. Because Man was created out of the air of this environment first, the AA is the combination of the gases of C, O, H, N which is in environment of this planet, there are other gases attached to the AA as well. (3:29). When you breath air in to the digestive S of the salts of the lungs convert it to a Gans to Pl condition to the fields then it absorbs and transfers energy out. N is centralizing which is releasing its energy at the rate of conversion, then O converts what comes out of it is the balance of the C or CO2 it attaches itself to its own creator and we say we inhale CO2, the process is instant inside the lung, when you breath and have a problem with the P structure of lung like tumors, COPD or whatever, when you breath air to the already produced Gans S, instead of converting energy in the lungs, it is already a Gans vapor when it arrives it is immediately absorbed by the lung, it gives the relaxing time for the lung to recover (btn breaths), these Gans S you make for the lung are the mechanical lungs they make to help you breath, these are those S. (3:31). You breath in the already converted air, this bives the lung time to heal. You can use these S for lung cancer because it could imbalance other links with cancer, so you have to use a full body S for every cancer. Because if you don't process it properly in 6 months time it will be in liver. (3:33). It's like the CO2 in soap, its energy was lower then the germ so it has to give up its energy. The energy it normally uses for conversion can be used for healing. (3:35). Fro people with Heart problems, don't do without supervision of doctor of KF, make a ratio of 6 CO2, 3 CH3, 1 CuO2, Gans and make a patch this is for P repair. But most of the Heart has psychological problem because it is its feeder. Another ratio is CO2 5, Ca 3, CuO2 1, and add ZnO2 1. If you use it you'll feel a change in the palpation so you need to be a doctor to control it. for blockage fo veins and support the values. (3:37). CO2 is the transportation in the blood, CuO is building of the muscles, CH3 energize the blood that the body doesn't look for the energy and put pressure on the lungs, blood is supporter of E so add Zn, adjust to what is needed, recovery in up to 4 weeks. To be able to do this you have to understand your patients correctly and get combination right. No need for surgery. You can use this process to softly open the arteries, it's a special technique, it's dangerous. If you put patch on heart and feel a pressure it means it is interacting with you, do not touch. These are powerful S, patch front and back. You can also rebuild the heart valve while it is working. (3:42). Renan talks about the black spots on patch. Out of 100 patches one get the black spots, he thinks it's correct about the vacuum leakage of package. There is also a patch that I use all the time, reuse it over and over, and it can get black spots, there is a growth in the paper, we are going to test it. You need to seal the patch good. We give out in slums and they know how to make them. (3:47). We will collect testimonials. K: asks him to scientific test the LP to see if the water turns alkaline. He asks him to test the saliva of the person using a breathing cup to see if it changes the alkalinity of saliva. (3:52). You can travel in Space in the envelop of Pl, you don't have to cross atmospheric barriers.

118th Knowledge Seekers Workshop June 16, 2016
(the new MaGrav setup to Refrigerator, Detail explanation of pending earthquakes, how to make pure CO2 Gans,)

(:13). New MaGrav development. (:15). Hook it up to refrigerator, it turns on and off to imitate electricity. (:19). The MaGrav becomes a generator, the pre-plasma runs any appliance, this is the breakthrough. (:23). Connect to a second Unit MaGrav to see if you get wireless power for whole house. (:28). In Africa they all got 90% reduction in the first month because they connected to refrigerator. (:34). the Chinese asks for validity of the Earthquake prediction. The Chinese have targeted 2 tons of Gans. The earth is on a bed of molten material. the new reasoning is the heating in the planet is due to interactions of Pl of different strengths and directions creates both M and G fields of planet, where the release of different MG fields with different matter states in reduction from high to lower strength interaction leads to the heating of the material and rotation of the planet, either anti or clockwise. The further you go from the center you find different materials at the gaseous part of planet, the interaction leads to creation of oceans and mountains etc.
(:37).
(:45).
(:50).
(1:01). Map of earthquakes and volcanoes.
(1:13). When America goes there will be no one to protect the Jews, it's the job of Israelis to patch up relations quickly. The process is a natural, not planned by anybody, maybe it's time of correction. This is why we call on Mankind to unite by September. We call on China to take charge of human race to carry this through. The food supply will change, whole structure on this planet change. Advice to America to stop election process and invest all money into new Technology. (1:17). (1:21) Earthquake in Peru last year was the starting, In 20 years Asia will be safe, Ocean levels will change. (1:23). I will open Man's history so he can be ashamed of what he has done to himself. In terms of America whether to help them, "let nature take it's course, they will just create the same mess again". Russia and China will be the new leaders. (1:26). There shall be no borders, the last dictators to move out. It seems mankind has chosen to ignore the T and keep its arrogance. It is the end of one cycle and beginning of a new one. Most probably the dinosaurs ended not because of meteorite but from the separation of Australia, it created the climate change. (1:30).
(1:41). Keshe will be in China for 1 or 2 years. The updates on the Oasis System will be decided by them, (NOT BY KESHE). Threats by US government and Jewish lobby, he will be safe in China, his survival is the life line to the nations. (1:44). The timeline started millions of years ago. It will not be a big bang, the volcanoes in Yellow Stone are releasing pressure of plates. The solid mass under the earth is not flat, it has mountains, etc. Look at line from Central America to Yellowstone this is the twisting line of the land masses. Two volcanoes are under the snow in North pole they will dump ash into atmosphere, climate effected. Africa will push up into Iran. (1:49). Should we be going to Rome for meeting or stay at home. If you are on the Council then come. It will be live on Zoom. The global community needs to be involved and not an event in Rome. The U Council will be the guardians of the humanity. The UN will collapse. Hardly anybody has donated to the KF you are all takers, the Pens, Pads, MaGravs and thank you. What do you do when there is no plane by November. This is not just talk. Leave Obama in office for the years of turmoil. (1:55). Earthquake map in Utah, they are all .7 magnitude, yesterday 4 M in Yellowstone, it's building up. LA will be hit, AZ will be blocked. We see the push on Peru. (1:58). The earthquakes will end in few years, and realignment,

later it will open in India. This is an official website and data. (2:01). The pressure has been taken by the center it is the last straw, the skin has been pulled and now it will go. The official decision in Iran is that it will be too horrendous so we leave it go and rebuild the capital afterwards. (2:10). A lady says that she could not help being born in Europe but she never supported of voted for the corrupt political system, now I am gong to be punished? Keshe, it's not a punishment, to use your life to serve the others when the time comes, it's not a punishment but an opportunity to serve. Teach as many people as you can the T, the MaGrav is irrelevant. (2:14). I see lot of problems in Germany, the economy will be devastated, they joined with France to do what Hitler wanted to do, join together and drain the Central Banks, they created the Euro and emptied all the central banks into Bonn, now the countries need their gold for the coming crisis. After second world war Russians took the German's in payment to build capital in Kazakhstan, it's a German city and not Russia. The history of humanity is very dirty. She says it is the people in charge who did the dirty stuff. Keshe says you can't lie to yourself, you teach you serve, that is what you have to carry with you. (2:17). No government can stop you from taking a Cu wire and feeding a poor family. Don't blame the governments, you put them there. Teach the T and serve humanity. (2:20). (2:23). Man shows his Gans to take off topic. The N plate is outside the glass container, No wire connection to the N plate, the Zn is inside, he wants to know if it is pure CO2. Your setup still produces CO2 Gans, but by the color you don't know what is there, it depends what kind of Zn you have and the conditions. More or less it's pure CO2 Gans. (2:26). Keshe says try to put it the other way with Nano inside the salt water and see. Because you put the Zn inside salt water you'll also have ZnO2, Whether it's pure CO2 depends on the size of opening on top of containers. He was going to put a aquarium pump inside container. Keshe says to use C gas what they use to carbonate soft drinks. It's no use putting the O there when you don't have the C, it's from the fields setup by the N plate, need a bigger opening so you can get the C from the atmosphere around. (2:29). You can test it by making a Gans water of it and drinking some, if it's ZnO2 you'll feel peaceful, with CO2 you find you have a lot of concentration and energy. Bret comes on, he make pure CO2, the Zn should not touch the water, and you can look at your Zn plates to see if it is coming off, Bret uses 2 feet long by 1 feet, container and puts plates in large plastic bags. It still depends what glass of plastic is made of. (2:31). If you put the N plate and Zn plate on the outside you are trying to transfer the fields of Zn, the water is only a media for you to get a confirmation of it. Keshe draws a box and outside box put N coated Cu plate, and Zn on other side, the whole purpose is to produce a fields of C in the container, why don't you N coat your Zn plate alos because the field of N coat goes further in container, and you still get the same rate of production, even more (CO2 Gans). The matter state has a field to here, the Zn state of N material is here (farther out, stronger), ... you'll still create CO2, you haven't changed the material on your plate, but by making the Gans, ?? a Gans is even farther out. (2:35). Goes over the Orange on top of cup, (Gans patch of CO, ZnO2, CH3, AA), taste of orange. So translate it to box, outside the box put Gans of ZnO2, Gans of Cu N plate, you still make a Pure Gans of CO2 inside box. You put it in the water to see it at the bottom. this is history. We have moved to field T, You have created a field inside the box, you have a field of Cu inside box, ?? .. I spoke how to make diamonds, put the water in there and you get CO2. (2:39). You put the orange in water, now do the reverse, breath from on top of the orange water and see if you feel the taste of orange, energy of orange.

You are already using field T, you needed the water to confirm it. .. if you breath in or walk in the fields you'll be literally swimming in the fields of the oranges. The vertical people are the same as horizontal people all made of AA, that's why smell, taste, body of orange is an AA, which you have created a balance for it (with the Gans's around the cup) and it's trying to create a field balance, that's why you taste it. You have a burn, around cup you put the AA, ZnO2, CH3, CuO2, etc. put the unburned hand above the cup and transfer the energy, then put the burned hand on top of cup and the energy will heal your hand in no time. (2:42). This Field Plasma T is far beyond the understanding of the Man. I taught the 3 layers, but man has to see the water to believe it. (2:45). I do not exist on Wikipedia, on Facebook international figure. They control you through lack of confidence. (2:48). The man whose wife had lung cancer now is testing clear, she doesn't want to be known.... I am okay, Jack, screw the others. (2:50). We can't show the video because she's against it, shame to be human. (2:52). What about using frequency to excite the N layers would it increase the field efficiency to produce more Gans. It's the matter state and lowest strength but try it, you'll excite the liquid state but not the Gans because its too powerful as a matter state even.

119th Knowledge Seekers Workshop June 23 2016
(How to see Universal Community, build MaGrav copper tubes for the vision, new way to make pure Gans with Carbon stick, Hwo to make Food Gans, Explains how life began on this planet,)

(:10). (:15). A 20 minute tape of U Council what it means. (:22). Plays an earlier recording to U Council members, you'll walk the streets and nobody will know but they will feel your service. UN has become a killing permission, it will not be there nor the building. We are teaching man how to absorb directly without killing other beings and converting their energy. This is not a title, but who can serve better then me. We will communicate by E through the soul. For Council members, when you are standing before the sun you see no shadows, the soul of the member will be one with sun. (:36). On Tuesday we talked about entering the U Community. (:38). The Pens and Health Units show that the fields exist. The Gans gives its energy through the fields into the water, LP. (:41). Now it has the power of the Totality has been released to the fields, if you put the fields in front of the original matter it should be able to open the atomic structure, ?? comes back to feed itself, now you can make whatever you like from the fields. We take nothing with us to the Space. We create everything at the point of demand. (:44). We have just seen the transportation of matter from one place to another, we'll confirm. Keshe allowed some fake stuff to come in because they are trying to discredit the T. (:46). How do you know the UC exists if you can't see them? Man has been blind because he only looks at matter state. (:49). We put Patches on both sides of body and by field transfers the cancer went. By looking through the Gans, the Pl, you'll see the other creatures. When you put 2 babies next to each other they don't speak but communicate with each other, this will be the same with the UC. If your intention and understanding is same as him you'll hear. (:52). Make MaGrav out of hollow Cu tubes, they have to be double tubes that fields of one effects the other of both M and G then you create a condition of Pl. Now instead of 90 degrees, put the coils next to each other, you get solid,
